NINETEENTH ANNUAL GOVERNORS MEETING CLOSES AMERICAN

George H. Dern of Utah Is Member of New-Controlling Body; States' Chief Executives Give Views on Issues.

(By The Associated Press) MACHIGON, Idaho, July 27.—The nineteenth annual meeting of governors completed its sessions today with a round-table discussion of matters previously touched upon in the program specified at the executive committee meeting.

Equality of Agriculture. Ritchie of Maryland—Thinks the government should take whatever action it can to bring about equality of agriculture. Before trying some experiment he would like to see a really representative conference at which the farmer, labor, finance, industry, and the railroads would be all put on the same footing. He is in favor of a Mississippi valley food control as essentially a federal problem. He thought hydro-electric power developments should be regulated at the state level and in cooperation where necessary. He thought election laws should be uniform and should act to a definite amount on a basis of the regulated vote, and if the election laws are not uniform, they should be made so.

Indiana Will Cooperate. Jackson, Indiana—Indiana being an agricultural and industrial state has a sympathetic interest in all questions relating to the industry of agriculture and industry of the nation and is willing to cooperate fully in all matters of this nature.

Opposes Dam Project. Dern, Utah—Expressed democratic opposition to the republican governors' plan to build a dam project because it would deprive Utah of some natural resources without compensation. He stated that he hoped that a meeting next month with California interests would smooth the way for a concerted action. The governors refused to go on record in formal resolutions, each preferring to state his personal views through a number of them. They thanked Governor Fred W. Green of Michigan for his hospitality.

MINNAPOLIS GRAND JURY OPENS INVESTIGATION

Probe of Alleged Political Corruption in Hoosier State Activities of 1925 Under Way.

INDIANAPOLIS, Ind., July 27 (AP)—The Marion county grand jury today directed its investigation of alleged political corruption in Indiana to include the activities of the 1925 general assembly—the last to meet before D. C. Stephenson went to prison to serve a life term for murder.

State Senator Fred M. Dickerman and state representatives Walker Dehaven and Russell V. Duncan, all of Marion county and all republican in politics, were before the grand jury today. Duncan was closest witness in the investigation, but he made lengthy protest. Some of the witnesses would comment after being excused from the grand jury room.

SEVEN KILLED IN WRECK. CAPTOWN, South Africa, July 27 (AP)—Thirty Africans and two Europeans were killed today in a head-on collision between a Natal mail train and a freight train on the Natal coast. The Europeans and natives were injured.

Autoists Are Carriers Of Insect Epidemics

WASHINGTON, July 27 (AP)—The American automobile industry is beginning to worry about its automobile as a potential carrier of insects. "Unquestionably," federal scientists say, "many European corn borers came from Canada by motor. Other pests, buzzing about quarantined areas, have fallen into testing automobiles and been transported to new areas in a propagandist's breeze."

STORMS HALT FAMOUS AVIATOR'S JOURNEY

Rain, Hail, Lightning and Thunder 'Greet' Colonel Lindbergh and Mar Albany's "Day."

ALBANY, N. Y., July 27 (AP)—Rain, hail, lightning and thunder greeted Colonel Charles A. Lindbergh and the "Spruce Goose" today as they made their way through the crowd near them. Lindbergh and his wife were taken to a hotel near the airport where they were met by a large number of people.

Indiana Attack Wagon. The team had been drawing a crowd of spectators across the open prairie. Indians attacked the wagon and did their job so efficiently that before anyone could get the horses and wagon broken away, carrying with them the double trees of the wagon. A cowboy headed the charging team away from the excited spectators and men of the wagon.

OFFICIALS TAKE STEPS TO PRESERVE LAKES' BEAUTY

State Completes Action to Prevent Filling of Bodies of Water by Commercial Interests.

BOISE, July 27 (AP)—Final steps were taken today by the state department of reclamation and the attorney general's office, to complete the permit issued in the name of the governor for water of Fendley, Priest and Coalinga, and other interests which the State of Idaho holds. Action was taken under a law passed at the last session of the legislature, designating the recreational uses of these lakes to be superior to any other use, and authorizing the governor to file upon them.

CONFESSES MURDER

HAGERSTOWN, Md., July 27 (AP)—R. E. Walters, a prohibition agent of this city, late tonight confessed to the murder of Hunter B. Storer, 32-year-old chief clerk of the city, who was shot to death in Walters' automobile on the night of June 24, 1925.

COAL BELT GANGSTER GIVE UP LIFE FOR CRIME

Charles Birger Speaks in Open Court and Denounces Those Who 'Conspired to Hang Me.'

BENTON, Ok., July 27 (AP)—Charles Birger, condemned coal belt gangster, spoke in open court for the first time today. He denounced those who he charged "conspired to hang me," after circuit judge Charles H. Miller had formally sentenced him to hang October 15.

PRESIDENTIAL PARTY FINDS NEW THRILL IN RUNAWAY AT PAGEANT

Team of Horses Goes Wildly Through Crowd Gathered to Witness Scenes of Enactment of Gold Rush Days in Dakota.

(By The Associated Press) CHESTER, S. D., July 27 (AP)—Four thrill acts on the program were found today by President and Mrs. Coolidge when they attended the gold discovery days pageant here and saw a team of horses run wildly through the crowd near them. Later on their return home they were caught in a heavy rain storm which forced slow traveling on the slippery winding roads down the hills to the state game lands.

Indians Attack Wagon. The team had been drawing a crowd of spectators across the open prairie. Indians attacked the wagon and did their job so efficiently that before anyone could get the horses and wagon broken away, carrying with them the double trees of the wagon. A cowboy headed the charging team away from the excited spectators and men of the wagon.

DR. UPHAM MAY BECOME HEAD OF OHIO SCHOOL

Burley Attorney and Leader of Democratic Party in County Becomes Acting Prosecutor.

CLEVELAND, July 27 (AP)—The Enquirer tomorrow will say that Dr. Alfred H. Upham, president of the Idaho state university at Moscow, Idaho, will become president of Miami university, Oxford, Ohio, and that the appointment becomes effective February 1, 1928.

THE Dullest Season in Years

NEW YORK, July 27 (AP)—Arrested on charge of vagrancy, a full blooded Indian with an unpronounceable name stood in a police court in the middle of a hard riding on the plains and heard the judge sentence him to 30 days in jail. The Indian's face brightened as the magistrate added "or six hours to horse and cycle."

NEW YORK MILLIONS TURN ATTENTION TO SUBWAY BOMB PLOT

Threatening Strike Averted; Police Believe Device to Blast Tunnels Was Placed by Crank and Not by Strikers.

