AIRMAN COMPLETELY HAZARDOUS TO HAWAIIAN ISLANDS

Charles Kingford-Smith's Trans-Pacific Plane Almost Swamped by Storm on Flight to Honolulu

(By The Associated Press)
HONOLULU, Oct. 29.—The storm gods of the equator tonight to swamp Charles Kingford-Smith's North-bound trans-Pacific plane with what the airman called "a wall of water" last midnight, but he and Captain P. G. Taylor, navigator, fought their way through and landed safely at Wheeler field this morning in time for breakfast.

They had completed the second leg of what is generally conceded the most hazardous over-water air course in the world in 23 hours, and five minutes in their three-stop flight from Brisbane to California.

Make Happy Landing
They took off from Macleay Beach, N.J., at 6:30 a. m. Monday, Fiji time (11:30 p. m. Sunday, E. S. T.).

Crowing the international airline they returned to Sunday and, hurried on the night that returned them to Monday and brought them, out of a cloud-covered sky, to a happy landing at 3:45 a. m. Hawaii time (12:10 p. m. E. S. T.).

They landed on the island, they sighted land only 24 miles off the Hawaiian Islands, which he comfortably below the equator level of the 17th meridian. They saw no ship—no ship saw them. Their only contact with the world was their short-wave radio.

The torrential rain into which they ran about midnight was so heavy it clogged the air speed indicator on the leading edge of the plane-wing, making it impossible to tell whether the plane was maintaining sufficient speed to give it lift.

Kingford-Smith said on arrival here that this instrument failure nearly spelled disaster, but he was jumping in the cockpit, trying to get the indicator into action, when he accidentally released the retractable landing gear.

Plane Goes Into Spin
"Since the usual compensation for the loss of lift was made, the plane made a blue and white monoline into a spin from which the pilot pulled it out with difficulty."

Kingford-Smith admitted, that was the first time he ever had encountered enough rain to stop the indicator, he said.

Knowing their course from Fiji here, they left for the next port after a 10-hour flight, they were forced to fly the 3,107 miles practically without weather reports, the pilots were prepared against this.

Temperatures in U.S. Fall Below Seasonal Average

(By The Associated Press)

A hint of approaching winter came last night as the weather balls over a large part of the United States dropped.

The southeast felt its chilliest weather of the season when the weather bureau reported temperatures over all the country were below the seasonal average. Little change was expected for several days.

In New England temperatures below freezing were felt. New York had a minimum Monday of 36, the same experienced by Chicago and the middle of the midwest. Some of the northern cities of the midwest, however, saw the mercury slip down as low as 20 degrees.

The mountain section of North Carolina and Virginia experienced thirty-degree weather and at Asheville, N. C., the minimum was 20. On the west coast San Francisco reported a minimum of 34 while Berkeley had a low of 46.

Shirleyport, La., felt 40 degrees while along with many southwestern cities. There was frost over much of Georgia and sections of North and South Carolina extending west to Kentucky.

Lou Tellegen Dies From Wounds Inflicted With Pair of Scissors.

LOS ANGELES, Oct. 29.—A 39-year-old matinee idol, Lou Tellegen, died today from wounds inflicted with a pair of scissors.

The former husband of Geraldine Farrar, the opera singer, was found in the bathroom of his home, the blood-stained scissors near his outstretched right arm.

Police said he was about 42 years old, and an actor.

His health and the fact he was leaving his wife were the probable reason for his act.

Mr. J. P. Cullen, who was investigating the death, was told by a neighbor that Tellegen had been ill and dependent and expressed fear he was leaving his wife.

Tellegen had married four times. His first wife was the actress Jeanne de Broussiere; his second was Farrar; his third was Nina Bennett, an actress; and his fourth was a woman named Mrs. Cullen.

He was a native of Ireland and had been in the United States since 1922. The day after his divorce from Mrs. Cullen, he was found in his home.

William Wynn, the butler, found the dying man when he went to the actor's room by Mrs. Cullen after the maid, Mrs. Eugene Coffey, had taken him to the bathroom.

Clad in his bathrobe and half-shaven, the actor was found by Wynn in the bathroom. He was found at first Tellegen had fainted, police said. Bloodstains on the front of his bathrobe led to the discovery of the stab wound, however, when he was removed to his bed.

Dr. C. C. Cooper, physician, was summoned immediately. The actor was weak from loss of blood, unconscious and gasping when the physician arrived.

Dr. Cooper had telephoned only 15 minutes before Tellegen was found. He told about the actor's condition, but he did not talk to Tellegen directly, police said.

Wife Near
Three weeks ago, Dr. Cooper told police, the actor came to him declaring he was afraid he was losing his mind. He said he was afraid he would not be able to work.

Dr. Cooper, police recounted, assured him as to his mental condition, but warned him he was a sick man.

Last spring Tellegen underwent an operation for cancer and had been ill since, although he was still able to work.

The actor died immediately to return to his home.

Every person who drew a horse will receive \$200. If his horse wins, the lucky holder of the winning ticket will get \$100,000, second place \$25,000 and third place \$50,000.

Sinclair Urged To Quit Election Race

Socialist Issues Appeal; Merriam Declares Opponent 'Is Not A Democrat'

SAN FRANCISCO, Oct. 29.—The camp of Union Sinclair and Frank F. Merriam fired more verbal broadsides at each other today, the Democratic nominee branding the acting governor's stand on social credit as a "glorified dole," and Republican headquarters declaring the governorship fight has ceased to be along party lines.

An appeal for Sinclair to withdraw from the campaign was made by Allen Dempster, Socialist party candidate for governor, who urged the former Socialist to abandon his epic (and poverty in California) plan and "come back to a solid democratic program."

Sinclair lauded Dempster's proposal, adding he had received reports of new recruits from the campaign.

"I have a million votes and Mr. Dempster has about five thousand," he said. "I withdrew in favor of him that would make a Hercules job of switching a million votes."

Registrations of the state supreme court began hearing an important case involving alleged restraints on trade, with Attorney General U. S. Webb stating a "government must be able to serve the state and its people."

Patient Leaps From Chair, Pulls Pistol And Shoots Dentist

NEW YORK, Oct. 29.—A dentist, leaning suddenly from a patient's chair, pulled a pistol out of his pocket and shot Dr. George W. Hindmarch today. The dentist was injured in the chest and hand and was rushed to a hospital.

After investigating, police declared the youthful patient apparently had suddenly become crazed by pain he said the dentist had struck a tooth.

Dr. Hindmarch said the patient, whose name he did not know, did not threaten him and made no attempt at robbery. Some \$3500 in cash in an office desk was stolen.

Police sent out an alarm for the youth's arrest. He first called on Dr. Hindmarch last night and made an appointment for 11:30 a. m. today. He was admitted to the office this morning by the dentist's assistant, Miss Schneider.

While Miss Schneider was absent he heard two pistol shots. Hurrying back, she found her employer staggering toward the stairway of the building, blood flowing from a wound in the chest and in the hand.

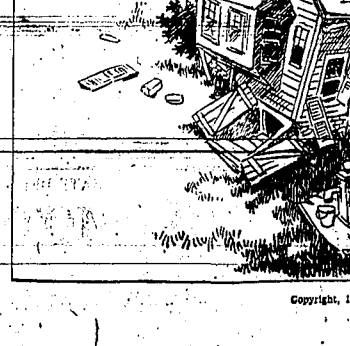

87-Year-Old Woman Tortured By Thugs

SEATTLE, Oct. 29.—A 87-year-old woman, Mrs. Rose Chisholm, was found today in a dazed condition, at her home with a bloodstained forehead.

