HEALTH UNIT PLANS CHILDRENS CLINICS

Director and Nurses Arrange For Examination of Tots At Several Centers

A series of clinics for babies as well as for boys and girls of school age, to be held at a number of centers throughout Twin Falls county during the months of July and August, is being arranged by Twin Falls county health unit in cooperation with interested individuals or organizations in each of the clinic districts, it was announced yesterday.

Purpose of these clinics is to enable parents to ascertain the physical status of their children and to determine whether there is any handicap to be overcome.

Clinics are to be conducted on lines similar to the year-to-year health association round-ups, except that babies as well as children of preschool age are to be admitted.

Preliminary arrangements already have been made for holding these clinics at the homes of Mrs. E. W. Berry, Twin Falls, Mrs. E. H. Castleberry, Mars and Tuzena, and members of their staffs are to visit homes and register today with view to arranging for holding clinics there.

FORECAST FOR TODAY AND TOMORROW—Fair, not quite so warm.

Twin Falls temperature in the 24-hour period preceding 5 P. M. yesterday ranged between 84 and 61 degrees, according to the report of O. M. Chagny, government weather observer. This was the warmest day of the year-to-date, and the barometer fell, falling below 30.07 inches at 5 P. M. Wind was in the south. Humidity ranged between 85 and 19 per cent of saturation.

The New York member of the resolution committee.

New forces have aligned themselves against Senator Walsh, Montana, the Roosevelt choice for permanent chairman of the convention.

Former Governor Harry F. Byrd, Virginia, another one of the presidential candidates, said he had agreed to support Joseph E. House, chairman of the Democratic executive committee, for the post and intended to vote by that agreement.

Smith also said he would support House and would go to the convention floor if necessary in the fight for him. He said he did not believe it would be necessary to take the floor.

On the other hand, Senator Louis, Oklahoma, said his delegation would support Walsh for the post and would be joined by a Minnesota and Porto Rico delegation which, like his own, faces a conflict.

Senator Bull, Tennessee, long listed as a prohibitionist, and frequently referred to as a probable chairman of the resolution committee, said the question of "wet" and "dry" with whom he had talked before leaving Washington agreed to be for submission of prohibition to the people for determination.

Bull, however, insisted that prohibition should not be made the dominant issue but that economic questions should be presented to the people.

Another element entering into the New York situation was the stigma surrounding the disposition of the case against Mayor James Walker, New York City.

Governor Roosevelt called today for Walker to reply to the charge, but the mayor said he would not do so until after the convention. There have been reports he might be

throughout the day, reports indicated. The splinter of the quakes was believed to have been in the Pacific about 200 miles southwest of Oahu, probably at the same spot as that of the recent earth movements which had shaken Oahu and all Central Mexico.

The shock was felt only slightly in Mexico City, where, because of many recent quakes little importance was attached to such a slight disturbance.

The tidal wave swept over the beach and into a very outer of the city, and a mass of water of approximately 800 inhabitants, a dispatch tonight said.

Governor Salvado Saucedo, Colima, left here this afternoon for Oahu to take charge of relief and medical supplies sent on the way from the U. S. State capital and from Manila.

Four more bodies were recovered in Manila, a dispatch tonight said, bringing the known dead to 14 with a dozen or more persons still missing.

The heavy earthquakes was preceded by two light shocks which drove people into the street, where they were trapped when mountainside seas swept in.

The damage was estimated at \$100,000 loss (about \$1,500,000), but this figure was considered excessive here in view of the town's small size.

Nothing in the town escaped damage, however, reports indicated. Many dwellings were reported knocked down, destroyed or washed away. Newspapers of Mexico City were reported to have subscriptions for relief and rehabilitation work.

Legislation they want.

The railway executives charge there is ample evidence of a bipartisan conspiracy to compel congress to adjourn and abandon its constitutional duties, which will have the way for a virtual dictatorship of international bankers and big business, as now being planned.

"It would be a betrayal of the workers of America everywhere if congress were to run away in the face of the present situation," said the executives.

They are also demanding that congress stay on the job.

