Green Peas Lead Idaho Exports During Month

BOISE, Aug. 1 (AP)—Heavy morement of green peas out of the state was shown in reports compiled today by the public accounts commission.

NEW YORK, Aug. 1 (AP)—Henry O. Greene, oldest member of the American Legion, died at his home in New York City.

POLICE OFFICERS BOOED LOS ANGELES, Aug. 1 (AP)—Police officers were booed today by a crowd of 500 persons in Los Angeles.

Urges Universal Draft

Eight hundred Legionnaires and auxiliary members heard Commander Hubert Benoit, but only the American Legion urged the operation of a universal draft.

Downpour Keeps Price From Scout Camp Fires

ARROW PARK, England, Aug. 1 (AP)—American boy scouts sat in a denching rain for two hours tonight waiting for a prince who did not come.

Senate Committee Votes Higher Duties On Onions, Cherries and Apples

WASHINGTON, Aug. 1 (AP)—Agricultural tariff duties will be raised on onions, cherries, dates, lemons and apples.

Rate on Oats Increases

The present rate of 15 cents a bushel on oats is increased to 16 cents.

FOREIGN BARRIERS IN TRADE

NEW YORK, Aug. 1 (AP)—Henry O. Greene, oldest member of the American Legion, died at his home in New York City.

# Sammy Mandell Confident in Ability to Defend Old Crown

## Lightweight Champ And Cazoneri Vie For World's Title

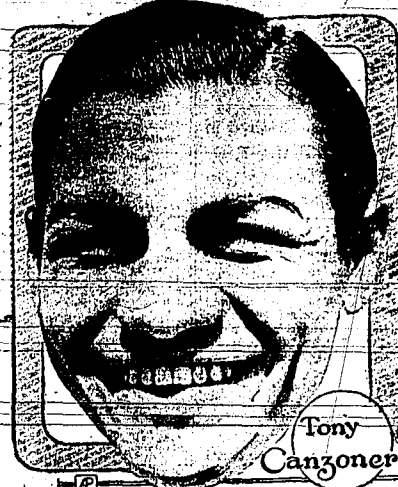

Upwards of 20,000 Fight Customers Will Pay in Neighborhood of \$130,000 to Witness Battle

CHICAGO, Aug. 1.—Sammy Mandell, lightweight champion of the world, will wear his three-year-old crown in Paddy Huron's Chicago stadium tomorrow night and he defies Tony Cazoneri to knock it off.

The pair will meet in a 10-round battle to a decision of a referee and two judges. Upwards of 20,000 spectators will witness the contest, with indications of a gate running around \$130,000, perhaps \$140,000 if the big west side arena is sold out.

Mandell, defending his title for the third time against a really dangerous challenger since he won it three years ago, will enter the ring a 2-1-1 favorite. The champion, perfectly trained, and is the greatest physical condition of his career, has no fear of losing. He figures his advantage in weight, speed and strength will carry him to victory. Cazoneri is just as confident he can bounce a knockout punch off Mandell's chin.

## Sparkling Kid From Ghetto Bids For Mandell's Crown

Tony Cazoneri

This bright-eyed chap who kept smiling and trying after losing the world's featherweight title, gets his reward August 2 when he fights Sammy Mandell for the lightweight championship.

By EDWARD J. NEIL, (Associated Press Sports Writer)

NEW YORK, Aug. 1.—That flashing kid from the ghetto, clean-cut, smiling, fighting Tony Cazoneri, will bid for the lightweight title in his own sparkling way in Chicago on the night of August 2.

The little boobyback from New Orleans, one of the most saffirring fighters in the ring has ever known, will tackle Sammy Mandell, the shrek of Rockford, Illinois, over the 13-round route.

In an era of ordinary fighters, champion divisions, and dull, featureless combat, Tony sparkles like Pauline's gold teeth. He has never fought an unsatisfactory fight, never employed his extraordinary cleverness to make a slower opponent look "bad" and is willing at all times to trade punches and make a battle of it. In addition, he is probably the best postman with the most engaging flippant personality in the ring today.

Cazoneri, with the features of miniature Babe Ruth and an engaging smile that shifts in a twinkling to a bare-toothed snarl when the going gets hot, came out of the amateurs in 1925 to brush aside the bantamweights like flies in his parade to the top of the 115-pound heap.

He lost his first decision to Davey Abad in 1926 and was, lost and dreary in three matches with Bud Taylor, the unnamed bantam champion.

Tony put on weight in 1928 and lacked the featherweights, winning the championship in a spectacular 13-round struggle with Benny Bass of Philadelphia, in Madison Square Garden, February 10. He lost a non-title match to Harry Hillman in Philadelphia in June. Last September Andre Routis, the gallant Frenchman, took his crown in a 15-round match that Tony seemed to have won all the way.

Without a protest and with only a faint smile for the victor, Tony quit the city limits. Mrs. Robertson said he had been "having spells" for several weeks.

"The dead men" all were married and had families.

## The Weather

FORECAST FOR TODAY AND TOMORROW — Generally fair but local lightning storms in mountains; no change in temperature.

With a maximum temperature of 80 degrees and a minimum of 58 degrees according to the report of the government weather observer yesterday's cloudy skies brought relief from Wednesday's sultry heat. There was recorded a trace of precipitation Thursday.

## Insane Man Slays Quartet With Axe

(Continued From Page One)

Lenier, car repair foreman, said he saw Robertson throw some thing away. Lenier caught Robertson about the waist and a struggle ensued. The foreman held on, however, until Constable J. Johnson arrived and with the aid of four other men Robertson was subdued.

## Pioneer Woman of Rupert Drops Dead

(Continued From Page One)

The body was found by the deceased's daughter, Mrs. Amanda Brockie, who awoke when she heard her mother fall. The body lies at the Goodman undertaking parlors here and will be taken to St. Anthony on Sunday for interment.

## BORAH RECOMMENDS SINKING OF BRITISH SHIPS FOR EQUALITY

Idaho Senator's Statement Comes 24 Hours After Discussion of Naval Situation at White House

(By The Associated Press)

WASHINGTON, Aug. 1.—Attainment of equality in naval strength between the United States and Great Britain through the sinking of some British ships was advocated today by Chairman Borah of the senate foreign relations committee.

"The Idaho senator's statement was issued 24 hours after he had discussed the general naval situation with President Hoover at a White House luncheon. Whether the chief executive knew in advance that Borah was to make a public pronouncement was a subject of speculation tonight.

"If Great Britain will follow our example at the Washington conference," said the Idaho senator, "and she some of her ships, and thus come to parity, it will not only save the taxpayers but reduce the incentive to war—for huge armaments are always an incentive to war, partly or no partly. But if we have to build up to parity, it vastly increases the burdens to the taxpayer and augments the incentive to war."

## World's Communist Centers Free From Rioting During Day

(Continued From Page One)

munist Party of America was arrested when he refused to move from the speakers' stand on police orders. Sol Aronberg was taken into custody when it was alleged he attempted to interfere with the patrolman arresting Specter. Morris Goldman, who drove to the scene of the meeting in an automobile placarded with "what police said were Communist banners, an literature, was the third man arrested. Six persons were arrested yesterday on charges of distributing alleged Communist literature and creating disturbances in downtown streets.

