Taft, sons of former President, arriving from Cincinnati. Right: Mrs. Woodrow Wilson, widow of war-time President, after calling at Taft home.—AP Photo.

ADVOCATES OF YOUTH LAW BRING NOTED COACH TO HEARING

Alonzo Stagg, Chicago University Mentor, Testifies Out of Weight of 38 Years Experience With Youth

(By The Associated Press) WASHINGTON, March 13.—Fifteen men, including Alonzo Stagg, veteran athletic director of the University of Chicago, stood today before the House Judiciary committee to add another mass of testimony in opposition to any modification or repeal of the national prohibition laws.

NOTED ASTRONOMER REPORTS DISCOVERY

(Continued from Page One) search. Announcement was withheld, Dr. Silliker said, until he was absolutely sure. The discovery revealed that the planet is 45 times as far from the earth as the earth is from the sun. Although the size has not been definitely determined it is believed it may be larger than Jupiter, largest member of the solar family which is known to exist.

THIRD MAJOR PLANET FOUND IN 30 YEARS

NEW YORK, March 13 (AP)—Discovery of the unnamed planet far beyond Uranus, the fifth planet from the sun, is the greatest since the discovery of Neptune by one of the most astonishing calculations man ever had made. The discovery in the motion of the new planet Uranus troubled astronomers for years. The key to the solution was found about simultaneously by two astronomers working independently of each other.

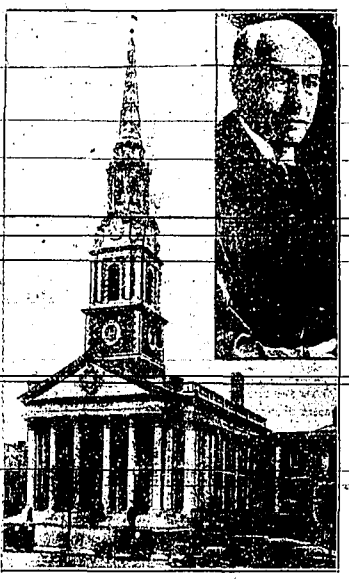

NEBRASKA BOY GOES TO JAIL FOR KILLING YOUTH

SYDNEY, Neb., March 13 (AP)—Charged with causing death while driving on the public highway in an intoxicated condition, Dale Chambers, 16-year-old Sydney high school boy, today was sentenced to jail here in connection with the death Tuesday night of Raymond Goodale, 18, Sidney high school athlete.

The Weather

FORECAST FOR TODAY AND TOMORROW—Unsettled, probably rains in south part of the Idaho valley.

PORTLAND POLICE HOLD FILIPINOS FOR MURDER

PORTLAND, March 13 (AP)—Filipinos were held for investigation by police here today in connection with an attack last night upon K. Nakino, 32, Japanese, who was stabbed to death at a bath house. Nakino received the wounds while trying to aid Mrs. M. Nakano, wife of the bathhouse proprietor, who was threatened by two Filipinos.

SENATORS HEAR OF CANCER CAMPAIGN

(Continued from Page One) The human body, particularly in the ductless glands, has the tendency to accumulate the growth of cells, the cancerous growth of malignant cells. They made an extract of this material, which was used to treat patients whose families understood that the work of the experimental and that no cure was promised. After the first injection, Dr. Coffey added, this patient, usually suffering great pain, has a relief after the second and third, pain disappears. Also as a result of the injection the patient's appetite is stimulated, the malignant tissue begins to slough or to break down.

COALITION SUFFERS DEFEAT AT HANDS OF PROTECTIONISTS

Rejuvenated Republican Faction Deals Double Blow to Bourbons and Independents By Retaining Sugar Duty

(By The Associated Press) WASHINGTON, March 13.—The rejuvenated Republican protectionists dealt a double blow to the senate coalition of Democrats and Republicans today by retaining the tariff on sugar in the Hawley-Smoot bill and increasing sugar duty and an import on cement, leaving only two major rate proposals to be disposed of and then.

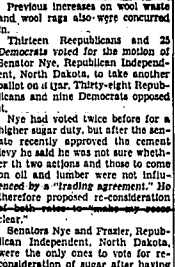

Some Change Minds

Denying all senators were voting solely to aid their respective states, Senator Harrison said some had changed their minds and votes overnight and never before had a tariff bill been written in the fashion of the pending measure.

NAVAL CONFERENCE LEADERS APPEAR IN HOPEFUL ATTITUDE

(Continued from Page One) conversations today were largely devoted to obtaining some modification of the Italian delegation's rigid attitude for parity with France.

Slays Head Keeper

ANTHONY MORLETTA, inmate at the New York state prison at Auburn, stabbed Edward L. Beck with head keeper, to death as he was walking through the mess hall.—AP Photo.

Wool rates mixed cotton goods containing 13 per cent or more wool by weight.

Oppositional amendment Senator Blaine, Republican-Independent, Wisconsin, said it would be a license for the wool manufacturers to steal 42 cents a pound protection when they were only entitled to 75 cents.

SOVIET CITIES PLAN ANTI-CHURCH DRIVE

Trade Unions And Atheist Societies Prepare For Demonstration Campaign

MOSCOW, March 13 (AP)—Huge anti-religious carnivals and demonstrations will be held in Moscow and other big Russian cities on April 1 (the first day of Easter in Russia, under the joint direction of Soviet trade unions and the anti-religious society, the League of the Godless.

The Central Trade union authorities have instructed their provincial organizations to participate actively in the recruiting of new members for the League of the Godless. The Moscow region alone is expected to furnish 100,000 new atheists during the Easter campaign.

# Coeur d'Alene, Pocatello, Rexburg And Boise Survive In Annual Idaho State Titular Contests On Gate City Court

## Twin Falls Quint Loses to Artists From North, 43-26

Weaver, Bruin Center, Only Player in First Game Able to Keep in Open and Scores Total of 12 Points

(By The Associated Press) **P**OCATELLO, March 13.—Coeur d'Alene, Pocatello, Rexburg and Boise high school basketball teams survived the first round of the annual Idaho state championship tournament by victories here tonight, this afternoon and tonight.

In the evening games Rexburg defeated Kootenai, 41 to 29, and Pocatello stamped Arco, 44 to 29. In the afternoon Coeur d'Alene won from Twin Falls, 43 to 26, and Boise outdistanced Moscow, 27 to 21.

A re-bracketing of the schedule places Coeur d'Alene against Pocatello and Pocatello against Boise in the semi-final tomorrow evening. Twin Falls will meet Moscow and Arco will claim its quarter of the consolation round tomorrow afternoon.

**Out on Personal**

Rexburg and Montpellier tonight lost out on their team. Montpellier taking the lead, 12 to 9, at the end of the first quarter, but lagging, 16 to 15, at the half. Rexburg, Montpellier in the second period and Rexburg had things easier during the balance of the game.

Pocatello's little flash against the weaker Arco team, having big leads at the end of each quarter and making it necessary to uncover plays reserved for stronger opponents. Every Pocatello player was given a chance in the game.

In the first game today Coeur d'Alene opened with a scoring attack to lead, 11 to 5, at the end of the first quarter.

At the half, advancing to 23 to 11 at the close of the third quarter as Booth and Jones contributed regularly. Weaver, Bruin center, was the only Twin Falls player to keep in the open, scoring 12 points.

Boone appeared to be the strongest team on the floor in the second game, showing a well-developed scoring machine, as each of the regulars counted equally.

## Famous Swimmers Plan for Wedding

Miss Martha Norelius And Joseph Wright, Jr., Confirm Engagement Rumors

**WHITE SULPHUR SPRINGS, W. Va., March 13 (AP)—**Miss Martha Norelius, Olympic swimming champion, and Joseph Wright, Jr., Toronto, Ontario, sculls champion in 1923, will be married here Saturday night.

The wedding, uniting two of the most prominent names in international sport, was planned as a quiet family affair until a report of the engagement of the famous swimmer and the swimmer leaked out today.

At the same time it was revealed in Chicago that Miss Norelius was granted a divorce last Saturday from Wirt A. McAllister. New York bank clerk Miss Norelius' wedding to McAllister four years ago at the age of 17 had never been publicly acknowledged.

It confirms the rumor that the marriage would take place Saturday, Miss Norelius said that she planned to retire from swimming competition immediately since winning the 400-meter championships for the United States at the Olympics of 1924. Miss Norelius has made a dozen world records, had many national titles, and defended her 400-meter crown successfully at the Olympics of 1928.

## Kansas City Hoop Battle Nears End

Oklahoma Team Qualifies in Semi-Finals and California Squad Remains in Lead

**KANSAS CITY, March 13 (AP)—**The East Central Teachers of Ada, Oklahoma, qualified for the semifinals of the National Amateur Athletic union basketball tournament here tonight by defeating the Murphy-Ditt aggregation from Omaha, 44 to 25.

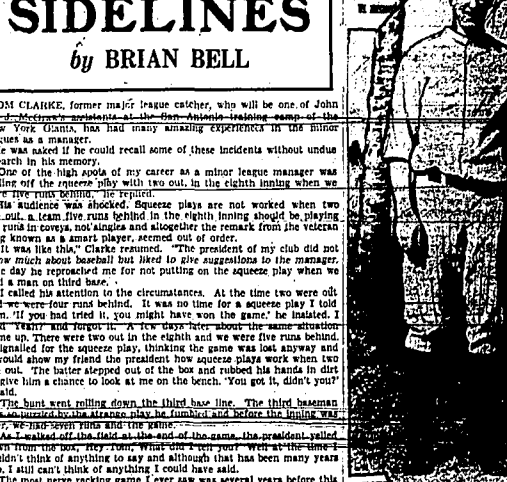

The defeat of the Omaha team, composed of Creighton university ex-cats, might be classed as a mild upset since last night they eased the touted Phillips team, Bartlesville, Oklahoma, out of the tournament.

Then Henry Rogers from Wichita, Kansas, champions of the Missouri Valley Amateur Athletic union basketball league, defeated the Kenosha-A team from Kenosha, Wisconsin, 26 to 21, in a sensational overtime game.

The Oklahomans advanced by the victory to the semi-final round. Olympic club, San Francisco, completely outclassed the Kansas City Athletic club team in the first half of their game, leading at half-time, 22 to 10. The Pacific coast basketball players played a choking defense and a deliberate attack that foiled the Missourians.

The Olympic club became a decided favorite to win the championship by victory over the Kansas City Athletic club.

## Extremes of Yanks' Lineup

TOM CLARKE, former major league catcher, will be one of John J. McGraw's main attractions in the New York Yankees' training camp. New York Giants, had many amazing experiences in the Miller league as a manager.

He was asked if he could recall some of these incidents without undue research in his memory.

"One of the high spots of my career as a minor league manager was during the squeeze play with two out, in the eighth inning when we were three runs behind, in 1911.

"This audience was shocked. Squeeze plays are not worked when two are out, a team five runs behind in the eighth inning should be playing for runs, not hits, and altogether the remark from the veteran being known as a smart player, seemed out of order.

"It was like this," Clarke resumed. "The president of my club did not know much about baseball but liked to give suggestions to the manager. One day he reproached me for not putting on the squeeze play when we had a man on third base.

"I called his attention to the circumstances. At the time two were out and we were four runs behind. It was no time for a squeeze play I told him. 'If you had tried it, you might have won the game' he insisted.

