BREAKS TRACK RECORD DURING SPEED TRIAL

Rent Thomas Likely Will Hold Pole Position in Indianapolis Race for His Performance

INDIANAPOLIS, May 25.—(The Times.) Rent Thomas will hold the "pole" position when the 500-mile automobile race starts here Saturday night. The fact that he will make the fastest time in the qualification gets the "pole" position at the start and there is little chance that Thomas will be overthrown.

Thomas made the track in 1:25:30 breaking the track record, made by Barney Oldfield in his front drive Christie and the track record for cars with 200 cubic inches piston displacement, made by Howard Wilcox.

Howard Wilcox in his Peugeot made the track at the rate of 100 miles in 1:25:30. He was followed by Guy, driving the second of the five Buick cars qualified at 93.3 miles an hour. Ralph de Palma in his 120-horse power Buick was third at 91.5 miles, the Frenchman, making the 100 miles at the rate of 97 miles an hour.

Other drivers who qualified, and their times follow: B. E. Thomas in a Duesenberg, 87.3 miles an hour.

Paul Kelly, 87.1.

Eddie Harms, Durant special, 84.8.

Earl Cooper, Buick, 84.2.

W. H. Hudson special, 84.1.

Charles Kiskadee, Detroit special, 83.

FROM THE PRESS BOX JUG

Leadership of the South Idaho Baseball League is for a shake-up, not later than next Sunday. It may come before then but certainly cannot be delayed any longer. There is room for only one club at the top, and temporary, if permanent, re-division there must be made in the two remaining play scheduled Friday and Sunday. Twin Falls and Pocatello are both clinging to top rung of the ladder and one of them will be dropped to the slabs.

Friday's games may leave both of them still on top as they play different teams and each has a chance to win. But Sunday they will come to grips with each other. There is no chance then to evade the taboogin. Somebody slides.

Even in Friday's games there is a fair chance of the losing team. If they play different teams and each has a chance to win. But Sunday they will come to grips with each other. There is no chance then to evade the taboogin. Somebody slides.

AMERICAN LEAGUE

CHICAGO, May 25.—Hard luck will paroled Walter Johnson today and he has again to the white sack who came from behind to make one of the best of the series.

Score: R. H. E.
Washington 3 6 2
Chicago 4 3 0
Harper, Johnson and Bennett; Gagne and Schalk.

PITTSBURGH, May 25.—Lemon was in fine form today, his first start since he was traded to the Pirates. He pitched a complete game, winning by a score of 3 to 1.

Score: R. H. E.
Pittsburgh 3 1 0
Detroit 1 0 0
Johnson, Gray and Perkins; Leonard and Anshutz.

CLEVELAND, May 25.—Cleveland made a three straight from the top. Phil Phillips, pitcher, performed a feat never before in the history of the Cleveland park.

Score: R. H. E.
Cleveland 10 1 0
Boston 1 0 0
Phillips, Johnson and Walters; Phillips and O'Shea.

ST. LOUIS, May 25.—Lou Gehrig pitched a complete game, making three straight.

Score: R. H. E.
St. Louis 3 0 0
New York 1 0 0
Gehrig; Thurm, Russell and Hudd; Satterthorn and Mayer.

NATIONAL LEAGUE

PHILADELPHIA, May 27.—Glavy (Cravat) was up to his old tricks today and beat the Gincy Reds when he came from behind to make one of the best of the series.

Score: R. H. E.
Phila. 3 0 0
Phila. 1 0 0
Glavy and Wingo; Woodman and Galy.

BOSTON, May 27.—Boston could do nothing with Claude Hendrix and was shut out by the Cubs, who trounced the local outfit barely hitting in five runs.

Score: R. H. E.
Boston 0 0 0
Chicago 5 0 0
Hendrix and Daly; Pfenning, Deane, Reardon and Tracy.

NEW YORK, May 27.—It was pay calling for the Giants today in head line pitcher Tommylin today, who pitched a complete game, winning by a score of 3 to 1.

Score: R. H. E.
New York 3 1 0
Pittsburgh 1 0 0
Tommylin; Egan and Sweney; Gardner and Campbell.

