# THE RESULTS OF A DAY

## RUTH SHATTERS SIXTEEN YEAR RECORD IS SHATTERED

### Baltimore Creates New Major League Record on Famous Game in Circuit Drive to Win in Eighth.

(By The Associated Press)  
**NEW YORK, Sept. 30**—Babe Ruth's ninth home run of the season, creating a new major league record, carried the Baltimore Orioles to a 4 to 3 win over the Washington Senators today.  
With the score tied at 2-3 in the eighth, Coach Trippe, with one out and came home as Ruth shattered his old mark of 49 homers with a shot into the seats of the right field stand. Ruth also hit two singles and scored three of his four runs.  
Turning his pitcher, the world's champion, Miller Huggins worked Phipps and Pennock in relay today and the pair held Washington to five hits and one run.

## DUMB BELLS

### STATE NORMAL TEAM DEFEATS TWIN FALLS BRUIINS BY 12 TO 6

**Battling in Layer of Mud on Al- bion Gridiron Plastino's Charges Emerge With Short End of Score; Game Is Close.**

## ROBINS RUMBLE GIANTS CHANGE FOR PENNANT

### Lowly Brooklyn Team Hits Hard in Two Innings to De- feat New York Club.

**BROOKLYN, Sept. 30**—The lowly Brooklyn Robins rumbled what remained of the season's pennant chances here today, by hitting hard in two innings and beating New York 10 to 4. The pitching was steady, with the hero of the season, leading the Giants to five hits and all the New York runs were due to fielding errors.

## FOUR PAIR TEAM SO- FAR WEST TO START

### Nine Members of Pacific Coast College Conference Begin Of- fensive on Home Gridirons.

**SAN FRANCISCO, Sept. 30**—(AP)—The first football conference in the far west will get its members of the Pacific coast conference attacking one another on their home grids today.

## Experts Speculating on Final Possession Of Label Wreaths in Major League Ball

**NEW YORK, Sept. 30**—It wouldn't be a week's time without the baseball world's eyes being directed to the question of who will be the final possessor of the label wreaths in major league ball.

## Appointment of Vandal Full Back

**UNIVERSITY OF IDAHO**—The new coach, Fred Coe, has named Vandal full back, Fred Coe, as his first choice for the position of full back on the team.

## CLEVELAND 4-4; ST. LOUIS 4-3

**ST. LOUIS, Sept. 30**—St. Louis and Cleveland divided a double header here today, the Indians leading first to 4 and the Browns taking the second, 4 to 3. This game was played before only 200 persons, largely as a result of the heavy rain that fell yesterday's dinner.

## ST. LOUIS 4-3

**ST. LOUIS, Sept. 30**—St. Louis and Cleveland divided a double header here today, the Indians leading first to 4 and the Browns taking the second, 4 to 3.

## BOSTON 13; PHILADELPHIA 3

**BOSTON, Sept. 30**—Boston fell again today, this time to Philadelphia 13 to 3. The Red Sox were out of the game in the first inning.

## DATE FOR TEACHERS' MEET CHANGED AGAIN

A second change in date for the rural teachers' demonstration to be held at the Union school has been announced by the local board of education.

## Bruin Cubs Will Battle Albion's High School Here

Coch Jones' Cub Bruins will open the season on Lincoln field this afternoon at 4.5 p. m. when they meet Albion high school.

### HOW THE CLUBS STAND

Club	Won	Lost	Pct.
Philadelphia	32	14	.714
St. Louis	31	15	.677
New York	30	16	.652
Chicago	29	17	.628
Baltimore	28	18	.609
Brooklyn	24	22	.522
Cleveland	24	22	.522
Pittsburgh	21	25	.458

## CHICAGO 8-4; DETROIT 4-1

**CHICAGO, Sept. 30**—Chicago took both games of a double header from Detroit today by scores of 8 to 4 and 4 to 1 respectively. Palk's batting was the feature of the first game. He broke up the first game with a single in the thirteenth inning, which enabled Jimmy Thomas to score his eighteenth victory of the season.

## Tally in Second Period

The Bruins lone tally came late in the first period when a blocked kick giving Twin Falls possession of the ball on the 10 yard line and Martin carried it over after four plays.

## BIG WESTERN TEAMS WILL TEST STRENGTH

Denver University and Colorado College, at Denver to meet; Are Title Aspirants.

## Denver University and Colorado College, at Denver to meet; Are Title Aspirants.

At Denver, Sept. 30 (AP)—Rocky Mountain football fans will get their first test of strength tomorrow. Eight teams will play games that will have a bearing on conference results and two will meet non-conference opponents.

## JEROME AND BURLEY TEAMS READY TO GO

East End Will Meet West End at Part of Program of Bridge Opening; Tigers Develop Eag-

## TOLEDO CHAMPION TEAM DEFEATS BUFFALO CLUB

WATER MARKET. Has any good crops from the great war? Latterly people in most countries have come to feel that the world was a dead loss...

THE GREAT BRIDGE. To those who have watched the development of both the North and South sides of the Snake River in the area embraced by the two great irrigation projects it should be apparent that one of the greatest single achievements in the history of Idaho is being accomplished through the completion of the great inter-county bridge...

WOOL MARKET IS LESS ACTIVE - BUT STRONG; PRICES LITTLE HIGHER. BOZEMAN, Sept. 30 (UP)—The Commercial Bulletin tomorrow will say that in the wool market there is a slight improvement...

It should be a matter of congratulation on both sides of the river that capital from outside the State has been able to so splendidly underwrite the future growth of these two sections. That this money should have been invested in a project which depends for success very largely upon the factor of agricultural development is wholly good and highly significant.

Domestic Ohio and Pennsylvania Hecox Delatone combined 45c to 49c; three-eighths blood combining 45c to 49c; Michigan New York Hecox Delatone unwashed 45c to 49c; half blood combining 44c to 48c; three-eighths blood combining 44c to 48c; quarter blood combining 44c to 48c.

LEGAL ADVERTISEMENTS. ORDER TO SHOW CAUSE. In the Probate Court of Twin Falls County, Idaho, in the Matter of the Estate of Henry Olson, Deceased.

Such is Heaven's Nature. Being told things for our good we should be thankful. -The State Journal.

BREVITIES

Leave on Holiday Trip. Deputy Sheriff F. P. Fraser and C. W. Stropff left Thursday for a business trip for a few days during the week. Boise Lawyer Here. Charles J. McCarthy, former chief justice of the Idaho supreme court, was in Twin Falls Friday on legal business. On Hunting Trip. Mr. and Mrs. J. C. Arnhart left Friday for the Sea Point region in the Sawtooth mountains on a deer hunting excursion. Licensed to Wed. Norman Vander Venter and Naomi Baker, both of Burley, obtained a marriage license at the county clerk's office here Friday afternoon. From Stanley. George Edinger, who has been employed during the summer in road building in the vicinity of Stanley, has returned to the city of Stanley, where he will attend the winter here. Saw in Both. Mr. and Mrs. Paul Kinifley are parents of a son born September 28 at the Twin Falls county hospital. The boy is a grandson of J. C. McKinley. On Hunting Grounds. Frank McArthur left the first of the week to join Tom Williams at Stanley on a month's game hunting excursion to the Chamberlain district. Here From Boise. R. B. King of Boise, accompanied by the Idaho Power company, with Mrs. King, arrived last evening to visit friends and attend the bridge celebration. Chemist Travels. H. L. Waller, former city chemist, has gone to Emmet at request of state officials to spend several weeks making chemical analysis of the arsenic residue on apples. Judges Utah Horses. E. O. Walter of Piler left last evening for Salt Lake to serve as judge of draft horses at the Utah state fair, in which capacity he has been retained for a number of successive years. Snow Near State Line. Thomas Owens returned Friday from his farm south of the Salmon dam. He said that there had been a slight snowfall there but that it did not damage seed or sprouts on his farm. Here on Visit. Mrs. J. C. Bradbury and daughter Joan of Ceres, California, are guests at the home of Mr. and Mrs. A. W. Peck. Mrs. Bradbury and Mrs. Peck were classmates at the University of Southern California. Band Gives Concert. The student band of the Twin Falls high school gave a downtown concert Friday afternoon to advertise the football game between Twin Falls and Albion high schools to be played here tomorrow.

