Simultaneous Attack By Boches on Wide Front, At Any Moment, Is Anticipated

LIBERTY LOAN SUBSCRIBED BY THE PATRIOTIC

OFFICIAL FIGURES SHOW THAT THREE BILLIONS ARE EXCEEDED

Only Partial Returns Are in Yet

Hopes Entertained That the Maximum Sum of Five Billion Dollars Will be Reached When the Great Drive Closes Tonight.

WASHINGTON, May 4.—America has gone over the top again. Subscriptions to the third Liberty Loan today totalled \$3,066,888,900, according to the official statement of the treasury department, passing the minimum quota and getting a start for the maximum quota of \$5,000,000,000 which treasury officials hoped would be reached by the time the campaign closes tonight. The total announced today includes only partial returns from yesterday, believed to have been one of the biggest days of the drive, and as in the two former campaigns the closing days has resulted in a landslide of subscriptions. It was thought impossible that Secretary McAdoo's record maximum quota would be reached.

Justice Department to Investigate Aircraft

Administration Officials Declare Production is Up to All Expectations—Eighty Machines a Day.

WASHINGTON, May 4.—The department of justice will make an investigation of the military aircraft production. The president has gone over the whole situation very thoroughly with Senator Thomas, of the military, and the president is well satisfied that even though a separate investigation should be ordered, no fault would be uncovered. It was declared by administration officials today that aircraft production is now up to all expectations. Only a few days ago, one close to the White House said eighty machines were turned out in one day.

German Losses Were 4 Hundred Thousand

PARIS, May 4.—The German losses in the recent offensive are estimated at 400,000, by the correspondent of the Matin, who is at the front. German reserves are placed at 650,000. More than 100,000 were also killed. The Matin will be able to return to the firing line. The class of 1912 will provide 450,000 by autumn, this will be possible for the transportation of arms later in the campaign on the same scale only once more.

Violate Neutrality of the Netherlands

AMSTERDAM, May 4.—The Germans have violated Dutch neutrality by sending their troops to Antwerp through the mouth of the Scheldt river which has been closed. The telegram says: "The steamer was sunk" passing Flinsh.

LABOR TO BE TRANSPORTED TO FIELDS UNDER BILLY'S TERMS

WASHINGTON, May 4.—The eight-million dollar emergency food appropriation bill was favorably reported to the house this afternoon by the committee on agriculture. Besides appropriations for eliminating disease and insect pests the bill carries an appropriation of \$1,000,000 for the transportation of farm labor in the harvest season and of \$2,500,000 for the sale of seed to farmers at cost.

EIGHT GO SHOR COUNTY TO DRIFT ON MAY 5

BOISE, May 4.—Twin Falls will be calling on to send eight more men on the new selective draft bill received by Baker, from Secretary of War Baker, calling for 791 men for May 5.

Distributed by Jno. Cassel.

GERMAN PRESS TRIES TO ENCOURAGE PEOPLE WITH TALK OF RESERVES

BRACKENRIDGE REACHES THE FRENCH CAPITAL. A cablegram was received last evening by Mrs. L. L. Brackenridge from her husband, stating that he had arrived in Paris, in excellent health. Mr. Brackenridge was called by the United States government to go to France in Red Cross work.

MACKENZIE HAD TO BE COMING WITH IMMENSE BODY OF TROOPS

British War Office Says Over Drawn. Bad Blood Between Hindenburg and His Rival—Mackensen a Great Master of Artillery and His Coming Indicates Plans Misarranged.

TELEGRAPH OPEN TO SPIES SAYS UNION WORKER

STARTLING CHARGES MADE BY SEATTLE OPERATOR ABOUT SYSTEM.

Pro-Germans Discharge Loyal Men; Charge

Appeals for Immediate Confirmation of Systems and Displacing of All Civilian Traffic Officials From Control of Operations.

SEATTLE, Wash., May 4.—Disabling the telegraph system of the country is wide open to German spies and compelling for immediate confirmation by the government of all lines. F. J. Campbell, international vice president of the commercial telegraphers union, sent an urgent telegram to Secretary of War Baker today. The message says: "Seattle telegraph office wide open to spies. Notebooks pro-Germans in official positions, reading all messages. Pro spies; Schwab and Goetz firing all loyal Americans. More than 300 discharged. Same conditions prevailing all over country. "Private line solution of mystery of leaks to enemy, which may result sometime in disaster. "Call for immediate confirmation of telegraph system and operation under strict supervision of the government."

SITUATION IS HOPELESS IN EAST FOR HUN

SOCIALIST PAPER DECLARES COUNTRY HAS FAILED IN RUSSIA

Ukrainians Proclaim New Het

Fighting Breaks Out in Kiev, Capital of Province and Anti-Germans Gather Forces for Civil War in Province.

THIS HAGUE MAY BE THE SITUATION IN THE EAST

"The situation in the east is hopeless," says the Socialist newspaper Vorwaerts, of Berlin, in discussing the Ukrainian revolution. "The peace we signed, there is nothing to scare those who are still fighting. We agreed to leave Lithuania and Estonia with Russia but within three weeks we encouraged their union with Prussia. To Ukraine we promised protection; but we urged the members of its government. We would like to get broad from Ukraine, but when we see only enormous political divisions we wonder we are able to get even one piece."

AMSTERDAM, May 4.—At a momentary meeting of parliament in Kiev on April 22, General Skoropadsky was proclaimed head (leader) and was inaugurated before the cathedral of St. Sophia with religious ceremonies. A dispatch received here today.

The radio building, within which government troops had taken refuge, was attacked; the defenders retired after a short fight. General Skoropadsky now holds the city which is at least reports was again quiet. The Berlin Telegraph claims the disappearance of the original Ukrainian republic which was intended as a bid radio, according to dispatches received here today.

LONDON, May 4.—Fighting has broken out at Kiev, the capital of Ukraine, between partisans of the new Ukrainian government, and the old radio, according to dispatches received here today. The old radio is hostile to Germany, while those supporting the new government have been fighting with the German in Ukraine. It was recently announced that Germany had established a martial regiment at Kiev.

VIOLENT BOMBARDMENT OF BRITISH AND FRENCH LINES ON VITAL PARTS

Points Between Loree and the Ypres-Comines Canal South of Ypres Point of Special Attention—Flanking Operations of Huns Necessary If They Are to Capture City—British Improve Position in Local Fight at Around Hinges—French Make Successful Raid at Oise.

(Frank Charlton, I. N. S. Cable Editor)

The possibility was strong today that the next few days will see the Ypres area waging a great double offensive in two separate theaters of war for the first time since the world conflict began. There is increasing fighting activity along the entire Italian front, indicating that the long expected drive by the Austro-German armies in the southwest is about to break if it is not already under way. At the same time the violent cannonades that the Germans are carrying out along the Picardy and Flanders battle fronts in France made it evident that they are preparing for new and powerful thrusts against the allies in those zones.

For some time there have been reports that Germany was bringing extreme pressure upon the Austro-Hungarians to begin an offensive in Italy to lessen the allied pressure in the north and to prevent the Italians from sending any more troops into France.