HOOVER PROPOSAL SCORES IN GENEVA

(Continued From Page One)

Referring to Mr. Hoover's brochure of the Kellogg pact, the French spokesman continued:

"And who is to guarantee that we shall not be used only for purposes of defense?"

French spokesman said privately they objected to the surprise manner in which the American program was presented. It amounted, they said, to an ultimatum.

The proposals were heard at a special session of the conference called at the request of Mr. Cline. Reports that America was making a momentous pronouncement had swept through Geneva, and when the meeting was called to order there was an air of eager excitement.

When Mr. Cline read the program, Sir John Simon, British foreign secretary, who opened the meeting, subjected the proposals to detailed and cool criticism.

"I say would for the delegation of the United Kingdom," he declared, "that we want more disarmament than appears here. We want substantial disarmament."

Sir John assured the American delegation that the Hoover program was not an ultimatum, but a sympathetic attention."

Dino Grandi, Italian foreign minister, who accorded an enthusiastic reception to the Hoover program, said he would accept it entirely and in all its parts. The disarmament plan submitted today by the American delegation.

SENATORS APPROVE \$500,000,000 BOND ISSUE TO AID LABOR

(Continued From Page One)

to which President Hoover is vigorously opposed, was approved, 87 to 16, on a motion by Senator Joseph P. Cannon, New Hampshire, to adjourn.

Many administration senators voted with Democrats and independent Republicans to retain the bond issue feature.

Despite the speed with which the controversy was settled, sponsors of the bill were doubtful of when a final vote would be taken.

With the relief battle dragging on, leaders definitely tilted their work as the goal for adjournment of congress.

When the House amendment was rejected, the Senate immediately began the next big battle over an amendment by Senator La Follette, Republican, Wisconsin, to increase the bond issue to \$1,000,000,000.

The limit of a veto for the bill with a bond issue included came from the Democratic leadership.

The bill would seem strange to me that the president would veto a bill which includes a measure almost identical to the one he prompted congress to pass a year ago when conditions were less bad than they are now."

To further complicate the situation, Senator Truman, Democrat, Florida, proposed a senators bonus payment plan as an amendment to the bill, and Senator Foster, Republican, North Dakota, proposed to bring forward his proposal for refinancing the farm mortgage debt.

Nearly three hours of today's debate centered around a provision to allocate \$40,000,000 to the secretary of agriculture for financing sales of agricultural products abroad.

An amendment by Senator Connally, Democrat, Texas, to increase the amount to \$20,000,000 and have it handled by the reconstruction corporation instead of the secretary of agriculture, was proposed by Senator Black, Democrat, Alabama, to remove the \$40,000,000 from the measure.

The farm board and its stabilization activities in wheat and cotton were criticized during the debate in which it was contended the purpose of the provision was to enable the board to dispose of the surplus stocks.

Among the amendments agreed to was one by Senator Anshutz, Democrat, Arizona, striking out provision

classification between the two nations.

It was stated adoption of the resolution proposed would not interfere with American construction works under way and would not lead to any immediate curtailment of personnel to increase the unemployment problem.

Despite Mr. Hoover's desire to bring about reduced armaments, sources close to him today asserted he would not consider under any circumstances that the United States act alone upon his plan without acceptance by other nations.

The chief executive himself feels that should his suggestions be adopted the United States would be more secure in defense than at the present time, since the attacking power of all nations would be reduced.

He has the backing of his highest advisers upon the plan. Before the president made a public statement, they were approved not only by secretaries Stimson, Hurley and Adams, the chiefs of the state, war and navy departments, but also by the chief of staff of the army, the chief of naval operations and the entire American delegation at the Geneva disarmament party.

Drobish, secretary of the Pacific Northwest potato committee. Drobish is making a tour of Idaho potato districts and left for Burley Tuesday, after looking over the South Side Mendocino project with W. W. Palmer, Cassia county agent.

Many growers of beans in Twin Falls county, Drobish says, have gone into potatoes this year, which is bringing up the average of plantings in the Twin Falls district. Potato growers who have made a study of the potato outlook, issued monthly by the department of agriculture, are chary about planting potatoes this year, he says. The old growers have decreased their acreage 10 per cent.