The Weather

The weather was more moderate Friday than the day before but was still warm enough to cause uneasiness. The maximum was 84, which was four degrees below normal. The minimum was 54, which was four degrees above normal. The precipitation of .10 inch was also slightly above normal. A fair to cloudy day and, as a coincidence, the precipitation of .10 inch was also slightly above normal. A fair to cloudy day and, as a coincidence, the precipitation of .10 inch was also slightly above normal.

EVENTS

Secretary of the State. The policy of holding county and celebration days together in the manner that prevailed this fall in southern Idaho, is an excellent idea in the opinion of Ralph T. Thomsen, secretary of the state chamber of commerce who arrived at the county train Friday to attend the bridge opening here today. Mr. Thomsen has been in Idaho for several years to the importation of the investigation going on, and are prepared to do so. The secretary was accompanied by Joel L. Price, general agent of the Oregon Electric Lines for Idaho. He attended the American Falls celebration of the dam Wednesday and the opening today at Twin Falls. He declared that he regarded the bridge opening today as one of the most important events in Idaho history. We are representing a high grade Idaho made platan case with a beautiful walnut case, new finish, just like new. Will sell at reliable price for Idaho. Call on us for more. ### BUILDERS WILL PROTECT JACKSON LAKE GATES FROM STORMY WAVES

Joint Meeting of Canal Boards Takes Action to Protect Dam; Twin Falls Members Authorize Buying of Ruth Dredger.

Authorization of the installation of log booms in Jackson lake reservoir was voted Friday at a joint meeting in Jerome of the Twin Falls and North Side Canal boards and E. B. Darlington in behalf of the Minidoka units. The installation of the booms will cost the Twin Falls board \$2000. It is believed that the cost may not exceed \$2000.

Members of the board authorized the purchase of a Ruth dredger which has been used at the west end of the dam. The board also authorized the purchase of a Ruth dredger which has been used at the west end of the dam.

### Specially Designed Machine Will Keep Bridge Toll Records

A new toll-recording machine which was installed Friday afternoon at the toll house of the new Twin Falls-Jackson highway is being used to keep records of the Snake River gorge is a new departure in adding, counting, and computing devices. The machine keeps a complete record of every toll transaction taking place on the bridge. Between separate classifications are recorded by the machine which are electrically operated. Autos, trucks, trailers, pedicabs, motorcycles, horse-drawn vehicles, and other types of bridge-crossers have their own particular places on the records kept by the intricate machine. Every receipt issued in the tolling process is filed in the machine. In addition to the recording feature, the instrument issues a receipt to the individual showing the classification of the vehicle, person or animal crossing the bridge, the serial number of the transaction, the date, the amount paid, etc. The receipt bears the picture of the bridge, and plans are now being made to have a picture printed on the check which will show distances from the bridge to many points of interest in the Northwest.

### Rooming Problem Is Intense in Twin Falls

Troubles of a policeman, which due to lack of hotel room accommodations, are graphically described about 10 days ago by Del Kennison, has become accentuated by the "war" which has broken out temporarily driving many people into the city. All the hotel and rooming house accommodations have been

### PICKERS OF APPLES GET EQUIPMENT FREE

Situation Here Is Better For Employes Than the One Suggested by Twin Falls Plumber

By furnishing sacks and equipment free for workers in the orchard, apple growers already have a "system" in operation that is more satisfactory to the pickers than that suggested by Alex W. Murray, it was stated Friday by Joseph H. Seaver, owner and manager of the orchard. Seaver said that the growers do not charge for the equipment and most of them are fully supplied. "All our orchards," he said, "the grower checks in his sack in the evening and checks it out in the morning. This is because there is a certain packing statement engaged in picking some of the orchards. Now, while we furnish the sack free, if it should be lost, by the picker, we would deduct the price of the sack from his wages." Seaver said that the system which the Murray plan proposed to improve, does not exist here, though it does in some other places.

### J. D. BARR OWNS BILL ON GAMBLING CHARGE

Judge H. D. Reed Returns Judgment of \$100 and \$39.90 Costs; to Appeal Case.

A fine of \$100 and costs of \$39.90 was the judgment passed by Police Judge H. D. Reed, Friday, upon J. D. Barr, found guilty of gambling after a two days' trial by jury. Barr is the proprietor of the Oregon Trail Social Club over Magaly's cigar store on Main avenue south which was raided by local officers last Friday night. Judgment was passed upon Barr by Judge Reed at 8 o'clock Friday afternoon. A verdict of guilty as charged was returned by the jury. Barr is to appear for trial which took up two full days and one night session. Barr gave verbal notice of appeal to the district court through Attorney J. W. Taylor. Bond was placed at \$500.

### SALE OF STATE LAND IS TO BE HELD IN JEROME

The public sale of five state lands which will be held in Jerome, Idaho, on Tuesday, October 4, at which time the lands in Jerome, Gooding and Blaine counties will be offered at public auction by T. P. Nash, state land commissioner. The lands are: 1. A 40-acre tract suitable for growing all kinds of grain, root crops, alfalfa and fruit. They have a North-South water right and water right under the American Falls dam.

### ENGINEERS SET TO SIGN DE APPROVAL ON SPAN

Samuel Murray's Certificate on File as Jerome Says 'Bridge Is Safe and Convenient'

The Twin Falls bridge later today will be approved by the engineers of the American Society of Civil Engineers and a registered professional engineer, who was consulting engineer in the building of the giant span.

### LOCAL SKATING RINK OPENS

The Pleasure roller skating rink at 350 Second avenue south, will hold its grand opening this evening under the management of William C. Hubbert. The rink is 40 by 110 feet in size and 125 persons may skate at one time on the hard maple floor. There will be skating room at one end and one side.

### WILKIE'S BILL ON GAMBLING CHARGE

Judge H. D. Reed Returns Judgment of \$100 and \$39.90 Costs; to Appeal Case.

Willie Wilkie testified that Barr took a percentage from each winning hand. The defendant answered with the statement that the chips used in the game were "counter" and had no value whatever. Defense witnesses could not agree as to the method employed in determining the winner of the game. "I believe," Wilkie said, "the chips were taken by any of the players in regard to the number of 'counters' they had in the game." Wilkie said that the time of Barr's arrest will be held as soon as E. M. Sweeney, city attorney, who is presenting the prosecution, has completed some cases now pending in the district court.

You don't die of starvation because the butcher doesn't call to sell his wares.

Instead you go to the butcher shop and buy yourself a steak.

You don't go around dressed in a barrel because the tailor will not visit you.

Instead you go to the tailor and order a suit of clothes.

You don't go around barefoot because the shoe man neglects to look you up.

Instead you go to the shoe store and satisfy your needs.

## — but when it comes to Insurance

You expect the insurance agent to hunt you up. If he doesn't come around you go unprotected. It never occurs to you to go to the insurance agency and buy your insurance just as you would buy a beefsteak, a suit of clothes, or a pair of shoes.

In our agency, we sell insurance right over the counter. Of course we call on the customers and give them the best service that is possible, but we cannot go everywhere. On the other hand, we can make it perfectly easy for you to come to us and satisfy your insurance needs.

If you are not fully protected, don't wait— come around today and we will see to it that you are properly insured.

We are here to serve you. Look us up.

BUILDING GIANT

BRIDGE OPERATE ON EXTENSIVE SPHERE

Puget Sound Bridge and Dredging Company Does Heavy Construction Work in Many Lines of Endeavor.

The Puget Sound Bridge & Dredging Company of Seattle, builder of the Twin Falls-Jerome bridge, reckons its history from the Seattle firm which nearly wiped out the city in 1892.

In the year 1897, and without change in personnel, the present company was organized, so that, in reality, it has been in the construction business in the northwest for nearly 40 years.

