# 18,000 Spectators See Uzcudun Whip Baer By Decision

## Twentieth Round Decides Clash In Reno Battle Pit

Grinning, Gold-Toothed Boxer From Basque Country of Spain Out-Hungs Fiercer Pupilist From California

By RUSSELL J. NEWLAND  
(Associated Press Sports Writer)  
TWIN FALLS, July 4.—(AP)—Grinning, gold-toothed Paulino Uzcudun, from the Basque country of Spain, out-roughed Max Baer, rangy Californian, today in Referee Jack Dempsey's decision after 20 rounds of savagely milling that climaxed Reno's greatest Independence day celebration in 21 years.

Slugging, hitting, heeling and wrestling marked the battle from opening going until Dempsey, in the double role of promoter-referee ruled Paulino's arm in victory, a couple of wildcats could hardly have been more vicious than the two warriors in the ring. Uzcudun, in efforts to beat back other blows, was the first to land a knockout blow on Baer's head in the 10th round. He then, into his legs and rushed him into the ropes, means, while scoring heavily with his fists, he kept him from coming back. On occasional rashes were kept. First heavyweight bout of any importance in Reno since Johnson defeated Griffin, July 4, 1929, today free-punching affair attracted some 18,000 persons, practically emptying the normal population of the city. Officials said the gate receipts "would run close to \$100,000."

**Set Fast Pace**  
For a 20-round bout, the big fellows set an unusually fast pace. The last five rounds developed more furious exchanges than in the early part of the affair. As they struggled through the rounds, mauling, legging and planting solid punches in each other's faces, the two men seemed to have no mercy for each other.

At no time was either out in front and at the end of the eleventh, before Dempsey had decided the fight, Uzcudun would decide it. Paulino had the better of the last exchange. He took his legs and rushed him into the ropes, means, while scoring heavily with his fists, he kept him from coming back. On occasional rashes were kept. First heavyweight bout of any importance in Reno since Johnson defeated Griffin, July 4, 1929, today free-punching affair attracted some 18,000 persons, practically emptying the normal population of the city. Officials said the gate receipts "would run close to \$100,000."

## Twin Falls Drubs Oakley Nine, 7-6

Oakley's flashy baseball nine lost to Twin Falls team, 7 to 6, in an exhibition contest at the Twin Falls ball park yesterday morning. A four-run rally in the eighth inning was responsible for Twin Falls' victory.

Batteries for Twin Falls were Louna, Burk and Bots. Buck appeared in the game for the first time since he had been seriously ill in the fourth inning and had to be carried from the field. Oakley batteries were Elliot and Hunter.

## Stiner Tutors Varsity Track

CORVALLIS, Ore., July 4 (AP).—Lester Stiner, who has been a freshman track coach at Oregon State, was appointed varsity track coach today to succeed Dick Newman, resigned. This announcement was made by Paul J. Schiller, director of inter-collegiate athletics. Schiller said Stiner will assist him in coaching the Oregon state varsity football team and will do a major part of the training.

Stiner was a four-sport star at Hastings high school, Lombard college and Nebraska varsity. He was an under-graduate star, later going to University of Colorado as line coach in football.

## Principal Figures in Reno's July Fourth Bout

THESE THREE MEN were in the ring at the Reno race track yesterday as the bell rang for the start of a 20-round fight. Dempsey was promoter and referee of the affair. Uzcudun won a decision. —(AP) Photo.

## Celebration Card Features Fighters

Victory took knokouts, one decision, and one draw, four boxing bouts, each scheduled for four rounds, on a card staged on an elevated ring on the courthouse lawn last evening as one of the events of Twin Falls Fourth of July celebration. The crowd, estimated at more than 18,000 spectators, was the largest ever seen in the city.

The card developed momentum as Uzcudun, and reached its climax in the final bout when Uzcudun, 146, Twin Falls, knocked out "Bailor" Burke, 142, Seattle, in the second round. Uzcudun started with a rush and never stopped until he had the Bailor in a very bad way in the first. Burke fought gamely, but his opponents was too strong for him, and he took the count after being knocked down, twice in the second round. It had been agreed between the fighters that the bout should go to a finish, until one or the other had accumulated a wide margin of points or won by a knockout.

Guy McKim, 140, Twin Falls, made short work of Young Hawkins, 140, California, winning with a knockout in the first round of the third bout. In the second bout, Altheim, 140, Twin Falls, won a decision over "Kid" Mingo, 147, San Diego, coming from behind to claim the victory after Mingo started strong and scored a cut over Altheim's left eye in one of the first exchanges of punches.

"Judy" Ford, 130, and Jerry Young, 122, both of Twin Falls, showed some fast and clever boxing for four rounds to a draw in the first bout.

