NORTHERN IDAHO'S REPUBLICANS UNITE AT MOSCOW CAUCUS

Grand Old Party Members Serve Notice on South- erners of Intention to Fill Larger Number of Offices

(By The Associated Press)
MOSCOW, Idaho, Feb. 8.—North Idaho Republicans, outwardly peaceful for some time, went on the warpath today and served notice on members of the party in southern Idaho that they intended to share in a larger number of state offices.

At a meeting called by E. R. Whita, Coeur d'Alene, this afternoon, the "Northern" caucus formed two years ago at Kellogg, was revived and the North's 65 convention delegates were united in a bloc to be used to further this section's demands for greater recognition.

The meeting did little more than vote for unity and candidates were given little mention, although an undercurrent going through the group was to make sure that North Idaho would demand either the governorship, state chairmanship or national committee offices, while the North has been given a role for many years.

Whita, however, did not advance specifically a list of candidates, the names of Byron DeLoach, Lewis, and C. E. Hillyer, St. Maries, for governor, and Whita for state chairmanship, were strongly toward DeLoach for the governorship, but the opinion of the group was that action should await the Lincoln day banquet at Boise on February 14 at which it is customary to declare the party's probable candidate for state positions.

25 Men Attend

Fifty-nine men, representing eight of the 10 North Idaho counties, attended the meeting, representing county chairmen, legislators, state committee members and other party leaders. Talk was pointed and a resolution that northern Republicans vote as a bloc upon whatever candidates received the northern vote was passed, without a dissenting vote.

105 CHICKENS PERISH WHEN STILL EXPLODES

PORTLAND, Feb. 8 (AP)—A chicken fire, exploding 100 pounds of dynamite, killed 105 chickens and destroyed a 300-gallon still, according to a large poultry house on the farm.

The still was discovered by firemen called to extinguish the blaze. The still followed the blast.

IDAHO WHEAT GROWERS PLAN CURTAILMENT

GENESSEE, Idaho, Feb. 8 (AP)—The Genessee Farmers' Union, which controls 1,000,000 bushels of wheat, has decided to curtail production for the year ending in 1930. It was made known today.

The organization is believed to be the first in the country to follow the suggestion of the federal farm board that less grain be planted, to make sure that over-production will not occur.

LEMHI COUNTY CITIZENS APPROVE ROAD PROGRAM

ROISE, Feb. 8 (AP)—Residents from Lemhi county today called on Governor H. C. Baldridge to assure him that their county was in support of the "approved" highway program and challenged the accuracy of a report given out by Idaho Falls Chamber of Commerce officials that all eastern Idaho was opposed to the program. Those saying the call were Lemhi county residents, E. W. Bellamy and W. W. Simmons, and Ralph Irwin, Salmon City.

Merritt declared the delegates to the recent highway meeting in Idaho Falls were "swayed under by a prepared opposition" and were not allowed to vote their support of the program.

He claimed at least half of the population of the upper valley river country favored the program.

GUARDS WOUND CONVICT IN UTAH STATE PRISON

SALT LAKE CITY, Feb. 8 (AP)—A convict in the Utah state prison, was wounded in an attempted escape to freedom at the state penitentiary, near Salt Lake City, today.

MEXICO CITY PRESS INVITES FOREIGNERS TO JOIN IN PARADE

MEXICO CITY, Feb. 8 (AP)—All the citizens of Mexico City and foreigners as well have been invited by the local press to participate in a great parade—parade night—on Tuesday night in the center of the city on Tuesday night as a protest against the attempted assassination of President Carrillo Rubio last Wednesday.

A committee comprised of representatives from different social classes and occupations inserted an announcement in the newspapers. The authorities arrested four Communists tonight in their investigation of the assassination attempt.

The president's doctors reported that his condition was satisfactory.

SWINDLER GOES TO IDAHO PENITENTIARY

Judge Predicts Deportation Of Former Nez Perce Bank- er at End of Prison Term

LEWISTON, Idaho, Feb. 8 (AP)—Eugene Weins, who pleaded guilty to forgery in connection with the wrecking of the United States Bank, Nez Perce, was sent to the penitentiary today with the assurance of Judge Miller, B. Johnson that action to deport him to Germany would be taken as soon as his complete 10-14-year sentence.

After pronouncing the sentence, Judge Johnson denounced Weins as a "thief" to this country, and concluded: "You failed to develop a single streak of honesty in your whole makeup, and you destroyed it. You are the best of the best in Idaho and the little community in which you were a banker. That community maintained itself only because of the wonderful courage of its people."

Weins was recognized by a tourist in Fort Worth, Texas, after having eluded the law for nine years. In 1921 he escaped from an arresting officer after being taken for identification of \$10,000 from the bank. When returned to Nez Perce he waited a hearing and said he wished to serve his sentence.

ICE DAMAGE MOUNTS ON LOWER COLUMBIA

PORTLAND, Feb. 8 (AP)—Damage to navigation aids in the Columbia river district from the recent ice probably will reach as high as \$100,000, R. D. Tinkham, superintendent of the Federal Navigation District, declared today. Several light structures on the lower Columbia have been damaged.

COLORADO HURDLES HALTS RAIL TRAFFIC

GRAND JUNCTION, Colo., Feb. 8 (AP)—A mud slide on the main line of the Denver and Rio Grande Western halted traffic from Grand Junction, Colorado, today. Passengers and crew were transferred at the Grand Junction station. Officials announced, adding the track would be cleared and regular scheduled service resumed.

BOURBONS' LEADER ADVISES GOVERNOR

E. M. Holden Urges Executive to Name Non-Political Committee on Road Plans

BOISE, Feb. 8 (AP)—E. M. Holden, Democratic state chairman, proposed a circular letter be delivered here today to Governor H. C. Baldridge, urging him to name a non-political committee to study the highway program and challenge the accuracy of a report given out by Idaho Falls Chamber of Commerce officials that all eastern Idaho was opposed to the program.

Those saying the call were Lemhi county residents, E. W. Bellamy and W. W. Simmons, and Ralph Irwin, Salmon City. Merritt declared the delegates to the recent highway meeting in Idaho Falls were "swayed under by a prepared opposition" and were not allowed to vote their support of the program.

He claimed at least half of the population of the upper valley river country favored the program.

BOARD OF INQUIRY PROBES CAUSE OF UTAH MINE BLAST

Death Toll in Catastrophe Mounts to 20 When Search- ing Parties Recover Three More Bodies of Victims

(By The Associated Press)
SALT LAKE CITY, Feb. 8.—A board of inquiry was prepared tonight to launch an extensive investigation into the explosion in the Standard Coal company's mine at Standardville, Utah, which cost the lives of 20 men and injury to another.

The body of Tohe Wimber was found by searching parties tonight and the board at once moved to begin its work. Bodies of two other men, C. H. Brady and Frank Jones, were recovered earlier in the day, and tonight the explosion and gas victims numbered 20. Three others, all miners, were recovered earlier in the day, and tonight the explosion and gas victims numbered 20. Three others, all miners, were recovered earlier in the day, and tonight the explosion and gas victims numbered 20.

Called before O. F. McShane of the state industrial commission today, during a preliminary investigation, J. F. Freeman, general manager, A. J. Dougherty and C. M. Jones, who were on duty near the mine, described their experiences while fighting for their lives in the mine.

Testimony important to the board of inquiry in its investigation. McShane and Dougherty told of fleeing toward the main entrance of the mine immediately after the explosion and their narrow escape from the gas which filled the tunnel. Dougherty and Pritchett were members of a group of five who barricaded themselves in an inner compartment and by closing all entrances with canvas mauls kept out the poisonous gas until rescue workers arrived.

The bodies of Brady and Jones, who were recovered today, were badly burned, indicating, officials said, that the explosion was caused by a gas leak.

CHICAGO BUSINESS DEFIES CATASTROPHES

Vigilante Committee Forms To Move to Rid Windy City Of Hoodlums and Slay- ers

CHICAGO, Feb. 8 (AP)—The legitimate business men of Chicago has risen in wrath and set its cap for a city purged of hoodlums, leeches, and the like. A vigilante committee has been formed to rid the city of hoodlums and slayers.

"We know that there are tremendous influences that we have to overcome, but they'll have to give up," said the vigilante committee. "We know that there are tremendous influences that we have to overcome, but they'll have to give up."

Already a vigilante committee has been formed for men in addition to Colonel Randolph—and after this will be the full force of the city. The committee is organized to rid the city of hoodlums and slayers.

Those accompanying the president were: Mrs. Hoover, Justice Harlan.

Pioneer Business Man of City Urges Preservation of First Structure Built in Twin Falls

The first building in Twin Falls, which stands on the site at the corner of Main avenue and Fourth street, south of the city, is to be preserved, it is announced today. The building is a two-story structure, built in 1890, and is the first building in the city. It is a landmark in the city's history.

COLOMBIANS PREPARE FOR SELECTION OF NATIONAL EXECUTIVE

BOGOTA, Colombia, Feb. 8 (AP)—Colombian congress will hold today for the selection of the president. The congress will select the president for the next four years.

The Liberal party, presenting a united front, is backing the candidacy of Senator Enrique Olaya Herrera, the Colombian minister in Washington. The Conservative party, however, is backing the candidacy of Senator Alfonso Vaquer Cobo and Senator Guillermo Valencia. Finally, the Socialists support Senator Alberto Castrillon.

Yesterday launched an attack against Senator Olaya Herrera, declaring him as a "reactionary" and asserting that his victory would endanger the sovereignty of Colombia.

200 IDAHOANS MEET AT CAPITAL DINNER

WASHINGTON, Feb. 8 (AP)—More than 200 Idahoans, including former Governor W. D. Wadsworth, state manager of the Washington baseball club, and other distinguished men, met at the Raleigh hotel tonight at the capital dinner.

Representative Dutton L. French was toastmaster.

Former Governor Davis, who is president of the Lincoln League at Washington, and Mrs. C. C. Moore, wife of another former governor, were among those who spoke at the dinner. The speakers included Mr. Johnson, E. D. Broadhead, chairman of the tariff commission; Representative Addison T. Gregory, H. A. LaPointe of the senate committee, and Earl Venable, secretary of the national congressional Republican committee.

