ORACLE JEFF SPEAKS SOME WISE COUNCIL

(By James Jeffries, former heavyweight champion of the world.)

(Written for the U.S.S.)

LOS ANGELES, May 15.—I notice that the Elks are planning a round up which is not worthy of the selection of a referee for the Willard-Dempsey bout at Toledo July 4, and I question if the same have good consideration to this. It is a question that should have a lot of thought before a referee is named. It is doubtful if there has ever been a match for the heavyweight championship where a referee has had as great a responsibility. That may sound odd to some, but just think it over.

"Here is a bout scheduled for 12 rounds and the world title is at stake. There is to be a referee and a decision will be made. The referee has to be a winner or fall the match a draw after having seen the men fight a minute. Some say that they sound like a tough job, but I believe it is a lot tougher than it would be to name a winner in a 25 round bout. Here the referee has no chance to see the men in action for a few seconds. He has to see the chances of a knockout are much less than they would be in a longer fight where a just man can have some time to see.

"Then, too, the referee will be in a position to see a fighter who is hurt and stop the fight. He has to be a pretty big proposition to have to give a verdict against the champion and take his own away from him.

"I believe that the referee in the Willard-Dempsey bout should be a man who has been in the ring and has seen a lot of action. He should be a man who has seen a lot of action and has seen a lot of action. He should be a man who has seen a lot of action and has seen a lot of action.

FROM THE PRESS BOX JUG

There will be a little surprise and disappointment at the box which has fallen on Charlie Olson, the game fly-catcher, who has been hurt from the fact in this part of the season. Olson is a splendid ball player and a great pitcher. He has a heavy following in an amount of Twin Falls and all will hate to see him fall out. His pitcher's arm is hurt and he is not able to pitch. It is hoped that he will be able to pitch again in a few weeks.

The wrestling contest which is being held at the Elks hall on the 17th and 18th inst. will be made different arrangements with the Elks for that purpose. It is presumed that it will follow the usual course of the Elks, but it is not yet decided whether or not it will be held at the Elks hall.

DEMPSEY WILL RIDE CUSHIONS INTO TOLEDO

CHICAGO, May 15.—Jack Dempsey, who battles with Jess Willard for the world's heavyweight title at Toledo, will have for his coach of the coming fight today, but will retain the assistance of Pullman instead of "monoring over" in a plan which was announced by A. Q. Tucher, Toledo promoter, who refuses to take any chance of Dempsey's "getting all mixed up in an automobile" and not being able to say battle to Willard on Independence day.

Further completed arrangements yesterday for the opening of a ticket office in this city where Chicago fans will have to buy their tickets.

Opposition to Matt Hinkle for the third man in the ring was voted by (Edgar) Dempsey's manager, Jack McAuliffe.

"I want a sure, efficient man," McAuliffe declared in discussing the possibility of Hinkle being selected as the third man.

"A referee who will not object might permit Willard to dull Dempsey around a bit during the fight and we do not want to take chances. You are saying Willard will fight that way but we're not going to take any chances. I understand that Willard is a very nice and competent. That man would suit me."

The Toledo man referred to is White in Chicago. Keane completed his string of losses who will fight with Dempsey during his last fight. The fight will be at Toledo, Ohio, on July 4.

SENATOR OWEN URGES TRADE WITH EUROPE

TWIN FALLS, May 10.—There is a gigantic market abroad for American products and America should make this market available by cheap transportation by extending the credit against the wishes of the government of Europe. Robert L. Owen, United States senator from Oklahoma, and today, Senator Owen is here to make an address before the convention of Missouri bankers.

"If Europe cannot pay the cash, it can pay in commodities or on time," he continued. "Europe is not bankrupt. It has 200,000,000 intelligent, industrious people who will not permit it to become so. The war debt, as far as vital resources are concerned, is offset by credit."

"France, Italy and England will astonish the world by the rapidity of their recovery.

Special records of opportunities are compiled in each state and forwarded to the employment desk in Washington. Telegraphic notice is given, if necessary, and as a result as many as four hundred applications a week have been handled."

Wheat Pests Appear In Illinois County

WASHINGTON, May 10.—Two serious diseases of wheat hitherto unknown in this country have been discovered in Madison county, Illinois, the department of agriculture announced today. The first is a disease apparently identical with the "take-all" or "white leaf" known in many foreign countries. Take-all has caused serious losses in the wheat fields of Australia, and has been reported as a pest of wheat, oats, barley, rye, rice and certain wild grasses in that part of Europe. The second disease is a rust of wheat (Uromyces tritici) which also is a serious disease of wheat in Australia, and is known in India and Japan. Neither pest, however, has ever been reported to cause losses comparable to those resulting from the great epidemics of blackstem rust in this country.