### BURLEY MAN HEADS DAIRIES' CAMPAIGN

BURLEY, June 22 (Special to The News)—Carl Adley, dairyman and farmer living south of Burley, has been requested by H. O. Myers, president of the Idaho Dairymen's association, to organize a campaign in Cassia county to encourage an increase in consumption of dairy products among farmers and town people. The project has been brought about by increased production of dairy products coupled with a standstill in consumption, and a campaign is being started in the Pacific Coast states to eliminate the small overproduction by a so-called "swallow the surplus" movement.

It is asserted that more than 84,000,000 people live in the country and in small towns in the United States. If these people could be induced to consume but one can of milk a day, each, that they are now using, it would be equivalent to the use of nearly 600,000,000 pounds of butter a year, which would mean the salvation of market prices for dairy products.

## —A STATEMENT BY THE GILLETTE SAFETY RAZOR COMPANY

It is its recent confession the Gillette Safety Razor Company told you that, under the stress of introducing a new razor and blade, uniformity had suffered; and told you how our efforts to correct the trouble had resulted in the development of a far superior product.

Several readers have asked us how we can make the bold, positive statement that today's Gillette blades are the sharpest, smoothest-shaving blades we have ever produced. This is a fair question, and here is our reply: A marvelous new testing machine, recently developed, scientifically proves that these blades have never before been approached in keenness.

We cannot discuss the nature or details of this machine because it is being patented. But we can tell you that it measures microscopic dimensions with unflinching accuracy—revealing with mathematic exactness, actual degrees of razor-blade sharpness. So when we state that today's Gillette blades are the sharpest we have ever made we are basing our assertion upon fact. We know we are right and can prove it.

Further than this—everyone knows that a razor blade must be able to bend without cracking when tightened in the holder. This requires steel of a certain temper not suitable for a keen cutting edge. The problem is to permit flexing and yet have a hard edge that can be ground and stropped for proper shaving performance. Gillette has achieved the solution of this problem in the manufacture of its slotted blades.\* These blades are made by a special tempering process that makes the edges exceptionally hard, while the center, of a different temper, flexes easily.

We urge you to try today's Gillette blades—the regular blade in the familiar green package or the BLUE SUPER-BLADE in its blue package, Cellophane wrapped. Do so without rinking a cent. If you don't agree they are the sharpest, smoothest-shaving blades you have ever used, return the package and your dealer will refund your money.

**The Gillette Blue Super-Blade**

The \$2 Kroman De Luxe blade has been withdrawn from production. We offer the Blue Super-Blade as its successor. This sensational blade is far superior to the Kroman and costs considerably less. You pay only a few cents more than for the regular blade and get unmatched shaving comfort. Its extraordinary shaving performance will convince you that the Blue Blade is the sharpest ever produced. A blue color has been applied to the blade for easy identification. It is contained in a blue package, Cellophane wrapped.

### TWO YOUTHS FACE BURGLARY CHARGE

#### Men Accused of Theft of 13 Cars and Two House-Breakings, Waive Hearing

Accused of first-degree burglary, two Twin Falls youths, William Goss, 17, and Vern Jacobsen, 15, waived preliminary hearing, when they were arraigned on probable cause charges yesterday, and were held by Judge G. J. Kinney to the action of the district court, under bonds of \$1000 each.

The accused young men have been held in jail since early Monday morning when police officers arrested them shortly after they had asserted to have abandoned an asserted stolen car.

Officers said the accused young men had admitted theft of 13 automobiles in Twin Falls since April 8, and were involved in two recent burglaries here.

The complaint on which they were arraigned yesterday, charged them with burglary in connection with the theft of a car, and with burglary in connection with the theft of a car, and with burglary in connection with the theft of a car, and with burglary in connection with the theft of a car.

One or both of the accused youths was said to have been involved in a burglary at the Washington market on Elm street, last week. All of the automobiles which were stolen by the accused youths were abandoned within a few hours after they were taken. Officers noted the night of last June 15, that one of the accused youths told them they took the cars for the purpose merely of talking rides.
