PANAMA CANAL ZONE'S STATUS UNDER VERBAL ATTACK AT ASSEMBLY

Question, Deemed Vital for United States From National Security Standpoint, Brought Up for Discussion at Geneva.

(By The Associated Press) GENEVA, Sept. 10.—The status of the Panama canal zone—a question deemed here to be vital for the United States because it is considered the problem of American security—was raised suddenly at the session of the assembly of the League of Nations.

Opposes Special League. It was, however, the League of Nations which had advocated referring the Panama controversy to the world court of justice at Geneva, because in virtually opposing the creation of a special league of nations for the American continent, he advanced as one of his reasons that such a step would involve the establishment of a special American court, which would offer no greater guarantee of impartiality than the Hague court of justice, created under the auspices of the league of nations.

Dr. Morales declared that Panama, in order to permit the construction of the remarkable passage linking the Atlantic and Pacific oceans had granted to the United States a zone of occupation and control of a zone 10 miles wide across her territory for the construction, operation and maintenance, sanitation and protection of the canal and the exercise of all rights, powers and authority over the zone by the United States. If the United States possessed sovereignty over the territory.

But, he explained, a serious question has arisen in regard to who controls the zone. He said that the United States, completely denied the views of his other.

PRINCIPAL IN JULIAN SCANDAL IN CUSTODY

Jacob Berman, Under Arrest; Says: "Bankers and Brokers Got Most of Missing Money."

SAN FRANCISCO, Sept. 10.—(AP)—Jacob Berman, alias Jack Bennett, who was indicted in Los Angeles as principal in the Julian Petroleum over-issue of stock, left here today in charge of a detective force.

All Can Be Explained. It is expected he will be taken to court Monday in Los Angeles. Berman said, "All can be explained, and that 'bankers and brokers' got most of the missing money."

The "moment Berman arrived in Los Angeles," said James F. Donnelly, an attorney for Berman, "he will be worth a million dollars in the pockets of the receivers who can release immediately large sums tied up. The solution of this rangle has waited on Berman."

Berman (Donnelly called him Berman) "Donnelly called him Berman, but most of the missing money was used up in pool transactions to sustain the market value of stock or was tied up in the corporation as such. As far as I know Berman has no money. I was retained by relatives in the east. The chance of the receivers selling Berman's name, Berman will plead not guilty."

Attorney Has Statement. The assistant district attorney, who left the hotel with Berman and detectives, said Berman would be guarded every step of the way to prevent harm coming to him. He said Berman had offered to assist the receivers and has promised to cooperate with the Julian corporation's collapse.

Marine Corps Mascot Goes to Tunney's Camp

CHICAGO, Sept. 10.—(AP)—Jigs II, a bulldog, being and named United States Marine Corps mascot, arrived in Chicago today from the marine training camp at Quantico, Virginia. Jigs was driven to Gene Tunney's training camp by Colonel George C. Reed, commander of the central recruiting station.

TWO OCEANIC FLIGHTS MAY BE CALLED OFF

Expectation of Cancellation of Projected Trips by Fonck and Levine Growing Stronger.

NEW YORK, Sept. 10.—(AP)—Expectations that Captain René Fonck and Charles Levine would abandon their projected transatlantic flights, grew stronger today as reports were made to discourage the projected trip of Edward P. Schlenger, leader of the expedition.

In addition the navy department was urged to take steps toward preventing further long distance flights over the Atlantic. It was reported that the navy department was in communication with the committee that inspected the Dole flight plan.

There was dissent, however, from two quarters. In Dublin, Captain Robert MacIntosh is awaiting favorable conditions to start his airplane Princess Carolyn, a small single-engine plane, on a flight from New York to Paris.

Automobile Race Driver Succumbs on Speedway

HARRISBURG, Pa., Sept. 10.—One driver was killed and two were injured today during a race on a mobile went through a fence during the race on the dirt track of the Harrisburg Fairgrounds. The driver, who was killed, was Robert McCord, who was driving a Buick.

BALLOONS FROM EIGHT NATIONS BEGIN RACE

Fifteen Ford Air Bags Float From Ford Airport in Competition for Bennett Trophy.

DETROIT, Sept. 10.—(AP)—Bearing the colors of eight nations, 16 huge air bags floated from the Ford airport today in a race for the Bennett trophy. The race was the beginning of competition for the Gordon Bennett trophy in the sixteenth international balloon race.

Promptly at 6 o'clock Major Enrique Maldonado and his aide, Major Benito Maldonado, were seen to be loading the huge bag, the Hispania, and rose into a cloudy, overhanging sky. A few minutes later the balloon was out of sight in the clouds. The flight is estimated to last five minutes.

LAST CONTINGENT OF LEGIONNAIRES LEAVES FOR PARIS CONGRESS

Liner Leviathan, Flagship of "Second American Expeditionary Forces," Far Out at Sea; Demonstration Staged.

(By The Associated Press) NEW YORK, Sept. 10.—The liner Leviathan, flagship of the "second American Expeditionary Forces," was far out at sea tonight carrying the last contingent of the American Legion to the convention in Paris. Their sailing occasioned one of the most elaborate "bon voyage" demonstrations the harbor has ever seen.

The sharp contrast to the secret departure of the gains vessel 10 years ago when, with her sides a nightmarish camouflage, she carried thousands of American Expeditionary Forces on a more serious mission to France, the Leviathan was dressed in her best today and steamed down the bay under an air escort that included the dirigible Los Angeles and a squadron of planes.

Vice President Dawes was at the pier, among crowds of relatives and friends of the Legionnaires and General Scribner was a passenger. As the liner entered the narrow three-mile channel, planes circled overhead and an army bomber threw a smoke screen about the big ship. The Los Angeles and the semi-gig airship J-3 (Continued on Page Two)

INFORMATION ON SIGHTING OF PLANE WINGS LACKING

Fisherman Reports Seeing Wreckage Out From French Coast; No Part of St. Raphael Object.

PARIS, Sept. 10.—There is little information here regarding the alleged sighting of wreckage of what appears to be a plane in the Atlantic. Advice from Brest says that a fisherman belonging to Comcaeneu, a small port of Brittany, reported on September 3 that he saw a piece of wreckage which might be that of an airplane.

250 Idaho Barbers Will Take State Examination

BOISE, Sept. 10.—(AP)—Free shave and free haircut will be the order of the day at Moscow, Pocatello and Boise, Monday, when approximately 250 applicants for licenses as barbers take examinations in the three cities. District examining boards will be in charge of the tests for 50 applicants at Moscow, 50 at Pocatello, and 150 at Boise.

Odor of Violets Haunts Farmhouse

NEWPORT, Ore., Sept. 10.—(AP)—A Mouthwatering farmhouse here is "haunted" by an odor of violets. An expert on the subject of fresh gathered violets fills one of the rooms to such an extent that the tenant has had to terminate it, and although the floorboards have been examined and the walls distempered the odor persists. The house is nearly 300 years old.

COMMISSIONER SETS DATE FOR LAND SALES

Five Thousand Acres of State's Property to Be Sold at Jerome; Auction Time Given.

BOISE, Sept. 10.—(AP)—Dates and places for the holding of Idaho state land sales, which 20,000 acres will be auctioned, were announced today by H. Nash, state land commissioner. Sales will be held at Caraco, September 20; Boise, September 27; Pocatello, September 29; American Falls, September 30; and Jerome, October 1.

GOVERNOR WILL CONFER WITH ASYLUM DIRECTORS

Action on Inquiry Into Condition at State Hospital for Insane Expected at Early Date.

BOISE, Sept. 10.—(AP)—Action on the inquiry into the condition of the Idaho state insane asylum in Blackfoot is expected Monday when Governor H. C. Blanding meets with the directors of the institution, called here in conference by the governor. The governor announced today that the inquiry would be headed only by the directors although Attorney General Frank L. Stephan may be called in.

CHARACTER-BUILDING IN SCHOOLS THEME OF ADDRESS BY COOLIDGE

"Unless Halls of Learning Are Real Temples, Consecrated by Worship of Truth, End Will Be Delusion," Is Chief's Verdict.

(By The Associated Press) BROOKING, S. D., Sept. 10.—Greater emphasis by educational institutions in the development of character was urged by President Coolidge in speaking here today at the dedication of the Lincoln memorial library of the South Dakota state college.

"Unless our halls of learning are real temples," he declared, "which are to be approached by our youth in an attitude of reverence, consecrated by worship of the truth, they will all end in a delusion. Our colleges must teach not only science but character. Our institutions of learning must be dedicated to a higher purpose. The life of our nation must rise to a higher realm."

GOVERNOR WILL CONFER WITH ASYLUM DIRECTORS

Action on Inquiry Into Condition at State Hospital for Insane Expected at Early Date.

BOISE, Sept. 10.—(AP)—Action on the inquiry into the condition of the Idaho state insane asylum in Blackfoot is expected Monday when Governor H. C. Blanding meets with the directors of the institution, called here in conference by the governor. The governor announced today that the inquiry would be headed only by the directors although Attorney General Frank L. Stephan may be called in.

"Cat" Bandits in Toils Of Law in Windy City

CHICAGO, Sept. 10.—(AP)—William "Cat" Baker, the cat burglar, who was arrested here last night, was charged with 22 robberies, 10 burglaries and two attempted robberies.

Competition Making Itself Felt in Fields of American Industry

In Fight for Volume Much Business is Taken at Low Profits and Sales Are Made Below Cost

(By Magnus W. Alexander, president of the National Industrial Conference Board.) NEW YORK, Sept. 10 (AP)—Competition is making itself felt in American industry today to such a degree that while activity has been reaching steadily higher levels many branches of the industry are complaining that there is a profitless prosperity. Since the end of 1925, the competitive struggle has been increasing and at present the leading story record is at the high level reached as the result of the 1920-21 depression. "Despite our steadily increasing volume of business, it is a fact that in recent years about two out of every five manufacturing corporations have either made no profit or have operated at a loss."

Fight for Volume Profitly. It is a matter of general observation in trade circles that in the fight for volume for greater and greater sales much business is taken at a low profit and that often sales are made below cost. This places the highly important question whether it is economically sound and socially desirable that goods be sold over periods of time either with or without profit or at a loss sufficient to maintain or increase sales volume.

The effect of the increasingly keen competitive struggle is reflected in an analysis of the income tax returns of the federal government, which shows that during the period from 1920 to 1925, an average of 41.5 per cent of manufacturing corporations operated without profit or at a loss. The average net income of more than 99 per cent of them, that is all those with net income of less than \$200,000 a year in 1924 which was considered a "banner year" was nearly 11 per cent smaller than 1923, the last "prosperous" year.

Scorns "Deflector". During the war the word "profiteer" was coined. It described and held up to scorn the man or organization that took advantage of conditions, said goods at prices unfairly above what they were worth, thereby making an exorbitant profit. Perhaps the time has come when likewise we should hold up to scorn the "deflector," the man or

organization that so "well" sales to greater and greater totals for a comparatively period of time, sells goods at a price below what the commodity is fairly worth, or even below production cost. Thoughtful business men themselves are coming to see, and many of them are trying, the wisdom of restraint: as to having a period of sustained prosperity in preference to brief and hectic periods of "boom" prosperity with their inevitably following grief. While competition is the life of trade and our entire business structure is based on the competitive principle, it should be an economically sound competition—should not be tainted by the leprosy of either profiteer or deflector.

Economically unsound practice, such as is likely to result in trade discrimination, can hold no good for either the competitors, investors or the public. Business stability, on the other hand, degree since 1921, is and always will be the soundest kind, and should be the paramount objective of business management.