Her eyes were blackened and her face and arms bruised by physical assault, she was not in a critical condition, police said.

Her son-in-law, Nicholas Restoff, found her in the midst of the havoc created by her assailants who turned her small home almost upside down in their search for money.

Just In Time! The Roof Was About To Cave In

U.S. PARTICIPATION IN OCEAN AIRSHIP LINES CONSIDERED

Roosevelt's Policy-Making Commission Hears Arguments by Dr. Eckener and Paul W. Littlefield

(By The Associated Press)
WASHINGTON, Oct. 29.—The president's aviation commission seriously considered tonight a proposal for American participation in a network of airship lines providing speedy transportation across the Atlantic and Pacific.

Two world recognized light aircraft leaders today urged such a step before the commission—Dr. Hugo Eckener, who has flown 800,000 miles in his Graf Zeppelin, and Paul W. Littlefield, whose firm built the Navy's Akron and Macon, Zeppelin dock of plans to establish.

Language Troubles
WASHINGTON, Oct. 29.—The president's aviation commission got into language troubles today.

Dr. Hugo Eckener—read his statement in English but afterwards—insisted on answering questions in German. A translator was brought in. Eckener was commenting to him on the creation of a trans-Atlantic dirigible service when Chairman Charles Doolittle, ex-broke in to ask a supplementary question.

Followed a whispered consultation. Then Eckener smiled and said: "That was just the answer I was making in German."

An experimental North Atlantic air service next summer and invited America to join the Zeppelin corporation and Tolland.

Direct Challenge
Littlefield, who heads the Goodyear-Zeppelin corporation in this country, interpreted that as a "direct challenge to American dirigible." He warned that delay would make it difficult to compete with the Dutch-German line.

Some time between now and February, he said, he would submit his recommendations to the president's commission, which he said would make its own decision as to the relative merits of dirigible and heavier-than-air craft for long flights.

President's Guest
Eckener was a guest of President Hoover at tea after his appearance before the commission. After his White House call, Dr. Eckener was to leave for Berlin.

Administration Takes Hand In Cleveland Store Strike, Textile Workers' Complaint

Government Agencies Call Peace Meeting While Eying Ominous Situation In Automobile Field

WASHINGTON, Oct. 29.—The administration stepped into breaches on two labor dispute fronts today and kept close watch on other threatening troubles in an effort to hold the wavering line of the president's industrial truce.

The national labor relations board called representatives of the Atlantic and Pacific Text company and its striking Cleveland employees to a peace meeting here tomorrow.

The textile labor board works more than 300 complaints by the United Textile workers, asserting that erstwhile textile strikers were being discriminated against. U. S. W. officials declined to meet the 25,000 workers have been threatened in mills from Maine to Georgia. A walkout called for today at Rockdale Rapids, North Carolina, was deferred at the labor board's request.

Milwaukee Brewers Strike
Sharp administration watch was kept also on the strike of chain store butchers in Milwaukee, precipitated after the Cleveland row got under way, and the delicate labor situation in the steel industry.

The labor relations board sought to enlarge its powers for dealing with these and other such situations, suggesting in a letter to President Roosevelt today it might well be given statutory authority to enforce its own decisions. The board's report is on violations to the recovery acts on violations to the NRA compliance division for blue eagle removal and to the justice department for "appeals to the NRA and justice department so far as has to carry any case to court."

The national labor board last little time stepping into the Cleveland strike, the first major labor disturbance since the textile strike ended last year. The board's first since President Roosevelt proposed a six months industrial court.

The unions contend several employees were discharged for "union activity" and asked a contract calling for employment of only union men. The company denied it had discriminated against union workers, but the board had no authority to operate a closed shop.

Mediation in the Cleveland case failed to bring about any agreement to settle strike by that method. It was successful in halting an aluminum walkout in August, but was ineffective in the steel strike.

Destitute Texans To Get Relief Or Starve In Public

AUSTIN, Texas, Oct. 29.—Destitute men, women and children of Travis county today were told to get relief or starve in public.

General plans of the British unemployment insurance plan are likely to be incorporated in the recommendations that will go to the capitol, but there have been no indications which of these would be adopted.

Studies British Plans
Relief Administrator Hopkins, a member of the committee studying the proposed plan, spent several weeks studying the British and other European plans this summer.

While the plan would be adopted, it would be modified to suit the needs of the United States.

ODDITIES ---of Life

(By The Associated Press)

Crushed By Tree
BALTIMORE, Oct. 29.—Proudly on his way to his first day at school, Tommy Judd, six years old, was crushed to death by a falling tree yesterday.

The boy had saved only a few twigs from the tree and did not know that the entire core of the tree was rotten. It crashed to earth without warning.

Plays Turkey Market
BOSTON, Oct. 29.—A 10-year-old boy, who was authorized to play the stock market, reported to have dropped considerable dollars in the stock market a few days ago, playing another market.

He said he believes he can beat the stock market.

The actor has on his ranch here between 750 and 1,000 turkeys, which he is raising for the Thanksgiving market.

Red Activities Charged To Five Los Angeles Students

LOS ANGELES, Oct. 29.—(AP)—Charged with participation in Communist activities at the University of California at Los Angeles campus, John Burnside, president of the Associated Students, and four other students were suspended today.

Dr. Ernest V. Moore, provost, for a period of one year.

The officers suspended were Sidney Zane, chairman of the foreign committee, Thomas Lambert, chairman of the "new" board, and two other students.

Dr. Moore revealed the existence of a campus organization known as the National Student League, which he characterized as a "Communist organization" and declared the suspended students were "using their offices to destroy the university by handing it over to an organized group of Communist students."

Dr. Moore said the National League had been organized by the students to "take over the university" and "to destroy the university by handing it over to an organized group of Communist students."

500 IDAHO GRANGE DELEGATES MEET

25th Annual Convention Prepares for Formal Opening at Moscow

MOSCOW, Idaho, Oct. 29 (AP)—With about 500 delegates registered tonight, the 25th annual convention of the Idaho State Grange prepared for formal opening here tomorrow.

Outstanding among preliminary events was the meeting tonight of stockholders of the Grange Mutual Fire Insurance society and the advisory board of the Farmers' Automobile Insurance company.

Other meetings held were by the school of instruction, the executive committee, and cooperative supply company officers and managers.

Officers present tonight were W. W. Deal of Tampa, state master; Martin G. Harland of Caldwell, secretary; Mrs. O. D. Peeler of Buhl, treasurer; E. T. Tamm of Pocatello, Frank L. Atkins of Buhl, and Charles A. Taylor of Idaho Falls, executive committee members.

Degrees will be given tomorrow. The delegates will tour the University of Idaho farms Wednesday and attend a banquet in the evening. New officers will be elected Thursday, the closing day.

WEATHER

FORECAST FOR TODAY AND TOMORROW—Idaho: Cloudy today and Wednesday, but becoming unsettled Wednesday, continued mild.

High and low temperatures yesterday as reported by the government weather observer were 72 and 58 degrees; there was a northeast wind and the sky was clear; barometric pressure 30.12 in. at 9 A.M. and the humidity range, 94 to 17 percent of saturation.