BROOKLYN, May 27.—Earl Campbell pitched two straight to beat the Pirates in a 3 to 1 victory.

Score: R. H. E.
Brooklyn 3 1 0
Pittsburgh 1 0 0
Campbell; Stryker; Manning, Marquard, Cheney and Krueger.

COAST LEAGUE

Los Angeles 4, Vernon 1.
Pittory and Bolo; Dawson, Ball and Devermer.

Salt Lake 6, Sacramento 2.
Main and Spencer; Vance and Murray.

San Francisco 6, Oakland 4.
Baum, Reaton and McKee; Kromer and Doherty.

Portland-Seattle, traveling.

King Albert and Prince of Wales Invited to Bout

TORONTO, May 25.—King Albert of Belgium and the Prince of Wales will be invited to fight the guests of the Toronto Athletic Club.

King Albert, light promoter, on the occasion of the visit to Toronto, will fight with the boxer, Ed and Kautsky, who immediately following, completed a total of six runs in the seventh inning.

Score: R. H. E.
Toronto 6 2 0
Ottawa 1 0 0
New York 10 11 3
Miller, Egan and Sweney; Gardner and Campbell.

Willard Leaves Los Angeles on Trip to Toledo

LOS ANGELES, May 25.—Jesse Willard left for Toledo at 9 o'clock this morning.

The champion went through ten rounds of work yesterday and topped the scales at 202 1/2 pounds at the finish.

On the eve of his departure to meet Jack Dempsey at Toledo July 4, Willard was confident he will come out of the fray a winner.

"Will I win?" asked the big fellow. "Of course I'll win. I was never more confident of the result of a battle in my life. I'm in far better condition than when I whipped Jack Johnson."

CIVIL WAR VETERAN DIES MORNING ON VICTORY FARM

LAWRENCE, Kan., May 25.—Archie Deary, 83, a partner near here, died when he stepped to rest after a short period of illness at a hospital here.

Deary is believed partly responsible for the death, as it was very warm all the afternoon of the day he passed. He was a veteran of the Civil war.

COUNTY FAIR PROGRAM HAS STRONG LIST

Three Days of Raging Events at Filer Track Promising to be Interesting

The program for the Twin Falls county fair at Filer, from September 30 to October 10, includes an interesting assortment of straight and relay races, harness events and cowgirl relay races. Human landing race and harness events arranged. Cow-purses will be put up for the various events.

1. Run, 1/4 mile, \$500.00
2. Combination race, 1/4 mile, \$100.00
3. Boy's Relay Race, 1/4 mile, \$50.00
4. Human Landing Race, 1/4 mile, \$100.00
5. Relay, Cowgirls, Three days, Tuesday, Wednesday, Thursday, 2 miles per day, three or more sprints to start, \$200.00
6. Run, 1/2 mile, \$100.00
7. Human Landing, 1/4 mile, \$100.00
8. Relay, Cowgirls, Second race, Tuesday, Wednesday, Thursday, 2 miles per day, three or more sprints to start, \$200.00
9. Run, 1/2 mile, \$100.00
10. Human Landing, 1/4 mile, \$100.00
11. Relay, Cowgirls, Third race, Tuesday, Wednesday, Thursday, 2 miles per day, three or more sprints to start, \$200.00
12. Run, 1/2 mile, \$100.00
13. Human Landing, 1/4 mile, \$100.00
14. Relay, Cowgirls, Final race, Tuesday, Wednesday, Thursday, 2 miles per day, three or more sprints to start, \$200.00

TAGGING ALL THE BASES

OF THE eleven-base collection at Filer, two were left out by the boys.

Plates, two were left out by the boys.

The "travels" after being chased by the boys, who are the boys, Al Wickland to St. Paul and Joe Kelly to Toledo. Both were former outfielders with Indianapolis.

George Sider, who has been in the Browns' camp during the defeat of the Yankees.

And "Hummer" Baker, old St. Paul pitcher, who is in Uncle Willie Bush's camp, who is in Uncle Willie Bush's camp, who is in Uncle Willie Bush's camp.