In the last five years it has not confined its efforts to the northwest, but has been building large projects from the coast to the coast.

The Puget Sound Bridge & Dredging company does heavy construction work of all kinds, and has within its own organization engineers capable and able to construct but to intelligently design any of the great engineering undertakings, a notable example of the ability of its engineers being the Twin Falls bridge.

Ship Builders During War

During the World War the Puget Sound Bridge & Dredging company constructed 18 wooden ships, and its vice president at that time, R. M. Eyer, since deceased, made it possible to build wooden ships in quantities by designing a bevel planer to fashion the planking which did the work of 40 skilled mechanics.

Outstanding examples of the work accomplished by this company are the following:

Dredging: Dredging in practically every harbor on the Oregon, Washington and British Columbia coasts.

Approximately 4,000,000 yards of dredging in Seattle harbor.

At the present time, its Canadian allied company is doing a 4,000,000-yard dredging contract in Vancouver harbor.

Stadium for the University of Washington, built of concrete laid directly on hydraulic fill, seating capacity, 30,000.

Dams: Reinforced concrete dam on Jordan river, Vancouver Island, length 750 feet, power house built for B. C. Electric company.

Reinforced concrete dam at Estacada, Oregon; 90 feet high, 760 feet long; built for Portland Railway, Light & Power company.

Reinforced concrete dam at Anwar, B. C., 120 feet high, 1,000 feet long.

Hydraulic fill dam, sluicing method.

NEW EXECUTIVES IN LEGION ORGANIZATION

New York Attorneys Head American Ex-Soldiers' Order; Women of East Are Officers.

PARIS, Sept. 30 (AP)—New York attorneys head the American Legion and Forty and Eight for the coming year, according to reports from the national headquarters.

At the Paris convention of the Legion of the United States, Edward E. Spafford of New York was elected national commander, Pelham St. Clair de Cherville of New York was named chief de cabinet, and Mrs. Irene McHenry Walbridge of Peterboro, N. H., was named national president of the American Legion auxiliary.

David of East Providence, R. I., was named chief of staff of the Forty and Eight, and Mrs. Spafford was named chief of the Forty and Eight auxiliary.

Spafford, the first member of the navy service to be made head of the law firm.

Mrs. Walbridge is a native of Ontario and the daughter of a Salvation Army worker. A resident of the Forty and Eight, she served in the Salvation Army ranks during the war and was three times cited for bravery under fire.

She, like Spafford, is a member of a New York legal firm. She succeeds to the presidency of the Forty and Eight auxiliary and the vice presidency of the national auxiliary of the eastern division.

Sammy Bohne Sets New League Record

MINNEAPOLIS, Sept. 30 (AP)—Dismissed from club and finally dropped from the majors as a "through" in the American association.

Bohne played 23 consecutive errorless games as third baseman for the Minneapolis club, setting a new record for the position.

The record was set during the season by three sackers was held by Julian Wern, now a member of the New York Yankees, who played 23 perfect games in 1914.

Bohne was with the St. Paul association team last year.

In and Around the City of Jerome

A GROUP OF VIEWS in the vicinity of Jerome, North Side terminal of the route from Twin Falls over the new bridge. Canals which strangers take for rivers supply moisture for a large and fertile area. The Jerome High School is shown in the lower left while at the top on the left a Jerome neighborhood ranch home, the property of A. W. Atwood, is pictured. Diversification of crops is practiced on the North Side. Dairy cows and sheep are an important factor in the livestock industry.

Honor Plague Victims With Quaint Service

RYAM, England, Sept. 30 (AP)—Like Oberammergau, in the Bavarian Alps, Ryam was not spared from the plague. It has no passion play, but holds a service annually to commemorate the spirit of the brave villagers who fought to control the disease which in 1656 carried off 250 of the 260 inhabitants of the little Yorkshire hamlet.

Two thousand persons attended the service, this year, which was held on the very grassy hillside, beside Pulpit Rock, where two and a half centuries ago William Kempson, the rector of the village church, presided every Sunday in his plague-stricken congregation.

The rector's wife died with the plague. She and the surviving members of the parish kept up the fight to prevent the disease from spreading to the neighboring territory.

The disease reached Ryam from London in a box of clothing sent to George Vicars, a local tailor. When it began taking its toll of death the vicar exhorted the villagers to flee from the village and spread it to the surrounding country. He led his parishioners in caring for the sick.

EDUCATOR RECOMMENDS WOMEN AS MEMBERS OF SCHOOL BOARDS

SAN FRANCISCO, Sept. 30 (AP)—The school system, in a community large or small, urban or rural, can successfully develop without the help of women on its school board, believes Mrs. Ernest J. Mott of San Francisco.

From her own experience as a member of the board of education of the city and county of San Francisco, Mrs. Mott recommends the kind of public service to women voters. Women are needed on these boards, she says, because they appreciate fully the relation of the school to the home.

Her first appointment Mrs. Mott was elected to the seven-year term which she is now serving.

"While there is no difference between men and women in their desire to bring the public schools of their respective communities up to a very high standard of efficiency," she says, "the multiplicity of details that confront school directors requires the point of view, the knowledge and understanding, as well as the wise and intelligent interest of both sexes."

Mrs. Mott is also a director of the National League of Women Voters, and in charge of league development activities, California, Nevada, Nevada, Oregon, Utah and Washington.

CIVILIZED WORLD SEES BIG SPAN IN PICTURES

Motion pictures of the first automobile crossing the Twin Falls-Jerome bridge last September 1, for Paramount new reel, have been exhibited in about 200 cities in the United States and Canada in the past two weeks, according to advices received by Joe Koehler, manager of the Idaho theatre, through whom the cameramen were brought here to record the event. The pictures, it was estimated, will be shown in an average of 100 towns and cities each week throughout the civilized world during the next six weeks.

EUROPEAN LINKS CROWDED

PARIS, Sept. 30 (AP)—American tourists who brought their golf clubs in France this summer, hoping to play a few rounds at such popular resorts as Deauville and Le Touquet, discovered, in many instances that the only way the could get off the tee was to get up with the sun, or schedule their rounds days in advance. The course at Le Touquet is closer to London than any Scottish seaside course, and is crowded with English visitors from April until October.

Moral: Don't Marry Over Open Grating

SOUTHAMPTON, England, Sept. 30 (AP)—What any bridal couple ought to know: Never get married standing over a grating.

In Freemantle, here, when the minister called on the best man to produce the ring, the bridegroom's second tumbled in his pockets. The waiting throng heard a tinkle—not a merry one.

The pretty cleric had slipped through a grating at the feet of the party. While the clergyman, principal, and church assembly waited, the verger tried at the grating, but in vain. At length he pulled up the adjacent grating and recovered the treasure.

The bride had forgotten to fasten the nightgown and the ceremony was resumed with complete success.

AMERICAN FURS TRADE HALF BILLION INDUSTRY

CHICAGO, Sept. 30—American women are supporting a half billion dollar industry on their shoulders. The annual run-over in furs in the United States amounts to \$500,000,000, according to Bernard Reineiman of New York, newly elected and treasurer of the National Association of the Fur Industry.

"The United States including Alaska, produces \$70,000,000 worth of new furs a year," said Mr. Reineiman in an address before the annual convention of the fur association here.

The value of fur entering commercial channels from Canada is only about one-fourth of this amount, and the value of the catch in Russia and Siberia about one-half.

"The comparatively small quantity of furs from Canada and Soviet Russia," (Continued on Page Six)

WOMEN WALK BEAMS TO CROSS BIG STRUCTURE

Mrs. Louise Gabriel, Mrs. Ray Caldwell and her little daughter, Lorraine, were the first women to cross the Twin Falls-Jerome bridge. They made the crossing a few minutes after the ends of the central span were closed. In accomplishing the feat, they had to walk a 25-foot unfloored section of the bridge, stepping that distance on an eight-inch steel floor beam, over which the canyon and river 476 feet below. Mrs. Gabriel's husband is a foreman of the bridge construction crew, and Mrs. Caldwell's husband is one of the steel workers.