The central empires are expected to put forth their extreme efforts in an attempt to break through on both fronts and to bring about a military decision within the next six or eight months.

There is no uncertainty over the situation in Italy. General Foch's authority now extends to that front and his armies are in readiness to meet blows at any points where they may fall.

The Italian positions have been strengthened during the long lull in the fighting on the southwestern front and forces of French and British soldiers are reinforcing the Italians at vital points in the mountains flanking the Asiago plateau and on the upper Piave.

German artillery has been showing great activity in the sectors of Nieppe forest and Meteren, (in France) about midway along the Flanders battle line.

There has been a comparative lull in the infantry operations in those zones for some time. The Germans making their pressure along the Franco-Belgian frontier, for the first time.

There was some local fighting around Hinges last night and the British improved their position there.

On the Picardy front the artillery has continued active on both sides and drum fire duties developed at some points.

This was the forty-fifth day of the German grand offensive.

PARIS, May 4.—There were heavy bombardments on the Picardy battle front during the night, the war office announced today. They centered along the Avois river.

The French made a number of successful raids near the Oise sector, (on the southern side of the German salient) taking some prisoners.

The text of the communique follows: "There were strong bombardments on the Avois river. The French carried out successful raids beyond the Oise river from Tiletta as far as Pomelle taking some prisoners.

"The Germans tried to make a surprise attack in the sector of Caclaire de Courcy, but it failed. Other attempts north and northeast of Rheims failed also."

(Frank Charlton, I. N. S. Cable Editor)

There were indications today that the Germans are preparing to make their next drive on the Flanders battlefield along a wide front, probably attacking in more than one sector; simultaneously.

Ground for such a belief was contained in the fact that the Germans began a very violent bombardment of the British and French positions on the vital part of the front between Loree and the Ypres-Comines canal south of Ypres, the scene of their big defeat last Monday, when they attacked vainly all day in an effort to dislodge the Anglo-French forces from a range of hills lying just west of the Scherpenberg-Dranoutre line.

If Hindenburg hopes to succeed in his strategy and to compel the evacuation of Ypres by a flanking operation these hills must be taken by the Germans. As the situation stands today they bar the Germans from the plain west of Ypres through which runs the Ypres-Poperinghe railway, a most important line of communication.

Loree, about which bloody fighting has raged intermittently for three weeks, lies about seven miles southwest of Ypres and just within the Belgian frontier. It is in the hands of the French and is a powerful position, being upon higher ground than that which the Germans hold to the eastward.

Floyd McGriff, (I. N. S. Staff Correspondent)

LONDON, May 4.—An intense bombardment was opened by the Germans this morning at the Franco-Belgian frontier. The official statement follows: "By a successful tactical enterprise the Germans have improved their positions between Loree and the Ypres-Comines canal south of Ypres, the scene of the violent battle last Monday, when the Germans were sharply defeated after repeated attempts to break the Anglo-French lines northward in order to bring a crucial attack on Ypres and compel the evacuation. The bombardment today indicates that the Germans are now using their efforts in that district. Loree lies just inside the Belgian frontier. The British improved their positions northeast of Hinges during the night. Two German machine guns were captured. The French carried out a successful local enterprise in the sector of Loree capturing some prisoners. The Germans have been showing in-

Read This Sweet Story of the Wonderful Results of CHIROPRACTIC

Below is one of many testimonials that heralds the dawning of a new day—a triumph for scientific methods applied to the relief of human ailments.

Read what a grateful patient says of the Miraculous restoration of her sight, effected by Chiropractic, as administered by Dr. Wyly of this city.

THE TESTIMONIAL

By Mrs. R. H. Rambo, Hansen, Idaho

On or about the 6th day of March, 1918, my eyesight began to fail me, and within four days I was blind in the left eye and the right eye growing very thin. In four days more I could scarcely distinguish daylight from dark and could scarcely see my way.

In consulted an eye specialist and he told me there was ABSOLUTELY NOTHING that could be done for me; that I HAD to go blind; and that my left eye was GONE and my right eye going fast.

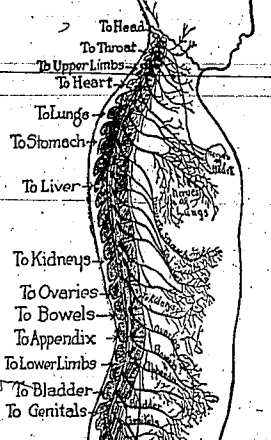

I was advised by a friend to see Dr. Wyly, THE Chiropractor of Twin Falls, and after giving me a very thorough and careful examination he held out hope to me, so I began at once taking his adjustments and mineral baths, and began to improve from the very first treatment. After three weeks of treatments my eyesight has returned and I now feel strong and well. I had been having numbness and cramping of the lower limbs, also heart trouble. Those conditions have entirely disappeared and I feel like a new woman.

I can not say enough for Dr. Wyly and his able assistant, Dr. Miller, and if this statement will be the means of convincing some one who is suffering as I was, to try Dr. Wyly's wonderful treatments, I will be amply repaid for making it.

Dr. Wyly found that my kidneys were in very bad shape and to that he attributed my eye trouble.

Hoping this statement will be of service to some one, I am most Resp., MRS. R. H. RAMBO.

Subscribed and sworn to before me this 20th day of April, 1918. (NOTARY SEAL) R. B. SMITH, Notary Public.

This is Mrs. R. H. Rambo, of Hansen, Idaho, whose rapidly failing sight was restored by the use of scientific methods of CHIROPRACTIC

RUBBER SAID TO BE FOURTH PRIME NEED OF ALLIES IN WAR

Without Aid of This Product in Various Forms Entente Would Be Slowed Up Almost to Point of Defeat, Says Manager.

"Rubber has been said to be the fourth prime necessity in the world war. Men, munitions, food and rubber—their importance ranks of they are named. The allies would be in a serious plight, without rubber in its various forms," says W. D. Albrecht, manager of the B. F. Goodrich Rubber Company.

"The progress of the allies would be slowed up almost to the point of defeat and thousands would suffer and die in European battle hospitals without the aid of rubber.

"America and her allies have a tremendous advantage over the enemy by having an adequate rubber supply. This advantage manifests itself in the air, on water, in the front line trenches and behind the lines in the hospitals. Rubber is indispensable in submarine manufacture; in airplanes and dirigible balloon construction; in the trenches the men must have waterproof clothing and rubber boots and the agencies of thousands of soldiers are affected by various rubber appliances.

"Armored motor cars, the new powerful weapons to be used on the extensive scale by the allies, are recently introduced on the western front—will not be used to any extent by the Germans, because of their lack of rubber.

"The success of the light armored cars lies in its ability to quickly and swiftly maneuver. Its development could have been impossible without the use of pneumatic tires. These armored cars, equipped with rapid-firers, are playing an important part in checking the present drive the Hun is making toward Antwerp. On being rushed to threatened parts of the front they have frequently helped stop large bodies of German troops. They furnish a remarkable steadying effect for the British lines.