(By The Associated Press) NEW YORK, July 27.—With the threatened subway and elevated line strike averted, at least for the time being, the millions who ride in and out of Manhattan every day turned their attention today to a bomb found shortly after the strike was called off on one of the East River subway tunnels.

Expresses Opinion. The bureau of mines chemist expressed opinion that if the bomb had exploded the walls of the tunnel would have been blasted away and the river would have inundated the tube, probably drowning all the passengers of the passing train.

POLITICS IN CASSIA SCATTERED TO WINDS

Burley Attorney and Leader of Democratic Party in County Becomes Acting Prosecutor.

BOURLEY, July 27 (Special)—The new politics in a gold producing county were scattered to the four winds Wednesday when Andrew G. Sathre, Burley attorney and democratic leader, became acting prosecutor of Cassia county upon the appointment of the regular incumbent, T. M. Morris, prosecuting attorney, who left with his family this morning for an extended vacation on the coast.

THE Dullest Season in Years

NEW YORK, July 27 (AP)—Arrested on charge of vagrancy, a full blooded Indian with an unpronounceable name stood in a police court in the middle of a hard riding on the plains and heard the judge sentence him to 30 days in jail. The Indian's face brightened as the magistrate added "or six hours to horse and cycle."

EUROPEANS TO SEND MEN TO LEAD FOR LIVES OF ITALIANS

"A Square Deal for Sacco and Vanzetti," Leads Alfred Dreyfus, Retired French Army Officer, to Go on Mission.

(By The Associated Press) PARIS, July 27.—Alfred Dreyfus of Deleh, retired French colonel, returned in the French army, may go to the United States to plead the case of Sacco and Vanzetti, under whose death for murder in Massachusetts.

AIMAN OF TRANS-ATLANTIC TELLS OF ARRANGEMENTS FOR TRIP TO SOUTH POLAR REGIONS

Discovery Harbor First. Discovery Harbor probably will be the first contact he will make with the shores of the ice. The Arctic Explorer is in the great ice barrier and extends inland five or ten miles. On the west side Scott, who last his life returning from the pole after discovering that Amundsen had been there first, had carried the commander across the Atlantic.

WILL CARRY FOOD TO SOUTH POLE

"I plan to carry stores of food estimated to be sufficient for six months every hundred miles up to 5,000 miles. These little camps will be laid down by airplane. That is, we will load the plane with six months provisions, load it with 100 miles from the pole, and return to the base as we will take our mother airplane load and jump 200 miles to the next camp. We will do this on until we have five of them."

But it is not as simple as that. The slope is steeply upward and we must also fly a mountain range, during the course of exploration, that will take us to a height of 15,000 feet. He explained that Discovery harbor means the barrier for some distance and so will enable the party to get inland before starting to trek across the ice. The slope is steeply upward to the pole which is two miles high and it is across that marker of the barrier that Commander Byrd will try to fly.

English Trans-Atlantic Aviators Are Detained

SOUTHAMPTON, July 27 (AP)—Captain P. T. Courtney and the crew with which he flies to America were still being held here today. A police raid, and a snoring sailor were among the things that were being investigated. The flying boat which contained the aviators was detained for a time failed to work properly was "dashed" at the pier.

SECOND INVESTIGATION IN COAST CASE ENDS

Officials Accept Coroner's Jury's Verdict That Music and Dancing Teacher Drowned.

SEATTLE, Wash., July 27 (AP)—In the absence of any further evidence, officials today prepared to close their second investigation into the death of Miss Violet Maude Payne, and accept the coroner's jury verdict that the music teacher drowned after a boat capsized on the yard of C. Creigh Nelson, wealthy club man.

The renewed inquiry was opened upon the instance of Miss Payne's sister, Mrs. Mabelle Priddy, who expressed the belief that "only half the truth" was disclosed in the first report.

It was not until this afternoon that confirmation was had of the rumor that Miss Violet Maude Payne had again left overland. Prison officials, while admitting that such, declined to discuss the visit further. It was reported by the chairman of the defense counsel and related to its report in section.

"I certainly agree with Nazimova"

Consielo Flowerton is saying in her conversation with Frank De Weese as they rest between swims at Rockland Beach.

Nazimova, brilliant actress, writes:

"The Russian lady—ah, how she delights in the puff of a fragrant cigarette! As a Russian I have tried them all—the cigarettes of Cairo, Paris, London, Madrid—but here in my adopted country, America, I have found my favorite cigarette 'The Lucky Strike.' In addition to its lovely fragrance and wonderful flavor it has no bad effect upon my voice—so even when I go abroad I carry with me my little trunk of Luckies—and enjoy a puff from America."

Nazimova

You, too, will find that Lucky Strikes are mild and mellow—the finest cigarettes you ever smoked, made of the finest Turkish and domestic tobaccos, properly aged and blended with great skill, and there is an extra process—"It's toasted"—no harshness, not a bit of bite.

"It's toasted"

No Throat Irritation-No Cough.

Advertisement for Clicquot Club Ginger Ale. Includes text: "Time creates the matchless, mellow Flavor...", "Aged 6 months", "Clicquot Club Ginger Ale", "YOU find it—this aged, mellow softness—only in Clicquot Club Ginger Ale...", "And what accounts for this haunting charm of flavor? The rare quality of pure, natural spring water that flows from its natural source...", "That is why the offering of Clicquot Club is a compliment to any guest; why its use with other beverages produces such satisfying results. To have it in your home, to order it at your club, hotel or restaurant, to insist on Clicquot Club everywhere, is to show appreciation of those rare qualities which always have made 'vintage' wines famous."

HIGH COMMISSIONER BELIEVES BRITISH WILL SETTLE ISSUES

Representative of Union of South Africa Feels Confident of Reasonable Chance to Succeed at Geneva Conference.

(By The Associated Press) GENEA, July 27.—Sir John G. Galsworthy, high commissioner for the Union of South Africa, London, told the Associated Press correspondent tonight that he was convinced the British delegates would return to Geneva from London with a genuine desire to reach an agreement with the Transvaal contingent, to which he is a delegate representing South Africa.

Atmosphere Promising

This statement came at a time when the atmosphere here was extremely pessimistic because of reports that Lord Cecil had said the British would return to Geneva with an even stiffer attitude than when they left.

Lord Cecil, however, in his address to his observations during a recent visit to London and on actual talks with the British delegates, seems to be optimistic. He went on, it is in the interests of the dominions generally to exercise an influence to maintain a good understanding between the powers represented at the conference, and as the representative of South Africa, he has every desire to see the best results in existing friendly relations between the United States and Great Britain.

