Funeral of Earl Pickett Brings Tokens of Love

Amid every token of respect and esteem that was of mortal of the late Earl Pickett was laid to rest Saturday afternoon in the Twin Falls cemetery...

Appropriate music was furnished by a quartet composed of Mrs. C. E. Potter, Miss Basilio, Carlson, Dr. Wagner and H. W. White. The choir was directed by Harry Ratt, Henry Ratt and D. Williams. H. J. Christian, Ward Johnson and H. J. Kingpin.

RED CROSS SEWING

At the Red Cross Sewing rooms, 300-302 Second street, there are over 600 garments cut, ready to be sewed. There is extra room for 180 pairs of stockings and 65 sweaters. The sewing must be completed by June 15. If every woman in Twin Falls will make just one garment we can finish on time. There are no requests for help from any of our European and American friends. The sewing times will be open from 10 a. m. to 5 p. m.

ANTI-LEAGUE STORM HAS BROKEN

With the delivery yesterday of a diatribe by Senator Sherman of Illinois against the proposed league of nations covenant as inexorably impending, the peace treaty began the battle for separation of the two issues and the prime question of one or another covenant of the treaty. The senator's objection is that the treaty violates the constitution of the United States, in that the rights delegated by the constitution to the federal government nationally are withheld by the states, and the constitution does not give the senate power to negotiate a league of nations covenant.

The point will be well taken by those opponents who have been flourishing around seeking a logical reason for their opposition, other than that the treaty and league are the product of President Wilson—a Democrat. The fact that the president negotiated the treaty has been heretofore the only simultaneous argument advanced against its ratification, and that was sufficient for the senator party to come out in united opposition to the whole business. Inasmuch as the "white" divided faculties of base expediency," as Borah calls it, his Republican colleagues, have not come out openly as a party and denounced the league plan, as he urged they to do, and that he would "hold" the party, the division of the parties along new lines is not likely to force citizens into a new lineup. Borah has not yet budged, any way.

Perhaps the view of the reason for the presence in Washington of a Republican majority in house and senate, that the people demanded opposition to the president else they would not have sent that majority there, justifies the attacks upon the league of nations, or even upon everything the administration has accomplished. Evidently the people did not want political harmony when they chose a Republican congress to harass the administration. So the people may view with a great deal of satisfaction the united effort to crush the idealism which would prevent wars by destroying the work of the peace conference and eliminating from it all reference to the league of nations. They can hold this view until the next great fall of military president takes the school boys of today off to the military camps and to battlefields to go through the same dreadful experiences the veterans of the present war had.

Then will come days of anguish and bleeding hearts. Then will the whole shameless brazenness of present-day politicians be justly estimated. The battle is on for ratification or rejection. It is not a battle between right and wrong, but a battle to win political advantage for the parties who would move heaven and earth to befuddle the issues and leave the people in doubt of their true intentions.

WHY DID CONGRESS MEET?

The message of the president to the Sixty-sixth congress touched only casually upon the questions affecting the international affairs in which the United States is interested. More broadly and completely it touched upon the internal needs of the nation. The session would not have been necessary if the Republicans in the last session had not engineered a filibuster to kill the necessary appropriation bills and bills for relief of retaining soldiers, so that their party might have credit for passing the measures so urgently demanded.

Yesterday three minutes was all that were needed to put through the senate an appropriation of \$15,000,000 for the payment of allowances by the bureau of war risk insurance and for pensions for civil war veterans. If the business of the last congress had been conducted in proper, orderly manner and not lashed by the filibuster in the senate, this measure, along with many others, to pass which the extraordinary session was called, would have been an "administration" triumph, whereas, by the tactics pursued by the Republicans, it becomes a triumph of the Republican congress. And in the months to come, during the white heat of a political campaign, this triumph will be one of many to which the administration opponents will "point with pride."

Aside from passing this appropriation bill, the senate did little beyond attacking the president, the league of nations covenant and the peace treaty, matters which will come before it in due course, and permitted the measures necessary for the conduct of the government to lag. Senator Johnson of California criticized the administration for not supplying the senate with a copy of the treaty and insisted that his resolution calling upon the state department to supply such a copy be passed. When letter informed senators that his resolution which such procedure would be a violation of diplomatic custom and international proprieties, that no treaty had ever been given to the senate until it had been signed by the contending parties, the only argument the gentleman could make was contained in the one word, "honorability."

