Walkout of Repair Men at Los Angeles Ties Up Roads of Southern California

NO OVERLAND TRAINS TODAY POSSIBILITY

Salt Lake Route Tieup Is Reported Complete Embargo is Placed on Express Matter

MEN WALK OUT IN SYMPATHY

Declare They Will Not Return to Work Until Employees of Pacific Electric Company Are Restored to Old Positions

LOS ANGELES, Aug. 23.—A walkout of nearly 10,000 car repair men employed in the repair shops, the complete tie-up of the Salt Lake route, the placing of an embargo on all outgoing express cars, and the withdrawal of the ability to leave the overland route, have a more serious turn to the railroad strike.

Pacific Electric Strike

LOS ANGELES, Aug. 23.—Settlement of the strike of employees of the Los Angeles Railway company appeared to hang on one thread.

LOOKING FOR OWNER OF TWENTY TONS OF SUGAR

CHICAGO, Aug. 23.—Federal officials here are seeking the owner of 40,000 pounds of sugar which was confiscated in the railroad strike.

AVIATORS WITH FORKED EXPECT TO GO TO BORDER

DAYTON, O., Aug. 23.—Driven by Captain C. Cook and Lieutenant F. A. Davis, two German pilot planes left here today for Buffalo, N. Y.

LOCALS WILL INVADE BUHL SOIL SUNDAY

First Appearance of Twin Falls Team in That City This Season Tomorrow

With big Franchuch in the bow and a slink up in the batting order, the Twin Falls baseball club will journey to Buhl tomorrow. It will be the first appearance of the local club before the Buhl fans this year, the new ball park under construction there having caused the transfer of the other scheduled game to this city.

Manager Hart has secured Franchuch, a husky right hander, for this duty against Buhl. Franchuch is a hot weather pitcher who when in a hot good, has few equals outside the leagues. At Mottopier this season he has been pitching splendid ball. He is expected to stand the heat better on their heads tomorrow.

Ray Ebanks will be back of the bat Sunday, getting his first chance at batting since he joined the local team. Ebanks is a scrappy worker with a good throwing arm and will make a strong battery mate for Franchuch.

FROM THE PRESS BOX JUG

With a slogan of "watch us go next year," the Buhl baseball populace is getting ready to learn up somebody's league in 1937. A brand new baseball park, with a grass diamond in every thing is just one of the things Buhl is doing this year to build up a real club for next summer.

Next fall, however, the Buhl folks are laid out. Their park will be the finest on the circuit and they are not in producing that their team will be anything but a disgrace to it. Money is going to carry out a considerable amount of work. Money is gradually accumulating. Right now it would give a good argument to any of the leaders. The fun parting has noticeably thinned.

It is far next year, however, that the Buhl folks are laid out. Their park will be the finest on the circuit and they are not in producing that their team will be anything but a disgrace to it. Money is going to carry out a considerable amount of work. Money is gradually accumulating. Right now it would give a good argument to any of the leaders. The fun parting has noticeably thinned.

PLESTINA IS VICTOR OVER GIANT SWEDE

Freberg Is Knocked Senseless When Both Fall to Mat After Long Bout

Special to The Times

PHOENIX, Aug. 23.—As the climax to a great battle at Liberty Gymnasium last night, Marj Plestina was fitted handsomely to her opponent, the Swedish challenger, after they had grappled for more than an hour. An Alaskan in the air, Plestina sprang rapidly at Freberg, and the latter fell to the mat after a long bout.

MARJ PLESTINA
Who Successfully Defeated His Wrestling Opponent, Freddie K. Klose Last Night

Freberg carried off the honors in one round—the third. In every other round Plestina hit by such a wither that even the Alaskan supporters were forced to admit that Plestina's left continually found a resting place in the middle of the ring. In addition, Plestina scored repeatedly with his right and several of his punches shook his heavier opponent heavily.

TAGGING ALL THE BASES

The Giants beat the Cards again, but a "two" Winters, Dabner and finally Tony to tie it.

But the Reds lost no ground, draining the Braves again.

Alexander pitched, or in other words, the Cubs won.

The Tigers panted the lovely Athlete again, but remained stationary, the White Sox leading the score.

The only excitement in the Indiana was from the Red Sox was Babe Ruth's slugging, for his "finger" broke through.