Sunday's temperatures were 68 and 53 degrees with a northeast wind and a sky that was partly cloudy; barometric pressure was 30.04 and the humidity range, 96 to 38 percent of saturation.

Weather a year ago was cloudy with temperatures of 65 and 43 degrees, and 20 of an inch precipitation.

KIDNAPER'S FATHER WINS LEGAL FIGHT

Removal to Kentucky for Trial, Refused by Commissioner

NASHVILLE, Tenn., Oct. 29 (AP)—Removal of Thomas H. Robinson, Jr., to Louisville for trial in connection with the kidnaping of Mrs. Alice Speed Bell was refused today by U. S. Commissioner Nathan H. Campbell, but the department of justice made immediate preparations for an appeal.

After hearing for two days testimony and arguments on the government's application to send Robinson to Kentucky, Commissioner Campbell decided there "not only is no probable cause to believe" the 31-year-old engineer guilty, "but no fact to reasonably believe a suspicion of his guilt."

Robinson is the father of Thomas H. Robinson, Jr., 27, sought throughout the nation as the kidnaper of Mrs. Stoll, Louisville society matron, who was held captive in an Indianapolis apartment five days. The younger Robinson's wife is in custody at Louisville. The three were jointly indicted.

Trial Postponed

At request of U. S. District Attorney Thomas J. Sparks at Louisville, the federal court trial there of Mrs. Robinson, Jr., was postponed today until December 3, so further efforts might be made to remove her father-in-law from Nashville to be tried with her.

Meanwhile the justice department announced at Washington it would apply for an order setting aside Commissioner Campbell's decision.

If the district court declines to order Robinson's removal, the justice department plans an appeal to the circuit court of appeals at Cincinnati and, if necessary, to the U. S. supreme court.

When Commissioner Campbell's order was read, denying his removal to Kentucky and discharging

Wheat Allotment Checks Received

Twin Falls County Wheat Production Control association has received for distribution among farmers who participated under the AAA control program to limit wheat crops, government checks totaling \$20,000, it was announced yesterday.

An initial payment on the 1933 crop reduction in this county approximated \$10,000.

Checks to be distributed now are the first payment on 1934 crop reduction.

PLANS TO INSURE UNEMPLOYED HINGE UPON PAYROLL TAX

aid federally by state, or an even more local scale yet remains to be determined. Twenty-eight states now have unemployment insurance systems.

Harrison, in discussing unemployment insurance, said he had recommended to President Roosevelt a revision of the relief policies and liberalization of lending to private industry.

The Mississippi plan said rehabilitation now could be substituted in many localities for direct relief. The relief administration has given notice of employing such a policy wherever possible.

tempting to work. Recently he completed a small part for Columbia pictures.

Tyler rose to the role of America's favorite leading man after coming to this country in 1910 from Trinidad where he played opposite Sarah Bernhardt.

He would have been 33 years old on November 1.

His last appearance on Broadway was in 1932 in the "Life of Christ" with Pearl.

Tyler was a stage name. The actor's real name was J. Louis Bernard van Damme.

POPE CHARGES FAULTS IN SUGAR DEAL DISCOVERED

BOISE, Oct. 29 (AP)—Back in Boise today after a speaking tour in eastern and south central counties, Senator Pope declared that Republicans had distorted facts on the sugar beet acreage issue and now no longer mentioned it.

"Everything looks very favorable," said the senator, speaking of the party's chances for electing a state and congressional state.

Temperatures Above Normal Over West

Barometric pressures are normal to somewhat above over most of the interior of the country, with the highest values charted over Montana and the Central-plains states. Fair weather prevails generally, although there is considerable cloudiness in the west. Temperatures are well above normal in the plains and Rocky mountain region, but are below the seasonal in the Middle and Eastern states.

CAPITOL'S GHOSTS WALK FOR VETERAN

Intimate of Congress for
50 Years Tells Weird
Experiences

WASHINGTON, Oct. 29.—William Tyler Page, an intimate of the halls of congress for 50 years, is the man who can make ghosts walk at the capitol and almost make you see them, too.

As Halloween spooks were about to start their stalking, Page, now minority clerk of the house, today reviewed the weirdest experiences of a half-century spent—where history was being made.

"By all odds, the most uncanny mood of all was the night of Woodrow Wilson's address when he asked a joint session of congress to declare war," said Page.

"All the mighty of this nation, president, vice-president, cabinet, supreme court judges, senators, representatives were gathered in one chamber—the house of representatives."

"The night was a physical trial and pain. It rained all day, continued raining that night, and the capitol was reflected in the water. Wilson had been escorted there by cavalry, infantry, artillery, and the horses could be heard outside clamping on the wet pavement."

Portent of War
"In the midst of his address, when all was tense and quiet, there came a distant rumble of thunder, a terrible portent of war. Then came a crackling, crunching sound from above, from the ceiling of colored glass."

"It was so uncanny the whole place was filled with an uneasy shivering, perhaps with the thought that some day, with a single bomb, might just about wipe out president, senate—supreme—congress—judges."

Even in reminiscence, Page shivered slightly.
"Then he briskly anti-climaxed, as tellers of the shot tales do."

"Well, I later found out what it was. The crunching was the shattering of secret service men's steel shoes on those white tiles above the glass ceiling with its coats of arms of the states. And the crackling came when one of them became cramped, stood up to move a few steps—and almost fell through the ceiling."

Page said he personally had another uncanny moment as follows:
"Champ Clark once growled at me: 'Is it true you were born in this capitol?'"

"No," I answered, "but like old John Quincy Adams I expect to die in it!"

Story for Children
"And that made me feel pretty creepy when I was made clerk of the house, and fell into the little room off statutory hall where Adams died. He bust stands in it."

"Often I worked down there late at night, with the door open leading into statutory hall—and I made up little yarns to tell the school children. In it, Adams would get down off his high perch and sit in my chair, and talk in such stilted tones the people out in statutory hall would troop in. But Miss Willard, the only woman, would come in and very timidly until after supper was passed. In their nocturnal symposium they'd give warnings this country was in little more than a few days from being a lifeless farmland, in some ways from the constitution."

Page, whose study of history makes men of the past as real to him as the statesmen he has known, rattled off a list of those with personal little strong enough to still be felt around there:

"John Quincy Adams, Henry Clay, Daniel Webster, John C. Calhoun, Thomas H. Benton, Thaddeus Stevens, James O. Blaine, Thomas B. Reed, John G. Carlisle, Uncle Joe Cannon, Champ Clark, and Nicholas Longworth."

Townsend Plan Aims To Get \$200 Monthly For Old Folks

Doctor's Project Gains Momentum

By W. A. WELLS
An organized campaign for a pension plan which would give \$200 a month to people over 60 with a mandate to spend it all has been attained to vibrate on congressional air drama at the next session. Officially known as "Old Age Revolving Pension, Ltd.," it is commonly called the Townsend pension plan.

More than a thousand clubs have been formed to support it, its supporters say, and every state has one or more local organizations formed to urge it upon senators and representatives.

Dr. F. E. Townsend, a California physician, is the project's originator. He is a 60-year-old man, a former member of the United States army, and a former member of the United States senate.

This project, dedicated to "relieve humanity from the fear of destitution and want for ever," is the brain child of a scholarly appearing, mild mannered medical practitioner of the old school whose inspiration, he says, came from his work among the indigent sick.

