

# THE NEW FORD CAR

*An announcement of unusual importance to every automobile owner*

by  
**HENRY FORD**

**N**INETEEN years ago we made and sold the first Model T Ford car. In announcing it to the public we said:

*"We will build a motor car for the great multitude. It will be large enough for the family, but small enough for the individual to run and care for. It will be constructed of the best materials, by the best men to be hired, after the simplest designs modern engineering can devise. But it will be so low in price that no man making a good salary will be unable to own one."*

"If I were starting in business today, or asked to restate my policy, I would not change one sentence or one word of that original announcement. In plain, simple language it gives the reason for the very existence of the Ford Motor Company and explains its growth.

**I**N THE last nineteen years we have made 15,000,000 Ford cars and added to the world nearly 300,000,000 mobile horse-power. Yet I do not consider the machines which bear my name simply as machines. I take them as concrete evidence of the working out of a theory of business which I hope is something more than a theory of business—a theory that looks toward making this world a better place in which to live.

"The Model T Ford car was a pioneer. There was no conscious public need of motor cars when we first conceived it. There were few good roads and only the adventurous few could be induced to buy an automobile.

"The Ford car blazed the way for the motor industry and started the movement for good roads. It broke down the barriers of time and distance and helped to place education within the reach of all. It gave people more leisure. It helped people everywhere to do more and better work in less time and enjoy doing it. It did a great deal, I am sure, to promote the growth and progress of this country.

"We are still proud of the record of the Model T Ford car. If we were not, we would not have continued to manufacture it so long. But 1927 is not 1908. It is not 1915. It is not even 1926.

*We have built a new car to meet modern conditions*

"We realize that conditions in this country have so greatly changed in the last few years that further refinement in motor car construction is desirable. So we have built a new car. To put it simply—we have built a new

and different Ford to meet new and different conditions.

"We believe the new Ford car, which will be officially announced on Friday of this week, is as great an improvement in motor car building as the Model T Ford was in 1908.

*Smart new low lines and beautiful colors*

"The new Ford is more than a car for the requirements of today. It goes farther than that. It anticipates the needs of 1928, of 1929, of 1930.

"The new Ford car is radically different from Model T. Yet the basic Ford principles of economy of production and quality of product have been retained. There is nothing quite like the new Ford anywhere in quality and price.

"The new Ford has exceptional beauty of line and color because beauty of line and color has come to be considered, and I think rightly, a necessity in a motor car today. Equally important is the mechanical beauty of the engine. Let us not forget this mechanical beauty when we consider the beauty of the new Ford.

"The new Ford has unusual speed for a low-price car because present-day conditions require unusual speed.

"The world moves more quickly than it used to. There are only so many hours in the day and there is much to be done.

"Fifty and sixty miles an hour are desired today where thirty and forty would have satisfied in 1908. So we are giving you this new speed.

*Quiet and smooth-running at all speeds*

"The new Ford will ride comfortably at fifty and sixty miles an hour. It has actually done sixty-five miles an hour in road tests.

"Since modern conditions demand more speed, they also demand better brakes to balance this speed. So we are giving you four-wheel brakes in the new Ford.

"The new Ford will be quiet and smooth-running at all speeds and you will find it even easier to handle in traffic than the old Model T Ford.

"The new Ford has durability because durability is the very heart of motor car value. The Ford car has always been known as a car that will take you there and bring you back. The new Ford will not only do that, but it will do it in good style. You will be proud of the new Ford.

**T**HIS new Ford car has not been planned and made in a day. Our engineers began work on it several years ago and it has been in my mind much longer than that. We make automobiles quickly when we get in production. But we take a long time planning them. Nothing can hurry us in that. We spent twelve years in perfecting our former Model T Ford car before we offered it to the public. It is not conceivable that we should have put this new Ford car on the market until we were sure that it was mechanically correct in every detail.

"Every part of it has been tested and re-tested. There is no guessing as to whether it will be a successful model. It has to be. There is no way it can escape being so, for it represents the sum total of all we have learned about motor car building in the making of 15,000,000 automobiles.

*The new Ford will sell at a low price*

"The price of the new Ford is low in accordance with the established Ford policy. I hold that it is better to sell a large number of cars at a reasonably small margin of profit than to sell a few cars at a large margin of profit.

