was badly demolished, otherwise it was put in running order at once.

The Junior sailing club was entertained at the home of Elizabeth and Margaret Hoover Monday afternoon. After sailing hours, games were played on the lawn. Refreshments were served. The next meeting will be held at the home of Adelaide Lloyd Friday afternoon, August 27.

Both Hall was taken to Twin Falls Tuesday to be under the care of a trained nurse.

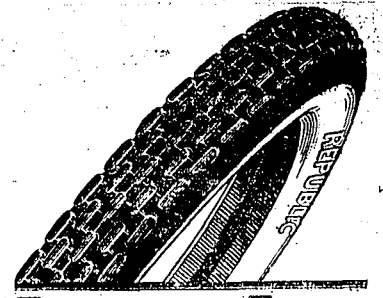

William Lindau spent Sunday with his parents at Idaho.

Joe Johnson and family left for Pocatello Wednesday. Mr. Johnson will undergo an operation for the removal of a diverticulum at the Clifford Tolman returned Tuesday from California to close up his business affairs. He says they are all well satisfied with their new home in California.

Mr. William Lindau has rented the W. P. Allen cottage.

E. R. Louder will move into the Weaver home soon.

George Decker has purchased the Alvarado ranch, and will take possession soon.

REPUBLIC TIRES
With SAFETY STUDS

PRODIUM PROCESS and Staggard Studs are the two things that make Republic Tires last longer.

Rubber toughened and strengthened by the Prodium Process resists wear in a really remarkable way.

The Staggard Studs present no sharp edges to be ground down rapidly.

The net result is slow, even wear—like the slow even wear of good steel—and decidedly longer tire life.

Republic Tires and Tubes, both Black and Grey, are made by

FREE ATTENTION FOR YOUR STARTING & LIGHTING BATTERY

We want you to get in the habit of letting us inspect your battery (regardless of its make) regularly. This we do free of charge, thus materially increasing the life of your battery. Should repairs be necessary we will make them at moderate cost.

The "Exide" Starting and Lighting Battery gives you a service on which you can always depend and at the very minimum of cost.

Remember! It's the battery chosen by the U. S. Navy for Submarines, the British and the U. S. Army. That's a recommendation that's hard to beat.

Take advantage of our free service.

Order Your Hudson Now For Later Delivery

Buyers Know the Advantages of Anticipating Their Wants With This the Largest Selling Fine Car

Constantly for four years Super-Six sales have exceeded those of any other fine car.

Buyers have had to wait a month or more during the selling season before they could get delivery of a Hudson. At this writing, we are far behind schedule. Yet factory production was never enlarged.

Thousands are driving less desirable cars that were accepted because they could not get delivery of a Hudson. Many frankly express their regret that they had not ordered a Hudson early enough to insure delivery in time to meet their needs.

Can There Be Any Hesitancy in Your Preference?

Four years have given universal recognition to the Super-Six. The patented principle in its motor, and destructive engine vibration and added 72 per cent to the power without increased weight or size.

That motor was developed by Hudson and it is exclusively Hudson's. In the recent model, the refinements resulting from 60,000 cars in service.

And then there are its official records of the most trying tests. No other car ever so established itself.

Some, at first, may have doubted the value of such proofs as were made of the superiority and its track record, racing so far as they relate to the type of car that would meet ordinary service. But no one now questions the importance of those records.

The factory mill for a stock chassis was not established in a week for Hudson orders to fill it. Nor was the twenty-four hour record of 1819 miles set as something that should be attempted by every Super-Six.

WEIGHT OF CAR WON'T INCREASE TIRE INFLATION

It is customary among automobilists when they pump air into a wheel which is leaked up, not to pump up to the required pressure, but to allow a few pounds for the weight that will come on the tire when the leak is removed.

This is bad practice, says an expert from the United States Tire Company's laboratories for careful experiments show that the weight of the car on the tire does not add even a fraction of a pound to the air pressure inside a tire.

AUTOMOBILE NOTES.

