Plane Carries 12 Men Crashes at Cheyenne

Italian Army Sweeps Ethiopians Aside In Thrust From South

New Reports of Bloody Fighting Come From Africa As Nations Move Toward Isolation of Rome

War Developments in Brief

(By The Associated Press)
ROME—Premier Mussolini calls upon western to resist sanctions and orders cessation of mercantile marine to ascertain naval reserve strength in case of European war.
GENEVA—League, with overwhelming majority prepared to enforce sanctions, moves Thursday to set date for their application.
PARIS—British and French military leaders confer on wartime cooperation in the Mediterranean.
TUNIS—Thousands of Italian and native troops reported in unconfirmed dispatches to have swept aside Ethiopians in bloody battle, reaching vicinity of Gorbati on southern front. Two northern columns advance on Makale, Ethiopians try to throw back both.
ADDIS ABABA—Emperor orders long-barreled arms dug up to equip reserves; Ethiopian prepares to establish base hospital behind southern front.
LONDON—No peace plan is sighted and Britain's firm stand is unaltered as her foreign leaders return to Geneva.

(By The Associated Press)
Italian victory at the price of a bloody battle on the southern Ethiopian front was reported in unconfirmed dispatches Wednesday night, even as the world turned toward another momentous meeting of the nations at Geneva today.

Thousands of Italians and trained native troops, or dubats, swept Ethiopian defenders aside in fierce fighting to reach the vicinity of Gorbati, as dispatches received from Mogadishu, Italian Somaliland, stated.

F. D. R. HITS TRADE WITH BELLIGERENTS

President and Secretary of State Sound Warning Against Dealings

(By The Associated Press)
WASHINGTON, Oct. 30.—President Roosevelt and Secretary Hull aimed sharp and almost simultaneous blows today at American dealings of any description with either Italy or Ethiopia.

Advancing beyond any previous point the efforts to influence the government's neutrality policy by discouraging trade with the belligerents, the president and secretary of state carried unspoken hints that further action might be taken.

Kaplan Watched
The chief executive, after hitting at commercial policy gained from war, turned to Italy.

"According to the American government is keeping informed as to all shipments consigned for export to both belligerents."

"Null, employing ardent language than at any time past, asserted that the neutrality policy was intended to discourage dealings with both of the warring countries and added that the government was ready to place with the restoration of normal business and normal business profits are sounder and far preferable to temporary and risky war."

IDAHO'S SHIPMENTS OF POTATOES STOPPED
IDAHO FALLS, Oct. 30 (AP)—Shipments of Idaho potatoes to far this year are approximately three hundred cars behind what they were for the same period of last season because of a weekly shipment issued today by the Federal Market News service here. Restricted trading and adverse weather have affected the potato deal this year.

Surgeons Shown Vitamin E, Most Precious Substance

(By The Associated Press)
SAN FRANCISCO, Oct. 30 (AP)—One thousand milligrams of the newest and at present most precious substance in the world, pure vitamin E, was shown today to a group of physicians at the American Chemical Society meeting.

IDDINGS DISCUSSES IDAHO AGRICULTURE AT GRANGE SESSION

Dean of Idaho College Addresses Convention Delegates and Visitors at Lecturer's Open Meeting

Dean E. J. Iddings of the Idaho college of agriculture addressed the evening open session of the Idaho State Grange's annual meeting in Twin Falls high school auditorium last evening, discussing "Some Fundamentals in Idaho Agriculture."

Speaking of permanence of soil resources, he said there is a plenty of time, through conservation and best farming methods, to retain and maintain the soil resources of the state, he declared to be "absolutely essential" for solution of farm problems, and encouragement of today's boys and girls to take up the burden.

Leadership on the part of the farmers themselves "in cooperation with educational and other forces of the state," he declared to be "absolutely essential" for solution of farm problems, and encouragement of today's boys and girls to take up the burden.

Lecturer's Program
Dean Iddings' address was a feature of the Grange's evening program, arranged by Mrs. Mabel Bailey of New Paltz, State Grange lecturer.

He was also a feature of the Idaho State Grange's annual meeting, which was held at the Idaho State Grange in Twin Falls.

Opening with selections by a group of A. E. Francis' little pupils of the Idaho State Grange, the program continued with an address of welcome by Mrs. Mabel Bailey of New Paltz, State Grange lecturer.

He was also a feature of the Idaho State Grange's annual meeting, which was held at the Idaho State Grange in Twin Falls.

Opening with selections by a group of A. E. Francis' little pupils of the Idaho State Grange, the program continued with an address of welcome by Mrs. Mabel Bailey of New Paltz, State Grange lecturer.

SUB-ZERO WEATHER GRIPS HELENA AS REMOVING CONTINUE

Frigid Arctic Blasts Spread Out of Season Winter Over West; Montana State Reports 16 Below

(By The Associated Press)
SEATTLE, Oct. 30.—The Arctic blew its frigid breath down on the Pacific coast and Far West again today, spreading out of season winter over the West.

Helena, Montana, experienced perhaps its coldest and unhappiest birthday as the thermometer dipped to 8.2 degrees below zero and the earth beneath it quivered again to continue the long reign of seismic activity.

The Montana capital was 74 years old today. Workers hurried to repair homes damaged by the recent disastrous quake.

California, ordinarily one of the warm spots on the United States map, reported 4 below zero, with Glacié Peak below zero in the mountains reported 16 below this morning.

The ship was the Boeing "flying fortress," undergoing tests by the army air corps in preparations for strengthening the major jet.

Major P. H. Hill, chief of the flying corps at Wright field here, and official pilot for the tests of three bombers undergoing trials, lost his life in the crash.