LAST CONTINGENT OF LEGIONNAIRES LEAVES FOR PARIS CONGRESS (Continued From Page One) cruised in the rear of the faster units of the air convoy. Navy destroyers and a score of tugs followed the ship and a fire boat tosed up jets of water which fell across the wake in cascades of rainbowed mist. From the municipal tug, Macom, Vice President Dawes shouted his last farewell to General Pershing on the bridge of the Leviathan.

A few moments later he had sent from the Macom by radio to General Pershing the message: "Your comrades who have to stay at home send you their love and wish you God speed." In addition to the Legionnaires the vessel carried 154 ordinary passengers, Commodore Hartley, master of the Leviathan and also a number of these.

Public sentiment in favor of revisions in federal taxation (Continued From Page One) ment and maintenance of a reasonable balance between the federal revenues and expenditures, ample facilities and opportunity for a thorough going study of all phases of taxation and tax administration by a joint congressional committee. gov. announced that all restrictions governing the use of first class accommodations by passengers traveling second class would be lifted for the voy-

BET HARVEST SOON TO BRING IN MONEY

Sugar Industry to Put Out Big Sums for Labor in Handling Crop; Mills to Opern.

First samples of sugar beets grown in this section will go to the company's laboratory on Monday for test and examination and, depending upon the outcome of the tests, harvesting of beets is expected to begin here on or about September 28. October 3 is set as the tentative date for the opening of the factories at Twin Falls and Burley.

The labor cost of harvesting the beet crop and handling it to the sugar will amount to about a quarter of a million dollars. It was estimated by the officers of the American Sugar company. Of this sum \$100,000 will be paid to workers in the fields and \$150,000 will be paid to employees at the factory during the refining process. Beet harvest labor will be a large collect \$50,000 in wages in Minidoka and Cassia counties.

TWIN FALLS GIRL IS MARRIED

Miss Pearl Quinn and Kenneth Brown United With Ceremony at Church.

MAROA, Sept. 10.—Kenneth Brown and Miss Pearl Quinn of Twin Falls were married Sunday at the United Brethren church here by the pastor. A large number of friends and relatives witnessed the ceremony. Afterward a bounteous dinner was served to the bride-party at the bride's home. The young couple are at home on the L. H. Brown ranch.

The marriage school opened Monday, August 29, with Superintendent L. C. Newman in charge. Mrs. Newman teaches the beginners and Mrs. Williams the third and fourth grades, Miss Verna Grimm the fifth and sixth grades, and Mr. Newman the seventh and eighth grades. There is a large enrollment.

A. S. La Monte and E. B. Brown were re-elected to serve as school trustees at the city election Tuesday. Mrs. Ethel Diehl, Miss Vera Diehl, Miss Helen Howe and Earl Ellis of Los Angeles, who have been visiting at the home of Mr. and Mrs. S. C. Diehl for the last two weeks, left for their home Friday. Students at the state university at Moscow, are home for a few days' visit, before returning to Moscow. They will be accompanied by Miss Vera Diehl, who will enter the university.

Mr. and Mrs. Jud Gulick and family were here Saturday, here attending the fair this week. Terry Crawford and Jim Williamson drove to Tule Saturday to see Colonel Weech.

Mr. and Mrs. W. T. Diehl and children and Omar Diehl and Miss Orla Haines of Jerome are visiting relatives and visiting the fair.

Mr. and Mrs. J. M. Blackley and family spent Sunday at the home of Roy Smalley, near Idaho Falls.

A large number of young people from here and Twin Falls gathered Monday evening to entertain Mr. and Mrs. Kenneth Brown. Mr. and Mrs. Brown and their family were given the customary treats were given.

H. F. Ramseyer and L. H. Brown drove to Tule Saturday to see Colonel Weech after their sleep Sunday. Mrs. E. J. Malone attended a meeting of the part patrons of the C. O. S. at Twin Falls Monday evening.

SHOWMEN MOURN DEATH OF ONE OF THEIR NUMBER

William Shinn, aged about 35, died Saturday morning at the Twin Falls county hospital while awaiting an operation for cancer of the rectum. He had been suffering from the effects of an infection following loss of a tooth about six months ago.

Shinn was a member of the Barnum and Bailey circus, which has been operating at the Twin Falls county fair during the last week. Shinn had been with this circus for about 20 years, and was the owner of two of the games on the midway. He complained of not feeling well Friday morning and in the afternoon he was taken to the county hospital where he passed away Saturday morning.

The deceased was at one time a member of the police force in Oklahoma City, Oklahoma. A brother of the dead man has been located in that city.

This is the third death which has occurred within this group of showmen this season.

COLORED SINGERS ARE PLEASED BY COURTESY

"Our company has traveled over a great part of the country and appeared in many places, and we have never been received with more courteous consideration anywhere than in Twin Falls," said Clarence E. Ivy, manager of the Olney Jubilee Singers, which Saturday night. "I feel," he added, "that it is only proper to voice my appreciation. We have given a number of performances in Portland and were pleased to receive assurance that our appearance there had had the effect of allaying racial misunderstandings which cause so much trouble. Everywhere here and in Fillet acted at all times with courtesy."

The singers will give a concert in the high school auditorium here Monday night.

ONCE A CHAMP

THAT WONDERFUL old batter of the days of yore, Al Weech, is pictured as he is today in the psychopathic ward of a Los Angeles hospital. Old-timers who saw Weech in action will at once note the difference wrought by the years.

SOUSA ADVERTISER HERE

Harry Askin, advertising manager for John Phillips Sousa and his band of more than 70 pieces, was in town Friday. Askin made arrangements for two programs to be given by the world famous band leader and his organization on October 14 at the Orpheum theatre. The group are coming under the auspices of the Business and Professional Women's club, and will present both a matinee and an evening performance. The organization will come here directly from Boise, and will go to Pocatello following their program here. Sousa is now 72 years of age and has been a band leader for the last 50 years. He has been conducting his own organization for 35 years.

MINISTERS TO CONVEENE

A called meeting of the Protestant ministers of Twin Falls county is to be held at noon luncheon at Tom's cafe here Monday to discuss the advisability of holding a Sunday school institute in Twin Falls some time in October. This was announced last evening by Dr. H. O. Humphrey, pastor of the Methodist church in this city. Other business will come before the meeting.

Mrs. HELPS SEEKS DIVORCE

Ruth Phelps asks a divorce from her husband, Howard A. Phelps, to whom she was married June 4, 1925. She alleges that her husband has failed to support his family, and asks attorney fees of \$50 per month and custody of their minor child, James Oliver, aged three years.

COACHES PREPARE FOR ANNUAL GRID SEASON

Athletic Department Anticipates Big Turn-Out for Football; First Game Soon.

Preparations for the opening of school were completed Saturday afternoon and according to the readiness for the arrival of students Monday. A large turnout is anticipated by the athletic department and approximately 100 football candidates will be equipped with paraphernalia Monday morning in anticipation of the first regular practice session to be held for Monday afternoon.

With the first game but two weeks distant urgent necessity for practice has called for the completion of the preliminary work usually included in the first two weeks on the football field, and the coaches plan to begin immediately with regular playing tactics for the first game. The excellent condition of the candidates made this possible. All of them have been working out of doors, and are in perfect condition.

Prospects for Team Good

Prospects for a good team are excellent, according to Coach Platino, in that the material is inexperienced. The team will feature seven linemen and the backfield should be light and shifty. With only four men around which to build a team the coaches plan very little change from the system used in former years, and the plan of attack and defense will be designed immediately with regular tactics. Coach Platino intimated that the changes recently made in the rules would have no effect upon the type of game played by the Bruins, but since their team was inexperienced they would probably have to make some changes in the plan of attack, through linemen, than their opponents, the most feared team in the state. Last year's Bruins made use of the punt as a means of attack, and used it effectively against their strongest competition, having three good punters in the backfield. This year, punting will probably be resorted to only as a defensive measure, and Perrine, diminutive sprinting star, will probably be called upon to kick.

Field in Condition

Lincoln field has been put in condition for the first practice Monday and the Bruins will begin the season with hard work on the first afternoon. New goal-posts have been installed according to the new regulations which will handle the ball at the end zone rather than on the goal line as they used to be. A new tackling frame has also been constructed which will handle two dummies at once thus cutting the time devoted to tackling in two. New dummies, capably designed by the coach, have also been constructed, and will be available for the first practice. This is a dummy that can be set up on the field and used for blocking instruction as well as for tackling purposes.

Forest Fires During 1926 Cause Much Damage

WASHINGTON, Sept. 10.—(AP)—Forest fires in the United States last year caused \$20,800,000 damage and burned over an area of 24,300,000 acres, the forest service reported today. Mississippi reported the greatest number of fires, 24,170. California lost more than 72 per cent of the acres burned, and the fire-fighters are charged to man, with the smokers leading the list with 10 per cent.

HIGH SCHOOL STAFF HOLDS FIRST MEETING

Superintendent Smith Pleased With Spirit Shown; Entire Staff in City; Classes Monday.

A general teachers' meeting which was called by Superintendent W. B. Smith for 10 o'clock Saturday was attended by the entire teaching staff of the Twin Falls public schools. At this meeting general instructions were given and a survey given of the coming year's work. The principals of the various schools of the city met their teaching force in their own buildings at 2 o'clock Saturday afternoon. At these meetings records were reviewed to the various teachers, text books were discussed, and the rules and regulations of the different schools were explained. Superintendent Smith stated that he was well pleased with the attitude and spirit shown by the teaching staff. The meetings here Saturday were of a net together, and a number of suggestions were made. School officials state that everything is in readiness for the opening day of classes, Monday, September 12.

In the elementary schools, classes of the grades 1 to 6, only three pupils who have formerly attended the Twin Falls school will be enrolled on Monday morning. Pupils who have been in attendance at other schools will enroll during the afternoon hours. Pupils entering school for the first time will be enrolled on Tuesday morning. Students of junior high school age will meet at 5 o'clock Monday morning in the gymnasium. Senior high school students will meet at the same hour for their various advisory rooms immediately following these meetings all high school students will meet in the auditorium for a brief assembly session, following which classes will begin.

Tents Protect Tobacco—Tents of chesnut cover the tobacco fields of Cuba as a protection against insects and the ordinary weather conditions.

PRISONER WORSTED BY AFFICTION IN HOSPITAL

M. A. Weech, 25, arrested with his brother, Charles Weech, 26, by deputy sheriffs at an open air dance hall at Kimberly late last night. Weech is suffering from effects of a blow administered by an officer when the brothers and a woman companion were scuffled, according to the officers' report to overpowered Deputy Charles Jones.

Dr. G. C. Halley, county physician, who was summoned when the prisoners were brought here, stated that Weech would be held at the hospital for observation. Weech was struck over the nose and left eye.

Deputy Jones reported that he had placed the brothers in the rear seat of the officers' automobile, and he was scuffed between them when both men turned on him, one throwing an arm around his neck and the other gripping him at the throat. The deputy stated that he struck as best he might to loosen the hold and caught M. A. Weech across the left eye. Deputy Jones was scratched on the cheek and Deputy W. E. Dobson, who took a hand from the front seat, was scratched on the hand.

Charles Weech has been blind for a number of years as a result of a shipyard explosion.

Officers were called to the Kimberly dance hall to take care of the Weeches and four women companions who were reported to have been causing disturbance.

They Are Comfortable

The springs under all Paige cars are unusually long, and they are matched to the type of body they are to carry. Snubbing devices further cushion the cars. Chassis are carefully balanced with deep, well-braced frames.