"I said 'Yes' and thought it. A few days later about the same situation came up. There were two out in the eighth and we were five runs behind. I signaled for the squeeze play, thinking the game was lost anyway and I would show my friend the president how squeeze plays work when two are out. The batter stepped out of the box and rubbed his hands in dirt to give him a chance to look at me on the bench. 'You got it, didn't you?' I said.

"The ball went rolling down the third base line. The third baseman was surprised. Both bases played he touched and before the hitting was over, we had seven runs and the game.

"As I walked off the field at the end of the game, the president yelled 'How did you do that?' 'My name' I replied. 'My name' he repeated. 'I couldn't think of anything to say and although that has been many years ago, I still can't think of anything I could have said.

"The most nerve racking game I ever saw was several years before this in the South Atlantic Association when my Columbia team played a 21-inning game with Charlotte. It was the last series of the season and we had to get an even break to win the pennant. We were to have played a double-header that day but Charlotte let us up in the ninth and then we played through the 21st inning when darkness stopped it. However, the tie was as good as won for us and we finally won the championship the last day of the season."

## Fessenden Retains Billiard Crown in Windy City Match

ST. LOUIS, March 13 (AP)—Ray V. Fessenden, Madison, Wisconsin, who is defending his title, overcame a 100-point lead here to defeat New York millionaire, with three feet, James A. Peabody, Chicago, in a national amateur 182-balking billiard tournament match, 300 to 200, in 40 innings.

The highest point on the globe is contractor clicked off 43 billiards in Asia.

## Girl Breaks Own Swimming Record

MIAMI BEACH, Fla., March 13 (AP)—Eleanor Holm, of the Women's Swimming association, New York, clocked 2-5 seconds from her own record for the 300-yard medley individual swim here today to feature the first day of the National Amateur Athletic Union's women's indoor swimming championship.

She finished three yards ahead of Adelaide Lambert, also of the Women's Swimming association, New York. Miss Lisa Lindstrom, New York, was this time.

Miss Helen Madison, 16-year-old swimming star of the Crystal Swimming club Seattle, splashed in ahead of a field of six others to win the 100-yard free style event. She was clocked at one minute 1-5 seconds.

The African "driver ants" kill lions and elephants.

The trachodon, a prehistoric animal, had 200 teeth.

All foot troubles. Ph. Dr. Foster, 845, Astor.

## Logan's Seventh Ward Five Beats Pocatello First

SALT LAKE CITY, March 13 (AP)—Logan Seventh ward defeated Pocatello first ward, 36 to 19 in the first round of play in the Latter Day Saints church Mutual Improvement association basketball game here tonight.

With Staples and Larson coming through well strong tonight, the Logan players had little difficulty leading a substantial lead in every quarter.

The Pocatello five furnished little opposition except in the last quarter year in May.

## CUB BASEBALL TEAMS VIE IN EDEN VICINITY

EDEN, March 13 (Special to The News)—With warm weather arriving the baseball teams of the grade schools over the first aggregation are getting into action. On Wednesday afternoon the Russell-Lane boys' and girls' teams played the Hillside teams. Little did you both get the boys, 8 to 5, and the girls, 22 to 5. A schedule of games for the next two months will be made up soon by the various principals of the schools. The two schools' yearling the greatest number of games in both boys' and girls' divisions will contest for honors at the annual field and track meet that is held each year in May.

### EDWARD L. DOHENEY TRIAL PROGRESSES

#### Oil-Told Conflicting Versions of \$100,000 Transaction Occupy Tribunal

WASHINGTON, March 13.—The oil-told conflicting versions of that \$100,000 transaction between Edward L. Dohenev and Albert H. Fall are today being heard in the District of Columbia supreme court, with the government seeking to convict the oil operator of bribery.

Dohenev's counsel insisted again that Dohenev advanced the money on a loan and was moved by friendship for the then interior secretary, instead of considering it a bribe for the lease to the Elk Hills, California, oil field, which went to his company.

After opening arguments by counsel, three witnesses testified. From these government attorneys established that Dohenev's son, now dead, had withdrawn the \$100,000 from the private bank of Albert H. Dohenev of New York, on November 29, 1921. Later they read to the jury Dohenev's testimony before the senate oil committee that he had loaned Fall the \$100,000 in cash, on that date.

Describes Transaction  
Graham Youngs, New York investment broker who as treasurer of Blair and company nine years ago, delivered the cash to Edward L. Dohenev, Jr., briefly described that transaction.

The government also called Ernest K. Hill, clerk to the senate committee, when Dohenev appeared and told of this loan to Fall. He identified the note Fall gave to him as the one which the latter presented to the committee.

Thos. Mack, clerk of the interior department, identified the note Fall turned in for travel expenses.

Prior to the beginning of the testimony Dohenev was declared to the jury as a briber of a cabinet officer and as a patriotic citizen who contracted to help the government meet a menace from a foreign power in the Pacific.

Owen J. Roberts, as the special government prosecutor, gave the first picture, while the second was given by P. H. Hagan for the defense. Justice William H. Taft instructed the jury of three women and nine men to consider these statements only as to what each side would seek to prove.

### CHAMBER FIXES OXYGEN SUPPLY FOR PNEUMONIA

CHICAGO, March 13.—An all-glass refracting chamber has been added to a Chicago hospital to supply pneumonia patients with a varying source of oxygen.

In addition to regulating oxygen, the chamber enables the physician to regulate temperature and humidity. Windows in the sides of the metal chamber permit nurses and doctors to watch the patient.

Carbon dioxide given off by the patient is removed from the air as it passes through a purifying chemical. The same air then passes over a cooling coil, which brings the temperature down. The air then is returned to the chamber.

### DANGEROUS CROSSINGS MARK HIGHWAY OFFEN

WASHINGTON, March 13.—One unprotected grade crossing to every 14 miles of highway threatens the safety of motorists, the American automobile reports.

The statement was based on a total of 316,874 unprotected miles of the highways of all types. It was estimated that unprotected crossings increase a rate of 100 a year.

In 1928 there was a net increase of 10,077 crossings, despite campaigns to eliminate the transportation hazard, according to figures of the interstate commerce commission.

### SQUADRON MATES VIE FOR ALTITUDE RECORD

CORONADO, Cal., March 14.—Two pilots of the ninety-fifth pursuit squadron at Rockwell field are making a fight for supremacy of the upper air.

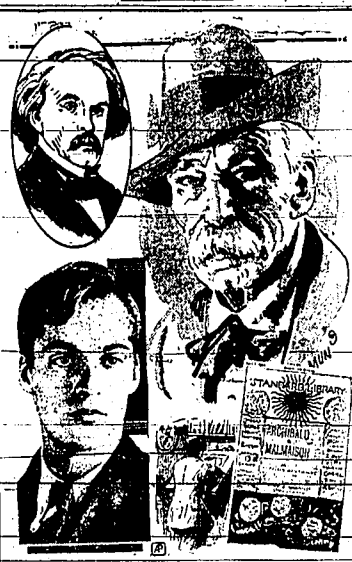

Lieutenant Norman H. Ives established an unofficial record in December when he piloted his P-13 plane 20,000 feet above the earth with a full military load.

Less than a month later Lieutenant George E. Price attained an altitude of 21,200 feet in the same type of plane with full military load. The temperature encountered at the altitude of 21,200 feet was 10 degrees below zero.

The work of the two pilots is part of intensive training at service and altitude ceiling.

### Son of Great Writer Pens 60 Books in Six Decades Of Career in Literature

#### Olcott Deming, Great Grandson of Author of "The Scarlet Letter" Studies To Follow in Steps of Fathers

Olcott Hawthorne Deming (to left), great grandson of Nathaniel Hawthorne (upper left), is study literature. Julian Hawthorne (upper right), son of the famous author, has written 60 books. Title page of first edition of his best known work is shown (lower right).

By CHARLES E. HONCE  
(Associated Press Staff Writer)

CHICAGO, March 13.—Even unto the fourth generation flows the writing genius of Nathaniel Hawthorne. The ambition of Olcott Hawthorne Deming, great grandson of the author of "The Scarlet Letter," to follow in the footsteps of his literary ancestors recalls the fact that a son and granddaughter of the famous American writer also are alive and engaged in literary pursuits.

Out in San Francisco, viewing life and letters from the zenith of greatness, lives Julian Hawthorne, who in the sixteenth year of his writing career has produced as many books, including one at least which may escape the dust bins of literature.

In New York is Julian's daughter, Hildergarde Hawthorne, Mrs. John Milton Cotton, known as a writer of fiction, essays and poetry.

Now a member of the fourth generation of the Hawthorne family has turned his face toward a writing career.

Olcott Hawthorne Deming, a freshman at Rollins college in Winter Park, Florida, is specializing in English and literature courses, preparing himself to write "in the tradition of his fathers."

Julian Hawthorne did not live long enough to see his son Julian take up the pen he laid aside in 1864. Julian then was a youth of 18, and a few years later he was studying civil engineering.

Years before he had received a liberal education—necessary, as thought—against writing for a living. Julian related in one of his books. However, while he was an engineer in New York, he amused himself by writing a short story, "Herper's Weekly" published it. Encouraging, and literature gained an exponent.

He has written three score books since "The Last, Simple Time Past," a volume of reminiscences, was published in 1928, although his first novel appeared back in the early sixties.

His most widely read book, "Archibald Malimston," published in 1879, dealt with a dual personality, one of the first occasions into the field.

His daughter, Hildergarde Hawthorne, began her literary career in 1890, a volume of "Country Interludes" has published many volumes since, including "Deedain's Wonderful Year" in 1927.

Full squadron at Rockwell field are making a fight for supremacy of the upper air.

Lieutenant Norman H. Ives established an unofficial record in December when he piloted his P-13 plane 20,000 feet above the earth with a full military load.

Less than a month later Lieutenant George E. Price attained an altitude of 21,200 feet in the same type of plane with full military load. The temperature encountered at the altitude of 21,200 feet was 10 degrees below zero.

The work of the two pilots is part of intensive training at service and altitude ceiling.

### OFFICIALS REPORT ON WATER SUPPLY

#### Snake River Available Storage 600,000 Acre Feet Less Than One Year Ago

BOISE, March 13.—Six hundred thousand acre feet less storage is now available this year on the Snake river than last year at this time, while the Boise project and the Big Wood river reservoirs reveal greater storage, a report of the department of reclamation said today.

The Snake river had storage on March 1 of 1,251,000 acre feet compared with 2,242,000 on that date a year ago.

Storage in Deer Flat and Arrowrock reservoirs on the Boise project totaled 1,117,000 acre feet compared with 1,780,000 a year ago. The Big Wood river storage totals 12,000 acre feet compared to 810 a year ago. A decrease of 1,000 acre feet in storage on the Big Lost river was shown, the present storage being 18,000 acre feet.

Storage on the various reservoirs on the Snake river follows: American Falls 1,400,000 last year and 940,000 on March 1; Jackson lake 616,000 last year and 491,200 this year; Wascott lake (Minidoka) 50,000 last year and 41,000 this year; Blackfoot reservoir 240,000 last year and 247,000 this year.

### RUSSIAN FLIER BREAKS GERMAN SPEED RECORD

NEW YORK, March 13.—Spilling the air over Long Island sound at a speed of 143 1/2 miles an hour Captain Boris Sergievsky, naturalized Russian flier, today created from approximately the speed mark for seaplanes over a 100 kilometer course combined with a speed load of 2,000 kilograms (4,400 1/2 pounds).