Will Not Prove Insuperable

He said he had convinced his bit to promote a policy of appreciation of each other's viewpoint. He thought the question of eight gun cruisers, which the British thought they had the right to build, would not prove an insuperable problem.

"I believe that the British will do anything possible to meet the American and Japanese viewpoints," he said, "and the conference to a successful issue."

Is Member of League

"The Union of South Africa is a member of the league of nations and very much interested in the work of the preparatory commission on disarmament and would like to see that work carried out. The Union of South Africa desires this present conference to be a success, feeling that it would strengthen them, not only in their disarmament efforts, but also in its aim of promoting international cooperation in all fields."

GOVERNMENT PROTECTS FISH GAME AND FOWLS

Ten Million Acres of Land Will Be Embraced in Federal Preserves of Nation.

WASHINGTON, July 27.—Ten million acres of land will be embraced in federal preserves for the protection of fish and game when the government acquires the upper Mississippi, the Red and the Gulf of Mexico.

Regulations for the new preserve were signed July 27 by Secretary of Agriculture Jardine and Secretary of Commerce Hoover.

Not in the least of protection against wild life represented by the federal preserve is the million acres of land converted area of its own into conservation projects, and hundreds of miles of land under existing regulations for its protection.

Figures from the United States Biological Survey, issued July 1, show from 18,000 to 200,000 acres involved in the Mississippi wild life project, 30,000 acres of which already is under protection to the government at \$5 per acre. Most of the territory is in the states of Minnesota, Wisconsin, Iowa, Missouri and Arkansas.

While federal regulations will predominate in the preserve, there is to be no conflict with state laws and game laws. It is P. S. Sheldon, chief of the biological survey, who is to be in charge of the project.

Officials of the biological survey emphasize the benefit of uniformity in the project.

"For 30 years," they say, "this country has worked to replace local state laws with a uniform federal law. North Carolina is the most recent state to join the project."

CONTRACTION IN POULTRY INDUSTRY

1927 Finds Considerable Overproduction; Prices Have Fallen Since War Days.

OTTAWA, Ont., July 27.—The poultry industry in the United States and Canada is finding itself in a predicament today, as the industry has fallen into a depression since the war days.

OTTAWA, Ont., July 27.—The poultry industry in the United States and Canada is finding itself in a predicament today, as the industry has fallen into a depression since the war days.

Reach High Levels

Mr. Dunlap explained that after the beginning of the world war, the price of poultry and eggs reached relatively high levels stimulating production.

Over Production

In 1922, production had become considerable overproduction and prices have fallen to their lowest levels since the war.

"It would appear," he continued, "that supply demand for eggs and poultry is falling below normal production. There must be some temporary contraction in the industry if the price situation is to be corrected."

MISS EVELYN SMITH, candidate for mayor of Birmingham, New York, has a freak platform. It is expected she will be elected.

SALE OF CABBAGE ON NEW PLAN BRINGS BIG PROFIT

WATERPOOR, Pa., July 27.—Production and sale of cabbage under a cooperative plan has brought large profits to hundreds of farmers in this section of northwestern Pennsylvania.

The cabbage growing industry started to here more than 40 years ago, but for long the farmers resorted to a nondescript strain with very little success.

W. W. Lee, an enterprising grower, experimented and chose the Danish strain as one particularly suited to this soil.

A husband grows members of the association and nearly 500 acres are devoted to the crop.

MARINES IN PURSUIT OF RETREATING NICARAGUANS

Major Floyd's Column Is Slowly Following General Sandino's Forces; Plans in Action.

MANAGUA, July 27.—Major Floyd's column of marines and constabulary is slowly following General Sandino's forces across information from airplanes received today indicates.

The planes bombed some of Sandino's rear guard, scoring direct hits, and killing or wounding a score.

Sandino has made two unsuccessful attempts to ambush Major Floyd's column.

Other small detachments of United States marines are cooperating with Floyd and making every effort to block Sandino's retreat, but it appears that the rebellious general is moving into the mountains where his capture will be very difficult if not impossible.

HOURLY MOVEMENTS AND PRICES OF PRODUCE TOLD TO FARMERS

WASHINGTON, July 27.—Every farmer in the United States has access to a million-dollar information bureau.

It is Uncle Sam's market news service, operated by congressional appropriation. Daily through the radio, across cables and miles of telephone and telegraph wires it conveys the latest market information.

Alleged with the Titanic system, cooperative "listening posts," clearing hours of information are supplied to farmers through the bureau of agricultural economics.

The latest such institution has been established in San Francisco, and the county of the California Vineyardist association.

It will gather data on prices, supply and distribution of grapes.

The information will show the number of carloads of each variety and grade sold at different prices. It also will show the number of carloads of each variety and grade sold at different prices. It also will show the number of carloads of each variety and grade sold at different prices.

The information will show the number of carloads of each variety and grade sold at different prices.

NECESSARY FOR EDUCATORS TO INCREASE KNOWLEDGE

LOS ANGELES, July 27.—Educators here under a greater strain than ever before, and it is necessary for them to increase their fund of knowledge and their ability to apply it, says Mrs. Susan M. Dorsey, superintendent of Los Angeles schools.

"The great increase in public information and the marvelous social changes of the last decade, exceeding in variety those of a century before, make it necessary for educators to have a greater variety of preparation and depth of knowledge," she believes.

"Training schools must be multiplied order to supply the public schools with teachers of the caliber needed."

Stopped Traffic for Duck

Traffic on a busy street near downtown, Eugene, Ind., was held up for ten minutes when a duck fell on the sidewalk.

The duck, which was a male, was seen to have fallen from the roof of a building.

The duck was seen to have fallen from the roof of a building.

Famous Spanish Palace

Escorial, in Spain, is the name of the palace of the King of Spain. It is situated among the hills, 30 miles northwest of Madrid.

The palace was built by Philip II, the king who sent the Spanish armada to the Americas.

The palace was built by Philip II, the king who sent the Spanish armada to the Americas.

RETRAIT FOR SMUGGLERS FOUND IN OLD RYE CHURCH

BOISE, July 27.—The Oregon State highway patrol today served notice that it would appear from a public utilities commission order denying it the right to install a meter on the premises of the rye church in Minidoka county.

The railroad petitioned for the right to install a meter on the premises of the rye church in Minidoka county.

The railroad petitioned for the right to install a meter on the premises of the rye church in Minidoka county.

Named for Englishman

The town of Amos, Wis., was named by Governor Donnell, since it was incorporated in 1750, in honor of Lord Amos, who in that year had taken it from the Indians from the French, and later served as commander in chief of the armies in America and as governor of Virginia. He did not found Amos but his name is named simply for the town.