Diligent care has been used in providing ample leg room. The seats are wide and buoyant, built with deep, cushion springs.

The driver will appreciate the restfulness of the easy acting clutch and gear-shift levers, the ball-bearing spindles, the steering gear specially designed for balloon tires, and the sense of balance and security evident at all speeds.

We invite you to enjoy a ride in one of the Paige sixes or eights, noting particularly the comfort of the cars. Lower prices now are in effect, including a Paige six for the first time for less than a thousand dollars. The complete line includes twenty body types on four chassis, in sixes and eights, from \$995 to \$2665, f. o. b. Detroit.

BEGIN CONSTRUCTION ON BIG TABERNACLE FOR L. D. S. CHURCH

Contractors Launch Operations Under \$60,000 to Put Two-Story Structures Under Cover This Fall.

Work began Saturday on the L. D. S. tabernacle in Twin Falls under the direction of Ellis E. Eyring of the firm of Eyring, White and company, contractors. It is planned to have the edifice under roof by the first cold weather sets in, so that the interior can be finished during the winter. Construction involves an investment of \$60,000 under the contract.

The building, which will be erected on the site at the corner of Second street and Fourth avenue east, will be 75 by 122 feet in dimensions. It will consist of first and second floors, with a basement under the second floor in the rear for furnace and other things connected with the heating and lighting of the structure.

On the ground floor there will be a large recreation hall, with stage in front, four class rooms, a baptistry, four office rooms, lavatories and check room.

On the main floor there will be the large auditorium, seven class rooms, adjoining relief society room, two office rooms and a utility room. The rooms will be separated from the main auditorium by folding doors, which, when required can be manipulated as to connect them with the main auditorium, which, on such occasions will have a seating capacity of 800.

The main entrance is on Fourth avenue east—the side entrance on Second street east.

The walls of the structure will consist of rug colored brick, from the Burley yards.

REPUBLICAN COMMITTEE WILL ENDORSE BORAH

Republican precinct committeemen of Twin Falls republican county central committee will be called in session at a special meeting in the near future to adopt resolutions endorsing Senator William E. Borah for president of the United States. It was stated in an evening by John W. Graham, chairman.

Similar action has been taken by the republican state committee and it is anticipated will be taken by the several county committees.

AUGUST TRAFFIC ON RAILROAD IS HEAVY

Total of 230 Cars Arrive and 627 Leave Twin Falls During Month Recently Ended.

There were 230 car loads of merchandise shipped out of Twin Falls and 627 received in Twin Falls during the month of August according to the report compiled by F. B. Stasch, Oregon Short Line agent.

The carloads forwarded consisted of merchandise, 75; flour, 30; potatoes, 17; apples, two; butter and eggs 12; live stock, three; sugar, three; wheat, 57; miscellaneous, five.

The carloads received consisted of barley, one; brick, two; canned goods, five; cement, six; coal, 105; lumber, 21; merchandise, 175; flour and feed, six; gas and oil, 18; fruits and vegetables, 22; rail, six; stock, two; sand and gravel, 12; sugar, two; lime and rock, 61; wheat, 65; wood, 12; autos 36; miscellaneous 43.

Former Sheriff In Back in Twin Falls

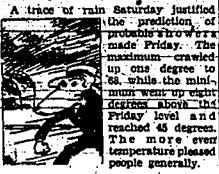

"I'll tell the world that this is the greatest agricultural country on earth," said Frank M. Kendall, former sheriff and now commissioner of the Pioneer Paper company, who returned Saturday from California, where he has spent the past seven years.

Mr. Kendall, who now lives in Los Angeles, comes to Twin Falls as representative of the Pioneer Paper company of that city and will here be six months and perhaps longer.

He has been in Oregon and California and has seen all the best agricultural districts of those states," he continued, "and I must say that none of them can equal the Twin Falls tract. After spending over the Nevada desert, this splendid tract is a sight for sore eyes. I was at Oakland for six years as sales manager for the Sunset Lumber company, the largest on the coast, and traveled a good deal for them, but you know, I have never felt quite at home since I left Twin Falls."

The Weather

Unsettled; showers with moderate temperatures.

A trace of rain Saturday justified the prediction of showers from the weather bureau made Friday. The maximum crawled up one degree to 64 while the minimum went up eight degrees above the Friday level and reached 45 degrees. The more even temperature pleased people generally.

GIRL RESERVES LEADERS PLAN SEMESTER'S WORK

Girl Reserve leaders have been busy this week laying plans for the first semester's work.

The first big event will be a hike on Thursday, September 15, sponsored by the Blue Bird club. This is a general get-together meeting and any girl in high school may attend, whether she intends to become a Girl Reserve or not. The time and place of meeting will be announced later.

Next are the Girl Reserve clubs in the senior high school, juniors and seniors, the freshman-sophomore Girl Reserve club, and the Philo-Philo club, which meets at noon, and is composed of girls who come on school

wagons and cannot remain for meetings after school. The cabinet of these three clubs have met during the week with Miss Made Bull, Old Reserve secretary, and Friday arranged out programs for the year.

The two junior high school clubs serve clubs will not begin their work until the last of September.

VIOLATE TRAFFIC RULES

Police Judge H. D. Read levied three fines upon traffic ordinance violators in this court Friday. W. J. McFarland contributed \$1 to the city officers for the privilege of parking his car in the alley back of the White Star laundry.

John J. Shoroff contributed a similar amount for operating his car without a tall light. Joe Stover was assessed \$2.50 because he was insufficiently enough to meet Officer Empey when the Stover motor carried but one good headlight.

COMFORT NO OTHER SHOE CAN GIVE

Women who must be on their feet demand this shoe!

Patented features not possessed by any other shoe

Visit our shoe department and we will gladly show you

Sometimes we think only teachers, nurses and business women must use their feet. But all women must use their feet—and this explains why women everywhere today are turning to the famous Arch Preserver Shoe, that keeps their feet happy. Won't you let us show you this better shoe?

Look for this label. No other shoe genuine Arch Preservers

THE ARCH PRESERVER SHOE

KEEP THE FOOT WELL

Another Proof of Arch Preserver Superiority

September 8, 1927.

W. H. Wright & Sons Co., Twin Falls, Ida.

Gentlemen:

As a satisfied Arch Preserver customer, I take this opportunity to let you know how much satisfied I have been with Arch Preserver shoes. I have worn Arch Preserver shoes for ten years, getting my first pair in Wisconsin, being recommended by a woman who also had been having trouble with her feet. From constant standing on my feet for a number of years my feet had been almost ruined, giving me a great deal of misery. Having heard of the Arch Preserver shoe, I decided to try it.

I have recommended them to all my friends ever since and know of nothing that would induce me to wear any other make, regardless of price. Since coming to Twin Falls, I have purchased my shoes entirely from W. S. Wright and Sons Co. with entire satisfaction, both as to quality and comfort.

Yours very truly,
Georgia Clarke,
189 Adams St.

GIGANTIC SHOWING OF VARIOUS FOODS APPEALS TO APPETITE

Delicatessen-Exhibition-Opens at Witzleben Park-by Head Burgomaster-Displaying Different Foods; Crowds Gather.

BERLIN, Sept. 10.—A delicatessen exhibition strongly appealing to popular appetite, has been opened at the Witzleben Exhibition Park by Head Burgomaster Bross. The president of the Prussian board of health and the Berlin chamber of commerce, numerous city councilors, government officials and representatives of the Swiss, Hungarian, Greek and Colombian governments were present at the opening.

No other exhibition at Witzleben during the past year attracted so many as this gigantic display. More than 20 booths of savory German, Hungarian, Polish, Italian and other savanages, of Westphalian and Yorkshire hams, preserves, marmalades and other delicacies were exhibited.

Air Traffic Increases
BERLIN, Sept. 10.—The increase in German air traffic is illustrated by the fact that during the month of August service carried 14,725 passengers, compared to 7125 in June last year. During the same month 12,678 kilograms of baggage, 39,629 kilograms of freight and 61,479 kilograms of mail and printed matter were consigned. The statistics are issued by German aviation flights during June, 1927, totaled 1,129,000 kilometers or approximately 713,000 miles.

Thief Pays for Loot
BERLIN, Sept. 10.—To not rid of his plundered currency which is now valueless, a Berlin man has hit on an odd idea. As an artisan and carrying a bag of tools, he calls upon house holders as an inspector of the heating apparatus and takes the opportunity to steal whatever he can lay his hands on. Then he sends the victim a polite letter, enclosing the value of the stolen articles in checkbook form, advising that he is very sorry, he is no common thief, but since he cannot change his banknotes by any other method, this seems the only way to get rid of them.

Pigs Fashionable
BERLIN, Sept. 10.—Pigs are the latest cry in doggy families here, perhaps because of their scarcity. Dog breeders say there are no more than 30 absolutely thoroughbred pedigree pigs in all Germany, although half and mixed breeds are common enough. Pigs were fashionable 40 years ago, but attempts were made to get the breed pure. New pedigrees paid \$5000 and \$10,000 for a pair, together to see what can be done to meet the demand. For the present, French pig-breeding is commanding from \$100 to \$2000.

Leaders Sick Men, Surgeon Says
BERLIN, Sept. 10.—Four of the principal military leaders of the German forces in the battle of the Marne were sick, according to a certain military publication in the "Deutsche Medizinische Wochenschrift" by the chief surgeon, General Dr. Heigl.

In the medical journal the chief of general staff, Gen. von Moltke, is described as having been a sufferer for many years prior to the battle from hardening of the arteries, complicated by atrophy of the heart and inflammation of the heart valves. The outbreak of the world war interrupted a cure he was taking at Carlsbad.

General von Frenckel, military commander of the ablest general in the German army, was also afflicted with hardening of the arteries. He was almost paralyzed.

General von Lubowitsch, chief of staff, had for years been suffering from Hasenpfeifer disease and

Idaho Tells It By Potatoes

THIS COSTUME won first prize for Idaho business women at the national convention in Oakland, California. The contest was to design a home product. Forty-six states competed.

General Heintzen is mentioned as the fourth in line of this group of responsible German leaders. He was general staff officer of the battle. For years he had been afflicted with gall stones. All four have since died of their ailments.

Town Taxes Women
BERLIN, Sept. 10.—If women want to wear shingled hats, they shall be made to pay for it. In the taxation of the municipality of Wartenburg in East Prussia. A tax of 10 marks per year has been levied on every shingled hat. Girls up to 15 years of age are exempt, but married women who have sacrificed their locks have to pay double tax. Other taxables are responsible for following suit in applying this new source of revenue. At Schoenen, the tax is 20 marks per year up to 20 years of age and 30 marks after.

Special Houseboats Built
BERLIN, Sept. 10.—Six specially designed shallow-draft houseboats for warmer or tropical waters have been built by a Rendsburg shipyard for public enterprises in Colombia. The boats are of steel, 112 feet long and 21 feet wide. They accommodate 100 men each, with special cabins for a captain and a doctor. Each boat has also a pharmacy, a common mess room, a cook's galley, bath rooms and a canteen. The boats are electrically lighted and have open verandahs fitted with mosquito nets.

FAMOUS ADVENTURER IS DEAD IN BATH, ENGLAND

Alexander Hill Gray Goes to Rest at Age of 91, After Long Career as Wanderer.

BATH, England, Sept. 10.—(AP)—Alexander Hill Gray has come to the end of a long and eventful career of danger in untamed parts of the world. "The prince of adventures" is dead at 91 after a long career as a wanderer in out-of-the-way places. Gray penetrated into Tibet long before the expedition which first revealed the nature of that country. He prospected for gold and diamonds in Africa, hunted rubies in Borneo and sought emeralds in Siberia.