A magnet brush may be made by rolling a piece of fine mesh copper or brass wire gauge into a cylinder corresponding in size to the magnet brush and a carbon brush may be cut in length to do double duty.

After you have ruined a few spark plugs by removing them with a monkey wrench you will get a socket wrench that just fits around the plug and respects the gaskets from accident.

Go over the leather on the car occasionally with special leather dressing and the difference in the appearance of the upholstery will repay you a thousand times.

Wash your wheel spokes, especially if your car is an old one. If the spokes can be cleaned, tighten the bolts on the flanges of the hub.

It is hard to restore aluminum to its pristine luster, especially if it is difficult to get the finish back again.

In making a temporary battery connection the straps should be twisted up tight forming a loop by holding up to the right.

A cause of overcharging is a slipping fan belt.

Essex Meets Need for Lighter Cars

The general demand of the motoring public for greater economy with out the sacrifice of power, endurance or comfort is the greatest factor behind the announcement of the Indianapolis speedway that the 600-mile race for cars would be for cars of 183 cubic inch displacement, and Edw. S. Johnson, local Essex representative today.

Essex Indianapolis announcement followed the action of French officials in cutting down the engine class of cars to be entered in the Grand Prix. The previous limit at Indianapolis was 200 inches and the reduction is intended to foster greater efficiency in passenger cars along the lines established by the Essex.

The record of the Essex is proof of what may be accomplished about these lines. The Essex motor is only one centimeter inches in length, overall and the piston displacement is 179 inches. Nevertheless, due to its advanced design, it develops more than 100-horsepower. Thus it is obtaining greater economy through lighter weight without sacrificing power, performance or endurance.

"As the history of automobile development is largely due to the experience gained in racing, it is only natural that the Essex should have been developed by engineers who are guided world-wide fame for their endurance and speed of their cars. Built in the Hudson factory at Detroit, the Essex is the perfected development of years of successful achievement in building fine motor automobiles. The result is an advanced type of efficiency, performance and comfort.

"For years the tendency has been toward a car of this character. This is graphically illustrated by increasing requirements in recent years. Most of the races prior to 1911 were for cars of unlimited piston displacement. In 1911 and 1912 cars were limited to 500 inches which was further reduced to 450 inches in 1913 and 1914. The standard for 1915, 1916 and 1917 was 300 inches.

"This shows the constant search for greater lightness and economy combined with performance and endurance. The results have been achieved in the Essex through perfect balance which eliminates destructive vibration and thus lengthens the life of the car by an improved design of the gas passages which makes possible the utilization of every drop of fuel fed to the engine.

"The result is a car of long life, light weight, to be most economical in upkeep and with such a tremendous reserve of power that the trouble of changing gears is almost eliminated."

DAMPNESS IS HARD ON TIRES

Water inside a Good Cause Rapid Disintegration—Drier Roads Are Favored.

Wet weather is very destructive to tires that are partly worn out. The average motorist is apt to think of his tires as being made only of rubber, and therefore waterproof.

A newly worn tire is a long way from being waterproof, however, and other materials in the tire as its construction are decidedly subject to damage from water. When water gets inside the breaker strips of a tire and into the fabric and friction gum, it causes rapid deterioration. The reason why our good ratings make tires longer life is that they are made after rain. About the only good thing that can be said for our dry winter is the fact that tires last longer.

FOR CLEANING VALVE STEMS

Simple Way to Inject Little Kerosene—Oil Solvents and Washes Off Carbon.

A simple way of cleaning valve stems which are under suspicion of harboring carbon deposits is to inject a little kerosene in the air valve of the carburetor while the engine is running. In this way a little of the kerosene finds its way down the valve stem and softens and washes off the carbon. It is no bad idea to do this once a month or so.

Shift Cross Links.

It is a very good plan to shift the cross links of the main chain at the time to time. That is, move them so that they do not depend on the same link of the main chain all the time.

To Clean Battery Terminals.