Not the Real Thing

Much that passes for genius these days is merely talent with a good press agent.—Boston Transcript.

WINNER OF PULITZER PRIZE WRITES AMERICAN NOVEL

NEW YORK, July 27.—When Louis Bromfield was told he had been chosen as the winner of the Pulitzer prize for the best American novel, he took no time off for celebration.

He took no time off for celebration.

He took no time off for celebration.

Agreement in Dawes Plan Kept by Germany

PARIS, July 27.—Germany has agreed to keep the Dawes plan, which is the vehicle of the reparations payments at a general meeting held here today.

The commission approved several contracts entered upon by France and Germany concerning the redemption of American and Hungarian bonds, growing out of the war settlements.

The Mark

People who are not themselves better than the mark of a lack of originality. In fact, it is the mark of undeveloped powers, and it carries the penalty of insignificance in the most valuable thought and the most difficult pleasure in the world.—London Daily Telegraph.

Intricacies of the Law

An investigator reported on "invisible" camera discussed as a law book. It is not the first thing hidden in law books.—New York Sun.

Makes Dark Stars Light

A new solution has been found for the problem of dark cellar steps. A border of white painted around each step makes the edge stand out white clearly. The falling light then indicates where to learn the ledge to obtain water. Oil of peppermint also granulated he shows in their cutaways, are said to help keep rats away.

TWIN FALLS PROJECT IS BEST CAREY ACT RECLAMATION TRACT

Follower of Union Pacific Pays High Tribute to Country and to Success of Irrigation Within Its Boundaries.

High tribute is paid to Twin Falls county in the Idaho folder issued by the "United States and Union Pacific railroad system" which has been received by the Twin Falls chamber of commerce.

The folder declares that the statistics regarding the county which it declares has shown the greatest development of any in the state. The section devoted to this county follows:

Twin Falls county shows the most rapid development of any county in the state. Less than 25 years ago it was an all-Indian reservation. It adds county in the number of its people. It ships thousands of cars of agricultural products of all kinds annually. It ranks today as an advanced farming section.

The county seat, Twin Falls, has 324 people with 100 families in the public schools and the most elaborate school buildings in the state. It also has the finest county court house in Idaho. In Twin Falls are hundreds of paved streets, lined by handsome homes and in the business district the stores rank with those of cities of several times its population. The traveler will find comfortable hotels and every convenience necessary to his enjoyment, a fine chamber of commerce and civic organizations, churches of every denomination, and all of the best-kept night societies.

Twin Falls county is the result of probably the most successful Carey act project ever undertaken. This project reclaimed 240,000 acres of land, taking the water from the Snake river at Mulder. There is also some land irrigated by artesian wells and some by small streams. There are more than 200,000 acres of irrigated land now under cultivation in the county.

The soil is so fertile that alfalfa makes from four to seven tons per acre, wheat as high as 90 bushels, with an average of around 50 bushels, corn 80 bushels and other crops in proportion. In 1923 the bean industry was begun on an extensive scale. A very superior quality of beans known as the Idaho Wonder, was produced and the growers were paid upwards of \$2,000,000 for their crop. There is a large sugar factory at Twin Falls. The land yields heavily in sugar beets, a production of 20 tons per acre being not unusual. Many sheep and other livestock are fed in the county. Dairying is now well under way, and there is no question but that it will soon take rank among the leading industries.

There are several important shipping points in Twin Falls county, aside from the county seat. Among these are Bull, which has a population of 2,216. Flour with 102, Kimberly, with 501, and Hansen with 278. Good growing has long been an established factor in the agricultural wealth of Twin Falls county. It is famous for its alfalfa and clover seed, of which many carloads are shipped each season.

Willie Willis BY ROBERT QUILLEN

The reason I'm drinkin' so much water is to stretch my stomach, so I'll be ready for watermelon time.

Copyright, 1927, Publishers, Spalding-L

BERGER MAN IS FINED UNDER TRESPASS LAW

What is probably the first prosecution under the new criminal trespass law of Idaho was tried Wednesday afternoon at Coeur d'Alene. Arrested complaint of his neighbor, A. A. Farrell, was found guilty by Justice J. M. Dalrymple, and given the minimum fine of \$25 and \$100 as a condition of appeal. Both parties live at Berger.

The law under which this prosecution was conducted by County Attorney C. W. Whitton, provides that anyone who shall enter a place across any crop before harvest or leave open gates on the property of another without the leave of the owner, shall be guilty of trespass and subject to a fine of from \$25 to \$200, or to not more than six months in jail, or both.

It was alleged that Parrott took five head of horses owned by Gates; that the latter came and let them out from the corral, and that in getting them home they ran across a bean patch.

COFFIN FINDS GRANGE FAVORS FIGHT

Sherman M. Coffin, representing the Idaho State association, says that the movement to carry on the freight rate fight at the meetings of the granges before the Interstate commerce commission is receiving much encouragement at the meetings of the granges. At the social of the Twin Falls grange at the Baker home, at the Hansen meeting and at Bull's assurance of co-operation have been given. It is stated.

FILES INJUNCTION SUIT

Injunction suit has been filed by North and Ager in behalf of Pay Cox against Mr. and Mrs. D. E. Hegan to prevent them from entering on certain lands possession of which Cox claims and on which he alleges they have cut beans before it was ripe and therefrom took a share-crop. He claims that the Hegans in November, 1925, gave contract for sale to C. A. Navin, which he asserts that he purchased July 1 of this year and that he is entitled to the property, and that no notice of forfeiture of the contract has been filed.

JAYHAWKERS TO PICNIC

Congressman Addison T. Smith will deliver the principal address at the annual Kansas camp picnic at the city park in Bull Sunday. Delegations are expected from Gooding and Bull. All Sunflower camps are invited.

TWIN FALLS, IDAHO, THURSDAY MORNING, JULY 28, 1927.