He trekked for 1,000 miles by camel and on mule trails through mountain tracks and rope bridge in the Himalayas. He served as a civilian interpreter to British troops during the Indian mutiny. He caught head hunters in Borneo and Bangkok.

He mystified the subjects of King Szechai by doing tricks with his artificial teeth and caused consternation among cannibals with a mechanical bear which walked and nodded its head. During his wanderings he accumulated considerable wealth, and when he returned to England he employed 100 men to make the rose gardens in Ince renowned throughout England. For 15 years he had won the National Rose Show championships.

His home was a veritable museum. It contained trumpets of human thigh-bones, bloodsuck and drinking cups fashioned from human skulls, prayer wheels from Tibet, a bamboo piano from Bangkok, and a double dagger which the user could split into two to arm a defender's companion. Gray strove to live the year around in continuous sunshine. He spent his summers in Italy and went in the winter to his home in the Azores, of which he was the unceremonious king.

TREATY PLEA IN PLAY

BUDAPEST, Sept. 10.—Hungary's plea for revision of the peace treaty is to be presented in drama form by the Gray theater. It will be called "1000 Years." The plot of the play will show the London Daily Mail office. If its proprietor, Lord Rothemann, wishes his theater to be expanded, Hungary's demand for better treatment by the allies.

LENS JUVENILE CRIME

PARIS, Sept. 10.—Juvenile criminality in France is decreasing. Statistics show there have been only three-fifths as many cases as during the few years just after the war. Juvenile courts began to operate in France a few months before the war, though they were not set up until during the five years of battle. The average number of terminations of minors was about 21,000 a year before the courts were created. After the war the number passed 30,000. Now they run about 18,000.

Literature's Foundation

In nearly every instance the literature of modern European nations began with the translation of the Bible.

SLAV BECOMES CITIZEN, WRITES ABOUT AMERICA

DUBLIN, Mich., Sept. 10.—(AP)—One of the first acts of John Lorenz, a Dutch clerk, after he had become naturalized, was to write an 80-page booklet, "The United States of America." Lorenz is a Slav and he devoted the book to an exposition of Americanization methods, especially as they related to his fellow countrymen. Americanization officials here regard the book as a real contribution on civics and government. "Neither mines, nor the iron mining and goods country, is unusually attractive to foreigners."

Chinese Eat Little

The Chinese and Japanese can live longer, work longer or starve longer on a low ration of food than the American or European people.

RECOVERS LARGE SUM FOR EX-SERVICE MEN

National Rehabilitation Committee of Legion Obtains \$1,679,043 for Ex-Soldiers.

PARIS, Sept. 10.—A total of \$1,679,043 was recovered by the National Rehabilitation committee of the American Legion for former service men of the United States, through presentation of their cases to the United States veterans' bureau and in other ways, in the period between August 16, 1925, and last June 30, the committee declares. It reports compliance for submission to the

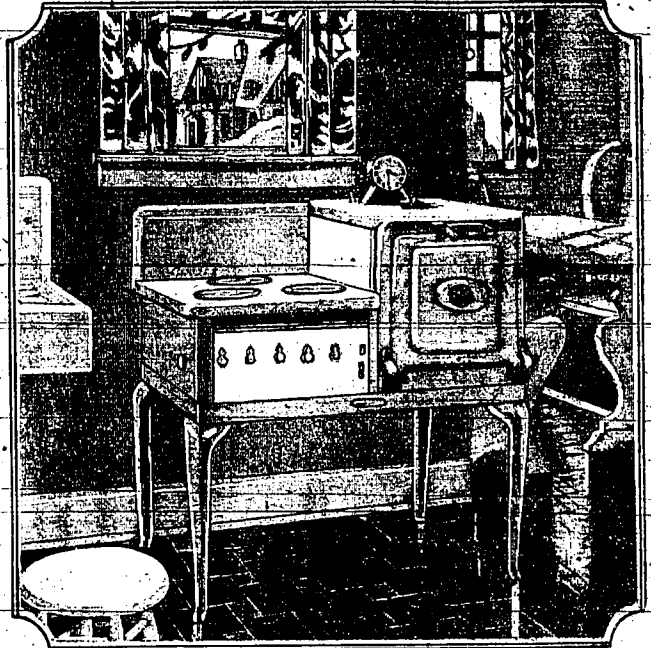

COURT SUIT WILL SWELL POPULATION OF TOWN

FOUR EX-SERVICE MEN, Sept. 10.—(AP)—The district court decision here in September there is one suit which will swell the population here considerably. There are 607 defendants in the suit. The suit is to clear the title on a ranch which was leased for 25 years ago.

Point for Punctuality

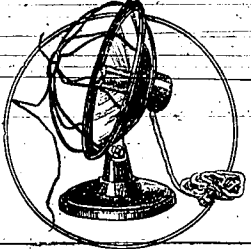

Applicants once made become debts. It is hard to make an appointment with you. I care you punctuality. I have no right to throw away your time. It is to do my own. Cecil.

THERE IS NO SUBSTITUTE FOR ELECTRIC COOKING

A Modern Electric Range

Is the Most Highly Prized Possession of Every Woman Who Cooks the Modern Way

ASK any woman who has experienced the convenience of cooking electrically and she will tell you with genuine enthusiasm that her electric range has given her more enjoyment than any other household appliance in her home.

She will tell you too, that it has given her more time for leisure and that through its use the disagreeable task of scouring and scrubbing smoke blackened kettles and pans and cleaning sooty walls has been entirely eliminated. And that it is just as quick as any method of cooking.

Electric cooking is the real economical method. Not only is the fuel cost less than when any other means is employed, but tests show that there is less shrinkage of foods when they are cooked on an electric range.

An Air Heater FREE With Any Range

\$5 DOWN

Here is another splendid reason for buying your electric range NOW. You get a fine standard Air Heater FREE. You may have your choice of two good heaters—the Edison or the Royal Rochester.

A Range For Every Home

One of these heaters is just the thing for taking the chill off the room in crisp Fall mornings and evenings. Buy Your Electric Range Now and Get a Heater FREE

Here you will find models for small kitchens and large ones for families of two or ten. Come and see for yourself the advantages that you can enjoy the day you start cooking electrically.

632 Customers

Have Taken Advantage of Our New

Bargain Rates

During the week ending August twenty-fifth, 97 more Idaho Power Customers began using our New Bargain Rate Service. This brings the total number of customers using Bargain Rate Service up to 632.

The 446 customers who used our Bargain Rate Service during the entire month of August paid an average of 3 1/2 cents per kilowatt hour, far all classes of domestic service. Investigate these Bargain Rates NOW. Ask at any Idaho Power office or store.

CRANE IN BERLIN ZOO HAS ARTIFICIAL LEG MADE OF ALUMINIUM

Bird Escapes on Cold Day, Picked Up After Chase Froze. Legs Are Found, Body Frozen, New Limb Attached.

BERLIN, Sept. 10 (AP)—A crane with an artificial leg is an oddity in the Zoological Gardens of Leipzig. One bitterly cold day last winter the crane escaped. When picked up after a long chase, it was found both its legs were frozen. Berlin authorities the bird cleared from a flight, one leg snapped clean off. The crane was taken to the hospital and the stump healed quickly. Then someone got the notion to try and fit the patient with an artificial leg made of aluminum. This was done, and the crane uses its new leg with perfect ease.

German Crowd Tournament

BERLIN, Sept. 10 (AP)—The recent German Association "Tournament" in Munich, was marked by its more than 4000 sharpshooters besides 1200 marksmen in small calibre arms competed. Even though the Austrian shooting leagues did not attend this year, the vast shooting range was almost too small to hold the marksmen and their friends. The title of German Master Shot was awarded to Hansmann, H. Baehmaier of Trausentzen, who far surpassed the required record. A prize of \$250 donated jointly by the New York Schutzen Corps and the Berlin Independent Corps was won by Dr. Menzel of Stuttgart with 37 bullets. Other prominent prize winners were the Duke Ludwig of Bavaria, well known as a hunter, Prince Albrecht, the son of Prince Rupprecht of Bavaria, Prince Alfonso and the Bavarian Minister of Agriculture, Feiler.

Stuttgart Indignant

BERLIN, Sept. 10 (AP)—Indignation has been caused in Stuttgart by the news that the Italian authorities in South Tyrol removed the Statue of Karl von Etzel, the famous Wurttemberg hero who built the railway across the Brenner Pass. This railway the main road connecting the Tyrol with Italy, was opened in 1875 and was regarded as a triumph of engineering. A statue of the builder was erected on the highest point of the pass, and the work on this has been Italian territory. Now premier Mussolini, it is announced, intends to replace the "foreign" statue by a monument commemorating the electrification of the railway, which was carried out later under Italian auspices.

Berlin Decline Fish Diet

BERLIN, Sept. 10 (AP)—Fishermen refuse to eat fish. Attempts started here to get familiar with them with sea food have failed. Some dozens of "popular price" fish restaurants were opened in the hope that the inhabitants of the German metropolis would take to fish more than they have done hitherto, and thus support the home fishing industry. The hope has been in vain. One by one the new fish restaurants had to put up their shutters for lack of custom, or else revert to usual pork chops and beer.

There are only two so-called fish restaurants left in Berlin and even they are "mixed."

Berliners won't change their meat eating custom, a leading restaurant keeper said. They think fish isn't real food.

Authority Deplores Cooking

BERLIN, Sept. 10 (AP)—On the nowadays think of nothing but smoking instead of fitting themselves to be home-makers, was the reply of Frau Hedwig Heyl, Germany's foremost authority on domestic education and food preparation, when asked why German cooking has deteriorated. Frau Heyl, who is 71, is fond of telling how her interest in cooking was awakened when as a seven-year-old girl she watched the cook's pail on the first transatlantic liner, the Herth German Lloyd, of which her father, Eduard Crusemann, was one of the founders. Since then she has written many educational books and articles on domestic education and food preparation, which are considered as standard works.

Berlin, Sept. 10 (AP)—There is a slump in the business of the European Waste Material Merchants, otherwise the rag trade. The reason given for this is that worn hats and other articles are all and that the rag men have no money to spend on new suits and have to buy old ones do.

More than half of the total of German rag exports formerly went to the United States, but Americans are using their own rag more than they used to do, and buy one-eighth of the German rag exports now go to America, it is said.

AUBURN

Breaks Closed-Car 2,000-mile Record

Then during night skidded in rain storm, turned over several times—received body repairs only

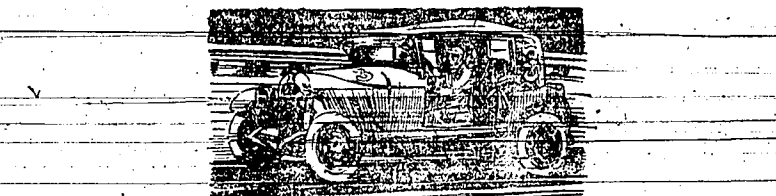

Then Finishes 15,000-miles at 62.709 M.P.H.

The Auburn Straight Eight Sedan, one of the three fully equipped, sturdy stock cars in the Atlantic City Speedway endurance test.

About the middle of the second night of this continuous run, when the result of the endurance test, driven by the same driver, the car going at high speed skidded. It hit the guard rail and turned over. The sturdy construction of Auburn resisted this smash so well that only body damage resulted.

Here is proof of stamina! After 7 hours for photographs and body repairs, this sedan went back into the endurance test, driven by the same driver, and finished the remainder of the 15,000 miles at an average speed of over 67 miles an hour for the net running time for this entire distance.