"In checking the present drive itself a certain village filled with German infantry. The crew was killed with the exception of the driver

and one gunner. When the capture of the car need certain the gunner took his heavy rapid-firer to the ground, where he held off large numbers of the enemy until the driver was able to turn the automobile around. This done, the machine was thrown into the car and the machine sped away. Recent newspaper dispatches say that one of these Canadian motor cars held back an entire German battalion which was attempting to cross a canal. A battery of these cars is reported to have captured 100 infantrymen and held off until British tanks and guns were safely withdrawn, and then escaped themselves.

"Henry Ford, in a recent announcement, stated his company is now ready to turn out similar 'rubber-tired' cars for the allies.

"While the Prussian's ambulances, ammunition and supply trucks are slowly rambling along on steel tires, and newly devised spring wheels, American, British, French and Italian automobiles and trucks are swiftly carrying out their missions on flexible rubber tires.

"French officers, captured by the Germans and interrogated by the French, state that the Prussian officers immediately stripped them of every scrap of rubber, including the rubber from their shoes and clothing. In French rations it is ordered to thoroughly search the captured dunnage for 'Tommy's' sneaker football bladder. It will be remembered that the principal item of the Deutschland's cargo, on her return trip from this country, was rubber.

"Recently the B. F. Goodrich Rubber Company issued a warning in behalf of the war trade board, to thousands of American druggists, and indirectly large quantities of dental dams, sheet rubber and surgical supplies have been embargoed out of America and Germany by sailors, principally through Holland and Scandinavia.

"Rubber has served miraculously in the base hospitals on the Western front. American surgeons marvel at the wonderful strides being made by the Army Medical Corps. In these hospitals the surgeon and his assistant wear rubber gloves and rubber aprons; rubber blankets are used on the operating tables; many of the instruments are made of hard rubber; and the equipment of the hospital includes rubber syringes, hot water bottles, ice bags, air pillows, and many styles of surgical bandages. One of the most remarkable uses of rubber

In being put to its the repairing of facial wounds.

The irrigation of wounds, by perforated rubber tubing has saved thousands of lives. To military shoes, Snugglers' helmets are rubber cushioned. Summarize battery jars are made of hard rubber. Rubber is aiding in the prosecution of the war in countless ways.

Germans Lost Four Out of Five Men

(Attacks on Americans at Selchepoy on Toul Front Proved Costly to Soldiers of Kaiser)

Best Ford (I. N. S. Staff Correspondent.) WITH THE AMERICAN ARMY IN FRANCE, May 3 (P. m.)—The Germans in their big attack against the Americans at Selchepoy, on the Toul front, lost four-fifths of their number. It was learned from a German fleet Cross article who had been captured by an American patrol.

The German had assisted in casting the casualties and the bodies of the men to give correct information.

The conditions on the Toul front have been extremely inactive, less than 200 shells being fired by the loches in the past two days.

The battle of Selchepoy took place on Saturday, April 27, when 1200 German shock troops attacked the Americans. The Germans fought their way into Selchepoy and were driven back to their original positions.

IRELAND NATIONAL CAIERS MUMPS IN REICHTAG

COPPENHAGEN, May 3.—Count von Wrangle the German food controller, announced in the Reichstag that the present bread ration will be maintained, only it is stipulated that the ration of meat and potatoes imported from Georgia, Burns Ireland, St. John's, and Socialists, charged that army officers are relieving food and sending it home to their families. In Saxony the bread ration has already been reduced from 200 to 160 grammes.

NONE FROM IDAHO

WASHINGTON, May 3.—The practice of publishing the emergency addresses with casualties of the overseas forces was resumed today when the War Department announced a list of 216 deaths. Eighteen men were killed in action, five died of disease, two of accidents, and one of wounds. Two men are listed as missing in action, two were slightly wounded and fifty-eight were severely wounded.

SWISS SHOOTS HUN AIRSHIP

PARIS, May 2.—A German aeroplane was shot down by Swiss gunners near Basle, said a dispatch to the Radio today. The German aviator was captured.

SCOREBOARD REFLECTIONS (I. N. S. Sports Editor.)

Looney Lines
There was an old umpire named Murray who never was given to worry. But one day when the fans were out of the stands He got out of the park in a hurry.

Slim Love, who used to fall over his own feet, took an eleven fanning pastime from the Red Sox.

The Dodgers turned up today feeling unnatural. They got out of the cellar when Jack Coombs held the Phillies.

The Chicago Cubs won their seventh straight game against Cincinnati. Flack, Peckert, Merkle and Killefer did the heavy hitting.

Rube Henke's left handed argument was too strong for the Boston Braves.

In a Marathon race at Detroit the White Sox scored 25 hits and 19 runs. E.W. Hawks had something on the ball that the Pirates didn't like, and the Cards finally won.

Primes by George Burns figured largely in the victory of the Mackmen over Washington.

"Stuffy" Meltons is making good at third base for the Boston Red Sox.

He stands out today as an "exception" to the rule that transplanted players generally fail to display their best brand of baseball in a new position.

In sixteen games played by the Brandon aggregation to date, Meltons has fiddled perfectly. Not an error has been chalked up against him and he has accepted every sort of a chance at the hot corner.

What's more, Meltons is hitting the ball. The batting average up to today is .315.

Yet they said the Red Sox were making the home play of the stove league season when they permitted Larry Gardner to get away in the deal with Connie Mack, which left Boston without a third secker.

The critics predicted that Meltons would fall far short of the standard in trying to fill Gardner's shoes. But he has made good to date and Manager Ed Barrow says that after the

season grows a little older, there will not be a more highly polished third base guardian in the American league than "Stuffy."

At Wood, playing the outfield for Cleveland, made two doubles, which accounted for three Indian runs and beat the Browns.

George Morigize, star southpaw of the Yankees, announces he will quit the team to take a position with the Bethlehem Steel company.

The new international league is not to suffer the fate of DeJongham. The plan to take a position with the Bethlehem Steel company.

The major league is definitely announced today, and the international are making plans to go ahead with the opening of the season, May 8, unmolested.

TWIN FALLS, IDAHO

Senator Hiram Johnson Presents I. N. S. Case

Shows That Associated Press and International. Both Use Re-writes Matter of the Other

WASHINGTON, May 3.—Senator Hiram Johnson of California, this afternoon appeared before the supreme court to argue for the International News Service in the case brought against it by the Associated Press involving property rights in news. "There is an old proverb, 'We are masters of the spoken word and slaves of the spoken word,'" Senator Johnson declared. This is the essential point of this case. The argument of the counsel for the respondent we must admit causes a feeling of revelation in us, but the admissions

made by the respondent cause no indignation to come and the words of the respondent's counsel to become ludicrous." Senator Johnson reviewed the statements made by the counsel for the Associated Press in which he admitted that the Associated Press accepted tips as to the news carried by the International Press but always investigated them before sending the reports out. "I presume that the Associated Press, when the International News Service has an exclusive story from Kamchatka sends an expedition to investigate," Senator Johnson said, "but it is too easy to tamper in these days of news flashes and speed in newspaper making the telegraph editor taking from the wire information of news which International News Service carries and shouting it across the world to the re-write editor. This re-write editor then, making mental investigation before he writes the story is an easy matter to imagine. "The character of the investigation which they make is left wholly to the imagination. "One is being just what the other is doing. Perhaps in degree there is a difference, but there is no difference in design at all. "The creation of the writer if published and uncopyrighted, becomes the property of the world. Then any person who publishes it. "Senator Johnson's argument was interrupted at this point by the recess of the court for luncheon. "Fredrick W. Lammann," arguing for the Associated Press declared that news has a property right, which cannot be taken without injury. He pointed in just terms "the great injury done to the public" when the gift of news in an Associated Press article is published more against him than sent out by the Associated Press.