The fans, remembering how hard Huhn had the ball, crowded forward, especially, but the big slugger only threatened.

Unable to beat "Injunction May," the Browns tried to get him rolled on the game on the charge that he had scored without "putting something on the ball." They lost both the game and their effort to cast May.

GOLF MATCH IS SQUARED AT MOON

PITTSBURGH, Aug. 23.—Playing the most brilliant kind of golf, Dave Heron the Pittsburgh promoter, and Bobby Jones, the northern marvel, finished the morning round in the championship contest at Oakland with the match squared.

The contest was fast and keen and the players were at the top of their form.

The gallery was thrilled by the excitement of the contest, many of them making \$25 to 500 in bets.

Jones was unfortunate in having several of his long pants run into the hole. Both men appeared confident when they stopped for refreshment.

TODAY'S BASEBALL RESULTS

National League

News and Comment of

MOTOR DOM

AMERICA'S LOW PERCENTAGE

Only 12 Per Cent of Present Mileage Is Improved—Little Built for Heavy Traffic.

The American public, though fast becoming awakened to advantages to be enjoyed by improved roads, may not realize the mammoth effort which must be exerted to catch up with European nations' highway systems. When Germany entered the war in 1914, France alone had 75,000 miles of hard-surfaced highways. In comparison the state of the two countries, the United States would amount to have 7,111,819 miles. The present road mileage in the states is 2,500,000, of which 12 per cent is improved and only one-quarter of that is constructed for heavy traffic.

GETTING RID OF ROAD TAR

Must Be Attended To Promptly or Unhappy Breaks and Spots Will Be the Result.

Unless washed off promptly with soap and water, road tar will quickly harden on a car, leaving unsightly streaks and spots. There are several good ways of removing it, however. One consists in the application of kerosene or oleomargarine which will soften the tar without injuring the varnish. Another good solvent is kerosene butter, which is used in the chemical profession for removing grease spots. This can be purchased at drug stores, and is a harmless solvent of all kinds of oil and grease, as well as tar.

U. S. Army Motor Caravan Makes Coast to Coast Trip

Less than a century after the gold rush of '49 when the overland journey from eastern states to California was one of extreme hardships, dangers and months of travel through trackless and desolate country, the U. S. Army motor caravan is making the same trip over nine after mile of state highways thoroughly posted with signposts and markers. Like the arrival of the gold seekers in '49, the arrival of the U. S. Army convoy in San Francisco on September 1st will mark the beginning of a new era. September first will be a day to write in the commercial history of the nation. The caravan's coast to coast run will demonstrate the practicality of long hauls by motor truck and will point out the necessity for a system of good roads linking one state with another. We are only beginning to realize the tremendous commercial possibilities that the motor truck presents.

If Lessons of War Are Not Forgotten We Shall Soon Have Good Roads

By O. P. BERKEY, Chicago Automobile Distributor

If the stern lessons we learned in months of war are not soon forgotten a national system of good and permanent roads will be enjoyed by the present generation of Americans. It is nothing less than a twentieth-century wonder that the automobile has attained its present popularity when we consider the average type of road on which our 5,000,000 passenger cars must run.

To date the automobile has received no stimulus from roads, as in France and England, unless you except such private projects as the Lincoln and Dixie highways and the progressive work of a few states. The passenger car and the motor truck have developed in spite of roads.

Like many other automobile dealers, however, I am optimistic enough to believe a new era of permanent road building is upon us.

Not only did the government learn the economic value of permanent roads during the eighteen months we were at war, but there are indications that it is now cognizant of its obligation to build a system of interstate trunk lines that will serve as military highways.

France demonstrated the importance of good roads. For men and good roads, permanently built and systematically maintained, could have withstood the travel of the allied armies with their trains of heavy artillery and motor lorries. The American soldier knows this, and when he returns to civilian life he will demand similar highways in this country, no matter how apathetic he may have been on such issues before he put on the khaki of the Yankee doughboy.

During the war, it was one of the big factors that made the work of the Service of Supplies possible. It transported men, munitions, and supplies, under the most adverse conditions that could possibly exist—over roads that were little better than rivers of mud and across country pitted with shell holes. So much importance has been attached to the war work of the motor truck that Secretary of War Baker described the world struggle as "a war of motor transport."

