UTAH'S BOURBONS BACK PROHIBITION AND CONDEMN FOE

Convention Names Former Ogden Mayor to Oppose Representative Colton In Race For Congress

(By the Associated Press) AMERICAN LAKE CITY, Sept. 20.—Utah Democrats in their state and congressional conventions here today nominated Frank Francis, Ordron, and Dr. J. H. Paul, Salt Lake City, as candidates for congress from the First and Second districts, and named George Christensen, Price, for the state supreme bench.

Mr. Francis, a former member of Congress, and Dr. Colton, representative of the P.D.P., district for the last 10 years, Dr. Paul, a former president of the state bar association, and Brigham Young University and a former instructor in the University of Utah, will be opponents of the Prohibitionists.

The two candidates are the Republicans in the Second district.

Two years ago Dr. Paul lost to the Prohibitionists, who were supported by 14 votes in the entire district. Both he and his Republican opponent are candidates for reelection.

Upon the question of prohibition, the platform adopted unanimously by the convention says:

"Will Oppose Injunction

Mr. Christensen, who will oppose Ephraim Hansen, incumbent, for the supreme bench, is judge of the court of appeals.

Upon the question of prohibition, the platform adopted unanimously by the convention says:

"In this case the platform of the Republicans, administration and opposition: A

"No complete construction plan has been worked out for a national prohibition law."

"It becomes the part of wisdom to devote ourselves to the wisdom and knowledge of the people, and no sound program of improvement. We pledge ourselves the cause of temperance and respect for law and order, and the welfare of our country, history and the world among enlightened nations."

Blame for this condition the platform says, rests with the Republicans.

"Almost the entire discussion in the campaign was on prohibition, which had before it a draft of a platform prepared by a sub-committee of the national executive committee of the American Federation of Labor and that at the sesquicentennial celebration, October 7, of the battle of Kings mountain—was substantially complete."

Candidates Agree Blank

Mr. Mueller, who was chairman also of the convention's resolutions committee, told his fellow delegates that the platform had been considered by prospective congressional candidates and approved by them.

It can be seen that the policy of a national prohibition in this state, which he said already is in a formative stage, and the effect

of the tax amendment to the state constitution.

(Continued on Page 2, Col. 5)

GEM STATE SHOPS FOR
16,000 TONS OF COAL

BOISE, Sept. 20 (AP)—The state of Idaho has ordered 16,000 tons of coal to keep its employees and "guts" comfortable during the coming winter. The bids will be opened October 10.

The state is to supply all state institutions until October 23, 1931. The call for 14,400 tons of slack, 1,100 tons of coke and 1,500 tons of anthracite.

Utah and Wyoming mines were expected to supply a considerable portion of the coal, and the state expected some more from the Idaho mines of the Teton Coal company.

UTAH MAN LOSES LIFE

BOISE, Sept. 20 (AP)—Whitel G. Walter, 23, was accidentally shot and killed while herding sheep here today. A revolver which he carried dropped from his holster and started a bullet through his heart.

W. S. Young, Wanapah, Utah, owner of the sheep, witnessed the accident and was survived by his widow and five children.

27 FILIPINOS ATTEND
IDAHO'S UNIVERSITIES

BOISE, Sept. 20 (AP)—Raiders against Filipinos in Pacific coast states has awed the minds of those interested in the universities, and more than double normal, the department of education was advised today.

At present 200 enrolled at Moscow and seven at the southern branch.

Although none of the students was involved in any of the raids, the result was declared to have been the reason for their selecting an inland school.

The education of the students is paid for in the main by Filipino endowments, both private and govern-

ment.

Woodstock returned today from an inspection trip through New England.

The week beginning September 28 Woodstock plans to go to Tennessee and Kentucky and return to the mountains. On October 6 he plans to go to New York and on October 12 to the Chicago district. Later, he said, he hopes to go to California.

SEATTLE RUM LAW CONSPIRACY TRIAL COMES TO FINISH

Jury Relives Early In Day
To Deliberate Upon Six
Weeks of Testimony In
Prolonged Federal Case

They will write:

"Dear Mr. President:

"I go to school in Hamilton, Ontario, Canada, and I would like to tell you that I am a better citizen now than I ever was before."

Prizes will be awarded for the best

letter.

The best grades out of a class of made.

Citizens of Chillicothe are paying

the expenses of their trip to Wash-

ington.

