

BOSTON HOSPITAL CURES RICKETS IN SUNLIGHTED ROOM

Presence of Ultra-Violet Rays in Midwinter Gels Substantiation in Experiments of Physicians

(By The Associated Press) TWIN FALLS, Oct. 9.—Indoor in midwinter in Boston's deep coat of real sun can be acquired under a newly developed method of sun light therapy.

Presence of this much ultraviolet light in midwinter in cities as far north as Boston has been demonstrated by Dr. Max Koenig, Boston's latitude is 42°41', the same ultraviolet belt as Albany, Cleveland, Toledo, Detroit, Chicago, Milwaukee, Des Moines, Omaha and Salt Lake City.

Existence of the light was demonstrated at the infant's and children's hospital in Boston after a comparative experiment with the Harvard School of Public Health and Harvard Medical School.

Doctors reporting the results are Edwin T. Wyman, Philip Drinker and Katherine H. MacKenzie.

Coldness Compares

A material originally made for chicken houses was used in place of glass, which is easily broken, in the tank compound, stiffened with wire mesh, and admits light somewhat like cello paper but being transparent.

Fifteen babies with acute rickets were cured when kept in a room lighted by use of this material, the medical team said.

"They were cured rapidly in the winter months, their bodies all but naked."

So strong were the winter rays that exposures were limited at first to 15 minutes, then 30, and increased to long periods.

The winter tanning was done between the beginning of November and the end of April. Temperature in the sun room was kept at 50 to 60°.

Wura Brown

The babies had a deep brown color, and some of them, like his mother, who came from a temperate district, covered the little one's face while taking him home, for fear the neighbors would murmur him for a Negro.

The central situation of "The Storm" is suffocatingly dramatic in itself. Two men, old friends, are enveloped in a snow-bound cabin in the mountains, with the woman who loves both. While death by starvation closes down upon all three, the lone hunter in the hills

of the men hourly brings each other closer and closer...to the other's throat.

In addition to the tense emotional scenes, there are scenes of natural thrill of breath-taking intensity. There are scenes of a terrible avalanche, appalling blizzards and of a snow storm which has buried the two men in the hills.

With the players, "The Storm" produced well in the High School of California, San Francisco, to obtain authentic atmosphere of the vengeful French-Canadian around whom the love interest centers. The play is a picture of Pierrot and Pierrette." Paul Cavigneau and William Boyd give spirit to the drama with their fine acting. Alphonse Elmer and S. Adams also have important roles.

TEACHER IN MURTAUGH GUIDES SCOUTS TROOPS

MURTAUGH, Oct. 8 (Special to The News)—Van W. Emmerson, high school teacher here, has accepted the position of leader of the Boy Scout Troop No. 1. He fills the vacancy caused by the resignation of Bob Tolman, who is attending the agricultural college at Logan.

Developed, says the material "gave a high percentage of ultraviolet and at the same time reduced a half degree of the sun's heat."

"In a preliminary test cooperation with the New Jersey State Department of Agriculture, the glass was equipped with windows or ordinary glass and another of the same type, with the new plastic.

"When the temperature was 1 below zero outside, it was 10 above in the ordinary house, and 30 above in one with the glass-like material. The glass is transparent but not transparent."

A tobacco crop of \$16,500,000 was harvested in Idaho last year, by the state university.
