

ITALY ENTERS FIGHT FOR SHARE OF OCEAN TRAFFIC

ROME, Italy, March 23 (AP)—Italy is stepping out with determined stride to put both feet in the sharp fight going on in Europe and America for a lion's share of the transatlantic passenger traffic.

While Germany, England and the United States are laying down huge ships of a kind to start a new generation in the family of shipbuilding, Italian steamship companies and shipyards, supported and influenced by their government, are in strict training for the big race.

Figures just published show the great advance Italy has made in the last several years. Her entrance into the big shipping field has been so marked that last year 56 per cent more passengers came into and went out of her ports than in the previous year, the number jumping from 5,872,378 to 7,372,680.

Because of the great Italian colony in Argentina, Italian ships are given an encouraging welcome. The three main companies which send ships to New York have special services to South America. The voyage from Naples to Buenos Aires has now been cut to 13 days.

The government here does all it can to aid Italian passenger traffic. There is here no distribution of mail among ships of other countries. The only ships which get it are Italian ships.

French Students To Work

PARIS, March 23 (AP)—The romance of education in France is being tested by the charm for French students. Instead the American idea of working one's way through college has caught the fancy of the Latin quarter. It is making such headway that an organization called the "University Inter-aid" has been formed to place students in communication with prospective employers.

BIGHT REBELS

MEXICO CITY, March 20 (AP)—Rebel forces under General Huerta have been sighted outside the city of Mazatlan, and the federal garrison is in its trenches awaiting an attack, said a message to President Portes Gil sent tonight by General Jaime Carrillo, federal commander at the Pacific port.

Make Opportunity

Opportunity is the middle name of every job in the world. But you don't discover it until you put something real into your work instead of taking everything you can out of it. Don't be a machine; use your brain.—Grit, adv.

JUST KIDS

The Weather

FORECAST FOR TODAY: Unsettled with rains; cooler.

While light rains caused a change in Twin Falls weather yesterday, the maximum temperature announced by the weather observer, 57 degrees, was the same as on Tuesday. The minimum temperature for the 24-hour period ending at 6 P. M. was 32 degrees, 5 degrees above Tuesday's low mark.

All foot troubles. Phone Dr. Foster, adv.

19 Travelers Die In Crash On Canadian Road

(Continued From Page One)

bodies would be found under the wreckage. Fifteen bodies were found in the remains of the passenger coach.

Passengers were asleep when the collision occurred at 3:38 A. M., in an isolated section of the province. No passengers in sleeping cars were hurt, first report indicated.

OCCUPIED BY REBELS

JUAREZ, Mexico, March 20 (AP)—The city of Puebla, capital of the state of that name, has been occupied by rebel forces. It was announced at revolutionary headquarters here tonight.

Williams Equals Record At Indoor 60-Yard Race

HAMILTON, Ontario, March 20 (AP)—Percy Williams, Vancouver, Canada's double Olympic track winner, returned to competition tonight to equal the world's indoor record for 60 yards in the annual indoor meet of the ninety-first regiment here. Williams covered the distance in 6 1/5 seconds, beating out Johnny Fitzpatrick, Hamilton, another Canadian Olympic star by a narrow margin. Leigh Miller, Hamilton, was third.

NEW ORLEANS OFFICERS DROP THEORY OF SUICIDE

NEW ORLEANS, March 20 (AP)—Police late today became convinced that Mrs. Janet M. Baker, who was murdered after Mrs. Baker drove off with her car, saw two men leaving the burning auto in which Mrs. Baker's charred body was found.

This information together with that of a lodger in the Baker home, that he saw Mrs. Baker drive off with her car in the machine early yesterday morning 45 minutes before the flaming machine was found in Audubon park, has caused the police to drop the accident by suicide theories. The description of one of the men, police said, fitted that of the man leaving with Mrs. Baker.

Wiping 'Em Out

Hurry 1—resident here off and on for a number of years, writes he has left town to accept a job elsewhere, but will return in the fall, at which time he will repudiate his just debts dollar for dollar.—Alaska Paper.

LORD INVERCLYDE TO MARRY

LONDON, March 20 (AP)—Lord Inverclyde and his fiancée, June, the daughter of the late Lord Inverclyde, plan to be married tomorrow. Lord Inverclyde secured a license today.

AUTO MANUFACTURER DIES

NICE, France, March 20 (AP)—Rocco Bradbury Jackson, 55, president of the Hudson motor company, Detroit, died here yesterday of heart trouble.

MEXICAN SECRETARY LOSES EYE

ROCHESTER, Minn., March 20 (AP)—The left eye of General Joaquin Amara, secretary of war in Mexico, was removed at the Mayo clinic here today.

STATUE NOT REPLACED

DUBLIN, March 20 (AP)—The statue of William III, hero of northern orange-men, which blocked Dublin traffic for decades, will not be replaced. It was bombed not long ago by Irish extremists.

SERVING THIRD TERM

BOISE, March 20 (AP)—William Minor, 60, today began serving his third penitentiary term, this time in the Idaho institution on a charge of burglary.

LINDBERGH'S WEDDING TO TAKE PLACE DURING JUNE

MEXICO CITY, March 20 (AP)—Colonel Charles A. Lindbergh and his fiancée Miss Anne Morrow, expect to be married some time in June, it is stated upon the highest authority.

Colonel Lindbergh has not yet decided whether the marriage shall be solemnized in Mexico City or in the United States. The colonel is expected to fly back to Mexico City at least once and maybe twice to visit his fiancée before June.

Eastern Thermos Bottle

A thermos is a cup or urn even-ly used in Russia and eastern countries in which water is kept boiling for the making of tea, five, etc., and being placed in a tube which passes up through the center of the urn. Similar vessels are used in China for keeping soup hot at table.

JEROME GLEE CLUB WILL STAGE SCHOOL OPERETTA

JEROME, March 20.—Students who will take leading parts in the glee club operetta, "Hartless House," to be staged in the high school auditorium May 9 and 10 are Lola Randolph, Ruth Robinson, Phyllis Robinson, Phyllis Robinson and Lottie Hensley.

Thomas-Speedy, county agent, presented films on farm work at a meeting of the Canyon Side Grange in the new grange hall Tuesday evening. The program also included games and closed with refreshments.

Boy Scout court of honor was held Tuesday evening in the courthouse. Troop III held basketball practice in the high school gymnasium Tuesday evening and elected Stuart Johnson captain of the team in preparation for the game with Troop II Thursday night.

Members of the Eastern Star met in the Masonic lodge rooms Tuesday evening. The program, under the direction of Mrs. Frank Thomas, consisted of features presented by Gene Abramson, Jack Dwight, Cathryn Turner, Donald Johnson, Mrs. T. G. Burke and Phyllis Robinson.

Mr. and Mrs. Clifford Box have moved to Halsey where Mr. Box will be employed in a general store.

Mrs. John Gallentine is recovering from an operation performed recently at the Wendell hospital.

The Royal Neighbors held a dance in the Odd Fellows hall Tuesday evening. Luncheon was served at 11:30.

Mr. and Mrs. Harvey Cook have returned from a motor trip to Pacific coast states. Former residents of Jefferson visited by Mr. and Mrs. Cook during their trip included Mr. and Mrs. M. Cook, Baker, Oregon; Mr. and Mrs. Ben Wheeler, Salem; Jessie Cook, Carville; Mr. and Mrs. Charles Pate, Medford; Mr. and Mrs. Joe Krivaneck, Longview; Washington; Miss Krivaneck, Portland; Allen Walker, Long Beach, California; and Mrs. Vera Rodriguez, Yuma, Arizona.

Foch Dead 11 Years—After Mighty Drive

(Continued From Page One)

Antonia played in demanding unified command and in urging his selection of the task. Little of this had cropped to the surface of the news before President Wilson's eulogistic congratulations were made public in Washington. Even in this country the lid of voluntary press censorship was tightly clamped.

In fact it was not until April 18 that the formal message of American ratification of Foch's selection was made public by General Bliss, American representative on the supreme war council headed by Foch, and who transmitted it to the French government.

"In the name of the United States of America, the president approves the nomination of General Foch as commander-in-chief of the Allied armies operating in France," that communication said.

Secretary of War Baker had been in Europe some time when the German drive was launched in March. He was quick to approve Pershing's prompt tender of all American forces to Foch.

For it was by employment of American troops, Pershing's crusaders, that Foch achieved the organization of the "army of maneuver" which later swept back the German tide, and won victory from defeat by November 11.

On November 12, the day after the victory had stilled the war tumult at last, Pershing planned on the breast of Foch at Senlis, France, the American distinguished service medal awarded him by President Wilson.

"It's awful hard to think up anything to pray about when it's cold, unless you wait till you get in bed."

Marshal Foch Quietly Goes to Final Reward

(Continued From Page One)

uniform of a commanding general. The great marshal will have a national funeral, an honor which has been accorded to only five Frenchmen previously.

The body will lie in state at the Invalides before the tomb of Napoleon Bonaparte. There is little doubt that Foch will be laid away in his final rest in one of the niches of the crypt where the great Corsican lies.

Foch was a marshal in the British army, an honorary title conferred on him after the armistice.

News Spreads Rapidly The news of the death spread rapidly and great personages immediately began to arrive at the Foch residence to register their regrets and condolences.

Premier Poincare announced the death of the marshal to the chamber of deputies, hurrying immediately afterwards to give condolence to Mme. Foch.

The widow, although deeply moved, was very dignified and Spartan in her grief. When told by the doctors that the last moments of her glorious husband was at hand, she exclaimed simply:

"God's will be done." One of the first to express feeling over the passing of the marshal was General John J. Pershing who mourned for the loss of a friend and comrade.

The American soldier said that Foch would be "missed not only by the French nation, but all peoples whose armies fought under his leadership in the World war."

War Mailed Appeal Humbler men appeared, some wearing caps and many callouses. There were wooden legged and amputees, men of erect bearing in the crowd that filled the dimly lit Rue Grenelle and extended well into the Invalides Square, under the dome of which the marshal is to find his last resting place.

The marshal awoke this morning much refreshed and greatly surprised as compared with yesterday. He talked cheerfully with his doctor and said: "I would like to go out in this beautiful sunshine. When do you think you will allow me to go outside?"

He ate his usual luncheon and later in the afternoon was placed on a lounge near an open window.

Mme. Foch suddenly noted that her husband was growing pale. She summoned the nurse who advised that the doctor be recalled. The Rev. Father Verdier hurried to administer the last sacraments to his distinguished parishioner.

Mme. Foch and her two daughters

stood beside the bed as the great soldier quietly met his final defeat. He had not recovered consciousness after being lifted from the lounge by the open window.

Thus the last request uttered by him was an expression of a desire to go out into the beautiful sunshine.

FORMER FOES SILENT

BERLIN, March 20 (AP)—Marshal Foch's death finds the German populace mentally still too much imbued with the spirit of resentment over what is regarded as the humiliating manner with which the German armistice commission "was treated."

It seems advisable for men in public office to comment on the distinguished Frenchman's career, though nobody questions his military genius.

President von Hindenburg declined a statement.

ONE DISCORDANT NOTE

PARIS, March 20 (AP)—One discordant note in the general tribute of praise to Marshal Foch was contributed by deputies of the extreme left in the French chamber. A small hubbub was caused in the chamber floor when Ernest LaFont, Socialist-Communist deputy, reproached socialist colleagues for joining the parliamentary homage to Foch.

HONORARY COMMANDER

INDIANAPOLIS, March 20 (AP)—Marshal Ferdinand Foch, who died in Paris today, was one of two honorary national commanders of the American Legion.

The other is General John J. Pershing. Both were voted the title by the national Legion convention held in Philadelphia in 1925.

In 1921 Marshal Foch came to this country as a guest of the Legion. He covered 20,000 miles and his journey led him through the Eastern states, and the plantations of the South. His trip was climaxed in the national convention of the Legion at Kansas City.

DAWES PAYS TRIBUTE

CHICAGO, March 20 (AP)—Former Vice President Charles G. Dawes, in charge of supplies for the American Expeditionary Forces during the World war, today described Marshal Foch as one of the greatest soldiers of all time.

"Millions of his comrades in the American army will today be bowed in grief. They mourn him as a great friend and beloved commander, who has gone on his last long march."

Committee Seeking Assistance of Hyde

(Continued From Page One)

cultural relief program announced by the Republican party were well known and no doubt would be formulated into legislation by the congressional committees.

It was reiterated that the president must maintain the constitutional relationship between the executive and congress and that he did not propose to write bills and impose them upon congress.

Will Set Forth Views The chief executive will set forth his views in a message to the special session of congress which will convene April 15.

It is expected that he will treat the agricultural subject in much the way he did during his campaign. At that time he interpreted the Kansas City platform as one calling for federal aid in increasing the output of the surplus crops through farmer-owned corporations.