And so the day went by, with little accomplishment of what the congress was convened to do.

HIGH SCHOOL MARKETING

In some cities the high school girls are learning about marketing "regularly conducted classes for the purpose." They learn from illustrations, lectures, and visits to the markets all about the best uses of steak, the proper position of a pig's left ear and its value in a carcass, and the best way to judge of the freshness of eggs, butter, and vegetables and all sorts of food provender. There is no doubt of the value of the course. The girls are learning the simple, practical facts about foods and marketing, so

that when they have loaves of their own they will be able to run them economically and get a maximum of good food.

It is often complained that school days have no connection with the problems of every-day life. Here at least one course is being carried on which refutes that charge.

FARMERS AND SCORECROWS

The mutual idea in business is by no means a new invention that the mass among rural farmers to form a light and power company of their own should be looked up as an experiment or regarded as in any way impractical. Fire insurance companies, telephone companies and irrigation companies are some of the enterprises that have been worked out along mutual lines with advantages too evident to admit of doubt. The mutual plan is twin brother to the co-operative marketing plan which has so triumphantly proven itself.

It would be false optimism to say that the mutual light and power company will be formed without difficulty. There is no worthwhile thing accomplished without something of this sort, and the farmers may confidently expect obstacles to be thrown in their path. It is ever the way of the middleman to cling grimly to his status, and it is not surprising to note that counter moves have already been organized against the mutual enterprise.

Such opposition merely proves to the farmer that he is striving for something worth obtaining. If he was lashed on by a bad business proposition which would soon work itself to the ground he would not have been put forth to stay him. He would be assured that to make an example of himself for other equally victims of autocracy. From the very fact that his move to help himself is being opposed it is only logical to believe that he is on the right track to solution of an important problem, not only of farming but of general rural and municipal existence.

Twin Falls family farmers may be the ones to drive the entering wedge in this state, but whether they do it or not the wedge will be driven before long. People throughout the country are becoming too well educated and similar enterprises are too well known to postpone for long the speed of progress to Idaho.

Through determined effort the way has finally been opened for just such a project as the mutual light and power company. After a hard fight the joint rural power and light authority provided for by the organization. At these labels there is an untried source of power. All that remains is the will of the farmers to go through with the job by sticking together and ignoring the scorecrows set out to frighten them off.

ANTI-AMERICANISM IN JAPAN

An anti-American campaign of unusual vigor is said to be raging in Japan. Americans may find it hard to understand just why the Japanese should be so angry at us as this time, when we are not even showing any special offense against them. The following explanations are given:

The basis for the agitation is said to be "a fear of the growing influence of the United States in international affairs."

"There is the old grievance of Washington against the days in our Pacific coast states, and the fear of more drastic anti-Japanese legislation there."

Resentment has been aggravated by the feeling that the United States is largely to blame for the failure of the peace conference to adopt the "racial equality" principle advocated by Japan. "There is a belief, too, that Americans intend the Chinese to make public the secret Sino-Japanese treaties which put Japan in the light of aggressor and persecutor, and that Americans are primarily responsible for the anti-Japanese outbreaks in Korea."

Another Japanese public sense which has embittered itself that it has thoroughly satisfactory reasons for hating America and Americans. It is a pity, too, because nine-tenths of all this stuff is flimsy just plain delusion.

Japanese statesmen and editors would do well if, instead of adding to the flames of race prejudice, they would help the Japanese masses to understand the basic democratic principles of right and justice on which American international policy is founded. They should realize that America asks nothing of Japan or any other country which America herself is not willing to grant. They should realize that Americans do not hate nor fear nor scorn nor dislike the Japanese, but that they simply want the Japanese in their relations with America to treat "racial equality" as a reality, and act like Americans, accepting our standards when they come here, and acknowledging our right to maintain these standards.

LOANS FROM BUILDING ASSOCIATIONS

To obtain information regarding the present condition of building and loan associations in all parts of the country and to ascertain the sentiment in regard to the establishment of federal home loan banks, the U. S. department of labor recently sent out a questionnaire, the returns from which contain valuable information on the building situation.