The card was arranged by Club Box for the celebration committee of which Frank Dell was chairman.

## Beard Sets Mark For High Hurdles

NEW YORK, July 4 (AP).—Fulton today declared they had broken up the largest baseball meet and acceptance of the city. The event, which was held at the city stadium, was the first of its kind in the city. The event was held at the city stadium, which was the first of its kind in the city.

Lincoln, Neb., July 4 (AP).—Percy Beard of the New York Athletic club, who never before had won a major track event, today stepped out and landed two-thirds of a second of his 120-yard high hurdles in the senior division of the National Amateur Athletic Union championships.

Beard, a former Atlantic City athlete, racing through a high rail on a creaked track, conquered the hurdle in 14.2 seconds.

Officials indicated his accomplishment would be offered for approval as a world record.

Four met records were knocked out during the afternoon program of the meet. Frank Wyckoff, the country's premier 100-yard dash man, whizzed a fine time in 15.2 seconds to set a new state standard, while Bob Maxwell of the Los Angeles Athletic club, did the low hurdle in 2.3 seconds for another mark.

## Gotham's Police Smash Ball Pool

NEW YORK, July 4 (AP).—Police today declared they had broken up the largest baseball meet and acceptance of the city. The event, which was held at the city stadium, was the first of its kind in the city. The event was held at the city stadium, which was the first of its kind in the city.

The tickets indicated the drawing was for September 16, under supervision of "The Press & Publishing Post 177, Veterans of Foreign Wars, Los Vegas, Nevada." It was for a race at Belmont park September 10. The entire project was a fraud, the police declared.

A printing shop was operating as top speed turner out tickets. Two printers were released in \$2,000 bond until Monday, the other charged on gambling and book-making charges.

In Newark more than 12,000 boys and girls are enrolled in 4-11 club projects.

## Schmeling Gets \$106,138 Share In Tittular Bout

Striking Receives \$33,168, And Government \$75,700. In Taxes Out of Gate Receipts of \$349,415

By EDWARD J. NEIL  
(Associated Press Sports Writer)  
CLEVELAND, July 4.—Poker players of the fight game counted their chips today. For some there were losses, for others profits. In the game the faithful played with Max Schmeling, Young Stribling and the Madison Square Garden corporation of Ohio.

The big winner, of course, was Schmeling, who, surprising Tatum, won the fight with his heavy title in the hush Cleveland municipal stadium with such methodical skill and power last night that he left his opponent, Young Stribling, from the challenger's role in 14 rounds. Schmeling's victory was a triumph for the city of Cleveland, owner of the magnificent center amphitheater on the shores of Lake Erie, while the Garden and the industry split a two-come taking the afternoon contest, 9 to 7, and the home team the night game, 10 to 5.

## Last Year Winner Triumphs Again In Boy And Dog Race

Outdistancing other competitors in a boy-and-dog race in connection with Twin Falls Fourth of July celebration last evening, Kyle Watts, 12-year-old son of Mr. and Mrs. Ed Watts, for a second time won the automobile that was offered as the prize for the winner of this contest. Last year it was a tearing car that beat out a number of other entries.

Watts' advantage rested entirely in the capability of his well-trained racing bull dog.

Sixty small boys and as many dogs of assorted varieties, each held up by a boy's hand, lined up to start the race on Shoshone street last evening. The course was two blocks long, turning around a pole at the middle of the street and returning to the starting point. The turn proved an insurmountable handicap for most contestants. A dog with a blind dog led the contest winner up to the last few yards.

# FEATURE FLASHES FROM FAR-FLUNG FOREIGN FIELDS

## Vincennes Exhibit Opens French Eyes To Colonies' Huge Size And Importance

Marshal Louis H. Layetley Gets Credit for Awakening Nation to Realization of Value of Holdings in Asia

This is the man credited with having made France Colonial minded.

By ARNO DOSCH-PRKURDT (Associated Press Staff Writer) PARIS, July 4.—The Frenchman who goes to Vincennes to see the remarkable exhibition of colonial products, particularly the exhibits from the rich lands over which flies the French flag, are coming away with a new idea.

This is an enormous change from the French attitude of the last century, when the colonies were regarded as a mere source of raw materials.

While the exhibition at Vincennes has been something of an eye-opener to many Frenchmen, they have not yet been so much awakened to the fact of empire by an entirely different influence.

The demand of Italy for naval parity raised the Frenchman to learning geography.

The French government presented the exhibition for reasons which the republic should have a larger idea than Italy, and it is emphasized that France's colonial empire was second in extent only to that of Great Britain.

It enumerated the tons of thousands of trade routes which, it said, needed guarding and called attention to the millions of people of all parts of the world who depend upon France for protection.

The argument was repeated over and over for 18 months.