"We never forget that people who buy Ford cars are the people who helped to make this business big. It has always been our policy to share our profits with our customers. In one year our profits were so much larger than we expected that we voluntarily returned \$50 to each purchaser of a car. We could never have done that if this business had been conducted for the sole benefit of stockholders rather than to render service to the public.

"No other automobile can duplicate the new Ford car at the Ford price because no other manufacturer does business the way we do.

"We make our own steel—we make our own glass—we mine our own coal—we make virtually every part used in the Ford car. But we do not charge a profit on any of these items or from these operations. We would not be playing fair with the public if we did so. Our only business is the automobile business. Our only profit is on the automobile we sell.

**W**E ARE able to sell this new Ford car at a low price because we have found new ways to give you greater value without a great increase in our own costs.

"We did not set out to make a new car to sell at such-and-such a figure. We decided on the kind of car we wanted to make and then found ways to produce it at a low price.

"The new Ford car, as I have said, will be officially announced on Friday of this week. In appearance, in performance, in comfort, in safety, in all that goes to make a good car, it will bear out everything I have said here. We consider it our most important contribution thus far to the progress of the motor industry, to the prosperity of the country, and to the daily welfare of millions of people."

Idle Island

For the last three years or so the midland of diversion had been abandoned, and the famous old Little club was as dead as the oldest gray pine in the woods.

By ETHEL HUESTON

Autumn had her own bank account, too. It was a small bank account, but like the widow's oil and more than diminished, but rather it grew a little, curiously, now add them.

With the familiar and much loved paraphernalia of her profession about her, and with all of her pretty personal belongings, she had a certain austerity of her surroundings.

Others came to the island, some for holidays, some for revivals, and some for business, and the little school group of labor and retreat to private life, but did not go away.

While many of the later generations of Wallace had gone into professional work in the city, many also remained on the island, where they had married and intermarried, so that fully half the native population was linked up together by ties of blood and marriage.

The furthest of these houses, built at the last stand, where the forest and the shore-line merged, was the Lone Pine. Beyond all others, farther, higher, steeper, and more remote.

The Little Club had been a daring social venture for a group of Portland business men in the years when sailing was the foremost summer sport.

As the men of Portland took up motoring, the yachts for sailboats and other water sports were sold in the city and many of the members of the Little Club went to other parts of the coast.

COAST'S CLAIMS AND TAX PROBLEM TOPICS AT SUPPER MEETING

Citizens Evidence Interest Both In Development Through Relationship With Los Angeles and in Governmental Puzzle.

Twin Falls country's citizens are interested in advancement of the whole western region through cultivation of closer relationships between Idaho and the Pacific coast centers, and they are interested in solution of the state's tax problem.

These facts were evidenced at a supper meeting held last evening at Twin Falls, Idaho, at the home of Mrs. M. J. MacDonough.

The speakers at the evening were E. F. MacDonough, domestic trade commissioner of the Los Angeles Chamber of Commerce, who is spending a month in Southern Idaho, and John D. Robertson, of Weiser, state senator, chairman of the Idaho Chamber of Commerce tax committee and former state tax commissioner.

Accepts Invitation On behalf of the Twin Falls country, Arthur D. Wilson, president of Twin Falls Chamber of Commerce, who presided at the supper meeting, accepted an invitation extended by the Los Angeles Chamber of Commerce to a delegation to visit Los Angeles some time during the winter.

Wilson supplemented the acceptance with an interesting talk on the Oregon Short Line and Southern Pacific were to put into effect a \$25 excursion rate for 200 citizens from this region would make the trip to Los Angeles.

Discussion of the taxation problem, which was launched by Mr. Robertson, extended to include expressions voiced by John W. Graham, C. D. Thomas, E. E. Conner, of Filer, the chairman, and others, and covered a wide range including distribution of the gasoline tax, mine tax legislation and inheritance tax proposals.

Old Tax System Falls "Taxes on real property in Idaho have reached the breaking point," Mr. Robertson declared. He held out no hope for reduction in governmental expenditures, but argued that a new system of taxation must be adopted to "levy" on industry in proportion to its earning power rather than its valuation.