Mrs. Dean Dinwoody gave a reading, and vocal solos were rendered by Miss Mary Winifred McHenry and Leonard F. Farr, both of whom were accompanied by Mrs. C. C. Moore.

Mr. and Mrs. William F. Lee, Moscow, attended their first dinner at the capital. Mr. Lee was a member of the Interstate Commerce commission by President Hoover.

Senator and Mrs. John Thomas attended, but Senator and Mrs. Dornan were unable to be present. Elton Higgins, president of the Utah club, was among the guests.

JURY TRYING JURIST IN AUSTIN DISAGREES

AUSTIN, Texas, Feb. 8 (AP)—Jury in the murder trial of John R. Brady, former apostle, court judge, charged with the knife slaying of Miss Leah Highsmith, 28, of Austin, today agreed to acquit Brady. The jury was divided 11 to 1 in favor of acquittal.

The jury was divided 11 to 1 in favor of acquittal. The jury was divided 11 to 1 in favor of acquittal. The jury was divided 11 to 1 in favor of acquittal.

LONDON CONFERENCE LOOK TO JAPANESE AND FRENCH NEWS

Premier Andre Tardieu Reported Planning Statement Similar to Stimson's and Ramsay MacDonald's

(By The Associated Press)
LONDON, Feb. 8.—Now that the American and the British views of naval armament have been set forth, the French and the Japanese expressions are expected in some quarters as developments next week in the five-power naval conference.

Premier Andre Tardieu, French premier, is expected to make a similar announcement of the French viewpoint. Retired Wadsworth, head of the Japanese delegation, will also make a statement of the Japanese viewpoint.

Next week also likely will bring many more into the open and reveal the full extent of the negotiations. It is expected that the Japanese will also make a statement of the Japanese viewpoint.

Next week also likely will bring many more into the open and reveal the full extent of the negotiations. It is expected that the Japanese will also make a statement of the Japanese viewpoint.

Twin Falls Bruins Defeat Shoshone, 31-12

Penalties Reduce Speed of Contest On Perfect Court

Coach Jones, Seizes Opportunity to Give Many of Inexperienced Players Chance to Display Talents

(Special to The News)
SHOSHONE, Feb. 7.—Play-
ing on the fine, brightly
lighted Shoshone floor
the Twin Falls Bruins won
from the Shoshone team, 31
to 12, here tonight. The game
was slowed by the penalties
imposed on the Twin Falls
team, which gave Shoshone
23 free throws, sent the ball to
the Shoshone end of the floor
many times, and broke up the
Bruin attack. Coach Jones
seized the opportunity to give
many of his players some
game experience and to test
regulars who had worked hard
during the week.

The lineup:
TWIN FALLS SHOSHONE
(41) (10)
Lincoln (5) forward Baer
Morgan (5) forward Bertia
Wheeler (10) guard Millard (7)
Olvera (5) guard Graham (5)
Bain (4) guard Hubbs
Substitutes—Twin Falls: Conner
for Morgan, Turnpenny for Wheeler,
Gray for Turnpenny, Kuykendall for
Gray, Kinner for Baer, Pett for
Bertia—Oreida.

WESTERN STATE QUINT BEATS MINERS, 36-22

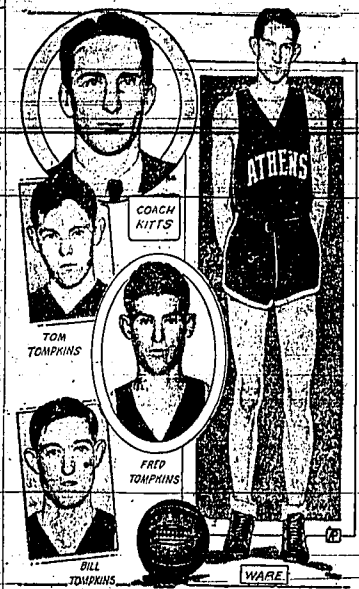

PUEBLO, Colo., Feb. 8 (P)—West-
ern State quint defeated the Miners
in a Rocky Mountain conference basket-
ball game, 36 to 22.
Western State array with the game
in first half, piling up an advantage
of 21 to 8. Mines played better basket-
ball in the last half, but were unable
to contribute some good shooting to
give the Blasters at least an outside
chance.

Basketball Shots

by
TED VORVORCH

In high school, college and now the
professional game, few basketball
players have made more dramatic
comebacks than this team from
Pleasanton, the two-headed center of the
Pleasanton, New Jersey, entry in the
American "pro" league.
Boller's six-foot-six-inch sub-
structure, he is just the same
height as Primo Carnera—first came
into public prominence on February
6, 1928, when he and four other
scrappers from Hackensack, New
Jersey, high school brought to
the Passaic, New Jersey, high school
winning streak which stands as the
greatest in basketball.
Passaic's wonder team, tutored
in the short pass game by that
master mentor, Ernest A. Blood, had
at one time won the Eastern
stretching back over a period of six
seasons when Boller and company
finally turned the scale.
"The Passaic players' goal was
to win nothing," said a story of the
game. "Boller, Hackensack's
six-foot-six-inch center, spotted
the teamwork by tipping the ball
either in front or behind him to one
of his men at almost every jump,
quietly outplaying the Passaic
center."
It was one of the most dramatic
games in history. One of Boller's
team mates collapsed and the
others left the court in tears.
Unlike many of the college stars
Bollerman fitted into professional
basketball as though made to order.
Unfortunately for Passaic he is
able to play in only the Eastern
game, as a banking job prevents
him from making the Western swing
with his team.
Joe Brennan, Brooklyn's "Vil-
lano," is another star which shines
bright in the East because of the
hands of business and as a result
these two teams are noticeably
weaker when playing in the Western
circuit.
Bob Thompson, the outstanding
passaic player, is a star in the
Western circuit.
As long as basketball is played,
Bollerman's "pro" career will be
remembered. His great jump and
ability to tip the ball into the
hoop is a thing to see. He is
remembered in the Western circuit
for his ability to tip the ball into
the hoop.

Crack Texas Quintet Guns For New Basketball Prizes

COACH KITCH
TOM TOMPKINS
FRID TOMPKINS
BILL TOMPKINS
WARE

Jimmy Kitch, coach of the Athens, Texas, Hornets, national prep school champions last year, counts on the Tompkins boys and Ware to help make it two straight.
By OWAY TALBOT, JR.
(Associated Press Sports Writer)
ATHENS, Texas, Feb. 8.—The
Athens Hornets are out to stave the
nation's best prep basketball loss
again this year.
Last year this lanky band of
youngsters emerged from the pine
rocks of east Texas to win the na-
tional interscholastic championship
in Chicago. Precisely the same
squad is back, determined to make
it two straight.
The Hornets appear fully as strong
as last year, although two stars of
the 1929 combination are missing—
Bummers, chosen as an all-American
forward and Drannon, brilliant
guard. Seven boys who participated
in the '29 victory are back.
With these players as his nucleus
Coach Kitch expects the Hornets to
out-McArthur such players he will
have an even greater team than last

DUMB BELLS Al Brown Retains Title in New York

NEW YORK, Feb. 8 (P)—Al Brown,
nicknamed "The Heavyweight," won
the title of world champion in the
fourth round of his 15-round
bout with Johnny Erickson, New
York, tonight, thus retaining his
title in the world's best prizefight
championship, so far as New York
state is concerned.
Brown weighed 118; Erickson 117.
The heavyweights were in a
tense, close, and exciting fight.
Erickson landed three blows in the fourth
round. Brown protested when the
first was landed and "he was de-
fied the victory when Erickson land-
ed the second, a left and a right.
In the eighth round semi-final,
Black Bull Gibson, Michigan star, de-
feated Roulter-Purn, Chile, in a
great duel.

Eden Teams Split With Hollister's

Time Whistle Proves Determining Factor in Outcome Of Games on North Side

(Special to The News)
The time whistle was the determining factor in the outcome of the basketball games played here on the Eden court last night when the Eden and Hollister high school basketball teams contested for honors.
The Eden girls had little difficulty in turning in a 41-8 victory in the Eden boys' game. The Hollister boys had a harder time of it, losing 10-3. The Hollister girls had a harder time of it, losing 10-3. The Hollister boys had a harder time of it, losing 10-3. The Hollister girls had a harder time of it, losing 10-3.

In the boys' game, the Eden team scored an early lead after Hollister had scored the first point on a free throw. The first quarter ended with an 10-3 score. From then on Hollister girls failed to score on a point, while Eden loomed them through at regular intervals. While the "valley" boys were heavier than the Eden team, the lack of experience proved an impressive string of victories in a number of points on free throws. The Hollister girls were quite free in making technical fouls by over-guarding. Hollister scored high for Eden with 23 points—Jenkins was next with 12. Phillips replaced Jenkins in the third quarter and scored 2. Mylins and Christiansen scored the points for Hollister.

Eden drew first blood when Knott made good a free throw. Hollister soon evened the score in a similar manner. From then on the Hollister boys had a harder time of it, losing 10-3. The Hollister girls had a harder time of it, losing 10-3. The Hollister boys had a harder time of it, losing 10-3. The Hollister girls had a harder time of it, losing 10-3.

10 Teams Vie In Gooding Tourney

Gannett, Electrocats From Boise, and Bliss Legion Triumph in First Games

(Special to The News)
The fifth annual Gooding "Outlaw" basketball tournament, held here on Thursday afternoon when Hollister lost a close game to Gannett 21-19. The teams were evenly matched as the 7-3 score at the half indicates.
The lineup:
GANNETT HOLLISTER
(18) (18)
Paterson right forward Strickling
Stanfield left forward Klinehoff
R. Price left forward Pohlman
Scott center Strickling
Clark right guard Pullman
Substitutes—Gannett: L. Stanfield for E. Stanfield, Boulden for Clark.
The Electrocats from Boise wrecked the Gooding Independents in the second effort of the afternoon to the tune of 22-10, for what will perhaps be the largest score of the tournament.