NEWS OF THE DAY AS CAUGHT BY THE CAMERA

SCENE OF RIOTING—The Austrian government has been upset as the result of a bloody clash between police and Socialists, who, angered at Fascists, stormed the government building in Vienna—shown here, and were dispersed only with machine gun fire. (International Illustrated News)

FROM JAPAN—Japan is landing more and more troops in China. Picture shows the Hongkong Maru arriving with more troops for Shantung, to protect Japanese interests there. (International Illustrated News)

OFF STAGE—Irene Castle appears to be more interested in rearing her daughter than returning to the stages. They're shown vacationing at St. Andrew's-by-the-Sea, New Brunswick. (International Illustrated News)

A MOMENT OF DEATH—Vira, famed Spanish bull fighter, is tossed into the air and caught on the horns of an enraged bull in the corrido at Madrid. Remarkable picture snapped a second before he was impaled. (International Illustrated News)

REWARD—Clarence Chamberlin returns to the United States with his most prized reward for his trans-Atlantic flight—his mother's kiss. (International Illustrated News)

SLEMP MAY GET JOB BACK—If Everett Saunders quits as Secretary to President Coolidge, which it's reported, he may, C. Elsom Elmsp (above), may get his old job back. Elmsp quit the post on March 4, 1926. (International Illustrated News)

STETHOSCOPIC ROMANCE!—Helen Lee, Worthington, former Follies beauty, is to marry Dr. Eugene Nelson, of Los Angeles. Dr. Nelson saved her life during a recent illness. (International Illustrated News)

HUNDREDS HOMELESS IN FLOOD—Hundreds are without homes as a result of floods in Willow Creek, Colo., caused by high rains. Damage to property, particularly mines, was high. Picture shows debris piled at the mouth of the creek. (International Illustrated News)

AMERICA HOPE WITH BYRD—The America, the plane in which Commander Byrd crossed the Atlantic, will be rebuilt in the United States. Latest picture shows what's left of it being assembled at Vez-Sur-Mer, France, for shipment. (International Illustrated News)

GERMAN ENGINES NOT LARGE ENOUGH FOR OCEAN FLYING

While Airplane and Airship Construction Is on High Level More Attention Must Be Given to Efficiency, Says Expert

By The Associated Press
BERLIN, July 27.—Airplane engines constitute the chief problem confronting German aerial navigation today, in the opinion of Dr. Walter Rath, president of the German Aircraft Manufacturers' association. German engines built at the annual meeting of the association, are not big enough for trans-Atlantic flights. While airplane and airship construction is on a high level in all other respects, he observed, the question of more effective engines will be given special attention. He also agrees with Clarence D. Chamberlin, who emphasized that trans-oceanic flights are simply a question of "bigger and better engines."

Director Otto J. Mergle of the Luftfahrt, another speaker at the annual meeting, agreed with Dr. Rath as far as motors are concerned, but insisted that numerous instruments for airmen and fog lights must be added to the equipment of all pilots before flying will be perfectly safe.

Congress Alcohol Abuse
BERLIN, July 27.—A scathing rebuke of prevailing alcoholic abuses is contained in a report of the bishops at conference in Poland caused to be read from the pulpits of all Catholic churches in Germany recently.

In strong language the letter sets forth that fabulous sums are daily being squandered for alcoholic debauches and that public houses have come to dominate all social festivities, club meetings, family parties and even the forms of amusement on the Sabbath, and has frequently led to violent excesses. It points out that all social spheres—complaints are increasing about the rapid spread of the alcohol habit. It recently published statistics on the startling increase of alcoholism a forecast must be seen of a life of misery for the masses.

Family Holds Reunion
BERLIN, July 27.—To celebrate the anniversary of 500 years of uninterrupted family history, men and women bearing the name of Martinus flocked to Berlin recently from all parts of Germany and several foreign lands. The family roll call showed that there are Martinuses in Austria, Germany, Hungary, Poland and Korea.

The founder of the Martinus family, Giovanni Martinus, was born 1427 in the Italian city of Narni. He achieved fame as a teacher of philosophy and medicine at the universities of Padua and Bologna. Later he entered the service of King Matthias Corvinius of Hungary and through his assistance a Hungarian girl founded the Martinus family.

Apprentices Earn \$12 Month
BERLIN, July 27.—Almost 4,000,000 wage earners in Germany must content themselves with a monthly wage of \$12 or 50 marks, according to figures by the Institute for economic research. Most of the underpaid workers are apprentices.

By far the largest group of wage earners draws monthly wages of \$25 to \$35. It comprises 8-13 millions. Almost a 1-2 millions earn from \$12 to \$25.

Foreigners Arrived at the Coast
BERLIN, July 27.—Official immigration stamps. Under the German law, all wage earners are compelled to enroll in one of the government health, fire and accident insurance institutions. The premium is paid weekly, contributing to the income in the case of sickness or unemployment during the past office.

The statistics cover the cases of 18,000 wage earners in the past month. Employees with fixed annual salaries, nor business or professional men earning their incomes independently. Of these, 10,000,000 only \$200 earn more than \$75 monthly.

Woman's Hair Causes Death
BERLIN, July 27.—The hair of a woman proved a fatal conductor of electricity in Dresden, Schaefer, a young woman, was electrocuted while she was struck and instantly killed by lightning which shot down the electric lighting in a lamp and from there to her hair as she was combing it out.

Variation in France
BERLIN, July 27.—Eight boys and girls of high school age, all from families of modest means, have left for France to spend the summer with guests of French families having boys and girls of the same age. In return, 60 French boys and girls will come to these German families five weeks later for a stay of equal length.

The project for this novel exchange of students was managed by the League for Human Rights, an international pacifist organization. The league feels that if Frenchmen and Germans are to be friendly, they must know each other.

Another Grange

THE ICEWAGON continues to train football players. John Shennan, head coach of the University of Kansas eleven, is shown visiting Ice, Ice homes in Lawrence, Kansas.

BERLIN, July 27.—A new Grange is being organized in the town of... The German and the French governments showed their sympathy for the scheme by granting free visas and greatly reduced railway fares.

Tragedy of Clock's Hands
In the southern hemisphere the shadow on a sundial travels clockwise. As the hands of the sundial clock moved in the direction of a sundial shadow, our clocks would have hands moving from right to left. They had been first made in the southern hemisphere.

CANADA'S JUBILEE BRINGS WALES BACK TO FARM LIFE

Dates of Prince's Western Home Will Swing Open to Receive Its Usually Absent Master.

HOH RIVER, Alta., July 27.—(AP)—Dates of E-P ranch, near here, will swing open in August to receive its usually absent master, the Prince of Wales.

To pay royal and ministerial representation at the 50th anniversary of the birth of the late Queen Victoria, the prince will spend a week in the West.

After a day of two in Quebec—the party will proceed to Ottawa for an official call on Viscount Wellington, governor-general of the Dominion, who has arranged formal ceremonies in connection with the celebration of the Diamond Jubilee of Canada's confederation.

From Ottawa, the prince will bring the party to the ranch where he will prize-winning blooded stock. He has continued his schedule of events before on the ranch he kept on schedule. This appears to be his only place free from social and ceremonial demands.