In the face of war conditions, the motor truck proved to be a practical means of transportation. What it may accomplish under favorable conditions is a matter to be considered by every alert shipper. The army convoy's transcontinental run merely forewarns what may be expected in the use of motor truck transportation in the future.

The B. F. Goodrich Rubber Company is particularly interested in the performance of the army motor convoy not only because of these reasons but also because the increase of truck hauling, which will be a result of the army's truck demonstration will stimulate greater activity in the manufacturing.

National touring maps were supplied to the country by the B. F. Goodrich Touring Bureau.

OUR fully equipped repair shop is available to all motorists.

Our skilled repairmen are ready to render complete tire service at all times.

We are glad to explain to all car owners the economy of Republic Tires.

We know from our own experience that Republic Tires do last longer.

We know that they wear down evenly and slowly—somewhat as steel wears.

We know they suffer very, very little from the cutting and chipping to which ordinary tires are subject.

HOISTING DRUM ON AUTO WHEEL

Addition of Small Device Makes It Possible to Use Car for Hoisting Purposes.

PUT ON DIRECTLY OVER HUB

Solid Piece of Oak May Be Quickly Attached or Taken Off—Heavy Loads Can Be Handled—Illustration Self-Explanatory.

In cases of emergency, the rear, or driving wheel of an automobile may be used as a drum around which the line from a hoisting tackle is wound. The power from the wheel, when turning free from the ground, is sufficient to exert great force in winding up the tackle rope. For that purpose, the drum described was designed to be attached directly over the hub, and to the spokes of the wheel. It may be quickly put on or taken off, and is

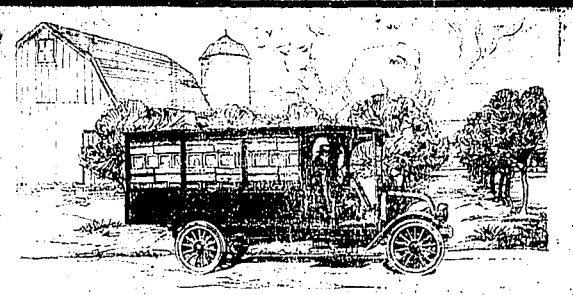

The Addition of a Small Drum to a Wheel makes it possible to Use of a Car for Hoisting.

small enough to prevent the wheel from turning under normal speed, from being unduly strained by heavy loads.

Dimensions of Drum. A solid piece of oak, about eight inches in diameter, should be turned up in the shape of a cone, five to six inches long. For large cars 1 1/2" may be increased in size. Surround the drum with a disk, somewhat larger, to fit snugly over the hub of the wheel. Then make three arms of strip iron, large enough to reach a good way up the spokes of the wheel. Bolt these at equal distances around the circumference of the drum, tighten them in flush.

How Hoisting is Done. To operate, back the car up until it is near the tackle, and "lock" up the wheel upon which the drum has been placed. The other wheel must be blocked so that it will not turn. Slip the hauling rope a few turns about the drum, then apply the power to the wheel and at the same time pull easily upon the rope, keeping it taut on the drum. In this way heavy loads can be raised that would otherwise be beyond the ability of two men to handle.—L. T. Hobbs, Newark, Miss., in Popular Mechanics Magazine.

Army Trucks Crossing Country. From Washington to San Francisco is the route by the first transcontinental motor caravan, which is to be completed on July 7 and will complete its journey September 1. The tour is designed to test the performance of equipment last purchased and evaluated. Data will be kept, which will form the basis upon which the army motor transportation department will establish a national motor statistics for public information. The daily run will average about 70 miles.

Haul More in Less Time

TO ACCOMPLISH more in less time is the ambition of every man just now, no matter what business he is in. Rapid and economical transportation of all commodities is a business necessity. To get a load to its destination in good condition with the least expense and in the shortest time possible is the job that has been put up to the International Motor Truck by thousands of business men—and the International has made good.

From the men using a single truck, to the big corporation owner, every day has its traditions, our truck has made good in a big way, from the standpoint of low operating costs as well as steady service.

You will be interested in the sturdy, powerful engine, the simple, efficient steering gear system, and the deep based rear axle. An inspection will convince you that the

International Motor Truck

is built to last, and built to give service under the harshest conditions, encountered in everyday work.