## THREATEN BLACKMAIL

CHICAGO, Aug. 1.—Franklin P. Harding, wealthy manufacturer, who lost \$25,000 to Ann Livingston in a recent poker game following receipt of a threatening letter, it was revealed today. The letter demanded that \$25,000.00 be paid to a gang of ex-convicts under penalty of death.

## TRY EXPECTANT MOTHER

LOS ANGELES, Aug. 1.—Trial of liquor charges against Mrs. Thelma Holland, 27, stepmother of six children and expecting the birth of her own child within three months, was set today for August 9 by Superior Judge Marshall McCombe.

## PUBLISHERS WILL MEET

NEW YORK, Aug. 1.—J. E. Palmer, general manager of the American Newspaper Publishers' association, today announced that the fall convention of the association will take place at Asheville, North Carolina, November 12 and 13.

## WARRANT CALL

Warrants of Independent School District No. 1, numbers 664 to 703, inclusive, of the General Fund will be paid upon presentation to the treasurer. Interest ceases July 30, 1929.

## NOTICE

I will not be responsible for any debts contracted by Mrs. Nellie J. Owen, after July 30, 1929.

J. W. OWEN.

## One Convict Loses Life in Mutiny at Leavenworth Prison

(Continued From Page One)

Warden White's only statement was to the effect that one convict was dead and three injured, but that the riot order which requires reports of disturbances to be sent to Washington and there made public if considered dangerous was able to say nothing further.

## Motives Vary

Motives assigned by others to the mutiny were varied. One was that the food distributed to the prisoners was inferior and that the convicts, who had been permitted to read the newspapers of some 100 newspapers, had been denied the privilege.

## Third Aid to the Inmate

A third aid to the inmate-narcotic addict, the temperature in Leavenworth today having been 100.3 degrees.

## Explosion in the Prison

The last report on the population of the prison placed the number of 3758. The total number of guards is 124. As darkness descended on the prison the pandemonium continued, unceasingly (not in any measure abated).

## Shrieks, curses, yells and the low wailing wail of the mob of rebellious convicts still were interspersed with the noise of breaking glass and infrequent discharge of firearms.

## Noise of explosions was followed by the crash of cell doors.

The outbreak came without warning. No reports of impending trouble had leaked from the prison, news from which has virtually been cut off for months under department of justice orders preventing the making public of any information concerning the institution or its inmates.

## Among the convicts are many listed as dangerous. Among these are men convicted of narcotic charges, swindlers and a few serving sentences for murder. Only civilian convicts are sent to the Leavenworth penitentiary.

The army disciplinary barracks here being used for army prisoners.

The prison members bankers scolded for violations of the national banking laws and a large group of persons convicted of using the mails to defraud, including Dr. Fredrick Cook, the one-time Arctic explorer.

Martinez, who has served one year of a 30-year term, was the convict reported to have been killed.

Names of the ring leaders, and of the injured men, one of whom was said to have had a leg blown off, were not made public.

## Leavenworth Prison Mutiny

Leavenworth, Kansas. Last Sunday two prisoners were killed in a riot of 1700 inmates of Auburn, New York, prison, 11 others were wounded and four managed to escape in stolen automobiles. As in the Danmonia riot, the Auburn prisoners set fire to half a dozen buildings, resulting in losses estimated at \$200,000.

In the first of the three riots, three convicts were killed at Clinton prison, Danmonia, New York, known as "Siberia" to the underworld of the United States.

WIFE TEACHER DIES AT

ANOTHER SALT LAKE COUNTY GENERAL HOSPITAL

Miss Opal Williams, 21, daughter of Mr. and Mrs. C. G. Williams, died at the Twin Falls county general hospital at 3 P. M. yesterday after a protracted illness, which began last October...

She had been in the hospital for treatment for two and a half months. Miss Williams was born in Jefferson county, Nebraska, November 2, 1907, and came to Twin Falls with her parents when she was four years of age...

She is survived by her parents, by two sisters, Mrs. Theresa Conners and Mrs. Helen Williams, and one brother, Harley Williams, all of Filer.

The body lies at the Drake Funeral parlors awaiting funeral arrangements.

Woman Is Restored

"For Almost Two Years I Had Been Completely Run-Down Early Last Fall I Underwent a Gall Bladder Operation Which Naturally Left Me Quite Weak.

Mrs. Lydia D. Covington, 42, of Filer, Idaho, writes of her experience with indigestion and how she was restored to health by Skaggs' Food System.

"I suffered so dreadfully from indigestion I could get practically no benefit from my food, my skin was a yellow, unhealthy color. It was almost impossible for me to do any work at rest and my nerves were in a terribly upset condition.

"Just a short time ago I started to take the Skaggs' Food System. I began to improve so much that I could hardly believe I was the same person. I now feel like doing more work than I have done in a long time. My appetite is good again and I haven't had a sign of indigestion or illness for weeks. For the first time in thirty-five years, I am not troubled with sick headaches any more. I sleep soundly, get plenty of rest and no longer have to go through a day's work on my will power alone.

"The Skaggs' Food System is just what I needed. It is so simple and so easy to take that it is perfect for anyone who has indigestion. I am so glad that I have found it. I can now live and enjoy life as I should.

### 74 SCHOOL FACULTY MEMBERS TO RETURN

Office of Superintendent Receives Notices From Principals and Teachers

Twin Falls Independent school district's five principals and 69 members of last year's teaching staff who signed contracts have sent word to the office of Superintendent W. B. Smith that they will resume their duties when school opens here September 9. Twelve new teachers have been secured and six former teachers have failed to make known their plans for the coming year.

Superintendent Smith, now at Stanford university, will later complete assignments of teachers to the various grades and building, according to Mayme Swan, secretary in charge of the office during the superintendent's absence. Principals and teachers who have announced their intention of returning to positions in Twin Falls schools are as follows:

**HIGH SCHOOL**—U. N. Terry, principal; Grace Armstrong, Bernice Babcock, T. Dahlbarger, Gertrude Baker, Franke Barnhart, Dorothy Call, Eva M. Dunagan, John Estes, J. S. Pedlussen, Eunice Pike, R. V. Jones, Pearl Lease, Eva Martin, George McKean, C. D. Merrill, Helen Minter, H. A. Salsbury, Agnes Schubert, Zanna Sheneberger, Ruth Syter, Harriet Throckmorton, Josephine Throckmorton, Ruth Tuller, Tomlin, Francis Wickland, Janella Sutt.

**JUNIOR HIGH SCHOOL**—Mrs. Vera C. O'Leary, principal; Fannie Ames, Clara Billar, Helen Busse, Rebecca Curtin, Grace Daley, Edna Graham, Helen Grant, Mary H. Grant, Fred Hall, May Johnson, Emma Jones, Paula Norris, Mrs. H. N. Nuemmaker, Earl B. Peck, Dorcas Sheldon, Leah Timm, Ruth Whitehead.

**LINCOLN SCHOOL**—Fannie M. Perkins, principal; Inez Adams, Ida I. Al-

# Cooperative Farm Movement Topic For Summer Institute

## WORLD LEADERS OF PROGRAM TO MEET FOR FIFTH SESSION

Members of Federal Board May Attend Gathering Devoted to Working-Out of Agriculture's Problems

(By The Associated Press) BATON ROUGE, La., Aug. 1.—A symposium of world thought on the cooperative farm movement virtually will be given when the American Institute of Cooperation holds its fifth summer session on the campus of Louisiana university during August.