The author, Dr. F. E. Townsend, some years ago was a practicing physician in the Black Hills region of South Dakota. For some time he was assistant city health officer of Long Beach, later he engaged again in private practice.

Conceiving the idea of a pension for the aged and incapacitated, financed by a revolving fund derived through a sales tax, he proceeded to incorporate it with Dr. E. Clements as "co-founder."

His object, he said, was to assure that "all who serve society in the best of their ability in whatever capacity shall not be denied that security in their declining years to which their services in active years have entitled them."

Volunteers Aid "Crusade"
In a time of financial troubles it caught with an amazing sweep. Volunteers appeared to work without pay: stenographers, typists, secretaries, clerks, and others.

"It is not designed to be compulsory," he said, "those whose income is less, undoubtedly would readily consent to turning over the management of their properties or business to younger friends or relatives, thus creating paid positions and jobs for others when receiving retirement pay for themselves."

The federal government would assume a monopoly on the sales tax method of raising money and this revenue would be devoted only to the pension, supporters of the plan to apply for the pension, as it is called.

Retirement pay would be required to be spent in the United States within 30 days of receipt and only those free from habitual criminality would be eligible.

Old Age Revolving Pension calculates there are 10,300,000 people in America of whom about 8,000,000 would be eligible for pension. These owning income property with a greater income than \$200 a month would not need as possibly the pension, supporters of the plan to apply for the pension, as it is called.

Retirement pay would be required to be spent in the United States within 30 days of receipt and only those free from habitual criminality would be eligible.

Dr. F. E. Townsend of Long Beach, California, shown above with his wife, evolved the idea of persuading congress to levy a sales tax producing two billion dollars monthly which might be distributed in \$200 pensions to about 8,000,000 people over 60. Clubs have been formed in every state to promote the plan.

Old Age Revolving Pension calculates there are 10,300,000 people in America of whom about 8,000,000 would be eligible for pension. These owning income property with a greater income than \$200 a month would not need as possibly the pension, supporters of the plan to apply for the pension, as it is called.

It is not designed to be compulsory," he said, "those whose income is less, undoubtedly would readily consent to turning over the management of their properties or business to younger friends or relatives, thus creating paid positions and jobs for others when receiving retirement pay for themselves."

The federal government would assume a monopoly on the sales tax method of raising money and this revenue would be devoted only to the pension, supporters of the plan to apply for the pension, as it is called.

Retirement pay would be required to be spent in the United States within 30 days of receipt and only those free from habitual criminality would be eligible.

TRIBUTE PAID PIONEER OF MINIDOKA COUNTY

RUPERT, Oct. 29.—Funeral services for John H. Ford, 66, who died at his home in Paul Thursday afternoon after a week's illness from pneumonia, were conducted Monday afternoon in Paul at the L. D. S. ward with Rev. George G. Bonham, of the Methodist church officiating. The body rested at the Oddfellow's mortuary in Rupert until 10 o'clock Monday morning when taken to the family home to wait the afternoon service at the church.

Mr. Ford was born in Easton, Illinois, September 27, 1866. He was married in Marshalltown, Iowa, in 1893, to Edith M. Ford, who with one daughter, Mrs. O. W. Bryson, survives at the church.

Mr. and Mrs. Ford came west, settling in Minidoka county in 1900, living first in Heyburn and for a number of years have made their home in Paul where Mr. Ford improved an acreage tract, gardening and raising stock.

Beside his wife, he is survived by his son-in-law, and daughter, Mr. and Mrs. O. W. Bryson and their family of nine including three pairs of consecutive twins. The grandchildren are: Rose Bryson and Charlie Bryson and the three pairs of twins, Ruth and Robert, Annie and Arnold, Dorothy and Donald and the youngest child, Ralph, aged seven.

FINAL RITES HELD
FOR GOODING MAN

GOODING, Oct. 29.—Funeral services were held Sunday afternoon for A. S. Christie, 51, at the Nazarene church, Rev. Earle L. Perry giving the service. Mrs. Perry sang "Love Lifted Me" and "A Little Talk with Jesus Makes It Right," favorite hymns of the deceased.

The choir sang "The City Four Square." Pall bearers were Frank Brown, Jesse Brown and Mackay Brown, Ralph Taylor, Floyd Dietrich and Foster Wamsutter.

Interment was in Elmwood cemetery with the Thompson mortuary in charge.

Mr. Christie was born in Quincy, Illinois, July 24, 1883, and was married to Mrs. L. A. Christie in 1912. To this union three children were born. His wife died in Kansas in 1914. He came west to Gooding in 1928. He lived with his son and family on a farm.

Surviving are two sons, O. R. Christie and one daughter, Mrs. L. A. Christie.

DRY LAND FARMERS
ASSISTED BY RAIN

BURLEY, Oct. 29.—Dry land farmers declare that the recent rains have moistened the soil enough so that fall planted grain will come in. In some places, the wheat has already sprouted. Drilling of fall grain has been finished in all the dry farming districts of Cassia county. In one or two instances the first showers started grain and because of the very dry condition of the subsoil the young plants dried up and died. This condition, however, was observed in but limited districts and as a rule conditions of dry farm grain looks satisfactory.

GET A LIFT
WITH A CAMEL!

Bill Miller, famous all-around athlete and 4 times National Single Sculls champion, explains in this way the "lift" he experiences from smoking a Camel: "Many people have commented on how quickly my energy seems to come back after a hard race. The secret is, I think, that it is my custom to smoke a Camel after a race. With me, as with other smokers, Camels quickly refresh me and revive my energy. And Camels never upset my nerves."

TOBACCO MEN
ALL KNOW:
"Camels are made from finer, More Expensive Tobaccos—Turkish and Domestic—than any other popular brand."

PRINCE RECRUIT IN HITLER REICHSWER

Former Kaiser Grants Per-
mission for Grandson
to Join Troops

(Copyright, 1934, by The Associated Press)

BERLIN, Oct. 29 (AP)—Prince Hu-
bertus of Prussia, third son of the
former crown prince, has obtained
his grandfather's permission to join
the German army—Adolf Hitler's
reichswehr. He will be the first mem-
ber of the Hohenzollern family to
bear arms for the third Reich.

Indirectly, two of his brothers al-
ready are identified with the new
regime—Wilhelm as a sub-leader of
the stabilizers, or steel helmets, an
integral part of Hitler's political
army, and Louis Ferdinand, as a
pilot in the air defense unit, of
which Hermann Wilhelm Goering,
air minister, is the chief.

In the case of the two older bro-
thers, however, their commitment is
not much more than that of every
German subject. Huibertus, by join-
ing the reichswehr, must theoretic-
ally be ordered by Hitler to sup-
press a monarchist plot.

Hohenzollern Ideals

In giving permission for his grand-
son's step, the former kaiser said he
had been actuated by the idea that
the Hohenzollerns always have prided
themselves on being good soldiers
and loyal servants of the state.

Huibertus, who is 25 years old, made
a trip to Africa in 1932 with Duke
Friedrich Franz of Mecklenburg to
study the possibilities of German
emigration to that country. He speaks
English and French excellently and
is a good mixer.