Although these diseases may cause heavy losses to individual farmers, the total area likely to be affected, before eradication or control measures are established, probably will not be large, the department says. The losses in the total acreage affected this year will have no appreciable effect upon the total production of this year's wheat crop.

WORLD NATIONALIZE MINES

SPRINGFIELD, Ill., May 10.—Only through nationalization of mines can a six-hour day, a five-day week and increased wages be realized by the coal miners of America, according to Frank Farrington, president of the Illinois United Mine Workers' Union of America. And American miners will stand shoulder to shoulder with the miners of Great Britain on the question of wages and working conditions, he said. He made the declaration in a speech before the annual convention of the international president calling for increased wages, shorter hours and nationalization of mines.

LOWER PRICES FOR FOOD IS NOW PROMISE

NEW YORK, May 11.—Following a conference with representatives of the grain handlers, millers, flour jobbers and bakers, Wheat Director Julius Harner of the government food administration today issued a statement declaring "that a reduced price of wheat should be reflected immediately by all down the line."

"There was a general agreement in order that all the wheat producers of the country could secure the benefit pledged to them of a guaranteed price, that the various grades would be bound by contract to sell that wheat traded, should be only on the guaranteed price level throughout the country," said the statement. "When if a lower price is justified by the development of world factors as the season advanced, this lower price could be made to reach through the millers by trade agreements with the millers and manufacturing facilities. The wheat director making the recommendation stated effectively by payment of the difference allowed under the act of congress."

The plan for protection against the fall in price, after the guaranteed price has been made for the wheat bought, the wheat director would require from the various trade contracts, obligations by which their trade practices and margins of profit would be subject to review and control by the wheat director.

"It was suggested, that, for instance, the mills would agree that their total gross operating profits between wheat bought and wheat sold would not exceed an agreed basis per bushel of four manufacturers' basis "including amortized reduction to the consumer of any reduced price of wheat supplied by the mills."

Both the jobbers and bakers the statement said, agreed to cooperate in reflecting to the consumer the reduced price in wheat.

ANCIENT PRICES PROVE CLAIM OF HIS HONESTY

PITTSFIELD, Ill., May 10.—A cloud that has enveloped Marcus Hardy, of Holfin, former drainage district official, has lifted. When he retired from office several years ago he was some \$2,000 short. In vain he tried to explain. Bondsmen had to come to his rescue. He eventually restituted the latter. The other day while rummaging through an old desk he found some receipts that entirely cleared the shortage. Present commissioners are devising means to repay Hardy.

SMALL BUNGALOW OF GOOD DESIGN

Exceptional in Appearance and Interior Arrangement.

FLOOR PLAN IS ATTRACTIVE

Design May Easily Be Changed to Suit Exposure of House or to Conform to Ideas of Builder—Consult Architect and Copy.

By WILLIAM A. RADFORD.
Mr. William A. Radford, will advise architects and builders of the "SMALL BUNGALOW" floor plan. An account of his wide experience in building bungalows, without doubt, the highest authority on all that subjects. Address his home to William A. Radford, No. 107 Park Avenue, Chicago, Ill., and only send stamped address or note.

Bungalows have had an increasing popularity among home builders during the last few years. Now, when there will be a large number of new homes planned and started throughout the country, they will be especially popular, for the one good reason that the owner gets miles for the money in this style of architecture than in the other type of two-story houses.

Of course, there are bungalows and bungalows. Whether they be houses of two or three rooms or those containing as many as ten, or even more, they are bungalows in the sense. They are not made alike, however, except in small, conveniently arranged houses of four or five rooms, six at the most, all on the one floor.

Home building has been at a standstill in the last couple of years, and the time has come when building a place in which to live is almost everywhere is considerable of a task, and an expensive proposition. Tools, materials and labor are scarce, and the law of supply and demand rapidly being further increased. The temptation of building at one time, therefore, is important, as the demand now is greater than the supply and the

The address, to the attractiveness of the building.

A floor plan of this bungalow also is shown in the illustration in a study of it will bring out many points of interest to those who are considering what type of house they will build.