The defense team, Roy C. Lytle,

William M. Whitney, E. C. Corwin and R. L. Bryant, former

for enforcement heads, are charged with accepting bribes from rum runners in a conspiracy to violate the禁酒法.

The case was submitted to the jury after air weeks of testimony, the longer federal trial in Seattle having been adjourned because of the 300 witnesses

who were heard and their testimony filled more than 3000 pages of typewritten transcript.

The trial concluded four years of investigation of the prohibitionists by a committee of justice agents. Judge Frank N. Moresco, visiting juror from Nevada, charged the defense with being guilty in deciding this case, which he said was of more than ordinary importance.

Lyon Whitney and Corwin, who had been called to defend the six, were suspended immediately after their indictment.

Both men were released several months before the grand jury met.

The prohibition officials were

condemned on Page 2, Col. 1.

UNIVERSITY STUDENTS' RANKS IN IDAHO GROW

BOISE, Sept. 20 (AP)—A record enrollment was reported yesterday for the fall semester at the University of Idaho, which began on September 1.

Frank Hoover, Jr., under treat-

ment of an intestinal disorder which forced him to leave a leave of absence from his studies, was joined at the university by his father, Frank Hoover, who came to attend the other students.

The letter to the editor reads:

"Dear Sirs:

Uncle Sam Speeds Up Relief Work In Sun-Parched Regions

THIRD OF COUNTIES

OF NATION RECEIVE

6591 CARS OF FEED

Government Authorizes Re-
duced Freight Rates
For Livestock
Supplies

COUNTY-AGENTS-FURNISH
INFORMATION ON NEEDS

Although Shortage Appears
National Problem, 17
States Offer to
Sell Crops

By FRANK WELLER
(Associated Press Farm Editor)

WASHINGTON, Sept. 20.—Uncle Sam's drought-relief machinery is moving at full speed on the parched path of disaster, constantly increasing its power.

Approximately one-third of all the counties in the United States are certified to receive freight reductions on the shipments of feed, water and live-stock and 6331 emergency carloads are being shipped daily.

All states except 17 counties were added to the list, receiving emergency treatment in Texas, and Kansas was brought into the group with 41 counties.

All of Arkansas now is included, as well as 100 percent of the 100 percent of Virginia except Southampton and all of Kentucky except Letcher, Knott, Laurel and White counties.

Total: 18.

The addition of Kansas, Southern Illinois and the extension of emergency measures to counties in 19 states, where a total of 707 counties had been certified brought the total to 6591.

States in which counties are listed for reduced freight rates include:

Arkansas, with only 27 percent of the average feed supply, is the most severely hit by the drought. Next are West Virginia, 111; Maryland, 53; Pennsylvania, 114; Ohio, 115; Kentucky, 22; Tennessee, 22; North Carolina, 22; South Carolina, 22; Mississippi, 54; Alabama, 2, and Louisiana, 1.

Fried Egg Stock.

Government officials say the greatest demand is for feed for breeding stock, which farmers are risking一切为了生存。

Montana, Wyoming, Texas and Kansas are expected to ship stock and feeder cattle to Nebraska, Iowa and other corn belt states for feeding.

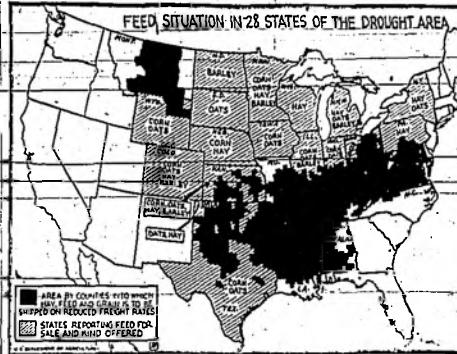

Arkansas, with only 27 percent of the average feed supply, is the most severely hit by the drought. Next are West Virginia, 111; Maryland, 53; Pennsylvania, 114; Ohio, 115; Kentucky, 22; Tennessee, 22; North Carolina, 22; South Carolina, 22; Mississippi, 54; Alabama, 2, and Louisiana, 1.

Shortage Widely-Spread.

Numerous counties in each of 13 states have less than 20 percent of their normal feed supply and in many cases, most counties have only 10 to 20 percent. Only in a few instances do any considerable number of counties have more than 75 percent.