REFUNDING ORDINANCE PRESENTED IN COUNCIL

Heavy Cut in Interest Charges to Be Effected in Waterworks Obligations.

After passing another final street improvement ordinance, the Twin Falls city council in a brief session last night, discussed the legal form for refunding of \$237,000 waterworks bonds at lower interest and then took a recess until tomorrow evening to consult Captain E. H. Swaley, city attorney, before passing the ordinance on refunding. C. J. Savis, representing the J. E. Edgerston company, presented the matter to the council.

The members declared that so far as they could see the papers were correct but as the city attorney was in Boise attending the supreme court and would be home tomorrow, they preferred to take a recess to consult him. To this Mr. Savis agreed.

Means Lower Interest The bonds bear one per cent interest for \$200,000 and 5 per cent on the \$37,000 instead of 6 per cent on the whole amount. Payments begin in two years and will then be paid off annually for 18 years thereafter, completing payment in 20 years. The agreement was entered into some time ago.

The council passed the final ordinance in Idaho to be published and circulated among Los Angeles manufacturers and business men.

"I can promise you," he stated, "that this report will do you no harm."

He expressed admiration over rapid recovery of this region from the perilous annual Los Angeles drought, declaring that any one of eight or ten diversifications would be sufficient to carry the community for a year, and predicting that diversification had not been carried to full extent of its possibilities.

Wright's Doll Show

Have you seen it? The whole window full of beautiful dolls pass in winter fashion revue. Down stairs you will find great rows of lovely dolls—Dimple Dolls, infant dolls, Mama dolls—Dolls of every kind and price. Many customers proved their delight and satisfaction by using our "Will call system."

NEWS OF THE DAY AS CAUGHT BY THE CAMERA

WASHINGTON SHATTERED — Violent twister hits nation's capital and suburbs, wrecking Naval Air Station at Anacostia and smashing a number of planes to matchwood during its destructive rampage.

HE'S 'PRACTICE BABY' — Frankie, aged three months, has quite a number of "mothers" in Drexel College, Philadelphia, where girl students take care of him as part of their course in home management.

A STAR — More than a mile of enemy territory has been swept by Al Marsters, sensational back of Dartmouth eleven, in eight games this season. Marsters has established a new record with a total of 1934 yards to his credit.

CHORUS GIRLS WAR ON HATS — Myrtle Lane, Broadway beauty, calls strike of chorines in "Five o'Clock Girl" because they're compelled to wear hats throughout performance. At least, Myrtle says so, and so does her press agent!

FIVE BROTHERS ON SAME TEAM — This New York soccer outfit is 100 per cent Swanson. Reading from left to right, we see Harold, Arthur, Roland and Richard, with Erick down front.

OH, DADDY! — Edward W. Browning, famed "Cinderella Man" and husband of equally famed "Peaches," spends eight hours a day in New York dance halls, tripping the light fantastic to renew his youth.

PREPARING FOR OLYMPICS — Jimmy Swanson, though only 19, proves the diving sensation of Los Angeles, as this smallest showa. Jimmy's getting in trim for the 1932 games on the Coast.

## EXPORT AND MILLING DEMAND HOLD PRICE FOR WHEAT STEADY

Favorable Progress of Argentine Crop Tends to Weaken World Market; New Corn in Good Demand.

SALT LAKE, Nov. 28.—Markets for the principal grains held generally steady during the week ending November 25, according to the weekly grain market review of the United States bureau of agricultural economics. The favorable progress of the wheat crop in Argentina tends to weaken the wheat market but this was largely offset by a fair export demand and a continued good demand for milling quantities of all classes of domestic wheat. Light receipts of corn, together with unsatisfactory husking returns in some areas held the corn market firm. Oats were also in good demand and prices held practically unchanged from a week ago. Rye was slightly weaker with some barley prices reached new levels at several markets as a result of continued active buying by exporters. Flax futures declined slightly but offers were well taken.