We are glad to explain the mechanical features of our truck and present you with the International Motor Truck, to build to last and give the kind of service business men want and appreciate. There is a style and size to meet practically all hauling requirements.

No End of Auto Shortage Seen

Hudson and Essex Dealer Says Fewer Cars in Use Today Than a Year Ago

Some startling figures regarding the automobile shortage are given out today by E. W. Johnson, of the Johnson Auto Sales Co. In response to many questions received from motorists as to when the present shortage will end.

"The improvement is widespread," he declared, "the tremendous numbers of new cars have been put into service this year. This is not justified by the facts. Figures show a decided decrease in the consumption of gasoline indicating that there are actually fewer cars in service today than there were this time last year. At first this seems unbelievable, but it is necessary to remember that the normal scrapage of cars amounts approximately to 250,000 a year, that production last year was the smallest since 1915 and that the output so far this year has been below normal due to the necessarily slow recovery from war conditions."

Every dealer knows that while production has been increasing constantly, the demand has grown faster than the output. "And this condition is apt to last indefinitely because more people are coming into the market every day for cars, due to the unprecedented and growing prosperity in all sections of the country. There is no end in sight. Wages are higher than ever before, prices of all commodities are going up constantly. Farm products are setting a new high record. This means that more people than ever before are buying cars."

"Government figures show that in January, 1919, there was a shortage of approximately 700,000 automobiles in the country. In 1918 the total production was 1,044,764 as against 1,737,101 the previous year. In 1916 the production was 1,428,617, so last year's production was the smallest since 1915. If there had been no production at all this year then the shortage would have been increased by 700,000. The output this year would have been about a million automobiles to which must be added the normal increase in the number of buyers."

"Normally, the output which represents the demand increases at the rate of forty per cent a year. So that to satisfy both the shortage and the new demand the output this year would have had to have been about 3,000,000. As a matter of fact it probably will be less than half this figure, according to present indications. This means that despite the increase in production, the shortage will continue all of this winter and most of next year before there can be the slightest indication of a slackening in the demand."

FARMERS MUST GUARD THROUGH SUMMER SEASON AGAINST ARMY WORM INVASION

The Army Worm and Some of its Insect Enemies. Parent or Moth, Upper Right-Hand Corner; Full-Grown Larva, Lower Left-Hand Corner; Eggs on Plant Stem; Pupae in Soil, Lower Right-Hand Corner; Other Insects Are Beetles and Wasps, Parasites of Army Worm.

(Prepared by the United States Department of Agriculture.)

The army worm has not a wide swath this year in the vicinities of Dallas and Fort Worth, Tex. State-wide efforts to prevent its second invasion failed, and absence of other crops gives ground for the hope that it may not appear elsewhere this summer, but United States department of agriculture entomologists urge all farmers in all states east of the Rocky mountains to remain on the watch for the pest until cool weather comes next autumn.

There are nearly three generations of caterpillars—the form in which the pest greatly damages crops by feeding upon them—in a year, but seldom or never are there two successive outbreaks in any one locality. The insects usually appear in the fields very suddenly, and it seems certain that the moths—the parents of the caterpillars—arrive at dawn in great numbers for many miles, in the direction of the prevailing winds, and alight in a body

LOSS FROM ARMY WORMS

In the eastern states alone, United States department of agriculture entomologists believe, more than 100,000 tons of corn and grain and forage crops has disappeared during the throe of army worms in the past 20 years.

The army worm feeds by preference upon grasses, both wild and cultivated; but when the grass-like grain, such as millet, which suffer severely in outbreaks. When in its early stages, corn, oats, and rice seem to be preferred in the order named. Alfalfa has suffered heavily in the southwestern states. Clover is occasionally attacked.

The larvae is plainly to be found in the grass-like weeds every shade of light. In this stage the army worm frequently consumes all of the food which near the place where it has developed from the eggs. When such is the case the caterpillars make together and crawl away in a body in search of other food. In the adult which has gained for the insect the popular name of "army worm."

Killing Worms in Furrows.
 It is the most effective method of the caterpillars which gives to the farmer the chance of destroying them in great numbers. Furrows are either plowed or dug completely around the infested area, or directly across the path of the caterpillars. In an infested area, a furrow is made in the shape of a cross which ditches the worms full into them, and can easily be destroyed by crushing them with a log wheel or roller. When such a furrow is made in the shape of a cross, the worms will crawl along the ditch bottoms and fall into the holes, where they may be destroyed by crushing or other means. If the soil is of such a nature that water penetrates, it will show, the hole may be partially filled with water. If the soil is of such a nature that water penetrates, it will show, the hole may be partially filled with water.