Knowledge spreads

Previously it was only Frenchmen who knew how their government's empire was laid out, and the importance of the French colonies.

There always were, however, some men in France who understood what the colonial possessions were going to mean for the future.

One of them was Marshal Louis H. Layetley who made the Colonial Exposition his last. He had been in France in a realization of Asia.

As Layetley's own personal success in Morocco, he had been expected to give Morocco and Africa his first place at the exposition, instead he placed French Asia dramatically before the French public. Everything Africa occupies the most prominent position. Morocco, Algeria and Tunis are completely represented, but they do not hold the limelight.

Layetley's purpose was undoubtedly to make the French people conscious of Indo-China, Africa, and, next door, needed less dramatization.

## 60 EXPERTS LABOR TO REMEDY SPAIN'S AGRICULTURAL ILLS

Economic, Farming and Employment Specialists Act in Interest of Agrarian Program in Wide Survey

By THE ASSOCIATED PRESS MADRID, July 4.—Spain's agricultural ills are being felt by a commission of 60 economic, farming and labor experts.

They are making a survey under supervision of the ministry of labor to enable the provincial government to prevent its important agrarian program to the coming national assembly.

The problem of future agricultural reform has already been discussed by the government in two preliminary measures. These, however, have given only a faint inkling of what is to be expected in the future drive for agricultural revitalization, and the starting of a "back-to-the-farm" movement to mitigate an unemployment problem of some 2,000,000 persons.

## Zita Wants Italian Royal Bride To Bolster Son's Throne Claims

Widow of Last Monarch of Austria-Hungary Confers With Italy's Ex-Rulers And Pope on Marriage

By ANDRÉ HERBING (Associated Press Staff Writer) SAN ROSSO, Italy, July 4.—Royal wedding bells may ring again in the warm air of Italy, if the conversation of Zita, ex-empress of the former Austro-Hungarian empire, and Queen Elena, of Italy, bear fruit.

It could be a wedding of youth, involving Archduke Otto, 19, Zita's eldest son and claimant to the vacant throne of Hungary; and Princess Maria, 18, youngest daughter of King Victor Emmanuel of Italy.

Emperress Zita, widow of Emperor Karl, last monarch of Austria-Hungary, has been in Rome at the royal palace, interviewing the Italian royal family and the Pope to enter their aid for the marriage.

She hopes that Italy's influence obtained at the nuptial altar, will put Archduke Otto on the throne.

Italy is still a kingdom, but without a king, being governed by a regent, Admiral Nicholas Horthy. Politically the match intrigues Italy, which since the end of the world war has been angling for influence and power in the Balkans.

The wedding of Princess Zita to King Boris of Bulgaria last October had something of this flavor.

Jugoslavia had been considered an unfriendly nation. Italy seeks counterweight to Jugoslavia's borders. Bulgaria and Hungary are such.

Ex-emperress Zita is carrying on her campaign particularly with Queen Elena.

Two royal youngsters, enmeshed in European intrigue, are Archduke Otto, 19, and Maria, 16-year-old princess of Italy. Otto's mother is trying to arrange their betrothal so as to strengthen her son's claim to the throne of Hungary.

Romantic match-making souls are stirred by the possibility of the union. Both Otto and Maria are striking in appearance. Maria is just flowering into womanhood. She is the darling of her mother, who is seldom seen in public without her.

Italy has been the scene of four royal weddings within two years: The Honorable monarchs always had great weight, with the papacy, and Zita wanted the pontiff's opinion. There is no religious difficulty in the way of the marriage, however, since both the archduke and the princess are Catholics.

## Jules Renkin, 69, New Premier of Belgium, Appears Grim Executive

(By The Associated Press) BRUSSELS, July 4.—A man who collects postage stamps and who is so austere that he is called never to laugh, is the new premier of Belgium.

It is Jules Renkin, 69, leader of the Catholic party and one of the outstanding conservatives of this kingdom.

Mr. Renkin took office early in June, succeeding Peter Jaspar, who has held the premiership since November, 1927, and had become almost a fixture in the office.

Jaspar's regime had been upheld by a coalition of Catholics and liberals, and went down when the latter refused to support the premier's plan to spend \$2,575,000 for frontier defense.

Nevertheless the new cabinet retained the defensive scheme and it has appropriated \$5,000,000 to be spent this year.

Mr. Renkin is a man of many parts being a barrister by profession, a successful financier and one of the ablest debating politicians in the country. As leader of his party he has discussed in and out of parliament the colonial, educational, economic, judicial reform and linguistic problems which beset the Belgian administration.

The language question, which twice nearly ousted Jaspar, is one of the puzzles which Renkin has inherited. The Flemish extremists, who want their language used exclusively in the University of Ghent, belong to the Catholic group and show no signs of yielding.