Timed by an official of the National Aeronautical association, Captain Sergievsky's mark will be certified to the international aeronautical body as a new world mark.

The "our" flier "137" miles an hour, led by Richard Wagner.

The plane with which Captain Sergievsky set the new record is a 10-horsepower Sikorsky amphibian with the wheels removed to meet contest specifications and powered with two 25-horsepower Heron motors. It is a three-winged monoplane.

Except for certain streamline features—such as the fuselage—over the last few days, the plane is the same one with which Captain Sergievsky two weeks ago set a new world's altitude record in seaplanes of that class at 19,800 feet.

### Birthday Observed

OLIVER WENDELL Holmes, associate justice of the supreme court, on his way to attend a court conference on the morning of his eighty-ninth birthday.—(AP Photo.)

### BUGS INVADE ROOM OF PRESIDENT IN CAPITOL

WASHINGTON, March 13.—(AP) Bugs invaded the president's room in the capitol here, of the senate chamber today.

An alarm was sounded quietly by the chamber janitor, who found the room first on the couches during the conference with newspaper men.

The exterminator was called to remove the insects, but the insects were a species of mites. Nevertheless, demands were rushed to the chamber janitor to clean the room for a party cleaning of the furniture in the presidential room.

He returned the mites to clean in the center office building, which repaired just last week that the capitol finally had been rid of roaches.

The room of the hubbub is that reserved for the president when he comes to the capitol to sign bills during the day, the plan is the same one with which Captain Sergievsky two weeks ago set a new world's altitude record in seaplanes of that class at 19,800 feet.

### Smart Jewelry Is Not Expensive at Umbaugh's

You may be sure you will get up-to-the-minute jewelry, moderately priced, at Umbaugh's. You know you get the very best values, too, when you select a genuine Prud'Orange Blossom Diamond or a watch from our displays, which include Eppels, Gruens, Hamiltons and Walthams.

Watch our window displays every week for the newest jewelry.

### 500 PERSONS PAY DRUGGIST TRIBUTE

#### Large Attendance at Last Rites For William Seward Davis, Jerome Pharmacist

JEROME, March 13 (Special to The News)—More than 500 persons of this city and vicinity attended the funeral services for the late William Seward Davis, Jerome druggist, at the Latter Day Saints tabernacle here at 2 P. M. today. Mr. Davis died Tuesday at St. Valentine's hospital following an operation. There was a profusion of flowers, offerings of sympathy and friends.

Pall bearers from the Jerome post of the American Legion included Floyd Bodahl, Fred Reed, Dr. W. L. Ward, Delno McManis, L. W. Sandberg and Emory Carr.

Robing Harjo, of Thompson of the Jerome ward of the Latter Day Saints church gave a brief biography of Mr. Davis. Rev. J. S. McCutcheon, pastor of the First Presbyterian church, Jerome, gave a short sermon on death and immortality. The services were also paid to the departed by President Adamson, Carey, president of the Carey stake of the Latter Day Saints church.

The musical numbers consisted of solos by Kenneth Piskman and Carl Oster, and selections by the Latter Day Saints church choir.

Stations at the grave in Jerome cemetery were conducted by the Jerome Masonic lodge.

### FILER TAKES HONORS IN TYPEWRITING TEST

Filer won individual and team honors in a triangular typing meet with Buhl and Twin Falls high schools' commercial departments at Buhl yesterday. The meet was in preparation for the state and district contests to be held in Twir Falls on May 2.

Filer entrants won first and second in both advanced and beginning typewriting events, and Filer's team average was first in both events.

Advanced typewriting event, turning in 59 words net with six errors; Helen Bever, Filer, was second with 55 net and eight errors; Alma Parsons, Twin Falls, third, 48 net with four errors.

Dorothy Goode, Filer, won the beginning typewriting event, with 58 net and two errors; Virgil Lessett, Filer, second, 53 net and five errors; Felton Koehler, Twin Falls, third, 47 net and eight errors.

Dr. Emma Croelandt addressed the Buhl Triangle yesterday afternoon on "How to Keep Fit."

Students who went to Postville yesterday to attend the state tournament included Charles Cox, Raymond Elrod, Charles Colner, Wanda Hoiland, Oliver Kontendall, Margaret Schmidt, John Hahn, Bert Larsen, Junior Powell, Bill Long, Clara Twilling, Bill Thomas, Carl Hollenbeck, Clyde Bacon, Bill Bemiller, Bob Bemiller, Jesse Jennison, Lucile Roberts, Dale Williams, Bud Stewart and Craig Coleman.

The public speaking class of the Twin Falls high school will participate in the service at the Christian church Sunday morning.

# Signal System Guides Pilot To Unseen Field Through Fog

## INVENTOR PERFECTS DEVICE TO BANISH DANGER IN LANDING

### Dots And Dashes Come From Cables Buried Under Ground to Direct Aviators

### INSTRUMENTS IN PLANE RECORD DANGER FLASH

### Earl C. Hanson, Engineer of Chicago, Shrouds Wireless Tests in Mystery

(By The Associated Press) CHICAGO, Ill., March 13.—An audio frequency device for guiding airplanes into fog-shrouded airports has been tested and found satisfactory.

A year's secret testing of the short-wave wireless system, perfected and patented by Earl C. Hanson, Chicago engineer, was conducted at the Ford airport here. Demonstrations were given at the Chicago airport and the St. Louis airport exhibition.

Hanson's method of overcoming the great obstacle of aviation is similar to one he perfected 14 years ago to bring a ship into New York harbor through fog.

Long cables in ground run two miles to the field. One signals dots and the other dashes. The cables, one-fifth of a mile apart at their farthest point from the airport, converge at a "gun coil" at the edge of the field.

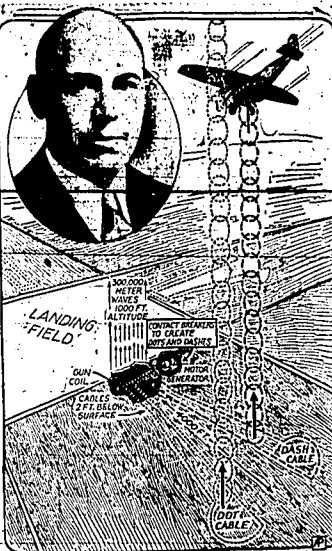

A pilot hearing the signals thus would be guided to the cables, then to the "gun coil." The coil's function is to attract the airplane's engine, as well as to tell him of his altitude.

This can be recorded in a calligraphic meter. In a system of lights on the plane's instrument board. Another warning light on the brake lever tells the aviator after he lands, that he has a certain distance to go.

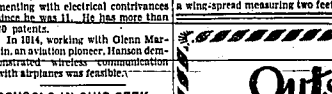

Eliminate hazards. Hazards of flying in fog could be eliminated, Hanson contends, if parallel cables were laid out across the continent, or across mountains. Installation of needed equipment, he says, involves only nominal cost.

Now Dr. Hanson has been experimenting with electrical contrivances since he was 11. He has more than 70 patents.

In 1914, working with Glenn Martin, an aviation pioneer, Hanson demonstrated wireless communication with airplanes was feasible.

Earl Hanson (inset), Chicago engineer, has invented an audio frequency device to guide planes through fog to a landing. Sketch shows how wireless signals are used to direct fog-blinded pilots. Such devices would be set up on four sides of a field.

SCHOOLS IN OHIO SEEK STUDENT GENIUS GERM

CLEVELAND, March 14 (AP)—The director in Cleveland public schools will be studied in a psychological search for genius.

Students are to be directed by William L. Connor, head of the board of education's division of research. After sifted candidates are selected they will be given work with regard to their special abilities.

Badminton and trunk playing in youth as well as they dreamed, will be given particular attention.

Massachusetts has a new law which permits all voluntary associations to be used, including labor unions.

The largest insect known, now extinct, was a dragon fly, which had

## BREVITIES

Leaves For Tennessee—T. H. Jordan left yesterday for a visit in Nashville, Tennessee.

Here on Visit—Mrs. Emma Jensen, Crawford, Nebraska, is here visiting Mr. and Mrs. Gustav Fleischer.

Veterinarian Travels—Dr. H. R. Groome, veterinarian, left yesterday afternoon on a business visit to

Home From California—Mrs. Catherine Arpa, Jerome, returned yesterday after a visit in Oakland, California.

Here on Visit—Miss Edna Kunkle, Fresno, California, arrived yesterday to visit her mother, Mrs. L. Shaub, and brother, Grant Kunkle.

On Business Trip—Miss J. Brown, manager of the Browning Auto automobile company, returned yesterday from a business visit to Salt Lake City.

Home From Weiser—Dr. and Mrs. M. L. Howland have returned after spending the winter in Weiser and will be at home at the California apartment.

Here From Boise—Mr. and Mrs. W. S. Oakley came over from Boise Thursday for a brief stay and are guests at the home of Mr. and Mrs. H. O. Miller.

Lawyers Return—E. M. Wolfe, J. W. Taylor and B. T. Hamilton, Twin Falls attorneys, who presented matters in the supreme court last week, returned yesterday.

Home From Clinch—Dr. R. L. Cartney, dentist, Ellet, accompanied by his son, Thomas, returned last evening after attending the dental clinic in San Francisco given by Dr. F. S.

## INCREASE CAPITAL STOCK

The Southern Idaho Oil company, operating here and elsewhere throughout south Idaho, with headquarters at Boise, has increased its capital stock to \$300,000 from \$100,000 according to certified copy of an amendment to its articles of incorporation filed in the office of the county recorder here yesterday.

Ships Reef Cut—O. E. Wood left yesterday for the shipment of the Portland market. The reef will be worked from the Territory and Idaho lands at Nurtaugh, Meyer, Minneapolis.

## DRIVER HOPES TO MAKE FOUR MILES IN MINUTE

DAYTONA BEACH, Fla., March 13 (AP)—Four miles a minute—240 miles an hour—is the goal Kaye-Don, British racer, hopes to attain when he sends his powerful 25-cylinder "Silver Bullet" roaring over the ocean speedway, soon in an effort to shatter the world automobile

records. The British driver, who has been racing automobiles in England for the last 10 years, expects to take the giant iron steed onto the beach tomorrow to pose for a battery of cameramen and then probably will send it skimming along the speedway at a fairly rapid clip for the first time it has been run since it left its factory in England. Before the test, the car will be christened by Don Kaye-Don, who accompanied him here from London.

## KELLY LIKES TWIN FALLS

James Kelly, proprietor of Kelly's Club cafe, Boise, arrived last evening for his first visit here in several years. He was especially interested in business conditions and prospects.

"I have been thinking a good deal during the past year about branching out. I was in Twin Falls a good many years ago, but didn't realize before how good a town you have here. When I decide definitely to branch out my business, I shall come to Twin Falls first."

# Man-Made Lightning Strikes Planes To Determine Hazards

## DANGERS TO CRAFT CUT BY INSULATION ENGINEER BELIEVES

Arthur O. Austin Discovers Bolts Contact With Protruding Parts of Airplanes

OUTDOOR LABORATORY AIDS IN EXPERIMENTS  
3,000,000 Volts Shoot Over Model Ships, Wing Sections and Motors

By R. P. CHAMBERS, Jr. (Associated Press Staff Writer)

AKRON, March 13 (AP)—Man-made lightning has convinced one engineer that an airplane may be struck in flight but that lightning hazards may be eliminated by insulation.