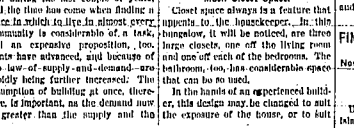

Living Room Large
The front entrance door opens into the living room, the room that makes a bungalow such a desirable home. This room is 10 by 13 feet, an exceptionally good size, not being too large to distract from the lines of restfulness and comfort that there is a feeling of being shut in. At one end is an open fireplace, another important bungalow feature, and the living room is separated from the other room through a living room between columns, in the dining room, also of good size and equally attractive in its arrangement. The room is 14 by 11 feet, with an alcove 4 by 6 feet, the end wall of which is formed by windows. How attractive this room may be made can be imagined by the woman with artistic taste. Between the alcove and the wall at the rear of the dining room is a seat with windows above.

The kitchen, the workroom of the house, is designed with a view of efficiency. It is 12 by 10 feet, but a large alcove, 6 by 6 feet adds to its convenience. In the latter is a work table, the floor shelves and space for the refrigerator, the latter having an opening to the back porch so that it may be level with the counter tops. The lavatory space opens off one corner of the kitchen.

A T-shaped hall connects the living room and the two bedrooms. The living room is 10 by 13 feet and has two windows opening to the terrace and also to the alcove for the northwest ventilation. The rear bedroom has similar windows, but is slightly larger than the front room, being 14 by 10 feet. It has a built-in wardrobe and a large bathroom for this size house.

Much Closet Space.
Closet space always is a feature that counts in the bungalow. In this bungalow, it will be noticed, are three large closets, one off the living room and one end of the bedroom. The bathroom, too, has considerable space that can be so used.

In the hands of an experienced builder, this house can be built in less than the exposure of the house, or to suit

MUCH LIKE OLD-WORLD CITY

Capital of State of Washington Has Retained Impression Given It by Its Builders.

Those who had the planning of monuments and other of the Northwest show a certain similarity in their ideas from the nature and conditions of psychology, and hidden tribes. The Olympic mountains which are such a feature from which have poured the thunder, and the great town of Olympia, the capital of the state, is a beautiful scene, more fitting for the temple of the gods than for those of humankind of an American nation.

With the exception, possibly, of Annapolis, Maryland, no state in the Union has chosen such an old-world appearing location for its capital as the hills and forest-wooded from the outside world. At the end of a wonderfully beautiful waterway, the capital is built on a hillside, the atmosphere of the hills and big houses.

The town is a very small one, so small that it is possible to walk from one end to the other in half an hour. The streets are all paved with granite, the water front is paved with granite, the streets are paved with granite, the streets are paved with granite, the streets are paved with granite.

"Taxis get punishment that your car gets none. Five days not full. Further, they must give maximum mileage per gallon of kerosene. Else 'over-head' will cost you."

"The Quaker City Cab Co., Philadelphia, solves its tire problem with Diamonds—Diamonds average over 5000 miles in water work with chains for them."

The Portland Taxi Cab Co., Portland, Ore., using Diamonds on its fleet, gets an average of over 6,000 miles. The Terminal Taxi Co., Washington, D. C., has been getting 6000 miles on its Diamonds. These specific instances are typical of many others under hard service.

Bungalow Solves Problem.
The bungalow goes far toward solving the problem of a home for the family of limited means. But what is most important, a bungalow is both a comfortable and attractive home.

The accompanying illustration shows an exceptional bungalow, both from exterior appearance and interior arrangement.

In building a home, a place where one will live for a considerable number of years, his exterior appearance is temporarily. Few will fit in with the other homes on the street, or his bungalow is best to suit his own tastes. Can he build an outstanding home, one that will be a source of pride to his owner?

The illustration shows both the exterior and interior of the bungalow. It is a comfortable place, and is comfortable and attractive. It is a comfortable place, and is comfortable and attractive.

Have the Times in Your Window

It is the way of the owner. For instance, if he is a busy man, transportation of the bedrooms and bath and the living and dining rooms and kitchen, if the bungalow is a small one, its arrangement would be more desirable.

For either city, town, or country, a bungalow of this type will be found to make a comfortable home. One that will grow on the owner the longer he lives in it. How cozy will be the living room with its open fireplace, the dining room, and the kitchen, and the bathroom.

The accompanying illustration shows a bungalow that meets the needs of the family that wants a pretty, comfortable, convenient home—one that will be a source of pride to its owner. It is a comfortable place, and is comfortable and attractive.