Tennis Assured of Good Season

Restoration of Championships and a New Crop of Star Talent the Reason

Star Velock, (I. N. S. Sports Editor) NEW YORK, May 3.—Tennis has come back this year in a way that is encouraging to sponsors and devotees of the game. "There are two distinct reasons for this. One is the restoration of championships, without which the game lacks much of its attractiveness. The other may be found in the rising generation of tennis players who are exhibiting in the most part in competition for practically every little while having throughout the country. Last winter many followers of the net game were predicting that tennis would figure as a back number of the field of sports until after the war. The United States National Lawn Tennis Association listened to the gloomy predictions made for the game and came through with a stroke by re-establishing all championship events and adding an event for girl tennis players with titles in the making. "The parent body realized, after experience gained during the 1917 season, that tennis without titles and stakes lacks the drawing power necessary to make it successful, for although much money was raised by the tennis associations in the United States and other war funds last year, the results were not as encouraging as they might have been. "The recent tournaments in New York for the national indoor titles nullified down the conviction that championships would be a thing of the past. There was greater interest in the indoor tournaments than ever before, and the competition was the keenest that has been seen in years. "The surprising showing of several young players of the calibre of Richardson, Gledhill, Hines, Gifford and Donaldson has had a stimulating effect. The veterans, too, have shown signs of new life with the restoration of little play.

EDITORIAL NOTES

BY ARTHUR BRISBANE

How much is the United States worth? "What security have you when you invest one hundred or a million dollars in Liberty Bonds? "The present case of this nation's property, if it were sold tomorrow at a fair price, would be, according to Government statistics, at least one hundred and fifty thousand million dollars. "This sum does not include undivore gold mines, oil wells and other valuable property, of course, many thousands millions. And it does not include the real value of vast unworked tracts of land.

When you buy a bond you buy of first mortgage on two hundred and fifty thousand million dollars of property—very good security. The total issue of war bonds thus far in America is eight thousand million—leaving Uncle Sam with a balance of at least two hundred and forty thousand million for emergencies.

The Germans have borrowed for the war seventeen thousand million dollars—and it must be admitted that they have done wonders with it in the way of making the money go a long way. "If Germany can still raise billions after fighting for four years, this country ought to be able to raise a little money at the beginning.

Here's an interesting "judicial" decision, which, fortunately, doesn't deal with the Government's property. **The Santa Fe** **New Mexico** **Attorney General** **Attacked** **an energetic newspaper**, a local political boss and one of his assistants. "The court has ruled that these politicians used the newspaper for libel, and the editor, representing the public, very properly carried his crusade against the politicians.

Now comes from a person called Justice Mechem an order declaring that the newspaper is not to be prosecuted. "Because," says the judgment, "this newspaper while has been conducting a campaign against vice or corruption must be allowed to continue to do so as well-founded, by any one, based on the charges made in the course of the newspaper's campaign." "Would it not be pleasant for public morals, big and little, if this learned doctor were to let his great High Court the Sherman antitrust law establish a forty million dollar estate for the benefit of the backs of the shippers.

It seems improbable that the Sherman law, which is so broad and general, as it is, would be applied without the knowledge and consent of Mr. Mechem, who, however, while carrying out his great High Court's duty, what it is to fight a selfish monopoly. "The act of forming one big trust to exploit a monopoly, express con-

Justice Mechem, what the policeman is to the little burglar, the honest newspaperer for instance, the Santa Fe New Mexico is to the bigger criminal that the police cannot reach—sometimes because the bigger criminal controls and appoints the police force—or even the judge. "A newspaper is a policeman, although learned justices forget it sometimes. "The Santa Fe New Mexican, of course, will continue to tell the truth about the man that it accuses, and somewhere higher up the ladder a judge will be found to tell Justice Mechem—though, of course, without questioning his apostle's purity—that he is mistaken in the notion that public enemy may use a judge and a libel suit as convenient tools to smother accusation.

—Because the old gentlemen who established this country realized the importance of the press as a police force, the Constitution carries a provision about liberty of the press. "This provision cannot be not made over by learned justices, who believe that freedom of the press is not a serious matter between friends. "The newspaper of itself is nothing but a newspaper, a tool, a tool of the national police force, watching public servants, from judges on the bench to political bosses that often choose to be judges—and wisely.

The best enemy of the Kaiser in the world offensive is the marvelous French artillery, eroding the force of any other nation, and sending Germans in tons of thousands to the front. "The war will cease to interest them. "The work of French gunners is the most important part of the allied effort, not except the thinking and planning going on in the brain of Foch, commander of all the allied forces.

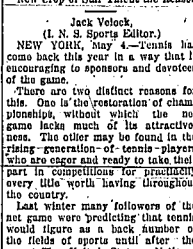

Mr. McAdoo has taken over the reins of New York state, including the Erie barge canal—which is good Government work. "Under Government control which represents the people and will be followed by Government control, canal-railroads will be used by the railroads, not fought by the railroads.

Mr. McAdoo orders "several hundred steel barges built as rapidly as possible." Before the end of the year the Government will have to do their share of the freight carrying. "This tells the story. The difference between private ownership and Government ownership is made clear. "If this is not an ideal notion it will not permit the railroads at any time to go back to incompetent, dishonest, selfish, and ignorant private ownership.

This is a good place to mention the fact by the way that in the absence of Government control, an effort is made to build up a shipping company monopoly that would have carried out his great High Court the Sherman antitrust law establish a forty million dollar estate for the benefit of the backs of the shippers. "It seems improbable that the Sherman law, which is so broad and general, as it is, would be applied without the knowledge and consent of Mr. McAdoo, who, however, while carrying out his great High Court's duty, what it is to fight a selfish monopoly. "The act of forming one big trust to exploit a monopoly, express con-

police man arrested a burglar and commenced telling the truth about the burglar. Suppose a shyder lawyer stood up and said, "Your Honor, I am suing this policeman for libel on behalf of my client, the burglar." "Would you, Justice Mechem, say to the policeman, "Don't you dare continue your accusation against that burglar. He is suing you for libel, which is all that he is concerned with. If you are anything more against him I shall put you in jail for contempt of court?" "Justice Mechem, what the policeman is to the little burglar, the honest newspaperer for instance, the Santa Fe New Mexico is to the bigger criminal that the police cannot reach—sometimes because the bigger criminal controls and appoints the police force—or even the judge. "A newspaper is a policeman, although learned justices forget it sometimes. "The Santa Fe New Mexican, of course, will continue to tell the truth about the man that it accuses, and somewhere higher up the ladder a judge will be found to tell Justice Mechem—though, of course, without questioning his apostle's purity—that he is mistaken in the notion that public enemy may use a judge and a libel suit as convenient tools to smother accusation.