The final estimate of the acreage sown in Argentina in 1927 places the wheat acreage at 19,700,000 acres compared with 19,475,000 acres grown last year of which about 12,260,000 acres were harvested. While no official forecasts of yield or available trade forecasts are for a crop about the same as last year's harvest. The weather at the close of week was favorable after general rains early in the week and shipment of some new crop. Argentine wheat is expected by the middle of December if weather remains favorable. Argentine wheat for January shipments was being quoted in Liverpool November 25 at \$1.50 per bushel. This compares with \$1.75 for No. 1 Manitoba for November and December shipment and \$1.51 for dark northern spring from the United States. The increase in the import duty in France was reflected in high prices at Paris, where native wheat was quoted at \$1.53 compared with \$1.49 a week ago. Native wheat at Berlin was quoted at \$1.52, an advance of 2 cents for the week and

## Seeks Strike End

PRESIDENT JOHN LEWIS of United Mine Workers has called upon President Coolidge and appealed to him to intervene in strike of 85,000 soft coal miners in Pennsylvania.

Milan, Italy, at \$1.90, a decline of 4 cents from last week's price.

Cash Prices Unchanged. Prices of cash wheat at the principal markets remained practically unchanged. Ordinary to medium protein qualities with good test weight were in best demand at Minneapolis, where 12 per cent protein No. 1 dark northern spring sold at 7 to 11 cents over the December price which closed November 25 at \$1.53. Thirteen per cent protein was quoted at 12 to 25 cents over the December, and best types of Montana wheat sold at \$1.51 1/2 to \$1.58 1/2 compared with quotations of \$1.40 for Canadian No. 1 northern at Winnipeg. Durum futures were slightly lower, but there was an excellent demand for durum containing 11 1/2 per cent protein. Good milling types of hard winter wheat were readily taken but sales were principally to local mills in the central and southwestern states. Hard winter wheat was sold for export, bids were generally below prices offered by mills. Exporters were bidding around \$1.40 per bushel for No. 1 hard winter wheat delivered Texas Gulf ports. Soft winter wheat prices were also firm with good milling quality selling at Chicago at \$1.35 to 35 cents over hard winter wheat prices.

The corn market held practically unchanged throughout the week. Re-

## QUEEN MARY HONORS CIVIC GROUP FOR MUSIC TO POOR

LONDON, Nov. 28 (AP)—Queen Mary has honored the People's Concert Society with her patronage for the work it has accomplished during the last half century in carrying music to the poor people of London's east end.

The Honorable Norman Grosvenor started the work half a century ago by arranging concerts for working people living in crowded and poor quarters, children in the schools, and those confined in prison.

Thousands of concerts have been given, nearly 60 during the season just ended. Listeners have been increased during the past few years by the broadcasting of concerts. Besides the music itself talks are given on musical compositions and musical instruments.

Most of the requests are for compositions of Bach, Beethoven, Mendelssohn and Grieg. Invariably music in a minor key is preferred by the children.

The society's orchestra is composed largely of members of the London Symphony and other well known orchestras, who donate their services.

Receipts at the market were the lightest since the middle of October. Reports of husking returns continue unsatisfactory from Indiana, Illinois and Iowa, but were more favorable from the southwestern states. Lower hog prices were a depressing factor in the market but this was offset by higher cattle prices and a firm foreign market for feed grains. The quality of the new corn is generally good, and much better than a year ago. Industries and elevator operators have been the principal buyers of the new crop. Some yellow corn from western Kansas and Nebraska was being shipped to the Pacific coast, but the movement eastward is small. No. 2 yellow was quoted at Kansas City at the close of the week at 77 1/2 to 79 cents and at Chicago at 82 1/2 to 83 cents. No. 2 old yellow was quoted at Omaha at 81 to 82 cents and new No. 4 yellow 18 1/2 to 19 1/2 per cent moisture at 75 cents per bushel. No. 3 corn was quoted at St. Louis at 84 cents.

There was no new features in the oats market. Prices held practically unchanged from a week ago with receipts and stocks in the markets of only moderate volume.

There was little change in the local flax market. Demand fair. Alberta flax sold for \$9 per ton in stack. Exports, making 3.0 in stack for first and third cuttings.

## Dog Values Are Higher Due to Race Interest

LONDON, Nov. 28 (AP)—Greyhound racing has become nearly as popular as horse racing in England, with thousands of bookmakers interested in the sport.