For more than 30 hours, averaging better than 65 miles an hour, this sturdy stock Auburn Sedan had been whirling around the Atlantic City Speedway day and night.

Then came a terrific rainstorm. Wet track. At 70 miles per hour the driver dozed, the car skidded and turned over. It slid 50 feet on its top, righted itself, and crashed into rail. Two doors were torn off. Three fenders, radiator and windshield damaged.

A photographer was telephoned to drive over from Philadelphia to take a flashlight. Found a mechanic who had faith in Auburn's sturdy construction, examined the car and pronounced it mechanically unimpaired.

Then radiator and body repairs were made. Seven hours had been lost. But the Sedan went back into the test with the same driver. It caught up with the other two Auburn stock cars and finished the unprecedented distance of 15,000 miles.

After the accident, the car was declared non-stock, as it was no longer complete—exactly as sold, but its time continued to be officially recorded by the A. A. A. The longest, hardest and fastest official test ever given a closed car.

Test even as this performance is, it was only an incident in the 42,000 miles of official stock car test Auburn conducted, breaking all records for completely equipped stock cars from 5 to 5,000 miles, and establishing new stock car records from 5,000 to 15,000 miles.

The purpose of this extreme and hitherto unattempted stock car test, was to demonstrate by three times greater proof the supreme leadership of Auburn car in speed, endurance, durability and efficiency. Your Auburn dealer has exact duplicates of the Auburn cars that made these phenomenal records.

MUSICAL BANDITS GIVE SERENADE WITH STOLEN INSTRUMENTS

Smashing in Door of Music Store in Liverpool, Road Burglars Load Themselves With Many Instruments.

BY THE Associated Press. LONDON, Sept. 10 (AP)—Musical bandits who gained a measure of fame with a noisy street performance are widely sought for a return engagement. Smashing in the door of a music store in Liverpool, road burglars loaded themselves with drums of assorted sizes, one trombone, and a music cabinet. When they executed a racy march, they were seen to be carrying a horn and a pair of brass instruments. The band marched down the street in the morning hours. Residents along the line of march, aroused by the ill-fated serenade, grumbled but never suspected that the noisy instruments were stolen property. Escapo was easy. The proprietor of the victimized shop expressed his surprise when he saw the instruments were stolen property. "When I heard of it," he said, "I felt like sending them a piano to complete their band."

Have Bad Season LONDON, Sept. 10 (AP)—Britain's hockey-players have not been given a good season. It has been one of the coldest summers on record. Week after week it rained every day. On Sept. 10 this came a mysterious poisoning case which affected nearly 100 persons. Most of the victims had eaten ice cream bought from a modern hockey-players' restaurant in the east-end suburb and had many associations with musical people in South London. Liszt was the guest for some time at a special meeting in London, decided to inaugurate an advertising campaign to offset the bad effect on business. Scientists were unable to identify the poison. One of the largest ice cream vendors in London, which had 1000 boys selling ice cream in the streets of London last summer, was forced to reduce its staff more than half this year.

Mayfair Eats Paw Paw LONDON, Sept. 10 (AP)—The paw paw has appeared in London shops. The first is a real luxury bought by the wealthy aristocrats. It has scored a great hit in fashionable circles, partly because its price has made it nothing but common. The paw paw seen in London came from the West Indies and was introduced by Mrs. Terence, who moved to the tropics. Paw paw in ultra-fashionable London are being served as an appetizer, or as a salad.

Have Own Court Circular LONDON, Sept. 10 (AP)—The Duke and Duchess of York are to have their own circular when they return to the city for the winter's activities. The circular recalls the days when no official news might be published without the King's consent. A circular especially for them was decided upon because they have been taking a more and more active part in the life of the nation. The Court Circular of the King is issued by a journalist, who is a member of the royal household. He is known as the "court newsmen." The word "newsmen" being obsolete, recent in connection. The court circular deals with the official activities of royalty as distinct from their private life, but the line between the two is often difficult to define.

THREE SISTERS MARRY AT ONE CEREMONY

TRIPLE MARRIAGE CEREMONY was performed at Brooklyn, N. Y., church for three sisters. Left to right: Therese, Edna and Anna Brennan; George, Walter and Elizabeth Gertrude Brennan; and Walter Schneider and Ann Frances Brennan.

aid in finding errand posts have been heaped upon the company, the government monopoly of broadcasting, that a rule has been made against distress calls for children. Grieving owners by the score have appealed for distress calls for their Flies and kitties. Others have wanted to go on the air for song-birds, a cuckoo, a homing pigeon, and even a rabbit. "I think the coolest request ever made" said a radio official, "was that of a woman who called us on the night of a fancy dress ball and asked us to broadcast a request for a dancing partner because her partner had fallen and twisted his knee. "Perhaps the most dramatic appeal ever made was one warning a woman not to take some pills which had been wrongly made up by a chemist and were poisonous. This was broadcast from all stations and the pills were traced before they had been taken."

Discover Lost House LONDON, Sept. 10 (AP)—Muscle jovers have discovered that Liszt at one time lived in Spidway—a south-eastern suburb and had many associations with musical people in South London. Liszt was the guest for some time at a special meeting in London, decided to inaugurate an advertising campaign to offset the bad effect on business. Scientists were unable to identify the poison. One of the largest ice cream vendors in London, which had 1000 boys selling ice cream in the streets of London last summer, was forced to reduce its staff more than half this year.

Order Pinks Women To Dress for Church

PINKS, Poland, Sept. 10 (AP)—The Roman Catholic Bishop Lewicki of the Diocese of Pinks has ordered all women, on indecently clad to be ejected from churches in his diocese. The order states that all women except brides entering churches must have their hair covered with wigs with short sleeves, short, and low dresses will not be admitted. The cleric orders Catholics to remain at the entrance gate during all church services to see that women are properly dressed in compliance with the rule.

YALE LAW SCHOOL PROBE SHOWS REASONS FOR LONG COURT DELAYS

NEW HAVEN, Conn., Sept. 10 (AP)—Decried by crowded court calendars in New York is very serious. This during the calendar year of 1925 there were so many undisposed of cases in the First Department of the Supreme Court that no case was tried which had been begun less than seven months before. In Connecticut the number of undisposed of cases, while by no means so large as in New York is sufficiently large to constitute an important item of delay in the urban communities. From six months to four years lapsed from the date in action is begun until it is finally reached for trial. Such is a condition discovered by two Yale law school students working under Professor Wesley A. Sturges, of the Yale Law School, and reported in a formal survey made public here. The students who did the work are Monroe Oppenheimer of St. Louis and Harry L. Blair of New Britain, Conn.

Reason for Delay One of the reasons for delay in court action, the report says, is "The small number of trial lawyers." New Haven, which has 107 law firms, and about four hundred lawyers, has certainly not more than two dozen trial lawyers. These are three courts running simultaneously. Other reasons found for delay in the law are summed up thus: "Certain rules of pleading under which a defendant can unduly postpone the reaching of his 'back' use of jury trials, habits of procrastination on the part of the bar, coupled with certain traditions of professional courtesy in regard to granting continuances and education of time; the present method of assigning cases for trial; illness and similar accidents causing the absence of attorneys, parties, or witnesses at the time set for trial; crowded condition of trial dockets; and appeals from the judgments of trial courts."

Propose to Delay The report suggests that "As human beings and perhaps as class lawyers they are prone to procrastination and often without regard to whether they

parties they represent are plaintiffs or defendants. Indeed the chief cause for delay in the progress of litigation in the smaller counties in Connecticut, their court clerks say, is the lack of initiative on the part of lawyers in pushing their cases to trial. It seems that only the elites err in the matter of crowded calendars. County lawyers, presumably with less to do, do it rapidly, and as a result there are more greater number of cases pending this fall than there were in 1924. But in the cities, the year 1924 saw 6,104 cases unfinished while this year over 8,000 are on the books. The Yale report suggests that practices of other states be adopted here, and lawyers be forced to try cases instead of postponing them at will until the cases are years old.

High Heels Threaten To Destroy Arches

BOSTON, Sept. 10 (AP)—A generation with archless feet will result if women persist in wearing high heels, Dr. Joseph LeMay, assistant dean of the Massachusetts College of Podiatry, predicts. "The high heeled shoes worn by women today," he declares, "cause permanent elongation of the feet, and as women's feet become longer they lose the arches that give the feet flexibility and serve as shock absorbers. He says that while high heels may be worn without ill effects occasionally for formal dress, they are unfit for walking purposes."

BLACK IS IMPORTANT COLOR

PARIS, Sept. 10 (AP)—Black is a favorite color for street as well as evening wear in the winter styles. Every house shows black coat models. They vary from the youthful princess coat with shawl collar of flat top, perhaps baby tank or crumple, to the rich wrap-around coat collared and cuffed in fur. Many of the coats are made of heavy, plush material, although much velvet is used.

UNITED GREAT RACE FOR LAW AND ORDER

American Saxon Federation Believes Anglo-Saxon-Celtic-Nordic Race is Ancient Stock.

AURORA, Ill., Sept. 10 (AP)—The American Saxon Federation, allied with the British Saxon World Federation to unite Anglo-Saxons for world supremacy, will hold its third annual convention in Aurora, Sept. 1 and 2. Rev. George McClintock of the Aurora Organization, speaker will include Dr. William Pascoe, chair, organizer of the British association, and Bishop A. Allen of Pasadena, Calif., president of the American society. The organizations believe the Anglo-Saxon-Celtic-Nordic race is the stock of Israel, descended from the Ten Lost Tribes. Their objective is to unite the great race for law and order, the rights and liberties of all men and to prove that this race has been chosen of God to rule land and sea for the good of the world. The English federation has more than 9,000 members, including many of the nobility. Princess Alice, Countess of Athlone, cousin of King George and

More Women Teachers For Schools in France

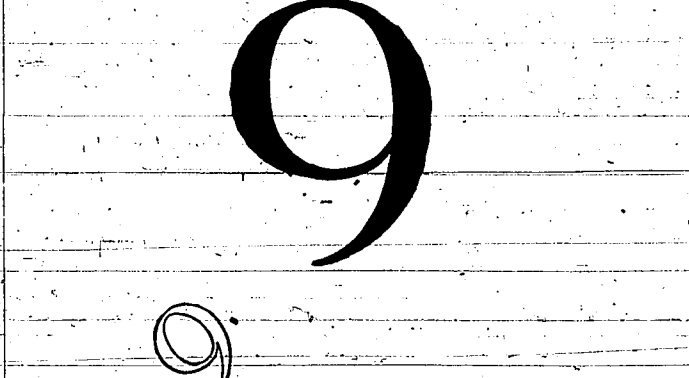

PARIS, Sept. 10 (AP)—Women rapidly are crowding men out of higher education in France. Candidates for teaching positions in the higher schools this year were given women. Women already prominent in teaching ranks of the lower schools. Tradition long barred women from the Superior Normal school, the highest school in France. Last year one woman won her way in by high rank in examinations. This year three were admitted. The government had to change the regulations to meet the unforeseen contingency that a woman should show herself able to meet the requirements.

BREWING STILL GOES ON

TOKYO, Sept. 10 (AP)—Sake is still Japan's most popular drink, but beer is running the race with a close second. Japan's four large breweries, capitalized at more than \$2,000,000 are turning out 69,000,000 gallons of beer a year despite the fact that wholesale brewing of beer in Japan did not begin until about 1900. The wife of the governor general of South Africa is chief patron of the British organization. Both the English and American societies have had a slow, steady growth, say their organizers.