MEMORIAL TO TEACHER

WHITE HALL, Ill., Sept. 30 (AP)—White Hall will erect a monument to Annie Louise Keller, teacher at the Centerville school, who saved the lives of 16-odd pupils at the cost of her own last spring when the building was demolished by a tornado. Her friends said she felt that some day a monument would strike the building and that she had trained herself for years to meet the emergency.

MORAL: DON'T MARRY OVER OPEN GRATING

SOUTHAMPTON, England, Sept. 30 (AP)—What any bridal couple ought to know: Never get married standing over a grating.

In Freemantle, here, when the minister called on the best man to produce the ring, the bridegroom's second tumbled in his pockets. The waiting throng heard a tinkle—not a merry one.

The pretty cleric had slipped through a grating at the feet of the party. While the clergyman, principal, and church assembly waited, the verger tried at the grating, but in vain. At length he pulled up the adjacent grating and recovered the treasure.

The bride had forgotten to fasten the nightgown and the ceremony was resumed with complete success.

Predicts Bible Study Pursued by Clubwomen

MINNEAPOLIS, Sept. 30 (AP)—A more wide-spread study of the Bible in women's clubs is predicted by Mrs. H. S. Godfrey of Minneapolis, Minnesota, director of the General Federation of Women's Clubs. "Our belief in the Bible both as literature and as a source of moral teaching."

"Too frequently one hears that the interest in Bible study is remote," says Mrs. Godfrey. "On the contrary, I see a very vital modern interest in its study. This is evidenced by current publications and movements for religious education buildings. One needs to be reminded that our government rests upon the Bible."

"There are many attractive methods of presenting the Bible in its relation to art, music, drama, pageantry and motion pictures."

"In answer to alleged criticism that Bible study intensifies dogmatism, I wish to say that such study has quite the opposite effect. Bible study offers the opportunity for learning the spirit of tolerance which the rule of strictly the inspirational rather than the doctrinal prevalet."

FORMER SCHOOL TEACHER SLATED TO HEAD BANKERS OF AMERICA

NEW YORK, Sept. 30 (AP)—Thomas Ross Preston, successively a farm boy, Tennessee school teacher, and runner for a bank, becomes president of the American Bankers Association this fall.

Preston, now first vice president of that association, is supposed for the presidency and according to custom is slated to succeed to that office. The retiring president is Marvin A. Traylor, head of the First Trust and Savings Bank of Chicago.

The career is typically American. While teaching in the free country of Tennessee he took up the study of law in the office of an attorney who was president of a bank.

UNION BRIDGE BUILT ON MANY OF BIGGEST OF WESTERN SPANS

Portland Concern, Identified With Construction of Twin Falls-Jerome Bridge, Has Long and Notable Record

The Union Bridge company of Portland, Oregon, in whose offices design and working plans and specifications for the Twin Falls-Jerome bridge were worked out by the company, has been engaged for many years in the design and building of bridge structures, many of which have been of considerable size.

The company has had the handling of several toll bridge projects, including existing structures at Melahatchie in northwestern Washington; Skoklo, in southwestern Washington; Durban bridge over Snake river near Pasco, Washington; Paaco-Kennelworth bridge at Pasco; the Bridge of the Gods at Cascade Locks, Oregon, besides the Twin Falls-Jerome bridge.

Met at 1:45

Associated with the Puget Sound Bridge and Dredging company of Seattle, Washington, in construction of the more important of foregoing jobs, the company now has under construction a toll bridge over the Columbia river at Brewster in north central Washington and is preparing plans and specifications for another toll structure near the north Pacific coast.

Veteran Builder

Charles G. Huber, president and general manager of the UNION BRIDGE company, has been engaged for more than 30 years in the design and construction of concrete and steel structures, principally bridges for highway traffic.

Mr. Huber had an important part in the design, construction and operation of the first toll bridge built in the northwest and in practically all of the others since constructed.

Chief Engineer

R. M. Murray, vice president and chief engineer of the company, began his career in the actual practice of structural engineering in 1908 in the steel mills at Pittsburgh, Pennsylvania.

He designed and supervised construction of several railroad bridges in the state of Indiana.

In 1910 Mr. Murray located in the northwest since which time he has designed and supervised construction of many highway bridges, including structures over Salmon river in Idaho, the Yellowstone, Big Horn, Little Big Horn, Tongue and Snake rivers in Montana, and Wyoming, besides his connection with the Twin Falls-Jerome bridge, Hansen bridge and the Rock creek viaduct in Twin Falls.

LEGION'S AUXILIARY WORKS FOR DISABLED

Sale of 8,134,578 Memorial Day Poppies Reported at Paris Convention.

PARIS, Sept. 30 (AP)—A total of 8,134,578 Memorial Day poppies were sold by the American Legion Auxiliary this year, according to reports from the national headquarters.

"Poppies were sold in many parts of the world, the report shows; in France, Alaska and Hawaii, as well as in every state in the Union." The sales were heavier than in previous years, and the institution of the annual poppy sale since 1919.

The manufacturing of poppies by disabled men was greatly expanded this year. In addition to the states of Minnesota, Wisconsin and Kansas, where poppies have been made for national distribution in previous years, South Dakota, Idaho and Oklahoma manufactured enough for their own use and to supply other states.

The states of Florida, Georgia, Iowa, Michigan, Maine, Mississippi, Missouri, Oregon, Pennsylvania, Rhode Island, Texas, Virginia, West Virginia, and Wyoming also produced enough poppies to completely or partially supply their own Auxiliary units.

Made in Hospitals

This establishment of the manufacturing unit in every part of the country enabled men from all states to have an opportunity to make poppies. Poppies were made in 30 different hospitals and in 100 different homes of hospitals where convalescing veterans or the wives of convalescing veterans were busy employed.

The first poppies were made in hospitals were so well pleased with the poppy making as a hospital activity that they have since then made poppies for the making of Memorial Day poppies.

From 1919 to the present year, 81,345,780 poppies have been made.

Thomas Ross Preston, successively a farm boy, Tennessee school teacher, and runner for a bank, becomes president of the American Bankers Association this fall.

Preston, now first vice president of that association, is supposed for the presidency and according to custom is slated to succeed to that office. The retiring president is Marvin A. Traylor, head of the First Trust and Savings Bank of Chicago.

The career is typically American. While teaching in the free country of Tennessee he took up the study of law in the office of an attorney who was president of a bank.

The pretty cleric had slipped through a grating at the feet of the party. While the clergyman, principal, and church assembly waited, the verger tried at the grating, but in vain. At length he pulled up the adjacent grating and recovered the treasure.

The bride had forgotten to fasten the nightgown and the ceremony was resumed with complete success.

### STATISTICS SHOW MANY INCREASES IN FARMING SECTIONS

Roger W. Babson Indicates Fallure Statistics Show Improvement in Business Conditions; Easy Money May Have Part

(Special to The News)  
BABSON, Sept. 30.—During the past week, Roger W. Babson has been making a careful survey of the retail situation in many of the farming sections of the country. His conclusions are as follows:

Statistics indicate both an improvement and decline in the retail situation. Failure statistics for instance show an improvement in the retail situation. Although many bankers looked for a marked increase in business failure this month, they have not noticed. This may be due to the easy money conditions, or to improved trade conditions, or to some other cause. Whatever the cause, the fact remains that failure statistics indicate an improvement in the situation. On the other hand, a series of advertisements which have been sent by certain casualty indemnity companies tend to show an entirely different situation. A recent advertisement is headed "100 per cent of your business is losing money." This statement is based upon certain corporation income tax figures, showing that out of 47,424 corporations reporting, only 236,389 made a profit. Without doubt, these figures are largely made up of retailers, especially small business retailers, who are attempting to stand up against chain store competition. This especially applies to the retail section, who, for the past few years have been working for their landlords. The chain store, installment business and high rents have been the bane of small retailers. Chain stores are inevitable and must be accepted. The installment business is here to stay, but is about at its peak for the present year. This means that the immediate problem is a question of rent.