The extent to which it has seized upon the sporting public has been indicated in the announcement that 3,000,000 persons have attended greyhound races in the London area since they were inaugurated four months ago. The largest single bet during the season is said to have been 500 pounds sterling, or nearly \$400.

Owing to the enthusiasm over the sport, the English dog market has seen more feverish activity than the stock market. Greyhounds with racing possibilities have changed hands a dozen times in one day, each time at a profit to the seller. The test in the courts of the legality of betting on dog races, however, caused the market to weaken.

Dealers assumed at the beginning of the season that at least 30,000 greyhounds would be required to supply the many tracks expected to open next season. Anything from 2,000 to 12,000 has been raised during the present season for dogs which formerly would hardly have realized \$15.

Dogs which have been withdrawn from tracks at public sales have been snapped up at high prices. Before greyhound racing came into vogue here, bad greyhounds were destroyed. Now, however, they are offered for sale at public auction, and bring prices averaging \$250.

HOME BUILDING CONTINUES. CLEVELAND, Nov. 28.—The common brick industry looks for continued construction of residences to provide a good market for the rest of the year. It is estimated that more than a billion burned brick are on hand. Importation of foreign brick is blamed for local depressions. About one-third of the common brick plants have closed for the season.

# What Mother really wants

## A New Electric Range

---the Gift that keeps on Giving

What a wonderful gift for Mother! A gift that will bring her happiness 365 days out of the year. A gift that will express your thoughtfulness in a most admirable manner. Every time she uses her electric range, its exactness, convenience and time-saving features will make its use a pleasure.

A new Electric Range means better cooking, easier cooking, less time in the kitchen, comfort and economy of a lifetime. Electric cooking is not only the most economical method, but it is just as quick as any method because all of the heat employed is concentrated just where it is needed.

Terms as Low as ..... **\$1 DOWN**

Now is the time to decide to give Mother an Electric Range for Christmas. Call the family together and plan to take advantage of our special Christmas offer. You can present Mother with an Electric Range for a first payment as low on some ranges as ONE DOLLAR DOWN. And you can pay the balance next year in convenient monthly sums.

Come to the Electric Shop and see the splendid Electric Ranges now on display. There is a type and size to meet the needs of every size family.

Our NEW **Bargain Rates**  
Make Electric Cooking More Desirable Than Ever Before  
It may be decidedly to your advantage to investigate our new Service—through ONE-Meter Rates. Already 1770 Idaho Power Customers have transferred to these new rates, 51 of them in the week ending...  
Call at any Idaho Power Store or office and have the Bargain Rates explained.

IDAHO POWER COMPANY

BERLIN FOLKS EACH DAY CONSUME ABOUT HALF POUND OF DUST

German Capital Showed With One Thousand Tons of Ash Dust Each Day Expert Indicates; Much Gas Also in Air.

(By The Associated Press) BERLIN, Nov. 28 (AP)—Daily ration of dust consumed by the average Berliner is half a pound, with about one thousand cubic feet of poison gas drawn in by Dr. Meidau, a sanitary engineer. According to this expert Berlin is daily smothered under by thousands of tons of ash dust coming from factory and dwelling house chimneys. Enough to fill fifty freight cars, he asserts. The consumption of this dust is the least evil, according to Meidau. The household air prevents the sun's rays from penetrating. Especially the ultra-violet rays, which do so to kill bacteria, are weakened or completely vitiated. Recent gripe epidemics are largely attributed to this cause. Dust in these quantities also causes material damage. It makes disastrous deposits on iron and stone, while the poisonous gas, purified call by automobiles, produced iron-rust.

More German Crimes BERLIN, Nov. 28 (AP)—Latest crime statistics in Germany reveal a decided increase compared with the pre-war period. The peak seems to have been reached in the immediate post-war and inflation period.

Sentences for murder and perjury have almost doubled since the war, and grand larceny convictions tripled in 1922 as against 1912, but have now receded to double the 1912 figure. Arson is but half as prevalent as before the war. Leniency with criminals is blamed for the increase which threatens to choke Germany in crime as these "humane" methods have succeeded in doing in the United States, sociologists and editors now comment.