REPLICA OF BIRTHPLACE ON SITE OF GRANT HOME

COLUMBUS, Ohio, Sept. 10 (AP)—There are now two "Grant's birthplaces" in Ohio. Both "birthplaces" are partially authentic though neither may honestly include the word "original" in their descriptions. The cabin in which the future general and president was born is now located on the site of the "birthplace" in Columbus, having been brought there in 1882, during the Ohio centennial, and in 1892 at the suggestion of then Governor McKinley, the state legislature appropriated sufficient funds to encase the cabin in glass. The house had been purchased from the Grant heirs and brought to Columbus with funds donated by Henry V. Childenden, a private citizen. The second "birthplace" is located on the original site of the cabin at Point Pleasant, Ohio, a hamlet on the Ohio river. At the last session of legislature, the house of representatives voted an appropriation of \$8,000 to have the original cabin returned to Point Pleasant where five acres have been converted into a state park. The state senate however refused to concur with the vote of the lower house and the Grant Centenary Committee has funds derived from the sale of Grant Memorial coins, arranged for the erection of an exact replica of the original birthplace.

... IN NINE VITAL FEATURES AMERICA'S FINEST PERFORMING SIX OUTRANKS ALL CARS UNDER \$2500.00

A powerful and arresting statement to make, yet every Dodge Brothers dealer stands ready to prove it.

Nine specific features—vital and definite—not equalled by any other motor car within nine-hundred dollars of the Senior price!

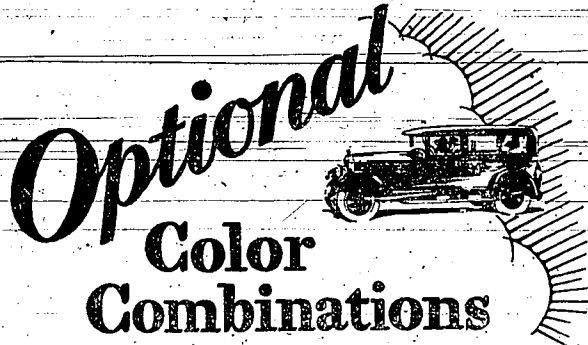

No wonder this brilliant vehicle won instant rank as America's finest performing Six! No wonder it flashes a thrilling challenge to the fleetest and smartest on the road!

These nine features tell why! Ask us to point them out. Ask for a booklet explaining each in detail. Demand the facts!

With this great Six Dodge Brothers have struck an entirely new note in fine car value.

WILLYS-KNIGHT BROWNING AUTO COMPANY DODGE BROTHERS Senior Sedan

Willys-Knight offers distinctive ensembles of rare taste and beauty

By all means, be sure to see this improved, finer Willys-Knight—at your earliest opportunity.

Low, sweeping lines that establish the modern tendency in body design. And now, your choice of many brilliant color combinations, both in lacquer and upholstery. Colors that are rich, harmoniously blended, lastingly attractive.

From the mechanical standpoint, the improved Willys-

Knight is a triumph of engineering. You enjoy the important exclusive advantage of the Willys-Knight sleeve-valve engine—the only type of engine that definitely improves with use. Smooth, quiet and powerful at the very beginning, this famous engine grows even smoother, quieter, more powerful the longer you drive.

Willys-Knight Six, \$1295 to \$1495. Willys-Knight Great Six, reduced prices \$1850 to \$2050. Prices f.o.b. factory and options subject to change without notice. Willys Overland, Inc., Toledo, Ohio. Phone 3647 2 and 2 West.

Twin Falls Country's Best Opportunity Is Dairying

Dairying, for Idaho's natural conditions, is the Twin Falls country is exceptionally favorable. It affords the best method of obtaining a steady, year-round income, which is the nation's greatest need. W. T. Leslie, of Harco Brothers Seed and Supply Company, Twin Falls, Idaho, is a prominent grower of grapes at Klamath. Here are Mr. Leslie's views on the subject:

"For the past several years we have been hearing a great deal in regard to farmers studying markets and marketing and I think that we all agree that farmers should give a great deal of thought to this subject, but it seems that a great many people get the wrong idea on just what is meant by studying markets, most of them seem to think that studying markets merely means the studying of prices from day to day and the best time to sell and the manner of selling a commodity, but there is a great deal more to the subject than that. Studying markets is not a day to day proposition nor for a season, but a study and analysis of conditions for years ahead. It does not apply to the country as a whole but each section of the country has its own peculiar problems and the problem always has a great many different angles. Each separate section of the country should study and analyze its own peculiar marketing conditions to determine the best line of effort to follow for the long pull.

Let us consider our own situation from this point of view. In the selling of commodities the first thing to consider is the demand. Without a demand there can be no price so that demand should always occupy first place in the studying of markets. When a merchant considers taking on a line of goods, the first question that he asks is, "What is the demand?" Granting that a demand exists, the next question is whether this demand is in volume and whether or not it is a continuous demand or merely seasonal. A commodity is in demand in volume and the demand is continuous if it is a good business proposition to it. The same applies in farming. Each section should produce those commodities for which it has a continuous, dependable demand. If such a demand exists the price usually takes care of itself and will run up a profitable figure for the long pull. Right here let us apply this to dairying. First, we have this fact: It is safe to state that there is no other agricultural product for which there is a greater demand than dairy products. Keep this fact in mind and do not forget it, every man, woman, and child in America is a consumer of dairy products at every meal during his life time. Few agricultural products are in this position and none of them to a greater extent. Right here you have your demand in volume, a continuous, dependable demand, a demand through all seasons of the year and which is ever on the increase. Now let us look into our own de-

MISS AMERICA, JR.

FOUR-YEAR-OLD Lorraine Ferrary of New York, snatched after winning little as champion child, bathing beauty at contest held at City Hall, N. Y.

When we consider that this line is now our largest single source of agricultural income it is time for all farmers to give it careful consideration and study. It is something that is going to grow of greater importance from year to year and the Twin Falls section should not lag behind the rest of the State in helping develop so great an industry.

It is hard for me to understand why our section has been so slow to take up the dairy idea, but I am very glad to note the very favorable change that has taken place in recent years. What this section of the country needs more than it needs most anything else is a steady, dependable source of income throughout the year. It is true that such crops have been very profitable at times but at other times the reverse has been true. We are badly in need of some means of balancing this condition and the solution of it is in dairy cows and livestock. Furthermore, it is absolutely essential that we have this increase in livestock in order to maintain the fertility of our soil.

During this past spring I have had an opportunity to observe the progress of dairying in this section. My work has brought me in contact with hundreds of farmers who are interested in dairying in this and adjoining counties and there is one thing that has impressed me very forcibly and that is that on the average the man who owns the dairy cows and the livestock on his farm seems to be progressing very much better than the man who owns our farms. Even where herds are small, where the farmer complained that his cows were not paying and very many of them were dying, their are making more money out of cows than from anything that they had tried in a farming way.

It is plain, common sense and good economic policy to develop and increase the thing that we know is paying. We must learn not to be carried away by big money made on certain crops in certain years. These big hittings do not come with enough frequency and are the exception rather than the rule. We need a good stable foundation, something that pays steadily, regularly, and continuously. The dairy industry meets this requirement.

Twin Falls county has approximately 8,000 cows. She should have at least 10,000. We could carry that number without interfering greatly with our present agricultural program and just think what the income would be. There are a few people who still from various reasons argue that dairying does not pay in comparison with some other lines but there are not nearly so many of this class as was the case a few years ago. Most everyone admits now that dairying does pay in this country and pays well.

ing and hauling eliminated there will be actually less labor and less help required to handle the farm.

Another objection that I sometimes hear is that dairying is confining work and the same would apply to any kind of livestock. Let us look into this. Let us see the feeding and caring for cows or other livestock does involve the responsibility of being on the job with regularity. But where is the man who would admit that he is not willing to care for the few as well as the many? Every farmer, necessarily, must have a few cows and some other livestock. Let us find out, especially as to the job to care for the few as for the many? Considering that you are already in part way, just where and at what point does the question of responsibility and confinement enter into the matter?

—Cannot Cheese Work

I have had men tell me that they do not keep cows because they do not like them or did not like to milk. I always envy those fellows for my life I have never been in a position to choose my work but I do do the thing that circumstances and conditions demanded. I do not like to make public speeches but have been asked to do so and here I am.

We have said that dairying pays in Idaho, some one may ask us to prove it so we will proceed to do so. You have all kept some cows and if you have taken the trouble to keep account of your returns you know how much money a good average cow brings in the year and you should know how much hay, grain and pasture it takes to feed her. I have had actual experience along that line and have taken the trouble to investigate through many successful dairymen in this section. My information is that at better past prices prevailing for the past four or five years an average dairy type cow will make a cash return approximately \$125 to \$135 per year. This does not take into account the value of skim milk fed to pigs, calves or chickens which adds greatly to the return. If you are marketing the whole milk the cash return will, of course, be considerably higher and value of by-products less.

Value As Fertilizer

Another item of return which must be considered is the fertilizer produced. The value of this item is hard to calculate but my fair-minded man will admit that it is great. You will know how a covering of barn yard manure increases crop yields and over the effects of such a covering extends over a period of four to five years its value cut hardly be over estimated.

What is the cost of feed costs for these cows? Ordinarily my differ on this subject but good authorities seem

ROYAL VISITOR?

KING ALFONSO OF SPAIN recently declared that he'd like to visit the United States in 1930, and would do so if trip could be arranged.

to agree that six tons of hay will feed an average cow through the year or three tons for the average feeding season with the animal on pasture the balance of the time. What has been the value of this hay for the past three or four years? If my memory serves me right, it has been selling at about eight to ten dollars per ton the past four or five seasons. In addition to the hay a small amount of grain should be fed for best results during the winter months but this item should not amount to exceed fifteen to twenty dollars per year. It would seem that dairying must prove a mighty profitable way to market hay and grain.

Must Raise Hay

Now, whatever system of farming you follow you are going to raise hay, you can't get away from it and maintain soil fertility. What are you going to do with this hay? Are you going to continue to sell it for eight to ten dollars per ton or realize more than double that amount for it, thereby making it one of your most profitable crops on the average?

A short time ago a farmer on this farm told me that he had a herd of thirteen selected dairy cows that last year returned him \$100 per head over and above all feed costs. This man kept careful account of feed costs. The figures he gave were cash return

slows and did not produce any milk of skin milk and fat milk.

Any man interested in dairying should read the reports of the Twin Falls County Dairymen's Association for the last year which reports on the cows. Also, the various and various county association reports for the same period. The statistics in these reports prove that the members are making mighty good money from dairying. They show cows and livestock to any good farmer in this section. I will not attempt to give the figures, get the reports and read them.

Can Keep Cows

I think it is safe to say that practically all farmers in this section are now keeping some cows and it would seem the practical thing to do to increase the number. A few make a very good meal ticket but more will make a sizable steady income. We have a very large number of herds running from five to eight cows which means that the man who makes a larger herd. With modern equipment a man can handle twenty cows as easily as the smaller herd and with the more labor modern equipment reduces labor and expense thereby increasing his profits. When you understand the growing of a new crop you do not hesitate to invest in all necessary equipment to handle it even to buying the seed to plant it. Why not invest in handling cows and livestock? Most of such equipment is in the nature of permanent improvements adding to the value and convenience of your farm. This is no longer a new country and we should settle down to a permanent practical system of agriculture, one that we can stay safely for the long pull. We have the best dairy and livestock country in the world and that line of agriculture has proven profitable not only here but in all parts of our land. Why not carry more livestock along with our crop selling and make our farming operations safer, sounder and more profitable for the future.