It was recalled, in view of the
step to be taken by Huibertus, that
when his brother Wilhelm partici-
pated in maneuvers of the reichswehr
in 1926 as a guest and observer, re-
publican feeling still ran so high that
the late Marshall von Hinden-
burg had to discharge the chief of
staff, General von Seeckt, as being
responsible for permitting the
prince's attendance.

Louis Ferdinand, who recently re-
turned from the United States, de-
parted from Berlin today for Bonn,
Netherlands, where he will pay a
brief visit to his grandfather and
then resume the flying course he
has been taking in the vicinity of
Munich.

12,000 POLISH CHAIR

DENVER (AP)—Police court offi-
cials estimate 12,000 persons have
sat in the witness chair since it was
purchased four years ago and that
persons convicted of various minor
offenses, who have sat in it, have
been fined a total of \$120,000.

PARIS SEEKS BEE CATCHER

PARIS (AP)—The police de-
partment wants to sign up a good bee
catcher, as Berenst Daniel, who
has held the job for many years, is
about to retire. The official bee
catcher of the city of Paris is ex-
pected to result from adoption by
the government of a method where-
by 40 per cent of a silk silkworm
can be tested as against only 10
per cent under old methods. It is
claimed that China now has the best
standardized silk in the world.

Twin Falls Prepared To Witness "House Of Magic" Miracles

MERCHANTS DISPLAY PRODUCTS AS STAGE IS SET FOR EVENT

Home Modernization Feature One of Many on Show Backed by Junior Chamber of Commerce

Radioland late last night was assuming a new and gay atmosphere as final preparations were made for the three-day "House of Magic" exhibit which opens this morning at 10 o'clock with a free show of the electrical display for the school children of Twin Falls.

Merchants are to display various goods entering the hall, Dr. Plumb, electrical wizard and master of the "House of Magic," gave an exhibition of some of the features of the performance to the school children. With over a ton of electrical wonders arranged on a small stage, today's opening audience is sure to get the thrill of a lifetime as the noted scientist demonstrates the seeing of sound, the hearing of light, and his powerful "eter machine."

Style Show Feature
Merchants are to display co-operating in the event and a style show will be given each evening along with the "House of Magic" demonstration. The feature of the first night's style show will be the impersonation of Betty Hagen and Mae West by Rhoda Phillips. The evening performance will open at 7:45 o'clock and will also feature music by the Rhythm Kings.

Under the auspices of Twin Falls better housing committee, a "modern house modernization" will be presented each afternoon between the hours of 1 and 3:30 o'clock.

Special shopping days are being put into full force by the majority of Twin Falls merchants and as things began to take shape last night, the show appears to be of a magnitude surpassing anything Twin Falls has offered to the public in some time.

Special Lectures
The audience witnessing the "House of Magic" last night was spellbound at some of the miracles performed with a single beam of light. The doctor showed the power to change colors of various shades under the "black light" and so great is the interest in this single item that he is giving a special lecture on "Crime Detection and Black Light" this afternoon to all state, county and municipal officers of the law in the vicinity of Twin Falls.

Dr. Plumb will also address a radio audience today on the mysteries of the "House of Magic."

FIREPLACE CAN ADD CHARM TO HOME IN WINTER

Necessary New Chimney Also Will Enhance Exterior Beauty of House

Builders of homes a decade or two ago had a tendency to omit fireplaces, partly because the development of central heating appeared to obviate their necessity. As a consequence, there are many homes today that lack the comfort and cheer of a blazing open fire.

There was a time when no home was built without an open fireplace, and there is no reason now why every home should not have one. The work of installing one or two should be started shortly, so that the fireplace may be ready for winter. If cash is not available, government-guaranteed modernizing loans may be had at once.

New Chimney Needed
A special chimney is necessary, for a fireplace may not share a flue with any other heating unit. An outside chimney is the easiest type to install, and it puts the family to little inconvenience during the construction period. Carefully built, an outside chimney can add greatly to the exterior beauty of the house.

A new fireplace makes a radical change in the character of a room, and for this reason it should be handled with the utmost care. Corner fireplaces are unusually out of style, and the fireplace should be the central attraction of the room, drawing the family and guests to its vicinity. scrupulous attention must be given to its location and structural detail, and the furnishing possibilities of the room after its construction. Ordinarily, there should be no doors or windows on either side. Never should the fireplace extend far out into the room.

Sufficient space must remain in the room for comfortable furniture to be grouped around the hearth. Additional wiring outlets should be made nearby to provide for the portable lighting fixtures and other appliances that are desirable near the fire.

Style Should Tune In
The style of the hearth depends on the period and interior decorating scheme of the room. An ornate Colonial mantelpiece, for example, is correct for a room with paneled walls. A room with rough unplastered

plaster walls and stained unvarnished pine in chimney—with a hooded fireplace in the Italian manner or a mantel combining of a variety of styles of stained woodwork—can be made of a brilliant Spanish glazed tile. A mantel of face brick is an excellent basis for a great many rooms.

It blends best with dark stained floors and furniture. A gay, original touch for rooms with white woodwork and light walls is provided by the hearth of brilliant glazed tiles, which are becoming increasingly popular with the present day demand for more color.

From the practical standpoint, a fireplace should be provided with a good draft to prevent smothering even on wet days, and it should give a maximum amount of heat. It is a good plan to equip it with one of the patent fireplace linings and shrouds made with double walls that serve to make a hot-air chamber like that of a hot-air furnace. For the sake of safety, fire brick or special flue lining and a good tight

ash chute and pit and clean-out are necessary. A hearth extending 18 inches in front and about 12 inches on each side of the opening also is essential.

Plaster makes a good insulator

when covered, so it is not necessary to remove it before placing the cedar. To locate the studs, gently tap the plaster until the sound indicates a solid foundation, verify this by driving a nail through the plaster. When the line of the studs and ceiling joists has been located, the ceiling should be cut to the proper length and the lining applied from the floor up.

The cedar boards should be nailed horizontally and should cover the wall flush to the ceiling. When laying the ceiling boards, they should be placed at right angles to the ceiling joists. Proper measuring and sawing should insure a tight fit where the walls and ceiling meet. A half inch moulding along the walls

at the floor and ceiling lines will hide the joints if this is desired.

INSULATE FARM BUILDINGS

More and more, farmers are beginning to realize the importance of temperature and humidity control in farm buildings—insulating board installed at low cost and applied directly over the interior walls,

helps correct unsatisfactory conditions. As a lining it conserves animal heat in dairy barns, stables, brooder houses and laying houses. It is also useful as an insulator in milch and milk houses.

Cedar Lined Closet Urged In Each Home

The modern home, builders say, should have at least one closet that is cedar lined. It is a simple operation to transform one of the existing closets into such a storage cupboard by simply relining the walls and ceiling with cedar.

Before buying the material, which comes in planks a quarter of an inch thick, measure the walls and ceiling to ascertain the quantity necessary for the job. Plaster makes a good insulator

ash chute and pit and clean-out are necessary. A hearth extending 18 inches in front and about 12 inches on each side of the opening also is essential.

RUNNING WATER

Your Family Deserves It

MAKE EVERY HOUR... A HAPPY HOUR

To the housewife falls the task of pumping and carrying water for household uses. Under average conditions, in one year, she will pump from 25 to 50 tons of water and will walk a distance of 30 to 100 miles to carry this water. Let running water do her running... have it serve instead of enslave her.