Education at Night BERLIN, Nov. 28 (AP)—The first evening high school, inspired by the American institution, opened here recently. Persons compelled to work during the first five years continue their academic education. Out of 2,000 applicants for admission, only 124 passed the entrance tests.

A five year course prepares the student for admission to college. The 124 students, divided into three classes, range from eighteen to fifty-one. Cologne, Essen, Dusseldorf and Mayence are planning to follow Berlin's example. Before long Germany's evening high schools may rival New York's seventeen, with 35,000 men and women enrolled.

Advice to Smokers BERLIN, Nov. 28 (AP)—Tobacco is a "dead weed," a poet said, and added, "It kills." Knowing this, the Berlin Health Department has issued advice on when and how to like it. The harmful effects, its bulletin says, may be mitigated by using a cigarette or cigar holder, or pipe. If you must taste your tobacco, throw it away when it's half smoked to avoid the unhealthy combination of wet tobacco and warm smoke. By chewing yourself to death, you are increasing the pleasure you've got to give up having the cigar-end anyhow. This habit causes excessive saliva secretion and irritates tongue and throat.

The Health Department "sanctions" smoking for travelers, gourmands, artists and "bohemians." It cautions obviously on the principle that "from him who hath not, shall be taken away," persons suffering from indigestion, bronchial catarrh or profuse salivation, must not smoke. Further, inhaling and smoking on an empty stomach or immediately before going to sleep are harmful to everybody.

Can't Find Husband BERLIN, Nov. 28 (AP)—There are 300,000 "superfluous" women in Berlin which means that every thirteenth woman must look elsewhere for a husband. But the Berlin women are employing their time otherwise. Every third one is engaged in a rational occupation.

READY FOR BREAK—Members of the 184th Infantry California National Guard trying to keep warm while they guarded Folsom prison, recently. Modified on a moment's notice the call of Governor C. C. Youngman, the men shown here were mounted and loaded ready for action with a trooper at the trigger, in case the besieged convicts should attempt a dash from the prison walls.

tion outside the home. In the labor market there is one woman to every two men. Only one-tenth of the Berlin homes have servants, so that another 2,000,000 women are engaged in running their own domestic establishments. It is estimated. This brings another two million, as against only the number of working women up to 1,400,000 working men.

The Berlin woman is not "superfluous." It is claimed, she is the most industrious part of the German Republic. Present for President BERLIN, Nov. 28 (AP)—One amusing incident of President Hindenburg's 80th birthday was a visit to the president mansion of "the cuckoo man," a well-known Munich street character who is "let" and "sells" newspapers for a living. He had been delegated by a number of humble Hindenburg worshippers of Munich to deliver a parcel of cakes and sausages to the president as a birthday gift.

So aptly did the president receive him that the "cuckoo man" was quite overcome with the emotion of it all and forgot all about the present. He went home again with the parcel under his arm.

Bible Gives "Hints" To News Reporters NEW BRITAIN, Conn., Nov. 28 (AP)—Rules for reporters, press agents and advertisers, and hints that they were active thousands of years ago, are found throughout the Bible, according to the Rev. William H. Alderson, pastor of Trinity Methodist Episcopal church here. For those wishing to get something in print he finds this admonition to be on time in Leviticus 23:21, "And ye shall proclaim it on the self same day."

Danes Tossed English Skulls In First Known Football Game

Football in the Sixteenth Century They got a bladder and blow it great and thin. With many-beanes or peason put within. With a rattish, southeth and shinneth clere and fayre. While it is throuwen and cast up in the ayre. Zeine one contendeth and hath great delite With forte and with hands the bladder for 20 smite, If it fall to ground, they lift it up againe. This was labour'they count it for no payre. Reming and leaping they drive away the colde. And sturdy plowmen lustie, stronge and bolde. Overcometh the winter with driving the football. Forgetting labour and many's grievous paine. —Alexander Barclay, monk-poet, 1509.

DES MOINES, Ia., Nov. 28 (AP)—On the plains of England, in the tenth century, victorious Danes using the skulls of vanquished Englishmen, played the first known game of football. So says Charlton O. Laird, professor of journalism at Drake university, Des Moines. He has traced the history of the game down through the dim ages of antiquity and he says his research showed that hard fighting Danes tossed the grisly battle mementos around in the world's first known gridiron contest.