He and four others took the huge bomber aloft today. Its four 700-horsepower engines had barely pulled the 300-foot craft off the ground when witnesses saw the two left engines appear to falter, the two right motors pulled the big ship down, and it crashed.

Death List Names Four Men, All Employees of United Airlines, Aloft On Test Flight Through Zero Weather

(By The Associated Press)
CHEYENNE, Wyo., Oct. 30.—Four airmen were killed tonight when a giant test airplane of the United Airlines crashed during a snowstorm into a low knoll six miles south of here.

The plane, cruising through zero weather, struck the hill-top and exploded, scattering mangled bodies and wreckage over the thumb-like hill which rises from a broken plain.

The dead: Chief test pilot M. T. Arnold, of the UAL, Cheyenne; "Abe" Cohn, veteran pilot of the Wyoming Air Service, of Cheyenne.

Edward Yankis, of the UAL instrument crew, Cheyenne; Harold Kauffman, of Cheyenne, apprentice instrument man of the UAL.

The plane crashed 25 minutes after it took off from the municipal airport here on a leisurely cruise into the wintry skies.

Mass of Flames
Truck farmers who live on the outskirts of Cheyenne said they saw the plane explode as it hit, and doubted it as leaping high into the air and exploding again as it smashed in a mass of daring flames.

Tonight's crash was similar to that at Dayton, Ohio, today in that the planes involved were making test flights. The Dayton accident claimed the life of Major P. H. Hill, chief of the army air corps flying branch at Wright field, Dayton, and brought injuries to four other men.

A search for another possible victim of a plane crash will be resumed tomorrow on Chesapeake bay near Annapolis, Maryland, where a plane believed to have been that of Lieutenant M. M. Marple, navy flier, fell.

Temperature Blump
W. P. Howe, manager of the UAL, office here, said the ship that crashed near Cheyenne was making a routine test flight. He was unable to explain why the plane crashed, but he said the plane was not in any danger of crashing.

Howe said a gentle wind was blowing when the ship took off, but there were no blizzards conditions. During the half hour the plane was in the air, it was not in any danger of crashing.

POPE FINDS HIGH REGARD FOR F. D. R.

Idaho Senator Reports President Popular at Home and Abroad

BOISE, Oct. 30 (AP)—Informed Europeans feel that "democracy is safe in America and there is a general high regard for the leadership of President Roosevelt," James P. Pope, Idaho's United States senator, said here today.

Adolf Hitler, German dictator, is frequently spoken of in Europe as a "menace to world peace," but wherever there are dictators "there is danger of war," Mr. Pope said.

Mr. Pope made the statement to the press on his arrival here from Lewiston, Idaho, where he spent a short time motoring west from Washington, D. C.

He was started following his return to this country a few weeks ago from Europe.

With his arrival, Pope became the actual residence of two United States senators, who recently figured widely in the public press.

And tomorrow, three-fourths of the Idaho congressional delegation will be concentrated here.

Talk of French.

Senator William E. Borah, long a personal friend of Senator Pope, is still here on his annual stay in Boise, and Congressman D. Worth Clark of Pocatello is expected to reach Boise tomorrow to spend the rest of the month here.

There is a good deal of public opinion in favor of giving Senator Borah the Republican nomination for the presidency next year.

"I am unable, however, to find the actual evidence for the belief of any of his prestige with the people here that is being done things to correct the evils of the world," Mr. Pope declared.

Mr. Pope declared economic conditions are improving in the United States and abroad, but that the improvement in this country has been more rapid than in the old world.

"Less similar to the 'new deal' that have been enacted during the past two years in the United States have been considered by Great Britain, and some are operative in that country, but the English lawmakers move more slowly than we do in this country," Mr. Pope said.

The present energies are being directed toward securing a large supplementary water supply for reclamation projects in Idaho, and in working out plans to relieve potato growers, whom he described as "producers of the third largest crop in the United States."

Mr. Pope has set up headquarters on the second floor of a downtown hotel, at which he and his family are residing.

His secretary, Ralph Olmstead, formerly of Twin Falls, and personal stenographer, Miss Peggy Woodruff, a Boise girl, are with the senator.

Mr. Pope said he plans to deliver two addresses during the first part of next month one is to be at Tacoma, Washington, on November 7 and the other in Seattle the following day.

He said he has no other immediate plans to deliver addresses.

Surgeons Shown Vitamin E—Most Precious Substance

(Continued From Page One)

Knoxon, Dr. Gladys Emerson and Dr. N. Halliday have given rats a diet in which the reproductive vitamin is completely lacking.

In every case the rats became sterile. Giving them some of the pure vitamin restored fertility as a rule, though not always in old rats.

The amount of vitamin E which is effective is carefully measured. Ultimately this work will reveal the "threshold," the least amount of the vitamin needed for reproduction.

Expectant mothers on relief, and many others besides, are listed as not getting the right things to eat in a "country" where universal malnutrition reported to the American College of Surgeons today.

The study was made by Leighton C. Coon, professor of gynecology and obstetrics at the University of Alberta Medical School, Alberta, Canada.

He said that notwithstanding the fact the public of both the United States and Canada is "food conscious" and will eat anything it is told to, many persons will fail to eat the right things and in the right quantities.

"It is established," he said, "that

THE AVERAGE DIET IS DEFICIENT IN THE ESSENTIAL FOODS, ESPECIALLY MINERALS AND VITAMINS. CO-ORDINATED BY THE AVERAGE NORTH AMERICAN DIET CONSISTS OF FOOD PREPARED FROM CEREAL SOURCES.

Meats, too, Dr. Coon said, lack the vitamins, except liver and kidney, which are not often eaten. It is not sufficient, he added, to tell an expectant mother to be careful of her diet.