Inclusion in the proposed farm bill of changes in the federal warehouse law to give the federal government a more rigid control over warehouse receipts and of a clause providing a minimum standard for canned fruits and vegetables was urged upon the president today by Representative Mapp and Ketchum, Republicans, Michigan.

Opportunity Knocks at Chicago Cubs' Door, Says McCarthy

Players Have Punch And Spirit Asserts Bruin Club Manager

Forceful Pilot Declares Ball Team Is Materially Strengthened By Changes Made For Coming Season

By VICTOR C. SIDLER
(Associated Press Sports Writer)

CHICAGO, March 20.—Opportunity is knocking at the Chicago Cubs' door this season and they have everything with which to answer—punch, spirit and reserve material.

Manager Joe McCarthy, in his characteristic forceful yet reserved fashion, thus described the championship chances of the Cubs in the forthcoming national league pennant race. He feels that 1929 will be the Chicago club's big year.

"The Cubs will send into the campaign a young club that is climbing, not one that is slumping, and, barring injuries, one that should avail itself of opportunity's knock by winning the 1929 flag," he said.

Club Strengthened

"It is a club that has been strengthened materially over last year, and is bound to win," he continued. "The changes made in the team are few, it is true, but other angles enter into my calculations. Players who were out of the lineup because of illness or injury last season are back again with promising form."

"We have lost Percy Le-Jones, south-paw pitcher, and Freddy Maguire, infielder, but we now have Rogers Hornsby by who, with his great batting ability and brilliant fielding, should add the necessary punch to put us in. The acquisition of Hornsby should make our infield a wonderful unit. The youngsters will work the better with him next to them."

First Class Infield

"What more could a person want than an infield that lines up with Elwood English, at shortstop, Clyde Beck, at third, Charley Grimm, at first, Hornsby at second, Norman McMillan, utility, and Clarence Blair, youngster from the Little Rock, Arkansas, club, a promising substitute for Beck? English is a young and improving shortstop, and Beck ought to be better this year."

Jones at best was an in-and-outter

Speed King Wins Waterways Title

ALTHOUGH MAJOR H. O. D. SEGRAVE, British sportsman, held the distinction of having traveled faster over land than any other human, due to his 231-mile-an-hour run with the Golden Arrow, the Englishman sought other laurels. Here he is shown with his speed boat, Miss England, with which he broke the world's motor boat speed record yesterday. Inset is Major Segrave.

Buhl Girls' Trip To Wichita Wins Favor

BUHL, March 20 (Special to The News).—At a meeting held here last night full approval was given by the school board to the plan for the Buhl girls' basketball team, Idaho state champions, to attend the national contest at Wichita, Kansas. The team will include eight players and will be accompanied by Miss Aurelia Ambrose, chaperone, and by Harry W. Barry, coach. Only \$150 is lacking to finance the trip and Mr. Barry expresses confidence that it will be raised.

Members of the team are Frances Hays, Mary Haldeman, Mary Lacy, Elizabeth Southwick, Arabella Southwick, Myrtle Thurman, Charline Borling and Clara Kuyper.

The team plans to start their Friday evening or Saturday morning, depending on railroad connections.

Pocatello Plans to Send Five to Chicago

POCATELLO, March 20 (AP).—Plans were set afoot today to make Pocatello the scene of the victorious Pocatello high school basketball team to the national tournament in Chicago the first week in April. The finance committee of the school will meet Thursday with a group of clients to consider ways of financing the trip.

The Pocatello team captured the state championship at the Moscow tournament.

Carp Are Veterans

It is claimed that there are carp in ponds in Europe two hundred years old. Authorities claim that a carp twenty years of age should weigh about as much as a 20-pounder.

Engraving Process

An account is given of etching on copper or steel plates by means of nitric acid, producing an effect resembling a fine drawing in water colors, sepia or India ink.

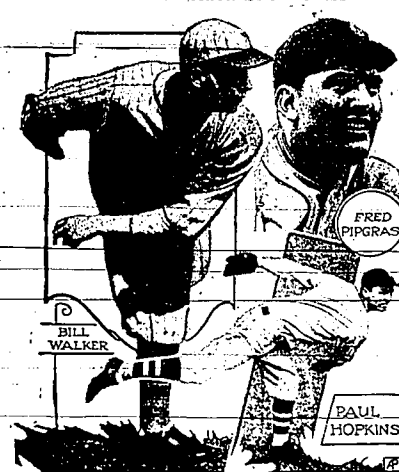

Early Paper Mill

The first paper mill in the American colonies was located at Roxbury, near Philadelphia. It was built in 1690 by William Rittenhouse, a Dutch papermaker, and William Bradford, a printer of Philadelphia.

Tennis Stars Start Indoor Title Games

Francis T. Hunter Defeats Three Opponents to Overtake Field in Tournament

NEW YORK, March 20 (AP).—With Francis T. Hunter, usually experienced, and his weak backhand and John Borotra, devoted mostly of his attention to amusing the small crowd, the field in quest of the national indoor tennis championship moved into the fifty round today.

On the courts almost constantly for more than 2 hours, Hunter, who was absent when play began on Saturday, walked through three opponents to overtake the field while Borotra, in a solitary singles match, defeated Merritt Cutler, a member of the Seventh Regiment Tennis club on whose courts the tournament is being played, 6-1, 5-2.

Cutler was the only one of the nine seeded players thus far to fall by the wayside.

The first real fireworks of the tourney may be expected tomorrow when seeded players meet all along the line, Hunter ending Herbert R. Boyman, Bronxville, New York; Julius Seligson, Lehigh, Intercollegiate champion, meeting Gregory Mangin, Newark, New Jersey, former tennis captain, stood out as about the only surprise. Mangin finally won, 8-10, 7-5, 6-2.

The narrow escape of Mangin from defeat at the hands of Eugene McCauliffe, former tennis captain, stood out as about the only surprise. Mangin finally won, 8-10, 7-5, 6-2.

The Philadelphia Athletics Defeat Cincinnati, 7-5

ORLANDO, Fla., March 20 (AP).—The Philadelphia Athletics resumed their exhibition series with Cincinnati today, and defeated them, 7 to 5. Walberg, athletic pitcher, held Cincinnati to four hits in six innings.

Score by innings—
P. A. (A) 0 13 0 210—7 13—2
C. (N) 0 0 0 0 0 0—5 12—0
Batteries: Breckenridge, Walberg and Perkins; Bonohue, Kelp, Johnson and Sukeroff.

St. Louis Browns Lose Game to Columbus, 3-2

LAKELAND, Fla., March 20 (AP).—The St. Louis Browns suffered their first defeat of the spring training season here this afternoon when they were noosed out by the Columbus team of the American association, 3 to 2.

Score by innings—
S. L. (A) 0 0 0 0 0 0—2 6—0
C. (N) 0 0 0 0 0 0—3 6—0
Batteries: Collins, Ogden and Farrell; Manion; Jablonowski, Harris and Shinnait.

Stasiak Wins Right to Match With Sonnenberg

LOS ANGELES, March 20 (AP).—Stanley Stasiak, Polish wrestler, tonight won the right to meet Gus Sonnenberg, heavyweight champion, in a title match here April 2 by beating Dick Davis, court, Kansas heavyweight, two out of three falls.

The Polish heavyweight won his deciding falls in 23 minutes and 13 minutes and 57 seconds respectively. Stasiak, who weighs 236 pounds, had a 15-pound weight advantage.

BURNS AND BRUDEN DRAW

SAN FRANCISCO, March 20 (AP).—Young Jim Burns, 165 pounds, Oakland, and Herman Bruden, 166 1-2, Kansas City, fought 10 rounds to a draw at National hall here tonight. Bruden, a new comer, surprised the crowd by his showing, and going into the seventh round had an edge that the Oakland boxer wiped out by winning the seventh, eighth and ninth rounds decisively.

Mack, Athletics' Skipper 29 Years, Sees Brighter Future

Veteran Leader of Philadelphia Team Radiates Optimism

"We're Coming Along Nicely, Thank You," Declares Manager When Questioned About Nine's Prospects

By BRIAN DELL
(Associated Press Sports Writer)
FORT MYERS, Fla. March 20—Connie Mack, 56 years of age, 45 years in baseball and starting his twenty-ninth season as manager of the Philadelphia Athletics, is as young as his rawest recruit and just as optimistic.

"We are coming along nicely, thank you," said the veteran of them all, when queried as to the progress of his team runner-up in the American league.

"The boys are getting in good condition. They will need it. I think we will have a great race in the American league. Of course, the Yankees are the team to beat. I am confident that the team that finishes ahead of the Yankees will win the pennant."

Youngsters May Help
"All the other clubs appear to be stronger than they were. And we have a youngster or two who may help us."

The Browns will be hard to stop. Washington was going strong at the close of the season and getting up where it belonged. Detroit almost certainly will do well. I have great respect for Harris as a manager. Both the Sox teams—Boston and Chicago—have added strength during the winter, and so has Cleveland. Just the other day the Clevelanders helped themselves by getting Bibb Falk, a great player. I could have used him. I could not afford to make the only trade by which I could have had him.

"But I have a great outfield—a truly great outfield. I have no worry about that. Simmons, Haas and Miller make up a great trio."

The infield? Now I plan to play "Fox" at first and Fox at third. "Fox" can play either first, third or anywhere else, but now third seems to be the place for him.

"Boley, our shortstop, played all last season with an arm that was never quite right. We had him working hard now to get that arm in shape."

"Grove is all right," the veteran leader said when he was asked about the state of health of his star southpaw. "He had a touch of flu and was a bit under weight when he reported, but he is all right now. He is fine."

Manager Mack was asked about the chances of several colleagues he has in his camp, notably Bill Breckenridge, Darinwood, and Miller Brown. Missouri pitchers, Redman Hume, Southern Methodist, outfielder, and Nick Borrelli, Mulhens.

The fate of the youngsters it seems has not been decided. "They are promising," he said, "but only time will tell to what extent they are developed. We will know more about them later."

Although nearing three years and 10, Manager Mack apparently has no thought of retiring.

McLarnin Endeavors To Reduce for Bout

NEW YORK, March 20 (AP)—While Jimmy McLarnin toiled with pulleys, punching bags and sparring partners today to reduce his weight to 140 pounds, Ray Miller quit work in an effort to add as many precious ounces as possible before their 10-round struggle in Madison Square Garden Friday night. Miller, decidedly handicapped in the weights, is endeavoring to build himself up to 133 pounds, while McLarnin, growing steadily, had put to stay below the welterweight division. The Irish punching sensation from Vancouver intends to fight in the future as a full fledged 147 pounder.

The Garden, seating 20,000, has been sold out for several days. After the match the arena will be closed to boxing for five weeks while the circus comes to town for its annual stay.

Pittsburgh Pirates Tounce Seals, 4-1

SAN FRANCISCO, March 20 (AP)—The Pittsburgh Pirates took a two-run lead in the second inning of today's exhibition game and were never headed, winning from the San Francisco Seals, 4-1. Earl Sheely, first baseman, hammered over the left field fence in the ninth, scoring Brickell ahead. It was a mound duel with Krumer and French of Pittsburgh allowing six hits between them and Davis and Matis of the Seals dishing out five safeties.

Score by Innings: R H E
Pittsburgh (N) 0 20 000 002—4 5 1
San Francisco (C) 000 010 000—1 6 1
Batteries: Krumer, French and Hemery; Davis, Matis and Schmidt, Polvogt.

Bowlers Lead Tourney By Toppling 3063 Pins

By Toppling 3063 Pins

CHICAGO, March 20 (AP)—The Hub recreation team, Jones, Illinois, topped 3063 pins to grab the lead in the five-man event of the American bowling congress tournament tonight. It was the first time the 3000 mark had been passed during the tourney.

The Joliet team scored 1008, 964 and 1017.

The score gave it a lead of 129 pins over the Triangle State bank of Chicago, the former leader.

Evers, Fiery Old Cub Star, Won't Promise to Spare Ump

IT REMAINS TO BE SEEN WHETHER JOHNNY RAYES FOR THE BRAVES AS HE DID FOR THE OLD CUBS

Johnny Evers, key man in the famous old Tinker-to-Evers-to-Chance combination, is back in the game after a long absence. He has taken a pledge to keep peace with the arbiters.

By BRIAN DELL
(Associated Press Sports Writer)
ST. PETERSBURG, Fla. March 20—Johnny Evers, out of baseball for many years, has deserted the more peaceful pursuits of private life to return to the war, and he is glad of it.

"It is good to be back," said the captain and assistant manager of the Boston Braves. "Once in a while you never get away from baseball, and I love the game."

"I find it little changed. The biggest difference is in the ball. The ball they are hitting now is heavier than the one they were throwing at us 15 and 20 years ago, but the rest of the game is much the same."

"There is more hitting, of course. When I was in the Cubs we were winning championships with an average of two runs per game. I believe the Braves have an average of about seven runs to the game."

"I have noticed another change. Take this club, for instance. These boys live to work, and I have never seen such

SPORT SLANTS

By ALAN J. GOULD
Associated Press Sports Editor

NEW YORK, March 20 (AP)—The East already has fair warning of another powerful invasion of Far Western talent in quest of college laurels.