Tom Phillips, a New Orleans recruit, pitched the Indians to victory over the Red Sox and helped himself to three singles.

Duke Ruth's triple during the Red Sox defeat, was the longest hit ever seen on the Cleveland grounds.

Cravath's drive over the right field garden wall with two on, gave Phillips the second game of the series with the boys.

Dutch Leonard, making his debut with the Tigers, yielded but five scattered hits. After the second inning the Athletics got only two men on for an second base.

Water Johnson had his second game of the series when the White Sox "re-appeared" in the Detroit camp.

The challenge now has several rounds of boxing every day in addition to strenuous road and gym work. Big Bill Tate, the colored heavyweight, worked out with Dempsey, and from now on Dempsey will box almost daily with one of the "lightweights" in his camp to improve his speed.

The referee question is still exciting the greatest interest. The latest suggestion comes from Jack Kearns, Dempsey's manager. Kearns would leave the selection of the third man in the ring to a committee of newspaper men. Walter Coffey, the Buffalo referee, is here as a possible candidate for honors in that capacity.

You may have read one of them yesterday, but here are a good many new bargains advertised every day.

OPPOSITION IS HALF A CENTURY BEHIND TIMES

No Missing Car Is Recovered; Other Is Believed to Be Gone

A Fruit machine taken from in front of the Lovell Hotel Sunday night was recovered yesterday by Sheriff A. N. Springer, and returned to its owner, J. E. Fleming.

The machine had evidently been abandoned by joy riders and was discovered in the street in front of the Lovell Hotel.

The Stubbler, who had taken from the car yesterday, has been recovered.

A "machine" taken from the description has been traveling west, according to reports received at the sheriff's office.

What Have You Done About Tires?

Hundreds of motorists in this city—many of them business men who know—have increased the pleasures of motoring by eliminating tire worry.

and you can do it too!

A new principle of the construction provided by Charles C. Gates, E. M., makes it possible to build 500,000 car tires, all over the United States, here, proves this Gates principle.

These motorists, including the biggest business houses in the country, have proved that Gates Half-Sole Tires enable them to get 5,000 to 15,000 more miles than ever before from their tires.

And Gates Half-Sole Tires are 20 per cent over-size, stronger and better than the tires now on your car—guaranteed puncture-proof—yet cost only 1-2 as much as other tires.

You, too, are entitled to this tire economy—let us show you.

THE ATLANTIC IS CROSSED BY AIRPLANE

One of the three airplanes which started on the transatlantic trip on May 8 finished the trip to Lisbon yesterday. Unfortunately, two of the planes that started failed to make the 12,000-mile journey from Trepassy to Paris, France. Fortunately, however, the two of the machines were rescued by aerial ships stretched across the sea to bring the airmen and remainder of the plane to land. While the American aviators were waiting in the Azores for favorable weather conditions for the hot trip from Ponta Delgada to Lisbon, Harry G. Hawker, Australian, accompanied by MacKenzie Brown of the British air service, made a desperate attempt to reach London. He attempted to land the Avroplane by trying to cross the Straits of Dover, but found it to be too narrow. When about half way across the sea trouble compelled them to give up the attempt. They began searching for a steamer in the ocean beneath them, and when they found one they came there in haste and were rescued.

The final leg of the American from Azores to Portugal was completed early yesterday morning. Early dispatches by the International News Service which supplies The Times with both domestic and foreign news, indicated that the flight would be completed about 1 o'clock Twin Falls time. Throughout the morning the flashes over the wire announced the progress of the flight. After passing station 14, the last of the warships keeping lookout for the airplane, a time interval without any word from the plane served to set on edge the nerves of everybody connected with The Times. Finally, at 2:38 the flash came:

"Flinkey NC-4 arrived at Lisbon."
Fifteen minutes later The Times was on the street with the electric news—twenty-four hours ahead of its contemporary. Instantly it might be interesting to our readers to know that a short time afterward the telegraph editor of The Times' contemporary came down the street leading The Times to get today's news today.

HOW MUCH IN THE PACKAGE?