ELECTROCATS CASTLEFORD
(19) (19)
Camp right forward Billings
Paul left forward Ulrich
Freeman center Burke
MacLeod right guard Olinhoff
Substitutes—Electrocats: Bailey for Freeman, Wakeman for Camp, Vance for MacLeod, Jenkins for Paul.
Bliss Legion and Shoshone opened the evening's activities and after a poor start, the former led at the half, 20-9. The latter brothers and Jungstrom led the Lions to a 31-23 victory. C. Palmer was the point man with a total of 15.

SHOSHONE
(21) (21)
Palmer, C. right forward Chapman
Palmer, R. left forward Murphy
Colvin center Schupples
Wright right guard McGuire

Veteran, Playing Best Game Of Long Career, Turns Back Youthful Tennis Star

(Special to The News)
HUNTER, 35, but playing better than ever, turned back Julius Seligson, one of the best of the country's younger players, by the decisive score of 5-3, 6-3, 6-4, today in the national indoor tennis championship.
Forced to play the runner-up role three times since he captured the title eight years ago, the courageous Hunter came into his own with a smashing exhibition of hard hitting and heavy tennis which indicated he is not yet ready to abdicate his position as second only to Bill Tilden among America's stars.
The doubles championship won last year by Tilden and Hunter went to the New York combination of Merritt Culver and Percival Rhodes, who defeated Harris Cochran, Des Moines, Iowa, and Richard Murphy, Utica, New York, six sets at Harvard, by scores of 6-2, 6-3, 2-6, 6-4, in the final.
FATHER OF 40
MACON, Ga., Feb. 8 (P)—Joshua Beatty, 70-year-old farmer near here, is the father of 40 children.

A BEAUTIFUL SUBURBAN HOMESITE
3 1/2 acres on gravelled road, city water, sewer and all of the conveniences of the city. The owner is a real estate man and is willing to sell at a bargain and will build you a house if desired and let you pay for it like rent. This place will make you a lovely home and you can make your living with strawberries, chickens and a cow. The price is only \$1400.

Money To Loan and Lots of It
See us about our loans before you make your loan, we want to tell you about our loans. We offer an excellent straight three year loan on city property at a very low rate.
Monthly payments made at lowest rate and pre-payment privileges without penalty. Our farm loan department is now in fine shape to take care of your needs.

STUDEBAKER ERSKINE SALES SHOW GAIN

Seasoned Eights and Dynamic New Erskine Meet With Healthy Buying Response
Studebaker sales for January, 1930, showed a 73% increase over December, 1929. Total January shipments, both export and domestic, were within 8% of last year. Shipments to domestic dealers extended January, 1929.
In New York, where the room was modestly enlarged, more Studebakers and Erskines were delivered to retail purchasers than during any January in Studebaker history.
The public still has the cash and the desire to buy motor cars which offer "champion" performance, comfort, safety and beauty at One-Price prices.

JEROME COUNTY'S SCHOOL TEACHERS CONVENE AT EDEN

Representatives From Each
District Attend Conven-
tion To Discuss Problems
Of Work in Grade Division

EDEN, Feb. 8 (Special to The News).—More than 40 instructors in the common schools of Jerome county assembled here Friday at Eden in an all-day session. The meeting was presided over by Mrs. Nellie Roberts, county superintendent. A discussion of problems pertaining to the work of the grade schools was the principal purpose of the meeting. Rev. C. F. Kendall, of the Eden Baptist church, gave a program of inspirational educational talk at the close of the afternoon program, fill-

ing the part of the program which was to have been occupied by Dr. F. E. Howard, Albion. Road conditions prevented Dr. Howard from attending. The program was as follows: Bible reading; assembly singing; led by Miss Ruth Lowe; conference with school district discussion led by Miss Jean Ross, Dixon school; "Our System of Grading," by J. C. Edly, Eden school; discussion, led by Theo. H. Hicks, Russell-Lane; presided over by the adult committee of the Eden Christian church; music by the "Rhythm-Hand" of the Eden grade school, led by Miss Ester Barnes; and a presentation of the "Rhythm-Hand" by Mrs. Winkler; primary demonstration, Mrs. Kleinkopf; methods of discipline, Arthur Heppner; Appleton discussion, led by Mrs. Winkler; music, Mrs. Greenwald.

The teaching of English was discussed by J. Clark McChesney, explanation of the work of closing the achievement tests being given this year in the Eden school, by Mrs. M. Kleinkopf, and by Mrs. Winkler. Only four teachers of the county were unable to be present. All districts were represented. This meeting was the first of the year, and was held on Wednesday evening at a number of musicians and readers from Twin Falls.

The meeting was held at the home of Mr. and Mrs. Byron Averitt, with Mrs. M. R. Beabout as hostess. Mrs. J. A. Dwyer, Mrs. W. A. Thompson, Mrs. E. B. Plummer, Mrs. U. N. Terry, Mrs. J. B. Harvey, and Mrs. J. A. Dwyer were present. A vocal trio, composed of Mrs. U. N. Terry, Mrs. Plummer, and Mrs. Dwyer, favored with several numbers, and Miss Parra, entertained with these readings. Mrs. Harvey played the accompaniment to all the musical numbers. The guests presented appreciation of the efforts of the Twin Falls musicians in presenting this pleasant evening's entertainment.

Mrs. E. W. Riemann, Mrs. Hopper, Mrs. L. E. Webb, and Mrs. A. J. Slater were guests from Hazelton. At the close of the evening, the hostesses served lunch. The next regular meeting of the club will be held the first Wednesday in March, at the R. V. Henry home. Mrs. Henry, Mrs. C. B. Averitt, and Mrs. A. Barnes will entertain the members at that time.

Active work has started on the annual junior class high school play to be given here on Friday evening, March 28. The play selected this season will be a little different from previous years. While other years the "Pulley" play has been more or less a comedy all the way, this season dramatic scenes are embodied in the plot. The play is entitled "Loose Ankles."

While work is progressing on the annual plays given by the senior and junior classes of the high school, an operetta is also under way. To be given late in April, Mrs. Barnes has selected this year a Japanese operetta, entitled "The Cherry Blossom." The plays and operetta are put on to assist with the expenses of the annual graduation exercises.

Residents of this community are looking forward to a musical treat that is said to be forthcoming next Tuesday evening, when "Eden High School" will present their first program of this kind for more than three years. Many of the people here have heard these artists broadcast over the radio and recommend them highly. The program is being sponsored by the Eden high school student body.

The tenth annual Washington Birthday ball given by the Eden American Legion members is to be given on Friday evening, February 20.

Strang will be featured with his artists, to present before Eden residents their first program of this kind for more than three years. Many of the people here have heard these artists broadcast over the radio and recommend them highly. The program is being sponsored by the Eden high school student body.

RUPERT WOMAN'S CLUB HEARS SPECIAL TALKS

RUPERT, Feb. 8 (Special to The News).—The reading of specially-prepared papers on a variety of subjects, featured the Thursday afternoon meeting of the Rupert Woman's club. Mrs. C. V. Haddock was in charge of the program. A paper on the "Publicity Department of the General Federation" was given by Mrs. Albert H. Lee, club member. R. D. Armstrong, of the science department of Rupert high school, gave a talk on "New Vision of Science." "Twelve Count Laws" was the subject presented by Fred Armstrong, secretary of the Rupert association.

Music was furnished by four Rupert high school girls, Margaret Hardy and Lois Dudley, violin; Helen, cellist; and Evelyn Orest, piano. They played "Love Comes Calling" and "By the Mississippi."

Tea was served by the civic committee.

BURLEY BUYS LAND FOR USE AS LANDING FIELD

BURLEY, Feb. 8 (Special to The News).—Title to the tract of land used as an airport by the city of Burley having been declared satisfactory, the property has been accepted by the city and the land paid for. It has been announced that a number of Burley business men who subscribed funds to secure an option on the field, and its use as a landing field during negotiations for its purchase, will be reimbursed for their subscriptions.

As it has been impossible to install the border lights during the recent freezing weather, flames have been used to guide planes to proper landings. A number of getting in have hovered around the town at night, attracting the attention of Al Smith, custodian of the field, who would daily forth with colored flares and plant them where they would indicate the borders of the runway. City workmen are now preparing concrete forms preparatory to setting the border lights.

A Trainload Of COAL That Would Reach Around The World!

Pleasant, Thoughtful Service

We have two distinctive services which we pride ourselves upon. The one is our Delivery Service and the other is our Combustion Service. Our Delivery Service is rendered by competent, experienced truck drivers, with new up-to-date trucks. Each truck carries a "lawn-mower" which the driver propels out on your lawn so that the coal which spills in unloading, is easily cleaned up, and no traces of coal or dirt will be found on your lawn.

Our drivers always find out if your shovels and other firing tools have been removed, and coal room door is closed, before unloading. After unloading, they close your basement window, and clean up any dirt that may have been made.

They wet down any coal that may cause a dust to arise in your bin, so that your basement does not need cleaning up after every delivery; in fact, they do everything they possibly can to make the use of coal clean and desirable.

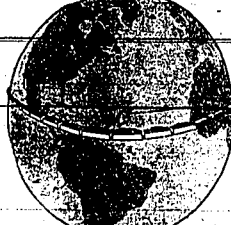

Our Combustion Service comes in AFTER you get your coal; if you do not get the heat you feel that you should, or if you are bothered with soot, or if the fire does not burn fast enough or too fast, just let us know and a trained service man will call and find the trouble, at no expense to you. Statistics show that 90% of heating troubles which are blamed on the coal, is not the fault of the coal at all, but the heating plant. 75% of all such troubles are due to leaky chimneys, pipe connections, and heater. Let us find and remedy your trouble so that you will get more and better heat from your coal.

If you are not enjoying either or both of these services, call us at once and enjoy greater heating comfort.

A GIGANTIC DEPOSIT OF COAL HAS JUST BEEN OPENED UP—THE DEEPEST DEPOSIT OF COAL BEING MINED IN WESTERN AMERICA OVER 125,000,000 TONS OF PUREST QUALITY COAL IN THIS DEPOSIT LIES 3,000 FEET UNDER THE GROUND

In Carbon County, Utah,

there are two gigantic tunnels which have been blasted through solid rock for a distance of 2000 feet. They go far into the mountain side and deep below the Price river bed, for there it was Nature had hidden more than a hundred million tons of treasure.

