The "message" attributed to George Washington, is this: "To the interests of your country all interior considerations must yield."

The stadium decorations also stand for both conventions so there will be no big pictures of past party leaders and no large party symbols. Instead, the non-partisan scheme in the convention hall will include shrubs of all the states and a pair of giant American eagles.

orough bill, not be the best way."

The measure is sponsored by Representative Goldborough, Democrat, Maryland, and has been vigorously opposed by Governor Burren Mayes of the federal reserve board. He contended that congress should not order the board to continue what it is already doing and that the board should restore the price level, would be impossible of fulfillment.

The Glass substitute proposes a

wholly new plan, the measure providing that national banks may secure currency on their government bond holdings to the extent of their capital.

Glass believes his proposal would bring about a more "fructiferous" expansion over the country.

Senator Walcott, Republican, Connecticut, regarded as the administering spokesman on the committee, said the additional expansion should amount to no more than \$94,000,000.

He said that at present the amount of currency outstanding on the class of government bonds that have the circulation privilege—3 percent gold bonds—is \$114,000,000 short of the amount that the banks have authority to issue.

"The fact that this is not issued," he said, "is evidence that it is not needed."

LUCKY STRIKE CIGARETTES

THE AMERICAN TOBACCO CO.

Do you inhale? Can any question be simpler? And yet—what a force it has created! The cigarette trade feels that the public has been let in on a sacrilegious secret! "You've upset the apple cart," they say.

Why such anxiety? Certainly the public doesn't fear the question—for everybody inhales—knowingly or unknowingly... every smoker breathes in some part of the smoke he or she draws out of a cigarette.

certain impurities concealed in even the finest, mildest tobacco leaves are removed by Luckies' famous purifying process. Luckies created that process. Only Luckies have it!

Remember—more than 20,000 physicians, after Luckies had been furnished them for tests, basing their opinions on their smoking experience, stated that Luckies are less irritating to the throat than other cigarettes!

Are The Things Given You Always Free?

We give 3 lessons free on band instruments purchased from us, and they are absolutely free as we never charge more than the regular factory price for any instrument we sell, then we do not add carrying charges or interest on time payments.

Then you can get these and additional lessons if you wish them any day or evening. If we were to give you a greater number of lessons free and were compelled to hire some one to give these lessons, we probably would have to charge you \$10.00 or \$15.00 more for the instrument sold. We have known cases where prices have been boosted 25% to take care of free instructions.

When You Buy An Instrument Do These 4 Things

- 1ST—Buy nothing but standard instruments that you are familiar with.
- 2ND—Compare prices and know that you are not paying more than the factory would ask for them.
- 3RD—Select your own instructor and pay as you get results.
- 4TH—Don't try to get something for nothing.

REMEMBER We own the building in which our music store is located, and are not here today and gone tomorrow!

EDUCATIONAL

A concrete example of the trend of modern education rises as a tribute to Burley High School...

Designing of the new structure practical experience and knowledge in the art of designing and building...

Plans for a modern five-room classroom were drawn in the classrooms when the boys set to work.

Practical application of the science of the laboratory work and plumbing...

The house is being erected for a Burley man, who is furnishing all the material...

During the past class hours and the structure is now ready for painting.

It is seen that, especially in times of economic stress, real practical knowledge and experience such as these boys are receiving, carries at least as much benefit as most "book learning."

GARDENS

The first consideration, according to one garden expert, is to select spots which screen off the neighbors' view so that the garden can read or have supper in the garden. It should be created with shrubbery and should have some solid foundation like flag-stones or golf-course green.

The idea is that the garden should be used in the weather as an outdoor living room. And this, in fact, is what gardens nowadays tend to become.

You Can't Marry

by Julia Cliff-Adams
(Continued from last issue)

SYNOPSIS: Eddie Townsend returns to work. He is not able to stay for a while. George, his wife, wants to keep her job and keep the baby for Eddie. She so determined not to stop that she is keeping her marriage secret, since her employer discharges women who marry.

Chapter 20
BREAD AND CHEESE AND KISSES
"So [Ollie] Eddie continued, "fixed up a room for me with this old sofa—lighted old flowered sofa—my little darn good sofa—and I can make a home on what you mean about your savings account as well as my own. And I'll live on the sofa and eat the bread and make me convert to our own; and you shall burn an orange a week until I'm as happy as a king, and you'll finish things off with the Old Man and maybe help me give someone to take your place."

"And then—oh how I—deep, unsteady breath—and his griped, George, fiercely under his gay little cloth—then you shall make me a home on what you mean about your savings account as well as my own. And I'll live on the sofa and eat the bread and make me convert to our own; and you shall burn an orange a week until I'm as happy as a king, and you'll finish things off with the Old Man and maybe help me give someone to take your place."

"Did you know that people think—that those people were told it was a married?"
"Oh, you mustn't deny it!" Then, realising that he had betrayed her, she added, "Surely, so long as the Old Man keeps to that ridiculous proof of his, it's better that we should pretend—anything! You see, I'm a married!"
She pulled his chair away from the table and flung it to the left of the sofa, as if she was angry. "Would you have given it up," he asked, "if I had not told you to?"
She, too, abandoned the unhappy little dinner. She lit a cigarette and took a long, long drag on it.

"What on earth is the good of arguing about what might have happened? You aren't going to Mexico now—and Jerry sick the Old Man is shut up in his room. You're going to get—Jerry—himself—and she says there's no one else here."
"Never mind the compliments I'm making to think you never intended to give up your job, I get sick and that you don't intend to leave the job," she said.

"I can give you a decent sort of a life," he said. "You and I, girl, don't need a lot of trappings. We love each other."
She found that she was trembling. "Oh, Ed, don't forget that, ever!"
"I don't want you as much as you love me?"
"Then you'll throw over the job, George?"
She trembled so that she had to hold onto the edge of the table.

"I can give you a decent sort of a life," he said. "You and I, girl, don't need a lot of trappings. We love each other."