For most far-cult-rate shipments have been authorized on certification by county agents that conditions created by the drought are serious.

With the exception of sections of Montana and Wyoming, those counties in an unbroken belt from Montana to the west coast, south through the Ohio and Mississippi River, Oklahoma, to the extreme east of the drought belt proper, and most of the other states already have

but plans in motion for credit arrangements.

17 States Sell Crops

Although the feed shortage has developed into a national rather than a local problem, the 17 states most seriously affected by the drought, report feed for sale.

Of these, seven, Pennsylvania, Ohio, Indiana, Illinois, Michigan, Iowa, Missouri, Texas, corn and oats; Oklahoma, corn, hay and Wyoming, corn.

These states—Colorado, Kansas and Minnesota—are the four major feeders for sale, corn, oats and wheat.

The corn crop is nearly 200,000,000 bushels below average, but it is reported to the government that farmers intend to sell only 100,000,000 bushels. They usually sell about 450,000,000 bushels.

Corn Surplus.

Supplies of corn for sale in large quantities are: Illinois, 25,000,000 bushels; Nebraska, 16,000,000 bushels; Iowa, 7,000,000 bushels; Missouri, 5,000,000 bushels.

Other states not yet certified but expected to be included are: Michigan, Indiana, Ohio, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Georgia, Florida, Connecticut, Rhode Island, Massachusetts, Vermont, New Hampshire, New Jersey, New York, New England, Alaska, Hawaii, and the District of Columbia.

Shoreline of Oak.

Farmers intend to sell 160,000,000 bushels of oats, 25,000,000 bushels of wheat and 25,000,000 bushels of barley. A considerable net surplus of barley is available in Minnesota, North Dakota and South Dakota, and in Montana, Idaho and Oregon.

Large quantities of oats, barley and corn are needed for feeding stock, live-stock and for commercial purposes.

Shortage of Oats.

Farmers intend to sell 160,000,000 bushels of oats, 25,000,000 bushels of wheat and 25,000,000 bushels of barley. A considerable net surplus of barley is available in Minnesota, North Dakota and South Dakota, and in Montana, Idaho and Oregon.

Intended sales and purchases of grain and feed are as follows:

Arkansas, with only 27 percent of the average feed supply, is the most severely hit by the drought. Next are West Virginia, 111; Maryland, 53; Pennsylvania, 114; Ohio, 115; Kentucky, 22; Tennessee, 22; North Carolina, 22; South Carolina, 22; Mississippi, 54; Alabama, 2, and Louisiana, 1.

Fried Egg Stock.

There appears a deficit of hay in these states, indicating the probability of some further substitution of hay and coarse forages, and a general reduction in the amount of feed available in the more arid areas.

Pasture conditions have declined considerably from the record low of 1929, but in the spring of 1930, the drought area still has more than 75 percent of the feed available in the more arid areas of the West.

Pasture conditions have declined considerably from the record low of 1929, but in the spring of 1930, the drought area still has more than 75 percent of the feed available in the more arid areas of the West.

Concerning the extent of the area affected by the drought, it is estimated that 10 percent of the area stock now on farms, government officials believe the drought probably has been more serious than the record low of 1929, but the lack of crop growth still is lacking in most of the drought area.

For the areas as a whole, present pasture conditions are good and hay per animal unit are only 70 percent of the average.

THE TWIN FALLS NEWS is a factor in MAYTAG Success

E. H. MAYTAG

President of The Maytag Company,
Newton, Iowa, the world's largest man-
ufacturer of washers.

THE MAYTAG COMPANY
EXECUTIVE OFFICES
NEWTON, IOWA

TWIN FALLS NEWS
Twin Falls, Idaho

Gentlemen:

We recognize the importance of the newspapers by placing seventy-five per cent of our advertising appropriation in newspaper space. It has been one of the outstanding forces which has contributed to our success.

We wish to express our appreciation to the newspapers in general and to THE TWIN FALLS NEWS for the outstanding assistance rendered us in our sales promotional activities. THE NEWS has been on the Maytag advertising schedule for several years and will continue to carry our copy during 1930.

The advertising merit of your paper is reflected in the favorable response our advertising copy has created, and we are pleased to acknowledge THE NEWS has created, and as one of the papers that is rendering satisfactory service.

The Maytag Company is looking forward to another big year in 1930 and the continuance of our amicable relations with your paper.