The institute is expected to draw leaders from all over the world in the movement of agriculture to help itself through cooperative production and marketing.

In the United States this movement has been accelerated by the appointment of the federal farm board, whose members are expected to attend the general sessions which opened July 20 to continue 10 days.

It will be the first time the South has entertained such an important gathering of leaders in the cooperative movement.

C. C. Teague of Dallas, Texas, is chairman of the institute, and the speakers include J. A. Ward, general manager of the Pacific Cooperative Wool Growers, W. A. Olson, chief of the federal bureau of agricultural economics, and many other prominent figures in agriculture.

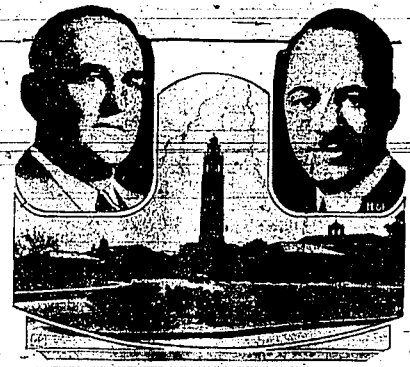

C. C. Teague, Santa Paula, California, president of the California Fruit Growers Exchange and the California Walnut Growers' association, is expected to attend with other members of the farm board. Teague originally was on the program with several others who have withdrawn with their appointment by President Hoover to the board.

While the general sessions last only 10 days, other sessions continue to August 24. The meeting will provide ample time for academic courses and sectional conferences. There also will be special conferences lasting five days each week for teachers of vocational agriculture and non-credit courses in membership relations of cooperatives which will place particular stress upon local problems. The general sessions will close with an automobile tour of Louisiana rice and sugar plantations and a visit to New Orleans.

Previous institutes have enrolled from 370 to 600 persons, including delegates from Canada and nine European countries.

The institute, incorporated under the District of Columbia, is supported solely by voluntary contributions.

Its chief purpose is to collect and make available knowledge concerning the cooperative movement in America and other lands.

The south will entertain world leaders in the cooperative farm movement when the American Institute of Cooperation meets on the campus of Louisiana university during August. C. C. Teague (left), prominent cooperative leader and member of the federal farm board, will attend. J. A. Ward (right) is a speaker.

### Australia Gets Insects To Destroy Prickly Pear

VALDEZ, Texas, Aug. 1 (AP)—Thirty-five cases of insects have been shipped from Valdez to Australia, where they will be liberated in a campaign to destroy the prickly pear.

Australian government investigators have experimented with Texas insects to find those which eat nothing but the prickly pear, grow hot which in Australia covers millions of acres. A beetle-like insect called "Monilema" which has been found particularly effective. R. G. Mundell, in charge of Australian insect investigations here, says several thousand acres have been reclaimed by this method. Similar investigations are being conducted in other sections of Texas, and in Arizona and New Mexico, where the climatic is similar to Australia.

### Champion Pork Raiser Realizes Large Profit

HANOVER, Kas., Aug. 1 (AP)—A 14 per cent return on his capital investment is the record of Kausus' new pork production champion. William C. Mueller gained his title by producing 100 pounds of pork at a cost of \$5.32. For every dollar invested in hogs, on his first raising, \$7.57 was returned in the form of sales or increased inventory.

Mueller's 320-acre farm yielded a 14 per cent return after \$100 a month salary, the customary amount, was deducted for its owner. His investment was \$19,200, and his profits included no sales of grain or hay.

## INCOME TAX PAYMENTS DECLINE IN 20 STATES

WASHINGTON, Aug. 1 (AP)—Twenty states paid less income tax during the fiscal year ending June 30, 1929, than in the previous fiscal year. The treasury department's summary of internal revenue states that the United States collected \$2,937,000,315.53 in taxes during the last fiscal year. Of this amount, \$2,331,109,829.89 represented income taxes. The second district of New York showed the highest increase in income taxes, from \$268,240,919 in the fiscal year, 1928, to \$408,921,985 in the last fiscal year. The third district of New York was next, with an increase of approximately \$27,000,000.

The greatest decrease was recorded in Texas, where income taxes were \$45,850,115 in 1928, compared with \$37,406,829 this year.

The smallest amounts were paid by North Dakota with \$665,134. South Dakota with \$753,815 and New Mexico with \$922,541.

The highest total, both income and miscellaneous taxes, paid by one state came from New York, whose total was \$442,312,765, or more than a quarter of the total for the entire country.

The total for Illinois was \$283,949,311 and for Pennsylvania, \$237,578,472. NEEDS CHEAPER HORMONES. LINCOLN, Neb. (AP)—Sharp cost reductions in certain medicines are expected as the result of a new and cheaper process for obtaining hormones from cows instead of from pigs which is being developed by Professor O. W. Nibbler, of the state agricultural college here.

## INTEREST BRINGING OUT NEGLECTED RAIL STOCK

NEW YORK, Aug. 1 (AP)—Millions of dollars worth of long neglected railroad stocks are being covered from dusty corners by the rising momentum of public interest in the earning ability of the railways.

For a long time the popularity of industrial, utility and lately aviation shares, had cast a cold shadow over the rail list. Recent swift changes in the railroad outlook have caught the public imagination.

The O'Fallon decision, which held out the hope of a higher valuation for railway properties, was followed by a series of remarkable annual reports showing large net increases in revenues obtained by elimination of waste and more efficient management. "The new line of movement toward consolidations, chiefly in the east and southwest, and toward establishing a fifth trunk line in the east, culminating in the plan submitted to the interstate commerce commission by the Wash. ....

The commission approved acquisition by the New York Central of several lines in Michigan for purposes of unification. Finally, recent events have indicated a definite move toward cooperation between certain eastern and western lines for the exchange of traffic in the St. Louis area.

"The reason for this is that the southern buyer has not been willing to pay a premium for certified stock," Newdick said the department will not carry on an intensive campaign to interest growers inasmuch as it is hard to create an interest where the financial gain is extremely doubtful.

## 10-Pound Melons Grow As Massachusetts Crop

LENOX, Mass., Aug. 1 (AP)—Melons famed locally as the finest anywhere in the world are being raised here. They weigh from 8-13 to 10-12 pounds apiece.

The huge melons are raised in greenhouses on an estate here. The vines are trained under the glass. So large are the fruit, that they must be individually supported by nets. The melons are from imported English stock and the seeds are sown so that the fruit is in season from June to January 1. The greenhouses contain 22 different varieties of melon.

## Black Locust Groves Profitable to Farmer

JACKSON, Miss., Aug. 1 (AP)—Black locust groves, often thought useless, can become money makers for the wise farmer, says Edgar S. Wilson, Jackson farmer-columnist.

"Locust fence posts recently sold on the Jackson market for 50 to 60 cents apiece," Wilson reported. "Fifteen years ago I had taken up locust sprouts and thought the fruit in season from June to an innumerable strip on my farm. When I needed fence posts recently found I had needed on that strip, some trees giving me four or five posts. Next to osage orange, locust makes the best of all fence posts, and fence posts are frequently in demand."

The marrying-age-for-men averages 32, women 27.