It's close to an all-year-around menage now. No one has forgotten how Stanford and Oregon Aggies mopped up on the gridirons of New York last fall, after Stanford and California had taken Eastern rivals for a ride in the rowing and track classics of the year.

The echoes of performances already under way on the Pacific coast forecast the establishment of Stanford as the favorite to again romp off with the intercollegiate American Amateur Athletic association championships at Philadelphia in May.

At the same time, California's world's championship crew has started preparations for the defense of the intercollegiate title at Poughkeepsie in June. The Bears will be favorites there, especially if they overcome Washington on the coast next month.

Stanford and California have most of their 1928 power on hand to start with, plus the advantage of earlier opportunities for training, while most of their Eastern rivals are still indoors or just beginning to break through the ice outdoors.

Veterans man the "engine room" of California's shell, the Golden Gate. In which they rowed to triumph last season at Poughkeepsie, Philadelphia and Amsterdam.

In National league circles, the Phillies and utility have been somewhat synonymous in recent years. The Phils have occupied the cellar position six times in the last nine seasons. They haven't

Basque Battler in Shape for Contest

Joe Cortez Tells American Legion Matchmaker of Work For Engagement

Joe Cortez, Boise Basque boxer, scheduled to meet Danny Reno, Twin Falls, in the 10-round main bout of the American Legion boxing card Wednesday, March 27, is boxing to roundly with a squad of first-string fighters in his training quarters in Boise, and his condition is as good as it has ever been. Cortez told Duncan Johnson, matchmaker for the Twin Falls post, in Boise the first of the week.

Cortez told the matchmaker he hopes all of his friends in this region will be at the ringside, and he promised a battle well worth while, referring to the fact that he has "come out of his shell" and now boxes in an upright position rather than in a crouch.

Matched With Oregonian
Cortez is matched to meet Willard Norton, Eugene, Oregon, in Boise next Friday evening. On the same card, Rocky Moore, Twin Falls, and Curley Johnson, Boise, are to stage the semi-final go.

Ernie Woolley, popular Twin Falls boxer, probably will have a place on the next American Legion card, the matchmaker stated.

Negotiations are under way, he stated, for a match between Woolley and Ralph Miliken, Caldwell. Miliken has appeared in bouts in Boise recently and has won a London over Ray Heller, Boise, whom Woolley defeated with a technical knockout in the semi-final event on the last Legion card here.

been in the first division since 1917 and they won't land there this season, unless a miracle is performed, but the situation at least has taken a turn for the better.

Critics who have scanned the hopefuls in the South regard the Phils as one of the most improved clubs in the league.

With Hurst, Thompson and Whitney all bearing the stamps of youthful stars at first, second and third bases, the Phils apparently have struck gold in picking up Tommy Thevenon for the shortstop job.

BALK LINE CHAMP WINS
MILLWAUKEE, March 20 (AP)—Percy Collins, Chicago, defending champion, defeated Matthew McCure, Pittsburgh, 309 to 141, in 11 innings in the first game of today's play in the national amateur 182 lb. line billiard championship here tonight.

State Game Warden Approves Hatchery

Approval of plans for the Twin Falls fish hatchery, now in the course of construction by the Southern Idaho Fish and Game association, was given last evening by R. E. Thomas, state game warden, at a meeting of the directors of the association held at the office of the president Rex Thomas.

Mr. Thomas assured the directors that the state would furnish eggs and feed the fish until released and would furnish as assistant, J. Dahlquist, who had formerly had charge of other Idaho hatcheries to look after them.

The new hatchery now being built here meets all requirements of the state, he declared. Work on it was started last Sunday and will be continued next Sunday.

Mr. Thomas arrived from Boise on Friday and spoke in the afternoon to the high school students on fish and game life in Idaho, using a motion picture film to illustrate his talk. He will address the Kimberly Grange at a meeting tonight.

Handball Champions Win Match By Close Scores

NEW YORK, March 20 (AP)—The defending doubles champions, Willis A. Kammann and Al Schaufelberger of the Detroit Athletic club, had a close call in their second round match in the nationals four-wall handball championship here today. The Detroiters were forced to three games by Fred

Paulino Uzcudun to Face Max Schmeling

NEW YORK, March 20 (AP)—President Carey of Madison Square Garden today announced that the corporation had obtained an exclusive lease of the Polo grounds as well as the Yankee stadium for a series of outdoor boxing spectacles in 1929.

At the same time Carey disclosed heavyweight plans, now rapidly nearing completion, calling for Paulino Uzcudun, the Spanish Basque, to fight Max Schmeling, German sensation, June 27, the winner to be matched with Jack Sharkey on September 26. Both matches are to take place in the stadium.

Spauld and Joe Powers of the Los Angeles Athletic club, winning 21-18, 12-21, 21-3. The victory put them in the quarter-final round.

The other second-round matches went the limit of three games.

The Pacific coast ace, Albert B. Banquet and Lane McMillan of the Olympic club, San Francisco, advanced to the third round by default, winning from Jack Brenco and M. Cunningham, St. Louis.

SCIENTIST BELIEVES "SHORT CIRCUIT" IN CELL CANCER'S CAUSE

Charles Laville, French
Electrical Engineer, In-
vents Machine to Treat
Disease Along New Lines

(By The Associated Press)
PARIS, March 20.—An electrical current, so mild that the patient does not feel it, is employed in a new cancer treatment installed in the radium institute of the Curie foundation.
The mechanism was devised by an electrical engineer, Charles Laville, who has spent most of his life studying animal cells. He arrived at a theory, on which his treatment is based, that animal organisms are a sort of electrical apparatus comparable with the simple mechanism used to operate the household electric bell.
He believes that cancer is a disturbance in the organism similar to a short circuit. Cancer cells are sometimes referred to as wild cells. They are cells which have ceased to function normally, he says, because they are prevented from maintaining their normal electrostatic equilibrium. A cell which becomes cancerous has an excess of positive charges which it cannot employ except for growth. It can no longer transform the energy it stores into movement.
The Laville treatment is to bring the cancerous area in contact with suitable discharges of negative current.
The Boucicaut municipal hospital in Paris has been using the machine. Dr. Mercier-Mary, who directs operation of the apparatus, says:
"It is too early to make a definite statement about the Laville theory, but in all 16 cases under study the cancerous cells have shown a marked retrogression under treatment. All of these patients had been abandoned by their physicians as beyond aid of surgery, radium or other methods."
Dr. Rene Proux, of Bordeaux, who has observed 50 cancer patients treated by the Laville method, made the statement:
"The only thing that one may say is, that the results constantly obtained by the Laville method have never before been regularly attained by any other method."
The invitation to the Curie foundation was issued March 6 by its director, Dr. Claude Regaud. He refused to make a statement except that he wished to observe the method fully before commenting.
The Laville treatment has been tested also in Belgium.

Troops Guard American Border at El Paso

AMERICAN TROOPS guarded the border line at El Paso, Texas, during the fighting between Mexican revolutionary and federal troops at Juarez. Brigadier General Van Horn Mosely (right) is in command of American troops at Fort Bliss, El Paso. Major General William Lassiter (left) is commandant of the Eighth Corps Area at San Antonio. Below is a unit of cavalry division from Fort Bliss.

Government Scientists Seeking Best Material To Sheath Home

WASHINGTON, March 20 (AP)—Sheathing a home with an inner garb for the walls is under study at the bureau of standards.

A series of tests, started at the instance of the National Lumber Manufacturers' association, has been conducted to determine what "clothing" is best for the home.

Thirty-six examples of building papers have been tested, including asphalt-saturated, paraffin-saturated, laminated and asphalt-treated, and machine-finished materials.

The youth who finds "heavies" old-fashioned can point with conviction to the result that some of the thinner papers are the strongest.

As an inner coating for buildings,

tests have shown that the most practical paper is one which keeps out moisture, allows little wind leakage, but, most important, is strong enough to be laid in full sections to line walls. As an outer wear, the most important factor is resistance to water penetration and, in the case of floor coverings, there must be very good protective properties so that finishes will not be marred.

It has been established that there is little advantage in using a relatively thick sheathing paper if all the other desirable properties of a thinner paper are satisfactory, since in any case the paper is too thin to contribute materially to the resistance to heat flow by conduction.

Sheathing papers will continue to be

studied until a standard of specifications may be formulated which will guide the house-builder in the proper means of lining his home.

Resist Water's Action

Wooden ships, after being sunk, are very rapidly covered with a marine growth, which forms a sort of "limp" deposit and preserves the wood, in some cases for centuries.

MURTAUGH STUDENTS GET HONORS AT HIGH SCHOOL

MURTAUGH, March 20.—Students whose names appear on the honor roll in the English and public speaking classes at the school are as follows: First year—English—Edna, Moyes, Medena, Elbert, Doris, Elmer, Althea, Rutledge, Lily, Hestbeck, Leona, Whitworth, Doris, Decker; second year—English—Inez Tolman, May Mandall, Marjorie, Rutledge, Morris Goodman, Irene Rose, Ben Callen, Edgar Swanson, Dorothy Sturgeon; fourth year—English—Blaine Bowler, Delbert Clawson, Floyd Olmstead, Kathryn Sturgeon, Marjorie Mathews; public speaking—Blaine Bowler, Thomas Dunlap, Delbert Clawson, Floyd Olmstead, Kathryn Sturgeon, Edgar Swanson.

The Murtaugh high school junior class will entertain the seniors at the school-house Friday evening.

Thomas Whitworth has purchased the property of Harry Winterburn and is completing several improvements.

John Walton has moved to the A. Walton ranch which he will farm this year. The former renter, Art Hutchinson, has moved to Burley.

F. W. Wachholz has moved his hardware and implement stock into new quarters.

Barney Applebaum arrived here from Salt Lake City Friday for a short visit.

H. T. Henderson returned from Colorado Sunday, after attending the funeral

central services of his mother.

There are 25,000 words in the English language—more than in the "Penguin" and "Squire" dictionaries combined.

Schools at Murtaugh Free of Meningitis

MURTAUGH, March 20.—Following 220 throat culture tests completed at the school by H. Peterson, state bacteriologist, and a nurse, it was announced that no trace of meningitis had been detected. School classes were dismissed Thursday and Friday awaiting this final report of the bacteriologist.

Charles Johnson left for Twin Falls Saturday to receive medical attention for an injured eye.

The Parent-Teacher association has postponed a meeting to have been held this date. The next meeting will be announced later.

Mrs. Wilburn Turner is under quarantine following a throat test that is said to have shown the presence of spinal meningitis germs.

The principal highways of this district are open to traffic. Some roads, however, are reported to be still closed by drifts of snow.

Diogenes Under Suspicion

We suppose one rumor they started about old Diogenes on his way seeking around looking for an honest man was that he probably stole his lantern.

Columbus, Ohio, State Journal.

Good News

A NEW Kind of Oatmeal that cooks firm, nut-brown and appetizing—with kernels separate and chewable—never sticky or pasty.

That's New Style H-O—an oatmeal unlike any you've ever tasted—ready a new cereal.

It's packed with energy-giving carbohydrates, tissue building proteins and a wealth of vital minerals.

Needs only 2 to 3 minutes cooking.

Quick & Hot Cereal

New Style H-O OATS

**For the
DORMANT SPRAY—
use S-W Dry Lime Sulfur**

This modern insecticide is the best all round orchard spray that chemical science has developed. It is especially recommended for the control of San Jose Scale and Blister Mite, and is endorsed everywhere by horticulturists and practical orchardists.

S-W Dry Lime Sulfur is effective and economical when used according to our recommendations.

Referring to his experience Mr. Wm. C. Rae of Wenatchee, Wash., says, "I used it on my orchard on Sunnyslope where I had 25% scaly fruit and got 100% clean-up. This year I also used it on Mills Bros. 44½ acre orchard, of which I am manager, and after a careful survey I failed to find any scaly fruit. This orchard has heretofore had a very heavy infestation of San Jose Scale. Last year 3,000 boxes of apples were culled on account of scale."

Why punish yourself with the many disagreeable features of Liquid Lime Sulfur when you can buy a 33° Baume test Lime Sulfur in dry form, eliminating the high trucking cost, excess weight, extra cost of handling leaky barrels, and other objectionable features of Liquid Lime Sulfur.

The 25 lb. bag is convenient for you. Make mixing a simple operation. No water, no heat, no stirring, no fuss, because it dissolves easily in water. Does not leak, freeze or deteriorate.

A valuable spraying guide for you. Write for the Sherwin-Williams Spraying Chart. It gives complete directions for the control of all orchard pests.

S-W Free Mulsion

A high viscosity, highly refined (safe) dormant oil spray

S-W Free Mulsion is recommended for heavy infestations of Scale, Red Spider (Brown Mite, European Red Mite) and Aphids. It mixes with hard or soft water... does not separate... leaves no residue to harm the trees. See your local dealer for your requirements.