WESTERN SHIPBUILDERS MAKE GOOD ON CONTRACT A PACIFIC PORT, May 3.—With a launching yesterday, local builders of wooden ships lived up to their folk. They would have an even score of wooden cargo carriers for the Emergency Fleet Corporation in the water by May 1. The Columbia river basin shipyards, situated on the Willamette and Columbia rivers, have turned out to date twenty carriers of 4,000 ton capacity each. The Government, however, the vessels are already loaded.

TO ALL "TIMES" SUBSCRIBERS

The Mid-week and Sunday editions of the TIMES in the late past have been favored with a large and rapidly growing list of subscribers. Having determined to change from three to six issues each week...

TO ALL "TIMES" ADVERTISERS

Although the consolidation of the "Twice-A-Week" and the "Sunday" Times subscription lists will give a larger circulation than was before reached by either edition, the advertising rates will remain for the present as per the "Twice-A-Week" schedule.

It will be necessary that all display advertisements be filed not later than the night preceding the day on which they are expected to appear; and any other advertisement must be in hand by 9 a. m. of publication day to insure its appearance.

THE DAILY TWIN FALLS TIMES

Published Every Day Except Sunday by the Times Printing & Publishing Company

News of the World to the Hour G. H. Lapsley, General Manager J. D. Whelan, Associate Editor

(Entered at the Twin Falls post-office as second class matter as a daily publication April 11, 1918.)

The TIMES is an independent Democratic newspaper. It does not know no politics as opposed to the most united and vigorous prosecution of the war that is possible.

ACME OF LOUBROUSNESS

The land of war is the United States Senate and the center of this home of misery is the committee on military affairs.

Again it comes back to the proposition that men do not deliberately misrepresent facts, ordinarily, without some motive.

Reporters in Washington the day when the first investigation started said that the majority of the committee began smarting under criticism.

We have Senator Lodge declaring that only two ships had been completed at the government yards; denying of a "technicality" to protect them from the charge of lying.

committee. In the second place, when he is called upon to account of the crusade of systematic misrepresentation, it would mean that the influences at work would weaken the administration and help destroy these ideals that give them so much concern, and would be a notice to any honest man who would take his place that reputation, honesty, hard work and efficiency would be no protection.

The Hindenburg, these forces attack on one side at a time. For before the war, the same organs and same statements poured vituperation from the same foul vessels on Secretary Daniels. They failed—and the navy will prove the pride of the nation because they did. The war secretary will prove himself likewise satisfactory.

REPUTATION HURT BY UNJUST CRITICISM

The Salt Lake Tribune, the leading Republican newspaper of the international region, points out the injustice done to our reputation abroad among the allies by the deceptive statements made regarding our work by senatorial forces of President Wilson.

Quoting several British comments on some of these speeches it says: "Undoubtedly these writers accepted a few bits of detached political criticism, a complete and accurate picture of the war."

Ships are being launched from our ways every day, and yet the British—who depend upon statements in congress for their information—are leading the British public to believe that only two cargo boats have been launched.

There are being launched from our ways every day, and yet the British—who depend upon statements in congress for their information—are leading the British public to believe that only two cargo boats have been launched.

A SCORE OF REASONS FOR THE RED CROSS It is Playing a Big Part in the War for Democracy.

What does it mean to you to know that the American Red Cross is supporting 30,000 French children. Sends supplies to 3,423 French military hospitals.

Kindergarten to Open in H. S. May 27 Miss Ethel Jane Tuttle, a Graduate in the Work, WPH Canada Tolt's School

Miss Libbie Jane Tuttle will open a kindergarten school in the high school building Monday morning, May 27. Her school will be open to all children under school age.

ALL THE NEWS ALL THE TIME

There are just three great corporations furnishing daily news service to papers in the United States. Of these the Associated Press is the oldest, and still stands first, although in some departments its work has been—and is being—excelled, especially so in the foreign field by the International.

ALL THE NEWS ALL THE TIME

When You Repair Tires You Can Be Sure That The Work Will Be Well Done. SAVE YOURSELF a lot of trouble—Get your "shoes" and tubes vulcanized under a guarantee that you are getting perfect repairing as well as the best service that efficiency at high pressure can produce.

IMPORTANT TO ADVERTISERS

Advertisements will reach those who read them. The TIMES prints and circulates OVER THREE THOUSAND COPIES EVERY DAY.

Edelbute Relieved Idaho to be Scattered

That Colonel Edelbute had been relieved of the command of the Idaho forces, that the boys would be widely scattered shortly and that they were all delighted at the reception of two packages of "smokes" from the Twin Falls band, were facts stated by Captain P. W. McElberta in a letter dated "somewhere in France," April 14, and received by his wife last evening.

NEW YORK, May 4.—Commercial

PERSONAL PARAGRAPHS

Mr. and Mrs. A. R. Brander are absent on a trip to Portland, Oregon.

Paul Yager of Plover, Idaho, left for Boise to attend to business trip, expecting to be gone about sixty days.

Between terms of court at Albion and Rupert, Judge Babcock and Court Reporter Brant are spending Sunday at home here.

Rev. C. L. Dent goes to Buhl Sunday, at the request of the district superintendent in connection with special church extension work.

Mr. J. H. Wise started for Washington Thursday for the purpose of appearing in the United States Supreme Court. He expects to be absent some two weeks.

Church and Lodge W. S. S.—The county director of W. S. S. accompanied by John W. Jesse will start next week stamp societies in the churches and lodges next week.

Visited Her Son—Mrs. John McQuinn of Plover, Idaho, visited at the home of her son, D. D. Alvord, on her way home from California.

The Complaint against Mr. William Tarr for selling cigarettes to minors, as previously noted, was tried yesterday before Judge Alvord and resulted in a finding of guilty, upon which the court assessed a fine of twenty-five dollars and costs.

Kiddies Entertained. Did not overlook the program, published in another column, of the kiddie entertainment given by the grade pupils of the Washington School, at the Idaho theatre Friday afternoon, May 10. It is under the direction of Miss Grace Bryant, supervisor of music, and the entire net proceeds are to be given to the Red Cross.

It is a pleasure to acknowledge the receipt of the prompt action of the large number of subscribers to the Saturday issue of the TIMES by securing a present subscription to the TIMES. There is still a month left in which to take advantage of this opportunity, and all who can possibly do so are urged to do so at the earliest possible moment. It is a pleasure to hear of the arrangement as they may desire, what ever that may be.

Two Little Wives—A girl of two years and three months and another of seven years—Isabelle and Delilah—were taken to the Idaho theatre some surroundings at Plover yesterday by Probation Officer Allen and brought from Idaho to Plover, Idaho, where they are being cared for at Cottage Inn until they can be placed in good homes. They are a pair of very attractive girls, whose mother is dead and their father is now in some Nevada mining camp.

A Piffle Case—A little child, only two years of age, has for some time been in charge of the county authorities. The child is a physical wreck and is being cared for in one of the homes will take charge. Her father, whose name is Peterson, and who is now in the hospital, has been advised to the Plover hospital and it is believed that he will be able to do so.