Water under pressure is the one thing that is always ready to serve everyone, every hour and every day. It is the most common, most abundant and most useful to life of any of the compounds, or substances of the earth.

Look ahead... visualize what running water means to your family. Their comfort, contentment and their health are in your hands. You are living today... keep in step with today. Modernize your home with a dependable water system.

No longer is running water a convenience limited by the extent of city water mains. Wherever there is electric power, you may have your own completely automatic water system and enjoy the same comfort and convenience as if you were living in the city.

See Your Water System Dealer

The first step is to visit your water system dealer and select and install a dependable pump that will meet your present requirements as well as those of the future. Outlets or faucets for the kitchen, laundry, barn and garden may be installed first. Later, porcelain kitchen sink, lavatory, bath tubs and shower, toilet and laundry tubs may be added as finances permit.

Plan a water system installation just as you would any other improvement for your home... but plan NOW!

Housing Modernization and Repair Program Includes Industries

MOFFETT CALLS ON MANUFACTURERS TO LEND COOPERATION

Small House Owner Not Alone in Nation-Wide Movement for Repairs

Industries should do their share of modernization and repair just as the small home owner is being asked to under the Better Housing Program of the Federal Housing Administration.

This is the attitude being taken by Housing Administrator James A. Moffett in making the program to rehabilitate the run-down properties of the nation's Paul-Wooten Washington correspondent of the McGraw-Hill Publications, told the Engineers' Club of Philadelphia in a recent address.

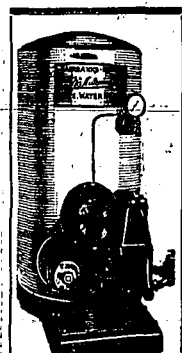

"Housing Administrator Moffett is demanding two things of industrialists," Mr. Wooten said. "He expects them to see that their organizations do a real sales job in inducing home owners to buy the long list of products affected by modernization, and he expects them to do their own share of modernizing."

"Installation selling in a genuine sense developed the automobile, radio, washing machine and a lot of other businesses," Mr. Moffett pointed out. "It can do just as much for construction materials, kitchen sinks, heating plants, plumbing fixtures, and electrical equipment, and the Government is handling this great opportunity to all these industries on a silver platter."

"Under such circumstances," Mr. Moffett feels that the industries benefited should take off their coats and work feverishly to get the housing program rolling on a large scale as quickly as possible."

"Since the small home owner—the man who may have saved \$10,000 and invested it in a place to live—is being called upon to make a sacrifice to contribute to recovery," Mr. Moffett thinks industries must do its share, and modernize its equipment as well as its houses."

REPLACE SASH CORDS
Replace your sash weight cords. It may be that that is the reason the old window is so hard to open.

Install a Pump This Year

Assure yourself of an adequate supply of clear, fresh water for domestic purposes. Let us help you select a Fairbanks-Morse pressure outfit that will give you year after year of trouble-free service. Your neighbor probably has a Fairbanks-Morse outfit. Ask him how he likes it. He will, without a doubt, give you an enthusiastic endorsement of the simplicity, sturdiness, and positive action of Fairbanks-Morse water system. Ask us for latest prices and see the new models at our store.

Canvass Indicates Repairs Needed in One of Five Houses

Fifty per cent of Twin Falls residents own their own homes and 20 per cent of Twin Falls homes are admittedly in need of repairs, according to results indicated by a house-to-house canvass in Twin Falls Better Housing campaign, Ralph E. Leighton, campaign manager, announced last evening.

The canvass, which was launched last week, is now about one-half complete, he said. Canvassers reported, he said, that persons living in run-down houses were reluctant about suggesting improvements or repairs, giving as an excuse that they did not want to give the property owners reason to believe they are dissatisfied in view of the shortage of housing in Twin Falls.

PLACING ELECTRICAL OUTLETS

"The most logical location for dining room electrical convenience outlets is in the wall nearest the door or chair. Appliances can then be placed on a tea cart which is beside the hostess during use and pushed against the wall at other times."

EXAMINE HEATING SYSTEM

The attention which the heating plant receives in September, very largely determines its performance in October and November. Any repairs or replacements found advisable may be financed under the easy payment plan of the Federal Housing Administration.

MODERN WIRING URGED FOR HOME

Increased Use of Electrical Equipment Demands New Outlets and Circuits

Because of the progress made in developing new electric lighting appliances and household conveniences, many wiring systems that passed local inspection when they were new, now are inadequate and

should be modernized to accommodate the modern electrical things which have been added to the household in recent years. Danger, unsightliness and inconvenience result, making changes necessary if the modern standard of efficiency is to be withheld.

Insufficient outlets is a common fault. "Today's house must be equipped for the use of a large number of portable lamps, a refrigerator, radio, clocks, fans, heating devices, and table and kitchen appliances. Many makeshift extensions the being made by plugging lamp cords into sockets suspended from the ceiling or from wall brackets because there are insufficient outlets. These cords, and the plugs, sockets and adapters used with them, are unsightly, inconvenient and

dangerous. People trip over them. Short circuits occur. Often they prove to be actual fire hazards.

Another frequent shortcoming is inadequate lighting—fixtures that are old, poorly selected, incorrectly placed. Either they—because the light rather than spread it, or they produce excessive glare. There is often an entire absence of fixtures or lamps in places where light is needed. Ceiling lights are sometimes inadequately controlled—there are not enough wall switches

to turn the lights on and off. This is not only a great inconvenience, but is a considerable waste of current that could be saved if it were easy to "turn the light off behind you." Many of the sockets, switches, plugs, receptacles, lamp cords, etc., are worn out, loose or broken, or make poor contact, cause short circuits, blow fuses and give poor service generally.

Many wires now in use are too small for the load they are compelled to carry as a result of the

great increase in the use of electricity since the house was built. Two many lamps or appliances are connected to one circuit when it would be better to divide this load among two or more circuits.

The result is low voltage of the home, with consequent poor light and much wasted current. Overloaded wires cause fires to them frequently, with resultant annoyance and expense.

IRON FIREMAN

The machine that made coal an automatic fuel in almost five hundred homes and business houses in Southern Idaho

Over a carload have been installed by us this fall with the National Housing Modernization enthusiasm

IRON FIREMAN AUTOMATIC HEAT COSTS YOU NOTHING!

Under the National Housing Act, an Iron Fireman can be installed with nothing down, and extremely easy monthly payments ... deducting the savings which Iron Fireman will bring to you, your payments are reduced to approximately the equivalent of the cost of a package of cigarettes per day ... isn't the comfort, convenience and cleanliness of Iron Fireman heat worth more than this small investment?

A MORE COMFORTABLE HOME THIS WINTER

Are You Going To Remodel Or Build A New Home?

If so, let us tell you about Reynolds Aluminum Metal Insulating Lath and Aluminum Building Paper.

Reynolds Aluminum Metal Insulating Lath is fire-proof, wind-proof, adds structural strength, and affords a very efficient wall insulation as well as a plaster base.

Reynolds Aluminum Building Paper is an inexpensive insulating building paper, one thickness being equal to 3/4 in. of cork-board.

BE SURE AND INVESTIGATE THESE TWO PRODUCTS FOR YOUR RE-MODELING OR BUILDING

Oil Treated Dustless COAL

Eliminates the only objection to Iron Fireman heat... you will find it clean to the last shovel-full... just what you have been waiting for. Let your next stoker fuel order be "dustless."