A study of the rent situation shows that there has been a tremendous advance, both in houses and in stores, during the past 10 years. In most sections store rents are now double pre-war rents and in some large cities they are triple and quadruple. With-out doubt, in some sections large rents are justified even in the case of homes. Even with the present high rents, many who pay rent to live in a house in better circumstances than who own the house. Towards retailers, high rents and repairs are so expensive that there is much trouble and little profit in building homes to rent. As a rule, however, this criticism does not apply to stores. Business property is usually an attractive investment. There is no excuse for business rents going up as they have in certain cities. Furthermore, it looks very much as if business rents were now at their peak in certain sections. This applies not only to retail stores, but also to offices. Statistics rather indicate that the small business man will receive some relief in the near future from high rents—at least there is no reason for any retailer to pay more rent from now on.

There is a tendency to forget the importance of retailers. The retailer is the common soldier in the army of prosperity. There are about 2,000,000 of these soldiers all working to take care of the output of our mills and factories. The retailer is the lifeblood of the industrial community. If the retailers of the country should go on strike, wholesalers would fail, mills and factories would be obliged to shut down, and every working man would be thrown out of a job. Of course, there is another side to this question. The retailer has responsibilities. He has a trust to perform and a service to render. Moreover, the failure of many retailers to recognize this fact is the reason why so many of them are not making more money. Some economists believe that there are too many inefficient retailers and that the number should be reduced. Certainly nothing would help lengthen the present era of prosperity more than to have every retailer alert to business, rendered service and really help his customers.

**Demand for Standard Prices**  
Although the volume of business throughout the country is very good today, there is a general lack of profit. Volume is increasing, but profits are declining. This especially applies to the retail trade. Charts of retail trade indicate that there is a tendency for the large store to get larger and the small store to get smaller. The truth is that this applies in a general way to all forms of industry. The large corporations seem to be getting larger and richer, while the small corporations seem to be getting smaller and poorer. If this tendency continues, I should not be surprised to see it get into politics within the next few years. The independent retailers will probably endeavor to submit to congress and to state legislatures various quick cures. The retailers will attempt the same solution for their problems as have the wage workers and the farmers. Legislation will probably be presented to bring about rent reductions, improve credit facilities, and attempt to protect profits. I sincerely hope that no quick legislation will be enacted. It must be remembered, however, that although big business has the profits, yet little business has the votes.

There is one campaign in progress which may be successful. I refer to the growing demand on the part of small retailers, that manufacturers charge the same price for their products, irrespective of the quantity ordered. At first thought this seems a reasonable demand and yet it would be surprising to find no more manufacturers

### PERFECT BABY VISITS COOIDGE

MR. AND MRS. HANUEL FINKENFELD of Philadelphia and their 100 per cent perfect baby, Mildred Marcella, photographed after visit to President Coolidge at White House.

demand of the railroads. It was not many years ago when the railroads could make special rates to large corporations, based on the amount of goods shipped—that is, the more goods shipped, the lower the freight rate. When the small shipper commenced his campaign against such discrimination, he was ridiculed as a theorist or a socialist. Yet he won out today and would not think of going back to the old system. Therefore, the retailer may win out in his one-price campaign so that the small merchant may get goods at the same price as the large merchants and chain stores pay. Personally, I doubt if such legislation would hurt any manufacturer and it might be welcomed by many manufacturers.

**Retail Conditions Improving**  
From the latest statistics available, it is apparent that retail trade conditions vary greatly in the different sections of the country. Retail trade is distinctly better in the northwest and in the cotton sections of the south. Retail trade is better today in Washington—Oregon, Montana, Wisconsin and Minnesota than in any other section. Even some of the agricultural states in the central west, such as Nebraska, are enjoying better retail trade today. This winter retail trade should be better in the Carolinas and even in Georgia which has suffered so during the past two or three years. Canada also should show a gain for the better. Taking the United States as a whole, however, I should not be surprised to see some falling off as the need of meeting installment payments naturally retards the ability to buy new goods for cash.

### UNX-NO FACTOR IN GAMES WITH OREGON

Vandals Upset Mystery Rabbort and Idaho Starts Out on New Football Basis.

UNIVERSITY OF IDAHO, Moscow, Sept. 30.—Until the last two years Oregon has been very much in the limelight in Oregon-Idaho football history, so much so that a few individuals with a realistic turn of mind said that some mysterious power had decreed an Idaho football team never could win from the University of Oregon eleven. This was called the "Oregon linx" and was given new life every fall until the season of 1924 when the Vandals lured Oregon to Moscow and administered a 14-0 thrashing. The next year Idaho followed with a 6-0 victory, the second ever given Oregon by a Vandal effort. It marked the end of the "Oregon linx."

Idaho and Oregon did not meet on the gridiron in 1926 as the game at Eugene Saturday, October 8, is the nineteenth meeting of the two schools since the first game in Portland in 1901, when neither side scored. From 1901 to 1924, when Idaho turned the tables, the history of football relationships between the two schools presents an interesting study. No matter how strong Idaho teams might be or how weak Oregon might be the game either ended with the score in Oregon's favor. A 14-0 never could Idaho squeak out a win.

There are many memorable Idaho-Oregon games beamed out this point. One time Idaho led Oregon at the half. An Oregon player had been ruled out of the game and all the subs had been used; there was no one to send in. During the rest of that game Oregon played with ten men and won. That game and a few more like it were converts to the "Oregon linx" idea. Up to Idaho's first win in 1924 Oregon had piled up 227 points to Idaho's 72.

**On New Record**  
This year, with all "Oregon linx" talk rightfully done away with, the two schools are starting out on a new football record. Of course the past stands but in the future no one is to say that Fate, or any other force, has decided

### Chance Shows Jumper to Be Discus Thrower

STORRS, Conn., Sept. 30 (AP)—Truth may be stranger than fiction in discus throwing. Witness the experience of Alan S. Farrell, who observed the American Olympic team at a good high jumper, when he came out for the Connecticut Aggie track team. And something happened.

Farrell volunteered to help return the discus after the competitors in that event had made their bid. He observed spectators were registering astonishment because Farrell was unconcernedly hurling the discus back farther than the competitors threw it out.

At the demand of Aggie rooters, he was entered in the event. And Farrell threw his competition only to have his heaves ruled out because his ignorance of technique caused him to foul. That sufficiently was straddled out in subsequent training. Farrell now holds the college record of 115 feet, 4 inches.

that Idaho football teams always shall be forced to bow before teams from the state which has the toughest games this year but the Vandals are going to Eugene with an even chance for victory.

Here are all the Oregon-Idaho scores since the two schools first met. They give the cold figures but not the whole story of games won only to be lost when unlucky breaks went into Oregon territory:

Year	Oregon	Idaho
1901	0	0
1902	0	0
1903	21	0
1904	28	21
1905	19	0
1910	29	0
1911	3	0
1912	27	0
1913	14	0
1914	16	0
1915	10	0
1916	14	0
1917	27	16
1920	13	7
1921	7	7
1922	13	7
1923	0	0
1924	0	13
1925	0	6
Total points	237	91

### HUGGINS ESTABLISHES RECORD AS HIGHLY SUCCESSFUL MANAGER

#### Winning of Fifth American League Pennant in Seven Years for Yankees Places Pilot of Team on High Plane.

(By The Associated Press.)  
NEW YORK, Sept. 30.—The fifth American league pennant victory in seven years for the New York Yankees has established the pilot, manager, Miller Huggins, as one of the most successful managers the game has known. Huggins has succeeded where so many others would fail. He has demonstrated his shrewdness, his ability to develop new talent and direct the team expertly in the face of criticism and skepticism.

When the Yankees won their successive pennants in 1927, 1928, 1929, 1930, 1931 and 1932, Huggins' credit was given to Huggins. It was said he felt for to be a "team" built up with the aid of Colonel Ruppert's ever-ready and well-lit fountain pen. It has taken the brains of Huggins to bring out the best of Huggins' ability to shape his own destinies and construct another championship club after one fell by the wayside.