The Federal department of agriculture is engaged in a determined campaign to enforce the net-weight amendment to the Food and Drugs Act as it applies to fruits and vegetables. This amendment provides that the actual contents shall be plainly indicated on packages containing food or drugs. Hitherto there seems to have been considerable disregard of this with respect to fresh fruits and vegetables, though it applies to them no less than other food-stuffs. Shoppers who fail to observe the law are liable to prosecution in the federal courts.

This measure, of course, can only be enforced in connection with goods coming under the designation of "interstate commerce," that is, goods shipped over state lines. Many states and cities have adopted their own regulations covering food-stuffs shipped or sold within their own jurisdictions; but in general, state and municipal laws still fall in the matter.

In the last few years the multiplication of sizes and shapes of boxes, crates, etc., has resulted in chaos. It seldom that a consumer can tell, any more, how much of any fruit or vegetable there is in any container. Often the retailer does not know. Sometimes the shipper, loading all along the line, either all fruits and vegetables should be sold by weight, or else the percentage in which they are sold should show the precise quantity contained.

ANOTHER IDOL SHATTERED

In years gone by the happy condition of the people of the United States was described by sayings that have come down to the present. A generation of antiquity as wise says, "The perfect freedom of all, everything in America was described by the phrase 'as free as water'." The modern distance traveler prides that the phrase "as free as water" is applicable for water, especially in an irrigated country is no longer true—and those who have had irrigation over the use of water can testify that, instead of its being free, it comes high. No that old saying is practically losing the force.

Another widely circulated adage also indicated the perfect freedom of the people of America. It said things were "as free as the birds." Only a few years ago the birds were free to fly as they pleased with the great trucking campaign so strenuously waged by politicians in an effort to make living conditions tolerable or to elect

politicians to office, a pessimist remarked that, no matter to what heights prices of other commodities might go, the air we breathe and the merry sunshine were still uncontrolled by trusts, so there was that some left to enjoy without fear of the bill to follow.

But while sunshine is still unobscured free to all those who happen to live in the United States, little to the absolute freedom of the air has had a cloud cast upon it. Down in Utah, the public utilities commission, in concert with the regulation of every public service corporation within the commonwealth, are endeavoring to control the air through control. It may be confidently asserted that if it does not, the next legislature will give it that power, and then only the sunshine will remain as perfectly free. Everything else tangible and intangible will have passed attention of regulators, and had the price raised according to its estimated value under regulation.

The Utah problem came up because some enterprising Urbans advocated their intention of establishing a "air taxi" service, and wanted to know what the public utilities commission was going to do about the regulation, in order, no doubt, to set the passenger and freight rates at a high enough figure to help maintain the commission. Whatever the night happen, it is certain the public will be "protected" in its rights, those rights consisting principally of the privilege of breathing the air.

The enterprise which brought up the question if proposed to give residents and visitors a "night soaring" trip over the city, at \$10 a show. Doubtless the public utilities commission would require a license in order to permit the flight. It is not the intention of the commission and the Utah First and killed some important bystander. Passengers in the plane probably would view their rights to receive the company would go back with the first accident.

GENERAL EXPRESSIONS OF OPTIMISM

With a further removal of natural economic barriers permitted by the further functioning of artificial measures, discount rates in business are becoming lower and faster and are being steadily replaced by more frequent and clearer expressions of optimism regarding the future, says Dan's Review. The great iron and steel industry, for instance, expressed by pessimistic forecasts, and industries of a manufacturing nature, the return of strict competitive conditions, and the copper trade, although slow to restore recovery, is also indicating positive signs of renewed animation. While the gain in these lines is yet mainly one of a more cheerful sentiment, there are multiplying evidences of a decided increase of actual orders in some other lines, such as shoes, textiles and hosiery and leather and footwear.

and reports that these actions are running beyond calculation, and are growing more common. This is not only due to demands to meet current needs, but also of purchases in anticipation of forward requirements, and the change of buying departments suggests a general optimism. The impression that waiting for additional price declines would prove a profitable policy. There has been no far-reaching and drastic break in prices, such as it was thought in some quarters would follow the war's ending. A rise has occurred, not only in various staple foodstuffs, but also in some important raw materials, the general structure of wearing apparel, and several products that were formerly sold at a profit. Yet inherent weather has apparently been more of an obstacle to retail distribution than have the high prices, and the apprehension of wide-spread unemployment is being mitigated by the industrial revival that is in progress, and by the steady development of construction activities in many sections.