Under these circumstances Judge Alvord yesterday afternoon issued a writ for Peterson's arrest, upon the theory that "birds who can sing and will not sing, should be made to sing."

Mr. Frank Griffith, one of the pioneers of the district, was buried from the Plover cemetery yesterday afternoon. The Modern Woodmen were in charge and Rev. G. E. Bond officiating minister. A very large company of friends and neighbors being in charge and Rev. G. E. Bond officiating minister. Mr. Griffith was a resident of this district thirty years last past and was a man who was respected in all the relations of his life. He leaves a widow and one daughter. One brother, from Fort Collins, Colorado, was in attendance at the funeral.

High School Musical—The complete program of the first regular concert of the high school orchestra and chorus clubs is published in another column herewith. Much more extensive attention to music has been given in the high school under the competent leadership of Mr. Charles and Miss Simpson, of the Plover. The program of the band and orchestra, while Miss Simpson has trained the club, the result will be placed before the public in the auditorium Friday evening, May 10. And the TIMES can confidently predict that this concert will be a very welcome addition to the major events of commencement week, both here and in the Idaho.

On J. S. Marshall, team, which was in the Boise high school on the diamond yesterday afternoon, was this noted in advance by the "Statesman." "Twin Falls" is the name of the team in the southern end of the state. It has defeated Plover in 11 to 0, and at Twin Falls 15

to 2." That's just what the matter: Our boys have not met a real base ball team during the season. They have been playing against teams with practice and experience, anything could be expected of them. We have on line on the Boise team, especially the "Twin Falls" team, a number of games that appear to be more or less to have been close to a tie. It is a pity that no one has contemplated one game yesterday and another today. The fact that yesterday has been heard from yesterday's game is a pity that no one has contemplated one game yesterday and another today. The fact that yesterday has been heard from yesterday's game is a pity that no one has contemplated one game yesterday and another today.

Very Fine Display. H. S. Vocational Work

The Annual Vocational Display of the Twin Falls High School, held Friday Afternoon and Evening Sec'd a Grand Success

In the manual training room, one saw many fine pieces of furniture—pedestals, book cases, brackets, tables. The cooked foods presented quite a different appearance than formerly, as everything was more on a "no waste" basis. The display was found in the kitchen very attractively arranged.

During the afternoon the High School orchestra gave a splendid concert in the auditorium, the band taking part in the program. A large number of friends and patrons of the school attended each session and many compliments were paid the fine work shown in all the different displays.

In the agricultural department was shown a complete butter making apparatus, a cream separator, a wash water—transformation of wheat to flour, a manual flour—display of cereals and grains and things pertaining to a house of trained farm life. A very complete display of work done in the rooming class was shown in the rooming class.

Books written in French, compositions and translations done by the class in French were seen in the library.

In the commercial department was shown a long list of names of the winners of Palm certificates for penmanship in the school. Miss Ruby Hughes holds the honors with sixty-two words in one minute.

The Curry Schools Fine Entertainment

A representative of the TIMES attended an entertainment given by the pupils at the Curry school last night. The building was crowded to the doors. The entertainment was given by the pupils at the Curry school last night. The building was crowded to the doors. The entertainment was given by the pupils at the Curry school last night.

On Tuesday evening Mrs. Zelma Larmore and Miss Ruth Glasgow entertained the members of their Sunday school class of the Presbyterian church at the home of Mrs. C. E. McClain. Plans for a picnic, which will be held in two weeks, were presented. The afternoon was spent doing Red Cross sewing. Six members were present.

On Tuesday evening Otto Williams entertained in honor of his brother, Virgil, who has been confined to his bed for some time. The evening was spent in the refreshment room. The evening was spent in the refreshment room. The evening was spent in the refreshment room.

Honoring Mrs. Mrs. M. A. Patterson, Mrs. M. C. Mitchell entertained at an enjoyable Kennington on Thursday afternoon. Decorations of patriotic nature were used, with many color schemes were carried out in the refreshments. Present were the hostesses, Mrs. O. Grande, Smith, Simpson, Gamble, Barrie and Sweet.

The military society of the Presbyterian church held its regular meeting on Thursday afternoon at the home of Mrs. O. D. Duval. Mrs. Fred Ramsey and Mrs. G. M. McCall were the hostesses. The evening was spent in the refreshment room. The evening was spent in the refreshment room.

On Friday evening Mr. and Mrs. Austin Thomas delightfully entertained the members of the Presbyterian choir at their new home on Eighth avenue. The guests enjoyed a delightful evening of singing and refreshments. The evening was spent in the refreshment room.

Falseness of "News" as to the I. N. S. Conclusively Refuted

No one should, and no sensible person will, object to fair competition in business, be it never so sharp and active. But the attempt to injure a business competitor by deliberate and malicious lying, of which the subjoined from yesterday's "Twin Falls News" is a conspicuous example, is certainly the lowest and meanest of all unfair methods.

"Since the International has been denied the use of the cables in allied countries it is of course obvious that necessarily compete its use of the other fellow's news if it is to continue to function as a news distributing agency."

The above statement is an unqualified lie. This is the first time that the "News" has had the courage to directly utter the falsehood which has been industriously spread by an agent who lies about this paper—receiving, when he can get it, a commission which the public has been unreasonably informed of last week \$2.50.

It is true that I. N. S. was once denied such service at a time when an effort was made in allied countries to force an unwise censorship regarding war news; at which time, for giving too free publicity to facts from the front, the Paris newspaper owned by the present prime minister, Clemenceau, was also censored by the French censor.

The simple admission of the lying statement of the Twin Falls "News" is amply proven by the fact that the TIMES daily contains dispatches from correspondents in France and London, signed by them.

A partial list of the famous correspondents now in Europe for the International News Service, sending the latest news from allied countries by cable was published in THE TIMES Monday. In the teeth of this fact, which the "News" lacked the courage to question, even with its unimpaired gall and audacity, it calmly makes another false statement which implies the same thing.

Having proven that the "News" in this case attempted to pervert a simple lie, evidently for the purpose of halting the business of a publisher which it lacks both the facilities and ability to meet on the ground of fair and honorable competition, THE TIMES for the first time deems it call attention to the matter of the circulation claims of that sheet. The "News" invites comparison. On their "false in one, false in all," the exposure of "News" methods of trying to hurt its competitor would lead to the conclusion that it has not failed to secure the services of a circulation liar, whose activities are on a par with those of its editor, and as the statements about the I. N. S. are not bona fide, it might be well for business men, who do not desire to contribute to moribund institutions to take advantage of the invitation to make comparison by actual investigation.

With reference to the "News" comment on the Associated Press sale, it is asked the reader—whether through conscious malice or from force of habit it is hard to say. One thing is certain if the I. N. S. are really unreliable, THE TIMES is not the paper in Twin Falls which would be subscribing for it!

The Society

Mr. W. E. Wagner will entertain tomorrow at an 8 o'clock luncheon.

The Country Women's club held its regular meeting on Friday afternoon at the home of Mrs. C. E. McClain. Plans for a picnic, which will be held in two weeks, were presented. The afternoon was spent doing Red Cross sewing. Six members were present.