Arthur O. Austin, (Barber) Ohio, says his experiments show lightning will strike protruding parts of a plane. These he says, may be protected.

The radio aerial and air speed indicator tube were shown to be the most likely parts to be struck. Under certain conditions lightning striking a speeding plane might cripple the ignition system or burn out a bearing, Austin found.

Outdoor Laboratory  
In his outdoor laboratory Austin explores synthetic bolts on model planes, wing section, fuel tanks, motors, aviation systems, and one full-sized plane.

Lightning shot at a wooden propeller in motion, followed to the base of a metal sheath and jumped across to the top cylinder. The motor however, continued to function.

Lightning bolts were used in the laboratory and Austin plans to double the voltage. The laboratory, a maze of electrical machinery, includes three of the largest transformers in the world, each rated at 3,000,000 volts.

High Voltages  
The transformers fed into each other to create the high voltage used. Overhead are transmission towers, insulator strings, oscillators, and a large cage aerial in which the electrical charge is stored.

Austin became interested in the research after the crash last fall of a Transcontinental Air Transport plane. Atritors and scientists generally have contended that lightning is no hazard to planes in flight and that metal planes, even if struck, would carry away the charge without damage.

The engineer plans a public demonstration of his experiments in the summer.

Arthur O. Austin (lower right), Ohio engineer, experiments in outdoor laboratory (upper left) to learn the dangers of lightning to airplanes. How synthetic lightning strikes a model plane is shown (center).

BEALE SELECTS OPERA  
CALDWELL, March 13 (AP)—Yemen of the Guard has been selected by Professor P. F. Beale as the opera presentation by the combined clubs of the college of Idaho this year.

## NEGATIVE TEAMS WIN IN DEBATES

Buhl And Burley Affirmative Contenders Meet Defeat In Assailing Jury Trials

BULL, March 13 (Special to The News)—Buhl and Burley negative teams were both victors in the debates last night on the subject, "Resolved: That Jury Trials Should Be Abolished."

In this city, the Burley negative team, composed of George Booth, Fred Gate and Paul Selby, defeated the Buhl affirmative team made up of Raymond Pulley, Virginia Merrick and Gordon Merrick. Alvin Houtling, Buhl, member of the Buhl Herald club, who was president of the Student body association of the University of Idaho last year, and leading debater in the university, acted as judge.

M. M. Van Patten, superintendent of Buhl schools, accompanied the winning Buhl negative team to Burley. This team is composed of Eunice Paver, Robert Clark and William Moore. The Burley affirmative team was composed of William Hill, Erna Lewis and Larena Mathes. The debate was judged by H. E. Wetzel, Albin instructor in the Albin State Normal school.

## WOOL-GROWERS PLAN FOR MEETING IN BOISE

BOISE, March 13 (AP)—Wool growers of all Northwest Idaho will assemble here tomorrow to discuss organization of a wool marketing cooperative to work under the federal wool board.

The meeting was called by the Idaho Wool Growers' association, which is supporting the cooperative movement as a means of improving prices for wool. Growers have been assured that they would be entitled to loans on their unpaid wool if it is turned over to the cooperative as a means of financing, then the wool will be sold on favorable markets.

## MANY YOUTHS VIOLATE IDAHO GAME STATUTES

BOISE, March 13 (AP)—A flock of youngsters appeared in courts during February for various game law violations and escaped with sound reprimands, the monthly reports of the state game warden indicates.

The violations of the boys ranged all the way from shooting pheasants and ducks out of season to carrying a gun when too young.

Over arrests: 14 were fined, bringing \$24 into the game department fund, while two or three men, principally trap law violators, were jailed.

## OFFICERS IN UTAH CONTINUE INQUIRY

Investigators in Murder of Dorothea Moormeister Believe Theory Strengthened

SALT LAKE CITY, March 13 (AP)—The three weeks' search of the vicinity of the Dorothea-Moormeister murder has brought evidence to officers investigating the case which they believe strengthens their theories regarding the crime, it was announced today.

The county officers have questioned residents near the place where Mrs. Moormeister was slain and have covered every foot of the ground in search of clues.

Their general theory is that Mrs. Moormeister drove to an outlying part of the city on the evening of the murder to keep an appointment, and that she met a man about dark according to the officer's theory she drove with him in her car into the country where she believed a party was to be held with other persons.

The officers believe that a quarrel followed when Mrs. Moormeister realized there were to be no other present, a physical battle followed which ultimately resulted in her being forced from her car and later hit over the head. The fact that her car was damaged leads the officers to believe that the murderer was a motorist who recovered his police only after Mrs. Moormeister had been crushed by the wheels of her car.

County investigators, in revealing their latest work has strengthened this theory, also said today they had definitely traced the source of funds deposited by Mrs. Moormeister in a local institution, and that the source had no connection with the motive for the murder.

## Menace of Cougar Dwindles in Idaho

BOISE, March 13 (AP)—Out of the mountains has come Thomas Hunt with a long story of horn hunting and fussy cougars that has been in the news.

It is to be noted that the state game warden, he described endless tracking in and out of various canyons near and far from Warren, his headquarters, in a vain effort to locate the cougars that once roamed so plentifully there.

Now, he reports, he sees only deer in large numbers, all in good condition. No more dogs, he came upon the core-treasure sign of deer slain by the cougar, one of Idaho's most voracious game getters.

Cougs report is verified from many other sections of the state where hunters for the game department and the predatory animal board have been trailing the cougars.

Of course each year many cougars are killed and their skins go on to some extent but the game campaign is confident that the campaign conducted against them by these agencies is reducing their numbers so that they are no longer such a serious menace to game.

## 300 LIVE SNAKES NOT TO DANGLE OVER FLOOR

HOQUIAM, Wash., March 13 (AP)—Three hundred live snakes absolutely will not dangle and squirm from the heads of dancers at the St. Patrick's day ball of the Hoquiam Elks lodge.

Plans for a serpentine motif were working out just dandy for a while and the dance committee tentatively decided to suspend the snakes by plastic falls from the ball room ceiling.

An advertisement calling for 300 snakes was issued.

The advertisement, drew more than snakes. There was a flood of protests and a threat of restraining action by the Society for Prevention of Cruelty to Animals. The committee met hurriedly last night and cancelled all the biological plans.

In fairness to the snakes it should be said the only kind hereabouts are the garter variety.

Money made of feathers was on of the first mediums of exchange.

## ONE TIME DRAMATIC STAR DIES ON COAST

LOS ANGELES, March 13 (AP)—Louis Lomon, former wife of Willard Mack and who once was a dramatic star, died here last night. She was 43 years old. Death was caused by bronchial pneumonia.

The first law school in the United States was established at Litchfield, Connecticut, in 1783.

### DECLAMERS VIE IN DISTRICT CONTEST

Students From Four Schools Participate in Sub-Division Forensic Competition

Everything is ready for the sub-district declamatory contest, which will be held at the high school here. The contest, which is one of the annual events of the school year, will begin at 8 P. M. and the dramatic, humorous and oratorical divisions will meet at 3 P. M. and the dramatic, humorous and oratorical divisions will meet at 3 P. M. and the dramatic, humorous and oratorical divisions will meet at 3 P. M.

Students from the high schools of Twin Falls, Bull, Filer and Hungen will participate in the extremely anxious division there is but one entrant, Billy Scott, Twin Falls. Hungen has no entrants.

Where there is competition in any division the schools from which competitors enter will not be given until after the contests. The following is a full list of all entries:

- Extemporaneous—Billy Scott.
- Oratorical—"The Cost of War," Leonard Hall; "The Flag We Follow," Raleigh Davis; "The New South," Francis Van Orman; "The Constitution," Gerald Wallace.
- Dramatic—"The Son of Steve Anderson," Julia Miller; "The Winds of Time," Gertrude Nieborn; "The Artist's Workshop," Irene Robinson; "Jean Val Jean and the Bishop," Louis Ford.
- Humorous—"Goldstein's Fourth of July," Robert Clark; "Billy Brad and the Ladies," Lawrence Jones; "Cousin Suggsions," Ruth Gelsler; "Cousin Bessy's Bath," Irene Sharp.
- One-act plays—"Codyville under Difficulties," Carl Bar Smith; Helen Martin and Ralph Robinson.

### TWIN FALLS RESIDENT FINDS HAWAII RESTFUL

"Honolulu is a good place in which to rest," it was stated yesterday by C. F. Lind, who, accompanied by Mrs. Lind, returned here after spending more than two months in Hawaii. "The soft, humid, tropical atmosphere speeds results in the better adjusting himself to the habits of the city. It is a beautiful and modern city and the new buildings all are erected with a view of combining efficiency and beauty. Conditions there are slow on account of the running of the tourist traffic by about 50 per cent, due to the Wall street crash, but are better than on the Pacific coast."

### Boise Boys Wait For Sheriff Here

Two Boise high school boys, 14 and 16 years old, who tired of school and home conditions set out with slender resources to see the world are in the juvenile ward of the county jail here awaiting the arrival of the Ada county sheriff who is to take them back home today.

With a third youngster, 12 years old, who was leaving Boise to join his father in a Nevada mining camp, the two high school boys were picked up by police officers on the street here late Wednesday night when they failed to convince the officers with their own accounts for their presence here. Developments yesterday fastened upon the two older boys the responsibility for theft and destruction of two chewing gum vending machines taken from the 12-13-14-15-16 market on Shoshone street north Wednesday night. After breaking the machines the boys could not bring themselves to leave behind two small padlocks, which were found in their pockets when they were taken to the police station a little later. These padlocks clinched the evidence that connected the boys with the theft of the vending machines, and when confronted with the evidence, they confessed. The two machines, they said, yielded just 80 cents. Combined resources of the three lads when they were detained by the officers, totaled \$1.55.

The younger lad insisted that he had protected against taking of the vending machines and had taken no part in it. His restless companions did not contradict him. Provision was made here yesterday for him to continue on his journey to his father.

Farmers Store has been sold. It is now the Peoples Market. Some fixtures are for sale, viz, one 10 ft. refrigerator meat counter, one large scale, 1 scale, 1 roll top desk, 4 second hand electric washers, shelling counter, shoe cases, etc. Also a basement full of 3 varieties of apples \$1 per bushel. C. G. or K. G. Farac will serve you. adv

Twin Falls invites you to attend this outstanding **STYLE EVENT** which will feature the newest style trends for the season just beginning. Come—bring the family—and see this interesting and informing Spring Opening which Twin Falls Merchants have planned for you!

**RADIOLAND DEMAND AIDS TIME SERVICE**

Precise Standards With Call For Highly Accurate Reports Keep Bureau Jumping

WASHINGTON, March 13 (AP)—Precise radio-frequency standards with demands for highly accurate time determination keep Uncle Sam busy these days.

For it is the time signal transmitted by telegraph from the United States naval observatory and re-transmitted by radio from Arlington and other radio stations that provides the time for the country.

H. E. Gould, chief of the time section of the bureau of standards, says if the signals are received directly and automatically, the error is seldom as much as .20 second, with the average error generally less than .03 second.