In conclusion, let me state again that what this section needs most is a steady year round income that is dependable and sure. Furthermore, with increasing overhead and expenses it is essential if we progress that total income should increase. A progressive developing section should increase income from year to year as it grows and develops. How is the income of this section to be increased? Only by increasing the income of the individual farmer. It is evident that income can not be increased by the crop selling route, all of our land is now in crop and it would seem that we are approaching the limit in this direction. If we get any material increase in income it must come through dairying and livestock farming and increase of soil fertility from the same source.

REO FLYING CLOUD

She is the "Ideal" of the Engineers

- She is not an eight nor a four but a six—the ideal engine, say the engineers.
- She is not 116" long, nor 126", but exactly 121"—the ideal length, say the engineers.
- She does not have a valve-in-head motor nor a sleeve valve motor, but an L-Head motor—the ideal type, say the engineers.
- She does not have cantilever springs, neither worm gear nor hypoid gear final drive, nor a four-bearing crankshaft, but she does have half-elliptic springs, spiral bevel gear final drive and a seven-bearing crankshaft—all ideal, say the engineers.
- She has none of the old and the obsolete, she does not offer you in 1927 the features of 1925, but from stem to stern, from roof to road, she is entirely new.
- No other car in the world today even approaches the Flying Cloud in its identity with the Engineers' Ideal Car.
- That is why a leading automotive paper has said that the Reo Flying Cloud is "the only feature in an otherwise colorless automobile season."

The Flying Cloud is a Pleasure Car

- She is a pleasure to see, to ride in, to drive, to own.
- She brings to motoring a thrill that mere passenger cars never had.
- She makes old cars obsolete and many of the newest dear at any price.
- Be sure to try one out. Then you'll understand why the engineers say that such a car is ideal. You'll know that a car rightly designed and built can give you more than transportation, can make traveling a pleasure at all times.

REO MOTOR CAR COMPANY, Lansing, Michigan

How 150 Automotive Engineers Agreed Upon An "Ideal" Motor Car

The Metropolitan Section of the Society of Automotive Engineers held a meeting in January for the design of an "Ideal Car" for the American Family. 150 leading engineers competed and their specifications were synthesized into a complete set of specifications for an "Ideal Car" as desired by all engineers.

Ask for the booklet, "The Hest and You Car," which gives a detailed comparison of the Reo Flying Cloud and the "Ideal Car."

BRITISH ADMIRALTY CHANGES RATION OF ENGLISH SAILORMEN

Orange Juice Now Served to Jack Tars Without Rum in Place of Lime Juice Once Given to Prevent Scurvy.

LONDON, Sept. 10 (AP)—The British seaman has lost his traditional name. Jack is no longer a "limey."
The Admiralty has changed the ration of lime juice given to sailors since time immemorial to prevent scurvy—and is now giving a daily portion of orange juice. The lime juice was always a treat with a rum ration, but now the sailor must take his orange straight.
"Changes possess more vitamins C than the bottled orange," said an Admiralty spokesman in announcing the change. "It is also less bulky and cheaper. The only sprays about 9,000 pounds a year for lime juice. It is also locally fortified with vitamin B. But orange juice will be given plain."
Jack wants to know what becomes of the rum.

Coach Makes Firm

LONDON, Sept. 10 (AP)—Since the days of sedan chairs and lumbering family coaches, members of the Coach-makers' company have gone to formal functions, in the height of vehicular fashion.

But when the company celebrated its 100th anniversary this year as a royal chartered concern, the coaches acted in limousines, and there was not a horse-drawn vehicle in the turnout.
London streets were jammed in the early half of the nineteenth century for their variety of carriages, which came in as many fashions as motor cars today.
There was the travelling chariot, with its large C-spine hung body and its seat behind for servants, used by the wealthy, when travelling abroad. The landaulet, of lighter character, accommodated two persons, with a high box seat in front of them and a movable hood. King William IV and Queen Victoria used invariably a brougham drawn by four horses which postillions rode.

Train Makes for Diner

LONDON, Sept. 10 (AP)—The Flying Scotsman express has its own dining room aboard. The train has proved so successful that coaches on other lines are to be similarly equipped. The refrigerator cars are in the dining carriage.
During the summer it has been found that nearly 300 pounds of ice melt during a 400-mile journey and it was decided to experiment with ice-making engine.

Power to Operate the Ice-making Apparatus is generated by an electric motor driven by a belt from the restaurant car wheels.

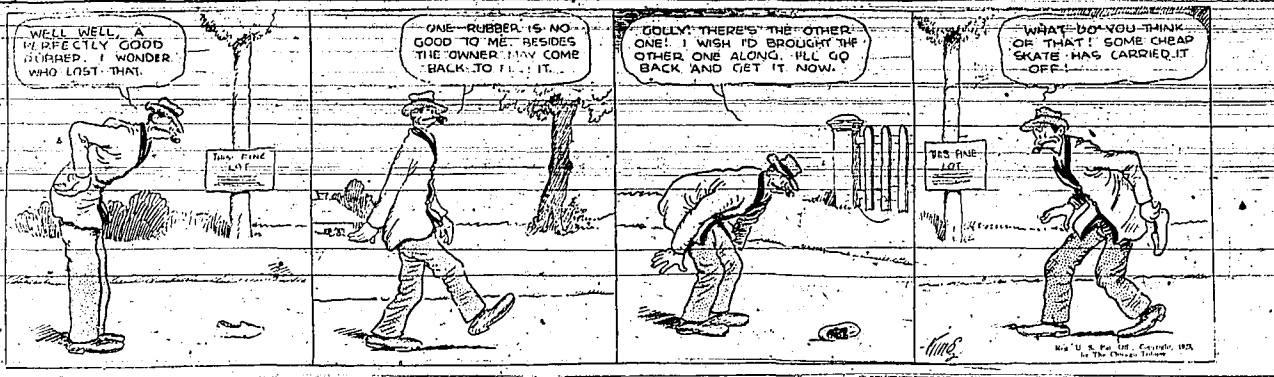

London to Get New Plant

LONDON, Sept. 10 (AP)—The erection of a 350,000 kilowatt electric generating station at Battersea is planned by the London Power Company, which controls the generating stations and main transmission lines of ten London electricity supply companies.
The company is already laying down a 22,000-volt transmission system interconnecting all the generating stations it controls. Some of the older stations will be closed down as the new plants come into commission this fall.

New Design Plan

LONDON, Sept. 10 (AP)—Colonel R. Johnson, Deputy Master of the Royal Mint, is now considering designs for new shillings, six-pences, florins and threepence bits. The new designs will be more in keeping with modern taste and definitely more artistic. The present design will retain the same faces, with the King's head, but the reverse will be an armorial design. Prevalent pieces of ornate ornament on "rest pieces" will be struck for the benefit of collectors.
The coinage change is the first that

GASOLINE ALLEY—SOME FOLKS HAVE NO CONSIDERATION

EXPERT SELECTED TO ADVISE ABOUT ORIENT

Secretary of State Advances Far East Specialist to Councils of Government.

WASHINGTON, Sept. 10 (AP)—The increasingly important role that the Pacific region and China is playing in the foreign affairs of the United States has revealed the necessity for having a Far Eastern expert sit in the higher councils of the government and has led directly to the elevation of Nelson Trust Johnson, chief of the Far East Division of the State Department, to such a post.
Johnson has made the position of Assistant Secretary of State brings to that office a man who has twenty years' experience in Chinese affairs and one who is perhaps the foremost American authority on Chinese problems. Johnson served eleven years in various consular positions in the Orient, and since 1918 has acted as one of the principal advisers to the government on Far Eastern questions.

Knows The Problems

In 1925 he was made chief of the Far East office, succeeding John Van A. MacMurray, who was sent to Peking as Minister. MacMurray's appointment was the first of several steps taken to provide a more prominent place in American governmental affairs for the Pacific region.
Johnson has made a thorough study of China's economic and political conditions and his experience with the Far East has been a valuable asset to the government in the situation resulting from the recent civil war between the Chinese and the Japanese, which threatened the lives of thousands of American citizens and threatened the security of property worth \$150,000,000. He framed and

Dispatched the greater part of the official correspondence with Minister MacMurray and the various warlike factions of the critical period when the national armies were rushing up from the south.

Needed as Expert.
It was in view of these unusual services that he was promoted when the need for a Far Eastern expert as Assistant Secretary became evident. The elevation of Johnson has, moreover, placed the State Department on a regional basis to a greater extent than has heretofore been possible. Johnson has charge of Asia and the Pacific region. Assistant Secretary William H. Castle, Jr., is well versed in European affairs, and Assistant Secretary Francis White is an expert on South American matters. The remaining Assistant Secretary, Wilbur J. Carr, has charge of the canal zone.
In promoting Johnson, Secretary Kellogg hoped also to lift some of the criticisms aimed at his administration of the foreign service. It has been charged by Rep. Edwards, Democrat, of Georgia, and others that Johnson in the service were behind promotions. Johnson is a consular officer.

Loudest Loud Speaker On Marconi's Yacht

TORQUAY, England, Sept. 10 (AP)—Secretary Marconi, the wireless wizard, has one of the loudest speakers on his yacht. Electric whistles have been heard all over the coast of England.
The inventor of his wireless apparatus is now in the yacht. He has been seen in the yacht. He has been seen in the yacht. He has been seen in the yacht.

Per the race for large capacity motor: Lieut. O. A. Moon, Kelly Field, Texas; Harold W. Beaton, Langley Field, Virginia; and Harry A. Dinger, Bolling Field, D. TWENTY ARMY AVIATORS ENTER SPOKANE RACES

WASHINGTON, Sept. 10—Twenty or more army aviators will take part in the National Air Races to be held in Spokane, Washington, September 19-24, according to a War Department announcement.
For the free-for-all military pursuit race the following officers have been selected: Lieut. Eugene C. Batten, Wright Field, Ohio; Lt. George and V. A. Pitts, Kelly Field, Texas; and Newton Langford, Mitchell Field, New York. The commanding officer of the First Pursuit has been authorized to enter three additional aviators from Selfridge Field, Michigan, in this event. Seven army pursuit planes of all will be listed.

For the Liberty Engine Builder's trophy: Lieut. Harry A. Johnson, Wright Field, Ohio; J. T. Jerry, Jr., Fort Greckett, Texas; and R. Base, Jr., Chanute Field, Illinois. In addition, the commanding general of the Ninth Corps Area will designate such pilots as he deems from that corps as entries. Their event is for observation planes; the army will enter four or more.

For the race for large capacity motor: Lieut. O. A. Moon, Kelly Field, Texas; Harold W. Beaton, Langley Field, Virginia; and Harry A. Dinger, Bolling Field, D. C. in this race two C-2 transport planes, of the type used by standard-Henrichsen Pacific flight, will complete under test, the southern ticket office and

Gaudy Show Boats Bring Drama To Isolated Ohio River Towns

CALLIPOLIS, Ohio, Sept. 10 (AP)—Show boats still ride the broad Ohio River and its tributaries, bringing entertainment to the hill-bound people. The villans stalk fiercely across the stage of the floating theatre, and the black-haired beauty stanchly defends her virtue or hides the mortgage of the old homestead. For the river folk like their drama held to elemental.

Reminders of a day when rowers thrusted the side wheels, the show boats never seem to lose their popularity for the smaller river towns. In some places no other entertainment is available.
The Cotton Blossom, French's Station, Spotsburg and the Golden-Rain are some of the bigger boats in the business.