Of the stars of Huggins' first pennant-winning team only Babe Ruth, Lou Gehrig and Walter Neff remain as leading cogs in the 1934 championship line-up.

"Butter" Gehrig, Tony Lazzeri, Earle Combs, Mark Koenig and Wiley Moore, have been developed by Huggins among others in gathering together such a nucleus of players. Huggins' rank among the greatest of all time. Gehrig, the tall outfielder, who has won more American league flags than Huggins—Combs captured an over a 12-year period from 1923 to 1934. In seven seasons Huggins is only one short of the mark with a team which appears possibly to duplicate the top will say little for his time to come.

Never seeking the limelight, Huggins nevertheless is a forceful character. He makes his decisions without hesitation. He knows most of them forward over their midline manager, know who possess the outfit. They respect his keen judgment.

There was a time when Babe Ruth was continually at odds with his manager. Adkins, coached such a time ago that Huggins handed the Babe an unprecedented bit of punishment, a fine of \$500 for misconduct. It is understood this was rewarded later after Ruth apologized to Huggins and promised to turn over a new leaf. The manager's decision to mete out such a move had its effect. There is no friction now between Huggins and the club's best salaried star.

Colonel Ruppert, the Yankee owner, has always had implicit confidence in Huggins even when the former was subjected to criticism and at odds with Colonel T. L. Huston, who shared the club control with Ruppert. Huggins refused to consider shifting pilots. Now that his judgment and faith in Huggins have been confirmed, there is small doubt that Miller will hold the job until he is desired.

Huggins was manager of the St. Louis Cardinals before coming to the Yankees. It is one of the curious turns of his career that last year, in the market for a star who broke in under his management—Roger Hornsby.

### Holds World's Record by Marrying for Tenth Time

NEW ORLEANS, La., Sept. 30.—"A store that smokes, a parrot that swears and a cat, that stays out nights don't make a good husband," Mrs. Willis said.

MRS. JOHN W. WILLIS (International Illustrated News)

"I believe in love," she added when interviewed by reporters on the day after her ninth wedding.

- Her matrimonial record follows:
- No. 1—Duff McDonald, 16 years.
  - No. 2—Ed Walters, 3 years.
  - No. 3—O. E. Robinson, 10 years.
  - No. 4—Jack Burgess, 3 years.
  - No. 5—P. Chavallier, 2 weeks.
  - No. 6—John Gardner, 2 months.
  - No. 7—Charles White, 3 months.
  - No. 8—George Luigi, 5 years.
  - No. 9—B. Hatfield, 3 years.

"I just like to have a husband around," states Mrs. Willis. She explains that most of her divorces were by her husband's fault. She had a small fortune, and trying to wrest possession of it from her.

### TRIPLETS GO TO SCHOOL

OMAHA, Sept. 30 (AP)—The first triplets ever to attend school in Omaha are hard at work learning to read and figure. They are Leona, Wynona and Iona Adams, six years of age, daughters of Mr. and Mrs. C. E. Adams.

### SWEDES RESTORE GARDEN

UPSALA, Sweden, Sept. 30 (AP)—The old botanical garden of Uppsala, the Swedish "king of flowers," who is regarded the world over as the father of modern botany, has been restored at Uppsala, old university town, where he taught his system of classifying plants to pupils from all countries.

### FAGS AID COLLEGES

PIERRE, S. D., Sept. 30 (AP)—Citizens are building educational structures in South Dakota. Receipts of a tobacco tax go into a fund for buildings and state schools, and a memorial library at State college and a gymnasium at Northern. Receipts have been constructed out of the income in the first two years.

### Mexico Has Pyramid

There is a pyramid near Puebla, Mex., that is comparable to the pyramids of Egypt, according to Liberty Bazaar, located by the Toletic Indians. It is a pyramid of brick, with a base line of 1,000 feet. Cheops, largest of the Egyptian pyramids, has a base line of 750 feet and is 400 feet high.

### Cross Guides Seaman

High above the Seaman's Church Institute in New York city is a fifty-foot cross that glows every night with the radiance of electric light. It is a "battery" of incandescent lights, each 100 watts, down the length of the cross.

### Wild Flowers

Wild flowers are being collected in the mountains of Idaho.

### Church Free of Sects In Speaker's Version

BIRMINGHAM, England, Sept. 30 (AP)—There is no fear that England will split up into many sects, according to speakers at a church conference convened here to study the modern movement in religion.

"An American writer recently gave us an appalling picture of the atmosphere of American religious sects. I do not think that these conditions are likely to be reproduced in England," said Pastor Smith of Cambridge.

### "ELIGIBLE" MISS VISITING

LONDON, Sept. 30 (AP)—One of the few eligible European princesses whose name has been coupled with that of the Prince of Wales—the Princess Ingrid of Sweden—is visiting in England.

### Sandstorms on Ocean

Ships encounter sandstorms sometimes in certain parts of the Atlantic ocean west of the Canary islands. Weather experts say that the sand probably comes from the Sahara desert.

### THOUSANDS OF SEEK PURIFICATION

Benares, Holy City, Continues to Draw Faithful Thousands to Its Fifty Waters.

WASHINGTON, Sept. 30 (AP)—Benares, holy city of the Hindus, continues to draw faithful thousands who seek purification in fifty hot sacred waters of the Ganges. The Hindu pilgrims believe that a bath in these waters cleanses the soul from all sins and brings about a rebirth in a better state.

On dusty side streets, so narrow that carriages cannot pass, men, women and children jostle together, frequently carrying bundles of clothing, or place flowers upon some insignificant stone that to them is a sacred shrine.

"After visiting other Indian cities where pilgrims are always in evidence, the travelers wonder if all of them followed him to Benares, for the streets are filled with them. Dirty and ragged, with their bodies distorted into grotesque shapes, they are always on hand when the pilgrims pass or congregate.

For three miles along the Ganges a succession of ghats or bathing places are filled with Hindus of every caste. In murky water in which Mark Twain said even a germ will not live, pilgrims wash their clothes and drink, while in mid-air vultures may be seen feasting on half-burned bodies of human beings whose relatives were unable to bury sufficient wood to completely cremate the remains.

# ON FARMERS' INTEREST

## State Extension Forester Tells of Many Ways in Which Suitable Trees Prove Beneficial in Country.

With a view to increasing the farm income and beautifying the landscape of the Twin Falls country, the forester of this county has been urged to plant trees along fence rows, roadside and highways, and irrigation canals.

There are many ways that tree growth is beneficial to the farmer, stated A. M. Bowler, state extension forester, "providing the proper trees are planted and in the proper place on the farm. The farmers are urged to plant all the portions of their farms to good wood, such as black walnut or black locust, which species seem to be the best for this section of the state. The black walnut furnishes a fine wood besides producing a nut crop while the black locust produces an excellent fence post and the tree being a legume returns nitrogen to the soil so planted along the fence rows, irrigation canals, roadsides and highways, or on the rocky areas of the farms, they are suitable to the farmer's interests on farm land. It is such portions of the farm which are not working and they should be planted with trees.

There is some objection to tree growth next to field crops on account of the fact that it saps the ground a short distance out from the trees. This loss of ground is more than offset by the income from the trees providing a right kind of trees are planted and they are properly handled. Often it is possible to establish the trees between the irrigation ditch and the fence, thus the farmer has the best of both worlds.

There are some crops, such as beans, which are injured in growth next to the trees. The black walnut, but it may be that the crop is considerably benefited farther out in the field by the trees. The farmer should prove or disprove as the case may be, within the next few years, through the windbreak study which is now being conducted on the tract. Such crops as alfalfa and wheat seem to be able to produce a full crop right to the base of the trees.

### Tree Growth Aids Control

Trees planted along a fence row crowd out the weeds which cause considerable trouble to the farmer. This is especially true of trees near the fence, where the wind, which has a great extent, since the trees break the force of the wind, so this is of assistance in solving the problem of weed control.