MORE ALCOHOL FROM LESS YEAST RESULT OF BREEDING FUNGI

Possibilities Opened By New Field of Research Originated by Dr. B. O. Dodge of New York City

By HOWARD W. BLAKESLEE (Associated Press Science Editor)
NEW YORK, March 20.—The possibility of breeding yeast of increased alcohol-producing properties is opened through a new field of research originated by Dr. B. O. Dodge, pathologist at the New York State small pox hospital.

Likewise, the way is pointed to establishing new flavors of cheese. There is also the possibility of breeding types of mushrooms different from any previously known.

Yeast, some cheese flavors and mushrooms are fungi; a type of plant life, but a kind that in the past could not be bred to obtain new varieties.

Dr. Dodge, while pathologist at the United States department of agriculture, Washington, about three years ago, discovered how to hybridize, or cross, different fungi species, an epochal scientific achievement. In this, developing this technique at the Botanical garden.

Many kinds of fungi may be hybridized, he says, including such types as yeast, cheese, mushrooms, and fungi parasites of harmful insects.

Dr. Dodge says, "In slow, experimental work, likely to produce many varieties not worth continuing, but one may be fairly certain to bring forth occasionally a potent, new useful type. Present yeasts, we are told, develop a comparatively small percentage of alcohol, but yeast fungi of high alcoholic resistance are being used by distillers. Further breeding offers the possibility of obtaining strains of still larger alcohol-making properties. There is no particular reason why certain yeast species which reproduce sexually may not be hybridized, and, in selection, new forms developed which would be exceedingly useful."

Years ago Dr. Dodge put fungus spores in an unused gas oven to keep them free from dust. At that time the only known method of germinating these particular spores was to feed them to rabbits and grow them from excreta. A careless colleague lighted the gas. Dr. Dodge, rescued the fungi after they had heated almost to boiling temperature. He thought them ruined, but next day the spores had sprouted. Thus he grew pure forms in cultures where their trails could be studied much better.

Years later the incident resurfaced to his memory when he began study of pink bread mould, the bane of bakers. The results he obtained encouraged him to attempt the supposedly impossible business of hybridizing fungi.

Best Woods' Food
The rule of the woods is that a mouse can do very well on three pounds of animal food—per day, and not out of that given three pounds of food. Her tests—others per day is reserved for panicle. It is one necessary item that must be considered so far as food is concerned; it will stay with you longer per given portion than any other food and upholds in proportion a far greater amount of energy.—For eat and Strawn Magazine

Waxed Paper Flowers
Any one wishing to wax a few paper flowers may melt a white wax and hold flowers over the pan and put on with a spoon; it is not necessary to melt so much wax as when plunging the whole flower into the liquid.

Animals and Parasites
Mink is less bothered by parasites than he has ever been, but domestic animals, concentrated in small areas, are probably more pestered than in the past.

Workers Prepare Bathing Beach Where Dredgers Once Obtained Gold Wealth Hidden in Gravel Bed of Snake River

By LEW SWEETSER (The Burley News Correspondent)
Responding to a call for volunteers to clear debris from the bathing beach at the Heyburn bridge, a force of men and teams gathered Sunday and Monday work preparing for the coming swimming season. The task was in the hands of Paul Mueller who called the workers together, G. E. Dillard, George Hunt, A. T. Seeds and others. At completion of their work, several took swims in the cool waters of the Snake. Exceptionally low water enabled the men to smooth the gravelled slope of the beach and to remove obstructions. Incidentally, they almost obliterated the last remaining landmark of an old Snake river industry. For here, men used the comfort of bathers with its chain rib and bolts, part of the equipment of a big gold dredging outfit in the final decade of the last century lay at rest, half buried in the gravel.

Here lay the dismantled stern-wheel tug boat, and one of the best barges formerly used to transport carloads of coal to the immense suction dredger that for years pumped gold bearing gravel to its decks where the precious metal was gathered on tiers of burlap tables. This dredger, working the stretch of river between where the two dams are now built, was a source of much wonder and speculation during the nineties. It was equipped with a complete electric lighting plant, a novelty in those days, and ran continuously day and night. As it was towed about from bar to bar in the stream, it was accompanied by three house boats, one of them a two story affair. These were living quarters, cook house and floating store room for the crew and owners. Visitors were barred from this dredger, and much mysterious speculation was rife as to the profits. It was generally known, however, that for several years weekly shipments of bullion were made from the company's store and offices at Minidoka to the Boise assay office. These shipments averaged in value about \$1400 each week. The dredge boat handled enormous quantities of gravel, taken from the bed

and banks of Snake river. It had a capacity of 100 yards per hour. Low, snake-like tailings bars can still be seen at low stages of the river, which were left

Mrs. Lamont Returns

MRS. ROBERT P. LAMONT, wife of the new secretary of commerce, arrived in New York on the Leviathan from a vacation in Europe.

river, with a view of moving the outfit out into that rich district. It was then said that the six feet of "stripping" precluded profitable working there, as there was no available water. But Diamond Bar is now completely covered by backwater from the Minidoka dam. It might be interesting to contemplate that some estimates of the recoverable gold in the Diamond Bar district ranged from one to two million dollars. Soon scores of bathers will make use of the sloping Heyburn beach where scant traces of the old time dredgers now remain. Few will have in mind the vast stores of gold and platinum in Snake river sands that once beckoned adventurous spirits to strive for its recovery. To be sure, no bars now remain within the limits of the old Snake river bed that assay more than five cents a yard. But tradition says that the sands of Diamond Bar were the richest of all Snake river diggings. Here some strata were said to go as high as a dollar a yard. The sands of Diamond Bar are now covered by shallow waters of Lake Weleet. Some say the time will come when its gold will be recovered for the use of man.

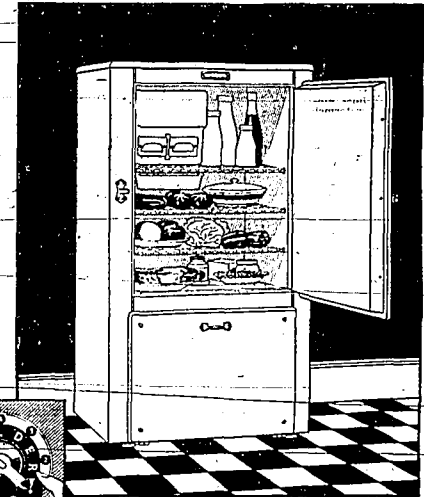

Dogma and Duty
It is said to see how men who take sides with dogma give themselves the airs of men who live for duty.—Robert Lynd

Old Testament Writings
According to tradition the origin of the Old Testament was clouded by Karma and the books probably compiled about 1000 B. C.

Here it is . . . A NEW FRIGIDAIRE

The Greatest VALUE in Refrigeration history

... and equipped with the Cold Control

only \$204

And a cabinet which adds beauty to any kitchen . . . all machinery completely enclosed . . . built of steel with a permanent Duco finish . . . and with the added value of a seamless porcelain enamel lining, as easy to clean as chinaware.

4 cubic feet food compartment; 8 square feet of shelf space.

HERE is the greatest value ever offered in the history of electric refrigeration . . . a New Frigidaire at a price so low that no one need delay any longer. And it has every essential Frigidaire feature.

It has the famous Frigidaire Cold Control . . . the exclusive new Frigidaire development which Frigidaire alone gives you. It enables you to regulate at will the time required to freeze ice cubes. It makes possible dozens of new desserts that require extreme cold.

delivered complete plugged in and working in your home. (Remarkably easy terms if you prefer.)

It is quiet . . . so quiet that you don't hear it start, stop, or run. It has the patented self-sealing ice trays offered only on Frigidaire.

It requires no special installation. It is simply plugged into any convenient electric outlet.

And it has a cabinet of surpassing beauty and convenience. The mechanism is completely out of the way in the base of the cabinet. You never see it . . . never have to clean it . . . never give it a thought. The food shelves are at a convenient height to eliminate stooping. And they're spaced to make room for tall containers or bottles.

Stop in and see this latest Frigidaire development. You need Frigidaire. Now is the time to buy. See this New Frigidaire today . . . in our display room.

Every stroke of cheap paint wastes your money

HERE is the reason. Science has discovered no satisfactory substitute for pure White Lead in paint. But you have too much to be used in practical quantities in cheap paint. . . . That's why every stroke of cheap paint wastes your money . . . Fuller Pure Prepared Paint is made of pure White Lead (for body and elasticity); pure Zinc Oxide (for spreading capacity and hardness); the highest grade of linseed oil. It is the finest ready-mixed paint you can buy. . . . Every stroke that you pay for is paid for by the higher price, per gallon, of Fuller Pure Prepared, adds little to the total first cost of a painting job. You save money in the long run—Fuller Pure Prepared covers more surface, lasts longer, looks better all the time, gives greater protection. . . . Consult a Master Painter—and specify Fuller Pure Prepared Paint. Ask your nearest Fuller dealer, listed below, for a Fuller Pure Prepared and fine color card. Write to W. P. Fuller & Co. for the booklet, "Your Home As Others See It."

There is no Fuller program . . . SOHAN'S MAGAZINE OF THE AIR . . . National Broadcasting Network . . . EVERY WEDNESDAY MORNING

NORTHWESTERN FRUIT SHIPMENTS INCREASE

Idaho. Contributes 36,349 Carloads—to Total; 24,406 in Potatoes Lead List

BOISE, March 20.—Carlot shipments of fruits and vegetables from the Northwest during the calendar year of 1928 totaled 120,008. It is shown in a report of the United States bureau of agricultural economics prepared for the Idaho State Chamber of Commerce. This total is 29,000 more carloads than were shipped in the previous 12 months. Idaho contributed 36,349 carloads. In this total the great bulk of which was 21,400 carloads of potatoes. It is pointed out, however, that the potato shipments in the early months of 1928 constitute part of the crop produced in 1927; in fact, the great part of the 1928 shipments were 1927 crop potatoes.

October was Idaho's heaviest shipping month when 50,900 carloads of produce moved. Potatoes accounted for 18,311 carloads and apples 30,211. Total apple shipments for the year were 6380 cars and no less than 41 Idaho shipping points are represented in this movement. Fruitland led with 1008 carloads, New Plymouth, Payette and Twin Falls accounted also for 36 carloads of dried apples.

Citrus shipments totaled 121 cars from Boise and Caldwell, Emmett, Ellers, Lewiston, Payette, and Twin Falls shipped 188 cars of cherries with Lewiston leading with 114 cars. Dried beans totaling 1897 cars were shipped from 15 Idaho towns with Twin Falls leading. 36 shipments from this point being 667 cars, Emmett and Homedale shipped six cars of grapes, while from Pocatello, Paele and St. Anthony contributed 160 cars of green peas.

Boise, Meridian, Nampa and Parma shipped a total of 72 cars of lettuce and 10 cars of mixed fruit and berries to points in the northern and southern end of the state. Sixty cars of mixed vegetables were shipped from shipping points principally in southern Idaho. Onion shipments rolled from 27 Idaho points and the total was 1184 cars. "Thirteen shipping stations put 105 cases of peaches into the markets and all but two carloads originated in southern Idaho. Thirty-one carloads of pears were shipped from 15 Idaho points.

Potato shipments of 24,406 carloads moved from Idaho in 1928 and practically every important railroad point in the state is represented in the 102 towns shipping this commodity. Idaho Falls led by far any other town in the state with total shipments of 3111 cars. Prunio shipments totaled 1532 cars from 21 Idaho points and Boise and Meridian added seven cars of dried peaches to the total. Lewiston shipped a car of rutabagas and 11 cars of spinach while Emmet, Nampa and New Plymouth sent 40 cars of watermelons to market.

Giant Eels of Pacific
Object of Expedition
AUCKLAND, New Zealand, March 20 (AP).—The Danish research ship Dana is here to search for the unknown origins of the gigantic eels of the Pacific ocean.

"These eels grow to 30 or 40 pounds in weight, compared with the average of about 10 pounds in European waters. Dr. Johannes Schmidt, who in 25 years study did much to explain the origin and habits of the Atlantic ocean eels, heads the Danish expedition.

No eels appear along the Pacific shores of North America. Dr. Schmidt suggests this may be due to the extreme cold of the deep currents, even in tropical latitudes. A dozen eel species are known in the Pacific.

Legal Distinction
In law, fish and shellfish, is defined as all unprepared goods floating in the sea, while jewelry is given no right of overboard which sink and remains under the water.

Oil of Intercourse
Good breeding is the art of showing men, by external signs, the internal regard we have for them. It arises from good sense, supported by conversation with good company.—Cato.

Indian "Princesses" Study For Careers Among Whites

MRS. MARIE LOUISE BOTTINEAU (right), born in a Chippewa-teepee in North Dakota, is in charge of transportation in the Indian bureau. She took a law course at 43. Odile Bousquet (left) was a stenographer in the bureau and later a Red Cross nurse.