Such public functions as Wales does attend while here are never quite sure of his presence, but often than not the prince arrives in khaki riding breeches and ten-gallon hat which confer upon him something of the uncouth he seeks.

Photographers are barred from his ranch, but his highest does not object to snapshots by amateurs.

Educator Rises

BERLIN COLLEGE, in Ohio, one of the oldest colleges west of the Alleghenias, now has one of the youngest presidents in the country. He is Dr. Ernest H. Williams, formerly of the University of Chicago.

SECT PREPARES FOR COMING OF SAVIOR

SYDNEY, July 27.—(AP)—On the shores of Sydney harbor there has arisen a white amphitheatre, the pillars of which are reserved by persons who expect a second coming of Christ across the waters of the harbor.

The amphitheatre built under the auspices of the Australian Section of the Order of the Star in the East, cost \$40,000. Its stage is backed by pillars of conventional Hellenic design of marble size. Every person who contributes more than \$5 is allowed to have a reserved seat dedicated to himself or a friend.

Dr. Mary Roake, national representative of the sect, says: "The amphitheatre has been erected by the order of the Star in the East for the sake of the Christ, the appearance of which is expected by the members of the order to announce and prepare for."

"Members of the order feel that by providing buildings specially erected for the reception and his teaching, effective service is being rendered. The population is led to anticipate the coming of the Great One and a place is ready where He can meet, teach, heal and bless the people. The amphitheatre may be regarded as the forerunner of similar buildings in other countries."

Happy Findings
One day the tutor of a surmise de Henville, while playing tennis at Stour, missed making his point, but found the principles lost. Several pounds of ivory when a fragment of paper was blown across his racket. The celebrated "Mama's Diamond" was its first appearance in the hands of a devotee child in India.—Market for Exchange.

MEMORIAL FORT MARKS CLARK'S HEADQUARTERS

HARBOURSBURG, Ky., July 27.—(AP)—A wooden structure, with three block-houses and four cabins, now marks the site here where George Rogers Clark planned his conquest of the Northwest.

The replica of the old fort, which was constructed by the Kentucky Pioneer Memorial association, also is to

state's latest park. Among the features in the 18 acre plot is the in which Thomas Lincoln and N. Lincoln, parents of Abraham Lincoln, were married. It was moved from Washington county, Kentucky, to the park.

Tourists visiting the blockade stay in the cabins a night if desired.

Newspapers had reach the people stay to attract.

Hats, \$2.50 For \$3.95 to \$5.95 trimmed hats that are awfully smart.	Tissues, 25c yd. 30-inch tissues; very fine; a whole dress for not over \$1.00.

INCREDIBLE but TRUE

Had she made the French Dressing before they came they would never have believed it was her handwork, for it was a very exceptional dressing.

But she waited until they sat down to dinner. And then, right at the table, expertly, assuredly, she stirs and blends and seasons. They watch. They taste. They exclaim.

Your salad is twice as interesting, twice as much admired if you dress it yourself at the table. And your dressing is so much more appealing when it is freshly blended.

If you like a mild-mannered French Dressing use three parts of Wesson Oil to one of lemon juice or vinegar. For a tart dressing try two parts of vinegar. Let your own taste, and the strength of your vinegar or lemon juice decide it. Salt and pepper—paprika to make it gay.

Then, if you like, vary it. Add a bit of hardboiled egg—for a vegetable salad. Or bar-le-duc—this for fruit salads. Or a sprinkle of grated cheese—on green salads.

You will find Wesson Oil an important part of this recipe. It is delicate in flavor and blends just as you want it to. And, as everybody knows, Wesson Oil is good for you. Three excellent reasons for its popularity.

Booth Merc. Co.

ONEER PROGRAM BRINGS BIG CROWD

port Entertains Many for Two Days; Horse Runs Away With Rider; Drowns in Canal.

REPORT, July 27 (Special to The Post)—The Pioneer celebration, Sunday and Monday, drew the largest crowd that has ever been in this city. People were here from all over Idaho. There were plenty of attractions to keep the crowd busy all day Monday.

With the parade at 10 o'clock, which was judged by all to be the best yet seen here, the day was a success. After the parade there were numerous sport events including foot races, novelty races and other kinds of amusements. One of the greatest excitements of the day was when a chicken was released from the top of the Bush building into a crowd. One of them had a prize on its wing and the way the crowd ambled for the chicken was very amusing.

Horse is Broven in the morning, while the various sets of sports were being carried out, was a rodeo at the bull park. There were four real business horse riders. One of the horses was poked from the rider and ran into a canal north of the bull park, carrying his rider with it. The rider dismounted and got out but the horse did not make the bank and was drowned before help could reach it. It was the only accident reported during the day.

Devo Wins Game At 3 o'clock a wild game was played in the arena. It was a holly contested game, the score standing 4 to 1 up to the eighth inning, when Devo scored one run, getting one more run in the ninth and the score was again tied. It was necessary to play another inning. Devo ran one man across the base and Rupert failed to score. The Evans Carnival company furnished amusements for the children during the day, and at night for the grown-ups.

At about 2 o'clock this morning the fire department was called to the W. Hunter home just west of the city. The fire had broken out in the barn, which it is presumed was caused by a fire having dropped a lighted cigarette in some hay. Little time was lost as the department responded quickly and attached the pump to the canal near the place and soon extinguished the blaze.

VELLS COINS WORDS IN LATEST NOVEL

NEW YORK, July 27 (AP)—The English language increases occasionally even by contributions from persons who do not consider themselves philologists. H. O. Wells, who makes claim to being a historian, novelist and philosopher has coined a new word which makes its debut in his latest novel, "Meanwhile," soon to be published. The new word is "meanwhileing," through its use Wells indicates "the odd between the facts of today and the facts of tomorrow."

TEACHERS TO DRAFT OWN CODE OF ETHICS

SEATTLE, Wash., July 27 (AP)—Should teachers accept the daily apple that little Willie Smith brings her? How do you determine what is beneficially left on her desk around December 25?

Developed Steam Engine Thomas Newcomen, a locksmith of Dartmouth in Devonshire, England, may fairly be said to have been the first to put the steam engine to practical use. The steam engine for which he took out a patent in 1705 remained the type in use for pumping water out of the Cornish mines till toward the end of the century, when Watt added the condenser.

HINDENBURG MAY RESIGN PRESIDENCY OF GERMAN NATION

Present Head, on Occasion of Eightieth Birthday May Announce to World His Retirement From Position.