She should be informed specifically what to eat, Dr. Coon held, and specified the following basic diet: Daily one quart of milk, fresh cheese a week, two cups of vegetables daily, one fruit it possible; one cup of whole cooked cereal supplemented once or three days a month by a cup of fruit, including citrus fruits or canned tomatoes three days a week; and one medium sized serving of meat, fish, fowl or eggs, with the addition of liver once each week.

Food sensitivities of individuals must be allowed for. Thus some persons cannot drink milk. In that case they should try milk products. The sensitivities of the diet must be made of bread, potatoes, macaroni, crackers, rice, calcium, sugar, jelly, jam, syrup, cream, butter and salt, as dictated by the appetite and weight.

SPLIT VICTORY IN TEST OF COAL LAW

Government and Mine Operators Litigation

WASHINGTON, Oct. 30 (AP)—Both the government and James Walter Carter won a preliminary victory today in the initial court test of the Guinley law for federal regulation of the coal industry.

Carter's request for a temporary injunction preventing the Carter Coal company, of which he is president, from complying with the law was granted by Justice Jesse C. Anderson.

But the judge, simultaneously, refused to enjoin the government from applying against Carter's concern the 15 percent tax which becomes effective Friday on gross sales of all coal producers at the mines.

The law provides that 15 percent of this tax shall be refunded to producers who comply with the code. Carter's objection to the law was that it does not become payable until January 1, he failed to see how the company could be injured. Carter's suit for a permanent injunction is now being heard.

Justice Anderson said that since the tax does not become payable until January 1, he failed to see how the company could be injured. Carter's suit for a permanent injunction is now being heard.

Kavanaugh has been chosen as the Junior play. The date for presentation is November 21, announced by Miss Alice Milligan.

Mr. and Mrs. W. R. Sicka have returned from the Sawtooth mountains where they spent the summer. Mrs. Sicka of Boyle's dude ranch returned with them for a visit.

Mr. and Mrs. A. L. Sturgeon and Mr. and Mrs. Justin Kirkwood spent Sunday in Gooding visiting with Mr. and Mrs. Hubert Syverton.

Mr. and Mrs. R. W. Newman motored to Gooding Monday on business.

Mrs. Lindsay of Harleton is here visiting her daughter, Miss Clara Lindsey, who is teaching here.

George France arrived here Saturday from Portland to make an extended visit with his mother, Mrs. P. H. Winkler.

Mr. and Mrs. D. R. Turner and family are in Oregon visiting relatives.

Mrs. Laura Pickett spent two days this week in Pocatello and Idaho Falls. She accompanied her parents, Mr. and Mrs. Ivan O. Lincoln of Twin Falls.

Mrs. Charles Randall left Sunday for Paul, where she will spend a few weeks with her parents, Mr. and Mrs. Merriam. She was accompanied by her daughter, Mrs. Clyde Perkins, who returned the same evening.

Miss June Tolman of Logan, Utah, who is visiting here, and Miss Blanche Peck of Pocatello, spent Saturday and Sunday here with relatives and friends. They returned to their homes, Sunday evening.

R. O. T. C. ANNOUNCES STUDENT APPOINTMENTS

MOSCOW, Oct. 1—Four students from south central Idaho have been included in the appointments for student officers in the Reserve Officers' Training Corps for the first semester at the University of Idaho.

George D. Rich, Jr., is the major of the first battalion, and Vincent F. Hunt, Jr., is the first lieutenant. The student officers drill the freshmen and sophomore students are enrolled in R. O. T. C.

HEAD OF HOSPITAL FAVORS ADVERTISING

Co-Operation With Newspapers Proposed in Code of Ethics

SAN FRANCISCO, Oct. 30 (AP)—A code of ethics which would permit hospitals to advertise and permit co-operation with newspapers even to the extent of helping newsmen to dig up human interest stories was presented to the hospital standardization conference of the American college of surgeons.

Frank J. Walker, superintendent of St. Luke's hospital in Denver was given the platform to answer questions as to what hospitals could do, legitimately, to create a better understanding and improve public relations.

They can, he said. Adjust misunderstandings and allay distrust by carrying on educational programs. Bring the public and the hospitals closer together by letting the people know what facilities they have to offer to promote human welfare and comfort.

Advertising Ethical

Group advertising on commercial advertising by the hospital is ethical, he said, if it is not done solely for self aggrandizement, or profit but to promote the general good of all hospitals and the public welfare.

Publication of pictures of patients in modern medical scenes is proper, he said, if it does not involve violating the sanctity of the confidential relationship between doctor and patient. Hospitals are the source of many human interest stories, Walker said, and publication of them, under the right conditions, is conducive to bringing hospitals and the public closer together and to dispelling the feeling illness is a disgrace.

THREE ENGAGEMENTS ANNOUNCED AT PARTY

BURL, Oct. 30 — At a Halloween party at the home of Mr. and Mrs. Dan L. Thompson, three engagements were announced during the course of the evening, on Wednesday night. The Halloween motif was carried out in the decorations and in the menu for the midnight supper. There were 30 young people present for the occasion.

A telegram came during the first part of the evening announcing the engagement of Miss Ulfie Thompson to Everett Martin of Nampa, the wedding to take place during the Christmas holidays. Each guest was served a tray with their supper and under a cupid playing card and a rosette the engagement of Miss Ruth Shrock daughter of Mr. and Mrs. B. L. Shrock, to John Doy, a member of the Burl high school faculty. This wedding will also take place during the holiday season.