FORD-TRIBUNE LITEL SUIT

Doubtless the suit brought by Mr. Ford Ford for a million dollars as damages for all-time filed against the Chicago Tribune settles the energetic Detroit matter of jingling boxes, to editorial aid versus. With the beginning of the testimony yesterday, caused for the defense objected numerous times to decisions of his Honor, and saved exceptions to the rulings, thus laying the foundation for appeal.

Without entering into the merits of the case, it is safe to say that Mr. Ford's millions will be divided partly with the members of the bar. That seems to offer one very good reason why one should accumulate fortunes by some method or other. It gives the lawyers a chance to live by their wits. If there were no rich men there would be mighty few lawyers.

A BUSINESS WAR MEMORIAL

The Westinghouse Electric company has established four scholarships as a commemoration of the part played by its employees during the war. It is not in any sense a memorial simple for those who fought and died, but a recognition by the company of the loyal service of all its employees both in the shop and on the field of battle.

Two of the scholarships are to be open to employees of two years' length of service who are under 21 years of age. The other two are to be limited to sons of employees who have served the company for at least five years. The selection in each case is to be decided by competitive examination to be conducted by the company's educational department.

Scholarships will enable the successful candidates to pursue a four-year technical course in any school or college they may prefer, with the approval of the committee. They may study any branch of knowledge they choose, and an eight-cent student's completion of his course depends on his mother's good every year in accordance with the standards of the college selected.

A noble and more valuable stimulus to faithful service would be hard to imagine. It shows an interesting light on the spirit and method of some of the great business concerns of our country in dealing with their employees.

After all, playing baseball is better sport than standing in a muddy trench throwing hand-grenades.

Science Only Lipped Annihilation's Alphabet During the Great War

By HERBERT ASQUITH, British Statesman

If those who oppose the league of nations think have any gift of faculty of imagination let them try to present to themselves the alternative. Let us suppose that a league of nations is, if not a haphazard fabric, at any rate an impractical policy. What is to take its place?

Let us suppose that the nations go on in an unrelenting competition—jungle would be a better word—of ambitions and rivalries, with their new armaments on sea, on land and in the air. What will be the outcome after the lifetime of another generation has been spent and squandered in the race for international ascendancy? The experience of this war has made actual what was imaginable. But these are not words; if the old antagonisms were to continue, two new factors at work.

The first and most obvious is the unrelenting and still incalculable effect of the increasing expense to the charge of armaments.

We have seen in these four years only the rudimentary application of methods and agencies unknown and undreamed of in the catalogue of the past. Science has in the matter not only not said the last word; she is still forging the alphabet of annihilation.

If she is to be diverted from her haunting mission of creating our shattered resources and creating our waste places and polluting and curbing our common life, if she is to be diverted for another twenty years into the further elaboration of the machinery and chemistry of destruction, we may as well pay for the speediest possible return to the global epoch.

Better a planet on which human life has become physically impossible than one on which it has degenerated into a form of organized suicide.

THE CHEERFUL-CHERUB

I sit and dream before the grate
And long for feelings nobler, higher,
Why even black coal when it dies
Shows that it had a soul of fire.

PRINTERS' INK

HAS been responsible for thousands of business successes throughout the country. Everybody in town may know you but they don't know what you have to sell.

The average trader would usually return a lost article if he knew who the owner was. That's why you should advertise that lost article in The Times "Lost" column immediately.

Health Insurance

One of the distinctive qualities of food baked with Royal Baking Powder is wholesomeness.

This is health insurance of such vital importance that millions of women bake at home just to be sure that Royal Baking Powder is used.

Remember the adage—"Bake it with Royal and be sure."

ATTRACTIVE HOME FOR SMALL FAMILY

White Bungalow Is Very Attractive in Design.