As a financier the new premier is president of the boards of several transit companies and public utilities, and a director of two large banks. He has been acting as receiver for a failed bank.

He has been in politics more than a quarter of a century. His first government post was in 1907, when he was minister of justice. He held the colonial portfolio for 10 years, beginning in 1920, then was minister of railways for a year and minister of the interior for another year.

Delcroix was premier at that time and when Renkin disagreed with his chief and said so publicly, he was forced to resign.

That was in 1923, and he has been working back toward the cabinet ever since.

Delcroix was premier at that time and when Renkin disagreed with his chief and said so publicly, he was forced to resign.

## ENGLAND'S FARMERS RESIST CHURCH TAX

Sir Stanford Downing Says Situation Appears "Serious Moment for Church"

OF THE CHURCH, Oxford, England, July 4.—English farmers are giving church authorities no little worry over prospects for continuation of the tithe.

"It is a serious moment for the church," said Sir Stanford Downing, secretary of the ecclesiastical commission.

"The tithe demanded is equivalent to 123 shillings on every acre of land," countered J. E. Mowbray, chairman of the Suffolk Tithe-payers' association.

The situation was brought to a head here when a farmer's possessions were auctioned to satisfy \$500 arrears in tithe.

The farmer's neighbors bid 5 cents, 10 cents and other low prices for hogs, cows and farm machinery. When the sale was over the tithe commission had only \$25.

The farmer's friends then made him a present of the things they had purchased.

Opponents of the tithe say more than 600 Suffolk landowners have joined their organization and that 100 Norfolk farmers are organized as well as smaller numbers in Essex and Cambridgeshire.

Because of religious conviction, however, most British farmers feel the tithe is a fair charge. Those not opposed to the tithe say land owners purchase land in full knowledge of the tithe and are expected to pay it. They say the tithe is a fair charge. Those not opposed to the tithe say land owners purchase land in full knowledge of the tithe and are expected to pay it.

The tithe is a fair charge. Those not opposed to the tithe say land owners purchase land in full knowledge of the tithe and are expected to pay it.

## War Debt Conferee

Secretaries of War and Navy Departments Meet to Discuss Debt

WASHINGTON, July 4.—The secretaries of the war and navy departments met today to discuss the war debt problem.

The meeting was held in the war department and was attended by the secretaries of the war and navy departments, and the secretary of the treasury.

The meeting was held in the war department and was attended by the secretaries of the war and navy departments, and the secretary of the treasury.

## Veteran Nurse

Mrs. Augusta B. Hartman, civil war nurse, celebrated her ninety-ninth birthday at her home south of San Francisco.

She is believed to be the last living battlefield nurse and by act of congress was named as official "mother of the army and navy."

## PLANE TRIPS EASE BURDEN OF STATE FOR CHILE'S RULER

SANTIAGO, Chile, July 4.—Flying is President Carlos Ibanez's favorite pastime.

The busy chief executive, who by reason of excess is a dietary points granted by congress pilot the ship of state in a high manner, finds that in stimulating the state he loses the fatigue induced by the care of government.

Ush farm lands were valued at \$221,262,307 at the last census. It was a gain of \$30,000,000 over values in 1925.

## HEAT IN GROUND MAKES ICELAND WATER WARM

REYKJAVIK, Iceland, July 4.—Hot water bathing is continually warm water, either salt or fresh is now possible in this land of the chilly north.

The water is so hot that it is used for bathing and for heating.

The water is so hot that it is used for bathing and for heating.

## DISCS DISPLACE GUIDES

LONDON, July 4.—The Science museum, recently opened, dispensed with human guides. Instead gramophones play records describing the appliances exhibited in the show cases.

New dormitories of the California Institute of Technology will have right rooms equipped with loud speakers, with the result that an orchestra can be heard simultaneously in the rooms.

## Does it Hurt Here?

Have you callouses, cramped toes or burning sensations at the ball of the foot? How to get relief from this or any other Foot Trouble will be demonstrated at our store.

MONDAY, JULY 6

by a Foot Comfort Expert of the Chicago Staff of Dr. Wm. M. Scholl, noted Foot Specialist—No Charge for His Services

If you suffer from your feet, it will be to your everlasting benefit to visit our store on the above date. You will receive an analysis of X-ray prints of your stockings feet and be shown exactly what your foot trouble is. Dr. Scholl's Appliances or Remedy you need is then demonstrated so that you may know how completely comfortable it will make your feet. All this without cost to you!

FREE! Each visitor to our store during this demonstration will receive a sample of Dr. Scholl's ZIRNO-PADS for Corns, and a copy of Dr. Scholl's booklet, "The Feet and Their Care."