In an underground vault of the naval observatory in Washington there are three high precision clocks which are maintained at constant temperature and pressure. These clocks record sidereal star time and are compared at frequent intervals with the passage of certain stars over the meridian. They keep time that they never have to reset unless an accident happens to them.

Since the length of the sidereal day does not agree with that of the solar day which is used in every day life, another clock operating on mean solar time is maintained at the observatory for transmitting time signals. It is compared daily with the sidereal clocks and corrected to agree with mean solar time as computed from the time of the stars.

**EXPORT OF AUTO PARTS DOUBLES IN FIVE YEARS**

WASHINGTON, March 13 (AP)—Customers abroad have doubled their demand for American automobile parts in five years, according to the department of commerce.

Exports in 1926 totaled \$89,064,707, an increase of 9 per cent over the preceding year and 18.7 per cent of the total automotive shipments.

Wheels for many years have led the market for replacements, accessories, and service appliances, continued to hold the place. Exports to the dominion in the service appliance class alone topped the \$1,000,000 mark.

**CHAMBER FIXES OXYGEN SUPPLY FOR PNEUMONIA**

CHICAGO, March 13 (AP)—A de luxe refrigerating chamber has been added to a Chicago hospital to supply pneumonia patients with a varying course of oxygen.

In addition to regulating oxygen, the chamber enables the physician to regulate temperature and humidity. Windows in the side of the metal chamber permit nurses and doctors to watch the patient.

Carbon dioxide given off by the patient is removed from the air as it passes through a purifying chemical. The same air then passes over a cooling coil, which brings the temperature down. The air then is returned to the chamber.

**Uncle Sam Expects One Person in 30 to File Returns on Income Tax**

WASHINGTON, March 13 (AP)—About one person in 30 is expected to file income tax returns for 1929 before March 15.

Uncle Sam looks for more than 1,000,000 returns from people in these classes: all single persons with a net income of \$1500 or more for the year, or a gross income of \$2500 or more; all married couples who had net incomes of \$1500 or more, or gross incomes of \$2500 or more.

All these must fill out special forms with collectors of internal revenue to file districts in which they live. On the first \$4000 in excess of exemptions and credits, there is a tax of one-half of 1 per cent normal tax. On the next \$1000 there is a 2 per cent normal tax, with a 4 per cent normal tax on the balance of net income. For net incomes exceeding \$10,000 there is a surtax.

All income from any source whatever, unless exempt from law is classed as "gross income." "Net income" refers to gross income less deductions as permitted by law.

**DAUGHTERS CROSSINGS MARK HIGHWAY OFFER**

WASHINGTON, March 13 (AP)—One unprotected grade crossing in every 14 miles of highway threatens the safety of motorists, the American automobile reports.

The statement was based on a total of 210,874 unprotected miles of highways of all types. It was estimated that unprotected crossings increase at a rate of 1000 a year. In 1929 there was a net increase of 100 crossings. Despite campaigns to eliminate the transportation hazard, according to figures of the interstate commerce commission.

### COLLISION DAMAGES TWO CARS AT BUHL

Touring Model Crashes Into Heavy Sedan Parked On West End City Street

BUHL, March 13—Two cars, a light touring, and a heavy sedan owned by a Twin Falls man, whose name was not learned, were damaged in a collision Tuesday evening in the 500 block on lower Broadway. The touring car, a 1929 Buick, was approaching from the west on Broadway, when one of the approaching cars turned out to pass, driving directly into the path of the touring car. The driver in order to avoid a head on collision turned into the street and struck the parked sedan, which escaped with badly mangled fenders and bumper. The light car lost its wheel, fenders, lights, fenders and was otherwise damaged. No names were turned in to the night marshal, James Wilson, and the touring car was towed to the parties outside of court.

Mrs. Frank Hazards has returned to her home here from Twin Falls hospital, where she submitted recently to a major operation. Mrs. Will Hayes is spending several days this week at the home of her father, Ben Hayes, Kimberly.

Mrs. Cullen Wilson was in the ill at her home in the Poplar Hill district for the last six months, submitted to a major operation at a Twin Falls hospital Tuesday. Mrs. Harry Kinzer, assisted by Mrs. Frank Bonar, was hostess to the Northside club Wednesday afternoon at St. Patrick's program. Roll call was answered with Irish jokes. During the business session two new members, Mrs. Turner and Mrs. Brown-Brislow, were installed. Mrs. O. D. Brooks was elected president of the group, Mrs. Maurice Carrington vice president, and Mrs. Strickland, secretary-treasurer. Mrs. I. M. Patterson gave an instructive talk on "Musie" and played two violin numbers; Mrs. Carrington played a piano solo, and Mrs. Brooks gave a humorous Irish reading. The next meeting will be March 20.

What and potatoes led to the milk-coin shipments from the local station during February according to J. W. McCreary, station agent. Potatoes headed the list with 95 cars and other shipments were as follows: Wheat, 25; mill products, 1; apples, 1; onions, 1; beans, 3; cattle, 5; horses, 1; sheep, 4; milk, 11; feed, 10; cash, 2.

Mrs. and Mrs. B. E. Leland were guests of the Deep Creek-Bridge club Wednesday at the home of Mrs. and Mrs. George Mack. At a week lunch, three tables were in play during the afternoon and high score went to Mrs. J. C. Olson, and Charles Meeks, second high was captured by Mrs. and Mrs. W. A. Thompson. The next meeting will be March 20, at the home of Mrs. and Mrs. Ernest Molander.

Attorneys from Tekoa, Washington, are expected here in the near future to assist with settling the estate of the late Mahlon Poore, who died recently at Tekoa. The deceased owned farm property in the vicinity of Buhl which was left to his widow, Mr. and Mrs. Poore have visited here a number of times.

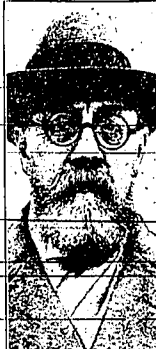

Mrs. Roy Felt has been ill at her home here this week with pneumonia. Dr. H. H. Hayman, of the College

### BEE MEN INSPECT COLONIES IN IDAHO

Frank Beach, President of Association, Tells of Efforts to Check Diseases

BURLEY, March 13 (Special to The News)—Frank Beach, president of the Idaho State Beekeepers' Association, says that a special effort is being made to have certain laws observed which were passed to protect bee colonies from the ravages of disease.

A committee has been appointed, consisting of H. D. Bradshaw, Wendell, William McKittrick, Star, J. Redfield, Idaho Falls, C. H. Blison, Twin Falls, and Mr. Beach, Burley, as a supervising committee to have charge of the work of inspection in their respective districts. Their duties, Beach says, are to see that infected colonies are destroyed and that the bees are kept in a healthy condition.

Beach asserts that foul brood is being placed under control in Idaho, and that some further work will be done in cleaning up the state. He says that compliance with the law will be insisted on and that those not being cooperative to arrest, but complying on subject to arrest, will be instructed to procure licenses as the law provides.

the winter with his family.

The good weather of this week has caused the farmers into the fields, and with tractors and teams are to be seen at work on many farms.

D. Palmer and George Mack, Burley, made a business trip to Twin Falls Tuesday.

Mrs. Ada Seely and Luella Johnson are absent from school, ill with the measles.

### JURY DECLARES BURLEY MAN GUILTY OF CHARGE

BURLEY, March 13 (Special to The News)—In district court George Woodall was found guilty by a jury of battery on the person of a neighbor committed Lewis, who pleaded guilty to forgery, procured counsel who asked permission to withdraw her plea.

Judge A. B. Barclay set Saturday for the hearing.

A special venire of 14 additional jurors was called in the case of the state against Edward Wilson, charged with night time burglary.

Now for a rip-roaring 2 for 1 lot sale. Buy one and get one free. C. G. and K. O. Fargo sell them. adv.

# Road-Building And Spring Brighten Employment Outlook

## WORK LOOMS FOR ARMY OF MEN IN MANY OF STATES

Deficiency Appropriation Bill May Provide Sum of \$125,000,000 For Improving of Traffic Lanes

Director of Department of Labor Looks Upon Highway Construction as Best, Prospective Relief

By FRANK I. WELLES (Associated Press Staff Writer) WASHINGTON, March 13.—A vast amount of road building work is to start in virtually every state, as forecast by a substantial remedy for the unemployment situation.

Disturbances in half a dozen industrial centers the past few weeks are attributed to a sharp decrease in employment, "inherited from the latter part of 1919."

The level of employment in manufacturing industries in December, 1919, was 38 per cent lower than in December, 1918, and employes' earnings were 48 lower.

Highway construction is expected to start as soon as weather conditions permit.

May Increase Federal Aid

The deficiency appropriation bill, favorably reported by the house of representatives, provides for increases that would bring federal aid to \$125,000,000. The state appropriations would give road building its greatest impetus in several years.

Francis I. Jones, director of the department of labor's employment service, sees highway construction as one of the chief factors in prospective relief of unemployment.

The employment service has started great numbers of unemployed toward arable lands of Louisiana and the Missouri-Dakota.

Approximately 600,000 will follow the wheat harvest from Texas to the Red river valley of the Dakotas and continue to spread harvests in Washington and Oregon. The Texas cotton harvest is expected to take 200,000 workers.

McNally's Oregonians

Mr. Jones says unemployment now is due to certain changes in the nation's industrial structure. There is less demand for labor and wages are inclined upward, he finds, but high-speed machinery is replacing hand work in many instances.

This trend is most noticeable in the railway, coal, steel, boot and shoe and textile industries.

Indication that production is maintaining a high level, Mr. Jones points out, is seen in reports of the iron and steel industry, long a barometer of industrial conditions generally.

Abnormal Cuts Wages

While continued opening of new garage, restaurants and filling stations along highways is mentioned as a source of employment, the industry absorbs labor released by another, Mr. Jones says such absorption is accompanied by a lower wage scale.

This view is backed by the department of agriculture's outlook report, which says that with industrial activity expected to continue at lower levels than a year ago, a somewhat larger supply of labor for farm work will be available, probably at slightly lower wages, during the first half of 1920.

Even with the 1920 handicap the trend of employment turned upward in February and early February, Mr. Jones reports indicating that conditions are in accord with the upward course of the same months in previous years.

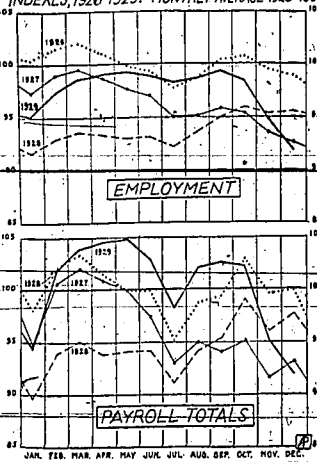

GEORGIA AIRPORTS INCREASE

ATLANTA, 13.—Since Georgia state air four airports in the state have increased from seven to 22.

American Librarians will meet at the Grand Canyon in Arizona this June, before their convention in Los Angeles.

Washington's state per capita wealth in 1920 was \$2594, which was \$894 above the nation's.

### MANUFACTURING INDUSTRIES - MONTHLY INDEXES, 1926-1929. MONTHLY AVERAGE 1926-100

This graph, showing labor and wage declines at the close of 1929, provides a comparison of conditions over the last four years.