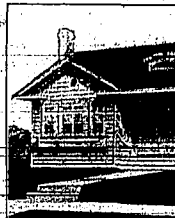

HAS UNIQUE ARRANGEMENT

Pacing of Rooms Is Convenient and Boldly Presents Fine Appearance—Plans Can Easily Be Altered to Suit Ideas of Builder.

Mr. William A. Helmer will have completed and given a copy of the plan of a house for a small family. The house is a bungalow of the white type and is very attractive in design. It has a unique arrangement of rooms and is very convenient and bold. The plans can easily be altered to suit the ideas of the builder.

Since building in Europe ceased and the restrictions that were imposed on building during the war have been removed there have been a hundred thousand of houses that will be erected this year. Designs for these houses are as varied as any the individual tastes of the owners. However, there is one type of house that is especially popular. That is the bungalow.

The advantage of a bungalow—that is, the house that has all of its rooms on the same level—is that it is very convenient and it is very popular.

The house is a bungalow of the white type and is very attractive in design. It has a unique arrangement of rooms and is very convenient and bold. The plans can easily be altered to suit the ideas of the builder.

Since building in Europe ceased and the restrictions that were imposed on building during the war have been removed there have been a hundred thousand of houses that will be erected this year.

point this design is exceptionally good. In selecting the design for a home, most must should be considered. Families build more than once. Every part of the family should be carefully considered before the contract is let, and then the material selected should be of the best quality. While this entails a little more expense, it pays for itself in the long run, as the upkeep cost will be lower.

Just now home building is popular in the minds of all people who are here considering building during the last two years. The government, through the United States department of labor, is urging home building, and only because there is a unusual shortage of places for people to live, but because the work is needed to keep labor fully employed while the industrial activities of the country are being restored to a pace time basis.

While it costs more to build now than it did five years ago, the value of building materials have not risen in proportion to the costs of other necessities. Careful analysis of the situation shows that this increase is about 37 per cent, while the costs of other necessities have risen 100 per cent. And this same investigation has disclosed that prices are not likely to come down for several years.

There is a pardurable profit in erecting the home to which you live. It makes a better citizen and a better man and woman. It is this fact that will make this country imperious to the social unrest that is sweeping through some of the countries of Europe, students of political economy prefer.

It requires thirty for most people to secure a home. During the war, many looked for the first time the satisfaction that comes from owning and there is nothing more worth saving for than a home.

Now that the building season is open it is time to consider that sort of a house to build. The design illustrated here is a good one for those who want a bungalow. It can be changed to suit the plans of the builder. By connecting with the local contractor or architect, these changes can easily be made. Also it can be framed, what such a bungalow will cost by interviewing the lumber dealer and builder.

Securing the money to build a home is a comparatively easy matter, as banks and individual lenders consider improved real estate the best of security. By paying a small proportion of the cost down, the balance can be paid as you go.

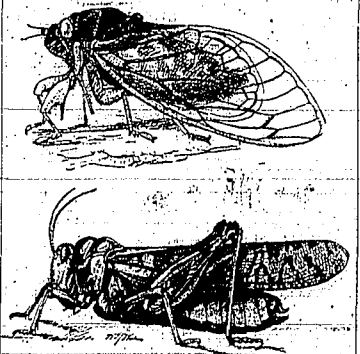

Owning a home is the first investment in the world, and with all the reasons which are given for it, some one, home building should be popular this year.

Be Gentle in Speech. We should use great care in selecting our thoughts, and especially our words. Fix every word stamp life for good or evil on our bodies and becomes manifest in our lives. This

reason why we are not happier or more successful is because we have none so much unwholesome words in the robes about us. They are producing a harvest exactly like themselves. Remember that gentle words are, after all, the most profitable. They are more convincing, more compelling; and when they are projected into the future they bring light, happiness and peace. How to live is the way to live. —Stout.

Adding fruit to injury. "What has been thus, appended from a telephone pole." "Just an effort of the former kaiser," replied the latter. "What a fine specimen of the smart uniforms. If he could see the non-union outfit this figure, it would certainly get on his nerves." —Illustrated Age Bureau.