By SUE McNAMARA
(Associated Press Feature Writer)

WASHINGTON, March 20.—From top to bottom stage has not been a difficult step of late years for Indian "princesses" who have flung aside war paint for rouge. The way has been a bit more difficult for daughters of Indian chiefs and others who have chosen careers in the business world. One of the most outstanding examples is an Indian girl who has achieved success is that of Mrs. Marie Louise Bottineau Baldwin, who was born in a Chippewa-teepee in North Dakota but now is in charge of transportation in the bureau of Indian affairs. Though her hair is grey, her eyes are as alive and bright as in the days when her father, who was one quarter French, urged her to mingle with white people and learn their ways.

Seated at her desk in the department of the interior, Mrs. Baldwin took time to tell of her career.

"I took my law course at the Wash-

ington college of law when I was 43," she says, her bright eyes sparkling. "I believe that when opportunity comes a person is never too old to take advantage of it. Anything that I have accomplished is due to the fact that I am an Indian, not in spite of it."

"My grandfather was Pierre Bottineau, a noted scout who went with the Lewis and Clark expedition into the Northwest. My own father, John D. Bottineau, was one of the first justices of the peace of Minneapolis. He started the town of Red Lake Falls. He always felt that he had been handicapped when he was a boy by being kept on a reservation and determined that his children should have education and mingle with people. So we were all sent to school."

Odile Bousquet, widow of a Frenchman who worked for several years in the bureau of Indian affairs as a stenographer, also was a Red Cross nurse. According to cold statistics at the bureau, the Indian "princess" is only a myth and never has existed save in the sentimental imaginations of white men.

Round-trip tickets to the Coast via Southern Pacific are a surprising variety in the route you may choose. For example, it costs no more to go to Los Angeles by way of San Francisco than if you go direct.

You'll enjoy this cosmopolitan city by the Golden Gate, famous for its theatres, shops, restaurants, quaint Chinatown, the Latin quarter. 9 trains daily San Francisco to Los Angeles.

If you wish, travel westward to Seattle or Portland, ride over the scenic SIESTA ROUTE to San Francisco, on to Los Angeles and return by way of Las Vegas and a delightful circle trip of the coast. Stopovers anywhere.

Tickets, good for 8 months, on sale as follows:

To San Francisco and back \$60.10—both ways direct.

To Los Angeles and back \$67.60—both ways via San Francisco.

\$67.60—one way via San Francisco, one way via Las Vegas.

\$81.75—one way via Portland returning via Los Angeles and San Francisco or via Los Angeles and Las Vegas.

Give Furnace Ears And Order Heat On

SOHENEOTADY, N. Y., March 20 (AP).—Three words, "Give the cold" spoken over a telephone to the family furnace, may turn on the heat in a not-distant future.

The device to perform such a trick is perfected in the General Electric company laboratories here. It now is merely a toy, used to start and stop electrical mechanisms, but electrical control of heating plants points in that direction as a possible application.

The choice of words is unimportant; it is the number that counts. Whether in classical diction, or slang, three voice sounds start the instrument. It stops on one and reverses on two. In its present stage it is specially responsive to hissing.

GERMANY BUILDING "PORPOISE" BOATS

Largest Ship and Machine Building Company Finds Innovation Satisfactory

BREMEN, Germany, March 20 (AP).—An innovation in shipbuilding has been tried out with results said to be satisfactory by Deschman, the largest German ship and machine building company of this city.

The feature of the invention is the unusual shape of bow and stern, designed to press water down rather than to each side, and to reduce friction on the sides. It is said to cause water to flow by the shortest route from bow to stern.

Three high-sea fishing trawlers recently have been built by Deschman on the new principle. The builders announce that not only is the fuel consumption reduced 25 per cent compared with other vessels of equal size, but that rolling and pitching even in heavy seas is reduced to an extent not previously attained. Test trips also have shown excellent steering capabilities.

Deschman now is building a larger

Mexican Refugees Fed By American Soldiers

BRIDGMAN'S
Clover-Cream
HONEY SYRUP

A new good health product, composed of two of the oldest known to history. No doubt you have heard of "milk and honey." We have them combined into one of the most delicious food products, which in no way detracts from the wonderful flavor of honey as the bees gather it from the flowers, but adds that rich cream flavor of pure creamery butter which is held in solution by our process and will remain sweet for ages.

More people will eat honey and more honey will be eaten by people when they experience the ease with which this product lends itself to use. Honey CLOVER-CREAM is ready to POUR, no more will the hot-cake roll and the waffle follow the knife, and O Berry that flavor once tasted and you are a Clover-Cream enthusiast forever. Honey is one of nature's purest sweets. It is conducive to the health of the already ill and nature's aid for those who are ill.

EDUCATOR PREDICTS UNIVERSAL DEMAND FOR COLLEGE WORK

Edward C. Elliott Asserts
Training Will Come to
Be Regarded as Regular
Method of Preparation

By EDWARD C. ELLIOTT,
(President, Purdue University)
LAFAYETTE, Ind., March 20.—A completely unified and a humanly interlocked educational system is the only reliable guarantee of a limited people for our United States.

It has taken nearly a century of concerted effort to obtain the establishment of elementary education available to all the children of all the people. More and more we are coming to see clearly that our boasted slogan of equality of opportunity and the progressive promotion of the common welfare demand something more than the simple rudiments of learning. The high school already has become a fixed and vital part of the common school idea of the nation.

Our generation has witnessed the raising of our democratic ideal of education by the enlargement of college and professional school opportunities for an ever increasing number of youth. The inevitable conclusion of the present trend is that, in the not distant future, the higher training afforded by our colleges, universities and technical schools will come to be regarded as the expected preparation of all of those properly fitted for the responsibilities of complete American citizenship. In other words, the higher educational system of today is to be—indeed must be—transformed into the common school system of tomorrow.

Already society is asking, with an insistence it not sweet reasonableness, why not the college trained baker, blacksmith and candlestick maker; why not the professionally trained policeman and lawyer; why not, from the standpoint of public health, the scientifically educated dairyman, as well as the scientifically equipped physician.

The forces of modern life, especially economic forces, constantly operate to separate humanity into classes. Under these conditions the democratic formula of "equality of opportunity" is not sufficient unless there is applied at the same time the essential human formula of "equality of quality." To accomplish this means that the education and training of youth by higher institutions must be founded upon a right assessment of qualities and abilities other than the merely intellectual.

Comment on Current Conditions in
The Gem State.

By GUY FLENNER

UP NORTH

There is widespread interest in southern Idaho in reports that large public mills will likely be installed in northern Idaho. This is regarded as one of those outstanding developments that will be reflected beneficially all over the state.

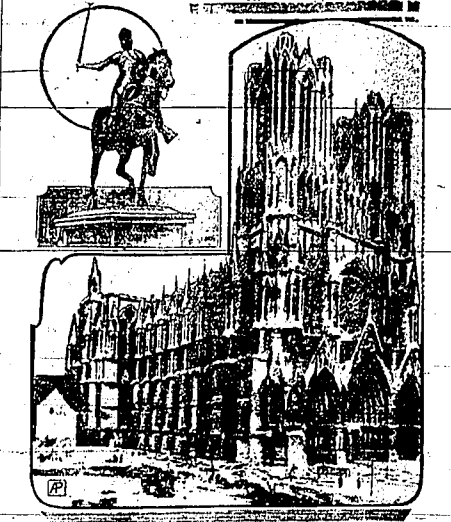

Southern Idaho people keep fairly well informed as to the more important elements of progress in the north, but they are not as familiar as they should be with the details of advancement that great section of the state, probably not as much so northern people are with relation to settled growth in the south.

Every southern citizen who can possibly do so should make a trip through northern Idaho to the extreme border this year. He will return filled with a more complete faith in his state. All points in the north can be reached by rail, and splendid transportation is supplied to the northern lakes. But those who choose to make the trip by motor will find a tour over the North and South highway one of extreme delight.

The vista constantly changes from beautiful mountain scenes to great areas of farm lands, to lakes, vast timbered areas and locations where mining operations are carried on extensively.

Idahoan Going Up
Another Idaho citizen has been promoted to a larger field. W. R. Putnam, who for years has been general manager of the Idaho Power company, has been called to a higher position with the Electric Bond and Share company, which is the financial daddy of all American electric organizations.

France Will Place Tablets Along Joan of Arc's Trail

In connection with the quin-centenary of Joan of Arc, France will commemorate the coronation of Charles VII at Rheims cathedral (above), the most exalted hour in the career of the Maid of Orleans. Inset shows the statue of Joan of Arc in front of St. Sulpice church, Paris.

(By The Associated Press)

DOMREMY, France, March 20.—France is observing a Joan of Arc anniversary that is 18 months long. Every big event of Joan's career from the time she left Domremy until she died at Rouen, a year and a half later, is to be commemorated in a 500-year perspective.

Stone tablets will be placed at intervals along the 3000 miles of road Joan traveled on her white horse while she was fighting for France. The trail begins at Domremy and ends at the Rouen market place, where she was burned to death.

The first tablet is a Vaucouleurs, close to Domremy. Cities most conspicuously identified with her history will set up other tablets, continuing the story, each city choosing the five-hundredth anniversary date of its connection with Joan of Arc, for the ceremony.

There is a movement afoot in Paris to call the route Joan of Arc's highway and to make it one of the leading tourist routes of France.

Joan set out from Vaucouleurs February 22, 1412, an 18-year-old girl called by voice to save France. She rode a white work horse, accompanied by six local followers. She was disguised as a traveling merchant to evade enemy soldiers on the road to Auxerre and Orléans. Her route was marked to Orléans, where she was received by the Dauphin March 6 and convinced him, with much difficulty, that she could lead his defeated army to raise the siege at Orléans.

Less than a month later she marched triumphantly through Tours and Blois, by the enemy to Orléans, where she raised the 160-day siege six weeks after she quitted Chinon. Tours and Blois will erect tablets at Orléans, where France proclaimed Maid of Orleans, the ceremony of the five-hundredth anniversary of deliverance will take place April 28. The next important dedication will be at Troye July 10.

August 17 Rheims, scene of coronations in medieval times, where Joan of Arc made it possible for the Dauphin to be crowned Charles VII of France, later called the Victorious, will unveil a tablet in the reconstructed cathedral where Joan saw the sacred oils administered in the Dauphin's coronation ceremony.

Other points where tablets will be placed are St. Denis, close to Paris; Compiègne, where she eventually was taken prisoner; Le Crotoy, where she was sold to the English; and Rouen, where she arrived in chains Christmas day, 1430.

The date of the unveiling of the last tablet is not yet announced. It is to be placed some time in 1921, probably May 30, and will record how Joan was burned at the stake in the market place with the name of the Savior on her lips, and how she was later made a saint.

The Great American Home

High-brow set, the publicity, but the country still is safe in the hands of people who enjoy the comic section and eat breakfast in the kitchen.—Akron Beacon-Journal.

Community Character

Every community has at least one maker who will do all the work if given a few chairmuships.—Washington Post.

Point of Interest

A government bulletin says "A rabbit too easily caught has something the matter with it." Referred to the college boy who thinks he is a devil with the ladies.—Exchange.

Good, Anyway

A Danish doctor is out with a claim that is old-wives-tale gets a kick to a kiss. And here we had always ignorantly supposed that it was a pretty girl.—Eugene (Ore.) Register.

Biblical Warning

Woe unto you who build your palace with the sweat of others! Each stone, each brick of which it is built, is a sin.—From the Book of Isaiah, Hebrew work of the Second century, B. C.

Cause for Worry

Mrs. Grant had given her ten-year-old neighbor, Joe, some fresh-baked, home-made cookies, deliciously dusted with granulated sugar. Joe suddenly had experienced some difficulties the past with the efficient eating of every crumb of such dainties, for he turned to his mother with an anxious look and quivered: "Mamma, is this sugar stationary?"

Ray Conger, the Iowa youth with the soft Western drawl, eyes of a dreamer and habits of a running machine, is the new sensation of the track. Perhaps also he is the answer to America's need for another great miler to run on the foot steps of John Paul Jones, Norman Taber, Abel Kiviat, Jole Ray, and Lloyd Hahn. His mark of 4:13 2/5 in beating Lermond, Wide and Purje indicates as much.

Coaches declare Conger can run as fast as he wants to. He needs inspiration as well as a fast early pace.

By now Ray Conger, after beating Pelizer, Hahn, Wide, Nurni and Purje, should have the necessary confidence.

SPORT SLANTS

BY ALAN J. GOULD
Associated Press Sports Editor

NEW YORK, March 20 (AP)—The chin-cracking industry expects plenty of thrills this Friday night, when baby-faced Jimmy McLaughlin and Ray Miller exchange wallops. Also it expects a big gate—perhaps \$100,000—which would be a record for Madison-Square Garden at a top price of \$10. Speculators are asking and getting, considerably more than that already for such of the pastcords as they have obtained.