These two great tunnels were driven to reach this vast supply of the highest quality coal that has yet been discovered in the entire West. It has required two years of constant work both day and night, at a cost of more than a million dollars that we here in Twin Falls might have our share of this exceptional

New PEERLESS COAL

The screening plant in which this coal is made ready for your use is the very last word in mechanical perfection and efficiency. No rock, no bone, no fines—all clean, firm, quality heat.

IT IS CLEAN, FIRM AND FREE BURNING

We have an ample supply of this New Peerless coal in stock. We have given it a thorough trial, and found it

to be exceptionally good coal.

We sincerely believe that it is a very good fuel, for any kind of heating stove or furnace, and we conscientiously recommend it to you. We extend to you a hearty invitation to give it a trial, and we are sure that you, too, will find it to be a better fuel.

When ordering your next fuel supply, will you not permit us to serve you with New Peerless.

Fire Tending Service

Would you like to go out of town for a few days or so, and be afraid that the house plants and water system will freeze up if the fire goes out?

Would you like to find some one on whom you can depend to keep the fires going until you return, and not have to worry about it any?

Just give us a ring and tell us when you are leaving and we will take care of your furnace until you return, no matter how long you wish to stay, or if it is over a Sunday or holiday; you may rest assured that everything will be all right at home, and a warm house will welcome you on your return.

Utah Grand

Yes, we will continue to stock this popular coal for those of you who want a hard, slow-burning, hot and clean coal. It has no equal for furnaces and heaters which have an exceptionally strong draft, and which require a harder coal that can be easily regulated and controlled.

If the coal you are using cannot be "held down," just try Utah Grand, hundreds of homes in Twin Falls have found it to be the best furnace coal they can get.

Automatic Heat In Your Home Is Now An Economy

Automatic Heat in your home!

What could be more desirable and pleasant?

Your furnace requires only 5 minutes attention each day!

No dirty smoke and soot, no dirty ashes to contend with!

Reduce your fuel bills from 25% to 60%!

Uniform temperature at all times!

Just think what that means: a nice warm house, automatically heated to any temperature, no running down to the furnace, numerous times each day to replenish the fire and regulate draft; no overheating or underheating of the home; a clean basement and home because a stoker eliminates dirty smoke, soot and ashes; and the best part of it all is that a stoker will reduce your fuel bill from 25% to 60% because it gets more heat out of the same amount of coal, and it uses the cheaper grades of coal.

Another thing which is of great importance, especially where there are small children or elderly people in the home, and that is the lessened danger from colds and other sickness by having a uniformly warm house.

You are paying for a stoker whether you buy one or not, because they will pay for themselves in the fuel savings; the comfort and convenience cost you nothing, why not have it?

All sizes of Iron Fireman stokers have been greatly reduced in price, and we are also now in a position to offer attractive and easy time-payment terms.

Phone us and we will gladly call and give you full particulars with no obligation whatever.

Your Heat Merchant

"An honest confession is good for the soul," so we are told. Well, we hope so, for we are going to make one. We plead guilty to not having interested ourselves in seeing that our patrons received the maximum of heat with a minimum of inconvenience. We have been too inclined to put you with your cash for so many pounds of coal, and wish you the best of luck.

We realize that this has been unfair on our part. Instead of selling coal, we should, in all fairness to you, sell you Heat for that is what you want, clean, comfortable heat; and lots of it, without it causing you any more bother than necessary.

With this thought in mind, we have been exerting our efforts toward perfecting our organization, and equipping ourselves with proper facilities to the end that the people of Twin Falls may have heating satisfaction and comfort never before thought possible.

We respectfully invite your attention to our several services, details of which are given elsewhere on this page:

A Splendid Fuel; Clean and Free-burning, the New Peerless Coal
Pleasant, Thoughtful and Careful Delivery Service
Competent and Expert Combustion Service
Up-to-date, Clean, Vacuum Furnace Cleaning Service
AUTOMATIC HEAT, with reduced expense, via Iron Fireman Stokers
Fire Tending Service

We are proud of the progress we have made; however, we are ever striving to broaden the scope and improve the nature of our services.

Any, or all, of these services are available to you at any time. Many have used a part or all of them, to their entire satisfaction. You, too, will find that it will be to your advantage to permit us to serve you.

It is our sincere ambition to rightfully catalogue ourselves in your mind as

Your Heat Merchant

DETWEILER COAL CO.

Your Heat Merchant

For Coal That's — Phone 809

A New And Much-Needed Service Available Only At Detweiler's

Cleaning furnaces with a modern vacuum furnace cleaner.

Every furnace should be given a thorough cleaning at least once each season; the pipes from the furnace to the chimney should be taken down and cleaned, and all air leaks should be sealed when they are replaced.

We can do all of this without removing the fire from your furnace, and without making any dirt; it is quickly and cleanly done.

Cleaning and repairing a furnace is like grinding the valves and scraping the carbon out of your motor; it gives it so much more "zip," and requires much less fuel to give the same amount of heat. There is a lot more satisfaction to be had from a clean, snappy motor than there is from a sluggish, dirty one; you'll find that the same is true of your furnace.

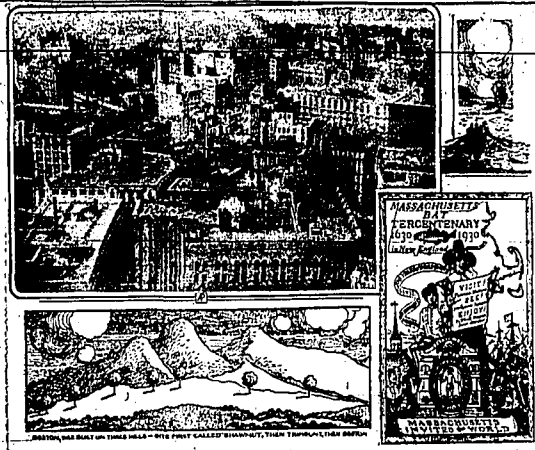

All furnaces become clogged with soot, this soot is five times as great a heat-resistant as asbestos; 1/4 inch of soot will cause you to lose approximately one-third of your heat, that you would save with a clean furnace.

Let us give your heating plant a "valve and carbon" job and a "tuning-up"; give Old Man Furnace and Old King Coal a chance to do their stuff for you; you'll be pleased with it, your reward will be better heat with less fuel and much less bother and dirt.

Bay State Observes Tercentenary of American Freedom

Commemoration of Independence Demands Extensive Preparation

Three-Hundredth Anniversary of Granting of Charter by Charles I Holds National Significance

Above, the Boston of today, where part of the state observance of the Massachusetts Bay colony tercentenary will be held this year. Below is Shawmut, as the Indians called it, renamed Trimout by early explorers. It was the original site of Boston. (After an old drawing.) At right is the state's invitation to the tercentenary, a poster now being prepared.

By JOHN R. KNOWLTON
(Associated Press Staff Writer)
BOSTON, Feb. 8.—Massachusetts and the nation this year will celebrate the completion of 300 years of independent civil government in America.
That is the keynote of the observance of the Massachusetts Bay tercentenary.
Its scope is national because the coming of the charter of the Massachusetts Bay colony has been called the "birth of liberty." History records that this was the first large settlement in America to be completely self governing. The principles of free government thus established subsequently profoundly affected subsequent American history.
Sturdily upheld by the colonists,

The Open Window

By Hugh A. Studdert Kennedy

The other evening, as I sat by my open window listening to a welcome rain as it dripped from the eaves of a distant roof, I was reminded of a "Dear Old Lady" who, after being asked to give a testimonial for a certain product, turned to a book entitled "The Saviour Christ." She read the complete text of the Gospels and the Acts of the Apostles, and then she said: "I have read it all, but I did not find a word in it that said I should give a testimonial for a certain product." I was reminded of her when I read the "Dear Old Lady" who, after being asked to give a testimonial for a certain product, turned to a book entitled "The Saviour Christ." She read the complete text of the Gospels and the Acts of the Apostles, and then she said: "I have read it all, but I did not find a word in it that said I should give a testimonial for a certain product."

the human heart is capable of giving with it, it is well to remember the wisdom of Private Willis in Johnnie, and ask ourselves how much of it all is due to the fact that we were born "a little liberal, or else a little conservative."

There is no argument here for pessimism—far from it—only an acknowledgment of the fact that the human mind is not capable of believing and that some human has not believed even candidly. "The little boys and little girls" of these believers have at first at any rate, almost invariably, believed as their fathers.

JEST A MINUTE with Justin Utt

By MARY LENNON

DUMB ADMIRATION
Perhaps you may have guessed, I have had a talker. And my voice is said to be C. But when they turn the crank, my mind is just a blank. I've forgotten all I had to say. (Some people are unkind enough to say that the condition of my mind is the same before, during and after my talks. But I suspect that they are some of those jealous individuals who make a noise but don't get paid for it like Justin Utt.)

CASSIA COUNTY SCHOOL HEALTH STATUS RISES

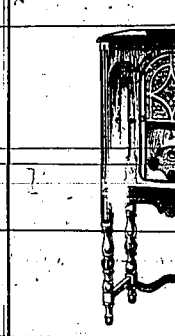

BURLEY, Feb. 8.—(Special to The News)—Mrs. Frances M. Wann, Cassia county community nurse, reports that the health of the children in the school she went through here is quite high since last year's examination. Mrs. Wann has completed the southwest school, where she examined 254 pupils out of an enrollment of 271.
The nurse found 46 cases at this school of children 1 per cent or more under weight. She also found that

is about one-half the general average of the country. Mrs. Wann found only 35 cases among the pupils where physical defects were serious enough to justify their being sent to their physician. She is now completing the preliminary examination among the schools of Burley and will follow up with a final examination and check up at a later date.

SWORDFISH CATCH BIG

SAN DIEGO, Cal., Feb. 8.—(AP)—More than 2300 swordfish, averaging 300 pounds each, were taken in San Diego's offshore waters during the commercial broadsword swordfishing season of last year.