WHAT IS WORSE THAN WAR?

Consumption Four Times More Deadly Than Bombs and Machine Guns.

Pierre L'amp, a French Medical authority, estimates that of the 38,000,000 people who are still living in France 4,000,000 more die of tuberculosis. The war will have killed about 1,000,000. This means that man with all of his inventiveness is far less efficient than Nature as a man killer. There have been over 400,000 new cases of consumption in France since the war began. This is why, despite the number of new hospitals, there is still a great need for available tubercular cures.

The Question of Pension. Of course, that consideration is according to the ever popular wounded men. They file for pension of the consumptive soldier. With the new cases coming in daily from the trenches the consumptives are not as well cared for as the wounded men. When discharged from the army the severely wounded are allowed a pension by the government. The consumptive, however, receive no allowance unless they can prove that their illness is entirely due to their service in the army. This is not an easy thing to do, and consequently comparatively few consumptives receive governmental assistance.

Until the American Red Cross began to extend its aid the plight of most of these men was often pitiful. When discharged from the hospital they are given certain instructions which would eventually bring them back to health. But conditions are hard. They are usually unable to earn much and so do not get proper or even sufficient food. Very often they are in no condition to look after themselves, still to safeguard the health of others they are often sent to sanatoriums where they are given certain instructions which would eventually bring them back to health.

ONLY THREE KILLED IN ACTION IN LIST TODAY

WASHINGTON, May 14.—A casualty list of eighty-six names that will only show three killed in action was announced by the war department today. Five men died of wounds, eight were killed in action, and was drowned, and four were the victims of accidents. One man is listed as missing in action, fourteen were severely wounded and fifty slightly wounded in action. None were Idaho boys.

DEWINTER-WALLOP FALLER TO AFFAIR LAST NIGHT

ST. PAUL, May 14.—Although Jack Dempsey of the Pacific coast was given the popular designation of "Billy" because of his size, the St. Paul boxer last night, there are those who were saying about that much wanted punch of Dempsey. Some critics at the fight felt that Dempsey showed more power behind some of his punches, he might have put Mike to sleep.

Automobiles, Tractors and Good Roads

Best Method to Stop Your Auto

The owner of a motor car should school himself to take more room in which to stop. The best method of stopping an automobile is to leave the clutch in and take the foot from the accelerator, applying the brake gently, which about two car lengths from the spot at which it is desired to stop, releasing the clutch at about five miles per hour, or even less, so as not to stall the engine.

Contrary to popular belief, this application of the brake with the engine in gear does no harm whatever, if the throttle is closed to the idling position.

Ship Automobiles in Gondola Freight Cars

"If you can get them out we will put them in," is the promise of the Cadillac Motor Car Company, to its dealers, with reference to making shipments in lightened gondola freight cars. There are now available for motor car shipment, with the coming of spring and the release of many cars of this type which carried coal all winter. Practically no automobile freight cars are available.

So far 22 light and gondola cars, carrying two automobiles each, have been sent forward from the Cadillac factory. A larger number of dropped gondolas, which are much more simple to load and unload, have been used. For the loading of the light and gondola cars, the company has devised special lifting cranes, and on the automobiles—special attachments—by which the full chains are attached, cloth covers and tarpaulin protect

and a substantial wood framework is built around the enclosed types which are shipped in gondolas.

The drive-away remains the most simple and satisfactory solution of the problem of getting automobiles from the factory to dealers' territories which are within driving distance. Distributors are organizing themselves efficiently to handle drive-aways. Between January 1 and April 5, a total of 528 cars were driven away from the Cadillac factory. Calculating two automobiles per freight car, and allowing 215 cars for shipment of other goods.

Fairbanks Boosts Bonds in Haynes

When Douglas Fairbanks was in Chicago recently on his \$2,000,000 errand for the Third Liberty Loan, his million dollar grin was pitted through the cheering throngs of Chicago's admirers in a Haynes "Fourdore" roadster.

"Doug" showed his disdain of doors however. Immediately on arriving in the windy city, he went to the top of the four wide open provided in the Haynes roadster, with the same vim he went after bond sales to lick the haters. And that was his method of getting in and out of the car for the day.

Dancing on the uncompromising top cover of the Haynes "Fourdore" with his unique antics, he smiled, shouted and otherwise exhorted the crowd to get down into their patriotic pocket-books for the job. At a Liberty Bond station on La Salle street, Chicago's "Wall street," he led the crowd in singing "Over There" to the accompaniment of a Jack-in-hand. He magnificently a rousing appeal from his vantage place on the Haynes top cover, to

the crowds which blocked the street, and invited them to come inside the Liberty Bond booth and buy bonds from him for the next hour. He signed the receipt.

At the end of a great day for liberty, Fairbanks said in talking with H. E. Doty, Chicago branch manager of the Haynes Automobile Co.: "I enjoyed every minute in Chicago today going over the top for the good old Liberty Loan by going over the top of a good old Haynes. That now Haynes 'Fourdore' is one of the million cars I've ever handled. As you will notice I don't use doors myself, but those four doors are mighty handy for those car-riding folks who enjoy sticking to the terra firma more than I do."

Automobile Valuable Among Canadian Farmers

After 2 1/2 years in the war, Canada's attitude toward the automobile and its many business uses is particularly interesting. Judging by the sales of Willys-Overland cars in Canada, the automobile has become more necessary than ever before.

At a recent meeting of Overland dealers in western Canada, a prominent editor of one of the farm publications voiced the sentiment of the situation when he told of the numerous ways Canadian farmers are making use of their automobiles to help win the war.

"Give the Canadian farmer the alternative of buying a \$1,000 car or a \$1,000 war bond and he takes both," he said. "There is no farmer here who is fighting it. Take it thousand dollar car. Today it represents about 500 bushels of wheat. The result of a fair crop from twenty-five acres. This represents about 1 1/2 days work in actual seeding. The motor car must save only a very little time to allow the farmer to seed this 25 acres which might otherwise be fallow. The farmer figures that there is a demand for every bushel of wheat he can produce with the aid his automobile gives him. But he knows that there is no chance to sell any

what he cannot grow, so he buys the car, cultivates extra acres with the time he can save and buys year long with the surplus, which you'll agree is the best kind of patriotism.

"This man gave many practical examples of the ways in which the farmers of Canada are using their cars. One of the incidents pointed out was the shortage of horses, making the use of automobiles imperative for the farmer who could not spare any teams from the farm."

Willys-Knight Taxicab Cuts Cost 50 Pct.

It has been said that the proof is in the pudding is in the eating. This is particularly true in the Willys-Knight taxicab. For while they receive the hardest service where dependability is essential, yet they do positively improve.

A striking incidence of this ability to continually give satisfactory service is shown by a recent report from the Sioux Falls Taxicab Co. These people have had an opportunity to test out the Willys-Knight taxicab by having one in their service which has already covered a distance of 35,000 miles.

While we have not attempted to keep any accurate cost figures, they said, "the Willys-Knight is giving us the best service of any car we ever used. It is always ready to go and is big favoring among the drivers."