Above, Periodical Cicada or So-called Seventeen-Year Locust—Below, Real Locust or Grasshopper.

(Prepared by the United States Department of Agriculture)
This is a "locust year" and the usual popular fear and misapprehension about the coming of the locust is being revived.

People in that large part of the United States—over which the periodical cicada will appear on August 1st, as always, to enormous numbers—will think they will see many times greater. Of the remainder of the United States, large sections are under another misapprehension, which is that the insects about to appear in the real locusts that immediately cover in the districts of that country and devastate every green thing. The latter misapprehension is, perhaps, the more widespread and disgusting, according to entomologists of the United States department of agriculture.

It is not the locusts that are feared, but the real locusts that are feared. The real locusts are not a locust, but a grasshopper. It is a locust, in the way of a signal for dread.

Now, the periodical cicada—now called the locust—will appear in 21 states this spring—is not a locust at all. It is a grasshopper, a member of the family of cicadellids and akin to the dog-day cicada, harvest fly, or dragonfly-like locust.

The periodical cicada, regarded by some as an American insect, is not a locust at all. It is a grasshopper, a member of the family of cicadellids and akin to the dog-day cicada, harvest fly, or dragonfly-like locust.

Has Little in Common. The real locust or grasshopper and the so-called locust or periodical cicada have very little in common—nothing, in fact, except that both occur in large numbers and both occasionally have been used as human food, the former mostly by certain peoples of the orient and the latter by the American Indians.

The real locust is an inoffensive insect. It has a long, pointed snout, its legs are jointed, its antennae are long, and its mouth is adapted for chewing. The so-called locust or periodical cicada is a grasshopper. It has a short, pointed snout, its legs are jointed, its antennae are short, and its mouth is adapted for chewing.

It is not the locusts that are feared, but the real locusts that are feared. The real locusts are not a locust, but a grasshopper. It is a locust, in the way of a signal for dread.

Every Effort Should Be Made to Stimulate Production of Substitutes for Sugar and Starches. The United States Department of Agriculture.

The sweet clover grows this year in the west—long established and well known in the west. It is a very hardy plant and it grows in the most barren soils. It is a very valuable plant and it is a very hardy plant.

Sweet Clover Is Recognized as Valuable Honey Plant. The United States Department of Agriculture.

It is not the locusts that are feared, but the real locusts that are feared. The real locusts are not a locust, but a grasshopper. It is a locust, in the way of a signal for dread.

Will War Follow Treaty

A majority of the delegates to the Peace Conference in Paris are anxious to sign the peace treaty without referring it to the United States government. The American and German delegates have no such anxiety. The treaty they sign must be ratified by the Senate and by the House of Representatives before it becomes effective.

The Sunset Magazine

The Sunset Magazine is highly gratified to be able to state to its many readers and friends that we have been successful in obtaining an extension of time to June 1st in our publishing program with this great western magazine for our new people. "The Sunset." We wish all our readers to join the big family of Sunset readers to avail themselves of this most liberal offer at once, as June 1st is the limit to which we can give you both these publications at the price of The Daily Times alone.

The Daily Times **ONE YEAR** The Sunset Magazine **\$5.50**

You must take advantage of the Daily Times-Sunset Magazine offer before Monday if you wish to get both of these publications at the price of the Times alone.

WOMEN SUFFERED MORE THAN MEN

BERLIN, May 27.—Germany's great war, that to the fact that have working out recalls of the German in great detail.

Hunger and worry cost the country for million upon million of lives, according to the German doctors, a figure more than twice the German losses on all fronts.

Germany's imaginary casualty list of four million babies in due to the condition of her women during the war, that to the fact that have working out recalls of the German in great detail.

German doctors, who have seen German casualties are inclined to take Germany's imaginary casualty list with a grain of salt.

The German doctors, incline to blame the blockade as being the source of all German health troubles. Influenza made quite an inroad upon the Germans, and the German scientists also the number of thousands of the "boon killed by the entire" until they told their view in an American newspaper one day.

German doctors for a while maintained a propaganda showing the percentage of the German race from the blockade which weakened them.