How to Identify Worms.
 The full-grown army worm is a nearly naked, smooth, striped caterpillar, about one and one-half inch long. Its ground color is usually greenish, and the stripes are about each side and a broad one down the center of the back, one dark and often nearly black. The stripe along the back usually has a fine, light-colored broken strip running down its center. The color of the body between the dark stripes varies from greenish to reddish brown. The head is greenish brown, spotted with black.

When corn is infested, spray with one of the following mixtures: 1. 50 gallons of water, or 1 pound of paraffin green and 2 pounds of freckle solution in 50 gallons of water. 2. 50 gallons of water, or 1 pound of paraffin green and 2 pounds of freckle solution in 50 gallons of water.

GENERAL FARM NOTES

The weeds are still with us.

The straw spreader has come to stay.

A brooding after a rain keeps the moisture in the soil.

Chaffage requires frequent cultivation for best results.

Sweet clover is making the country—a fine thing for the country.

Tomatoes and other vine crops should be tied to supports early.

A good windbreak is a great factor in the success of the orchard or garden. The repeated failure of many orchards may be held to the lack of protection from the winds of summer as well as winter.

Privilege His Desire

Harry was seven and he just returned home after a week in the suburbs. The Bat in which he lived is one where you can always hear the whistle of the train over.

The next day Harry was going to celebrate his seventh birthday, and his mother was making him when he desired for his birthday. And this was his answer:

"Mother, I don't want any presents. What I want is privileges."

Harry's father is trying to find a cottage for rent.

The mouse man takes both mouse and which shows of life and the world; he is either content of the happiness of one of these two creatures."

Read the Advertisements

Your real your newspaper to get the latest news. To get all the news you should read the advertising columns as thoroughly as you do items of local, national or world-wide interest.

For every advertisement is a news item. Each advertisement tells a story of its own—a story of commercial interest to you and your family.

Advertisements tell you what, where and when you can buy to best advantage.

Advertisements keep you posted on the latest improvements in every article of human need, whether food, clothing, articles of household utility, necessities and luxuries.

Advertisements have established standards of quality for nearly everything. You insist on that quality when you buy, perhaps unconscious of the fact that advertisements has implanted that standard of quality in your mind.

Your local merchants deserve your support and patronage.

INVESTIGATE PAPER SUPPLY

Senator Watson Declares Newspapers Are Dependent Upon Imported Pulp

WASHINGTON, Aug. 22.—In view of the decreasing supply of the American pulp used in the manufacture of news print paper, Senator Watson of Idaho today introduced a resolution in the senate today authorizing the secretary of agriculture to make a survey and preliminary report of the status of the pulp supply in the United States, but also in the central and western sections. The secretary is directed to make recommendations for pulp wood utilization. The sum of \$100,000 is asked to carry on the survey and investigation.

"Two-thirds of the news print paper used by American newspapers," said Senator Watson in introducing the resolution, "is imported or is manufactured from wood or pulp imported from Canada. One-third is made in the United States of wood grown in the Pacific States. The former proportion is steadily increasing, the latter decreasing.

"Nearly all of the news print manufacturing industry is located in the northeastern states, half of it in New York," the senator continued. "But in the Pacific Northwest, Washington, Oregon and part of Idaho, and in the inland empire of northwestern Montana and Idaho are great forests that have been to more than trebled by the few pulp mills in that section of the country."

Senator Watson said that in Alaska are enormous areas of forests that amount to nearly half of the news print paper used in the United States, but no pulp mills are there.

Senator Watson stressed the importance of a permanent domestic news print industry and recommended that the forest service of the department be encouraged in its work to prevent American newspapers from becoming dependent upon a foreign supply. To stimulate American production the senator pointed out, the following governmental policy should be carried out:

- 1.—Immediately, an adequate governmental survey of American resources in this field.
- 2.—Immediately, steps to bring about the practice of forestry and the conservation of forests in the pulp producing regions, to the end that the annual yields upon the forests will be increased, and eventually will be the centre equal to the annual growth. This part of the program would require federal and state legislation.
- 3.—Action by practical development of the pulp making industry in the northwest and Alaska.