The first of a series of parties given by the teachers of the Lincoln building was given on Sunday afternoon at the home of Miss Frances Crow with Miss Irene Nippa assisting. The guests were seated at one long table for a four course dinner. The center piece was a large bowl of roses with white tapers at either end of the table tied with orange cellophane. The orange and white color motif was carried out in all the decorations and in the menu. Following the dinner the guests attended a theater in Twin Falls and later returned to the Grows home for light refreshments. Guests included: Mrs. Myrtle Gask, Misses Kathleen Kellner, Ruth Ann Knorr, Bernice Ripley, Dollie Stierma, Frieda Becker, Dorothy Parker and Mrs. Harry Lewis. All teachers in the Lincoln building.

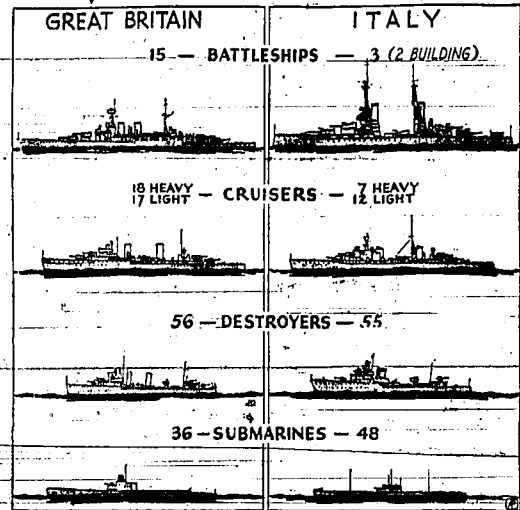

The zone rally of the W. P. M. S. of the W. P. M. S. will be held in Glimma Ferry on Thursday of this week. Six delegates from Burl will attend: Mrs. A. D. Kall, Mrs. Kate Burnett, Mrs. E. E. Engles, Mrs. Dan Thompson, Mrs. W. S. Carter and the Rev. Brooks Moore. Principal speakers will be Rev. L. D. Smith of Twin Falls and Rev. Carl C. Pounds of Nampa. The district president, Mrs. Carl C. Pounds of Nampa, will also be present and have charge of the meeting.

Dress Industry Bids For Johnson As Czar

NEW YORK, Oct. 30 (AP)—Samuel Oschorn, president of the United Dress Manufacturers association, said today that General Hugh S. Johnson, former N.Y.A. administrator and more recently New York W.P.A. chief, had been offered a post as czar of the dress industry.

Oschorn did not reveal the salary offered Johnson, but said that a

MEDITERRANEAN HORIZONS

These illustrations show how typical ships of the British and Italian navies appear when sighted from other vessels as they come up over the horizon. The figures indicate the number each country possesses in the four classes.

(By The Associated Press)

What occurred from the concentration of British naval power in the Mediterranean has become a most subject for world debate as people of all nations scan reports of developments before the League of Nations at Geneva and the resulting repercussions from London and Rome.

A veritable armada is flying the Union Jack at Gibraltar, Malta, Cyprus and off the Suez canal, for England has stripped her home waters and moved fighting ships from the West Indies and China stations. Talk that sanctions against Italy may be imposed by the League of Nations because of the threat against Ethiopia and Mussolini's

answer that "sanctions spell war," are back of the situation.

Experts have estimated that Britain has a margin over Italy in sheer hitting power, but some of them say the Duce's fleet excels in speed. They claim Italy has some cruisers which can outspeed British destroyers.

Typical of British might is the great battle-cruiser Hood, whose silhouette appears at the top of the accompanying diagram. She is of 32,100 tons displacement and carries 15-inch guns. Opposite her is Italy's battleship Doris of 21,353 tons with 12-inch guns.

Below are the British 7,000-ton cruiser Amphion, main battery 6-

inch guns, with a speed of 32.5 knots. Italy's Bolzano, a 10,000-ton cruiser with 8-inch guns, is rated at 33.3 knots, but she is reported to have done 35.

Britain's "E" class destroyers were launched in 1924, have a torpedo bank and mount 4.7-inch guns. The Italian destroyers of the same class as the illustrated "Dardo" were put out in 1921.

In submarines Italy outnumbers England. The Balilla is the name-craft of a sea-going class with a 3.9-inch turret gun, and tubes for torpedoes and mine-laying. The British "Thames," the first of three sister-cruisers, was the first submarine to reach 22 knots. She carries a 4-inch gun.

committee which conferred with the general in Washington found him "responsive to the proposal. The salary proposed was rumored to be about \$60,000 per year.

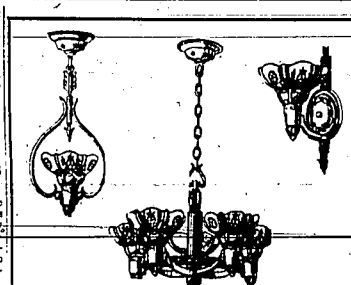

The association represents about 200 dress contractors producing 80 to 85 per cent of the output in the metropolitan area.

Quintuplets Signed As Movie Actresses

BOSTON, Oct. 30 (AP)—The Dionne quintuplets have been signed as movie actresses and as soon as they are old enough will appear in "Flicker of Fiction," David Arnold Cron, minister of public welfare in Ontario and foster-father of the quint, disclosed here today.

"Mrs. B. there are movie contracts already signed and they'll appear in some sort of fiction when they are old enough," Cron said. "The government isn't exploiting them, but is shielding their interests."

"I can't tell them apart," Cron, whose position as minister of public welfare makes him guardian of the five girls, admitted—although the nurses, doctors and government recognize them as separate personalities.

MORNING RITES SET FOR MRS. SWEELY

Brief services, in charge of Christian Scientists, will be held this morning at 10:30 o'clock at the White chapel for Mrs. Geneva L. Sweely, wife of former State Senator Martin A. Sweely, who died suddenly Tuesday evening while attending a Halloween party for the Magic-Y club at the home of Mrs. W. C. Goodrich. Mrs. Sweely was an officer in the Christian Science church.