This is the outward evidence of another wave of bullish sentiment in lightweight stock. New York, and the jistic fraternity at large, has come to expect excitement in this division. Not often has it been disappointed.

The gloom with which Gil Dobie had enveloped his football environment at Cornell appears to have spread. Talk of dissatisfaction, especially among alumni over Cornell's football slump in the last few years is now linked to discussion of Dobie's possible departure from Ithaca.

The lean master of the off-tackle slant, it is asserted, may decide to take his talents elsewhere, even though he has an iron-clad contract at about \$10,000 a year, with some five years more to run.

Not since the famous \$100,000 international race at Belmont park between Zev and Papyrus nearly six years ago has any turf classic attracted so widespread interest as the American bid for victory in the historic grand national steeplechase at Liverpool this Friday. American sportsmen have flocked to England for the event. Where Yankee hopes are pinned on the veteran Billy Barton, owned by Howard Bruce, Baltimore. They may not be raised too high, for the grand national is a tough and tricky test at more than four miles.

Ray Conger, the Iowa youth with the soft Western drawl, eyes of a dreamer and habits of a running machine, is the new sensation of the track. Perhaps also he is the answer to America's need for another great miler to run on the foot steps of John Paul Jones, Norman Taber, Abel Kiviat, Jole Ray, and Lloyd Hahn. His mark of 4:13 2/5 in beating Lermond, Wide and Purje indicates as much.

KANSAS ONCE ARENA OF FEROCIOUS BEAST

Bones of Prehistoric Rhinoceroses and Camels Uncovered by Mid-Westerner

LAWRENCE, Kans., March 20 (AP)—Bones of prehistoric rhinoceroses and camels which roamed western Kansas about 140,000 years ago have been unearthed by H. T. Martin, curator of paleontology at the University of Kansas.

Prehistoric bones accidentally found by railway workmen led excavators to Sherman and Wallace counties in western Kansas. In two quarries they found remains of saber-toothed tigers, prehistoric dogs larger than greyhounds, and three-toed horses.

Mr. Martin claims that the Kansas rhinoceroses must have been larger than the white rhinoceros of the Malay peninsula.

Jawbones of some of the beasts measure nearly 20 inches in width. Bones of two varieties of unidentified mastodon-like animals also were found.

Although these animals lived in low, marshy lands, the skeletons were found on hillsides in the highest section of Kansas. Professor Martin's explanation is that the erosion of surrounding terrain has resulted in beds of extinct rivers protruding above the general surface.

Planes Used in Drive Against Mexican Rebels

THE MEXICAN FEDERAL air squadron is playing an important part in the drive against revolutionary forces. Above is a group of federal aviators at Vallumbona field in Mexico City. Below mechanics are servicing planes to be used in the war zones.

CHEMICALS SQUEEZED FROM GAS POSSIBLY OF IMPORTANT VALUE

URBANA, Ill., March 20 (AP)—University chemists are squeezing gas from Illinois. This acid usually is obtained from natural gas under pressure up to 15,000 pounds. To find out what commercially useful substances may be forced out.

At 15,000 pounds gas normally as light as air is so nearly liquid that it may have about 80 per cent of the intensity of water. Both water gas and natural gas are under research, with a sodium monoxide receiving the main attention.

Information obtained from exerting tremendous pressures on gases in two years of experimenting, indicates a synthetic way of making alcohols, ketones and aldehydes to supplement the method of fermentation by which they now are prepared for commercial purposes.

A new process of getting acetic acid, used in artificial silk and the lacquer.

TESTS SHOW MENINGITIS IN TWO SCHOOLS AT BUHL

BUHL, March 20—Seven carriers of cerebro-spinal meningitis were found among students of the Frank H. Buhl school and the Lincoln school. Four were students in the Lincoln building and three in the primary building. Those who were found to be carriers following the recent culture tests were immediately placed under quarantine and will be treated until no trace of germs remain. Pupils of the high school took the culture test Monday and will not be permitted to return to school until Thursday.

Members of the four basketball teams with their coaches who played in the state basketball tournament here Friday and Saturday met for a "good-fellowship" banquet at the Royal cafe Saturday. Superintendent M. M. Van Patten, acting as toastmaster, called on the captains of the four teams for brief addresses. Each group presented a clever stunt.

The cabinet members of the Filer Girl Reserves with their advisor, Miss Ann Jacobson, were guests at dinner Thursday at the home of Mr. and Mrs. G. D. Boring. Dinner was served at five small tables set with St. Patrick emblems and green papers in crystal holders. Following the dinner the group attended the theatre. The guests included Miss Elsie Buhl, district secretary, Miss Jacobson, Miss Rudy, advisor of the Buhl group, Anna Mae Diehl, Lorene Hawkins, Virginia Snyder, Hazel Orm, Virginia La Hue, Sue Bimble and Margaret Hawkins. Mrs. Avery Constant gave an instructive talk to the girl reserves at a recent meeting on clothing following the business session and flag salute. Cynthia Daley and Geraldine Morse played an instrumental duet. Mrs. Merrill Rugg is in charge of the artwork group; Lucille Kates, Virginia Beck, and the school. Plans are under consideration for the annual Father and Daughter banquet which will be held about April

Mrs. P. F. Alquist was hostess to the P. E. O. chapter Monday afternoon. Mrs. Alquist gave a splendid review of "The Children," by Edith Wharton. Delegates will be appointed in the near future to take the state fair across Idaho, all having their sources on or beyond the state's eastern line, and all moving in a generally westward direction toward the state toward the Pacific. The two most northerly ones, the Kootenai and Clark's Fork, as well as the southernmost one, the Snake, traverse more or less of the territory of other states. But in between these lie two magnificent

The State We Live In

BY BYRON DEFENBACH

White Man's First House

When you look at a map of Idaho it may remind you of an old-fashioned straightback chair; some writers have conceived of it as being on its side and some as being on its back.

There are other ways of visualizing it. Out of these is a rather fantastic idea, but if you think of the state's water shed as being a curtain draped down over the western slope of a part of the continental divide.

Five great rivers cross Idaho, all having their sources on or beyond the state's eastern line, and all moving in a generally westward direction toward the state toward the Pacific. The two most northerly ones, the Kootenai and Clark's Fork, as well as the southernmost one, the Snake, traverse more or less of the territory of other states. But in between these lie two magnificent

mountain rivers, the Clearwater and the Salmon, whose mouths as well as sources are in Idaho.

If you will picture these five somewhat parallel channels with their numerous branches, all flowing down from the top of America to the Columbia, you may catch a glimpse of the imaginary piece of dripping drapery above suggested. The discoveries and early exploration of Idaho are so systematically connected with these streams as to make the story as picturesque as a romance.

Meriwether Lewis was the first white man to see what is now Idaho; he travelled down the Salmon a short distance, then moved over to the Clearwater and followed its course to the Snake at Lewiston's site.

The visitor was the Englishman, David Thompson, four years after Lewis. Thompson called on the down the "columbia" about the present location of Lewiston Ferry. He then crossed the low divide separating that river from Clark's Fork, and on the bank of the swelling out of the latter stream known as Lake Pend Oreille, he erected the first white man's habitation ever built in Idaho. This building was known in history as Kullypsel house.

It was abandoned after a brief service, and burned down some 23 years later. The ruined chimneys may still be seen, and the location is otherwise marked by a monument, recently erected by patriotic people of Sandpoint and Bonner county.

Thus it will be seen that Idaho's first white visitors were guided by two of our great streams, and the next group by two others. One might think the routes would have sufficed for some time. But the third crew of adventurers, headed by Wilson Price Hunt, made use of the remaining one of the five great watercourses. Hunt crossed the divide at the Teton, entered the valley of the Snake at the foot of those majestic summits, and followed that stream clear across the state we live in.

Walker's Danger Signal

A white-hot wire fire alarm has recently been granted in England. A flag bulb and lantern provide a red light for protection when the owner is walking on the highways at night.

100 Pairs Ladies' Pumps and Oxfords \$2.98

Here is a chance that only comes once a year; one hundred pair of shoes which would sell regular for at least a dollar more; such well known brands as Hamilton Brown, Star Brand and Endicott-Johnson; patents, tan and black calf oxfords and pumps. Easter special at **\$2.98** pair

200 Pair Ladies' Fine Dress Pumps at \$3.49

Ladies, don't fail to see this fine lot—all new styles; in patents, kids and light shades; Spanish, Cuban and low heels; several of them are samples and are exceptionally good values. Shoes that would sell regular up to \$5.85. Easter special at **\$3.49**

One Lot School Girls' Oxfords at \$2.49

Sizes 2 1/2 to 7; a splendid buy for rough wear; these have a wide toe and low heel; good quality black calf; heavy leather sole; Easter special **\$2.49**

From Our Regular Stock—Not Specials but Priced the Economy Basement Way

Black Patent Pumps

A slender beautifully designed pump. Round toe and fore-shortened vamp. Light leather lined. It's new and very neat; priced **\$3.98**

Woman's Patent Lace Oxfords

A smart black patent in the oxford style, designed with striking originality. Medium short vamp with distinctive cut-out and beautiful low cut line. Light leather lining. **\$3.79**

Tan Leather Tie

End your foot troubles by wearing Dr. Freich's approved arch support. This shoe comes in a tan lace style with a military heel. A shoe that will wear a long time and give you maximum comfort **\$3.98**

Girls' Patent One-Strap

Here is a beautiful one strap for the growing girl or for women who want a stylish looking shoe with medium low heel. High grade patent with light leather lining **\$2.98**

New One-Strap Patent Pump

A neat looking patent one-strap pump with a high Cuban heel. A new buckle effect. Covered patent heel; leather lining **\$3.49**

Boys' School Shoes

For an all-around shoe for dress and wear this shoe is just the thing. Fine calf uppers with red composition sole that will not mark floors; 9 to 13 1/2 **\$2.98**
1 to 6 1/2 **\$3.49**

New, Sturdy Tan or Black Oxfords for Growing Feet

Correct for boys' growing feet, as they allow all toes to remain in a natural position. Good looking, serviceable shoes of sturdy grain leather uppers. Genuine oak leather soles will give long wear; durable rubber heels; 9 to 13 1/2 **\$2.98**
1 1/2 to 2 **\$2.98**
2 1/2 to 6 1/2 **\$3.49**

Boy's Sturdy Everyday Shoe

Low priced but durable. A bargain because our exceptionally low price is combined with sturdiness. Good grade leather uppers with heavy oak leather soles. A shoe that will give your boy lots of wear for a little money; 10 to 13 1/2 **\$2.49**
1 to 6 1/2 **\$2.79**

The Economy Basement's Big Easter Shoe Event Starts Friday, March 22

1482

Pairs of Men's, Women's and Children's Shoes

will be shown for the first time. Every pair was bought way under the market and will be sold way under the market. Each and every pair was bought for this one event and not a pair has been shown before.

Here's the Story:

Twice a year at inventory times our shoe buyer spends three days in the St. Louis Shoe Market. He visits factories, job lot dealers and especially our own manufacturers. They are asked to cooperate to put this event over. Nothing is bought unless it is 33 1/3% to 50% under the market. The saving is passed on to you.

Please Notice

There are 189 pairs of factory damaged shoes in this lot from the factories of Roberts-Johnson Rand and Brown Shoe Co. All of the rest are guaranteed by us to be strictly firsts. Every damaged shoe will be plainly marked "DAMAGED." I consider this the opportunity of the spring season to outfit the whole family in good shoes at a saving that you will feel. No little pin money savings here, but under buys that mean dollars to you.

350 Pair Misses' Pumps and Oxfords at \$2.49

Here is where you can save your money, fully half of this lot have Goodyear welt soles. Every pair new spring styles. Patents, novelty kid leathers. Black and tan calf, all made by reliable shoe manufacturers; size 11 1/2 to 2. Values up to \$2.95; Easter special **\$2.49**
Same as above; sizes 8 1/2 to 11; Easter special **\$1.08**

"If it isn't Right, bring it Back"

7000 Americans Will Take Cars Along On Tours Of Europe This Year

CONTINENTAL TRAVEL SCORES BY UNIFORM MOTOR REGULATIONS

Automobile Associations Estimate \$50,000,000 of United States Money Will Be Spent in Points Abroad

By WILLIAM E. BECHTOLD (Associated Press Automobile Editor) WASHINGTON, March 20.—European travel, through standardized facilities and uniform international regulations, has been brought within the realm of vacation costs common in the United States.

Five American girls kept a detailed account of their 6000-mile tour of eight European countries to show that their average daily expense a person was a little less than \$5.

"We took our car to Europe with us, and we had more fun than the tourist experiences, in checking his trunk," Barbara Hastings of Washington, leader of the trip, says. "We traveled more than 6000 miles on European soil in 67 days, found none of the red tape we had expected, and had little difficulty getting from place to place, although we were not acquainted with the languages of the countries through which we drove."