A strong solution of washing soda is the best agent for cleaning battery terminals that have become corroded. After drying the terminals should be coated with vasoline.

Carriage of Farm Products.

The motor truck as a medium for the carriage of farm products is being assumed a permanent place in the general scheme of transportation.

Always Carry a Rope.

One of the most useful things to carry in the car on tours is 25 feet of half-inch manila rope, which has almost endless uses.

Necessary Adjustment.

Why is an adjustment necessary? Do not make it unless it is.

Murtaugh News

John Neilson has purchased eight acres of land in Christ Station.

Miss Wilfrida Beers and Nettie Matthews left Wednesday for Crystal Springs.

Mr. Carlson has sold his farm consisting of 40 acres in Christ Station. The W. A. H. class gave a lawn party at the home of Edna May Wednesday evening. The evening was spent in games. Refreshments of ice cream and nuts were served. Those present were Edna May, Hazel Russell, Geo. and Emma Sellers, Miss Sherry, Louise Litchfield, Jessie Jones, Cora Stone, Alma Jain, William Hildan, E. C. Dyer, Orlan Johnson, John Akland, Everett, Loyd and Francis Lind, Tom Williams, Bob Russell and Mr. and Mrs. C. V. Stephens.

Larry Russell has been elected for property to assist in the duty.

Joe Hanson of Salt Lake was a Murtaugh visitor Tuesday.

Mrs. Myrick and little daughter Myrtle left Monday for Utah to visit a sister.

School begins Wednesday, September 1.

Mrs. Ed Tracy and daughter Cora returned Tuesday from a month's visit with relatives at Boulder, Colo.

Mr. Wilbur, who has been visiting his son, Albert Wilbur, returned to his home in Ardenwood Tuesday.

Both Hall is quite sick.

Mr. Wendell has been visiting her brother, Gus Johnson, at Monday for a short visit in Logan, Utah, before returning to her home in Ardenwood.

Dr. Davis of Kimberly was a visitor in Murtaugh Tuesday.

Miss Deane Joyce spent Monday in Ardenwood.

Miss Calla White of Missouri arrived in Murtaugh Monday to assume her duties as chamber in the city.

Miss White will be a new escape Monday while attempting to get over the Dry Creek grade. The two front wheels of his car went over the side and the car was left a distance before the car stopped. He was bruised by collisions but is able to be out. The top of the car

So, Too, Is Its Style Equally Distinct

The boulevard of the great cities where what is most wanted in body lines and general equipment. Can you find more beautiful cars anywhere than are the Hudsons? You may get vague, Hudsons foremost the trend of motor car design. As a result a one or two year old Hudson has the same general lines as the current models of most other makes.

There can be no disappointment over the beauty of the Super-Six, regardless of the model you select.

The Wisdom of Buying Now

With these evidences, is there any good reason why you should not now place your order for a Hudson?

You know the car you will get. It merits your implicit confidence.

Think of the thousands who this year have had to forego the pleasure of owning a Hudson, just because they put off ordering. What a disappointment to be taken in buying a Super-Six had to be changed.

All the world is crying for automobiles. The demand can not soon be filled.

Hudson, as the largest selling fine car, must as a matter of right continue the first choice. Only those who place their orders in advance of their needs can be sure of getting the car they want.

HOW MANY MILES OF HIGHWAY ARE ENTITLED TO STATE AND FEDERAL AID?

The chapter on "Federal Aid" in the report of the highway commission is perhaps the most delightfully indefinite of any, and seems to have been made with the purpose of telling nothing, or as little as possible.

It may be learned from this chapter that the commission is "advised" that we are entitled to federal aid in the construction of post roads in an amount equal to one-half the cost; on state highways not used as mail routes in an amount equal to one-third of the cost of construction, and of some roads to both state and federal aid; that roads of the state bureau of public roads and federal aid; that the supervision of the state bureau of public roads and federal aid must be granted before construction begins, or the highway district must stand the whole expense. Then follows a part of the requirements of the federal bureau of public roads if justification of the "complete surveys that have been made" and which furnish a part of the excuse for not proceeding with construction work.