Hey, Fellows!

by L. M. COOLEY

How many of us had the courage and persistence to stick with the spinning wheel talked about a few weeks ago. All of us? Good. Want's so hard to get that first loop going? We got the knack of doing our worst. Now that we've got that down, it's time to start spinning. We have a perfectly good loop going to waste when we might be doing something with it. And what good is a spinning wheel if we can't jump into it and then out again. The trick is easy, fellows. As you cast that it sounds and just twice as spectacular. Let us assume that we have a full loop going in a perfect circle. Just as the hands pass the left foot you make your jump into the loop. It doesn't have to be a running broad jump, but with a little spin you will take you well into the center of the loop. As you feel your feet clear, clear the rope, bring your spinning arm straight up and a little over your head so that the running end will clear your body as the loop goes around it. Remember that you are inside the loop now, and that the wrist movement must continue even when you are making the jump. If you stop it for just a little, the loop will die on you or get egg shaped so that you will be unable to keep it circling. When you get inside it, don't be discouraged if you get all tangled up the first few times. After you have once made it, you will have to try awfully hard to make a mess. Now getting in was a natural motion because we had to jump forward, but getting out again is another matter. Keep the circle spinning smoothly about the body until you feel that your timing for the back jump is about right. As the hands pass around the body and come even with the back of the right foot, drop your spinning arm and the loop down your side and give the arm a quick twist outward. Like throwing a baseball underhand. At the same time give a little jump up and back. This will clear you of the loop and bring you back in the same position that you took when you made the jump in.

One must be taken that you do not let the loop touch the ground when making the forward or back jump. If this happens you are liable to find yourself all tied up like a cat at branding time. A fancy break, and one that looks very tricky, can be made without practice after you have mastered getting into the loop. You go through the same motions of letting the arm down, that is, take in making the back jump, only instead of jumping out you pass the running end to your left hand and around your back where your right hand picks it up again. You can keep this up for several jumps and when it comes again to the right hand you lift the arm up to its original position. It's not hard to get the trick of this and it makes a clever break in the monotony of just jumping in and out of the loop.

government house as the guest of his uncle, the Earl of Athlone, governor general of South Africa. Lady May and her mother, Princess Alice, are the prince's official hostesses. Both of them recently went on a big game hunt in Rhodesia and the Transvaal with Earl Athlone. He is staying for a time here at All in family are excellent shots.

Wales Learns of Buffalo Hunting From Pretty Cousin in Capetown

Lady May Cambridge (left) and her mother, Princess Alice (right), wife of the Earl of Athlone, are hosts to the Prince of Wales (center) at Capetown, South Africa.

CAPETOWN, S. Africa, Feb. 8 (AP)—The Prince of Wales has opportunity to learn of buffalo hunting from a pretty instructor. While the prince is waiting here for word that all is ready for the big-game hunt in East Africa, Lady May Cambridge is able to give him pointers. He is staying for a time here at All in family are excellent shots.

GOODING COLLEGE GIRL VISITS HOME IN HANSEN

HANSEN, Feb. 8.—Miss Zenda Robison, who is attending school at Gooding college, came home Thursday to spend the rest of the week. The Women's Community council will meet at the Community church Thursday afternoon, February 12.

More than 25 persons attended the church supper held at the Community church here Wednesday evening.

Mr. W. J. Emery, who has been ill during the last week, is reported to be improving in condition. Miss Zenda Robison, Gooding college, and Miss Zenda Robison, Gooding college, favored the Hansen high school student body Friday afternoon with several musical numbers and numerous readings.

The Study club met at the home of Mrs. J. L. Stenstrom Thursday afternoon. The study was made on China, with Mrs. C. E. Montgomery as leader. At the close of the meeting the hostess served refreshments. Mrs. Peter Mulder, who has been ill during the last three weeks, is rapidly improving in condition.

Miss Zenda Robison, who is attending school at the southern branch of the University of Idaho, at Pocatello, is spending a week's vacation here at the home of her brother, Edmund Stenstrom.

TRAPS RESTRICTED
ATLANTA, Feb. 8.—Steel traps may not be used to trap game in Georgia except on certain coastal islands and marshes.

United States Engineers Renovate Aqueduct Near Athens

BUILDERS UTILIZE ANCIENT MASONRY FOR NEW CONDUIT

American Company Disturbs Atmosphere of General Decay in Work to Provide Modern Water Supply

By WILLIAM R. KUHN, Financial Editor
(Associated Press Feature Service)
NEW YORK, Feb. 8.—The ghosts of Greek slaves who built the ancient aqueduct 1800 years ago find their position more and more untenable. In former days the crumbling, forgotten ruins were a favorite meeting place for the ghosts of a race in Greece but that was before 1940, when Mayor Kyrillos of Athens put the aqueduct back to work as the city's chief source of water supply.

Today an American engineering company has disturbed to a still greater degree the atmosphere of general decay. The ancient masonry has been renovated and the aqueduct will become part of Athens' modern water supply system.

Engineer Vlasto R. W. Gausman, chief engineer in charge of the great-Magnum dam and tunnel project designed to get more water into dusty Athens, has just left New York after a brief visit to the city.

He said that the entire undertaking, which will raise the per capita water supply of Athens, Greece and adjacent areas from 2 1/2 gallons to 125 gallons daily, will be completed in 1940.—(AP)—will cost more than \$1,000,000, he says.

The work was begun in 1925 and the system has now been brought to the edge of Athens from which point approximately 200,000 feet of pipe will carry it to all parts of the city.

Ditching and tunneling through land rich in archeological interest, the task has added a romantic chapter to the worldwide activities of American engineers.

The chief scientific feat was the construction of the excavation near the historic village of Marathon, to impound the water of the rivers Ilissos and Ilarion.

Formed Lake
The dam has formed the artificial Lake of Marathon, which will have an area of 2,000,000 square meters and in some places will be 50 meters deep.

Aristophanes, Strabo and other writers of ancient Greece are witness to the fact that the aridity of the Attic region in Greece is as old as Athens. Scarcity of water in the year 594 B. C. caused Solon to enact severe laws for its distribution and use.

It was not until the Roman period, specifically in the year 115 A. D. that the problem was given a more permanent solution.

In that year was started the construction of the 25-kilometer Ilissos aqueduct, running chiefly underground.

After the successive invasions of the Vandals, Goths and Slavs, and later, during the Turkish occupation, it fell into disuse and was forgotten.

SIREN ALARM GUARDS REICH COUNTRY'S CUPS
OARV.—Ill., Feb. 8.—(AP)—John Herli, owner of Reich County, winner of the 1928 Kentucky derby, has taken elaborate precautions to protect the four gold cups his big red thoroughbred won.

The cups, standing on a mantle, are attached to a siren which sounds when the trophies are moved.

A friend picked up one by mistake, and the alarm, which can be heard all over the village, brought the Cary fire department and the constabulary rushing to the scene.

Federal Radio Department Plans Increase in Service

WASHINGTON, Feb. 8. (AP)—Increase of its radio-service to farm listeners in 1930 is planned by the department of agriculture.

The most important expansion, according to department officials, will be establishment of a federal-state syndicate service. This contemplates the release to broadcasting stations of a 10-minute daily manuscript program jointly prepared by the department and the state agricultural colleges. The department's contribution will be correlated with that of the colleges to give farmers of each state technical and economic information adapted to their particular needs.

The radio audience wrote the department 90,000 letters last year.

M. S. Eisenhower, director of information at the department, says that it may be possible in the future to use radio more effectively through the development of wired wireless and electrical transcription of programs.

ITALIAN PAPERS SELL
MUSOLINI'S SPEECHES
ROME, Feb. 8. (AP)—Italian newspapers are offering subscribers collections of Mussolini's speeches at reduced prices. In addition, the "Times" of London published a thick volume of articles under the general title "Times of the Fascist Revolution."

AUSTRALIANS PREDICT
SMALL WHEAT HARVEST
CANNBERRA, Feb. 8. (AP)—A greatly reduced wheat harvest but increased wool production for Australia is predicted by the Commonwealth Statistical Bureau for the coming year. The final estimate of the wheat yield from the 1929-30 harvest was 150,752,000 bushels, but the estimate for the coming season is only 112,000,000 bushels.

DELOTTAN CONGO MINES
GIVE 710 TONS OF TIN
BRUSSELS, Feb. 8. (AP)—The mines in the Delottan Congo produced 710 tons of the metal in the twelve months ending June 30, 1929, the latest date for which complete figures are available. This is the highest total since the African mines were opened.

BOISE FIRE BELL TOLLS FOR VETERAN FIREMAN
BOISE, Feb. 8. (AP)—Although the old bell in the Boise fire station tolls principally on the occasion of the funerals of high state and national figures, there is one group of persons for whom funeral tolls are sounded. They are the members of the old volunteer fire department—also known as the "bell tollers."

The most recent funeral toll was sounded for the late Senator John C. H. Hawley.

It is a symbol of respect, however, not too well recognized by residents here, and causes the newspaper offices to be flooded with calls for an explanation of the protracted tolling.

PEAR BUDS ARE PROBABLY INJURED BY RADIATION, TO THE EXTENT THAT IF THE WEATHER IS UNFAVORABLE AT BLOSSOM TIME, A LIGHT FINAL SET WILL BE REQUIRED. CROCHARD'S PRODUCT, THE FRESH WILL RESULT IN A SMALL CROP FROM ALL FRUIT TREES, BUT WERE UNABLE TO ESTIMATE THE DECREASE.

YAKIMA, Wash., Feb. 8. (AP)—Although the extent of the injury to fruit buds and trees cannot be foretold at the present time, they have undoubtedly been damaged considerably by the recent cold wave, a consensus of Yakima county orchardists indicated. Peach and cherry buds in the lower sections of the valley are probably wiped out, growers say.

Great damage to the orchards of the valley was done from December 12 to 15 in 1919, records show, when temperatures ranged from 10 to 24 degrees below zero. That was the only sub-zero period in that winter and in the low and medium sections peach trees were killed to the spout line.

The chief injury to the apple trees in 1919 was the loosening of the bark on the trunks above the snow line. This was so severe that the trees were badly stunted and in many cases killed. During the cold spell the depth of snow has been less than in 1919.

PEAR BUDS ARE PROBABLY INJURED BY RADIATION, TO THE EXTENT THAT IF THE WEATHER IS UNFAVORABLE AT BLOSSOM TIME, A LIGHT FINAL SET WILL BE REQUIRED. CROCHARD'S PRODUCT, THE FRESH WILL RESULT IN A SMALL CROP FROM ALL FRUIT TREES, BUT WERE UNABLE TO ESTIMATE THE DECREASE.