The resolution was referred to the agriculture committee.

In one way Schilling Tea costs less than common tea: more cups to the pound.

In another way it costs more: You like it better. You drink it oftener, and you take more cups.

Now, of course you like the real tea-taste better than tannin-taste, and you know that tea is better for you than tannin.

So pay enough to get the real tea-flavor. Get Schilling Tea, the fine practical economical tea of this country.

There are four flavors of Schilling Tea—Japan, Ceylon, India, Oolong. English Breakfast. All in quality in parchment-lined moisture proof packages. All prices everywhere.

Executive Handies Who Rob Cheyenne Sailors

GAINSTON, Tex., Aug. 22.—Seven bandits who robbed several American sailors from the cruiser Cheyenne recently have been killed by Mexican soldiers under General Pablo Gonzalez in the Huastec region, according to a telegram received by Consul Meade Piro today. The bandits were identified by documents and property of the sailors, which was found in their clothing.

CANNOT FIND DEFINITION FOR JUST AND REASONABLE PRICE

WASHINGTON, Aug. 22.—Attorney General Palmer and the senate agriculture committee were still deadlocked today over the proposed amendments to the food control act to provide for price fixing.

Members of the committee have drafted a proposed compromise, but have not yet decided to attempt to pass it through.

Attorney General Palmer desired to have a conference with the attorney agriculture committee, which he has called today and invited to reach a tentative agreement.

The attorney general said the committee has no legal authority to determine "just and reasonable" prices without legislation and adding to the difficulty of the committee upon a definition of the phrase "just and reasonable price." He said that the committee agreed that it is not the attorney general's duty to determine "just and reasonable" prices.

FREEDOM AND RIGHT NEW GERMAN PRINCIPLES

LONDON, Aug. 22.—Embarked by Germany's Foreign Office today, the secretary of state for the colonies, Sir Herbert Morrison, said a New Agency should be set up to deal with the economic situation of the German colonies.

The president of the committee, Sir Herbert Morrison, said that the committee had agreed that it is not the attorney general's duty to determine "just and reasonable" prices.

Middlemen Take Toll of 5 to 50 Per Cent

LANSING, Mich., Aug. 22.—John Hubler, a retail grocer, testifies today in the circuit court before Judge Howard Weist that one of the reasons for the increased cost of the produce is the number of "middlemen" who have stepped themselves between producer and consumer of foodstuffs. Each middleman takes his toll of from 5 to 50 per cent on each item.

Attorney General Grosbeck announced that a recess will be taken this afternoon in the hearing until Tuesday when representatives of the "big five" packers will be placed on the stand.

MEXICAN EDITORS ARE CHANGING THEIR MINDS

WASHINGTON, Aug. 23.—The attitude of the Mexico City press with reference to the presence of American troops on soil of the southern republic is undergoing a change.

A note of irritation was evident in translation of press comments regarding Washington today. During the first few days following the dispatch of the Eighth cavalry to the border of the border, when representatives of the "big five" packers will be placed on the stand.

PALMER NOMINATION CONFIRMED BY MISTAKE

WASHINGTON, Aug. 22.—The senate will reconsider its confirmation of the nomination of A. Mitchell Palmer to be attorney general.

This afternoon's senate leaders discovered that the Palmer nomination had been confirmed in an executive session yesterday by mistake. During the executive session the Palmer nomination was sent to the desk with a number of nominations of postmasters.

A motion was made that they be considered without reading, so senator Cordell B. Chace, who was the only senator present, was asked to read the name of Palmer. "Palmer," he said, "was the only name that appeared in the executive session."

The senate will reconsider the nomination of A. Mitchell Palmer to be attorney general.

SIX INJURED IN AUTO ACCIDENT

COLORADO SPRINGS, Aug. 22.—Six persons were injured when the auto in which they were riding plunged down an embankment on the Platte Canyon highway, near Victor last night.

Among the injured are: Mr. and Mrs. A. H. Naylor of St. Louis; Miss Edna Ego of Holywood; Miss Mae Goeger of Cincinnati; and Frank Tower of St. Louis.

The accident is said to have been caused by a broken wheel.