According to the questionnaire returns, sixty-three per cent of the associations are now being offered more business than at this period of last year. Many of the reports show increases of from ten to fifteen hundred per cent over 1918 in the volume of business.

Partly per cent of the associations report that ordinary receipts are insufficient to supply the demands for desirable loans. The opposition to the proposed federal home loan banks, measures, which is designed to enable building and loan associations to realize on their long time mortgages and thus to meet increased demands for loans, is comparatively slight, less than two per cent of the associations queried having opposed the plan, many of the adverse opinions having been accompanied by the admission that the exact object of the federal home loan banks was not understood.

Maybe the fact that certain leading citizens of the nation in the senate are opposed to the league is worth their names, were not mentioned as possible members of the parliament of the world. It would be better to have a bill introduced to have to acknowledge there was a greater deliberative body in the world than the senate, and they not members of it.

Two years ago a message was sent to the United States from Paris in words as follows: "For God's sake, hurry." Somebody ought to send it back.

It is standard surprised if there were any one that thought in the America after July 1. And we wouldn't vouch for the quality of the tea, either.

Wonder if there is a bell attached to the "closed door" policy any where?

WORST FAMINE IN ALL HISTORY DUE IN RUSSIA

Belohivian Painted as Monstrous Which Will Destroy Russia and Itself

PARIS, May 24.—A categorical statement that Russia is destined to undergo an unprecedented annihilation under one of the worst famines in the world's history is issued today by M. Pavlov, a noted Moscow economist. He also predicts that the red army will fall in Russia within six months as a result of the perilous economic situation which he said will befall it. He will refer to support the first energetic and rational man who comes forward to save the former empire through its war crisis.

In December last I was contacted by the French, and invited to appear to them on the economic condition of Russia," says M. Pavlov. "Development since then has only become more and more dire and my opinion. We have had all kinds of remedies proposed to heal the gaping wounds of Russia. Thousands of my fellow countrymen are indulging in idealistic, republican or socialist dreams. They will fail to grasp the real and actual factor in the situation which is this:

"Belohivian, the twentieth century's monster, is bringing about a famine without precedent in history. Already this famine is rapping at our door with a terrible hand and it will be the death of the nation. He will fail to pass it by occupying the fertile soil of southern Russia. He cannot provide enough food for 100 millions under present conditions. The facts are these: The average food production of Russia for the ten years prior to the war was 2,500 million pounds annually. Exports amounted to 500 million pounds, and the remaining 2,000 million were consumed by Russia's population of 170 millions.

"The 1918 crop was low. In 1916 we were nearly 2,000 million pounds, and exported 200 million. In 1917 and 1918 the crop was approximately half, except in four southern governs.

"New economic reports and figures published in the belohivian press state that for the whole of the territory, formerly ruled by the czar the production in 1918 was only 2,000 million pounds. Forged wheat, bad quality grain, and other factors of disturbance lowered the cultivated area by 25 to 30 per cent in 1918.

"For 1919 the outlook is far worse. The belohivian themselves admit that the prospects for the situation are there has been a falling off of 20 per cent in cultivated area, and that a total crop of only 1,500 million pounds, or one-half the war-time consumption, can be expected. This means famine if it means anything.

"I have made an exhaustive inquiry into the possibilities of the situation and an arrival to this conclusion that the 1919-1920 crop from all provinces will not exceed one billion pounds, even if the weather is favorable. "I don't believe the Russian people will continue to support bolshevism in the face of such a catastrophe. There is no form of economic capable of keeping masses under or increasing the fruits of the soil. "My opinion the allies have sufficient forces underlying bolshevism in Russia. They are: Archangel, 30,000 troops; Lihman, 20,000; Pskov, 10,000; Kolomo, 10,000; Baku, 10,000; troops and Cosacks, 70,000; Polish troops, 50,000; Rumania, 70,000. "This total force from 400,000 to 500,000 is growing daily in the center and north of Russia, as well as in Siberia. "Belohivian's policy is to stockpile food as a strong enough to hold the red army in check and prevent it from reaching neighboring countries. Meanwhile, famine and the sword is growing daily in the center and north of Russia, as well as in Siberia. "Belohivian's policy is to stockpile food as a strong enough to hold the red army in check and prevent it from reaching neighboring countries. Meanwhile, famine and the sword is growing daily in the center and north of Russia, as well as in Siberia.