## ITALIAN WAR LEGION ADMITS ARMY NURSES

ROME, July 4.—The Association of Lombardy, the Italian equivalent of the American Legion, has just admitted to its ranks nurses who served during the war. They were given membership cards at the day meeting.

Ush farm lands were valued at \$221,262,307 at the last census. It was a gain of \$30,000,000 over values in 1925.

## Friend of London's Toilers Plans to Entertain Gandhi

(By The Associated Press) LONDON, July 4.—Muriel Lester, who will be Gandhi's hostess in London, is an English woman.

Twenty-eight years ago she founded Kingsley Hall in East London, a slum.

There was no place for the work of her kind, she explains. "We felt there ought to be a place where they could get a little rest, hear a lecture."

It started modestly, in one room. Later there were two, then, in 1907, there were three.

There were three in the modern building in which Gandhi will live.

Workers in the settlement take a vow of poverty and live on less than most people would spend on mortals.

There are nine there this summer: an American girl, Alice Heap, of Knoxville, Tennessee, who is spending her vacation in the settlement. She comes from Arlington Hall, near Washington.

Mrs. Lester is the settlement's head, although the work is shared by all. She is of medium stature, with dark, graying hair, and a smile of her head and parted in the middle. She has quick, interested eyes, a frank look and a generally contented air.

Nobody fools her much, and she

## CHINESE PLACE BAN ON ANCIENT 'KOWTOWING'

NANKING, July 4.—The ancient custom of kowtowing has been banned by the nationalist government.

By kowtowing is meant the kneeling and touching the forehead to the floor in token of homage, administered to superiors.

The custom must go, says the decree, because it is feudalistic.

The action was taken after several political bodies had urged that three bow be substituted as the official Chinese symbol of esteem.

## BLouses OUTSIDE SKIRTS GAIN IN FASHIONABLENESS

In Greatest Suit Season In Years—Parisian Dress-makers Launch New Fabrics and Chic Designs

By BARBARA DEAUFOUR (Associated Press Fashion Editor)

PARIS, July 4.—Trends in blouses are making their exit from the style stage.

The most fashionable blouse to wear with the summer skirt or wool tailcoat is the hip-length blouse worn outside the skirt.

In the greatest suit season Paris has launched in many years blouses have become affairs of primary importance, and new forms and fabrics have been devised to contribute to this.

The new blouse designs range all the way from the ultra-feminine to severe tailored models, and their colors vary from white to tinctured pastels.

Trilly balties, handkerchief linings, organies and dotted swisses are the "demure" era for the summer blouse which madame wears with her skirt.

They are decorated with trim necklines or cascading long sleeves or short to fit the line of the jacket which accompanies them.

Trilly long-sleeved blouses are generally worn with coats having elbow-length sleeves, while short-sleeved blouses are worn with coats having long sleeves. Many of them are finished with an inset-wide belt matching the fabric of the blouse.

For sport wear the smartest blouse is the lightweight knitted wool, decorated with short cap sleeves and two wide revers. It is smoothly around the waist to the hipbones and can be worn without a belt.

The color scheme which blouses follow is one of the most interesting notes of the mode. Shell pink or pale blue are worn with long sleeves, seafoam green or lemon yellow with short sleeves, turquoise or daffodil yellow with short sleeves.

White blouses may be worn with all dark colored suits, and almost any tint accompanies black.

PARIS LACQUERS HAIR TO MATCH DRESSES

PARIS, July 4.—Lacquered hair headpieces are a new fancy for evening wear.

The headpieces are made of real hair, attached to silk discs, and then lacquered to retain the line.

They are made of blonde, titian and black locks, as well as those which have been dyed dull blue or faded pink to match the color of the wearer's frock.

GAY COLORS MARK SUMMER ADVANCE

WASHINGTON, July 4.—Lend and leader share the colors as summer advances.

According to the whittles in the current capotes of fashion, broad shades of contrasting colors flashing from dresses of demure white or pastel tint.

Only the slim young things dare wear the chattering shades of orange and blue, green and red, after a small wait and they look "quite fetching."

TAILORED NOTE FOR EVENING GOWNS

PARIS, July 4.—Tailored evening gowns are a new trick for summer nightgown wear. The frocks, generally black, purple or brown, are decorated with simple V-necklines finished with a tailored white plume bow in front. They are worn with long sleeves, and the bodice is finished with a shoulder line with a slender thread of white cantella.

CAPE NOW HIDE BARE SHOULDERS

PARIS, July 4.—Bare shoulders are out of the fashioning picture. The newest dinner and evening gowns are designed with bertha, cape, cap sleeves or trailing scarves which cover the upper arm.

The low neckline has, therefore, given way to a neckline of medium low cut.