AMERICAN WOMEN, under the leadership of Anne Morrow Lindbergh, are becoming expert glider pilots. In the center Mrs. Lindbergh is shown being whirled into the air at San Diego at the start of a six-minute glide. At the right she is shown in a pair of overalls. Betty Virginia Lesley (lower left) is only 12 years old but she has made more than 50 glider flights at Redondo Beach, California. Mrs. Garland Peed, Jr., recently made a flight of several minutes near Colorado Springs. Peaches Wallace (upper left) is a San Diego glider pilot.—(AP) Photo.

A PROMISE FULFILLED A PLEDGE RENEWED

"Outstanding quality... yes; and low price, too!"

The New GOODYEAR Pathfinder

SUPERIOR tire quality is a basic Goodyear principle—the whole world knows that.

But to yoke such quality with low price—that was a task well worthy of the best talent of the greatest rubber manufacturer!

Goodyear has successfully answered that challenge in the new Goodyear Pathfinder tire.

An outstanding tire in quality and value; and remember that despite this quality and value it sells at a really low price.

1. A balanced tire, with all parts equally durable.
2. The powerful carcass is made of genuine Superwall cord.
3. Heavy wide tread, designed for slow even wear, delivers exceptional traction and non-skid protection.
4. Tread materials embody the famous Goodyear principle of rubber toughening.
5. Materials, workmanship and inspection are to the strict Goodyear standard.
6. Available in both High Pressure and Balloon sizes, lifetime guaranteed.

Another reason why Millions More People Ride on Goodyear Tires!

purpose, and publicly pledged itself to this policy of progress.

And the promise has been fulfilled.

The Oldsmobile Six reflects this purpose in the many improvements and refinements which have been made from time to time.

Meanwhile, the Viking Eight was introduced, applying the same principles to a 90-degree V-type eight in the great medium-price field.

Olds Motor Works recognizes four responsibilities in its policy pledged to progress... to design progressively... to build faithfully... to sell honestly... and to service sincerely.

And now, at the beginning of this new year, Olds Motor Works renews its pledge and re-states its purpose in order that in 1930, as in years past, it shall retain the sincere friendship of every owner... and that every motorist may consider the purchase of either Oldsmobile or Viking with absolute confidence.

FEATURE FLASHES FROM FAR-FLUNG FOREIGN FIELDS

Portuguese Authorities, Fearing Spread of Communism, Refuse to Allow Sailors of Russia to Land

First Soviet Vessel to Dock in Lisbon in Many Years Receives Cold Welcome While in Port To Take on Cargo of Cork For Use in Siberia

By GEORGE HALLADIAN (Associated Press Correspondent)
LISBON, Feb. 8.—Portugal, one of the greatest cork producing countries of the world, is working up a brisk export trade in this product with soviet Russia. But she is keeping her own frontiers tightly stopped against importation of communist propaganda.

Recently the first Russian vessel to visit this country in many years came to Lisbon to get the first cargo of a big shipment of cork destined for use in cold-proof coatings of Siberia. But while the ship itself was welcome, the crew was not permitted any shore liberty by the port authorities and had to remain cooped up on their ship while she took on the buoyant cargo.

The ship, in fact, was not allowed even to tie up at a dock but was kept well out in the Tagus while Portuguese police boats watched day and night to be sure that no propagandist of the third international slipped ashore to spread the doctrine of his school of thought. One Russian sailor who somehow managed to get ashore, was found by the vessel and was clapped into jail.

The government has received representations on this subject from the foreign commissariat at Moscow but has refused to let down the bars. Syndicalists caused considerable trouble to General Carmona in the early days of his dictatorship while he differentiates between these groups, who were little better than communists, and communists, who are no better than the rough element reform its ranks under the guise of a philosophical political theory.

The communist party in Portugal he treats as a joke. There was only one member of it in the parliament which was snuffed out by Carmona and attempts to revive the organization have been futile. Carlos Riera, one of the leaders, is permitted to reside in the capital but he does so only because he needs the rule of political silence imposed on him by the government.

Recent communist activities in the English and French districts of Africa have spurred the government to take precautions against incursions of agitators into Portuguese colonies in the far continent. Captain Theophilus, British military governor of Angola, reported that several communists had entered that colony disguised as merchants but that they had been rounded up and expelled. He said they had come across the border from the French Congo after being barred from that possession as undesirable.

TENTH FACTORIES MAY OPERATE IN AUSTRALIA
BRISBANE, Australia, Feb. 8.—The launching of cotton-manufacturing industries in Queensland on an extensive scale is contemplated by the state government subject to the investment by English textile interests of a reasonable amount of capital.

TAXI DRIVERS SPEAK ENGLISH AND FRENCH
BERLIN, Feb. 8.—Berlin now has special parking stands for taxi drivers who speak either English or French. These drivers wear red armbands to distinguish them from tourists.

JAPAN CUTS COSTS IN YEAR'S BUDGET OF NAVAL EXPENSES

Hamaguchi Ministry Proposes Slash, But Nation Will Continue Five-Year Ship-Building Program

By GLENN BARR (Associated Press Correspondent)
TOKYO, Feb. 8.—Japan proposes to spend \$500,000,000 yen (about \$2,500,000,000) less on its navy in the fiscal year beginning March 31 than during 1929-30. She will continue, however, the five-year building program launched in 1927.

This is clear from the new budget offered by the Hamaguchi ministry. It shows that out of a total of 1,602,000,000 yen, the navy is to receive 250,000,000 yen as against 260,000,000 in 1929-30.

Although the diet was dissolved before it had a chance to pass on the budget, the ministry can push the new figures into operation legally since the total does not exceed the last budget approved by parliament.

Limitation Plans
Government officials contend that continuation of the building program does not contradict Japan's professed enthusiasm for naval reduction. Continued support of disarmament is evidenced, they argue, by omission of estimates for additional ships to be built by the navy last year. These would have added 12,000 tons to the fleet.

Twelve cruisers carrying 8-inch guns, four being of 1100 tons and eight of 1000 tons; 17 smaller cruisers; 54 first class destroyers; 42 second class destroyers; 68 submarines; five plane carriers and a number of gun boats and smaller craft.

Under this program the following ships are under construction at government and private yards:
Four 10,000 ton cruisers of which two are to be built at the Chokai and two at the Chokai and two at the Chokai.

Fourteen first class destroyers of 1700 tons each, six of which will be finished this year.
Eight first class submarines of at least 1500 tons each.

The really considerable expenditures in the new naval budget are largely for the air branch of the service. They provide for maintenance of new naval aviation units, upkeep and improvement on the big plane-carrier fleet and for an aviation motor laboratory.

Two million dollars are appropriated for 1000 grand naval maneuvers and \$2,500,000 for maintenance of new ships to be commissioned this coming year.

American Aid Brings Joy To Youngsters of Angora

W. T. Ganaway of New York conducting a class drill in the new public play ground of Ankara, capital of Turkey. The youngster, lower left, is having his first experience with a swing and a camera simultaneously. At the lower right is Asit K. Jennings of Winter Park, Florida, leader in child welfare work for the government of Turkey.

By FRISCELLA RING (Associated Press Correspondent)
ANGORA, Feb. 8.—Children of the Turkish capital are sliding down their first slide—the school sports—under the efforts of an American, backed by the money and cooperation of the Turkish government.

The American is Asit K. Jennings of Winter Park, Fla. The success of this pioneer child welfare work in Smyrna four years ago led the Turkish government to ask him to create here a model for similar work throughout Anatolia.

Assisting Mr. Jennings are W. T. Ganaway and Barent Burhans, both of New York. They are the first Americans, aside from legation officials, to bring their families to Turkish capital.

Expedition explores upper Nile regions
NAPLES, Italy, Feb. 8.—An expedition bent on systematic exploration of the region west of Abyssinia, between the sources of the White Nile and Blue Nile, and leading right up to the sources of the Nile, has sailed under the leadership of Senator Gabelli. It expects to make an intensive study of the mineralogical, hydrological, ethnographic and zoological features of the country.

BRAZIL MARKS OUT NATIONAL BOUNDARY

Mixed Commission Takes Action on Lines Touching Every Country But Chile

RIO JANEIRO, Feb. 8.—All the boundaries of Brazil, and they touch every South American country except Chile, will be finally marked by mixed commissions with a few minutes' rest for the negotiations carried on by Foreign Minister Octavio Mangabeira with the neighboring countries.

General Candido Rondon is making a last inspection trip of Brazil's wide frontier, and a Brazilian commission has left the capital to meet the Uruguayan commission and mark the boundaries with that country.

The Venezuelan commission met the Brazilian commission at Sao Carlos in December to take the final steps in making the treaty of July 31, 1928, effective. April 18, 1930, has been fixed for the meeting of the British and Brazilian commissions on the British Guiana-Brazilian border.

The French parliament has authorized an appropriation for the expenses of the French commission to delimit the French Guiana-Brazilian boundary while the Bolivian frontier will begin to be marked late next April.

Other boundaries have already been settled.

BRITISH NAVY ADDS TO MEDITERRANEAN FLEET
PORTSMOUTH, England, Feb. 8.—Two new ships, one a floating hotel for submarine officers and men, and the other a floating workshop to repair ships at sea, have been delivered to the British navy here.

The Midway will attend the submarine flotilla in the Mediterranean. It provides first-class accommodations for crews of the submarines, and also carries all requisites for keeping submarines at sea on a war footing.

The resource, which will also serve as the Mediterranean fleet, is a floating dockyard. It has 20 workshops in which any kind of ship repair can be carried out at sea. The repair shop is the first of its kind the British navy has built.

BERLIN PLANS SCHOOL
BERLIN, Feb. 8.—What is said to be the world's largest and most modern vocational school will be built here shortly at a cost of nearly \$2,000,000. Facilities for the instruction of more than 8000 students in 237 classrooms and workshops will be provided.

DRESDEN, Germany, Feb. 8.—There will be no deficit in the treasury of this Hesaton town if the city fathers can prevent it. Economy is their slogan for 1930, and they are to start their money-saving policy at the top they gave the mayor's job to a councilman willing to run the town for \$35 a month.