Later on, pumpkins and guards were used by farmers of the British Isles. They carried the garden truck through a line of opposing players in a game much similar to the present gridiron sport. Laird devoted long and earnest efforts to rounding up his history of

Handicapped; Aided By Church Workshop

CHICAGO, Nov. 28 (AP)—Work of the Chicago Woodville Industries, one of the unusual charity organizations in the city, has proved so popular that a three story building has been leased for new quarters. In the Goodwill Industries, cast-off clothing, discarded furniture, and the accumulation of a city's shilsh, bellows and store notes, are turned into saleable articles by handicapped persons. The work is done under the auspices of the City Missionary society of the Methodist Episcopal church. "Handicapped persons who want a chance, not charity, thus are permitted to earn their way in the work-a-day world," said George W. Dixon, president of the Missionary society. "Old clothing is ripped up and made into modern garments; discarded furniture is rebuilt, and made, spick and span with new paint. The shilsh juvenile articles are sold at nominal charge to the poor of the city.

The first intercollegiate game on record was held between Rutgers and Princeton in 1869. There the value of rules was demonstrated, for each school made its own regulations when playing on its own field. The records showed that Rutgers with its own rules, and on its own field, reversed the process the next time. The first Yale-Princeton game in 1871 was held up for an hour and a half while players scoured the countryside for a ball.

Jobs Was on Himself A man in Arkansas with a donkey for sale, heard a man across the line wanted to buy one, and wrote him a postal card as follows: "Dear Sir—if you want to buy a donkey, a pretty good one, don't forget me. Yours, etc., Bill Smith."—Capper's Weekly.

KIMBERLY HOME SCENE OF INTERESTING PARTY

Mr. and Mrs. F. W. Scott entertained for Tuesday Friends at Dinner and Cards.

KIMBERLY, Nov. 28—Mr. and Mrs. F. W. Scott entertained for Tuesday evening at an attractively appointed seven o'clock dinner at their home, 1014 Hansen for twenty of their friends. The table decorations and rooms were effective with heads of white chrysanthemums and the tables were centered with baskets of fruit. The combination cut-glass place cards also in keeping with Thanksgiving motif. The after dinner diversion was bridge, with Mr. and Mrs. E. E. Bohler and Mrs. G. P. Steadman being awarded first and second high scores and Mr. and Mrs. R. O. Wilson the consolation gift. The invited guests were Messrs and Mesdames H. E. Powers, O. E. Tester, J. Frank Hehr, R. C. Blain, G. P. Steadman, F. E. Wilson, L. E. Davis, R. T. West, A. J. Wilson, R. E. Bohler of Twin Falls and Miss Meredith Hahn.

Mr. and Mrs. W. H. Turner were hosts on Sunday for a family dinner at two o'clock. The guests were Mr. and Mrs. D. F. Turner, Mr. and Mrs. Marian Fletcher and daughters Elizabeth and Lois and Mr. and Mrs. Ernest Emerson. F. H. Wilson spent Sunday at the home of his parents from Burley where he is associated with the Burley Mercantile company.

Mr. and Mrs. E. C. Hager were guests of Mr. and Mrs. H. E. Rough on Thanksgiving day at Twin Falls. Mr. and Mrs. George Thompson had for their Thanksgiving dinner guests Mr. and Mrs. Walter Chastain and children and Mr. and Mrs. Jas. Welch.

Mr. and Mrs. Geo. Lobias who have moved the past three weeks with their daughter, Mrs. Chas. Groves, left the latter part of the week for their home at Ness City, Kansas. Mr. and Mrs. Billy Carwood and daughter Betty of Twin Falls will accompany them to Ness City and then further their trip to Wichita, Kansas. Mr. and Mrs. Fred Swearingen and daughters, Kathryn and June were dinner guests Thanksgiving day at Mr. and Mrs. W. W. Swearingen's home.