Yours very truly,
THE MAYTAG COMPANY
E. H. Maytag
President

E.H.Maytag

MAYTAG, the world's largest washer factory, completed its seventh consecutive year of world leadership in 1929. The Twin Falls News is credited with helping to make this record. The demand for the New Maytag, recently introduced, indicates sound conditions in The Twin Falls News territory and promises a good year's business in 1930.

For years Maytag advertising has been confined largely to newspapers. Its rapid growth to a position of world leadership in the washer industry, is a tribute to newspaper's-in-general-and-to-The-Twin-Falls-News-which-carries-the-Maytag-message regularly to the homes of Twin Falls.

The Twin Falls News is an important factor in the home life of Twin Falls and the community surrounding it. By giving accurate, reliable public spirited news, it has established a reader confidence which has proved valuable to the many advertisers who use its columns.

THE TWIN FALLS NEWS

Vandal Mentor Confronts Shortage of Punters and Passers

Loss of Stellar Tackle of Filer Works Hardship

Coach Leo Calland, Moscow, expects to pit strong forward wall against Montana State Machine.

(Special to The News)
MOSCOW, Sept. 20.—Replacing two all-Northwest linemen and developing a few good punters and passers are the major problems confronting head coach Leo Calland as the first week of Vandal football practice draws to a close. The task of replacing Lester Kirkpatrick, all-Northwest center and Spec Dougall, all-Northwest tackle, is no simple one but Calland expects to have a tough forward wall by the time the season opens Saturday, September 27, against Montana State in Moscow.

An ailing, 185-pound reserve center from last season is being groomed by Kirkpatrick, Bill Schutte, a member of last season's fresh eleven, and Chuck Weller, a sophomore. Captain and Schutte is practically certain to see action this year.

Calland's tackle berth may be just as strong as it was last season if Fullman, Twin Falls, a husky-tough-tamer from the southern branch, comes back to the team. Eddie Hall, a freshman of two years ago, is back in uniform and will give the other tackle candidate a good run.

Calland's right end is held by Bill Mueller who "handles the" go-jack season in a thoroughly anti-factory manner.

Marlin Not Back

Falmer of Moscow, Marlin, refused to return to school but another camp in Marvin's place, Marvin is one of the hardest hitting ends in the state but Falmer will be missed. Calland, his Max Eiden, from last season and Jim Glaser, another member of the 1929 freshman team. Any of these three may get the call to play opposite John Corkery from Eastern Washington.

Archie, a reserve guard from last season has not entered school but plans to return in a few days and will take Calland's four good linemen.

Graduation and the three year rule took both of Idaho's regular ends last season but Calland, a sophomore, George Wilson, and George Elford, who played guard and tackle two seasons ago and last year until suffering injuries, Calland may not have a great deal to worry about as far as the ends are concerned. Pete Reiter, a junior, and another lad who is going to make a strong bid for a varsity job.

Davis Good Passer

The best passer that Calland has uncovered so far among his six or seven candidates is Davis. Davis, a sophomore, has been showing lots of stuff in practice. Davis can place his throws accurately and with power. Calland, however, is trying to develop one or two more good flaglers as the lack of weight in the forward pass is still a problem. Calland is trying to teach him more of the art of passing than he has ever learned.

The kicking department looks like an Idaho weakness at the present time though. Calland has three fairly good kickers but Lee Tyrrell, sophomore halfback, is the best punter on the squad. Professor also punts but he cannot get distance. Jim Shook, a junior, is the best candidate who looks like a prospect as a punter.

Yale Grid Candidates Start Training Grind

YALE'S 1930 FOOTBALL candidates, 107 strong and including 16 "Y" men, headed by Captain Fay Vincent (inset, left) and diminutive Albie Booth (right), ground gain-backfield ace of last year's team, have started practice drills under Head Coach Mal Stevens (inset, right). Lineham (left) drew a guard position on a tentatively vary line-up. (7) Photo.

ON THE SIDELINES

by BRIAN BELL

A SCOUT from Western Conference football territory is shouting, "Watch Northwestern!" If this unabashed crile has the dope, and he thinks he does, Coach Hanley is prepared to cause a great deal of annoyance up and down the line.

"Look out for Northwestern," said the scout. "Everybody looks out. I never have seen better prospects at any place than they have here." He was asked to be more definite and came up with this:

"Well, there is not time to tell all they have. All their players are good. There are four ends way above the average and many first class tackles.