Musical selections will be sung by Wilton Peck. Following services the body will be taken to Albany, Illinois, where interment will be in the family plot beside the graves of her parents and her first husband, Harry B. Lewis.

MRS. WARNER BROUGHT HOME FROM HOSPITAL

Mrs. Andrew Warner is convalescing at the Burl hospital from wounds sustained in an automobile accident near Massena rocks early Tuesday morning. She was brought home from the hospital yesterday by Dr. Warner, district superintendent of the Methodist Episcopal church.

Two of Mrs. Warner's companions on the trip that was to take them to a Women's Missionary society meeting in Pocatello, are still in the Rupert hospital. Mrs. Lloyd Gilmore and Mrs. L. C. Schneider, other occupants of the machine, returned home Tuesday.

COMMISSIONER BALKS AT WATER TRANSFER

BURL, Oct. 30 — Returning from Boise in company with County Commissioner Arthur D. Evans, Mable, Prosecuting Attorney Adams H. Nelson, stated that at a hearing before R. W. Paris, state commissioner of reclamation, held Saturday, the commissioner refused to grant the New International Mortgage bank the privilege of transferring irrigation water in the Bluff river section of the county from approximately 4,000 acres of land to 120 acres.

The decision following a protest entered by County Attorney Nelson in behalf of Cassia county, wherein it was shown that the taxes against the lands sought to be deprived of the waters aggregated, in round

numbers, \$7,000, and that if transfer was permitted, the greater part of such taxes would be lost to the county and its included taxing units.

OPTION OBTAINED ON IDAHO BIRD SANCTUARY

BOISE, Oct. 30 (AP) — Senator James P. Hays announced tonight that he has been informed that the United States biological survey has obtained an option on approximately 7,000 acres of waterfowl sanctuary in the Mud lake area in Jefferson county.

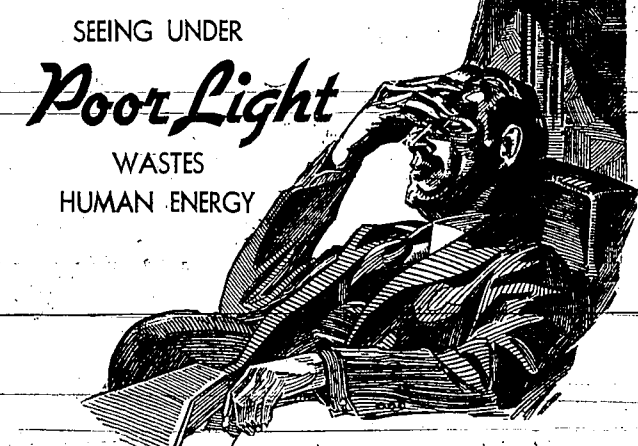

Funds are available for development, but they must be expended with the approval of the migratory bird conservation commission which meets in Washington, D. C. in January, he said.

PROTECT YOUR EYES WITH A NEW ATTRACTIVE LENS LAMP NOW ON DISPLAY

THEY WILL ENHANCE THE BEAUTY OF YOUR HOME WHILE GIVING YOU ADEQUATE ILLUMINATION.

SODEN ELECTRIC CO.
"The Illuminating Store"
Elia Bldg.

Your Eyes Are Precious -- PROTECT THEM

Follow These Simple Rules For Lighting

1. Fill all the empty sockets with lamp-bulbs of correct wattage and keep a supply of "extras" on hand.
2. Never read in place or in your own shadow. Have all lamp globes shaded. For portables, a shade which is light in color, wide in spread, and open at the top.
3. Make an inspection of your lighting fixture and bring them up to date. This means eye comfort now—eye-light protection later.
4. See if you have sufficient floor and table lamps for proper illumination. If they measure up to Better Sight Lamp specifications and if they are properly placed.
5. Make certain that paint and wallpaper in your rooms are in colors that reflect light—not ones that absorb the light.
6. Have the eyes of every member of your family examined by a competent eye specialist at regular intervals.

Insufficient light at the office and inadequate lighting conditions at home are responsible for many businessmen nodding off to sleep while reading after dinner.

Maybe you don't know it but there are probably many hours every day when you must force your eyes to strain their tiny muscles so that you may see clearly.

This unconscious exertion may not be noticeable to you—but if too prolonged or too frequently repeated, it may result not only in harmful strain to the eyes but in a drain of nervous energy that can have a serious effect on health.

The surest and easiest way in which to obtain proper lighting for your home or office is by means of Better Sight Lamps. These new scientific lamps give several times as much useful light as ordinary lamps. There is no glare—just plenty of soft, diffused light exactly where you want it on your book or work.

See the New Better Sight Lamps On Display At Your Dealers

Visit your dealer's showroom and see the new Better Sight Lamps. Each one carries the certification tag of the Illuminating Engineering Society. There are both floor and table models in many attractive designs and finishes and at modest prices. Learn more about the reasons why Better Sight Lamps help to prevent eyestrain and conserve energy.

EXPLORER FINDS THRILLS IN IDAHO

Leader Ranks Salmon River Voyage Over Arctic Expedition

LEWISTON, Idaho, Oct. 30 (UP)—A veteran scientific explorer found the jolting, swirling, bumpy ride down Idaho's famed "river of no return" more thrilling than an Arctic expedition.

Maynard Owen Williams, leader of the National Geographic society's wilderness-piercing party, was a member of the Byrd and MacMillan polar expeditions in 1923. But he told a banquet audience here last night that only an expedition across India and the Himalayas was more impressive than the trip by barge down the Salmon and Snake rivers between towering lava walls.