When William Niblo opened his theater at Broadway and 142nd Street, he celebrated the double occasion by a patriotic display of flags which were donated by the "Niblo" fan and wide and immortalized in its size as well as its history. An advertising display of a patriotic character was shown in the form of a white and blue awnings cast by the rows of flags. The display was the first time in New York City since before, but to the honor of the patriotic spirit of the credit of first being given for illuminating a theater. Gas Logic.

BUILDING HOMES TO STAY BUILT

If there is one thing more than another that should be emphasized by builders, and should be insisted upon by contractors, it is the desirability of putting into American structures the right kind of material and workmanship...

There is a natural temptation, when the cost of labor and material is high, to lower the material by cheap construction...

Nearly half the cost of ordinary construction is for labor. The labor costs just as much whether it is applied to good material or poor material...

It is to wish almost every sort of plumbing, if one does not try to fancy fixtures rather than real quality...

Lumber that costs 20 per cent more per foot is likely to last 50 per cent longer, and give better satisfaction...

Shoddiness in house building leads a deep impression upon the character of the people...

Let us build our houses not only for the present, but that they may give satisfaction and comfort to our children.

RECREATIONAL ACTIVITIES FOR TWIN FALLS

In The Times yesterday the Rev. L. B. Franck had an article under the foregoing heading, from which his name as the contributor was inadvertently omitted...

This is a departure in American civic activities suggested by Mr. Franck, but at the time of the establishment of the public school system, this was a violation of all precedent...

This is a day when precedents have lost much of their efficacy as guiding stars in municipal or state affairs...

In the meantime, the article is commended in The Times readers as containing nothing worthy of their most careful consideration...

TANK DRIVERS PROVE TO BE EXPERT TRACTOR MEN

Since the war ended and the boys are returning to their pursuits of civil life, it is notable that men from the army have acquired some trade, profession or knowledge while in the service...

In the motor transport service, men became expert chauffeurs, mechanics and auto repair men in the service...

from tractor which was given him to manager upon his return to civil life.

Of course, at first he didn't exactly enjoy pulling a gang of farm implements after him and having to be careful all the time over the top of a giant "working horse" disrespecting Bill Liggins like horses, shell hoes, discles, trees, trouches, etc.

WORLD'S GREATEST MINE FIELD

By hit the story of the wonderful part the American navy played in winning the war is being unfolded. A sample of the assistance the navy gave the allies in bringing about the downfall of the central powers is seen in the laying of the world's greatest mine field...

A little more than a year ago the American laid a mine barrier that extended from Bergen, Norway, to the Orkney Islands, north of Scotland, effectively closing the North sea to navigation...

The barrier made practically impossible the escape from the North Sea of any enemy raider or warship. Fifty-seven thousand of these mines, every one made in America, formed this barrier to German sea operations...

Not even yet does the world realize the immensity of the task assigned to the American ingenuity and industrial enterprise...

HEARD and SEEN at the CAPITAL

No-Bargain Sales of Your Uncle Sam's War Goods

WASHINGTON—Ever slow the going of the armistice people have been wondering what the government was planning to do with the war material it couldn't use...

One of these was to the effect that the government would soon sell a large number of its war automobiles and motorcycles at the price of \$200 apiece...

The war department likes to dispense the public, but it is feared to insist that there is not the slightest bit of truth in these rumors...

The government is taking every precaution to prevent any disposition to industry through the leaking of war material. During the war many American industries more than tripled their production...

COMMERCIAL AIR STAGE SERVICES ESTABLISHMENT IN ENGLAND

LONDON, May 15.—The commercial air stage has been officially authorized by Great Britain.

The great London terminus will be at Hounslow, twelve miles southwest of central London, while existing air stations will be maintained for traffic outside of the United Kingdom...

While fairly long flights depend upon the passenger's requirements, the air ministry has arranged for eight landing stations in the 100-mile journey to Glasgow or Edinburgh...

INTERNATIONAL CREDIT SYSTEM IS THE KEY SOLUTION SAYS LUDWIG RAEVER

LONDON, April 22 (By mail).—The greatest danger confronting the world today is not the holding of a peace conference of the war but the risk of a collapse of the system of international credit...

It is in these conditions we produced all the food and cotton and wool and other commodities we consume we might as well fence around our coast and live at a pinch as a self-contained community...