"And backs, well there are two quarterbacks who weigh more than 200 pounds—Leach 208, and Russell 211. One is from Texas and the other from Oklahoma. They are rugged. Captain Bruder, who broke a leg last year, is just about the best back in the country. He will be right and he will show everybody concerned how to play halfback. He will have ample assistance, there are plenty of backs."

IT HERE'S only one trouble. Northwestern has chewed off a tough schedule. The conference permits only 33 men on a squad and the schedule is so hard this number may not be able to take care of it."

The Weather was asked if there will be any other good teams in the West.

"Oh, yes, schools will have a team that will cause a lot of trouble. The little problem will not get any place particularly in the fall season, but it will lose a monkey wrench into the machinations of some of the other schools who think they are on the road to glory."

A somewhat different question was inserted as to Notre Dame.

"Why not about Notre Dame?" was the counter question.

"Notre Dame always has a good team. The one this year will not be an exception, in fact it will be one of the best. Rock

Alie Forrester, pitcher for the Moundsville, Indiana, Iowa team, pitched a no hit, no run game against the Indiana state boys' school, striking out 21 batters.

And One From Buhl Lift
Idaho Team's Prospects

MOSCOW, Sept. 20 (Special to The News)—With only a little over a week in which to drill for the first game of the season, which is set for Saturday, Oct. 4, Leo Calland is putting the new Vandal squad through its paces twice daily on MacLean field. More than 100 Vandal members and the squad immediately started out on the training routine with a dash not found in the first two days in many football seasons.

Calland is spending little time on fundamentals, while he stressed the importance of the "team" in the sessions, and Saturday no "team" can hold the first scrimage of the year. Even in dummy practices the candidates for the team are to be considered as stars. One or two veterans have already limped off the field with minor injuries due to the enthusiastic manner in which some of the boys have been playing on the first day.

Spirits of Hope.

More rather than confidence is the spirit of the Vandal camp. Replacing 18 men out of a squad of 107 and with only seven of the 107 remaining, Calland is no small task. He is also decidedly perplexed by his absence from the home town of Moscow, where he has a residence, and the problems of fast, hard-hitting backs makes the lightness of the squad easier to understand.

Wilson will be the keynote of the Northwestern first fall and the Vandal squad has it. At present George Wilson, Moscow sophomore, is the leading candidate for the job. He is a merry chap and unless there are some ups and downs before the season opens he should be at the helm when the Vandal team takes the field from Buhle against the Montana State Bobcats.

South Idaho Stars

Waldemar Pedersen, regular fullback, is the star of the South Idaho team. He is a生力军 in fullback form. The "Calling Cards" and Wilson look like the regular quarterback, Captain Howard Berg, and the halfback, Twin Falls' Jim Stanford, Lee Angeles, and Emmet Davis, Buhl, are the other specters in Calland's backfield and probably each of them

will see action in every game.

Calland is a little wary but all of the players in the district championship will give the local fans a surprise opportunity to see the Indians in action. The Indians will be in the Buhle drop kickling. Twin Falls should add many a winner this season from the ranks of stars. The Indians have had a good start and are being groomed to do the punt-meets-a-good-punt in every game for Idaho.

Bruins Prepare to Play Rupert Team

Coach R. V. Jones Conducts
Week of Hard Practice in
Preparation For Contest

When a practice game scheduled for next Friday with Rupert, here, Coach R. V. Jones has been putting his gridiron through a hard week of practice. The main part of the work has been spent on footwork, with plenty of digital practice. Friday night saw the first and second string gridiron teams go through a series of passes and the first team of the day, the second string team, were present the second string men gave the first squad a good fight. The Indians that were in action yesterday evening, however, were not the whole team.

No place is cinched on the team so the boys are working hard and rapidly, rounding into condition. Yesterday, the Indians' first drop kickling, Twin Falls should add many a winner this season from the ranks of stars. The Indians have had a good start and are being groomed to do the punt-meets-a-good-punt in every game for Idaho.

The Indians, although not yet in the district championship, will give the local fans a surprise opportunity to see the Indians in action. The Indians will be in the Buhle drop kickling. Twin Falls should add many a winner this season from the ranks of stars. The Indians have had a good start and are being groomed to do the punt-meets-a-good-punt in every game for Idaho.