## Low Prices Restrict Producers of Certified Seed Potatoes in Maine

AUGUSTA, Maine, Aug. 1 (AP)—Unwillingness of southern buyers of seed potatoes to pay the extra amount required for growing certified stock, it is announced here, have made farmers in Maine less interested in certification.

"At the end of a 'distressing' season financially the seed potato grower who enthusiastic about having potatoes certified by the state department," says Erlon L. Newdick, chief of the division of the Maine industry of the state department of agriculture.

"The reason for this is that the southern buyer has not been willing to pay a premium for certified stock," Newdick said the department will not carry on an intensive campaign to interest growers inasmuch as it is hard to create an interest where the financial gain is extremely doubtful.

## Mexican Bean Beetle In South Mississippi

COLUMBUS, Miss., Aug. 1 (AP)—The Mexican bean beetle, regarded by agricultural experts as an extremely dangerous pest, has been found here by state plant board inspectors.

"They say it is the first time the beetle has been found this far south in Mississippi and took immediate steps to state plant board inspectors. The beetle has been common in northern counties of the state for some time and has done considerable damage there."

## Merger Query Irks Business Executive

NEW YORK, Aug. 1 (AP)—The head of a large corporation was asked recently to comment on a specially colorful item in the current crop of merger rumors.

"It was the kind of a rumor that needs such words as 'gigantic' or 'colossal,'" It linked his company with the names of four or five others. "And you might add," he said, "that we expect to take in the United States as soon as we can get around to it."

## Texas Receives Florida Spiny Lobsters for Gulf

Galveston, Texas, Aug. 1 (AP)—Texas is trying to steal some of Florida's thunder in the seafood industry. Seventy-five spiny lobsters have been brought from the waters of the Everglades state by A. G. Adams, government fish culturist. They were distributed along jetties in the Gulf of Mexico here.

Adams predicts there will be 25,000,000 of the lobsters in Galveston's harbor within four years.

## BOY PROFITS ON OLIVE PONA CITY, Okla.

POCA CITY, Okla. (AP)—Ollie Duroy of Ponca City, one of 10 boys in the United States entitled to wear a junior master farmer key, has made a net profit of \$810 from cattle while in high school.

Miss Lydia Kalishuk, Neenah, Wisconsin, conducts aviation schools in nine towns, flying from one to the other.

Bechl pajamas are extremely popular. In Chicago—like ashore.

Tennessee turkey growers are worried by enterohepatitis, a disease known as "blackhead."

Since 1861 the value of houses in London has risen 14,000,000 per annum.

## OIL WELLS IN SOUTHWEST TEXAS BRING BIG RETURN

SAN ANTONIO, Texas, Aug. 1 (AP)—Oil operations in 60 counties of southwest Texas now net an average of \$100 annually to farmers, ranchmen and other land owners.

"This return from once unprofitable land represents payments for oil leases amount to eight figures in recent years (the net return to operators. Scarcely one-third of this sector, which employs 42,000,000 acres, is covered by 7000 oil and gas tests that have been made to date.

Operators predict that this year's production, flowing in from 2600 wells, will exceed the record of 1010, when more than 16,000,000 barrels were produced. Nearly half that much was brought to the surface before May 15 this year. More than half the total number of tests have uncovered oil.

"Discovery of oil at comparatively shallow depths has characterized development of this area, which has jumped in profits to headquarters from a negligible amount to eight figures in recent years. Whereas the world's deepest well approximates 8000 feet, only 227 of 7000 producers in this area have been drilled as 1000 feet. Oil has been found in 2000 wells at 200 feet or less.

## Bankers and Loan Sharks Impose On \$50 Borrower

LANSING, Mich., Aug. 1 (AP)—The borrower is in a tough spot and needs a "broker," thinks Rudolph E. Reicher, state banking commissioner.

Bankers have snubbed him and he has fallen into the hands of loan sharks, says Reicher.

"Bankers have given scant consideration to the person who needs \$50 to \$100," he says, "although these people form the backbone of our country and constitute the mass of our savings deposits."

"We have turned him down because of the cost of handling his loan and have forced him to go to small loan operators who charge 48 per cent a year, which in many cases is all he has and can't earn. The wage class needs a 'deal'."

## Hollywood Films Most Popular With British

WASHINGTON, Aug. 1 (AP)—The moving picture exports from the United States to 60 countries of the world during April totaled 17,980, 253 feet of positive films.

The department of commerce states that almost 5,000,000 feet of this amount went to the United Kingdom, Canada and Australia.

Of the exports to British India and other British territories are included, the figure reaches almost 6,000,000 feet with British dominions leading the world in purchasing American films.

# Dr. Claudius Dornier Produces 100-Passenger "Flying Hotel"

## 12 MOTORS FURNISH POWER ON LARGEST AIRPLANE IN WORLD

### Craft Can Travel at Rate of 118 Miles Per Hour; Keel-Shaped Body Makes For Safety On Rough Sea

(By The Associated Press)

ALZENHEIN, Switzerland, Aug. 1.—Those who have been privileged to inspect the DO X, the latest product of the brain of Dr. Claudius Dornier, have come away with the impression that here at least is the airship of Jules Verne's dreams, the "Flying Hotel."

The DO X is a metal-built flying boat, larger than the Graf Zeppelin, and three and one-half times as large as the Dornier Superwal with which Major Franke recently attempted to fly from Spain to the United States. It has three decks and accommodates 100 passengers easily. At a pinch, it might hold 150.

**World's Largest Airplane**

In fact, it is the largest airplane in the world. It has a wing spread of 194 feet, and on the water it "drives" 4 feet, so that the propellers are 31 feet above the surface.

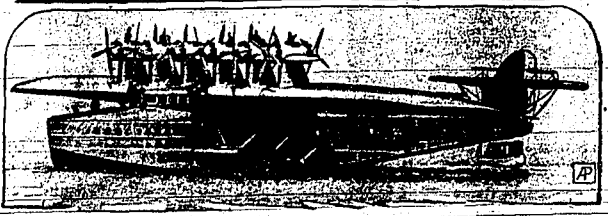

Twelve air-cooled Siemens-Jupiter motors, arranged in tandem fashion—on the upper surface of the wings, six in front and six behind, develop 5200 horse power insuring a traveling speed of 118 miles an hour, with a top speed of 150 miles at a flying radius of 1800 miles.

A unique feature is that the 12 motors run independently of one another, and progress is not in the least impeded, should three, or even four, fall out of action. Across the body is laid a little trackway for a running board on which engineers, living machines, are quickly conveyed to shafts leading to each of the motors.

On the lower deck, 4000 gallons of benzine, 1500 kilos of oil, ballast, provisions, spares and tools are stored. This disposition of the fuel, away from the motors, is said to reduce danger of fire to a minimum.

**Cooking by Electricity**

The middle deck, 67 feet long, consists of a saloon with sleeping cabins, pro-

The mammoth size of the huge German airplane DO X (below) is illustrated by the man standing beneath one of the 12 motors. Dr. Claudius Dornier (inset) designed the machine.

visionally for 40 passengers, on both sides. Forward is a baggage compartment, while the cook's galley—all cooking is done by electricity—and the lavatories are aft.

Navigating officers and crew are housed on the upper deck, where is also the chart room, engine room and radio cabin.