The barge party started here yesterday with the scientific party after the 150-mile, 21-day journey. The barge, carrying through the wilderness of central Idaho, has been known as "the river of no return" because the roaring waters block upstream progress. The trip, however, was rising as high as 900 feet abruptly on either side, preventing in some places the return by any other means.

The scientists viewed the photographic expedition down the Salmon as significant because the region was one of the last great unexplored areas on the continent. The National Geographic group was the first scientific party to pierce the region.

Primitive writing was found on the walls of the river channel and Williams photographed it for study of the early unknown Indian inhabitants of the region. Williams

and Dr. Philip Sienow of Washington, D. C., also discovered distinctive arrow heads which they said might reveal new data on the early tribes.

The journey offered its thrilling and hazardous episodes—when the barge was stuck for five days during which the short wave radio operator, Howard Flint, was stranded fatally.

"We put on our life belts going through some of the rapids," said Dr. Sienow. "But it was a geological journey. Several times it seemed certain we would strike some of the many rocks and be dashed into the foaming current."

Dr. Williams commented:

"Since joining the society in 1919 I have made only one trip that exceeds above the one we have just completed down the Salmon river. That was a French expedition across Asia."

HALLOWEEN GATHERING HELD BY ROTARIANS

BURLEY, Oct. 30.—Honoring the teachers of the Burley schools, the Rotary club entertained at dinner at the National Hotel Tuesday evening. The event also being ladies' night of the club, wives and friends of Rotarians were present.

Tables were attractive with Halloween decorations including Jack-o'-lanterns and Halloween favors. Covers were laid for 144 persons. Oscar Spear, Pres. Utah, district governor of the fifth district of Rotary, accompanied by his wife, was present and was the speaker of the evening. Henry C. Dronoth, president of the local Rotary club, was toastmaster and Harry Harpster gave the address of welcome. William Beck responded for the teachers.

Mr. Johnson and Mrs. Anita Johnson, both of the musical department of the Albion State Normal school, entertained with piano and violin numbers and Mr. Hawk of Oakley sang three solos, accompanied by Miss Jane Deven.

Following the dinner the teachers were entertained at dancing at the Elks club as honored guests of the Burley lodge of Elks. The hall was gay with Halloween decorations and was lighted with Jack-o'-lanterns.

IDAHOANS RETURN FROM TOWNSEND CONVENTION

BOISE, Oct. 30 (UP)—Lewis Williams, Idaho commissioner of public welfare, returned to Boise today from Chicago where he attended what he termed "a successful meeting" of 6000 official delegates to the national convention of the Townsend old-age revolving fund pension plan organization.

Idaho was represented by 34 delegates.

E. C. Davis, formerly of Twin Falls, the present state manager of the Townsend organization in Idaho, was among those who were present at the meeting.

Fire-Swept Nome is Looking Up As Rebuilding Restores Business

Front street in Nome, Alaska, as shown in the picture at top, was a narrow wooden-plank thoroughfare lined with old structures before the disastrous fire of September, 1934. Today the same street (below) is wider and boasts a double row of trim new business buildings.

NOME, Alaska (UP)—As snow falls again, Nome faces a different winter than last, largely rebuilt and encouraged by another mild "gold rush" and with the disastrous fire of September 17, 1934, a memory.

"The fire," which destroyed 11 blocks of buildings on that windy gale-swept day and night, was not without its blessings although the loss was set at \$2,000,000. It was the worst of three disastrous fires in Nome's history.

"Now we see new buildings occupying the area," says George Maynard, publisher of the Nome Daily Nugget. "Alaska's oldest newspaper," the Nugget plant was destroyed but has been rebuilt.

Privations and Hardships

"Many of those old historical structures had outlived the first gold rush period," he says. "In many respects, last winter was a hard time for everyone. Privations of living and hardships of one kind and another befall many of the people; but with coming of summer reorganization of business and the building of houses and business houses, a brighter and more cheerful city has been the result."

Unable to "hole in" in the burned city last winter, many residents, possibly 500 of the 1,200 here, including those who "go out" every winter, left for the United States and Fairbanks and other Alaska points after the fire.

They came back this spring and summer and with them, as the government's higher gold price encouraged a resumption of gold mining activity, came others. The Seward peninsula stretching north from here has seen a mild flurry

of mining activity, and many of the new miners and prospectors will remain north through the winter.

Lumber From U. S.

Between 1,200 and 1,300 people are in the city today.

The rebuilding of the city, nearly half of which was burned, has been a struggle this summer, with lumber and building supplies all brought by ships from the United States to Nome's roadstead, and then barged and lightered to shore. The city faces on the beach.

With wood the building material, a number of the business buildings have been begun.

Those prices are a pair of flannels, each to see "Wings Over Ethiopia," new play at the Orpheum theater.

The picture show life in Ethiopia—all in place.

The correct answers will be published in The News Friday.

POTATOES DAMAGED IN CASSIA COUNTY

BURLEY, Oct. 30.—Approximately 15 to 20 per cent potatoes still remain in the ground. Paul O. Mueller, local produce dealer, estimated Tuesday morning. With probably 30 per cent unharvested when the frost first struck, several nights past, Mr. Mueller estimated that between 10 and 15 per cent had been damaged. What it will do after the snow Monday night is problematical, he said.

Yield of number one produce is running better than average this year, stated Mr. Mueller, with about 75 per cent discounting rot, where the number one percentage is usually between 50 and 60 per cent. One lot Monday, he said, went 270 sacks number ones and 35 sacks twos.

A survey today showed that 35 buildings used for various businesses and stores, 30 homes and a bank have been built, as well as numerous other smaller structures. Added a loan and grant of \$100,000 to the city from the PWA, organization of city functions also has begun.