Look At Your Roof!

These frosty mornings—see how the heat is escaping from your home and melting the frost off. This waste can be stopped with "Sure-Tite" attic insulation.

Every bulletin of the Housing Administration, urges the necessity of every home and building being insulated... let us tell you about this inexpensive home-improvement... it will pay for itself out of savings in fuel reductions, re-decorating costs, roof preservation and reduced heating plant repair.

FRIGIDAIRE

AMERICA'S CHOICE REFRIGERATOR

Can be purchased on the National Housing plan... let this be among the things you will add to your home modernization program.

You will enjoy a Frigidaire as much through the winter as summer... why not get your electric refrigerator now?

A comfortable, warm house to arise in every morning—no more early morning cold trips to the basement to shake down the ashes and shovel coal. No more dirty dusty ashes... no more smoke and soot... only requires attention once daily... no more running down to tend the furnace every few hours. The exact desired temperature maintained automatically, by a thermostat, saturating the whole house with a gentle flow of mellow warmth—that is real comfort, and a vital factor to health, especially with children and convalescents.

IRON FIREMAN—The machine that made coal an automatic fuel... **FRIGIDAIRE**—America's Choice Refrigerator... **"SURE-TITE"**—The most economical, efficient attic insulation... **REYNOLD'S PRODUCTS**—Modern construction materials... **"DUSTLESS" SLACK**—Hot oil processed.

See all of them at the House of Magic and Modernization Exposition

Idaho's Wee Wilis Smith Sensation of Pro Football

'Bucky' Harris Holds Inside Track For Senator Baseball Job

146-Pound Backfield Ace 'Riot Of Action' Against Easterners

Two Smiths and Warburton Amaze Fans of Gridiron

Former Vandal and Stars of Southern-California—and Notre Dame Prove Value of 'Whirling Midgets'

By EDWARD J. NEIL
(Associated Press Sports Writer)
NEW YORK, Oct. 29.—The day of the whirling midgets seems to be coming back. Notre Dame has another watch-charm-guard named Smith, reviving memories of Little Metzger. Cotton Warburton is running behind a lifeless line at Southern California but still running. And Idaho (Mickey Mouse) Smith, from Idaho—the professional football player of the year with the New York Giants.

There are many others, but sadly enough little fellows on little teams never get the credit due them. They are, highly publicized, almost like the spotlight on these back Saturdays. But these three will go for example.

Warburton, for all his lack of height and assistance, was the best back on the field the day Southern California lost to Pittsburgh. Mid-West scouts, while hailing Jack Robinson as the best center in the country, say his work as Notre Dame is amplified by the fact that little Smith, around 160 pounds, plays as much guard to the side of him as Smith's first varsity year.

And the other Smith, Willis, of Idaho, has New York's Joe football followers by the ears. He was just a rumor from the depths of the West when he ran wild for Idaho. The Giants have the biggest little man in the East has seen since Alvin Booth. He weighs in at 146 in his street clothes, but in game nothing.

100 Yards in Quarter

They ran him against the Pittsburgh Pirates the other day, and though he didn't appear until the third quarter he played a full ball game in one half. He gained over 100 yards, scored once, put the Giants in position to score again, and was a riot of action for 30 minutes.

Joe Douds, the old Washington and Jefferson tackle, as rough and rugged a giant as pro football knows, took it upon himself to smother the whirling midget once. They chased him full speed head on. They both went down, Mickey Mouse bounced nimbly to his feet and walked unharmed away. Jap stayed down, and they finally carried him away. He had no idea what happened for the next half hour.

For some strange reason, lack of height is always held against a football player. If you heard that a 160-pound man from the lips of a football expert, your eyes instantly light up in sympathy.

Winning's One-Of-His-Habits

Like Lucky Pond, Yale head coach, who has never played on a losing school team, Little Metzger, who made a life-time habit of associating with winners, as a Princeton player he was quarterback on two undefeated and one unbeaten gridiron on a baseball team which won 19 consecutive games. As a coach he has won at least six unbeaten gridiron seasons in 10 years.

Scarcely larger than Yale's Albie Booth when he entered Princeton in the fall of 1919, Gorman, from Syracuse, N. Y., directed his football career. Perhaps because of his lack of height he was used sparingly during his sophomore year, and it was not until he was a junior that he began to shine. He was a crucial center as pilot of the Tiger variety.

It was during his senior year, however, that Little Johnny's star-blazed forth in all his brilliance. There was that memorable game with Chicago, then called the "Big Game," when the rushing of the "dread" of football men, Amos Alonzo Stagg, the "mighty miler" coach, the heavy-lifting line and completely befuddled the defense with bullet passes which enabled the Tiger to change the score from 7-18 to 19-18 in a palpitating last 10 minutes. Later this "team of death" defeated Yale and Harvard in an undefeated season to bring the Big Three title back to the Big after an absence of eleven years.

And still they come! "Foot ball" is the name of the game at Morrisdon and Princeton preparatory schools, his eleven dropping but two games in four years. Called back to Princeton in 1920, Gorman quickly found his winning touch, directing an unbeaten team which clinched a series of thrilling victories by downing the Yale regents for the first time in 1923. Such future fame as Alvin Booth, who played and coached, the "Big Game" of last year's

Ed Don George
Defeats Savoldi

One of Claimants to World Heavyweight Mat Title Wins on Foul

CHICAGO, Oct. 29 (AP)—Ed Don George, 211, New York, one of the claimants to the world heavyweight title, defeated Savoldi, 206, Three Oaks, Mich., on a foul in the main bout of a show at the Coliseum tonight.

The Illinois state athletic commission refused Savoldi permission to use his "drop-kick" but he did not use it. Savoldi was fouled by George and used the maneuver to knock George out after 14 rounds of rough fighting. The referee awarded the bout to George.

Pat O'Brien, 235, Salt Lake City, and Jack Smith, 185, Chicago, drew 20 minutes.

Yarosz Punches Way to Victory

MILWAUKEE, Oct. 29 (AP)—Today Yarosz, claimant to the world midweight championship, tonight kept up a barrage of driving blows and worked a clever footwork defense to win a round decision from John J. Phelan, Chicago Negro, in the headline bout of the auditorium card here.

Yarosz, 24, was a former champion of the world in the welterweight division. He is now a contender for the world title in the midweight division.

Jim Weaver Rated As Eastern Flash

Twin Falls Youth Gains Recognition as End of Penn Military

CHESTER, Penn., Oct. 29.—Jim Weaver, Twin Falls, Idaho, boy, was the best college end in the country this year. The team played scores of times with the powerful grid organizations of Rutgers University and Bucknell University, and defeated with ease the first eleven of West Chester State Teachers College, the last lost to Lehigh University. Weaver's season seems to be the Chester captain, and Weaver, Young Idaho again played so small part in this season. The team played scores of times with the powerful grid organizations of Rutgers University and Bucknell University, and defeated with ease the first eleven of West Chester State Teachers College, the last lost to Lehigh University. Weaver's season seems to be the Chester captain, and Weaver, Young Idaho again played so small part in this season.

Coach Timm, also from Twin Falls and coach of the P. M. C. team has this to say of Weaver: "He is of all-American quality. A hard as forward passing defense, a hard fighting stalwart in the line. Twin Falls has reason to be proud of her two sons—Weaver, and Jim Finch, star P. M. C. lineman who graduated last June."