Of the 250 miles of road construction in the commission's program, it is a hidden secret how many miles come under the provisions of the state and federal aid laws. So it is utterly impossible to form an intelligent opinion as to the amount of state and federal money which will be available, or applicable to the Twin Falls highway district, or if any such money will be available, or when it will be available. It is stated explicitly that all federal aid must be secured through the state bureau of public roads, but whether application has been made, or if not made, when it will be made, is not even suggested.

The commission knows of no reason why the crusher plant should not be completed and in full operation not later than October 1. If the money invested in the crusher plant and in the product of the crusher plant is considered as outside the meaning of the words "road construction," in constructing the federal and state aid laws, and as an expense in the road building program that must be borne entirely by the district, it is immaterial whether state or federal aid shall be granted before the outlay of money in the enterprise. But if, furnishing the crusher plant and building the crusher plant are properly a part of the definition of "road construction," it is a very material point. Upon an interpretation of the meaning of the words "road construction" depends absolutely whether the highway district shall bear the expense alone of crushing 300,000 cubic yards of rock, at \$1.50 a yard, or \$150,000, plus the cost of the plant, \$125,000, or a total of \$275,000—nearly half of the entire bond issue of the district.

The commission, if it is proceeding with the work of building the crusher before making application for state and federal aid and before that aid is granted, if it is proceeding on an assumption that such work is not within the meaning of the words "road construction," may be funding the highway district with the total expense, one-third, one-half or two-thirds of which may be rightly and justly charged to the federal fund, the state fund, or to both.

On the other hand, "the complete surveys that have been made by the district's engineers" may already have been approved by the state bureau of public roads, and state and federal aid granted, so that the proportions of the cost of the crusher plant and the rock that will be produced there, as usual as it is ready will be distributed among the funds of the highway district, the state and the federal governments. Nothing appears in the report, however, to justify this rosary view of the situation. From the report nothing can be gleaned other than that the commission "felt justified in assuming" that "road construction" does not include furnishing material for such work that the \$275,000 for rock crusher and crushed rock and the \$125,000 reported expended up to August 1, as a total of \$400,000, more than half of the total bond issue—is an expense to be borne by the district exclusively.

REST FROM PRICE WORRIES

Here is a soothing picture for contemplation in the midst of all the unrest, discontent, H. C. L. discussion and peace treaty argument. It is taken from the National Geographic magazine, and is Herschel's description of our solar system in terms which may be easily grasped by any ordinary human being.

Imagine a circular field two and a half miles in diameter, place a library globe two feet in diameter in the very center; 82 feet away put a mustard seed. The globe will represent the sun and the mustard seed mercury.

"At a distance of 142 feet place a pea, and another at 215 feet. These will represent Venus and the earth, both as to size and distance. A rather large pinhead at a distance of 327 feet will speak for Mars, and a fair-sized tangarine a quarter of a mile distant will stand for Jupiter. A small lemon at two-thirds of a mile will play the role of Saturn, a large cherry three-fourths of a mile will answer for Uranus and a fair-sized plum at the very edge of the field will proclaim Neptune. One would rather not go into the actual distances and dimensions in his first lesson. The two-and-a-half-mile field with its varie-

gated assortment of planets is interesting enough and impressive enough to hold the attention for a few minutes.

Anyone who will go out into his back yard on the next clear night and try to locate the members of this vast system that are on exhibition is guaranteed an evening's entertainment free of cost and a brief period of complete forgetfulness of the price of shoes and butter and fruit in season, and of the interminable arguments in Washington.

ARMY EXERCISE

A new order of the war department requires military officers below the rank of brigadier general to take exercise of some sort "one-half day each week, exclusive of Sundays and holidays."

Almost any kind of exercise will fill the bill, except automobile riding and bridge work. (Oh! is acceptable.) If an officer is more vigorously disposed, he may go swimming, or indulge in a riotous game of baseball or tennis, or even go to the Rooseveltian extreme of fencing, boxing or wrestling.