Average Cost \$5.50 The average cost of motor touring in the United States is estimated by the American Automobile association at \$7.50 a day. Because the flow of motorists abroad has increased so rapidly within the last few years, the automobile association estimates that more than \$50,000,000 will be spent in European countries this year by at least 7000 American motor touring parties who will take their own cars with them.

While attributing the increased motor travel in Europe largely to the simplification surrounding the shipment of automobiles today and the ease in meeting custom requirements, the American Automobile association says that many Americans are extending their business connections abroad by using their own motor cars.

No Special Packing Automobiles can be shipped to Europe without any special packing. They are merely drained of their gas and oil, and swung over the side of the ship, and the tourist travels to be placed in the hold. They are delivered to their owners with as great facilities as trucks are turned over to their proper owners.

Mrs. Hastings and her friends started their motor tour from London, circling England, and then to France. While they were on English soil they felt more at ease because they could speak the language. "We didn't mind driving on the left hand side of the road and felt queerly when we had to shift back to the right side after reaching France," she says. "In crossing the border between France and Belgium, a French official in a blue uniform and a French official in a blue uniform, he nodded his head in the negative. We explained that we didn't want much French, but the official quickly took the numbers off our engine, stamped a card and passed us without further conversation."

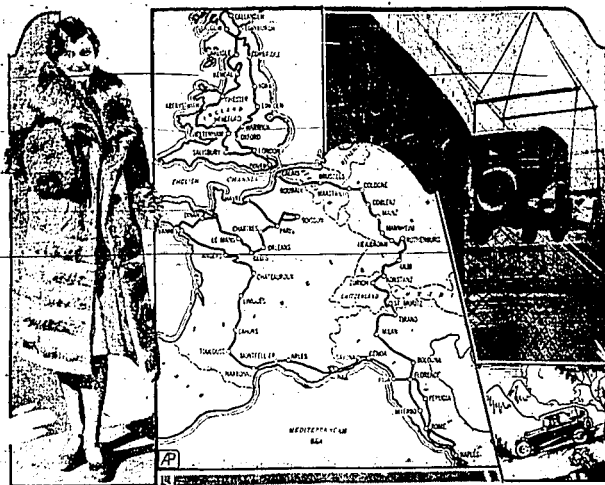

"We found crossing the other boundaries from Belgium to Germany, Germany to Switzerland, Switzerland to Italy and back into France equally as easy. We crossed seven borders on our continental journey, and found only one official who could speak English. "Gasoline averaged from 50 to 55 cents for five liters, which is a little more than a gallon, on the continent. In England, gas was about 34 cents a gallon, but the English gallon is larger than ours. One finds gas pumps everywhere along the streets and even out in the country."

Conditions Different "Driving conditions in Europe are different than those in the United States. In England, virtually all roads are paved and kept in fine condition. In Belgium, they are paved with cobblestones, but are surprisingly smooth. The road we followed up the Rhine in Germany was perfect."

In Bavaria and Wurtemberg, we found good gravel roads. Switzerland is noted for good roads. Italian highways, we found, are apt to be rough and dusty. In France the main highways leading to Paris are fine wide roads filled with cars speeding along at 60 miles an hour or more."

Experts Address Burley Boys On Sugar Projects

BURLEY, March 20.—For the purpose of considering formation of 4-H clubs for sugar beet projects, 110 boys met at the high school Monday where they listened to talks made by specialists. Boys present were from the seventh and eighth grades, and from the high school. P. C. May, agricultural superintendent, and B. O. McCulloch, and George Lewis, field men of the Burley sugar factory, told of proper cultural methods and spoke of the benefits to be derived from sugar beet raised on the Minidoka tract. Other speakers were W. W. Palmer, county agent, and Dan Warren, district 4-H club agent. Those women, in the meeting state that there is considerable interest among the boys and that several beet growing clubs will be organized in Ossa county.

Seven thousand American touring parties are expected to take their own cars to Europe for vacations this summer. Barbara Hastings (left) of Washington and four girl companions demonstrated the ease with which girls can travel in Europe, untroubled by making a 6000-mile tour at an average daily expense of \$5.50 a person. The map shows the route which extended through eight countries. Automobiles now are swung aboard ocean liners (right) and store in the holds without packing.

In O'Neill Play

CLAUDETTE COLBERT is the atheist's daughter beloved of a minister's son in Eugene O'Neill's new play "Dynamo" in New York.

Rogerson Farmers Ready For Spring Activities

ROGERSON, March 20.—Farmers near Rogerson have machinery ready for spring work which has been delayed by excessive moisture in the ground. This year much of the farming work will be carried on here with the aid of tractors.

Leo Mullins, barber at Rogerson, has purchased the Hollister barber shop where he will work on Tuesdays and Fridays, spending the other days of the week at Rogerson. Mrs. Emory Cameron, who spent Tuesday evening at the McConnell home, declared that this was the first time during the winter that it was possible to "drive" horses to and from Shoshone basin.

After making an extensive visit at the home of C. A. Boss, his son reading here, C. C. Boss left for the home of another son, P. C. Boss, at Roseworth. Mr. and Mrs. Melville and family returned from their apartment at the Goldenhauer home Tuesday to the Healy ranch west of Rogerson.

Beauty Hostess

MIRIAM STUART, Broadway actress, has been chosen hostess for New York's beauty exposition.

Duck Springs Hermit Recalls Court Session and Lawyers in Old Albion

By LEW SWEETNER (The Newbury Correspondent) As I leaned on the top rail of my fence, observing the struggling green spears of grass that pushed up into the cool, morn'g atmosphere, I was startled from a reverie by a shrill voice right at my elbow.

"Bout time for court to see—ain't you goin' over?"

I turned, and saw the Duck Springs Hermit. He raised part of a plug of horseshoe to his lips, and tucked manfully to bite off a chew with his stumpy front teeth.

The question propounded by my old friend fitted so nicely into the trend of my thoughts that I brushed my eye to make sure I was really awake. I seemed normal enough. Then I glanced sharply at the old man.

He had finished worrying off a sizable end of tobacco. Rolling it around to a place in his mouth that seemed suitable he clamped down once or twice with his well worn grinders, stuck the remainder of his plug into his back pants pocket, and looked at me with beaming self-satisfaction.

"Yes," he went on, thickly, "bout time to get over to the county seat. But the roads is fierce. I reckon that Albion summit's pretty slick, and the bottom's sure dropped out of the ferry road. I looked over at the Albion hills, again wondering whether I was asleep or awake.

"They're gatherin' boys! Jeggo Stocker, lager must have got there by now, and he's bout, opened court. And they's a hull state load of big lawyers come in from out to the railroad. Ol' Jim Hawley, and Jeggo Ensign, and Stan'rod, and Wilum E. Boro, and ol' Arthur Brown from Salt Lake and Jeggo Maginnis from Ogden. Gosh! they's sure a herd of them comin' in to help them pore Badt River farmers ontangle their water troubles."

I began to get excited, myself, at

thought of the semi-annual gathering of the Cassia county clan. I started hurriedly up the road, having in mind to hook up and hasten to the county seat. The old fellow trudged cheerily along at my side.

"And ol' Jim Pierce must be on hand right now, and Jim Hitt, and Burdick and Nils Gamble, and ol' Major Stokes, and Andy Bu'strom, and Sam Worthington, and Joe Parker, and the bunch to have one on the house. Gee whillikens, the hull county's there. Fred Danne's callin' for the jury. Great gosh, I get 'er hurry!"

I did hurry. I burst into the door, and reached for the collar and harness. My hand grasped an old automobile casing. Astonished, I looked around. There stood my trusty fiver. In rather a daze, I went back out the door. An automobile scurried by on the highway. My eyes went up toward the Albion hills. Albion lay beyond the summit. But not the Albion I had just been thinking of. Up there was a calm, placid, sheepy scene.

The Albion I had been thinking of was the rollicking village of frontier days. A county-seat town filled to the brim with able lawyers, litigants, witnesses, all the big men of a frontier county.

The muddy streets of lively old-time Albion. Saddle ponies and harness horses clamping in the stables. Big frame hotels well filled with guests. Saloons well filled with visitors. Solo games, poker all night. And dances—Old Johnn' Bozette's tiny brewery with those enormous schnozers of home brewed beer. County officers talking politics with precinct leaders. The judge, sitting in open chambers during court recess, surrounded by consciously prominent county men.

It was the old Albion I had been thinking of. I seemed to hear the old familiar "Gee whillikens" in boys, this one is ol' me." But the request was very faint. I

Books On Gardening On Public Library Shelves

Twin Falls public library is a member of the National Association of Public Libraries, and according to Miss Jessie Fraser, librarian, has the privilege of obtaining any information which that organization can give. The association, she says, will answer specific inquiries on any phase of gardening, and patrons of the library having such queries can obtain an answer by filling out questions to be sent to the library and having them relayed to the association.

The following books have just been received from the press of the association, relating to gardening: "Flowering Plants," Barron; "Roses and How to Grow Them," McFarland; "House Plants," Barnes; "Lawn Making," Barron; "The Vegetables Garden," Krulm.

The following books on the subject are also to be found at the library: "The Making of a Flower Garden," Bennett; "Garden Fanning," Corbett; "The Practical Garden," Ely; "Gardening With Drums," Pink; "The Little Garden," King; "Gardening in America," Shelton; "A Small House and a Large Garden," Wright; "Adventures in Garden," Gardening, Mitchell; "The Book of Bulbs," Root; "Bulb Growing for Amateurs," Thomas; "Gladioli," Rockwell; "Design of Small Properties," Bonamy; "The Rose in America," McFarland.

"The Terror" All-Talkie Shows at Idaho Theatre

Rated as one of the most successful mystery plays of the decade, "The Terror" is now presented by Warner Bros. in its latest and greatest all-talking picture and which starts a three-day run at the Idaho theatre this afternoon. Edna Wallace Grier plays the role of the sustained sensational success of "The Terror" in England. They assert further that the story is so remarkable in its originality as a mystery tale and so obviously ready-made screen material that its possibilities are unquestionable. May McGraw, Louise Fazenda, Edward Everett Horton, Alec B. Francis, John Miljan, Holmes Herbert, Otto Hoffman, Joseph W. Oliver and Frank Austin are in the cast. Roy Del Ruth directed and Harvey Gates did the screen adaptation. Vitaphone not only provides the vehicle for the lines which are all spoken, but reproduce with amazing reality all the sounds incident to the progress of the weird thriller. Shrieks, shots, sounds of wild winds and rain, mocking laughter and ghostly organ music are all registered. And how!

ECONOMIES FOR FARMERS LINCOLN, Neb., March 20.—Farmers, bankers, and other business men, will hold 17 district meetings in Nebraska this spring to discuss the 1929 agricultural outlook. In the light of what happened in preceding years under somewhat similar conditions, an effort will be made to determine whether various farm prices will go up or down and what crops should be increased or decreased.

was now quite awake. I looked about for the Duck Springs Hermit, and over my shoulder I thought I heard a sort of cackling chuckle, but the hermit wasn't there.

Shops and Stores of Magic City Prepare for Crowds at Annual "Spring Opening"

Townpeople and Visitors From Surrounding Communities Cordially Invited to Inspect Exhibitions During Concluding Days of Week

For several years, Twin Falls has been the only town in this district which has had an annual "Spring Opening," participated in by all the stores and shops. On Friday of this week, out-of-town visitors, as well as townpeople, are cordially invited to inspect the advance styles, the new things being shown for the spring and summer. Townpeople cooperate by modeling new frocks, hats, etc. stores are open in the evening, and everyone is welcome to enjoy the rainbow colors and breath-taking loveliness of spring accessories.

On a search for "what they will show," a number of interesting things are disclosed. First, but one shop will exhibit a number of new spring shoes and that for a large part, they are in blues, reds, greens, and color combinations. With a heavy pump in his hand of mustard red, a dissonant section of black patent leather across the rather sound, low, the salesman declared that a large number of people wait until after the spring opening each year to do their shoe shopping.

Strap slippers, center buckles are good, bright colors are being shown, and the flat heeled shoes offered in Lido sand, cocoa brown, and beaver, and tan are especially popular.

How lovely the sunburn shades, and the face powder shades rather closely. Some merchants are confident that these "fantastic" youthful light sports

are all attractive. Underthings are filmy and soft and feminine, even the tailored sportswear and candy-striped trunks and brassiere to match.

The sleeveless dress is firmly ensconced for sportswear, and is showing quite a little for afternoon when there is a matching jacket with long sleeves. Also there are quite a number of afternoons and dinner dresses in lace with full length transparent sleeves.

It is no longer smart to wear unrelated accessories. Handbags of matching color or fabric are shown. Belts, scarfs and hats must be tangibly related to the costume they accompany, and jewelry must harmonize in coloring with the gown.

The new blouse is especially popular this year. And the peplum a flared ruffle hanging from the waistline is being shown.

As for hats, there will be dress hats and sports hats, and most any kind of a hat one could wish. Starting with the hat for the evening, there are hats for every frock, and every hour of the day. Indeed, the wise woman will choose two or even three less expensive hats for her hat wardrobe, instead of allowing one hat to serve for every purpose.