Prehistoric Lind Is Seen Through Jewels of Both Continents

CHICAGO, May 27.—Increasing demand for all-American jewelry, designed from ancient models, has brought to light a striking similarity between them and those of the prehistoric Hindoo civilization, separated by thousands of miles of ocean, with absolutely no knowledge of each other or the slightest means to come in contact.

The characteristic features of the Hindoo jewelry were its broad surfaces, massive construction, use of large stones and open-work ornament. The same features are equally true of the American jewelry, and of the jewelry of the Hindoo civilization, respectively to that of the latter was chiefly distinguished by its delicate beauty and minutely cunning workmanship.

Montezuma and the Aztec nobles—of their Toltec predecessors—wore magnificent colored jewelry, and so did the emperors and nobles of Rome at the same time.

How Diamond Cutters Work

Three Distinct Processes Before the Rough Stone Is Considered Fit for Personal Adornment.

Few people who wear diamonds know the story that lies behind them. The rough stone, the diamond as it is called, is of a general description—rough-looking, that attracts the eye in a jeweler's window and is purchased at a price of a few dollars.

The cutter, however, must first determine the number of faces the stone is to have. Finally, there is the polishing, which gives to them, facets, sharpness and brilliancy.

CHANGED IDEAS OF BEAUTY Women No Longer Go to Extremes Which Were Thought Necessary Some Centuries Ago.

What woman will not do to be thought beautiful is astounding even now, but listen to these facts and you will agree that in 19 century women really had gained something of common sense.

In 17th century they colored their faces blue and yellow.

The Peruvians did all sorts of stunts to fatten their heads, and everybody else had the Gallies women bound up their feet to stop the growth.

A recent haberdashers' strike in England raises once again the matter of tippling and to what extent we shall tip in one of the minor problems of life and one that certain necessities have solved in unprecendented fashion.

Not Now at All. Yes, sir; they had live predecessors in ancient Rome. The cork kind, you know. Why, a husband from Italy used to carry him safely across the Tiber in the line of Camillus and that's proof positive.

As for jumping jacks! When young hopefuls were with you as you flange one just out of his reach, Jim Tomlinson said that some Pharaohs used to have their same thing centuries ago back on the banks of the Nile. The proof? Well, the Pharaohs have been found to be Egyptian tombs.

Where's Hoopla Falls. Those who continue to amuse themselves with canals will agree that Hoopla explained everything but how to win—Columbus' discovery.

Home-Reading Course for Citizen-Soldiers

MAKING GOOD AS A SOLDIER.

The national army, in which you have taken your place, really carries on the American character and ideals.

The commissioned officers of the first contingent are picked men who have voluntarily gone through the hardest kind of training.

There are three basic qualities, without which no man can be a real soldier even though he may temporarily wear a uniform. They are: Loyalty, Obedience, Physical fitness.

A man without these qualities is in the way and is a source of weakness to an army, both in the camp and on the field of battle.

The articles of war in the United States set forth the military code which are punishable by heavy penalties. Among these crimes are desertion, cowardice, insubordination, drunkenness while on duty, sleeping while on duty, as a sentinel, destroying the watchword, and giving aid or comfort to the enemy.

A soldier's loyalty governs, first of all, his feelings and actions toward his country. It is the basis of his life. There can be no such thing as half-way loyalty. The slightest compromise opens the door to treason.

That a soldier's loyalty does not stop here. It governs also his feelings and actions toward the army and toward all the officers under whom he serves. It should be obvious that there are among both officers and enlisted men, or disrespect toward those in authority.

The second of the soldier's basic qualities is obedience, based on discipline. Obedience is the basis of order; it is what keeps the army from falling apart.

The third of the soldier's basic qualities is physical fitness. It is the basis of the soldier's ability to do his duty. It is the basis of his endurance, his strength, his speed, his alertness, his courage, his endurance, his strength, his speed, his alertness, his courage.

Physical fitness is the basis of the soldier's ability to do his duty. It is the basis of his endurance, his strength, his speed, his alertness, his courage.

Physical fitness is the basis of the soldier's ability to do his duty. It is the basis of his endurance, his strength, his speed, his alertness, his courage.