Archibut Ph. 830, Dr. Foster, Adm.

PRESS BEGS TURKS TO CEASE DANCING

ISTANBUL, Feb. 8.—A few years ago, the Kemal government, bent on social as well as political Westernization, was exacting all Turkey to dance.

Now in the face of nationwide retrenchment inspired by hard times, the official press is begging the nation to "dance quietly and frugally at home."

It is noted that Constantinople's main for charity balls cost the nation in foreign importations of ball gowns, tuxedos, favors, and other trappings as much as \$15,000 a ball, while subscriptions averaged only one-tenth of that amount for the charity concerned.

GERMANY'S EXCESS OF RYE CUTS PRICE
LUTHERANS CONFRONT AGRICULTURAL PROBLEM IN SURPLUS OF NATURAL'S MAIN CROP

By CHARLES R. FERLIN (Associated Press Staff Writer)
BERLIN, Feb. 8.—Of the many problems confronting German agriculture this year, the most serious is that of disposing of its excess crop of nearly 4,000,000 metric tons. This is nearly one-half of the crop.

Agricultural experts have figured out that Germany's annual consumption of rye is only about 4,000,000 metric tons. What to do with the other half is a problem that is eating farmers worry and has started governmental agencies on a hunt for means of possible remedial action.

Reports of rye have been slightly less in 1928. In 1928, for instance, Germany was able to export only 480,000 metric tons, about 5 per cent of the crop. Prospects for this year show no improvement, despite the fact that an expert is allowed a "drawback" of 27 cents on every bushel of export rye. This refund is applicable on imports of wheat or barley.

Price Fluctuation
For instance, when rye for domestic consumption brings in a bushel the export price is 63 cents. This low quotation was reached in 1929 and for a short period stimulated rye production. It now stands at 45 cents on a competing basis with American rye. With an American import duty of 27 cents per bushel, freight of 4 cents per bushel, German rye reached a New York price level of about \$1.05 exclusive of handling charges. But prices rose and closed the American market.

Similar conditions that off their products and new efforts are being made to increase domestic consumption of the grain. The government has launched a campaign the slogan of which is "Use more rye for feed purposes." To make farmers feel the import duty on barley. But experts say there are limits to the use of rye for feeding and that any campaign will not stimulate the use of rye much beyond those limits.

GERMAN STORE OF HELIUM EBBS LOW

Tectonic Scientists Discover Available Supply of Element Falls Short of Needs

FRIEDRICHSHAFEN, Feb. 8.—German scientists have made the depressing discovery that it would take 400 years to fill the alship Graf Zeppelin with helium from the four known deposits of that gas in Germany.

The discovery was made by Dr. Friedrich A. Paneth, professor of inorganic chemistry, at the University of Berlin, and Professor Franz B. Dittus, a well-known chemist. They are internationally known for originating the method by which even a minuscule part of a cubic centimeter of helium can be determined in natural gas.

By means of their method it has been discovered that Germany's richest natural gas deposit yields a daily helium content of only 9.5 cubic centimeters.

The field richest in helium is at Westphalia. While this yields almost 10 times the quantity of helium as the other deposit, the daily average is only 41 cubic centimeters.

Continuing their method it has been determined from the chief American field, the scientists conclude that unless some wizard discovers a process to produce the non-inflammable gas synthetically, Germany will have to forego its use for her airships.

LUTHERANS CELEBRATE ANNIVERSARY OF CREED
AUGSBURG, Feb. 8.—Exhibitions of art, secular and ecclesiastical literature of the renaissance, period and memories of Martin Luther and the reformation will form part of the celebration of the 400th anniversary of the Augsburg confession of 1530. This year the adoption of the Augsburg confession by the Lutheran church was the West-Prussian confession is to the Presbytery. The exhibition will be housed in the Maximilian museum. Exhibits will be borrowed from European and American museums. The Lutheran church in America is expected to furnish many relics and eminent churchmen from America are expected to come here for the quadricentennial.

has launched a campaign the slogan of which is "Use more rye for feed purposes." To make farmers feel the import duty on barley. But experts say there are limits to the use of rye for feeding and that any campaign will not stimulate the use of rye much beyond those limits.

FLOPS, THE FLYING CAT
Flops, the little white kitten, day curled up in the pilot's seat, huge biplane, and became at the airport mascot. But Flops did know that. All he cared about Curly, the crack pilot, and he followed after him like a little dog. The c

"Curly had a little cat—
 His fur was white as snow—
 And everywhenever that Curly
 That cat would fry and go
 But Curly didn't mind." THAT
 was the end of the story, and
 while kitten's name became "Puss-
 iet" that
 "Curly saved the meat out of
 sandwiches for Pussie and got a
 little bit of meat for his day. He
 just purred and got plumper
 and prettier. His blue eyes danced
 and he purred and he al-
 ways really had blue eyes—w-
 erer he had blue eyes and al-
 ways had his little little con-
 spiracy to keep the black and green
 off his snowy fur.
 But Pussie was happiest of
 all when Curly let him ride in the
 back of his car when he hopped off
 to his snowy fur.
 "He's sure some lying cat,"
 would say proudly after they

returned from a long circling over the field.

"One day when Flaps mowed, he begged to go, Curly firmly refused to take the little white cat with him. 'No, Flaps,' said Curly, 'you go alone this time. I'm going to cut this air-buggy in all sorts of places. I don't want you turning all over the place.'"

Flaps looked unhappy when he lifted him out of the seat and him on the ground, but he seemed to understand, for all at once he nowhere in sight.

"Flaps has given you the go the boys shouted to Curly.

"Flaps has sense," said Curly, "don't you forget it."

Soon Curly was thinking of being built his plane as it climbed higher and higher into the blue. "A sweet little ship," he said to

himself as he started putting it into his stuns. "Now for a good look—just then Curly snid a dot of" by the support on the biglaine's "Flop!" exclaimed Curly, terrified he tried to grip his plane. But he couldn't. He only had to let go of the plane. Poor little Flop! What to become of him out there on wing?

But the fluff of white was there when "Curly came at the loop. Slowly and steadily he plied the plane now—no more stunts—turns. And Flop understood—he began to creep carefully over wing towards Curly.

"Here you are, old Flop," said Curly, lifting the little white k in better him. "Some flying—aren't you? And Flop just tied down and purred.

Screen Life
in 
Hollywood

By HUBBARD KEAVY

HOLLYWOOD, Feb. 8 (AP)—Las Palmas approaches a point that he is considering filming a picture about the life of the silent screen star.

Las Palmas, who has been in the business since 1914, is now in the middle of his career. He has been in the business since 1914, is now in the middle of his career. He has been in the business since 1914, is now in the middle of his career.

He has created hundreds of stories. He's seen men die in doubt, in the face of them, those that are genuine. I hope he has his side.

Fairbanks has no story with the stuff and he got enthusiastic enough over probably will film it next.

It is "The Mark of Zorro." He previously made in 1920. He considers that picture the best ever made, and for him it was the beginning of a long line of co-pictures. He believes that, with dialog, it would again be good and as successful.

However, Fairbanks hasn't

Roman History

Fairbanks outlined another that he is turning over in his that of a story of the time of ear in which he would play A it would be a portion of the l of Rome's most colorful per to the death of Cleopatra.

Fairbanks added that he not make Antony an acrobat that he would "play him st he did Petruchio in "The of the Shrew."

However, because of the silar "two millions of quai Fairbanks says he will not o making it until wide film, al much greater latitude than p day film, is in general use.

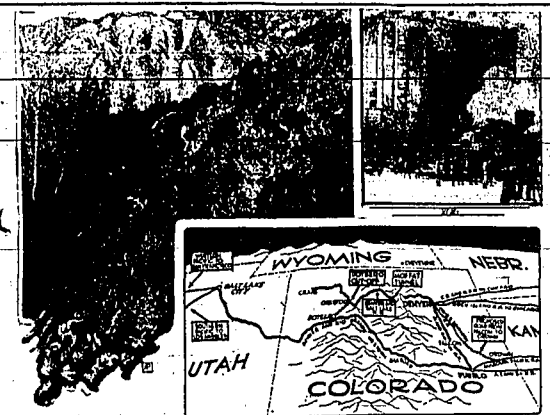

Like to Retire

and to the murder of 20 years ago. He said he could not say how he counts the years, but he cannot return to the time as an important part of his life. Wealth then, to him, meant the independence he has working for all of his life. Thriftbanks would like to return most of his time traveling, hoping that when he is able to do so he will be able to travel around the world he often dreams of.

New Cross-Country Rail Route Plans Include Moffat Tunnel

Dream Of Former Road Builders Looms As Immediate Actuality

Chief of Denver and Salt Lake Line Visioned
42-Mile Cut-Off Through Wild,
Mountainous Area

The project for another transcontinental railroad line calls for a 42-mile cutoff through the type of country shown above. It would connect the Denver and Salt Lake lines, which pass through the Moffat tunnel (east portal at upper right), with the Denver and Rio Grande Western. The map shows the route of the proposed cutoff, between Oreskog and Dolores.

By DEVON E. FRANCIS
(Associated Press Staff Writer)
DENVER, Feb. 8 (AP)—The dream of a new transcontinental rail line may be finally established.
David H. Moffat, dreamer of such a line for years. In 1903 he began the Denver and Salt Lake railroad and by 1915 it was extended to Craig, Colorado, although Moffat died in 1911.
The second step in his plans was completed for traffic only two years ago—the six-mile Moffat tunnel

which, costing \$2,000,000 and requiring four years for construction, burrows under the Rockies and permits the line to attain a maximum elevation of 9,000 feet above sea level.
The Denver and Salt Lake is a small line of railroads, but it clips 175 miles off the rail distance from Denver to Salt Lake City and is the key to the proposed new transcontinental route.
By means of the projected 42-mile cutoff through wild mountain country from Oreskog, the rails of

the Denver and Salt Lake would join those of the Denver, Rio Grande Western, and Dolores. The Denver and Rio Grande Western extends to Salt Lake City.
In the consolidation plans announced by the interstate commerce commission, the Western Pacific and the Missouri Pacific are grouped with the Denver and Salt Lake and the Denver and Rio Grande Western. These roads would be the other links in the proposed transcontinental route.