Freshened up with glowing paint, the boats start from the headwaters of the Allegheny in the early spring and proceed downward to the Ohio before the breaking ice begins. They make two or three-day junkies up the Monongahela and the Great Kanawha, calling winter-weary people from caves and ridges by powerful blasts of air.
They go down the Ohio and up the Cincinnati and Tennessee rivers, and finally reach the Mississippi. Then comes a long, hard drift down stream where southern negroes had race two C-2 transport planes, of the type used by standard-Henrichsen Pacific flight, will complete under test, the southern ticket office and

TRIP ACROSS OCEAN IN FOOT-POWER BOAT PLAN OF AMERICAN SAILOR

DOVER, England, Sept. 10 (AP)—R. P. Tierney, once sailor on the steamship Aquitania, is preparing for a trans-Atlantic voyage in a 12-foot boat without steam, sails or oars. He expects to make the crossing in 25 to 30 days. His destination will be New York.

Tierney, a bachelor, has been a hairdresser at Balfour since he quit the sea.
The boat, a sort of baby submarine, has a propeller worked by a windmill. When there is no wind Tierney and a single companion will take turns working the propeller either with their feet, as on a pedal bicycle, or by hand like an invalid chair.
In the event of bad weather the top or "hockit" can be closed so that the boat becomes almost a submarine. Air is pumped into the cabin through a six-foot mast, which is hollow.
The boat was built by William Oldham, a Manchester mechanic, and draws two feet of water. It has a beam of three feet.

Runs ANY radio from your house electric current.

with 6 CYLINDER ENGINE and 4 SPEED TRANSMISSION and 4 WHEEL BRAKES (LOCKHEED HYDRAULIC)

Philco Radio AB Socket Power

It's a fact! It makes no difference whether you now have a dip-cell or storage-battery operated radio set, or what kind of battery set you have, the Philco Socket Power will run that set from your electric light socket, smoothly and perfectly. Yes, now you can select the radio with the one you like—any type and proven set—and then remember, Philco will operate it from your home electric current. Your radio switch controls everything—your "A" and "B" power as well as the radio itself.

Does Away with All Battery Bother! No more recharging! No more better to replace! No fuses or bottles! And better still, you can insure against fire by having the set connected to the electric light socket. Philco Socket Power is a safe, simple, and reliable method of power.

Trade in your old "A" storage battery; you won't need it when you get your Philco. Any of the Authorized Philco Dealers will make your trade-in allowance for it—no matter how old or worn out it may be.

Installation FREE and Easy Payment! Yes, any one of these Philco Dealers below will connect the New 1926 Model Philco Socket Power to your radio set, whether it is an old set or a new one, at absolutely no additional cost to you, and will give you easy terms; you merely make a small down payment and the balance a little each month.

Visit Any Authorized Philco Dealer below, or

The following are Authorized Philco Dealers: You can depend upon and who absolutely guarantee your complete satisfaction. Free installation, Easy Payment Terms and a Liberal Trade-In Allowance.

Bahl Auto Company, Bahl, Merrick Hardware and Furniture Co., Bahl, Cassia Implement Co., Barley, Paulson Jewelry Co., Barley, Casey-Parker Co., Twin Falls, Washburn Battery Station, Twin Falls.

FREE COUPON To Philadelphia Storage Battery Co., Dept. 9738, 118 17th St., San Francisco, Cal. A small fee is required to receive your free illustrated literature describing the famous Philco Radio AB Socket Power, and the full details of your easy payment, free installation and trade-in allowance offer.

Name _____ City _____ State _____

IMPORTANT: Though we provided this year for double last year's output, our sales use remains much above capacity. It would be advisable to call upon your dealer today—but mail the coupon at once anyway, even if you have not yet decided on the make of the radio you wish to purchase.

GAS DOME OIL CO.

Purchases Heavy Duty Standard Drilling Rig to Drill HAMMETT STRUCTURE

Company Has 3,200 Acres Oil Leases and 13,000 Acres Operating Agreements. Eminent Petroleum Engineer Mac Miller, From Mid-Continent Oil Fields Passes Favorably on Gas Dome Oil Company's Enormous Holdings in Hammett Field.

What Is An Oil Well Worth? (Settled Production)

10 Barrels Per Day	\$ 10,000
100 Barrels Per Day	100,000
1,000 Barrels Per Day	1,000,000,000
10,000 Barrels Per Day	10,000,000,000

Mr. Mac Miller, a Petroleum Engineer from the Mid-Continent Fields states as follows:

"The Geological horizon of the Hammett structure, is no doubt tertiary, and the tertiary formation is of what is termed recent, and does not always conform to the sub-surface geology, unless the latter formation was laid down before the folding took place, but the Snake River Valley folding was no doubt caused by pressure radiating from the nearest major uplift, that of the Sawtooth range, and simultaneously the lava flow started and was laid down through the valley, partially covering the tertiary formation, thus proving conclusively that the tertiary was laid down prior to the folding and therefore, in this case, should conform.

"Another definite proof of a conformity and likewise proof of possible production is had from the well drilled some 28 years ago by the railroad company about two miles north and west of Hammett and Artesian water! This well is still flowing some gas and can readily be lighted. The gas is said to be coming from the six or seven hundred foot level.

"There is a great deal of talk about the lava flow in this valley and the possibility of its burning up the oil. This could not possibly be a fact as the element water in some one hundred miles or more from the proposed well site and there are plenty of oil fields less than one-half that distance from it.

"The lava flow in the Valley did alter the surface somewhat, but could not possibly have any effect on the sub-surface formations to any considerable depth, greater than one hundred feet or less.

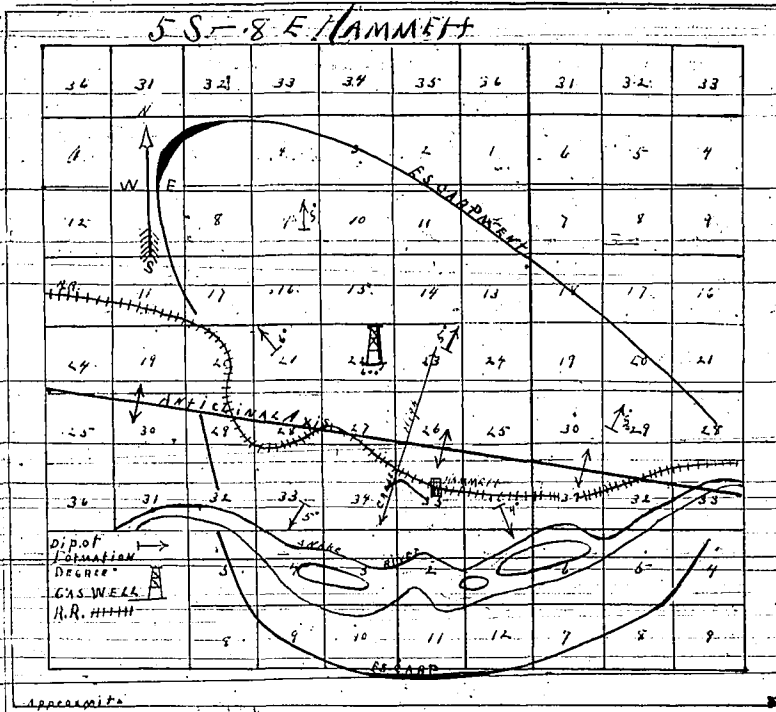

"The gas from the Hammett well is no doubt coming from the tertiary formation, thus proving conclusively that the gas could take its place in a porous stratum in the tertiary by reason of a fault but, the oil would not likely be present, therefore you must conclude that the Paleozoic formation had been reached where the presence of oil or gas could be expected.

"The presence of oil or gas in this well, though not in large quantities, is nevertheless of great importance. It proves conformity, and is what could be expected as a forerunner to a possible big sand and a well of surprising capacity.

"In view of these facts, I do not hesitate to strongly recommend the testing of this territory.

"There are no igneous intrusions, faults or other detrimental features visible on the surface and, therefore as a whole, it looks like a good and reasonable location to expect favorable results from an operation.

Mac MILLER,
Petroleum Engineer.

Gooding, Idaho

Gas Dome Oil Company,
Buhl, Idaho.

Gentlemen:

Pursuant to our conversation of the 28th ultm. regarding the well drilled on Section Twenty-two (22), Twp. Five (5) South, Range eight (8), E. B. M., by the O. S. L. Railway Company, on or about September 1st, 1901, I wish to further state as follows:

At a depth of approximately six hundred (600) feet, to the best of my knowledge, the drilling crew bailed crude oil out of this well on several different occasions. Many barrels full of oil were dumped in the dump pond and I personally set fire to this oil dumped in the dump pond and same burned very readily. This oil seemed to have a high gasoline content and was black.

At that time many people came into the field from all parts of the country, placing approximately three hundred (300) filings in the field. In those days the claims were all staked and recorded at Mountain Home, each filing covering 160 acres.

Oil men from Texas were there at the time and a great many samples of the oil were taken away from the field in bottles. Owing to the fact that I occasionally saw this well bailed on three different occasions I am positive that the oil bailed out of the well came from the oil sands encountered by the drilling done in the well. I repeatedly staked a 160 acre claim and the following friends of mine also staked out claims, which were filed at Mountain Home:

Henry Heller, Ralph Sylvia,
Tom Sagen, Walter Shields.

Several parties at that time were interested in drilling another well for oil and considerable interest was shown but we were unable to raise sufficient capital to proceed, so the matter was dropped.

Trusting this information will be helpful to you,
I am,

Very truly yours,
J. P. HELLER.

Phenomenal progress has been shown by this company organized only last June 22nd. A heavy duty standard drilling rig has been purchased by the Gas Dome Oil Company and arrangements are being made to move same to the Hammett Field, where we will spud in our well No. 1.

Before the great Salt Creek Field of Wyoming was proven, Midwest stock sold for as low as five cents per share. After production was brought in this same stock sold for as high as \$200.00 per share. Just Think! 4,000 for 1.

Many other oil companies have made enormous profits for investors and what has happened once can again be repeated in new prospective fields. Gas Dome Oil Company has the acreage, the drilling outfit and experienced oil men at the head of the company; men who have done nothing else for years, and who are capable and competent to go ahead with an operating company.

From time immemorial the history of oil is a tale of sudden transformation from comparative poverty to affluence beyond the wildest dreams of those to whom it came. Of fortunes thrust upon those who had the vision and nerve to invest their small savings in well managed oil companies, that were far sighted enough to acquire large holdings of choice acreage in good prospective oil fields before the first well came in. Acreage on Signal Hill, California, sold for \$50,000.00 per acre, after oil was discovered; land in the Smackover Field of Arkansas, sold for as high as \$40,000.00 per acre.

After our well No. 1, is drilled in, if production is found in commercial quantities, we believe Gas Dome stock will be worth at least 100 to 1, owing to the fact that we have such large holdings. Oil operators generally figure one well for every five acres of land, and on this basis we will have enough land to drill hundreds of wells. Our leases and Operating Agreements are all paid for and it will be the policy of the company to keep out of debt at all times, and we will make every dollar go as far as possible. Subscriptions will be accepted, where one-half cash is paid, and the balance can be paid in two equal monthly installments. This stock offering may be open only for a short time. Before it is too late cut out the coupon and send to us with your remittance. Make checks and money orders payable to,

TO GAS DOME OIL COMPANY,
Suite 7, Smith-Rice Bldg., Twin Falls, Idaho. Date _____ 1927

I hereby subscribe for _____ shares of the Gas Dome Oil Company stock, price \$1.00 per share, fully paid and non-assessable, for which I enclose herewith \$ _____ being (half) payment on this order, and I agree to pay the balance in two equal monthly payments of \$ _____ each.