College of Idaho Eleven Gridsters Invade Camp of Vandals

University of Idaho Eleven Meets Strongest Football Team Ever Turned Out at Caldwell School

MOSCOW, Oct. 29.—The College of Idaho University of Idaho came to Moscow today for a battle for the title of "breather." Both teams will be breathing fire and fast football.

Coach Leon Basler will bring north to Moscow the strongest team ever turned out at the Caldwell school. Considering that last year's Coyote aggregation held the Vandals to a 13 to 6 score, the conclusion is that Coach Caldwell's men will have a real ball game on their hands in this season's finale.

Moral Victory College of Idaho supporters considered last year's game somewhat of a moral victory for the Vandals, but reports coming out of the southern part of the state indicate that Coach Basler's team will be a "breather." Both teams will be breathing fire and fast football.

FIGURING in the battle for state supremacy between the College of Idaho and the University of Idaho at Moscow Saturday (November 3) will be this quartet of Vandals. Earl Smith, Piler, is Coach Leo Calland's stormy weather kicker and ball pacer. Paul Berg, Idaho Falls, is a 60-minute man, playing that length of time in all games to date; Dick Nutting, Rupert, is a veteran guard; and Elbert Inman, LeVigton, is a field general who calls his signals right and tosses passes left.

HE'S ANCHOR IN NAVY DEFENSE

Tough Ball Game The University of Idaho will play a hard conference game the following Saturday with Washington State, but the success of the eleven this season. They have a tough ball game with the Coyotes, and they know it.

A large delegation of College of Idaho supporters is expected to see the game. George E. Horton, vice president of the college, said today that no reserved seats would be issued. General admission would be \$1.00.

Moral Victory College of Idaho supporters considered last year's game somewhat of a moral victory for the Vandals, but reports coming out of the southern part of the state indicate that Coach Basler's team will be a "breather." Both teams will be breathing fire and fast football.

Coach Leon Basler will bring north to Moscow the strongest team ever turned out at the Caldwell school. Considering that last year's Coyote aggregation held the Vandals to a 13 to 6 score, the conclusion is that Coach Caldwell's men will have a real ball game on their hands in this season's finale.

Washington Fans Expect Shake-Up Under New Pilot

Clark Griffith, President of Nationals, Prefers Bench Manager; Trades Or Outright Purchases Likely

WASHINGTON, Oct. 29.—As President Clark Griffith continues his enigmatic silence as to his choice for the Senator's baseball manager, Washington fans are fairly certain of three facts:

Stanley "Bucky" Harris now has the inside track for the job; the new manager will not be a playing coach; and a shake-up in the Senator line-up is assured.

Griffith has said he would prefer a bench manager, who would not have to wear himself out on the playing field. Unless the club changes his mind the statement would eliminate a number of the present Washington players who have been mentioned in the speculations, among them Second Baseman Burt Meyer and Catcher Luke Sewell.

Close Friends It is known Griffith highly regards Harris and that they are close personal friends. Harris has applied for the job and his candidacy has been supported by baseball circles on capital newspapers.

Harris was popular as a manager here from 1924 to 1928. Some feel Griffith is waiting to hear the reaction of the Washington fans, to find out whether Harris has retained his standing with the cash customers, before naming "Bucky." Griffith likes Harris as an inspirational, balling manager and approves of the job he did last season with the Boston Red Sox. The new owner feels he must have a manager admired by the fans—one that will make them forget their disappointment over the sudden sale of Joe Cronin to the Red Sox.

Almost any manager Griffith may name will be expected to give up for improving the club by trade or outright purchase. It is known Griffith would like the Cleveland Venable and Pitcher Elmer McDermott.

They had completed in a world's championship tournament in Los Angeles and failed to collect an expected \$1000 in prize. They wanted to change their luck, they said.

Waller in the day the barnyard golden, headed by Ted Allen of Alhambra, California, who has occasionally defended his world title, called as the district attorney's office in Los Angeles asking that a complaint be filed against John Gordon, horseshoe manufacturer, for failure to pay the prize money.

The district attorney's office suggested it was a civil court matter. While they were making up their minds about whether to file a civil action, the horseshoe pitcher took their horseshoes and came here.

It is just as grotesque for a girl to desert the arts that give her charm to excel in athletics as it would be for one of our football players to leave the gridiron to give her might kick, croquet and cook.

College athletics for the fair sex should be designed to give her poise, reasonableness of character and the ability to think fast, Miss Diamond believes.

Speds \$5 ton. Ph. Fargo 656—Adv.

Miss Diamond freely admits that in this day and age a girl can't be a "honey-bunch" plant, but she says what is to be thought that a girl should be able to take her time, walk, talk and act a man.

STOCKS DETRACT

IN LIGHT TRADING

Prices Decline in Face of Scattered Liquidation; Turnover Shrinks

MARKETS AT A GLANCE

(By The Associated Press)

NEW YORK: Stocks easy; dullness rules trading. Copper advanced; U. S. government bonds improved. Sugar advanced; gold currencies steady. Cotton quiet; spot and futures declined. Southern securities, especially oil, advanced. Wheat advanced; foreign selling. Chicago: Wheat weak; Winnipeg trade restricted. Corn lower; sympathy with wheat. Cattle undertone weak to 25c. Hogs steady to strong; top 15.25.

By FREDERICK GARDNER
(Associated Press Financial Writer)
NEW YORK, Oct. 29—Stocks retraced their gains of yesterday, but trading was the smallest in nearly a month. After a period of steady, firming tendencies, traders shied away from the share list in the late forenoon as the market was clouded by reports of inflation fears in some quarters. The general movement of financial markets did not bear them out. The dollar maintained its strength in foreign exchange dealings and U. S. government bonds were firm.

Traders in wheat had their eyes turned to the quarterly meeting of the United States Steel corporation directors tomorrow. The general feeling was that the quarterly earnings statement from that source, together with an unfavorable business picture contributed to an atmosphere of hesitancy.

Production increased. Steel shares sagged a little under other groups, although actual operations of the industry were somewhat higher. The Standard Steel Institute reported production this week at 24 per cent of capacity, up 1.1 points from a week ago.

Turnover decreased to 428,740 shares, the smallest since October 1933. The Standard Statistics company average for 30 weeks was four-tenths of a point lower.

A sharp decline in wheat futures in Chicago followed proposals in Canada for restriction of speculative operations in Winnipeg. Wheat ended with losses of 1 to 1 1/2 cents. In the wheat market, cotton lost 5 to 6 cents a bale.

California-Rioke Improve
The Rioke-Rioke improvement in California and other so-called California stocks picked up additional gains as financial interests took heart from latest reports on political trends in that state. Gateway gained a point. Other chain stores, including Kroger, declined.

COTTON
NEW YORK, Oct. 29 (AP)—The general cotton market ended barely steady at net declines of 1 to 8 points today.

GOVERNMENT BONDS
NEW YORK, Oct. 29 (AP)—Bond quotations: Liberty 104 1/2; U. S. 4 1/2's 104 1/2; U. S. 4 1/2's 104 1/2; U. S. 4 1/2's 104 1/2.

TWIN FALLS MARKETS
The Twin Falls market for grain, livestock and other commodities was quiet today. Wheat was steady at 1.10 to 1.12. Corn was steady at 50 to 52. Hogs were steady at 15.25 to 15.50.