## Inventor Claims Dirigible Safe With Multiple Gas Bag System

SPRINGFIELD, Ill., March 13 (AP)—Elimination of a great portion of the storm hazards of the air and making the upper highways safe for travel are the virtues which W. E. Edwards, Springfield inventor, claims for his dirigible type upon which he has just been granted a patent.

"The standard gas bag is not inflated from its model, but is multiplied by three or more. These bags are replaced around the outside of the cabin, with the center left free for air to rush through."

This, Mr. Edwards claims, will greatly cut down air resistance and establish something near to an equality of air pressure on the inside and outside of the ship, all of which, he hopes, will enable the dirigible to ride the turbulence of storms better than present dirigibles can.

The rush of air through the central portions will be utilized to drive propellers, by means of propeller fans, and these motors are expected to furnish light and heat to the ship.

Landing is to be accomplished by horizontal propellers suspended underneath the ship, like inverted helicopters, which will be used to draw

## WASHING OF CABBAGE IMPROVES SAUERKRAUT

MADISON, Wis., March 13 (AP)—A superior grade of sauerkraut has been made at the University of Wisconsin's college of agriculture merely by washing the cabbage leaves.

Experiments show that washing rid the leaves of thousands of useful bacteria, thus leaving a better opportunity for bacteria inside the plants to work when the cabbage goes to a sauerkraut vat.

C. H. Kellner and Z. B. Fred, who reported the findings to the Society of American Bacteriologists, said they found an average of 2,000,000 bacteria to a gram on unwashed cabbages, thus leaving a better opportunity for bacteria inside the plants to work when the cabbage goes to a sauerkraut vat.

WASHINGTON (AP)—Women pilots licensed in the United States total 12. California, with 42 students, leads all states, having supplanted New York, which is second with 31.

# power for the full piston stroke

The greater power of one gasoline over another is determined by the expansiveness of the explosion. Maximum power can only be developed when the explosion expands, and pushes the piston clear to the bottom of the stroke.

# VELTEX GASOLINE

The greater power Veltex Gasoline develops in a motor is due to its complete and expansive explosion when the spark hits it.

Veltex Gasoline, because of its special refining, enters the motor as a true combustible vapor. Consequently it applies a full depth power push to the piston head—and since all of it explodes it gives you more power, more speed and more mileage per gallon than less expertly treated gasolines.

## Police Dog Lives Down Reputation Of Breed by Showing at Exhibition

By LORENA HICKOK (Associated Press Staff Writer) NEW YORK, March 13.—They don't call them "police dogs" any more. They call them "companion dogs."

Living down the bad reputation of her breed is the job cut out for Otisella's Loda in the remaining few days of the Westminster Kennel Club show, which she is making so well.

Loda, who became one of the famous companion dogs when she was judged third best dog of nearly 2000 breeds at the Westminster Kennel Club show, tells her preference for those she knows, only by wagging her tail.

She might have won the grand championship had she not been a little too nervous through the chestnut she is in the grounds of ordinary dog lovers Loda's points are not what will make her famous. It's her manner.

When German shepherds began to be common the wolf idea spread—that the breed is a real cross between wolf and farm dog, apt to revert to the wolf almost any moment.

Then things began to happen, as badly bred dogs appeared. Twining schools for dogs sprang up—where, too often, all they accomplished by beatings and stern discipline was to ruin the animal's disposition and make him distrust humans.

"Police dogs" began biting people. They acquired a bad name.

Now comes Loda, just to show that all German shepherds do not have

to be "police dogs."

She is not quite two years old, trained by George Simpson, a mild-mannered German on Mrs. Geraldine Rockefeller Dodge's estate at Madison, New Jersey.

Loda has been taught that every human being is her friend. Anytime in the world can stroke her wistfully BLACK DOG, and then gaze up with an entirely friendly expression.

Loda made 10,000 friends at the final judging by going through her paces in the ring without collar or leash. She never made a false step once.

More remarkable was her performance afterwards—standing all alone, without muzzle or collar or leash, while Mr. Simpson was busy packing up and letting anyone who wanted to pet her do so.

It was hot, the air was heavy, and Loda had been on a bench for three nights and three days. Many of those eager admirers didn't know how a dog likes to be petted. They asked her and tickled her and grabbed her by the nose.

Loda never showed even the slightest sign of fatigue or "nerve."

## HUGE GUERNSEY HERD GOES UNDER HAMMER

WATERLOO, Iowa, March 13 (AP)—Dominant in the American show rings for 20 years, the famous Guernsey herd, headed by the late Wilbur W. Marsh, was sold to the highest bidder, a prominent national figure in the democratic party, it is to be dispersed under the auctioneer's hammer.

In 1911 the Marsh herds contained 800 Guernsey cattle, most of them imported. That year, with 10 head, Marsh established a show ring record which, it is believed, still stands unbroken. At seven major shows, including the national dairy show, the Marsh herd took every first-place, with but one exception, and championship of the breed. One young calf placed second at the national dairy show.

About the same time Marsh purchased the herd of 42 cattle owned by J. Pierpont Morgan.

WASHINGTON (AP)—Women pilots licensed in the United States total 12. California, with 42 students, leads all states, having supplanted New York, which is second with 31.

## SCIENTIST REPORTS ON "SPLINT COAL" VALUE

PITTSBURGH, March 13 (AP)—"Splint coal," long considered a minor term, has been found by the bureau of mines to be a distinct type of coal.

Results are reported to the American Institute of Mining and Metallurgical Engineers by Reinhardt Thiesen of the bureau.

"Because splint coal produces a hot cheerful flame," he says, "possessing a clean, 'block-like' pattern, and having a high resistance to abrasion, it has lately become much valued for domestic, gas-producer and steaming purposes."

## AMERICANS PLAN AIR EXHIBITS IN URUGUAY

WASHINGTON, March 13 (AP)—The centenary celebration of the republic of Uruguay will be marked with an air congress for all American nations, according to consular advice.

Aeronautical subjects will be reviewed and it is proposed to have an international exposition of military planes, transports, aviation motors, aerial photography and signaling.

## Chosen May Queen

MARY B. BROUGHTON, Atlanta, was chosen queen of the May to rule over annual festival at Randolph-Macon Women's college, Lynchburg, Virginia. (AP Photo.)

## GERMANY PLANS FOR GRAF'S SISTER SHIP

WASHINGTON, March 13 (AP)—Plans for construction of a giant dirigible, later to be the Graf Zeppelin, are reported to the department of commerce by H. C. Schuette, Paris trade commissioner.

Work on the air liner, to be known as the LZ129, will begin this year with completion scheduled for the summer of 1921.

The ship will be about 240 feet long, in contrast to the Graf's length of 778 feet. It will have many of the design features of the British R-100 and R-101, especially in arrangement and situation of passenger quarters.

PRIEST BUYS THREE PLANES

ANCHORAGE, Alaska (AP)—Father George H. Woodley, Jesuit missionary, will return to Alaska this spring with three airplanes to be used in parish work. He expects to transport medicine to distant points and one plane will be outfitted as an ambulance. He is a pilot.

Five horsemen will patrol a 10-mile front in Kern county, California, to protect young grain from roving elk.

# Hills Bros Coffee

*Coffee has a flavor no other coffee has because it is roasted*

# a FEW POUNDS AT A TIME

This continuous process—Controlled Roasting—develops a flavor no bulk-roasting method can produce.

EVERY BERRY of Hills Bros' famous blend of coffee is roasted evenly by their patented, continuous process—Controlled Roasting. None are overdone—none underdone.

In spite of watchful care, coffee roasted in bulk cannot be roasted as evenly. There is bound to be variation in flavor.

One cup of Hills Bros. Coffee will convince you of how perfectly it is roasted. The aroma, the full-bodied strength, the flavor—all meet every taste requirement for coffee.

Ask for Hills Bros. Coffee by name. Look for the Arab—the trade-mark—on the can. Hills Bros. Coffee, in the original vacuum pack, is sold by grocers everywhere. All the distinctive goodness produced by Controlled Roasting is sealed in.

Free from the original vacuum pack. Daily opened with the key.

ACT IN 7 SECONDS

A cordial invitation to come in and inspect our large assortments of new spring merchandise

**SAVE**  
**STEVENS-VAN ENGELEN CO**  
**STORES**

Everyone welcome whether you buy or not. Drop in—You are missing something if you are not acquainted with our values

**SPRING** invites the fashion wise

to  
**Stevens-Van Engelen Company**

A complete selection of stunning **SPRING COATS**

Slim and suave of line, the newer coats are smart complements for the longer frocks. Many are beautifully trimmed with fur, or self trimmed with cape effects. Economically priced the S-V-E way—

**\$9.75 \$14.75**

**The Style Letter**

VOL. I, NO. 1 SPRING, 1930

Fashion Forecast and Style Notes

**SPRING USHERS IN A MODE OF ELEGANCE**

The moving finger of fashion writes "Elegance" on Spring style sky this season. A straight line may still be the shortest distance between two points, as we were taught in geometry . . . but Parisian courtiers seem to have forgotten it in designing the smart modes arriving now for Spring. Seam lines, sleeve lines, yoke lines, collar and cuff lines . . . meander gracefully instead of proceeding directly as in the "flapper age," just past. The result is a most pleasing gracefulness . . . a charming intricacy of design that is most flattering. And so we find ourselves just a shade more sophisticated . . . just a shade more mysterious . . . than a shade more intriguing than we have been for many a Spring.

**Capes Cut Spring Capers**

Capes to the right of us . . . capes to the left of us . . . cape all-around-us this season. Capes on dresses. Capes on suits. Capes on coats. Long and three-quarter capes to wrap, for both daytime and evening.

**An Important Straw Vote**

That the straws have it, is not to be denied! In millinery circles this Spring. Pull linen veils, leading color . . . brown and navy follow close behind. Linen and dumbo blue, Cornishian green, Paris plage and Violesse violet have fashion's approval for Spring.

**West Is East, It Seems**

Just when the almond-eyed ladies of the East have accomplished the change from trousers to skirts . . . we contrary occidental women find ourselves enamored of the idea of trousers for practically all occasions except formal. Breakfast pajamas . . . luncheon pajamas . . . bride pajamas . . . beach pajamas . . . and now shopping pajamas! At least that is the logic set by the smartest designers and authorities predict it will make its way northward. Do you suppose our Main Street will see a "pajama invasion" this summer?

**Formal Exposition**  
**Of the Modes for Spring**

May we show you what's new for spring . . . in frocks, coats, ensembles, suits, hats, necessities? All the latest, smartest modes are here in profusion . . . the fashions chic women will be wearing when they promenade . . . afternoon . . . evening . . . dance . . . dine . . . during the season—just beginning. . . outside socially . . . invited to some in-and-view them.

Brilliantly colored silk prints, flat crepes, and georgettes. All sizes

# Babson Says Tourist Trade Vital Factor in American Business and Predicts Huge Traffic in Summer

## Bay State Statistician Shows Traveling To Be Essentially Domestic Industry with Total Value of 4 1/2 Per Cent of National Income

By ROGER W. BABSON  
BOSTON, Mass., March 13.—The tourist business has grown to the proportions of a major industry. An estimate of all expenditures in 1929, by tourists, vacationists and campers, is about \$4,000,000,000. Most of this was spent in the United States. Only 21 per cent of it, or \$860,000,000, was spent in foreign countries. Hence the tourist trade is essentially a domestic industry, and of great magnitude and importance. Its total value is about 4 1/2 per cent of the total output of the country. Its stimulating effects spread out over scores of other trades and industries. Retail business, gas, hotels, sporting goods, wearing apparel, amusements, karage, hotels, restaurants, amusement places, in fact all business in the local area affected feel its beneficial influence.