VETERANS SONS WILL OBSERVE MEMORIAL DAY
Preparations for Memorial Day are being made by the local Sons of Veterans organization, who will meet Saturday to confer on a program for the occasion. The following call has been issued:
All Sons of Veterans, whether members or not, are invited to meet at the office of H. E. Powers, Secretary of the Twin Falls Camp, No. 6, at Over City Pharmacy, at eight o'clock on Saturday evening, next, May 17.
Some action is necessary if we are to honor our fathers, the country they gave us and the members of the Old Guard who will still be in the observance of Memorial Day. Dan McKee Camp, S. of W. Twin Falls, is the representative of all sons of veterans.
H. E. POWERS, Secretary.

Murtaugh News

MURTAUGH, May 13.—Mrs. Roy Hunt entertained the 7th and 8th grades and the school teachers at the school house Friday evening. The evening was spent in playing games and having a jolly good time. Refreshments were served at a late hour. There were 22 present.

Elizabeth Hoover has been confined some by sickness the past few days.

ROBINSONS
Palm Olive Co. Products
My impression regarding the different articles sold by this Company is that they prefer to have them retailed at prices that would cause them to be bought freely of all times rather than have them sold at extra profit prices most of the time and then at actual prices four or five days later in a long while.

I have been, and still am, selling Palmolive goods at prices that should cause them to be bought freely. To illustrate my regular price on Palmolive Canning Cream is 10¢ per jar and on Palmolive Toilet Powder 25¢ a box. These are being quoted at 60¢ and 65¢ respectively. The higher prices mentioned are just 25¢ more than my regular price.
Inclusive Toilet Soap is sold here in this State at 2¢ per cake instead of 1¢ 1/2. (4 for 5¢) or nearly 10¢. Toilet Cream 10¢ a tin.
A jar of Vanishing Cream at 20¢ and a box of Toilet Soap at 25¢ and four cakes of Toilet Soap at 10¢.
If you want to purchase some Palmolive goods, come here and get a jar of Vanishing Cream, a box of Toilet Soap, two cakes of Toilet Soap and two cakes of Bath Soap, all for \$1.00 and make a real saving.
OTHER TOILET ARTICLES AT A SAVING
Toilet Paper, (Crepe Finish) 4 rolls for 25¢
Toilet Paper, (the 10¢ kind) 4 rolls for 25¢
Toilet Paper, (Fine Tissue, 1000 sheet) 2 rolls for 25¢
Privilege is reserved to limit number of lots sold to one customer, as the prices are in advance of specialities.

PRUNES AND PEACHES AT WEISER HURT
County Agent G. H. Bohrer States That Boise Valley is Hard Hit by Frost—Apples Little Damaged
The prune and peach crops of Weiser and other sections of the Boise valley are badly damaged by frost, according to County Agent Charles H. Bohrer, who returned here evening from an automobile trip through that part of the state. The apple crop, however, is not injured to any material extent, he states.
Mr. Bohrer was at Weiser Monday and in Idaho Tuesday, remaining at the capital Tuesday night. He draws a report from there yesterday being accompanied by his sister, Mrs. Mattie Bohrer, and his sister, Mrs. Russell H. Kimball and three-year old son, who will visit here for a few days. Mrs. Kimball is the wife of Lieut. Kimball, artillery of the war now in France.

Four Couples Are Wed Here Wednesday

Four weddings were performed in Twin Falls yesterday, three of the couples being from outside towns and the fourth residing here.
Rev. W. A. Moore, pastor of the Christian church, presided at three of the ceremonies which were held in his study. Frank L. Bohrer, 31, and Mildred I. Aldive, 25, son of Jerome, were married at 10:30 a. m. by Rev. Moore and closely following them came Dawson S. Morse, 27, and Lucile Bishop, 21, both of Edger who were likewise made one. The wedding of Paul E. Brewster, 25, and Blanche Funkhouser, 19, a Twin Falls couple, took place at the pastor's study at nine o'clock last evening.
The fourth couple was Herbert L. Brown and Catherine Cotter, both of Rupert. They were married by Justice Kennedy Peckard.

Boy Makes Another Runaway Attempt

Ralph Hoppe, fourteen-year-old boy who ran away from his home near Sugar factory recently and was last captured at Rupert, drew the attention of officers again last night. His company with another youngster, appropriated his father's auto and left home. They drove the car to town where they threw the lands of it officers, their journey thus being a short duration.