WHEN HE COULD GET LIQUOR HE WANTED IT

CINCINNATI, Oct. 24.—An 85-year-old man of age and I never took a drink of whiskey until West Virginia went dry.

This statement was made to the court by James V. Peters, real estate dealer of this state, who was indicted for carrying liquor into dry territory.

"When I hadn't got it I wanted it," Peters said.

HEARD OVER SUNDAY SCHOOL. MAILINGTON, W. Va., May 24.—A dispute over the organization of a Sunday school between the Deas and Waugh, two of the oldest families of this section, who have been in feud for years, started a free-for-all fight, which resulted in a slandering of broken heads and tears for about a dozen of the feudists.

Blouses of Printed Georgette

Printed Georgette and printed voiles for blouses of simple design make pretty and smart styles that are popular in every line of decoration.

The patterns and colors in these printed fabrics hold the interest in the blouses made from them, except in finishing touches. They are in a little class by themselves and are recognized by those who are clever at making things for themselves. The beauty of the fabrics is their softness and simplicity of design which is in harmony with their appeal to the amateur blouse-maker. Besides the printed fabrics refer to a class of the many lines of plain materials.

Two of these new styles in blouses of printed georgette as pictured here, which is made of printed voile or silk. In the blouse at the left the georgette is printed with small flowers in all-over pattern, in which is light blue, pink, and white. The blouse is gathered at the shoulder seams and cut with a square neck. A straight yoke of white silk and lace is set in at the front and extends in a key upon below the waistline. At the neck it is cut in a V, fitted in with the neck and lace. Narrow tie, made of folds of the georgette and finished at the buttoning with crystal beads, finish this very clever model, at which any one will look twice, no matter what the attention is. It is in pure diction, think blouse.

A new design in printed georgette is shown in the model at the right. It is a large-panel pattern scattered over a plain background. Features of this kind are shown in a variety of different combinations of color, trim and white and white and beige and black, dark blue and ecru and in lighter tones. However, when the colors selected they are softened by a wide, ribbed collar in white about the neck, finished with a bit of narrow black ribbon. The blouse has the flaring sleeves that are so striking in georgette and voile, and under-stresses that correspond with the neck detail, even to the touch of black ribbon which ties the cuffs. The georgette is extended below the waist into a short panel at the back and front.

Julia Estlin

Clean-Cleaning Chiffon. To dry the chiffon of white materials, use a mild soap and a cake of mazzoni. Rub the brass part of mazzoni and scrub the coat thoroughly until all dirt is removed.

You Can Get These Advantages Too

PUNCTURE PROOF SERVICE AT 1/2 COST

Seldom, if ever, is a motorist offered a really tangible added service at 1/2 the cost he has been paying. Yet Gates-Half Sole Tires do give Puncture-proof tire service guaranteed at only 1/2 the cost of ordinary tires.

Such service was made possible only by the invention of an entirely new principle of tire construction by Charles C. Gates, B. S., a tire engineer of national reputation.

This invention has already put back thousands of dollars into the pockets of more than 400,000 motorists and added 8,000 to 10,000 miles to the life of their tires.

Think what it means to you—to start your season's driving practically free from tire worry and with the satisfaction of off-going a tire economy you had hardly thought possible.

The day is over when you need be satisfied with anything less, for a new standard of tire service has been established.

If you are not now securing these advantages you owe it to yourself to investigate the Gates Half-Sole Tire at once.

At over 1,000 authorized Gates service stations throughout the United States, trained experts will gladly show you this new principle of tire construction or if there is his dealer near you, write The Gates Rubber Company, Denver, and full information with nearest dealer's address will be sent you.

SUGAR CITY HERO WILL BE HONORED BY WHOLE STATE

Preparations Are Being Made to Welcome Idaho Boy Who Won First Medal of Honor

Young Nelson, a Sugar City boy, who brought home to the state of Idaho by being the first private of the American army to receive the Congressional Medal of Honor, is coming here to his home town of Sugar City, Idaho, on Saturday, May 24. Nelson, after he had been in the hands of the Germans for over thirty months and recovered, received the Medal of Honor for his gallantry after killing four Germans, took 11 Germans and marched them back to his regiment.