The crew comprises a captain, two wireless operators, a navigation officer, four mechanics, a cook and a steward, 12 in all.

Contrasting with the flat-bottomed Dornier-Wal type, the DO X has a keel-shaped body which makes for safety on a rough sea. It has watertight bulkheads like a ship.

The DO X, for which a better-sounding name presently will be found, also has a 4 horse power motor on board to generate current for the setting in mo-

tion of the engines and for the pumping, lighting and radio plants.

**Not For Atlantic Flight**

Despite all these advantages, Dr. Dornier made it clear that this new flying boat was not constructed to cross the Atlantic. His purpose in building it, he said, was to transport, with absolute safety 15 tons of cargo, 500 passengers with their baggage, and reserve fuel over short distances of about 500 miles.

Transportation by air, he added, had not hitherto been a paying proposition but he intended to make it so. Two water filters already are under construction for Italian account. They weigh 25 tons each, or with crew and cargo, about 51 tons.

One cubic foot of marble weighs 162 pounds.

## New England Sees Growth In Industrial Aviation

BOSTON, Aug. 1 (AP)—Aviation is an industry of growing significance to New England, according to a survey by the New England council.

In one year the number of manufacturers who are making, or have announced plans to build complete airplanes has increased from one to 10. Paris, supplies or accessories now are being produced by 175 manufacturers for the aeronautical trades.

New England has a total of 70 landing fields and airports, and in addition, 83 more are proposed. Besides air mail and passenger lines between Boston and New York there are in operation 16 service operators, providing taxi, night-sewing and delivery service.

## Output of Alcohol Grows in Australia

BRISBANE, Australia, Aug. 1 (AP)—The production of power alcohol as a by-product of the Queensland sugar industry is being developed rapidly.

The installation of an improved plant is expected soon to increase the quantity. And quality of the product.

Leading representatives of the sugar industry conferred some four years ago with the agents of the Distillers' company of Edinburgh and London. They formed the Australian National Power Alcohol company, which was floated with a nominal capital of almost \$5,000,000.

It was controlled by the Australian board and supported by the financial and technical resources of the British distilling interests.

They erected their first distillery at Sarina, near Mackay, which produces approximately 1,000,000 gallons of power alcohol yearly.

Far-reaching results, having a profound influence not merely on the economies of the Queensland sugar industry, but on Australian secondary industries in general, are expected as the industry develops.

Meanwhile the industry is consolidating its ground work and concentrating on the perfection of its primary and essential manufacture, alcohol fuel.

## Los Angeles Styles Aid Wild Horse Slaughter

PHOENIX, Ariz., Aug. 1 (AP)—Although more than 8000 wild horses were slaughtered within the year, the Arizona Industrial Congress estimates there are nearly a half million still at large in the state.

The feed the animals consume is needed for cattle and sheep. It is claimed that two horses eat as much as three cows and their calves.

The wild horses are used primarily in the manufacture of poultry scrap in the manufacture of poultry scrap. Inquiries have been received for horse manure for fertilizer from Los Angeles, where they are made into ladies' coats.

Fifteen thousand head will be put through the reduction works this year. It requires 50 pounds of tallow candles to produce as much light as 1000 cubic feet of gas.

The first printing press was brought to the United States from Amsterdam in 1639.

## South Americans Favor United States Products

BOSTON, Aug. 1 (AP)—South America continues its phenomenal expansion as a market for products of the United States but still buys only one-third as much as the British empire.

Banking and official figures indicate that exports to South American countries are running 20 per cent ahead of last year and will form approximately a tenth of the total for the year.

Meanwhile, two-fifths of all United States exports are flowing to various parts of the British Empire.

Canada, England, Scotland and Ireland alone account for a third of the total during January, February and March. Bankers consider it a noteworthy fact that anxious discussions of proposed changes in the United States tariff schedules, which have featured in recent years and politics of the past few months, have not checked the flood exports.

Exports, from abroad, particularly South America, are coming in great volume than last year but not sufficient to neutralize the rise in exports.

The excess of exports last year amounted to \$1,100,000,000 and estimate based on figures for the first quarter, 1929, indicate that the excess may reach \$1,500,000,000 this year.

Sweden and Norway export 20,000 tons of wooden matches yearly.

The hotels of Switzerland in 1929 were 1000 in number.

According to Dr. Petros there are 500,000 lightning conductors in the United Kingdom.

# Daring Naval Aviator Risks Life Making Tests of New Device

## LIEUTENANT HARPER EXPERIMENTS WITH BUCKING NAVY PLANE

### Slotted Wing Causes Ship to Act in Queer Manner; Pilot Loses Control of Vision in Downward Spin

By ALLEN QUINN (Associated Press Aviation Editor)  
 WASHINGTON, Aug. 1.—Flying airplanes which rear upward like a bucking broncho and spin downward so rapidly that the pilot loses control of his vision is all in a day's work for Lieutenant Carl B. Harper, who is experimenting with the slotted wing for the navy.

Planes almost jump off the ground for the naval officer when he rears the slots on take-off. With the tail skid on the ground, the slotted wing-plane will rear upwards so quickly and at such a sharp angle that the aviator is actually flung into the air.

Airplanes almost jump off the ground for Lieutenant Carl B. Harper, who is experimenting with slotted wings for the navy. The photographs taken with a movie camera, show Lieutenant Harper taking off in a slotted wing fighting plane. The picture covers a period of 45 seconds.

**Sharp Angles**  
 Average wings lose their lift at some angle between 15 and 18 degrees, but Lieutenant Harper flies at angles twice as great. The explanation is that the wing slot, on the leading edge, permits a smooth wing at high angles, whereas the flow is turbulent over the unslotted wing.

This device to prevent stalling and possible tail spins when the plane is being climbed steeply.

Naval aviators experts regard the slotted wing as the only present practical method of preventing and checking tail spins in military planes, but there still is much work to be done on the device before it will be put into general use on naval service planes.

**Experiments Two Years**  
 Lieutenant Harper has carried on his experiments for nearly two years and now is on his second trip to England to study the Handley-Page slot.

The Handley-Page automatic slot, used on many of the British military and commercial planes, first was used in the navy's experiments, but met the objection that its "automatic" action would stop the plane from being modified by the navy experts so it could be opened and closed at the will of the pilot.

Lieutenant Harper has come to the conclusion that the air-laboratory is a better place for the study of the slot. In a flying plane in which his eyes began to oscillate and the plane would stop in a spin around several seconds after the pilot had been brought to normal flying position.

The sun turned dark, then lemon-colored, then gray, Lieutenant Harper said. The centrifugal force generated by the long spin, he said, made it almost impossible for him to lift his arm to release the wing slot lever.

## Equilibrium Experiments On Birds Aid to Aviators

CHICAGO, Aug. 1 (AP)—Birds will reveal valuable flying secrets to aviators, thinks Professor Franklin Nearing, psychologist at Northwestern university. He has been studying equilibrium of pigeons for two years.

Before the war it was thought one's sense of balance was determined by the semi-circular canals in the inner ears, he says. "Extensive study has shown other factors, such as muscle tension, are as important."

He has destroyed the bones of the canal in pigeons and then studied their behavior. As they tried to fly or stand, they seemed normal in manner, although the bones were not regrown.

It may be possible to remedy cases of poor sense of equilibrium in prospective aviators by "studying pigeons," he thinks, "because facts which apply to birds apply to man."