Relay on Tourists.  
Railroads, steamship lines, motor bus companies, and other transportation items rely on tourists traffic for a considerable part of the passenger business. The air transport companies are now planning on tourist traffic in increasing volume. Air touring may become as common in a few years as automobile, railroad and steamboat tours are at present.

The local living expenses of tourists are distributed among the local business men in the cities, towns and resorts which they visit. For example 25 cents out of each dollar goes to the hotel where the tourist stays, and 25 cents goes directly to the people who supply the food. The hotel in turn spends 71 cents of its share locally for supplies, taxes, and wages, and 29 cents out of every dollar of the tourist's money stays in the locality where he visits.

Winter Resort Business.  
The tourist trade has held up remarkably well this winter considering the stock market decline and the recession in general business. Florida and California both report a larger number of tourists than last year. Expenditures here, perhaps, been slightly lower per tourist, but the increased number brings the total value of the trade fully equal to a year ago and probably somewhat larger. More people of moderate means are noticeable among the tourists at the famous winter resorts, possibly because these were less affected by stock market losses than the wealthy. Also, the slowing up in business and the resulting depression has made it possible for many people to find time for traveling which was denied them in the activity of the preceding winter. More important still, however, is the underlying upward trend of the tourist trade, which, like the movies, continues to grow regardless of business depression or prosperity.

Summer Touring Expected.  
The experience of the leading winter resorts leads to expectations of a fairly good summer tourist trade this year. Of course, financial losses and unemployment may tend to limit the amount which the tourist can spend, but the slowing up in business often means more spare time and may tend to increase the number of individual tourists. The total amount of expenditures should be large. Summer resorting is expected to be a record-breaking year. The Massachusetts Bay colony, should attract many people who have never visited there before. Last year New England's tourist trade amounted to something like \$250,000,000. This year because of the anniversary program it should approach at least \$300,000,000. Massachusetts will get a larger share of this trade than in previous years. The state of Maine is also rapidly forging to the front as a summer resort. Over a million people from other states came to Maine last year for fishing, hunting, camping and other pleasures. They spent more than \$100,000,000. New Hampshire with its beautiful White Mountains, has for many years been a mecca for summer tourists and it has recently has attained great fame as a winter sports resort. New Eng-

### Former President, Chief Justice Lies in State.

### Senate Candidate

It is believed that the Republican Party in California has a strong chance of electing a Senator from that state. The candidate is O. H. P. Shielley, former national committeeman for Montana, is a candidate for the Republican nomination for United States senator in that state. (A) Photo.

### SCHOOLS IN OHIO SEEK STUDENT GENIUS GERM

CLEVELAND, March 14.—The treasurer in Cleveland public schools will be studied in a psychological search for genius. Research for especially capable students is to be directed by William L. Comer, head of the board of educational directors of research. All gifted students are selected they will be given work with regard to their special abilities.

### MANY YOUTHS VIOLATE IDAHO GAME STATUTES

BOISE, March 13.—A flock of youngsters appeared in courts during February for various game law violations and except when soundly reprimanded, the monthly report of the state game warden indicates. The violations of the boys ranged all the way from shooting pheasants and ducks out of season to carrying

### Menace of Cougar Dwindles in Idaho

BOISE, March 13.—Out of the mountains has come Thomas Cook with a long story of hard hunting and fewer cougars than he has seen in years. In a report to the state game warden, he described endless tramping in and out of various canyons near and far from Warren, his headquarters, in a vain effort to locate the cougars that once roamed so plentifully there. Now, he reports, he sees only deer in large numbers all in good condition. No more does he come upon the once-frequent sight of deer slain by the cougar, and Idaho's most voracious game eater.

Cougar reports are verified from many other sections of the state. The United States game department and the predatory animal board have been trailing the cougars.

Of course each year many cougars are killed and their work goes on to some extent but the game department is confident that the campaign conducted against them by these agencies is depleting their numbers so that they are no longer such a serious menace to game.

### Miss New Mexico

GAYNELE HALBERT, Las Vegas, New Mexico, will represent her state in the annual Miami, Florida, beauty contest. (A) Photo.

### UTAHN FINDS MUSK OX SKULL IN LAKE SANDS

PROVO, Utah, March 13.—The hairy musk ox roamed the shores of Lake Bonneville when that lake was at its height. This is regarded as having been proved conclusively by the recent finding of a horned musk ox skull under 60 feet of gray sand at the Bonneville Terrace level. The skull with the horns intact was discovered in the upper city gravel pits by R. V. Tyler, Provo. Other similar finds in lower terraces have shown that this animal lived when the lake was declining, a period estimated about 8,000 years ago. But it is the opinion of Dr. George H. Shreve, professor of geology at Brigham Young university, who identified the find, that this animal lived at least 10,000 years ago in the Pleistocene period. Otherwise it would not be buried in sediments deposited when the lake was at its highest level, he said. The skull is well preserved and apparently belonged to a young individual.

### BEALE—SELECTS OPERA

CALDWELL, March 13.—"You men of the Guard" has been selected by Professor F. P. Beale as the opera presentation by the remodeled opera clubs of the college of Idaho this year. This opera, a Gilbert and Sullivan, will be given May 15 and 16.

Scientists say grasshoppers are highly nutritious and native American Indians have been known to eat them, roasted as a delicacy.

### Colds

TO RELIEVE—Start immediately with a new and improved system of cold relief. It is more thorough in action and has no harmful side-effects. The All-Vegetable Laxative.

Aside from Canada, France is this favorite goal of the American tourist. The tourist trade has held up remarkably well this winter considering the stock market decline and the recession in general business. Florida and California both report a larger number of tourists than last year. Expenditures here, perhaps, been slightly lower per tourist, but the increased number brings the total value of the trade fully equal to a year ago and probably somewhat larger. More people of moderate means are noticeable among the tourists at the famous winter resorts, possibly because these were less affected by stock market losses than the wealthy. Also, the slowing up in business and the resulting depression has made it possible for many people to find time for traveling which was denied them in the activity of the preceding winter. More important still, however, is the underlying upward trend of the tourist trade, which, like the movies, continues to grow regardless of business depression or prosperity.

Summer Touring Expected.  
The experience of the leading winter resorts leads to expectations of a fairly good summer tourist trade this year. ## CHAIN STORE CHANGES MANAGERS AT RUPERT

RUPERT, March 13 (Special to The News)—Herman A. Johnson, Rupert business man, and his brother, Harry Johnson, Preston, Idaho, closed a deal Wednesday night for the purchase of the O. P. Shager system grocery store here, buying from Hayward Reubens, former owner and manager.

Harvey Johnson, who for the last two years has been an O. P. Shager man, will come here to make his home, and with his brother will assume management at once. The building housing the store is the property of Herman Johnson and was built by him and completed when the O. P. Shager system first got in a store here.

Willard Hayward, who for some time has managed the store, will turn his attention to his farm in Pioneer district.

## Thin Weak After Baby Come

Gain 22 lbs. in 12 weeks. Only 12 lbs. when born. This baby was born in Twin Falls, Idaho, and is now 22 lbs. heavy. It is a fine specimen of a healthy baby.

### GRAND ARMY MEETS AT HANSEN SESSION

Mrs. Edith Koenig Presides At Regular Business Gathering of Sherman, Circle

HANSEN, March 13—Sherman circle, Ladies of the Grand Army of the Republic met in regular session Thursday afternoon at the church. This chair was occupied by Mrs. Edith Koenig, president of the circle.

In the essay contest sponsored by the circle in the eighth grade during February were present. Compositions were written on the subject, "What constitutes good citizenship." The first prize was won by William Wiseman, second by Martha Frohlich, and third by Helen Frimh. Several prizes and acknowledgments were made in the office and various business matters were transacted. Luncheon was served by Mrs. Koenig and Mrs. Shersley.

At the regular study meeting Monday morning students were favored with several solutions played by the first grade orchestra led by Loren Hales, and a number of songs sung by the second grade orchestra led by Helen Postgreve, and several interesting features by the third grade students.

The first section and third grade teachers, Mrs. Mabel Fortfield, Miss Edith Northridge and Miss Ruth Darling.

By the regular study meeting Tuesday evening with 21 members present and Grace Minnie Bode presiding. Mrs. Edith Koenig, Twin Falls, district deputy, gave a thorough explanation of the changes made in the Royal Neighbor Insurance policies at their last meeting. Mediamen Hiley and Saret of the Twin Falls camp accompanied her. After the regular order of business was concluded, Neighbors Frier and Koenig served a tray luncheon.

### CASSIA COUNTY OFFICER GETS LEAVE OF 90 DAYS

BURLEY, March 13 (Special to The News)—Cassia county commissioner, at their meeting recently adjourned, granted Lee G. Ginn, one of the commissioners, leave of absence for 90 days to take a trip to California in the interest of his health.

Ginn's absence was approved which was authorized in an action held last November, in which a \$25,000.00 bond was given for the district. The amount was for \$2500.

### BANNOCK COUNTY MAN RECEIVES APPOINTMENT

MOSCOW, March 13 (Special to The News)—Section of Ralph S. Bristol, county agricultural extension agent of Bannock county, as extension agent for the state, has been appointed by the state commissioner, has been announced by Dean G. J. Hilding, of the University of Idaho, an agricultural extension agent of the state extension service.

Bristol succeeds John D. Remberg, Jr., who recently resigned as extension agent to accept a position with an electrical industrial chemical company.

Mr. Bristol has been Bannock county's agricultural agent for the last ten years. He is a graduate of the University of Idaho college of agriculture.

Joining in the department of agriculture. Since leaving after he has been assistant extension agent, he has had experience in commercial seed work in addition to his two years as county agent.

As state seed commissioner Mr. Bristol will have charge of the state seed law. The appointment will be effective April 1, announces Dean Hilding. The extension division is now conducting the field for the best possible man to succeed Mr. Bristol as county agent in Bannock county.

### THEATER INSTALLS NEW EQUIPMENT AT BURLEY

BURLEY, March 13 (Special to The News)—New up-to-date picture apparatus is being installed in the Burley theater, and the acoustic arrangements are being improved by the employment of sound deflectors. The projection room also is being extended. The picture picture equipment formerly in use is being transferred to the Ophium theater, which has heretofore made use of the silent drama only.

### NEW INSTITUTION WILL OPEN DOORS

Twin Falls Glass and Paint Company, City's Latest Retail Store, in Quarters

Twin Falls' newest retail establishment, the store of the Twin Falls Glass and Paint company, will be formally opened next Saturday, March 15. Milton L. Powell, manager, announced last evening. The location is 124 Shoshone street east.

"Our Store," Mr. Powell said, "has been planned with a view to providing Twin Falls with a thorough modern establishment dealing in decorative materials. The store front, show windows and the interior arrangement and facilities for displaying and handling stock have been built to the most up-to-date plans, while the decorative scheme in colors of cream and greens will appeal to the modern taste."

Management of the new company comes as a natural sequence to Mr. Powell's long-standing business, since he has represented the Behmet Paint and Glass company as salesman in this territory for almost a year. Prior to coming to Twin Falls in 1919, he was for five or six years with a paint works in Salt Lake City.