Nor was that all, or even half of the things disclosed in an effort to keep behind the scenes and discover what the stores will show at this year's annual Spring Opening.

Boys at Pella Organize Two Sugar Beet Clubs

BURLEY, March 20.—Boys meeting at Pella Monday evening started two sugar beet clubs. Proceedings were carried on strictly according to the rules of parliamentary law. The "Peach Up" beet club was fully organized, with Edward Waters as local leader. Officers of the club were elected as follows: Uriel Simon, president; Spencer Bingham, vice president; Charles Bingham, secretary; Willis Miller, song and yell leader; Elden Haskell, reporter.

The second club was called the "Beets Em" club. Lewis Freer being selected as local leader. Officers will be elected at a subsequent meeting. Each member of these clubs will plant and fully care for at least one acre of beets.

Club Members Postpone Mountain View Meeting

MOUNTAIN VIEW, March 20.—A meeting of the Mountain View club, to have been held today at the home of Mrs. Hattie McCoy, was postponed because of road conditions. Another date for the meeting will be announced later. Mr. and Mrs. Elmer McCreedy are the parents of a daughter born March 11. Mrs. J. F. Cordes was honored on her birthday when members of the Gemes club gathered at her home and presented her with an attractive gift.

Mrs. and Mr. Jacob Mason and daughter, Mrs. and Mr. Fred Mason and son, Norman, all of Kimberly, and

MACHINES SPEEDING GROWTH OF BACTERIA

Impatient Young Man Devises Apparatus to Replace Dozens of Bottles

NEW HAVEN, Conn., March 20 (AP)—A young man who was impatient of old-fashioned laborious methods for growing bacteria has devised a machine. The Chemistry laboratory of Yale university a single piece of apparatus that replaces thousands of bottles.

It is employed to cultivate bacteria for the control of chemical analysis which more and more is insuring mankind against disease. For nearly a century small glass jars have been used in this cultivation, a laborious task exacting precise care and caution.

In place of the bottles, Harry V. Meyer, formerly of the University of Kansas, and now national research fellow at Yale, has substituted a "machine," mostly of glass, that operates automatically to a large extent, with control valves and electric switches whereby one man, giving the apparatus occasional attention, not only may obtain quantity production, but may regulate the results with scientific exactness.

The whole apparatus stands upon one fair sized table. It begins in a steam pressure cooker, from which the sterile media is sent into the bacterial food allowed to flow through a system of glass tubing into the culture chamber where they are inoculated for the culture growth. Valves of glass, sealed against entry of contamination from the air, control progress of the bacterial media.

ITALIANS PLAN NATIONAL SCIENTIFIC EXPOSITION

FLORENCE, Italy, March 20 (AP)—This art center of Italy in April and May will be the scene of the national exposition of the history of science. This promises to be an unusual event in the scientific history of Italy. The works of two of the world's greatest scientific pioneers, Italian both, will be illustrated graphically. One is Galileo, who evolved the theory that the earth is round and discovered the principle of the pendulum. He is buried at Florence. The other is Leonardo Da Vinci, painter of the immortal "Last Supper" and also a profound geologist, biologist, anatomist and aeronautical engineer. He constructed the first heavier-than-air machine.

Mussolini backs the exposition and Prince Piero Ginori Conti is its chairman. Ministers of war, navy, aviation, public instruction and other cabinet members head various sections.

RUSSELL QUITS POST
WASHINGTON, March 20 (AP)—F. M. Russell, assistant to the secretary of agriculture, has resigned to become president of the National Broadcasting company.

MAN WASHES HALF MILLION DISHES IN TEST OF WEAR

PITTSBURGH, March 20 (AP)—William Nauer, burly and blond Lithuanian, has washed nearly 500,000 dishes here since August.

At the rate of eight hours a day and six dishes a minute, William is doing a job of literal scientific dish washing. The objective is to discover how soon soap and water and a dishcloth will eat or wear off the surface of a set of synthetic trays made by the Westinghouse Electric and Manufacturing company from carborundum and an odorless formaldehyde.

Engineers have decided that the hardest wear to which the trays may be exposed is plain dishwashing. Even some boiling liquor was found in a test to be less powerful in its abrasive action than soap and water.

A woman, the first dish washer, quit because too much soap and water was marring her hands. Next came a man, an Italian steel mill worker. The monotony got him and he went back to the mills.

Then came Nauer, who yet shows no sign of weakening. He sits on a bench, with a stack of 20 trays before him, washing, rinsing, drying and repeating, his motions as regular as those of a machine, and most of the time silent, for there is seldom anyone for him to talk to. His big hands have turned baby pink.

Scout Ranks High

JACK GREEN, 14, Olympian, Washington, eagle scout with 71 merit badges is believed to hold more than any other member of the organization.

"Triplex" Assails Segrave's Speed Mark

J. M. WHITE (left), owner and builder of the Triplex and Lee Bible, driver, discuss the possibility of regaining the speed record formerly held by the Triplex and broken by Major Segrave's Golden Arrow. The Triplex has just completed a test run over the sandy nine-mile course at Daytona Beach, Florida. Bible lost his life in the attempt.

TOBACCO EXPORTS HIGH
WASHINGTON (AP)—The year-1928 marks one of the greatest years in the American tobacco trade, data collected by the department of commerce indicates. Total exports of leaf tobacco, in 1919 were approximately 777,000,000 pounds, but that year was not regarded as the highest for any year save, as it saw the movement of 1919, and which brought more than 1,000,000,000 pounds of leaf tobacco into the country. Exports during the war

Visitors To Moscow Via Poland Find Scant Welcome On Arrival

By J. EDWARD ANGLY

(Associated Press Staff Writer)

MOSCOW, March 20 (AP)—The first impression one gets of Moscow depends largely on the direction from which the traveler comes.

If he has made the long 11-day trip by the trans-Siberian express, or has come down from the north on one of the popular expresses from Leningrad, or entered from the tourist centers of the south, there are sure to be great crowds swarming in the stations when the train pulls in.

But if the traveler is an American or European, entering Russia temporarily, he is most likely to arrive from the Polish frontier, and the chances are the train will be almost empty and the station rather devoid of life.

It was so when this correspondent arrived in Moscow, one of three passengers in the sleeper, with barely a score of voyagers in the ordinary cars. There were no friends to meet anyone, and no porters to be found on the platform. The train, it seemed, had arrived a few minutes ahead of time. Soon half a dozen porters ambled leisurely into sight to be snapped up quickly.

The first impression of Moscow on leaving the station was not a happy one. There are some taxis in sovietized Moscow, but there was no sign of one when this traveler stepped outside with his luggage. There were only a half-dozen, Havalas, the little open carriages that are the most common means of getting about any Russian town or city.

One must bargain with the Havalas. (The driver as well as his outfit goes by that name). For \$2 or so he will take you to your hotel.

The station faces a square in the middle of which is an arch of triumph, smaller but similar to the great one that stands against the sunset at the top of the Champs Elysees in Paris.

At first glance one ignores the arch and sees its setting, a square surrounded by low-roofed buildings unpainted since before the war, yellow and brown and white smudged with the stains of weather and the scars of neglect.

And in the cobbles stoned square itself, puddles of water the dirt of uncleaned streets and a crowd of slovy moving folk, no two dressed alike and none well dressed. All the men in caps, old worn caps mostly, the women bare-headed or with shawls or hats that were in style in the west several years ago. There is something of London's poverty-ridden east end in the scene, something of Naples, too, for one hears singing often on the streets of Moscow; and something of every slum everywhere.

The crowd does not change as one rides along, the driver calling to pedestrians to get out of his way, and himself dodging street cars, fast-moving motorbuses, a motor truck or two, a few taxis, perhaps, and sometimes an elegant imported car of most expensive make. These last are for the use of government officials.

Such men, though they wear the garb of workmen, soft colored shirt, cap and all, seldom are seen browsing about Moscow in the middle class motors that serve the government officials of Washington, London, Berlin and Paris.

DISTRIBUTE PECAN BUDS

DURANT, Okla. (AP)—Distribution of more than 200,000 paper shell pecan buds will be made in the spring by the Red River Valley Pecan Growers' association. L. H. Gurley of Roberts, secretary, has announced.

WHEAT PRICES SCORE ADVANCE ON MARKET

Closing Quotations Nervous On Bread Cereals; Corn Quotations Decline

CHICAGO, March 20 (AP)—Wheat scored advance in prices today, as the market, notwithstanding that earlier indications were that the larger holdings of wheat had not been disposed by the banks. Crop news early was bearish, but subsequently more two-sided.

Closing quotations on wheat were nervous as a result of a corn advance. Corn finished 1/2c to 3/4c down, unchanged to 1/2c off, and provisions unchanged to 1/2c decline.

After many standing orders to let go of wheat, future deliveries had been executed today for holders who wished to stop losses at various net limits, the pit became relatively bare of offerings. Speculative sellers quickly turned to the buying side of the market.

Wheat was current that Argentine exports of wheat had fallen off and that pressure of domestic wheat was diminished.

Crop Damage Normal

On the part of the day was chiefly focused on assertions widely circulated that for the most part winter-killing of wheat in the Northwest has been of normal extent only.

Corn developed less rallying power than did wheat, although there was a marked improvement in corn shipping demand here, with purchases amounting to more than 300,000 bushels, the largest day's total for some time past.

Corn sympathized with corn, September sales selling at a new bottom price record for the season.

Provisions reflected lower quotations on hogs.

Easter Apparel

THE curtain rises Friday at 2 P. M. on one of the most important collections we have ever shown. The genius of the best known designers of America is here in smart reproductions of apparel that brings to the waiting world of fashion... drastic changes... a new femininity... bewildering color combinations.

Coats and Frocks Flare Valiantly Into the Mode

There is a very definite feeling of freshness and newness in the new coats and frocks for spring. The coats are soft to the touch and trimmed with capes, scarfs, furs and flares... all placed in new and novel ways. Printed frocks and frocks of sheerest materials in pastels are vying for fashion honors at the present moment.

Coats and Frocks Reasonably Priced
\$12.75 - \$35.00

New Tailleurs and Smart Ensembles

They are developed in print silk dresses with cloth coats in harmonizing or contrasting colors. Some models too, of all silk ensembles in plain color or flat crepe or georgette. Suits and ensembles are the final word for spring and moderate in price.

\$18.00 and \$25.00

Tingwalls
 QUALITY - SERVICE - VALUE

New as the Season

Dame fashion has indeed been kind in the presentation of milady's hat for spring. And our buyers were fortunate in being able to select so complete an assortment of the different styles for spring. Every style variation is here for your inspection. Priced—

\$4.95 to \$6.95

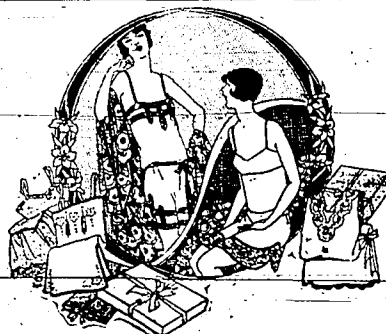

Nosegays of silk and velvet are typical of the tiny bouquets sold on the streets of Paris and just as lovely—

49c to \$2.49

New Shoes Are Interesting

The all important item of shoes to complete the spring costume has not been overlooked. New styles and different treatments as well as unique uses of new materials make our new spring shoe display most interesting.

Lacy Lingerie Developed by Nimble Fingered Craftswomen

It's the sort of lingerie that dame fashion decrees... sheer... and in luscious shades of peach, blue, flesh and green. Trimmed with exquisite laces and two-toned ribbons.

\$2.25, \$2.95, \$3.45

New Spring Fabrics

This is the season when flower prints promise to be a first preference of the mode. Fabrics of exquisite flower coloring are here in gay array. 36 inches wide.

Popular Blouses

Blouses are becoming more important daily, with the increasing popularity of the tailleur. Priced from—

\$5.95

Designs in Diversity

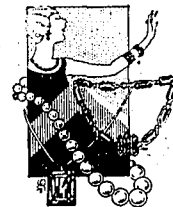

Novel modern designs that retain flower-like colors are new and exceedingly flattering.

HANDBAGS

Although fashion has decreed to cut her handbags in odd shapes, they remain tremendously practical—

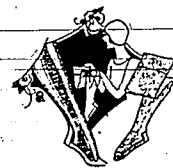

98c to \$8.95

COSTUME JEWELRY

Costume jewelry takes to brilliant colors to complement the gay costumes of spring. A very remarkable collection at—

59c to \$3.19

NEW HOSIERY

Charming new Hosiery of sheerest chiffons with a variety of heels, including the new Panel... Double Point... and the popular pointed heel—

\$1.50 and \$2.45

New Spring Gloves

The new spring gloves are unusually interesting because of the variety and novelty of their cuffs. All the new shades—

\$2.95