### Willows a Menace

The willows which are making dense growth along irrigation ditches are robbing the farmer of a just income. They should be cut out without delay and both sides of the ditch planted with desirable trees. The black walnut should do well in such places especially. To get rid of the willows the following is suggested: Cut the willows to the ground in the winter or other time of the year when other farm work is not pressing. One portion of land which has been taken over by the willows and turn the live stock in for grazing. The live stock will thrive on the new shoots and leaves of the willows and on the grass and weeds growing along the ditches. One year of such grazing will practically eliminate the willow growth. The spring following, plant both sides of the ditches to black locust or black walnut. Livestock should be excluded till the tree growth has attained a height of about six feet. It is easily done since the fence is already in place. When once the trees are growing beyond the reach of live stock, it will give shelter, the live stock, supply fence post material or a nut crop, depending whether black locust or black walnut are planted, and give protection to the field crops from the winds, besides the area enclosed will supply excellent grazing for livestock.

### Attractive to Tourists

Trees planted along the roadside or highways add very materially to the landscape of the tract besides modifying the undesirable effects of the reflection of the pavement to the autoist. Tourists are quick to appreciate tree growth along our highways and it is a feature of advertising which should not be overlooked. Our highways lined with trees will give this tract much favorable comment from the tourists and this the result of a lot of expensive campaign advertising. Here again though it is necessary to choose a suitable choice of trees. Tree growth which will not grow to height which will cause interference with lights and telephone wires is recommended. The black locust and black walnut again seem to fill this qualification.

### Government Help

Many farmers have inquired as to a source of forest and shade tree stock for farm planting and it is suggested that they contact the nursery purchased from any commercial nursery or from the state nursery at Moscow. If purchased from the state nursery tree stock may be had merely for one of production and transportation with the government to supply material to the farmers for wood, shelter, or windbreak plantings at this low cost. A list of trees available for such plantings may be had upon request to the extension forester, school of forestry, University of Idaho, Moscow.

### Enlightened Farmer

It is a common error to think in the light of the fact that shade trees are planted that shade trees are planted.

### Capital City in Grip of Political Hysteria

WASHINGTON, Sept. 30.—The capital city is now suffering from a form of political hysteria. It runs a high fever of excitement over every rumor, matter how insignificant, and discovers plots, counterplots and intrigues in the most ordinary and commonplace happenings. A striking example of this political nervousness and hysteria has been spread here the country during the past week.

A few weeks ago, before going on a holiday jaunt, William M. Butler, chairman of the republican national committee, wrote a half dozen letters to certain of his intimate friends on the committee, John T. Adams, Charles D. Hillis, Ralph E. Williams, and Dr. E. B. Clemen, and others, advising them that he expected to be in Washington the week of October 3, and that he would be pleased if they had the time to drop in so that they could talk things over. He had in mind the discussion of the call for the national convention, and similar matters, in anticipation of the assembling of the national committee in December.

Anyone who knows Butler appreciates that his invitation meant what he said, and nothing else. But disquiet was in so jumpy a state of mind that hundreds of columns of stories have been printed in prominent newspapers ascribing all sorts of motives, including the creation of a "draft Collier" hypothesis to the chairman's invitation. We have now reached a state of mind where we are questioning the integrity of the weather reports.

### Judge Blames Parents For Youth's Wildness

The parents of Ambridge are to blame for the "moral delinquency" of their son, Judge says today, in a ruling on the young generation, declares Judge Charles A. Oberwyger, city magistrate of the city of New York, in an article in this week's Liberty.

"Youth doesn't know what it is doing," the magistrate contends. "But the parents know, and most of them are too lazy, or too timid, or too complacent, or too something to do their duty."

"Corrupted society with its conventions and restrictions," Judge Oberwyger continues, "used to safeguard its young, but the parents of today are a large part of their responsibility. Today, society does the opposite, if anything. And many parents seem to have lost the habit of taking care of their child, so that society used to handle for them."

"If the parent keeps tight hold of the reins from the cradle up he seldom will come to an open break with his children. But if a boy or girl does rebel at restraint, there are various means by which to control them. And the child won't hate the parent for doing it, either."

### Embroidery Ancient Art

Embroidery was an established industry in China centuries before the visit of Marco Polo. The earliest extant specimen assigned to the eighth century, B. C. It is certain that this art was followed at a very much earlier date.

### Evil in Slander

There is less innocence in attacking an innocent man than in opposing all of those who are not in a position to defend themselves.—Exchange.

### Tools of Housekeeping

One of the surviving users of an old-fashioned razor body device is a can-opener.—Arkansas Gazette.

## New Giant Engine Crosses International Boundary En Route to Baltimore as Dominion's Representative.

TORONTO, Ont., Sept. 30.—Canada's largest locomotive, "The Confederation," bearing Canadian National Railway number "5100," has just crossed the international boundary line en route to Baltimore, Maryland, to represent the Dominion at the transportation exhibit of the "Iron Horse."

As the new giant engine emerged from the round-house to take the rails, it was greeted by Hon. Charles McCrea, minister of mines, representing the provincial government of Ontario, Mayor Thomas Foster, of Toronto, and a large gathering of railroad and engineering experts.

Accompanying the engine was another of Canada's transportation innovations, a new type of Canadian National Railway all-electric passenger car and coach, designed to give rapid and frequent service on light traffic lines of railway. Both of these exhibits will move under their own power in the yard at Baltimore. Locomotive "The Confederation" will be familiar to Americans who travel in Canada during the course of the year, as it is one of the "Iron Horses" that handle the last passenger and freight trains between Chicago, Detroit, Montreal and the Atlantic seaboard on the Canadian National.

Woods Bearing Record

Running alongside the "5100," as she left the Toronto terminals was an old wood-burning engine of 1871, Canada's year of "Confederation" when the railways provinces united. She escorted the new premier locomotive through the railway yard.

"The Confederation" is 54 feet in length, weighs 225 tons, and has driving wheels over six feet in diameter.

The parent of the "Iron Horse," in which "The Confederation" and the all-electric car will take part, commemorates the anniversary of the Baltimore and Ohio Railroad, a road which has its name linked with the early days of railroading in Canada. When Canada's first railroad, the Champlain and St. Lawrence, now a part of the Canadian National System, and running between the south shore of the St. Lawrence river opposite Montreal to St. Johns, adopted steam motive power in 1827, "The Kitten," a locomotive from England, was used to move on her trial run. As the Baltimore and Ohio had been successful in the operation of steam engines, an engineer was brought to Canada from that road. Like the experienced garage employe who always looks for the empty space in his car in a stalled automobile, he discovered that all "The Kitten" needed was more fuel and water. When these were supplied, the locomotive developed a speed of 30 miles per hour.

Now, the Canadian National Railway, after a lapse of 50 years, is exhibiting at the hundredth anniversary of the B. & O. a type of locomotive which is conceded by United States experts to be one of the greatest engines in the world, also a new type of motive power, all-electric propulsion—Canadian in its origin—which has been received with such keen interest by railway executives that requests have been made by two United States railroads to have the car operate over their lines before it returns to the Canadian National System.

UNDERSTANDING ON PART OF AMERICANS Southern Continent Grows Daily More Like United States, Declares New York Foreign Trade Investigator.

NEW YORK, Sept. 30.—South America, with its skyscrapers, traffic congestion, high type of population and a history centering around a "covered wagon" grows daily more like the United States, says a statement of the Pan-American Information Service, issued on Wednesday.

"Both North and South America were settled by pioneers from Europe," said Mr. Bauer. "If English instead of Spanish or Portuguese had been chosen as the official language, no outstanding differences could be noted."

"Skyscrapers are no northern monopoly, and are to be found in many of the principal cities. Sao Paulo, Brazil, has one of twenty-two stories, and others, with steel frames, are rapidly being completed."

"A better understanding of our mutual problems is, however, greatly needed," said Mr. Bauer. "The South American idea of the covered wagon is confused and awry. Our own picture of South America is equally distorted."

"English is widely spoken, but those who wish to study conditions carefully should be able to speak Spanish, at least, fairly well."

"The north and south of the Western Hemisphere there is a similarity of history that is a particularly potent bond. On both continents the covered wagon played its part and tells the same story."