As a decorator, Mr. Powell is well known to hundreds of persons in Twin Falls and vicinity, and many of the finest residences and buildings in the city and country were decorated by him. He comes of a family of craftsmen and decorators, his father, John L. Powell, having been a contracting painter and decorator in various cities and states for more than 50 years. This background of experience will be available to customers of the new establishment.

According to Mr. Powell, the store will deal exclusively in well known, favored lines of paints, varnishes, enamels and supplies for artists and decorators. Glass for all purposes will be a feature of the stock as will a large assortment of glass designs in wallpaper.

### CHILD AT JEROME DIES

Henry Bender, Jr., the month-old son of Mr. and Mrs. Henry Bender, died at 11 A. M., Thursday at the family residence three miles north-west of Jerome, following a short illness. The baby apparently was in perfect health at midnight. Death was attributed to malnutrition. The baby was one of three children and is survived by a brother and sister. The family came to Jerome, from Ohio about nine months ago.

Funeral services will be held at the graveside in the cemetery at Jerome at 2:30 P. M. today.

### SEES DIVORCE AFTER 24 YEARS IN WEDLOCK

Mrs. Grace E. Hunt, Kimberly, has instituted suit in district court here for divorce from Clyde W. Hunt to whom she was married in Larned, Kansas, nearly 24 years ago. She alleges non-support and desertion dating from March 5, 1927. There are three children, ranging in age from 12 to 27 years. Mrs. Hunt has been a resident of Idaho since 1916. In addition to decree of divorce she asks the court to decree as her separate property three lots in Kimberly, which she says, she has acquired within the last three years. The complaint was drafted and filed yesterday by John W. Graham, Twin Falls attorney.

### May Contest Will

### PUPILS TAKE PRACTICAL DAIRY WORK IN RUPERT

RUPERT, March 13 (Special to The News)—Practical work in dairying is being carried on by a group of the agriculture department of Rupert high school. Thomas Maberly is instructor. Home work is correlated with class-room records.

Known as the "practical" dairymen project, the class of nine pupils, listing their recently compiled cow-testing report as follows: Number of herd-tested—9; number of cows tested, 54; total pounds of milk produced, 37,324; total pounds butterfat, 1854.4; average milk per cow, 622 pounds; average butterfat per cow, 201.

High herd is owned by Ralph Jackson and it has made an average production per cow, butterfat, 39.98 pounds and average milk, 719 pounds.

Three high cows for the month were: "Habe," owned by Ralph Jackson, which produced 1950 pounds of milk and 59.85 pounds of butterfat; "Utah," Orla Orton, owner, milk, 1307 pounds; butterfat, 49.98 pounds; "Mary," Vera Loveland, owner, milk, 1038 pounds; butterfat, 47.68 pounds. The last two cows are grade Holsteins and the other is a grade Jersey.

## Oldsmobile

Takes Them On As They Come!

A few more thousand miles or a few hundred pounds more load mean absolutely nothing to the Oldsmobile two-door sedan owned by Jack Thurston, a rural mail carrier of Glacier, Wash. It has become used to real mileage and heavy loads during the two years and eight months Thurston has driven it daily.

"In that time Thurston has driven his Oldsmobile more than 120,000 miles, at an average of 2,750 a month. He has made 971 trips over his route, which covers seventy miles around the Mt. Baker district and is mostly up-and-down. He carries twenty-five to thirty or thirty-five sacks of mail on his trips and then, in the evenings and on Sunday he takes his family and friends out for a day's drive through the mountains."

Every morning at seven-thirty Thurston and his Oldsmobile start out, winter and summer. During the past winter he thought nothing of breaking a wheel through snow twenty-two inches deep with his Oldsmobile. Postmasters on the route report that Thurston never has been late since he started. Road conditions mean nothing to him and his car.

Thurston carries a steel cable tow-rope on his rear bumper, one of the standard equipment of his Oldsmobile, makes use of it of trouble. He reports that he has pulled as many as ten cars out of the ditch in one day. He found that I needed the tow-rope many times during the winter. It is always ready when I need some luckless fellow who has got stuck through the snow."

SEE THE NEW 1930 OLDSMOBILE IN THE PARADE AT 1:30-TODAY!

## TWO AERIALS AND SUPERHETERODYNE RECEIVERS SCORE

Pittsburgh's Modern Apparatus Catches Signals of England, Australia and Holland

AMERICAN LISTENERS HEAR REBROADCASTS

Company Places System in Little Shack on Hill Isolated From All Interference

Operator W. B. Scott of KDKA's staff tuning one of the two "double" superheterodyne receivers used when stations overseas are rebroadcast. The amplifier is at the right. Below is a part of the receiving antenna.

By ELLIS BAWNLEY (Associated Press Staff Writer)

PITTSBURGH, Pa., March 12.—Two tuned and two double-superheterodyne receivers bring in programs of stations on other continents for rebroadcast by KDKA.

The American listener may have only a one-tube set, his aerial may be a shabby strand of wire, but if he can log KDKA he can hear the calls of OZSW at Elizabeth, England, of VSCM at Sydney, Australia, or PHH at Huisen, Holland. Back of the tiny set will be the most powerful receiving station, the sensitivity of the superheterodyne, and an elaborate antenna system.

Rebroadcasting is little more than routing to the little KDKA. Once the signal from abroad has been received with a minimum of loss, it is amplified, transmitted by wire to the studio and thence to the transmitter. In just matters of fact-fashion as if it were a program from a neighboring auditorium.

Rebroadcasting is not quite as simple as that, however. The spinning of short wave transmission and reception must be overcome. Adverse weather conditions between transmitter and receiver can ruin the signal. When too many short waves give better signal strength at night, others in the day time.

Stabilization

Two "double" receivers coupled at their outputs, and two tuned antennas, are used for a rebroadcast. The failure of one receiver will not break down the rebroadcasting chain, and so the fading on one set will be nullified by the generally constant volume maintained by the other, coupled to a separate antenna. Even so, that KDKA's receivers each have a control that automatically maintains signal strength.

The receivers must be almost perfectly matched, a difficulty in itself. Their circuit is a refinement of the one used in some broadcast receivers, but designed especially for short waves. Alternating current light bulbs are used for power. But even these sets might be useless if they were located near the power lines and electrical devices.

KDKA's receivers are in a little shack on a hilltop far from the city limits, with a maze of antennas all about.

Scanned is produced by introduction of a magnetic field.

The first law school in the United States was established at Litchfield, Connecticut, in 1784.

## MILL HANDLES LOSS OF WOODS 50 MILES AWAY

BURNS, Ore., March 14 (AP)—A lumber mill 50 miles from a merchantable tree will be put into production this spring.

The mill, located in the heart of eastern Oregon's desert, will receive its logs by train from a rich timber stand 50 miles north. A 40-acre artificial mill pond will be heated by steam during the winter months. Forty-two miles will take the green lumber and turn out dry boards in from three to four days. The estimated output is 200,000 board feet of lumber per day.

## WORKMEN USE WIRE IN CUTTING MARBLE

ST. LOUIS, March 13 (AP)—Wire is used to saw marble in the plants of northern Arkansas, says a report to the American Institute of Mining and Metallurgical Engineers by W. M. Weir.

The saw is made by twisting together three wires, each one-quarter inch in diameter. This is drawn across the marble like a saw and supplemented by a hand-fed stream of sand.

These far-the-wire have attained a speed of 20 feet per second.

North China exports annually about \$120,000,000 worth of wool.

Beans contain a high percentage of protein and make an excellent egg producer.

## LABORATORY TESTS MOTOR FOR AIRPLANES

ARLINGTON, Va., March 13 (AP)—Fifty-two aircraft engines a year

## TESTS FOR BARBERS PROBES PROWESS IN SHARPENING RAZORS

BOISE, March 13 (AP)—"I'm a honk' for you," sings the barber as he prepares to shave "Mr. Mack" sitting in the chair with his face plastered with lather, and his feet hooked on the chandler or some other high point.

But to the barber, this honing business is a matter that is supervised by the state bureau of license, counting 10 points toward the 100, besides being able to hone a razor properly, however.

The barber must be able to cut hair (for this he gets 20 points, not 50 cents) and shave (another 20 points) Likewise he gets 5 points each for appearance, cleanliness, finishing and for time taken in performance. This totals 70 points and the written work covering his knowledge of sanitation, disinfection, sterilization and knowledge of various face and scalp diseases, calls for another 30 points.

He has to grade 70 per cent to pass the examination.

## EINSTEIN EQUATIONS ATTAIN PRACTICALITY

NEW YORK, March 14 (AP)—Einstein's relativity mathematics have been turned to practical use in making a camera operate in millions of a split second.

This camera is described to the American Institute of Electrical Engineers by O. Ackerman, electrical engineer of the Westinghouse Electric and Manufacturing company. It is an oscillograph, which records lightning strikes, forest fires, lightning and is set in action when a beam of electrons of much the same kind as produced by radio tubes "beams" it at a spot of lightning and is set in action when a lightning strike.

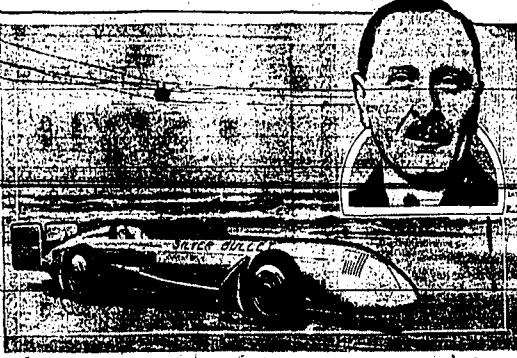

The electrons fall upon a photographic plate, becoming in effect a pencil wherever lightning writes on a sheet of record of its visit. The instrument variations are used to adjust this electron pencil more accurately.

The camera can be tested here with the complete set of the new labor laboratory of the department of commerce.

Three modern test stands have been erected for the 50-horse power engines which must be underwritten by all motors except those approved by the army or navy.

During the first five hours of a test, the engines are run at full throttle while for the remaining time they are operated at nearly 87 per cent of their rated speed.

## British Race Driver Seeks Auto Speed Crown

KAYE DON (INSET), BRITISH race pilot, and the car in which he hopes to sweep the title from his countryman, Sir Henry Segrave, who established a record of 231.36 miles an hour. The speed trials will be held at Daytona Beach, Florida. — (AP) Photo.

## STUDENTS MANUFACTURE SUBSTITUTE FOR RADIUM

COLUMBIA, Mo., March 14 (AP)—The country's only manufacturer of mesothorium, substitute for radium, is operated by chemistry students at the University of Missouri.

From \$5,000 to \$25,000 worth of mesothorium, which has virtually the same properties and radioactivity as radium, is produced annually at the institute factory here under direction of Dr. Herman Behm and Dr. C. F. Brinkley, chemistry professors.

It was Dr. Behm, who, working with the United States bureau of mines, perfected the process by which mesothorium is recovered from the ore monazite. Radioactive sand concentrated ore to this factory, and the finished product is sent to federal laboratories for certification.

Like radium, mesothorium will be used for medical treatment and for illumination of watch dials. It sells for about \$30 a milligram.

There are millions in Northwestern China who have never seen or tasted rice.

The Pennsylvania Packet, founded in 1761, was the first daily paper in the United States.