GYPSEY KITCHENS SMART FOR SPORTS

PARIS, July 4.—Gypsy handkerchiefs are the smartest accessory for sportswear. The bright colored kerchiefs are worn tied high on one side of the head and the other, with the tail draped over the ear. They match the color of the beach ball or sports frock which they accompany.

WHITE SATIN WORN AT COUNTRY CLUBS

WASHINGTON, July 4.—White satin for country club wear is being worn by the capital smart set. White satin suits are worn with contrasting color touches on shoes, hat and accessories.

SILVER BELT SETS OFF LIGHT BLUE BOUCLE

WASHINGTON, July 4.—Miss Barbara Browning, granddaughter of the inventor of the Browning machine gun, is wearing a sport suit of light blue boucle with narrow silver belt and crystal buttons. With it she wears a natural color broad-brimmed straw hat and pretty colored sports shoes.

## Fireplace Attracts Even In Summertime

By HOPE HAMMOND

Interior Furnishings Editor, The Woman's Home Companion

WASHINGTON, July 4.—The fireplace is the winter charm of the home, and in the summer it is a decorative point to solve.

For who wants the conspicuous emptiness of a summer fireplace to mar the livable qualities of the living room?

Nowadays the problem is solved more or less satisfactorily by using the fireplace as a setting for a riotous display of ferns and flowers.

But often the best way of meeting the situation is through an artificial fireplace in which ferns and flowers are carried to a new level of glistering silver birch.

This wood, in fact, is sometimes as decorative as a bouquet of flowers and there is a translucent quality to its curving bark that justifies its use in the Indian name of "iron flame."

Perhaps the cool beauty of the birch bark may be carried into the summer seasons of the fireplace, or the big easy chairs of the winter living room may be replaced with furniture of cooler lines.

Principal differences between summer and winter interiors are those of color and texture.

Thus, fortunately, the summer interior may usually be given the suggestion of coolness appreciated in summer by making only a few changes.

It is well, however, when purchasing furniture, to consider its shape and style in relation to all overtones. Straight lines, or simple curves, with the slightest amount of upslatery required for the summer interior, preferably color-fast, are obtainable.

FEDERATION MOVES TO RAISE RATING OF WORK

WASHINGTON, July 4.—To raise nursing, dental work and other professions to professional status was the goal of the National Federation of Business and Professional Women at their biennial convention in Richmond, July 4-11.

The federation is already committed to include entrance of the United States into the world war and the movement for the establishment of a federal department of education.

NEVADA BUSINESS GIRLS FIND FOOD COSTS HIGH

RENO, July 4.—Nevada business girls have been found to spend most of their salaries for food.

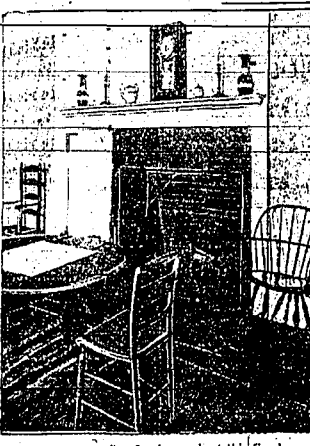

Figures collected by Mrs. Mary Shivers, food committee director of the Nevada Agricultural Extension Service, show that the girl with the \$1000 salary spends 42 per cent for her meals and desserts.

The \$1000 girl spends less actual money for her meals. One Nevada girl costs her \$11.17 while the girl who earns \$1200 or \$1500 spends \$12.3 a day.

It is longer time that the lowest salaried girl costs the least. She spends \$2.14 as against \$0.50 cents for her more prosperous sisters.

COLLECTS OLD SONGS

BAN FRANCISCO, 4.—Charles Glenn, pianist on KIVA program, has a collection of more than 1000 copies of popular songs from 1840 to the present.

## Woman Studies Mummies' Ills With X-Ray

(By The Associated Press)

CINCINNATI, July 4.—Through the eyes of the X-ray, Anna R. Holan, who practices over the only mummy roentgenological laboratory in the world, finds out more things about the ancient Egyptians than perhaps they knew themselves.

Miss Holan's laboratory, 1111 at the Field museum here, it was established and equipped four years ago by Stanley Field.

Miss Holan has developed her own technique, using long exposures with low power. The results are prima as clear and sharp as etchings in black and white.

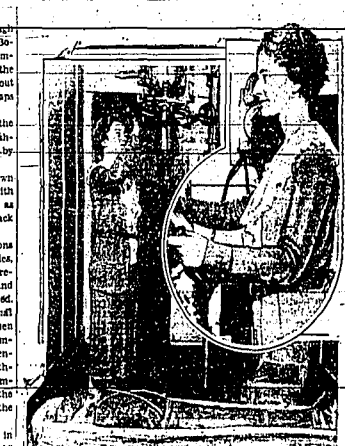

She is able to discover indications of various diseases in the mummies, and finds arthritis and rickets predominant in both the Egyptian and Peruvian mummies she has studied.