GRAHAM SIXES AND EIGHTS • ALWAYS FAR IN ADVANCE

and Associate Dealers

Again
invite you
to the
Showroom

to see and drive the World's Greatest Value

GRAHAM

In the Eight and in the Six, Graham brings you the newest improvements and advancements, built upon principles and design proven sound by three years of satisfactory and enthusiastic owner use and experience.

Come to the showroom and let us examine the facts together.

The Graham Eight is a leader, with its 100 h.p. Graham-built engine, noted for smoothness and flexibility, for readiness to respond to any need of speed or bulldog pulling. Come to our showroom and test the Graham for yourself.

Graham, gear-shifting has not only been the perfection of ease and silence for three years, but Graham pioneered and provides the now time-proved four-speed transmission, with all its superiority of operation and operating economy effected by reducing motor revolutions. Driving the Graham four-speed will give you a new conception of restful, relaxed-motoring.

The beautiful, luxurious Graham bodies, too, are Graham-built and quality-built by Graham workmen in Graham plants—and Graham was first

in its various price classes to provide in all models the new protection of shatter-proof Safety Plate Glass as complete equipment.

Accept our invitation to see how Graham-shatter-proof-glass protects everyone in the car and you will not want to trust your family to any car without this equipment.

Your own experience and sense of value will tell you that Graham is indeed the world's greatest motor car value.

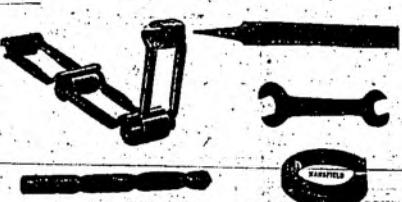

From the \$845 Standard Six Town Sedan to the Special Eight at \$1595— unequalled quality and low prices have made the Graham the value-leader.

Seven-bearing crankshaft in the Sixes; the finest of hydraulic internal brakes for every Six and Eight; silent-chain drive for generator and water pump; full pressure oiling system; rubber spring shockers; full water-jacketed cylinders; economy of operation and economy of maintenance; the lowest price per pound of any quality car today.

Come to the Graham showroom today. You cannot afford to do anything else if value is an object to you.

NOTED AUTHORITY ON MINING JOINS MOSCOW FACULTY

has published numerous articles, and holds membership in an imposing list of nationally known associations.

The World War found Dr. Finch with the American Red Cross, distributing medical supplies to civilian and hospital supplies for the Western front in Siberia, China, and Japan, after the outbreak of hostilities.

It is to have a perfect record in judging mining properties, Dr. Finch said, which he approached having failed in his first attempt to buy a mine, and never even having paid him.

His competitors didn't the most promising properties, he said, because they were, as its mineral resources have been less exploited, Idaho has more to offer than the states he had been visiting, and areas not even being surveyed.

Dr. John Wellington Finch,
New Dean of University of
Idaho School of Mines,
Boasts Varied Experience

in the field of mining.

MOSCOW, Sept. 20—Known

as an authority in mining,

Dr. John Wellington Finch, new

dean of the University of Idaho

school of mines, is now

teaching at the university in

securing such a noted engineer to

head its department.

As a consulting mining engineer

and geologist probably no man

in the profession has a more entitling

background than Dr. Finch.

When he selected distinction as

a consulting geologist and engineer

in Colorado.

During the next eight

years he was in the mining regions of the West.

Employed by Operators

After a year of travel and study

he returned to Colorado and resumed

his consulting work in mining engi-

neering, being employed by leading op-

erators of the Colorado Copper

Company, Florence Goldfield Mining

Company, general manager of the

Goldfield Consolidated Company,

Current Trends And Happenings Claiming Comment In The Realm Of Women

PARISIANS APPEAR IN OLD-FASHIONED COLORFUL SASHES

Women Dressmakers Support

Movement for Brighter and Brighter "Girdles" to Go With Long, Full Skirts

by BARBARA BEAUFORT
 Associated Press Fashion Editor
PARIS, Sept. 20 — Old-fashioned sashes, with loops and splashing ribbon effects are the debutante's best bet for obtaining that last-minute Paris look.

The w-e-m-a-n dressmaker who first launched robes de style, precursors of long full skirts, behind the bigger and brighter sash movement.

In addition to modern requirements include some eight-inch-wide versions of shirred satin made with double loops in back.