WOMAN URGES CLUBS TO DO LESS TALKING

LOS ANGELES, Feb. 8 (AP)—Providing talk among women and inspiring action is the job of Mrs. May Copland Lineman, as chairman of the resolutions committee of the California Federation of Women's Clubs.

Mrs. Lineman, an active attorney in Los Angeles, has addressed more than 400 of the federated women's clubs, and insisted departments of "business and protective law" in a majority of them.
"Be more sparing in the adoption of resolutions, and more active in following them up" is the constant burden of her address to clubwomen.

SCIENTISTS PREDICT SEASONAL FORECAST

Meteorological Association Hears Report on Weather Pressure-Cold Averages

DES MOINES, Feb. 8 (AP)—Because summer pressures over the Pacific may preface the following winter's temperatures in the upper Mississippi valley, seasonal forecasting was visualized today.

Professor Thomas A. Blair, University of Nebraska, outlined the possibility of long-range forecasting in relating weather studies before the American Meteorological society, meeting with the American Association for the Advancement of Science.

Records of severe and mild winters in Minnesota and Iowa within the period of 1874-1919 were consulted and compared with available material on pressure distributions in the Pacific area for summer and autumn.

Pressure Forecasts Cold
Cold winters were found generally to be preceded by a belt of summer excess of pressure across the Pacific, mostly in the middle and including the west coast of the United States, Hawaii, Japan and the Philippines. In autumn there were large areas of excess in the North Pacific area.
The warm winters were preceded by a belt of summer deficit across the Pacific, the area sometimes displaced northward to include Alaska, Siberia and Japan. Autumn deficit was centered over Alaska.

The study, Professor Blair said, was not conclusive, but indicative of the value of further investigation and justified extended examination of seasonal pressure deviations for possible long-range forecasting.

3000 TOURISTS VISIT IN RUSSIAN PROVINCES
MOSCOW, Feb. 8 (AP)—The Star Tribune bureau announces that last summer Russia was visited by 3000 foreigners, two-thirds of them being Americans. It was reckoned that they spent \$400,000 on souveniers, caviar and vodka.

Chief Justice Taft Retires Because of Ill Health

WILLIAM HOWARD TAFT, broken in health by years of labor for the nation, has resigned the exalted post of chief justice of the United States. Recent pictures of the aged jurist show him with Mrs. Taft (left), in his court robes (center) and out for a stroll in Washington. (AP) Photo.

PROVO UNIVERSITY GETS HISTORICAL MANUSCRIPT

PROVO, Feb. 8 (AP)—Brigham Young university manuscript library has received a copy of President Buchanan's proclamation of April 6, 1861, granting pardon to the citizens of the Territory of Utah for acts of lawlessness assumed to have been committed.

This proclamation was probably issued to re-assure and quiet the Mormons who were then resentful and fearful at the approach of Johnston's army.

This historical paper was presented to the library by John R. Hildrey, Salt Lake City. He found it among old documents left by his father, who was justice of the peace in American Fork many years ago.

SURVEY SHOWS SPAIN NEEDS MORE SCHOOLS
MADRID, Feb. 8 (AP)—A recent survey showed that 60,000 children are denied schooling in Madrid because of lack of room in existing schools. The 430 institutions accommodate 156,400 pupils.

TEXAS SCHOOL DELAYS BUILDING OBSERVATORY

AUSTIN, Texas, Feb. 8 (AP)—Because the president of the University of Texas would not be satisfied with \$400,000 astronomical observatory for his school, it will wait 10 years before getting on.

W. J. McDonald, \$17,000,000 for an observatory, but court costs over his will reduced the amount to \$100,000. Then Harry Vandell Benedict, the university's astronomer, said that that was not enough. He urged that the bequest be placed on interest.

"Dean Benedict," once a student of astronomy himself under Asaph Hall, insists on a worthwhile observatory. For the last 25 years he has had a private observatory at his home.

CHICAGO CITIZEN WINS DANISH MERIT AWARD
COPENHAGEN, Feb. 8 (AP)—Dr. Max Henrius, Danish-born citizen of Chicago, has been named winner of the Danish Merit Award for his services to the world.

PORTUGUESE MUST USE WAR BREAD ON TABLES

LISBON, Feb. 8 (AP)—Until Portugal grows enough wheat to become self-sufficient, only one quality of bread will be baked in the country. While the United States, Argentina and other agricultural countries are experiencing bumper crops and a sharp slump in the price of grain, the Portuguese are forced to retain the war-time measure of consuming bread in which bran is mixed with the wheat flour. There is a general complaint about the measure.

Speculations in wheat and other farm products is strictly prohibited. The importation of grain and the price at which bread must be sold is regulated by the authorities.

NATION'S MULE CAPITAL NOW BURSTS OF DAIRIES

PULMON, Mo., Feb. 8 (AP)—Milk dairy cows are supplanting obstreperous mules in Callaway county, once the nation's mule capital.

Instead of halting the county's position in the mule business, farmers now are extolling its virtues as a dairying section. Its natural blue grass country, they point out, makes it favorable for dairying.

Many farmers, who used to say they would "starve before milking cows," have capitulated. The uncertainties of the mule market in this mottled age make dairying attractive to those seeking a stable income. Others, however, are yet to be convinced.

BURRED AS PROVE AID TO MACDONALD

Linguist Believes Scotch Mode of Speech Helped Premier to Warm Hearts

LONDON, Feb. 8 (AP)—The burr and rolled "r" of Prime Minister MacDonald helped to make him so well-liked in the United States, said H. W. H. Sted, president of the Modern Language Association, in an address before the national education association conference here today.

"Wonder whether Mr. Baldwin would have been as successful as Mr. MacDonald in America had the electorate chosen to retain his services," speculated Mr. Sted. "He speaks English with a clear, pronounced burr in his voice—there is a trace of Harrow which may have aroused latent resentment in the American breast."

"But when Mr. MacDonald spoke of the 'war-r-r-r's' years, and the peace American hearts warmed toward him."

Mr. Sted's theories of accent and politics were warmly applauded by the conference and he nearly brought the house down when he gave an imitation of an American giving an initiation of an English accent.

"I asked an American what he meant by an English accent," said President Sted. "He emitted sounds from the roof of his palate near the back of his throat, and I recognized a caricature of tones which I had heard on occasion among Oxford dons, members of the British diplomatic service, and officers of the Guard."

HOLIDAY EFFECTS CURE IN BERLIN'S HOSPITALS

BERLIN, Feb. 8 (AP)—Among Germany's great surgeons old doctor Holiday still gets credit for the most punctual cures. A week before Christmas, for instance, Berlin hospitals were crowded, but the day after Christmas—vacancies amounted to almost 35 per cent of the total hospital space in the city.

LISBON CROWD ASSAILS GIRLS IN SHORT SKIRTS

LISBON, Feb. 8 (AP)—Portuguese women are jubilant over the collapse of the long-skirt era. A group of four girls in Portugal can be gauged by the fact that when a few young society girls in defiance of their elders and the public, appeared on the streets in short skirts some months ago, they were greeted with such hostility that they had to take cover in a shop. An uproarious crowd pursued them and police had to intervene.

CO-EDS GAIN LIBERTY

COLUMBUS, Ohio, Feb. 8 (AP)—Ohio state university has granted further liberties to co-eds. Women students living in dormitories and houses under university supervision need not bid their boy friends good night on Fridays and Saturdays until 1 A. M.

CHANGE IN ALPHABET OF TURKEY CAUSES LAWSUIT

ISTANBUL, Feb. 8 (AP)—The six-book publishers who survived in this city after the substitution of the Latin for the old Arabic alphabet, have sued the government of Turkey for \$250,000 for old school books left in the publishing houses when the change in lettering was made.

SAND BLOWN BY WIND PROFITS RAIL COMPANY
BIRKDALE, England, Feb. 8 (AP)—Recent gales blew a thousand tons of sand on and over local railways tracks and the company loaded it up and sold it in Yorkshire and Derbyshire. Usually local authorities charge the railways \$5 a ton for sand taken from the beaches.

DANISH ROYALTY PLANNED TO PAY VISIT IN EAST

COPENHAGEN, Feb. 8 (AP)—Prince Axel and Princess Margaretha of Denmark are planning in the near future to pay semi-official visits to Siam and other eastern countries. They will be accompanied by Prince and Princess Vagge.

3000 TOURISTS VISIT IN RUSSIAN PROVINCES
MOSCOW, Feb. 8 (AP)—The Star Tribune bureau announces that last summer Russia was visited by 3000 foreigners, two-thirds of them being Americans. It was reckoned that they spent \$400,000 on souveniers, caviar and vodka.

1930 Whippet

Reynolds Motor Co.

Tomorrow! Feb. 10th

Is The Last Day To Pay Your January Bills!

IF YOU HAVEN'T PAID THEM, DO SO AND AVOID ANY DELINQUENCY MARKS AGAINST YOUR RECORD!

THIS APPLIES TO EMPLOYEES, EMPLOYERS, MERCHANTS, PROFESSIONALS, LAWYERS, DOCTORS, FARMERS AND EVERYBODY, ALIKE!

And Another Thing—Are You Fair to Yourself?

Here is another slant on this paying-your-bills-promptly proposition that a few people give thought to. Whenever you do not pay an account when it is due, your merchant is disappointed in not getting your money to meet his bill; consequently, it causes him a loss. He either has to borrow money and pay interest, or he loses his discount.

In either event, it increases his cost of doing business. Naturally, he can't afford this, so he is obliged to add more to his selling price, which means that you have to pay more for what you buy.

Now you can see it, can't you? You are unfair to everybody, yourself included, when you don't pay your bills when due; you are causing yourself and everybody else to pay more!

Think it over; be a sport! Wait a while until you can afford a few of those luxuries pay your bills when due; you will be saving yourself money, you will feel better by not being harassed by over-hanging debts; you will be held in higher regard by everyone; and real peace of mind and enjoyment of life will be yours.

(IF YOU ARE IN A TEMPORARY FINANCIAL DIFFICULTY, COME IN AND SEE US, WE WILL BE ONLY TOO GLAD TO LEND ANY ASSISTANCE POSSIBLE)
