One out of the four petitioners for divorce was granted a decree following hearings before Judge Babcock yesterday. One case was taken under advisement, another was continued two weeks, and another was dismissed for lack of evidence.

W. E. Shull, Extension Entomologist, Joins County Agent Herb in Campaign

It is about time, according to the 10-year-cycle theory, for grasshoppers to be reappearing in devastating numbers, and according to reports received from outlying districts, Twin Falls county is threatened with a grasshopper plague this year and next, it was stated at the county agent's office here yesterday.

W. E. Shull, assistant extension entomologist, detailed this summer to assist in control of bean insects, has been pressed into service in combating the grasshopper pest, which, according to reports, is already causing some damage to beans, alfalfa and other crops on country adjacent to sage brush or abandoned lands.

With H. B. Hale, county agent, the entomologist has worked out a plan for combating grasshoppers by use of poison bean meal, and has arranged for a demonstration to be held this morning on the Richard Olavin farm northwest of Hollister.

Other demonstrations will be held as needed for them in indicated, and the poison bean meal formula and instructions and assistance in its use are available at the county agent's office, it was stated.

Threat widespread.

Districts where young grasshoppers are appearing in threatening numbers include the territory south of Blaine, in the vicinity of Hollister, and northwest of Bull.

On the George H. Ruppel farm south of Blaine, it was reported, hoppers had destroyed a bean crop for a distance of 100 feet from the border of the field.

The grasshopper threat is not limited to southern Idaho, Mr. Shull said yesterday, but the pest has appeared in Nebraska, Montana and other western states. Mr. Shull yesterday received a call to send his aid in a grasshopper control campaign in the Aberdeen-Springfield district in Power county.

Unless the pest is brought under control this year, Mr. Shull said, it is almost certain to reappear and cause more damage next season.

Cost of materials used in the poison bean meal is less than 20 cents a bushel, it was stated, and the poison meal has proved to be an effective method of control.

Son Finds James Clark, 85,
Veteran of Blackfoot War,
Dead in Bed at Marion

OAKLEY, June 19 (Special to The News)—James Clark, 85, resident of Oakley for 30 years, and a veteran of the Blackfoot-Indian war, was found dead in bed this morning at his home in Marion, four miles northwest of Oakley.

Mr. Clark had been in ill health for several years, but his condition was apparently no worse than usual when he retired last evening. His son stated today.

Mr. Clark was a native of Scotland. He came to this country while a young man. He is well known in this territory having been one of the first to settle here about a half century ago. He took part in the Blackfoot battles in the early eighties.

Two of his 10 children survive him—George Clark, who was living with him at the time of his death, and Peter Clark, who lives in Idaho. No funeral arrangements had been made late this evening.