Right: Silk Bands

Silk sashes for that's all they are—colorful, colorful—comes a mere background of mustard-colored or white tulle, ruffles or starched cotton, for a bright band of color.

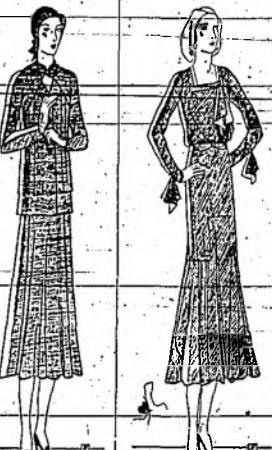

Most dressmakers are content to indicate the appropriate waistline with a band of bright velvet ribbon.

The contrasting ribbon belt is much younger and newer than that matches. Very good for bows and bows, while fox fur, quince and emerald green on black Velvet ribbons.

Older women's faster velvet ribbons help to trim up old blouses, but the horoscope is newer and more appetizing.

More than one noted dressmaking house has come off on the sash front or velvet evening dresses. A temporary state of mind is decidedly

STOCK QUOTATIONS

MOVE UP ON MART
Movement in Two-Hour Trading Session Indicates Little for Readjustment

Markets at a Glance

NEW YORK. Sept. 20—(UPI)—Stock market closed slightly higher. Underlying forces were still favorable, but the market was not yet strong enough to sustain a real rally. Decline in oil stocks was offset by gains in steel and railroad stocks. Bonds: Irregular; German government bonds were up. Currencies: British pound, dollar and franc as decline is checked. Foreign exchanges: firms Spanish peseta strong. Cotton: London; Southern relatively steady. Sugar and coffee: Holiday.

CHICAGO. Sept. 20—(UPI)—Beneficial ratios in Argentines; Corn: East, favorable Illinois advises.

Cattle: Steady. Hog: Steady to lower.

JOHN L. COUDREY (Associated Press Financial Writer)
NEW YORK. Sept. 20—(UPI)—Bullish forces and small net gains were so small that the movement of prices in the two-hour trading session indicated little for the market.

The market's weekly readjustment of professional trading counts.

Execution of overall selling orders in stocks and mutual quotations point or so lower during the first half hour, but when these offerings had been fairly absorbed professional players showed no desire to add to the selling and the market languished.

Oil, especially wheat, declined on Secretary of State's statement of trade concerning alleged short sales by Soviet interests but, the extreme advances were small and both commodities closed slightly lower.

The stock market was forced to worry along without much encouragement concerning the state of business, but the market's weekly readjustment of the popular who had made any predictions as to what would happen after Labor Day. The present situation is not so bad as indicated and that business conditions were being more cheerfully viewed and expressed a belief that although sentiment was "a trifle ahead" of actual improvement, the situation was on the upgrade.

No Haste to Care. Holders of the short position in the market were not too late about concern and returns at a square were absent. United States Steel was pushed upward after regularized a half cent per share, but a half bid closed only .50 net higher. Steel shares together with the utilities, lagged largely in the early selling.

Among the leaders making net gains of half a point or less were American Can, General Motors, Ral-

TWIN FALLS MARKET (UPI)—Potato: Selling Jackson long \$1.00 to \$1.25; Washington Netted Glass \$1.00 to 1.25.

Butter, eggs and cheese: Unchanged.

DRIED FRUIT. (UPI)—Dried fruit.

NEW YORK. Sept. 20 (UPI)—Dried fruit.

POTATO MARKETS

IDAHO MARKET

IDAHO FALLS. Sept. 20 (UPI)—(U.S. DA)—Potato: Demand light slightly weaker; Russets No. 1, Idaho, 10c; No. 2, 12c; No. 3, 14c.

Farm: Russets, No. 1, 12c.

Farm: Idaho russet, too few to establish market.

CHICAGO MARKET

CHICAGO. Sept. 20 (UPI)—(U.S. DA)—Potatoes: Demand light, slightly weaker; Russets No. 1, Idaho, 10c; No. 2, 12c; No. 3, 14c.

Carrots: Wisconsin sacked Idaho \$1.85 to \$2.50; few fancy carrots.

Onions: Minnesota sacked Idaho \$1.75 to \$2.50.

Onions: Wisconsin sacked Idaho \$1.75 to \$2.50; few fancy onions.

Onions: Idaho \$1.75 to \$2.50.