The only warrior civilians may feel about this matter is that half a day should be deemed sufficient. Army-offering in piping hot weather tends to become a sedentary occupation. Well-schooled is the adipose plump in which President Roosevelt found his officers, and the construction that arose when he ordered them to take a hundred-mile horseback ride to prove their fitness.

The present administration is doing nothing so cruel as that. It seems to be erring in the opposite direction. What sedentary civilian would think it possible to keep physically and nervously prepared for war's alarms on half a day's exercise a week? And why are brigadier generals and their superiors exempt? It is designed to keep fat men in the top jobs, so as to preserve good nature in the army.

As for the privates and petty officers, they will like their fat off as usual. So will vice civilians, if they are able to accommodate any fat in these proflitering times.

Did anybody ever have so many comments as Andrew Carnegie?

COMMENTS

BY A TAXPAYER

When the Hansen bridge was finished there was a splendid celebration in honor of the event and the public was cordially invited to attend. But when the Twin Falls plant was completed, there was no public demonstration to show the taxpayers how the thing was done. We were none of us invited out to see the filter in operation.

There may be many reasons for this, of course, but probably the most logical one is that the filter has never been operated except "for test purposes," according to the report of the state bureau of health. There are a good many hundreds of citizens of Twin Falls who are wondering how they have gone and how right the test was and why the filter was then abandoned.

This summer would have been a good time for a banquet of jubilation over the water-works system. Held at the river-raft, fish could have been served, and the water could have been filtered through the plant. This could have been arranged with slight more-for-letting-fresh-and-trickling-water-the-plant-and-there-is-in this connection, it occurs to us to ask what needs to be done to make a thing which has already been completed.

Various attorneys in Twin Falls have been consulting considerable time, but looking up the law on the matter question in the history of judicial precedents. The point of precedent is not making. Why will he be first to try the thing out? When the city's representative calls on you for the purpose of digging up your straw-beds and planting a motor in their place, what are you going to say? If you didn't order the motor, why are you sitting on a bench and taking it? Some of us have our answers pretty clearly in mind, and we intend to "speak right out in meeting."

Kimberly Items

Mrs. M. E. Reed who for some time has been in the city of Kimberly, was accompanied by her family, returned to her home in Davenport, Idaho, accompanied by her grandson, Frank, who came here only a short time ago.

Miss Jessie Hulbert and Lloyd James visited at Shoshone Wednesday afternoon to visit with Rev. and Mrs. W. J. Jones and family.

Alvin Arndick of Rock Creek was visiting with George Hillis here Wednesday. Mr. Arndick said for the first time in June, 1917, as a marine recruit, and has been home only a short time. He is now visiting at the E. H. Hatter home at Rock Creek.

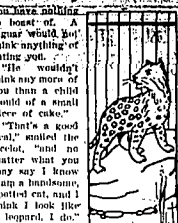

Mrs. Stella Swearingen was shopping in Twin Falls Thursday afternoon.

Oscar Jones of Jerome was a business visitor in Kimberly Friday.

Mr. and Mrs. H. A. Crick were Thursday afternoon in Kimberly.

O. D. Hills of Hansen was a Thursday business visitor here.

Mrs. Otto Grandt who has been staying with her sister, Mrs. O. J. Jones and family, returned to her home in Paterson, N. J.

NOTICE
Owing to the increased cost of living the organized laborers of Twin Falls are compelled to raise their wage scale for common labor to \$3 per day, which scale to take effect the first day of September, 1918.

International Lumber Carriers Building and Common Laborers Union of America, Local No. 357, Twin Falls.

Tailored Frocks of Tricoline and Serge

The beauty of the straight line silhouette is most cleverly brought out in these Fall Frocks by embroideries which adorn bodices, skirts and even sleeves. Many models seem to have eliminated every suggestion of a waist line and instead they have acquired unusual youthfulness. Russian types are also in evidence. Browns and other colors are here, but navy blue, as ever, leads.