"From our experience with the car, we feel perfectly safe in estimating its running cost at 20 per cent less than any car in the service."

Rust-Falls Victim to This Solution

Make a solution of one part sulphuric acid to ten parts water and dip in it the parts from which it is desired to remove rust. Heat dip them in a bath of hot lime water and keep them in it until they have become so hot that they dry immediately on being taken out. Then rub the parts with dry bran or sawdust and they will be found to be perfectly clean and may be treated with fireproof paint, blue or nickel.

CLOSE-UPS IN SPORTSDOM

Alan Mackley (I. N. S. Staff Correspondent). NEW YORK, May 3.—The Prankness Handicap, which will be held by the Maryland Jockey Club at Pimlico during the May meeting, will be a \$15,000 race. It is already attracting the best thoroughbreds in the country and many of the most notable from across the seas.

Wills Sharp Kilmer's Sun Brar is probably the best known of the foreign horses that will enter the race. For this prize contest of the Maryland racing season there have already been 144 entries, and 100,000 number-birds are imported thoroughbreds.

Ever since France and England entered the war there have been coming to America from time to time many horses which never would have reached here had the war not been in peace. Some of these horses are owned by foreign horsemen, while others have been bought by horsemen of this country.

Several authorities have predicted the winning of both the Kentucky Derby and the Prankness Handicap by imported blood. These two races are the two richest in the country. Some of the most popular horses in France and England made poor showings when they first started on the tracks in the United States, but after getting acclimated they have led noble fields to the wire.

Among the best of the imported horses in the entry list are Sun Brar, Nohors, Scepter, and Joseph A. Murphy, Man 'o' the Hour, Foreground, Bonnie Danco, Exchange, Col. Cliff, Grey Eagle, Dublin Mar, Mary Stuart, King Arkins, Sunland, Nutcracker, Gertrude K., and War Cloud. All of these thoroughbreds attained fame on American tracks as two-year olds last year.

COUNT SCORES PERSONS GUILTY OF FLIRTATIONS

ST. LOUIS, Mo., May 4.—Men and women who satisfy their love of adventure by what they consider a harmless flirtation with the opposite sex, furnished cause for philosophizing by Judge Grimm in a decision to divorce suit filed by Samuel Blackshaw against his wife, Belle. He was granted a divorce. Mrs. Blackshaw's appeal for a new trial was denied. Mrs. Blackshaw was accused with intimacy with an attractive gardener in over Grove Park here.

Judge Grimm warned that no woman could reasonably expect her husband to "cling to her" if she proved herself indiscreet.

HOLD FIELD MEET TODAY

WASHINGTON, Pa., May 4.—The championship intercollegiate field and track meet of the Washington and Jefferson College is being held here today. More schools and athletes are entered than in any previous meet here.

PIG BRINGS \$3,000

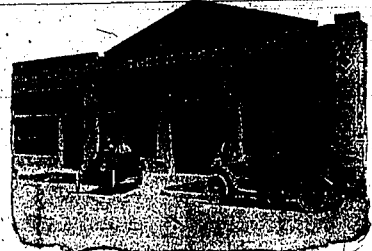

INDIANAPOLIS, May 3.—Miss Chapman owns a pig that's worth more than its weight in gold. "Miss Liberty" Infant Tail-blossom, a prize she knocked down at auction at a Rotary club luncheon and Chapman put up \$3,000, to be invested in Liberty bonds for the nation.

HOW ABOUT LONGEST UNWEDDING?

UNIONTOWN, Pa., May 2.—George H. Chadwick in thirty years of married life had never been away from home over night until recently, when service on a murder jury broke his record.

YALDEN HISS AT \$10,000

NEW YORK, May 2.—A "very" much intoxicated gentleman named Miss Eva Brayley Clifford in a Billings Hotel in New York City, she says the kiss is worth \$10,000 and is suing the hotel for that amount.

Paul, of, in and to the follow-

High School Presents New Musical Feature

Following Very Attractive Program at School Auditorium Evening of May 10, the New Feature of Commencement Week

On next Friday evening, May 10, at 8:15 o'clock, the High School Orchestra and Glee Club will give their first annual concert in the high school auditorium. This annual concert will hereafter take on a feature of the Commencement.

The High School Orchestra, under the instruction and direction of Mr. H. G. Lindor, of the High School faculty, is conceded to be the best orchestra in the history of the High School, and has won respect among the high schools of the state.

The High School Clubs have been instructed and trained by Miss Josephine Simpson, of the High School faculty. The plan during the year has been to meet for Glee Club work in small groups and for individual instruction each day and at least frequent periods for general chorus work. The plan has worked effectively and the results have been very satisfactory.

The program for the concert on Friday evening, May 10, is as follows: Miss Jessie C. Simpson—Director of Glee Club.
Mr. H. G. Lindor—Director of High School Orchestra.

- PROGRAM**
- 1 March, "Stars and Stripes Forever"..... Sousa
 - Humoresque..... Dvorak
 - 2 (a) The Secret..... Woodman
 - (b) Pilgrim's Chorus..... Wagner
 - (c) Old Kentucky Home..... Foster-Hood
 - Girls' Glee Club
 - 3 Overture, "Lustspiel"..... Keler Bela Orchestra
 - 4 Song Group..... Selected
 - 5 Trio, Cornet, Clarinet and piano, (a) Second..... Feltz
 - (b) "Hear Me Norma"..... Bellini
 - (c) Vernon Walters, Mr. Lindor.

 - (b) Italia..... Holmberg Donitzel
 - (c) Flag of My Heart..... Ferrati
 - 13 Star Spangled Banner and Glee Chorus, Orchestra, and Audience.

restor has one night a week and I have led the singing for a number of these religious services. The program entertained the boys on singing nights with songs and stories and it is a most interesting and delightful work for they are an appreciative lot. It would stir the blood of any good American to look into the faces of our young men clad in their khaki suits singing these songs of fire and blood, and all of them so eager to get across into France. You will pardon me for saying that I have had some flattering offers from the other camps of the south, principally at Fort Worth, urging me to come for six months at least. The last offer for me made me was \$100 a week and all expenses until the first of November; however, I am planning to make this my headquarters at least for the present.

I do not know when I will return to Twin Falls, but hope to at least make a visit the latter part of the summer. One of the interesting features at the work here is the community concerts which are given every Sunday afternoon in Hattiesburg. I have been singing for these and yesterday, as you will note from the clipping which I enclose, Mrs. Butler was on the program also. The only difficulty about the concerts is to secure a building big enough to accommodate the folk. Hundreds of soldiers were unable to get in yesterday and they are certainly an enthusiastic crowd to sing to.

My address here is, care of the Misses, Miss W. C. College. Give my regards to the folks and believe me always,
Faithfully yours,
CHARLES DUTLER.

The most popular coal on the Twin Falls tract is H-HEAT, free from clinkers and will not slack. We advise the coal consumers and our many patrons of H-HEAT coal to place their storage orders with us within the next 60 days, as the mines are apt to advance the price in the near future. By ordering your coal now you will avoid any danger of having to buy cheap coal later on, which is dear at any price. Your order appreciated.