Hindenburg, on the occasion of his eightieth birthday on October 2, announced to the world that he had laid down his baton for Germany and that he would retire from the presidency. Those intimately acquainted with him, however, are of the opinion that he will not do so. The rumor persists that the resignation is impending.

Five names crop up as possible successors to Hindenburg: Foreign Minister Gustav Stresemann; Hans Luther, president of the Reichsbank; Johannes Schmitt, former chief of the army; Oskar von Seeck; and the chief justice of the supreme court, Walter Simons.

Belgium Debate.
BERLIN, July 27 (AP)—A movement to lift the ban on smoking in music halls, cinemas and kindred theatres, a committee of the London League, has been started by the National-Germans.

The police in all theatres, has assumed a diplomatic attitude. They maintain that no law forbidding smoking in theatres of the above description really exists, and that a police ordinance to that effect could not be enforced if all building regulations for theatres were properly complied with. They refer to wider spaces between seats, a greater number of fire exits, adequate means of ventilation, etc. As to the movie houses, the authorities further contend a continuance of the prohibition against smoking will be necessary until non-inflammable films are manufactured.

Hotel for Children.
BERLIN, July 27 (AP)—The city of Berlin claims to have the first hotel for children only.

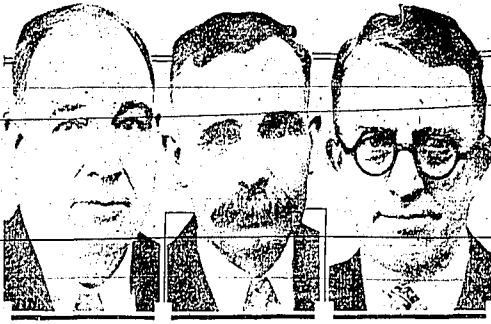

This hotel was erected by the city's juvenile welfare organization in one of the quiet districts of Berlin. It accommodates children sent to residential places, who have to make a stop-over in Berlin. The hotel has room for 250 youngsters.

Prices are very low. For a night's lodging ten cents is charged. Breakfast is 2 1/2 cents, and lunch or supper seven cents. Good care is taken in handling the baggage of the youngsters, and insurance in the amount of \$10,000 against fire and theft, is provided at a charge of half a cent.

Scene of Salicide.
BERLIN, July 27 (AP)—For the first time in its history the venerable Cologne cathedral, whose foundations were laid in 1248, has been the scene of a suicide. A young man of 25, from Steffin on the Baltic, shot himself in the famous house of worship.

The incident carries with it far-reaching consequences. According to the regulations of the Roman Catholic church an ecclesiastical edifice is considered polluted by an act of suicide, and the whole ceremony of consecration must be gone through anew. The house will be in charge of the Arch-

BROTHERHOOD LEADERS

FINANCIAL AFFAIRS of what is called the richest labor union, the Brotherhood of Locomotive Engineers, now are in the hands of a board of trustees appointed from the ranks and they are chosen members of the board.

W. G. Van Pelt, J. C. McElmurray and S. H. Huff, they are empowered to name new officials of the great bank controlled by the brotherhood.

Episcopal of Cologne, Cardinal Karl Joseph Schulte.

Retained and Seized More Milk.
BERLIN, July 27 (AP)—The consumption of milk in the restaurant of the German Reichstag has increased 60 to 70 per cent, according to Wilhelm Sollmann, socialist deputy and former minister of the interior. Herr Sollmann, leader in the German "day" movement, points to these figures as hopeful signs that the use of intoxicating liquors, even by legislators, is out of the water in Germany.

Refrains from Berlin.
BERLIN, July 27 (AP)—The consumption of beer in Berlin was 102,000 respectively during luncheon hours, while before the war a "Reichstag" took it almost as a personal insult if a guest did not order one or beer, many protesters have insisted their waiters not to suggest drinks unless the patron asks for them.

Accused of Laxity.
BERLIN, July 27 (AP)—Because of failure to enforce the anti-smoking vaccination law as rigidly as before the war, officials of the Prussian board of health have come in for a reprimand by the minister for public welfare. In an order the minister criticized the extraordinary number of cases of evasion of the law that had come to his notice, and the disproportionate number of cases of vaccination on record compared to the total number of inhabitants.

Edict against all officials charged with the enforcement of the vaccination law in question herewith to enforce the prescribed compulsory vaccination law as rigidly as possible.

Stages Strauss Opera.
BERLIN, July 27 (AP)—Franz Professor Marie Gutheil-Schoder, the famous German prima donna, is the first woman to officiate as stage manager on the opera stage in Germany. Her stage manager of Richard Strauss' "Elektra" at the Dresden state opera was well-received by the public and press as an unprecedented success.

The First Requisite.
The first step in the welfare of a child is to see that the home which constitutes his personal atmosphere is steeped in the spirit of good will toward men.—Henry D. Cope, in "Inglorious Education in the Family."

Why They Dined Out.
"I can't find my own supper, anywhere," lamented the lady of the house. "Probably away taking the rest cure," exclaimed the man of the family.—Casper, in "Why."

FATE MAKES FLIER OUT OF MUSICIAN

Broken-Hearted After Failure to Secure Orchestra Engagement Man Turns to Aviation.

COAHUILLA, S. C., July 27 (AP)—A boy's string quartet over his father's objection expected orchestra engagement turned the career of Paul Hedfern from music to aviation.

A high school student in Coahuilla a few months after the close of the world war—the 25 years old youth, who now proposes to fly from Brunswick, Georgia, to Rio de Janeiro, was a violinist in promise. He had won prizes in an Old Paders contest, using a fiddle made of pine, carved from a cigar box.

An orchestra looked him for three months, but at a South Carolina summer resort, but at the last moment, for some reason, the engagement was cancelled.

The blow was a severe one to the lad, whose hobbies always had been music and mechanics. He was broken-hearted and his father, Dr. Fred C. Hedfern, dean of Benedict College for negroes, and for a time he had "not smiled."

Then one day he chanced to visit Camp Jackson, on the outskirts of Columbia. There he saw the results of an abandoned army airplane, an old Curtiss training ship. During the war, when nothing but a child, he had been captivated by the Elizabeth, New Jersey, plant of the Standard Aircraft Corporation, where he gained a working knowledge of planes. Before then he had made a full sized plane, minus the motor or a part of manual training work on the Columbia high school.

He had the assistance of a few mechanics he obtained at the plant. The plans were traced from the army camp to the great concern to buy the plans and build the airplane. Day and night the youth toiled over it, lightening, adjusting, sectioning with hammer and saw, paint and brush. He worked painstakingly.

In full view of the street crowds Hedfern went on with his building. He made the work as complete. A complete, the good-natured flier occupied himself with his airplane.