Mr. and Mrs. J. M. Mason were guests of Mr. and Mrs. O. L. Noble for

Mr. and Mrs. Carl Emerson and children and Mr. and Mrs. Ernest Emerson and son were guests at a family reunion dinner on Thanksgiving at the home of their parents, Mr. and Mrs. Chas. Emerson. While working with potatoes on a saturday, W. H. Turner had the misfortune to suffer a broken bone in the thumb and also lost the nail, causing him much pain and inconvenience. Mr. and Mrs. Lloyd Wright who were here to visit their mother, Mrs. Florence Wright during Thanksgiving holidays, returned Saturday to Shelly, Idaho, to resume work in the sales business for the Kinross Bros. Wm. Mathison returned Saturday from Salt Lake where he spent Thanksgiving with relatives. Mr. and Mrs. Wm. Marshall and children and Mr. and Mrs. Bert Illvers and family were dinner guests Thanksgiving at the home of their mother, Mrs. Jackson of Kimberly. Mr. and Mrs. C. M. Fisher were hosts at a turkey dinner on Wednesday evening at seven thirty o'clock at their country home for Mr. and Mrs. E. G. Wilson, Mr. and Mrs. E. B. Wilkerson, Mr. and Mrs. Roy Scott and the Misses Lois Teater and Leah Arlene Wilson. Several games of bridge and radio music were the later evening diversions. Mr. and Mrs. Wilson received high score in the games. Mr. and Mrs. L. E. Davis and Mr. Cummings of Burley were guests of Mr. and Mrs. Geo. Croft and family on Thanksgiving.

Mr. and Mrs. Kenneth Annett and daughters Margaret and Florence motored to Wendell Thanksgiving and were guests of Mrs. Annett's sister. Mr. and Mrs. Burton Duth of Hazelton were in Kimberly during Thanksgiving holidays visiting friends. Mr. and Mrs. O. L. Ross were guests of Mr. and Mrs. Harry Ross of Hazelton, Thanksgiving day.

CORN TAKES LEAD IN SPECULATIVE MARKET

Wet Weather Tends to Bring About Moulding in Crips and to Interfere With Husking.

CHICAGO, Nov. 28 (AP)—Corn took the lead in the speculative grain market today and scored a lively upturn. Wet weather tending to bring about moulding of corn in the cribs and to interfere with husking had much to do with holding the corn market and giving a lift to other grains as well.

Closing quotations on corn were strong, 1 1/2 to 2 1/2c, a 2 1/2c advance, with wheat 1/2 to 1/4c net higher, oats 1/2 to 1/4c up and provisions unchanged to 2c down.

With predictions for a continuance of the unfavorable damp weather which has been prevailing over the corn belt, and with country offerings of corn scanty, the corn market became active and speculative trading started. Initial uncertainty was ascribed to early weakness of wheat.

Later, however, the corn advance virtue was without interruption and the close was at the topmost figures of the day. Wheat, oats and rye followed corn.

In addition to adverse weather, lightness of receipts and to present unfavorable husking reports, the corn market was without interruption and the close was at the topmost figures of the day.

Wheat prices here were strengthened by both the action of corn and by upturn in the wheat markets at Liverpool and Winnipeg.

Furthermore, there was a large decrease in Canadian stocks, and the increase shown in the United States wheat supply was smaller than in the same quarters had been looked for.

Early declines in Chicago wheat values were due largely to an increase in private estimates of the Argentine wheat yield placing the total at 231,000,000 bushels.

Provisions looked support, despite higher quotations on hogs.

Table with 3 columns: Wheat, Corn, Oats. Rows for various grades and prices.

INSIDE THE NOW

People didn't know about things in the Dark Ages. They didn't know what was in lightning, mines, trees, air, that with a little ingenuity would make an electric light, a watch, a high-grade soap, a radio.

Today you have countless conveniences. You have all the facts you need to get hold of these conveniences. You have advertisements.

By reading advertisements you can know what they will do for you before you spend one cent. How that lubricant will act in your own car.

How that electric stove will lighten work in your own kitchen. Advertisements spread things before you so conveniently that almost by reaching out—you have them!

You find them in any better store. Their prices low, because advertisements urge their use by thousands.

Their values honest, because they are advertised as they are. The best you can buy, because what is widely advertised is what has survived harsh public test.

Don't let the Dark Ages touch any portion of your life. Use the advertisements They surround you with Now