## Goebel Building Plane To Break Hawk's Record

WICHITA, Kas., Aug. 1 (AP)—A monoplane to have a speed of 175 miles an hour is being built, in secrecy here by Colonel Arthur Goebel, proposed assistant on Captain Frank Hawk's new non-stop transcontinental flight record.

The plane will add 15 to 20 miles an hour to the plane's speed, his manufacturers say. A 400-horsepower motor will be used. Huge gasoline tanks providing fuel for 3000 miles of flying are included in specifications for the plane.

## Laboring Man Business' Biggest Customer and Purchasing Power Must Continue, Declares Babson

### Commerce Has Vital Interest, Entirely Aside From Humanitarian or Sentimental Reasons, in Keeping As Many People At Work As Possible, Avers Noted Bay State Statistician

(By Roger W. Babson)  
 BABSON PARK, Mass., Aug. 1.—When man first used a plow in place of a mired sickle and hitched it to an ox instead of to a woman he was able to produce as much goods as before with less work. All industrial history shows that most of man's progress is the result of using devices to save his own labor. Moreover, some of the greatest progress in this way is yet to come. Any one who opposes the increasing use of labor-saving machines is merely shouting at the wind. Organized labor long since ceased trying to stop the introduction and is now bending every effort to securing a larger share of the increased profits resulting from machine methods.

Business has a vital interest, entirely aside from humanitarian or sentimental reasons, in keeping as many people at work as possible. Business men, now realize that the working man constitutes 85 per cent of the market for their goods. Anything that endangers labor's purchasing power endangers business. In the early days labor constituted only a small part of the market. Workers were on a bare subsistence wage, and the aristocracy bought most of the goods produced. However, a millionaire can not wear 10,000 pairs of pants, but 10,000 workmen can if they have the money to buy them. One man may own one or two automobiles, but 100,000 workmen can use 100,000 automobiles. Therefore, the secret of our expanding markets. When business leaders discovered that the only outlet for the tremendously increased production of machinery lay in the consumer market, they discovered that workers they saw the value of maintaining high wages and high buying power.

Yet the very machine methods which have made the United States the wealthiest nation in the world with the best standard of living, with the most material conveniences, now threaten to undermine that prosperity.

**Various Solutions Offered**  
 If modern industrial methods are to be maintained, we must reduce their purchasing power what can be done about it? Certainly we cannot, and ought not to try to stop the use of labor saving machines. Probably there is no one solution to this problem. Certain conscious efforts can, however, be made by business men to help the situation.

(1) New industries should be encouraged. Had it not been for the growth of certain industries like the automobile, the radio, the motor car, the electric refrigerator, oil heaters, cars, filling stations, and others which have helped to take up the slack which were relieved from other industries, machinery, we should have had an employment crisis of drastic proportions long ago. Such new industries, must, and undoubtedly will continue to be developed. Business should regard them

as competitors, but as new sources of buying power.

(2) We need more adult education, night schools, intelligent employment agencies, and other vocational guidance organization. A man who has been trained all his life in a steel plant cannot instantly become a successful life insurance salesman, or operate a corner grocery store. A soft coal miner needs training before he is worth much as an electrician for a telephone company. Moreover, the habits of a life-time are not easily changed. So, the facilities for placing the "machine-made" unemployed in other jobs is totally inadequate to the problem. As a result such men drift into the first job presented to them regardless of whether or not they are fitted for it by ability or temperament. Also they accept, if they are older men, whatever wages they can get.

(3) Another way business men can maintain purchasing power is to keep their employees as long as they are physically able to perform their duties, regardless of their age. There is a senseless waste of man-power going on today through the "firing at 50" practice. Added to the displacement of workers by machinery there is the tendency of en-

terprises to employ a younger man and let those above 50 go. This is not only unjust but uneconomical. Business should remember that every man employed when he reaches 50 stands a good chance of becoming permanently unemployed. Thus business loses the buying power of one customer for every man released. Henry Ford says that he prefers men between 25 and 50. The records of his employment departments show that the work which calls for endurance is best performed by men who are over 40. The younger men are restless and want to be transferred to other work.

**The Five-Day Week**  
 Whether or not the five-day week would help cure unemployment is a much disputed question. Labor leaders believe that it would if generally adopted. If, however, the five-day week means speeding up the work during five days in order that production may be equal to five and a half or six days, then only the most efficient workers could stand the pace. Hence, the slower or less efficient men would drop out, thereby increasing, rather than diminishing, unemployment. Labor's idea is not to speed up all production, but to make jobs for more men. In this way they claim general purchasing power would be increased. A few industries such as, the building trades, Henry Ford and the General Electric company (during the summer months) are already operating on a five-day schedule.

A recent survey conducted by the United Business Service, Boston, among prominent manufacturers showed that two-thirds were favorable to the five-day week in principle. A number of them stressed the point that to order to be practical it would have to be illegal to work on Saturday, as it is on Sunday, so that all competitors would be on the same footing. Moreover, there is a wide variation in the adaptability of industries to the five-day week. Some are now using it in the summer months through the "firing at 50" practice. Others are not sufficiently mechanized to make it practical. Others par-

## Plane Service Lets Reno Divorce Colonists Leave

RENO, Nev., Aug. 1 (AP)—The airplane is proving a boon to Reno's divorce colony.

With travel restricted by the Nevada divorce laws, which provide that an absence of more than 24 hours from the state breaks the continuous residence provision, many persons take advantage of night air passenger service to shop in San Francisco.

Officials of the Boeing Air Transport company of the Bay Area, Reno-Salt Lake City line, report that the great majority of passengers from Reno are those making residence there for the purpose of obtaining divorce.

Passengers from Reno may board a large 18-passenger plane about 7 A. M. arrive in San Francisco early in the morning for a day of shopping, then leave at 8 P. M. and be back in Reno before midnight.

## Share in Endurance Triumph

Associated Press Photo  
 P. V. CHAFFEE (left) and Major Ray Wassall, who piloted the fueling plane which fed gasoline and supplies to the St. Louis Robin, in which Pilots Dale Jackson and Forrest O'Brine set a new endurance record.

## New Aviation Rules Aid to Rhode Island

PROVIDENCE, R. I., Aug. 1 (AP)—The appointment of a state air commissioner, and a measure applying the regulations of the United States department of commerce to flying in Rhode Island, have given added momentum to aviation in this state.

The appointment of the commission was a result of the approval by the people of a referendum last election day appropriating \$250,000 for a suitable airport in Rhode Island.

Establishment of a landing field at Gaspee point, on Narragansett bay, said to be a logical site owing to its proximity to the city of Providence, is under consideration, as is the What Cheer field in Pawtucket. The latter field is under lease, however, for three years to the Curtiss Flying service.

Rhode Island is included in an extensive air line passenger service program for "New England" by the Curtiss organization. It is said that Pawtucket, Hartford, Springfield and Worcester will be included in one link.

An "airline" called "Albatross" from Pawtucket or Newport to Block Island is another contemplated service, while others include lines between Nantucket and Newport, Newport and New York, via Southampton and Montauk, and

## Pawtucket to Hyannis on Cape Cod. The Curtiss company also has made known plans to establish a seaplane base on the municipal pier in Newport and a transport-pilot school for students of 100 hours or more, probably at Pawtucket.