She determined positively that "Mummy 3041," a tiny specimen only seven inches long, was a mummy of a human embryo, after scientists had debated long about whether it was human or ape. The mummy was taken from its place in the animal cases and placed with the human mummies at the museum.

"We found a gripping aspect in this little wall of mummy land," she says, "and it was glad to see it taken from the animal cases."

Under the process, roentgenograms of mummies and various things result in roentgenograms, with lines, a delicate and sharp as the surgeon's needle could make them.

Her X-ray room is entirely isolated with lead steel. Through a pane in a lead-insulated window, she watches her machine, safely, during exposures, which are sometimes as long as four or five hours.

Anna R. Holan, internationally known X-ray expert, is shown at work in her laboratory in the Field museum, Cincinnati, examining an ancient Egyptian mummy.

## SOUTHLAND BUILDS INDEPENDENCE ON DIVERSIFIED CROPS

### Cotton Member of Federal Farm Board Thinks Dixie Farmers On Best Self-Sustaining Basis in History

(By The Associated Press)  
ATLANTA, July 4.—In spite of drought, low prices, over-production and other agricultural evils in 1930 the South's farmers are approaching the most self-sustaining basis in history this year.

This opinion, expressed recently by Carl Williams, cotton member of the Federal farm board, has been taken up on every side, and leaders called to speak for their state relieve it with more or less emphasis.

There can be no doubt that Georgia farmers are on a better basis as to food and feed supply this year than ever before, declared Dr. Andrew M. Boulé, president of the Georgia State College of Agriculture.

"We have been working systematically toward the attainment of an ever since this institution was established in 1907," says Dr. Boulé. "Georgia farmers are now diversifying more effectively than those in any of the other Southern states. This is not a new development, but one which has gradually been taking place during the 24 years delineated."

"Real History" Louisiana farmers are on a more self-sustaining basis than at any time in history, declares Merrell Voorhies, economist of the agricultural extension division, Louisiana State university.

"More food and feed crops are being planted and the live-stock program is widely accepted," Voorhies says. "We are inclined to think from figures available that the percentage of marginal acres and marginal farmers constitute a greater menace to the United States cotton industry than the foreign grower."

The American cotton grower, complete with foreign countries," Voorhies adds, "if he will only get his house in order, eliminate the unprofitable acres, seriously undertake to lower production cost and recognize quality quality."

A reduction of the cotton acreage in Texas by 11.2 per cent, and an increase of the corn acreage by 15 per cent, would, according to recent reports, give that state a crop of cotton of practically one-half the cultivated acreage in cotton and one-half in other crops.

## BUHL CHURCH PLANS TO HOLD COMMUNION

BUHL, July 4 (Special to The News).—The Buhl Presbyterian church will observe holy communion at the morning service Sunday, Rev. Carter Hickey will speak on "Bible and Duty."

At the first union service of the Methodist, Methodist Episcopal and Baptist churches to be held this summer in the city park, Rev. Hickey will speak on "The Way Through."

Rev. H. N. Lines, pastor of the Methodist church, will be in charge of the music. The Presbyterian church sent Miss Blaine and Knox and Mrs. Baring to the annual conference at Bellevue this week.

The one hundred sixth observation squadron, Alaska national guard, has a record of 10 years of flying without loss of a life or a serious injury to pilot or crew.

## Twin Falls Markets

## MOSCOW STUDENT MINES IN SUMMER

Junior in University Idaho  
Mining School Saves \$1700  
In Period of 45 Days

MOSCOW, July 4 (Special to The News).—A student of the University of Idaho has mined a tidy little fortune for a college student. Yet that is the sum Henry J. McFarlane, a junior in the school, has earned in 45 days the summer he is on registered as "The University of Idaho."

Armed with a cold pan, young McFarlane hied himself to the hills, that his home in the Thunder mountain region of Central Idaho, some of the richest gold fields in 1930, '31 and '32.

Following traces of gold he mined in a steady stream, he discovered pay gravel, from which he mined seven half-pint bottles of placer gold in 45 days.

By jacking gravel on his back to the stream, he was able to pan out \$3 to \$4 of gold in a 10-hour day. He sold the gold to the local dealer for \$10 a ounce, and he has now increased to \$15 a day. Having his money in the bank, he has been able to live on his money, and he has now increased to \$15 a day.

## GASOLINE ALLEY—A LIFE ON THE OCEAN WAVE.

## Device Digs 10,000 Water Holes To Acre Check Run-Off Of Rains

By FRANK I. WELLS  
(Associated Press Farm Editor)  
WASHINGTON, July 4.—Erwin, the most calamitous destroyer of American farm land, has a potential foe in an experimental farm tool which leaves a newly cultivated field so full of deep holes as to check materially the run-off of the heaviest rains.