 3. What is the current Ethiopian coin?
 4. What is the population of Ethiopia?
 5. How many railroad lines does the country have?

Here's the third and last set of questions in The Twin Falls News "Wings Over Ethiopia" contest. Future out the answers; then get them, with the answers to the 10 previous questions in this contest, to the "Wings Over Ethiopia" contest in care of The News as rapidly as possible. Remember—the prizes will be awarded for the first 15 correct sets of answers received. Entries must be postmarked not later than midnight tonight.

Those prices are a pair of flannels, each to see "Wings Over Ethiopia," new play at the Orpheum theater. The picture show life in Ethiopia—all in place.

The correct answers will be published in The News Friday.

POTATOES DAMAGED IN CASSIA COUNTY

BURLEY, Oct. 30.—Approximately 15 to 20 per cent potatoes still remain in the ground. Paul O. Mueller, local produce dealer, estimated Tuesday morning. With probably 30 per cent unharvested when the frost first struck, several nights past, Mr. Mueller estimated that between 10 and 15 per cent had been damaged. What it will do after the snow Monday night is problematical, he said.

Yield of number one produce is running better than average this year, stated Mr. Mueller, with about 75 per cent discounting rot, where the number one percentage is usually between 50 and 60 per cent. One lot Monday, he said, went 270 sacks number ones and 35 sacks twos.

A survey today showed that 35 buildings used for various businesses and stores, 30 homes and a bank have been built, as well as numerous other smaller structures. Added a loan and grant of \$100,000 to the city from the PWA, organization of city functions also has begun.

POISON BISCUITS TAKE THREE LIVES

Ohio Authorities Hold Man
for Questioning in
Strange Deaths

COLUMBUS, O., Oct. 30 (UP)—A young mother of two children died after eating biscuits made with an insect powder instead of baking powder and police held last night for investigation a man who said he was her husband.

The dead woman was Mrs. Nancy Shriver, 25. Her two children, Evelyn, 9, and Ruth, 6, also ate the biscuits but were recovering. Detectives C. A. Louisa and Lester Bauman said the man gave his name as Eugene Polk, coroner E. E. Smith said he would be questioned tomorrow for an explanation why he ate none of the biscuits and why Jack in Mrs. Shriver's home containing baking powder and insect powder were emptied and cleaned when he was taken to a hospital last night.

Gridders Stage Greatest Scoring Run in Five Years

Rank Outsider Wins Ninety-Sixth Running of Cambridgeshire

Records Disclose Change In Favor Of Ball Carrier

Performances Due Apparently to Certain Rule Revisions, 'Slow Whistle' and Development of Open Play

By ALAN GOULD
(Associated Press Staff Writer)

NEW YORK, Oct. 30.—College football, on the basis of touchdown production so far, is off on its greatest scoring spree in five years.

Performances at the halfway mark of the 1935 gridiron campaign, analyzed today, reveal a turn in favor of the offense for the first time since 1930, due apparently to certain rule changes, the so-called "slow whistle" and the further development of "open" play.

During the past four years scoring has steadily declined. From an average of 16 points per game in 1930 the team scoring average dropped to 12.5 in 1934.

In 1935, despite the national scoring average is back up to 14.5 points per game. The average for the first 10 games is 16.7 points per game.

Currently the national scoring average is back up to 14.5 points per game. The average for the first 10 games is 16.7 points per game.

The average total per team for the 10 games of college competition is 14.5 points per game.

Among major teams, the University of Mississippi has rolled up the high total of 212 points for six games, but Dartmouth and Wake Forest have scored at a faster pace. Dartmouth's 200 points for five games, and Wake Forest's 190 points for four games.

Most coaches consider the increased scoring due to more effective forward passing play, plus the development of an unusually tight grip of broken-field ball-carriers this fall.

Later passing has not contributed to the firestorm expected this season, despite the impetus to its ballplay by such experts as the late Dr. J. H. St. John, president of Ohio State and Kerby of Colgate.

'Stub' Allison Picks U. C. L. A. Over California

100 Per Cent Wrong In Previous Forecasts, Mentor of Golden Bears Insists Bruins Hold Advantage

By RUSSELL NEWLAND
(Associated Press Staff Writer)

BERKELEY, Calif., Oct. 30 (AP)—Leonard B. "Stub" Allison, the "Bruin" speaker, "hatched his chair" a little lower, waggled his finger knowingly, and announced "I'm afraid the Bruins will take us Saturday."

Coach Allison was referring to the football game in Los Angeles where his "University of California Bears" will meet the "University of California Bruins" at the University of California stadium at Los Angeles, Calif. They are the Bruins' underdog team in the Pacific Coast conference championship game.

100 Per Cent Wrong As a prognosticator this season, Coach Allison has been 100 per cent wrong in his predictions for the Bruins.

At a press conference, Coach Allison said he was 100 per cent wrong in his predictions for the Bruins.

Triumph Of 28-to-1 Shot In Classic Distributes Fortunes

FUR-CUTTER WINS \$147,300 ON CAMBRIDGESHIRE TICKET HE BOUGHT 'OFF-HANDLIKE'

NEW YORK, Oct. 30 (AP)—A fur-cutter in Manhattan's garment district heard today that he had won \$147,300 on the \$2.50 ticket he bought for the Cambridgeshire sweepstakes.

The man, who had a lucky ticket on Commander III and he bought it "off-handlike," when a fellow came around selling them. He has a wife and three children and lives in the Bronx.

"I'm not sure how we'll spend it. I didn't draw up any plans in advance," Louis T. Binowitz, the man who won, said.

He has cut fur for 15 years and is now 45. The manager said a girl lover of a fur-cutter named Max, who was each \$75,000 in the sweepstakes, was looking for a job when news of their good fortune came.