Another company, Rhode Island Airways, Inc., has announced plans to begin an air service between Providence, Block Island, Montauk Point on Long Island, and New London, Connecticut.

## Netherlands and Indies Plan for Weekly Air Line

WASHINGTON, Aug. 1 (AP)—Regular weekly air service between the Netherlands and the Dutch East Indies is proposed in a bill now before the Netherlands parliament. Jesse F. Van Wickel, commercial attaché of the Hague, reports to the department of commerce.

It is planned to inaugurate the service in September, 1931. Because of the difficulty of obtaining private capital the Netherlands government is expected to take more stock in the Dutch Royal Airlines, the K. M. L., to defray the early expenses of the service.

Ten jet-motored Fokker planes will be needed for weekly service over the route, which is to be covered in 10 days of 19 flying hours each.

DUKE FORCES ACTIVE ON FIRST OF MONTH Faction Confines Drive to Utilities and Major Industrial Stock Issues

MARKETS AT A GLANCE

NEW YORK, Aug. 1 (AP)—Stocks: Strong. United States Steel bonds: Strong. Latin Nitrate: Good. Irregular. Latin Nitrate: Good. Irregular. Electric: Investor. Common: Steady.

CHICAGO: Wheat: Firm; black rust reports from Montana; steady to weak. Corn: Steady; firm cash markets. Cotton: Higher.

By CLAUDE A. JACOB (Associated Press Financial Writer) NEW YORK, Aug. 1.—The stock market entered its fourth day in full swing in the week of the first of the month.

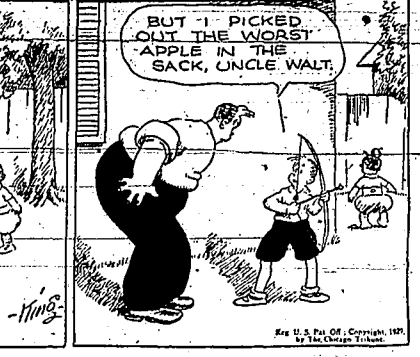

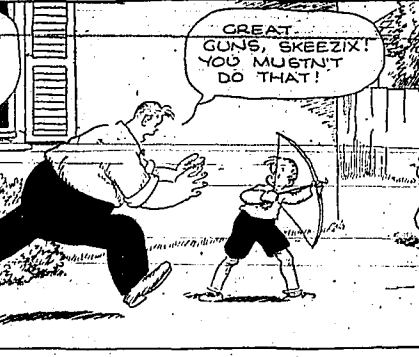

The stock market money situation was the chief factor in the market's behavior. Reports that the calling of the loan for \$100,000,000 for the first time in the New York call loan market has been reported by the market, and a rather precariously state of affairs.

Reduces Holdings: The condition statement of the Bank of England, furthermore, showed that the loss of gold had reduced the bank's reserves and holdings of gold to 1,000,000,000 pounds, and many bankers were inclined to believe that an increase in the discount rate can now be only a matter of time.

United States Steel: One of the most notable weak spots was United States Steel, which sold off 100 points to a low for the year in the last few days of the month.

TWIN FALLS MARKETS These prices are obtained daily at 4 o'clock in the afternoon and are for the Twin Falls area.

CROP-GROWTH GOOD IN SOUTHERN IDAHO Government Summary Indicates Excellent Conditions on Irrigated Lands

BOISE, Aug. 1. (Special to The News)—Crop growth on irrigated lands of southern Idaho were excellent during the week ending July 30, declares the United States weather bureau's summary issued by Clinton E. Norquist, meteorologist.

APPLES

We will buy your apples for cash and make liberal advances now. Highest market prices. Will sell you the famous Aber-Tub-Bushel-Basket and deliver to your station in car lots at \$2.10 per dozen.

WENELED—Hot days and cool nights; all crops advancing rapidly; most of the barley and some wheat cut; corn, beans, and onions looking very good; most apples, particularly cherries, good.

GOODING—Farming activities at a standstill due to no water; one good crop of hay has been cut and a small second cutting is expected; some barley and a small amount of wheat will be harvested, although it will be of poor quality; there will be few potatoes.

WENTWORTH—Weather very hot; irrigation water all gone; fields and pastures all drying up; there will be no second cutting of alfalfa and very little, if any, grain; quite a lot of grain being cut for hay.

WENTWORTH—Hot days and cool nights; all crops advancing rapidly; most of the barley and some wheat cut; corn, beans, and onions looking very good; most apples, particularly cherries, good.

### FLAMES DAMAGE NEW BURL HIGHWAY TRUCK

#### Department Extinguishes Blaze With Chemicals, Holding Loss to \$25

TWIN FALLS, Aug. 1—Fire of considerable magnitude, slightly damaged a new gravel truck owned by the Burl Highway district at the highway garage on Eleventh avenue at 5:30 P. M. Wednesday. The blaze was extinguished by chemical used by the Burl fire department and extent of the damage was estimated at \$25.

Miss Ida Non, daughter of Mr. and Mrs. Oscar Non, became the bride at noon Wednesday of Alfred Kramer, Burl, at the home of her parents, southeast of Burl. The bride was charmingly gowned in coral pink georgette and carried an arm bouquet of pink roses and fern. Miss Hildegard Kramer, Schuyler, Nebraska, sister of the groom was bridesmaid and wore yellow georgette and a corsage of pastel sweet peas. The young couple stood in front of the fire truck which was decorated with flowers and the ceremony was performed by Rev. Dannenfelz, pastor of the Lutheran church of Clover in the city.

The bride and groom were followed by a large party of guests to the home of the bride's parents where a large table covered with pink and white wedding cake and low bowls of sweet peas. Mr. and Mrs. Kramer left at once by motor for Salt Lake City and their return will be about that of the groom's ranch south of Burl.

Mrs. Kramer was a graduate of the Burl high school with the class of 1926 and is attending Idaho normal school and for the past two years teaching at Willowdale school near Burl. Mr. Kramer who formerly lived in Schuyler, Nebraska, farmed near here for the past two years.

Mr. and Mrs. C. H. Kregel, announce the marriage of their daughter, Blanche, to Edward Owens, Burl, on July 3 at Boise. Mrs. Owens has lived in Burl for a number of years and was a graduate of the Burl high school. They will make their home on a ranch near Jerome.

Miss Barbara Rugg has returned from a vacation spent in San Francisco. She was accompanied by Miss Marguerite Finch, Twin Falls.

Burl was chosen as the next place of meeting for the next session of the South Central Idaho Editorial association, September 14, at the recent meeting held at Halley at which A. W. McCullum, Burl, secretary of the state Editorial association was present. O. L. Casswell, managing director of the Iowa newspaper association was the principal speaker at the Halley meeting.

Two real estate transactions were reported in Burl Thursday. Dr. E. L. Berry purchased the residence and acre tract on the state highway at Burl corner owned by G. S. Peck and will take possession Monday.

Mr. Peck plans for the future are indefinite. The purchase price was not made public. Dr. J. O. Yenter, bought the seven-room modern residence, formerly owned by E. E. Beaman on Ninth avenue for \$6000 cash. Mr. and Mrs. Beaman plan to reside on their ranch near Burl during the summer months and in California during the winter.

Marble is 5 per cent lighter than granite.