"Advised Columbus. Eratosthenes, ancient Greek geographer, is said to have deduced the roundness of the world and measured its circumference in the first century B. C. Genoaese scientist came across his writings and it is said to have inspired them to Columbus with the assurance that if he sailed to the west he would discover new lands."

**BIGGEST DAIRY RIM**

State Chamber of Commerce Puts Out Story of Swaguer Interests in Arco Region.

BOISE, Sept. 30.—Successful people usually have a good reason for what they do. It is not so with the Swaguer family, who are the only ones who have succeeded in making the Arco region a dairy country. The story of the Swaguer family here is an interesting one. It is told in an issue of the "Arco Review" for the month of August, 1927.

NEW PHOTO of "Sonny" Pierce of Hagerstown, Maryland. He was thought to be kidnapped Von Malsburg by New York, but Mrs. Von Malsburg was unable to identify him.

**Advice Gary's Best Bequest, Bankers Say**

NEW YORK, Sept. 30.—The latest bequest in the will of Albert H. Gary, late chairman of the United States steel corporation, was made in advice to thousands of persons who may never know of it, trust officers say.

In two short paragraphs, written out of his accumulated business wisdom of a lifetime, he requested his beneficiaries to refuse to go surety for anyone, to avoid anticipating income, to maintain only upon reputable securities, and to decline to invest in untried or doubtful securities or enterprises.

Heirs to estates left in trust, if they follow this advice, according to the officials of the Guaranty Trust company, may advance to a remarkable degree the permanency of their inheritances, now and heretofore so quickly dissipated.

**CLAIMS O'DDEST TITLE**

EVANSVILLE, Ind., Sept. 30.—(AP)—Will Kemper, 60, who has been totally disabled for 39 years, claims he is the true champion javelinist. During all the years, his hobby has been keeping accounts of others' javelins and he says the javelin he used in 1914 is the one he left him with the longest record.

**Mythical Prophets**

Mother Shipton, the reputed English prophetess, is said to have lived in the time of Henry VIII. She is first heard of in 1541 in a pamphlet called "The Prophecies of Mother Shipton."

**Gave Word to Language**

Tontine, a word associated with insurance, is applied to a form of annuity named from its inventor, Lorenzo Tonti, an Italian banker, who for years carried on business in Paris, France, in the seventeenth century.

**FIELD FOR DAIRYING IN IDAHO EXPANSIVE**

**Head of Kraft Cheese Company Sees Evidence of Neglect of Great Opportunity.**

CHICAGO, Sept. 30.—Indications are to the effect that Idaho is neglecting one of its greatest opportunities, according to J. J. Kraft, head of the cheese company which operates 11 factories in the state. In an interview in Chicago yesterday on business conditions, Mr. Kraft remarked that the production of cheese in Idaho has been decreasing this year as compared to 1926, which is in line with the general report of the Idaho state department of agriculture showing a decrease in the total amount of butter sold during the first six months as compared with the same period last year, despite an increase of one and a half cents in the average price paid per pound of fat.

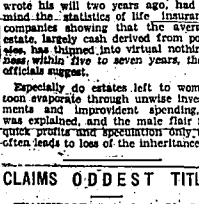

**Milk Charms Benefit Farmers Extensively**

WASHINGTON, Sept. 30.—(AP)—Milk records kept conventionally near the case in a dairy barn may prove to be of inestimable worth to the farmer. Dr. J. C. McDowell, of the U. S. Bureau of Dairy Industry, tells of a herd in which a scrub cow produced but 142.5 pounds of butterfat in one year. Her daughter produced but 128.2 pounds, and her granddaughter fell to 99.7 pounds, hardly as much as the world's record for a cow.

**Given Scientific Crown**

Both philosophy and mathematics have been termed "the queen of sciences" by various writers.

**Former Champion**

GLENNA COLLETT, Greenwich, is making a determined effort to regain the title, which she once held, in the Women's open championship at Cherry Valley.

**Potato Crop Larger in United States Than During Short Seasons of Past Two Years**

Indicated Production of 1927 Placed at 400,000,000 Bushels; 1,400,000,000 Bushels Below Forecast for August.

(By The Associated Press) WASHINGTON, Sept. 30.—Potatoes in cashed lots from each of the 48 states at some time during the year, shipped from the season's widely grown commercial vegetable crop in this country. Indicating production for 1927 is now placed at 400,000,000 bushels, a figure substantially above the short crops of the last two seasons but 1,400,000,000 bushels below the government forecast of a month ago.

Exporters have declined in Maine by 5,000,000 bushels and in Michigan, Wisconsin and Minnesota, by 15,000,000 bushels. The largest tuber arrived in Virginia in 1926 and Colorado. In Virginia production exceeded earlier export records.

Now a 600,000,000 farm crop, grown on a yearly average of 3,000,000 acres, the potato population is rapidly increasing. It is reported to be at its peak in 1919, when colonial farmers were suspicious of a great number of things. Although a native of Central South America, the potato started around the world by Irish consent. For some years it didn't seem to "take hold." But it gradually became a continental buffer and spread westward with every new boundary. Today, shipments of potatoes for the entire country.

Maine leads in production of the commodity. Last year, a survey reported that 4,388 carloads were shipped from points within the state during the calendar year 1926. Minnesota, Maine, Wisconsin, Michigan, Pennsylvania, New York and Idaho produce 49 per cent of the average annual carload shipments. Government estimates reveal that Colorado, Idaho, Florida, Maine, New Jersey, Virginia and the Carolinas ship more than one-half of their total production. Pennsylvania, one of the large producing states, makes comparatively the least number of carload shipments.

The bulk of the commercial crop is produced about the Atlantic coast from New Jersey south, along the Gulf coast, and in California. The first shipments here moving in March from Florida, Texas and Arizona. About the same time Maine, Minnesota, Wisconsin, Michigan, Pennsylvania, New York and Idaho are shipping old potatoes.

Average monthly carload shipments approximate 12,000 cars in December and 35,000 in October. The late, or main—potato crop, is grown principally in the territory from Idaho to Washington, north of the 39th parallel.

Advertisement for Alvin L. Harbour Company, Twin Falls, Idaho. The ad lists products such as Apples, Potatoes, Onions, and lists the company as "Shippers of Apples, Potatoes, Onions". It also includes the address "North Side South Side" and "ALL ONE" slogan.

Advertisement for Carl L. DeLong, Inc. The ad features the headline "Progress" and describes the company's role in facilitating travel, commerce, and intercourse between two great counties in Idaho. It lists products like Potatoes, Onions, and Apples, and identifies Carl L. DeLong as President and Manager. Contact information for office and residence phones is provided.

What they have been able to do in a big way can be duplicated by every rancher in the valleys in a small way with corresponding profits. It is another example of stepping out-of-a-rut into new and positive earnings.

**BOOK BOXES IRK FRENCH**

PARIS, Sept. 30.—(AP)—French writers stirred up by Louis Arago, a scientific booklover, are protesting against the "raffishness" of utilizing old book binders for candy and cigarette boxes. They are protesting against "vulgar" books, among them a Liege "Literary Dictionary" of 1788, used for chocolate containers.

**Sorry for "Fatted Call"**

Christian missionaries in their work among the Hindus had it difficult to explain the killing of the fatted calf, the only thing in the four gospels to which nearly all Hindus take exception. This is because the cow is regarded by them as sacred.

**Isolated Australians**

In isolated sections of Australia, where ranches are far apart, a teacher is employed to go from home to home instructing the children.

Advertisement for Moon's Paint Store. The ad lists various services and products: Auto Door Glass, Headlights and Window Glass, 200 Auto Windshields for \$2.50 each, No charge for setting glass, Auto glass grinding and polishing machine to grind and polish edges, Ford prices, Pure Linseed Oil for \$1.00 per gallon, Barn Paint for \$1.45 per gallon, Green Roof Paint for \$1.25 per gallon. The store is located at North Side South Side and is run by Alvin Harbour, Pres.