It was designed in the workshop of the agricultural experiment station at Port Hays, Kansas, and has attracted considerable attention from government engineers.

The machine can be used as a cultivator for row crops and as a surface tillage implement for fallow.

Its important feature is a set of alternating rollers which work up and down so that, with the forward motion of the machine, they scoop out dirt and leave holes in the ground.

Since the holes alternate, with ridges of dirt dropped between them, the surface condition produced when the machine is run up and down is apparently as effective in conserving water as when operated along the contours.

As now constructed, the machine leaves approximately 10,000 holes per acre, each hole having a capacity of from two to three gallons of water.

It is estimated that the machine will save 20,000 to 30,000 gallons of water to the acre, whereas ordinary cultivation leaves smooth furrows which may become gulches in heavy rains.

The new generation gives soil the capacity to hold from 20,000 to 30,000 gallons of water to the acre. Although the holes collectively imposed a large amount of water, their greater value comes from the fact that the water is held still and given a chance to soak into the ground.

One hundred election officials failed to call for their pay 45 days after a municipal election in San Diego, California.

Twelve 11 inches long are required to hold 20-ton steel columns in place in the skeleton of the new Louisiana state house.

JUST KIDS  
I'VE HAD A WELL-WELL-BUT OF BAD LUCK. MOM, WHAT HAPPENED?

REMEMBER SENDIN' ME DOWN TO THE FELLER THAT RUNS THE DELICATESSEN TO TELL HIM HE GAVE ME A NICKEL TOO MUCH CHANGE.

HE TOOK IT—THAT'S NOT BAD LUCK, IT BELONGED TO HIM.

YEAH—I KNOW, BUT HE DIDN'T REWARD HONESTY. HE KEPT IT!

## DRIVE AIMS FOR MORE MEAT UPON NATION'S TABLES

Livestock Industry Resorts  
to Ballyhoo in Effort to  
Increase Consumption of  
Big Agricultural Branch

(By The Associated Press)  
CHICAGO, July 3.—The livestock industry is resorting to ballyhoo in efforts to increase demand for meat.

A nation-wide drive, with "eat more meat" as its slogan, has been projected to stimulate one of agriculture's most important branches.

A series of public demonstrations in large cities throughout the country is planned for this summer.

Banners will display the fact that meats are cleaner than they have been for years, and a cattle, sheep and hog will be exhibited in each city.

Decision to publicize the cheapness of meats was reached at a Chicago meeting of livestock producers, packers, butchers, railroad men and other industrial leaders.

Charles D. Carey, chairman of the

struck the keynote of the gathering when he said:

Poor Returns  
"Cattle are now selling at prices 50 per cent below those of two years ago, bringing a return of less than 75 per cent of the cost of production."

Calling the attention of the public to the fact that meat prices are presently 33 per cent below prices prevailing at the first of the year, we would stimulate consumption and return the livestock and service industries to a profitable position.

Thomas I. Wilson, packer and vice president of the board, said consumption of meat and lard now is 25 pounds per capita, under that of 1907, and about 5 pounds under that of 1921.

Merely by returning the use of meat to the level of 1921, he said, would mean an increase in demand of a billion pounds a year, and the return of satisfactory conditions for the industry.

BOYS AND GIRLS EARN  
\$4590 ON 18 CALVES

HOUSTON, Texas, July 4.—Sixteen McCulloch county, Texas, farm club boys and girls very carefully fed 18 calves under the most approved instructions. The calves went to Texas fair stock show, where they were sold at auction, and brought their young owners, a total of \$4590.

Two girls, Pauline Roberts, 15, and Ruby Pence, 12, exhibited the choice of the animals.

NEW  
HARDWARE

When it comes to buying Hardware you, very naturally, want to make your selections from new and attractive merchandise. Old, out-of-date, hard ware is not only somewhat repulsive to your eyes, but also reflects the character of the store having such goods in its displays—you know at once that such a store is not enjoying the brisk, fast-moving business that any healthy enterprise should have. Something is wrong when the shelves

are crowded with the same goods and tables month after month and even year after year.

Our displays are new and fresh—new merchandise is constantly taking its place on our tables—and our fast-moving stock assures you the latest and most attractive hardware.

## IT DOESN'T "PAY" TO BE HONEST

There were other serious consequences, too. New York and New Hampshire had a perpetual bone of contention in the question of who would have possession of the Green Mountains and the country that is now Vermont. The Green Mountain state declared Vermont an independent state, and applied for admission to the Union. New York declared that Congress defeated the scheme, but Vermont went on framing its own constitution.