### Amsterdam Women Off On Trip to Pocatello

AMSTERDAM, Aug. 1—Mrs. J. R. Vandenburg and Miss Julia Kunkel left by motor on Wednesday for Pocatello. On their return trip they will visit in American Falls and Burley.

Mr. and Mrs. G. E. Cocconour, Miss Lillian Cocconour, C. H. Cocconour and Mr. and Mrs. Ed Davis with their families were guests at the home of Mr. and Mrs. Alex Beaton, Three Creek, Sunday.

Miss Jesta Kunkel is now able to sit up and to walk a little, following injuries received July 18 when struck by a truck in Twin Falls.

Janet, Bob, Twin Falls, is spending this week with her cousins, Janet and Tiny Pastoor.

Rev. and Mrs. John K. Walpole, Rogerson, were guests Monday evening of Miss Jesta Kunkel.

### Application of Oil On Road at Burley Begins

BURLEY, Aug. 1—Application of an oil coating to act as a dust palliative has started on the state highway and Old Oregon Trail west of Burley. Five cars of oil are now on the track here to be used for this purpose, each car holding about 12,500 gallons.

Crews will cover from four to five miles each day, distributing about half as much oil as is spilled for permanent oiling. The treatment will be continued along the gravelled highway to meet the completed road at American Falls.

### WOOL GROWERS RECEIVE PROGRAM AND CATALOGUE

BURLEY, Aug. 1—All sheep growers in Idaho are having mailed to them the catalog and program of the eighth annual ram sale conducted by the Idaho Wool Growers' association, to be held in Piler, August 7.

There are 733 yearling range rams entered for the big auction, 30 ram lambs and 18 studs, as well as 25 registered Hampshire ewes. These sheep were grown by about 40 Idaho breeders. Colonel E. O. Walters and Dean Sullivan have been appointed auctioneers, to be assisted by Dr. S. W. McClure. Officials of the association are preparing for the biggest crowd thus far to attend the sale.

### "Bellamy Trial" Thrills To End at Idaho Theatre

Murder will out!

But you will have to wait until the very last feature of "The Bellamy Trial" is playing at the Idaho theatre today and tomorrow only as a Metro-Goldwyn-Mayer feature, before you learn who killed Miss Bellamy.

And when you find out, after witnessing one of the greatest surprise endings ever filmed, don't rush home and tell all your friends—they have the same thrill you did when you saw the picture!

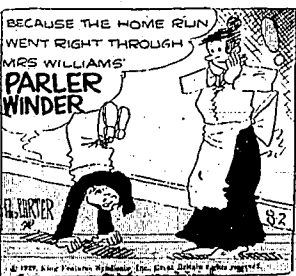

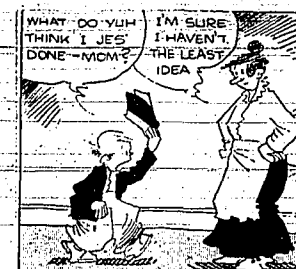

Monta Bell, who directed the mystery drama triumph, wrote the screen adaptation from the sensational magazine mystery serial from the pen of Frances Noyes Hart. His novel opening of the feature film is well merited by the powerful surprise ending. Certainly he has not allowed the suspense element to suffer in its transition to the screen.

In the remarkable climax with Miss Joy and George Barraud, are Betty Bronson, Kenneth Thompson, Margaret Livingston, Edward Nugent, Margaret Sedon, Charles B. Middleton, Charles Hill Hattles, and others.

William Boyd and Diane Ellis in the Pathe picture, "The Leatherneck," feature production now at the Orpheum theatre.

A single pair of rabbits can become multiplied in four years into 1,250,000.

In 1888, the Roman Catholics in the United States possessed 7421 churches.

### VAUDEVILLE PERFORMERS IN ACCIDENT AT BURLEY

BURLEY, Aug. 1—Four vaudeville performers driving a car with an Ohio license coming into contact with the car driven by a local farmer, Wednesday caused considerable excitement for a time on the streets of Burley. The farmer was performing a U turn at an intersection. The actors were heading along in a northerly direction. Then came the crash, followed by verbal flurries that threatened to develop into a fight.

Police Chief Sterling Clark escorted the Ohio men to the court of Probate Judge E. M. Wright where one of them, John Doe Howe, paid a fine of \$150 in the "mean time" the dry farmer paid a bill at a local garage for having his fender-ironed into normal shape.

### Vacation Camp at Guyer Hot Springs Successful

RUPERT, Aug. 1 (Special to The News)—The third annual woman's vacation camp which was held at Guyer's Hot Springs, last week, was a success in every way, it is stated by Miss Nora Yarbrough, district home demonstration agent of the extension department of the University of Idaho.

There was a total registration of 103 women of whom the following six were from Twin Falls county: Mrs. A. J. Green and Mrs. L. P. Presler, Twin Falls; Mrs. B. P. Buffington, Mrs. Adolph Macheck and Miss Helen Brackett, Burl; and Mrs. C. J. Schroeder, Piler. There were three Twin Falls county people on the program; Dr. D. M. Cowgill, Twin Falls, who spoke on "Food Habits and Health"; Mrs. C. J. Schroeder, Piler, who spoke on the subject, "Why We Are Here"; and Mrs. B. P. Buffington, Burl, who participated in a pageant.

In the seventeenth century the maintenance of a noble family cost £600 per annum.

### DIXON MAN ESCAPES INJURY BY BURNING

#### Laurence Martin Plunges Into Irrigation Ditch to Quench Fire in Clothing

DIXON, Aug. 1—Laurence Martin who is working for Tom O'Brien, had a narrow escape from being badly burned last week when the patient dived into a container which formerly held weed poisoning was exploded by the striking of a match, enveloping Mr. Martin in the flames thus catching his clothes on fire. Running to a nearby irrigation ditch he plunged in and was not seriously burned, although his overalls below the knees were burned off. The flames also enveloped the wagon on which the poison had been hauled, and was not extinguished until the horses were not frightened. Later a neighbor, Jack Craig, borrowed this wagon to haul grain and in scraping the bottom of the box caused friction which enveloped it in flames again. It is evident that an unusual amount of caution is necessary in handling this poison.

Mr. and Mrs. Ross Seely motored to Twin Falls Monday on a business trip. Clifton Potter was a guest of friends in Twin Falls Tuesday evening. C. E. Dowdell of the Bean Growers' association was on a tour of inspection of the certified bean fields in this vicinity Monday and was very well impressed with the prospects for a record yield. Very little disease is showing up and the prospects are for a record yield. Mr. and Mrs. C. L. Smith and son and daughter of Twin Falls, were guests Sunday of Mr. and Mrs. R. C. Cochran and family.

Perry Williams, who recently returned from Phoenix, Arizona, is here this week working over his thrashing machine, in order to make an early start on the grain.

Ray Looney, who is farming the W. W. Nickolson farm, selected at random a hill of potatoes from his certified field and produced 16 well-developed potatoes. Mr. Looney is an experienced potato grower formerly living near Twin Falls, and is enthusiastic about the potato prospects.

In Italy and northern Africa, crickets are captured and kept for their song and for luck.

Locusts are bought and sold as food in parts of Africa, Arabia, and Persia.

Bed bugs were mentioned in Roman documents.