After three months of work, the flier, after friend from Atlanta was summoned to give it a final inspection and test flight.

It flew. Paul Hedfern then took the air and sailed eastward over the city below.

The plane gave Hedfern his start. He immediately began to capitalize upon his hobby by taking up passengers. In the next three or four years he entered the country from New England to the Gulf and from Omaha to New York.

The income was derived from the carrying of passengers, giving instruction in flying and, from time to time, government work. He has never had a serious accident.

Paul was born in Rochester, New York, where his father and a Henry Hedfern, his grandfather, lived. The

HYDRAULIC STATION IS BUILT ON CITY OF DEAD

MITCHKASS, Ukraine, July 27 (AP)—A hill in the neighborhood of Kitchkass, where a great hydraulic station is being constructed, has yielded what is believed to be the European counterpart of Sansecolo, the "City of the Dead." The latter was discovered some years ago by the Russian explorer, Colonel Knudorf, in Mongolia.

Ancient tombs in which he buried apparently important personages of the past and stone ages have been found, as well as numerous prehistoric caves containing relics of those ages.

Above are graves believed to belong to the Scythian period, and still higher remains of Hunn of the Attila period. The topmost stratum reveals bones and objects apparently pertaining to the Zaporozi-Cossack, an independent organization of bold plunderers of the sixteenth and seventeenth centuries.

A noted mechanic, who is a native of England, Dr. Redfern, also was born in England, but was brought to this country when a mere child and as a minister has lived in various parts of the United States, including Boise, Idaho, and Portsmouth, Ohio.

The family came from Boise in 1911 to Columbia when Dr. Redfern became dean of Benedict.

A few weeks ago Redfern was "all set" for a trans-Pacific flight to Honolulu and testing his plane, when Lieutenant "Maitland" and Hegenberger made their successful hop for the army. He then abandoned the flight to take up the proposal of the City of Brunswick and business men to make the Brazilian trip.

ROMAN COLISEUM BARRED TO AMERICAN FLAPPERS

Blackshirt Guards After Night-Fall Block Entrance to Shady Alcoves of Amphitheatre.

ROME, July 27 (AP)—Blackshirt guards after midnight bar the entrance to the shady alcoves of the Coliseum, the centuries-old jaw-dropping hall of Rome's sporting complex, because a number of American girls were found to be interloping illegally the ancient edifice. "When in Rome do as the Romans do."

The Romans had no objection to non-protestant girls from beyond the Atlantic, so far as they were concerned the famous amphitheater built by Emperor Trajan might have continued indefinitely fulfilling its double role of archaeological showpiece and unsexed haven.

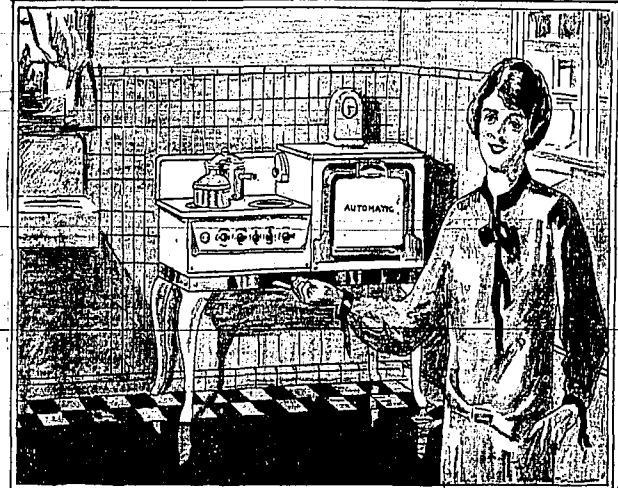

The process which caused the placing of anti-courtesy policemen at all vantage points in the venerable edifice came from several prominent elderly Americans, who on arriving at the Coliseum to enjoy the view by moonlight, left in shocked indignation after having discovered young girl campfollowers in various degrees of flirtation in the unsexed alcoves.

Minorsini, it is understood, was approached several times last year by Americans who discussed the subject. The premier, however, laughed off objections, smiling that Italy wants more and better marriages, not warlike test matches.

Soon after the cross, symbolic of the city's Christian mission in the arena, had been re-erected by the center of the amphitheater, protesters returned to the city with a new argument. They urged that immediate steps against sponsors should be taken at the grounds of irreverence and irreverence in addition to non-protestant.

The request was supported by ecclesiastical authorities, and Mussolini decided to comply, thereby creating difficulties for marriageable youth. Not having any parks which remain open at night with all dance places or other non-domestic meeting grounds abolished Rome now offers no nocturnal strolling grounds except for a six-day-a-week area just outside the fortifications, and they are so far away one gets tired before reaching them.

Why I cook electrically-

ELECTRIC cookery is MODERN

"LIKE all modern women, I want as much time free from household cares as possible, but I don't want it without well-prepared meals. So when we needed a new range I tried to find the way to get best results with least effort. And now I cook with electricity!

"It is so much simpler. I can put the children's lunch in the oven while I am busy with other things—just set the automatic time and temperature controls and I am certain their lunch will be ready when they come in hungry from play. My afternoons are my own, too, with an Automatic Electric Range. It's really like having a maid. Into the oven go my roast, potatoes, vegetables, en casserole,

pudding—and when I come home dinner is waiting.

"I can try new recipes with as much assurance as old ones. Cooking scientifically with accurately maintained correct heat, gives better results every time.

"In summer my kitchen is always cool and it's shining cleanliness is a joy."

You, too, can know the advantages of electric cooking. For a limited time we are offering special terms of \$5.00 down and easy monthly payments on Automatic Electric Ranges. Come to the Electric Shop and learn the superiority of this, the most modern method of food preparation. Now 7891 housewives are Electric Range customers of the Idaho Power Company.

During the month of August we are offering a few models to be closed out at a very special discount. Take advantage of this opportunity. ACT NOW.

ELECTRIC SHOP

IDAHO POWER COMPANY

Ma Buzz went to the country, hooray!

FLIES—dangerous carriers of disease! Kill them at once, with Flit.

Flit spray clears the house in a few minutes of disease-bearing flies, mosquitoes, bed bugs, roaches, ants and fleas. It searches out the cracks where insects hide and breed, destroying their eggs.

Flit kills moths and their larvae, which eat holes. It will save your clothing, rugs and rugs. Clean and easy to use. Will not stain.

Flit is the result of exhaustive laboratory research. It has replaced old ineffective methods. Fatal to insects but harmless to mankind. Recommended by Health Officials. Buy Flit and Flit spray today. For sale everywhere.