Adolph Marovich, who 12-year-old wife, Mary, also had a ticket on Commander III, was looking for a job when news of their good fortune came.

Like the Binowitzs, the Marovichs weren't sure what they'd do with the money.

The Marovichs were under the pseudonym "Golden Nugget."

There's a long winter ahead, they say, so they're another topic for the hot-stove circle.

Just before the Max-Bear Joe Louis battle (as it was billed) the big California rancher declared:

"I'll come out swinging and I'll keep on swinging until one of us falls down."

So JUST SUPPOSE Max had roared out of his corner at the sound of the gong, his big arms flailing away at Joe Louis, and had kept on flailing and slugging.

What a thrill that would have been! For a change of 30,000 at the Yankee Stadium would have clattered on top of their heads and they would have been out of the game.

For a change of 30,000 at the Yankee Stadium would have clattered on top of their heads and they would have been out of the game.

Division of Millions Hinges On Result Of Race

NEWARK, N.J., Oct. 30 (AP)—Over the one and one-eighth mile race, the American-made, a drugged outsider, today won the 56th running of the Cambridgeshire and carried those who sold tickets on the race to unexpected riches.

Although runner-up to O. W. Waller, the American-made, the 12-year-old, dark-bay colt was only a 28-to-1 chance today to win the last major event of the English flat-racing season.

At the finish, however, he held a one and one-half length advantage over Mrs. V. P. Stansbury's 12-year-old, dark-bay colt, who was only a 28-to-1 chance today to win the last major event of the English flat-racing season.

At the finish, however, he held a one and one-half length advantage over Mrs. V. P. Stansbury's 12-year-old, dark-bay colt, who was only a 28-to-1 chance today to win the last major event of the English flat-racing season.

ROTARY DISTRICT GOVERNOR VISITS

Twin Falls Club Welcomes Oscar Speer of Provo on Tour

Oscar Speer of Provo, Utah, district governor of International Rotary, yesterday paid an official visit to the Twin Falls club and was greeted by an unusually large attendance including a number of visiting Rotarians.

In addition to the Mr. Speer's address, Dean E. J. Jennings of the Idaho College of Agriculture, also spoke briefly. The speakers were introduced by Bob Nelson, the club's president.

The district governor's remarks were built around the necessity of bringing the spirit of Rotary into play in every day life and in human relationships—not only in America but among peoples. He described a number of visits to foreign countries and the manner of acceptance of the principles of Rotary by foreign clubs. An extension of the Rotary code of friendship, mutual helpfulness, good will and understanding constitutes a platform upon which all countries may stand with benefit to the world at large, the speaker declared.

Mr. Speer will visit every club in the state before returning to Utah. He hopes to complete his itinerary this week.

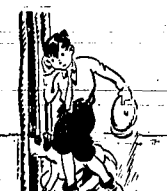

Rotary Governor

OSCAR SPEER of Provo, Utah, district governor of International Rotary, on a tour of official visits to Rotary clubs in Idaho, attended and addressed a meeting yesterday of the Twin Falls club.

FRED MANGELSON DIES OF LOCKJAW

Infection Developing From Recent Injuries, Takes Local Man's Life

Fred W. Mangelson, 48, Twin Falls, died from lockjaw at 11:10 o'clock yesterday morning at the Twin Falls county general hospital, where he had been admitted the day previously.

Mr. Mangelson was injured in an automobile accident in Utah approximately six weeks ago. Ten days ago he fell on the sidewalk, cutting a gash in his head. Later he developed infection, either from the previous injuries, or from the wound.

"I didn't know we had company till I found it and heard Mama utter her company tone of voice," on his head.

The body rests at the Drake mortuary chapel. Funeral arrangements have not been made, awaiting word from distant relatives. Mr. Mangelson was born March 3, 1887, in Utah. He was a member of the L. D. S. church.

He is survived by his wife, Mrs. Mangelson, and four children, Robert, and Betty—Mangelson—Twin Falls, and Venice and Maxine Mangelson, living in Washington. They have been summoned to Twin Falls.

DEATH CALLS AGED TWIN FALLS MAN

John P. Johnson, 91, Resident Here 22 Years, Dies at Home

John P. Johnson, 91, resident of Knoll and Twin Falls communities for the past 22 years, died yesterday morning at 10:20 o'clock at his home on Quincy street. Mr. Johnson, who was born in Sweden October 8, 1844, came to the United States at the age of 18, locating first in Illinois. He moved to Axel, Nebraska, in 1878, and to the Twin Falls section in 1913.

Funeral services will be held tomorrow afternoon at 2:30 o'clock at the White mortuary chapel. Rev. G. L. Clark, pastor of the Presbyterian church, will preside. Interment will be in Twin Falls cemetery. Mr. Johnson's wife, Mrs. Laura M. Johnson, died in April, 1930. He is survived by two daughters and four sons, Mrs. L. J. Malone and Mrs. Harrison Griffith, Rev. Johnson, Jay H. Johnson, Carlisle P. Johnson and Albert C. Johnson, all of Twin Falls.

ROOM MOTHERS FOR P-T. A. SELECTED

In anticipation of the first open house session of the high school Parent-Teacher association, high school advisers yesterday elected home-room mothers. Mothers who were chosen to represent the various home-rooms were: Madeline R. G. Bacon, B. C. Elder, P. Hawkins, L. O. Kirkman, P. G. McEwen, W. A. Poe, Ralph Smith, O. E. Weidner, C. H. Bond, W. L. Doss, G. R. Halpin, R. V. Jones, Marvin Mayo, A. R. Olson, R. J. Vallin, A. B. Hopkins, W. B. Smith, E. Wohlart, Roy Evans.