Nelson will arrive in Sugar City, on the 24th of May, and all commensal shows of the upper Blaine River valley are joining the little city to give the hero a warm and hearty welcome. The people of America's foremost, here, in his honor. The people of Sugar City extend to all the people of Idaho an invitation to be present at this occasion, and join with them in the largest celebration in the state. Governor Davis and his staff, of Nelson's return, will be in attendance. Hon. Alfred Dudge of the supreme court, will be the orator of the day. All arrangements have been made for the reception of 10,000 people. The towns from Idaho Falls to Ashton have declared a holiday and will close all their business on that day. The city of Blaine, Oregon and Astoria, Oregon, should feel that the new distinction brought to the state by young Nelson's bravery and they should turn out in mass to give him a warm welcome. The people of the state are invited and are sure to be there.

West End London Discards War Lethargy

By Earl C. Reeves,
H. N. S. Staff Correspondent

West End London is not the same as it was before the war. The West End is now a place of life and activity. The people are no longer lethargic. They are now full of life and energy. They are now full of life and energy. They are now full of life and energy.

The problems are being aired in parliament and social London is alive again. The people are now full of life and energy. They are now full of life and energy. They are now full of life and energy.

These "demanded slacker" are not the same as they were before the war. They are now full of life and energy. They are now full of life and energy. They are now full of life and energy.

Since there must always be some who are left behind, it is not surprising that society is being attacked by the West End. Officers of ex-slacker are being sent to the front. The slacker is now a thing of the past.

BRINGING UP FATHER

BRITISH EDUCATIONAL SYSTEM SEEMS DESIGNED TO DIVIDE ENGLISH PEOPLE INTO CLASSES

LONDON, May 21.—Should a prominent American declare before a public investigating body that he "regarded state education as a most flagrant thing," his remarks on anything else certainly would not carry much weight. In American educational history, the British educational system is regarded as the most flagrant of all.

In England things are different. There is no such thing as free public education. The state provides for the education of the poor, but the middle and upper classes are expected to pay for their own education.

The British educational system is designed to divide the English people into classes. The state provides for the education of the poor, but the middle and upper classes are expected to pay for their own education.

PORTLAND PRINTERS Paid \$1 an Hour

PORTLAND, Ore., May 21.—Printers and pressmen of the local news press are today working under a schedule of \$1 an hour, with seven and a half hours per day, five days a week, for a half of overtime, following acceptance of the publishers of their district.

The printers were organized this year by a local committee, recently published by the War Labor Board. The union was admitted from the printing trade headquarters for a strike until recently, when it was said to have been granted under the Harlan-Fuller bill.

ALBERTA LAND

530,000 Dry and Irrigable Acres

Counties are located in Southern Alberta and are among the best in that famous district, 200,000 acres will be under irrigation, the balance being suited for grain growing.

The lands are being put on the market for the first time and the company is looking for bona fide settlers. All lands within a radius of ten miles or less to shipping points.

Dry lands are being sold, at \$15 to \$30 per acre—irrigable lands \$40 to \$60 per acre, which includes water right—optimum and maintenance charge \$1.60 per irrigable acre per year—easy payments and low interest.

Alfalfa, grain, field peas, potatoes and fruit crops can be successfully grown.

Write direct to the company for full particulars and pamphlets.

DOG TAXES TOO HIGH, SO FIREMEN LOVE THEIR PETS

KNOWVILLE, Tenn., May 21.—"Bugs" and "Treaty," mascot of the Knoxville fire department, have been donated to the firm of Palatka Tom Moore because dog taxes were high. The dog was trained dogs, one of their duties being to awaken the firemen each morning.

ROOSEVELT MAPLE PLANTED

WASHINGTON, May 21.—The Boy Scouts of New Lexington, Ohio, have planted a young tree in honor of the late Colonel Roosevelt. The maples are now in bloom and the Scouts are now in the process of planting a large number of them.

Did you lose something? Many articles are hopelessly lost because the owner delays or does not inform the police at all in any way, in which it