A love of a dress is this Dark Brown Satin. Has round neck with a bit of real lace as trimming. Peplin overskirt of panel effect, sleeve reaching just below the elbow and in a flare. \$65.00.

A navy blue suit sure to make an appeal to many. Long straight style with a wide girdle of same material with a conventional design in pretty colored beads. Side panel in full drape effect. Long sleeves. \$58.50.

A smart, distinctive gown of navy tricollette and georgette. Has peplin of novel combination georgette and tricollette. A charming gown for afternoon wear. \$65.00.

LINE OF MARCH FOR LABOR DAY PARADE GIVEN

Local Union Men Ready to Turn Out Strong Monday—Band Will Lead Procession

Final announcement of parade plans for Labor Day was given today by the Central Labor Union, showing that between fifteen and twenty unions will take part in the big procession here Monday morning.

Members of organized labor will assemble at the Idaho Department Store corner at 9 a. m. to form the parade. With a band leading the parade will start promptly at 9:30, moving along Main avenue to the post office corner. It will then turn north to Second west street, then go east to Third street south. From there the line of march leads north to Main avenue, then west to Shoshone street, then north to the city park where the parade will end.

The order of march is given as follows:

- Band.
- Leaders.
- Carpenters.
- Plumbers.

Immediately after the parade the public speaking will take place at the park. Introductory remarks to the chairman will be followed by invocation by Rev. W. A. Moore after which E. F. Ostrom of Nampa will give the address of the day.

Local News

S. G. Hull, piano tuner. Phone 81. Rogerson Hotel.

Marriage License—License to wed was issued yesterday to F. H. Parman and Lula M. Bohom, both of Rupert.

Building Permit—A building permit was issued yesterday for J. W. Stubbins for a \$2,000 residence in Stubbins' addition.

Military Discharge—A military discharge paper has been filed for record by E. H. Finley.

Work at Filler—Striking rock while working through the low line canal bank to connect the new filter tank, work on the construction is proceeding at a less rapid pace than expected. It is thought, however, that the work may be completed during next week.

Car in Shop—An automobile was stolen from Charles Florvold last evening at Filer while he was attending a dance. No trace of the car has been found today. It was a five passenger Ford.

Sidney Lytle, the piano tuner, is at the Perrine Hotel.

Patrick Paroled—Archie Patrick serving a jail sentence for receiving stolen property, was paroled yesterday by Judge Buehler. He gave a \$500 bond for his appearance as witness at the coming trial of H. L. Jordan on a charge of stealing the property, a saddle, which Patrick received.

Arrested for Theft—John E. Barr has been arrested at Boise on a warrant from this city, charging him with theft. Barr was here on a short time ago, acting as sales agent for Republic trucks. He is accused of stealing articles ranging widely in variety from bacon to baby clothes.

Two Weddings—Lula M. Bohom and P. H. Parman of Rupert were joined in marriage yesterday afternoon by

Rev. W. A. Moore at his study. Rev. Moore also united Carl Peck of Bluff and Mary Otto of Filer yesterday afternoon, the ceremony being performed at his home.

Moving Here—J. E. Pughman and family are moving from Amsterdam to Twin Falls.

On Business Trip—D. M. Denton and J. O. Noggle have gone to Edmund, Oklahoma, for a business trip.

Leaves on V.H. Mrs. John Langlebach left yesterday for a visit with friends in Spokane.

Change Hinds—An electric meter form, and two residences were sold yesterday by the D. M. Denton Realty agency yesterday. It is reported.

Sidney Lytle, the piano tuner, is at the Perrine Hotel.

More Here "Top"—Another of the examples of real estate activity in this city is reported by The Exchange Realty Company which sold a forty acre farm and five houses just two days this week.

Visitor Here—Dr. William C. Nelson, just returned from France, is making a short visit in Twin Falls with his wife and two young boys on his way to Los Angeles.

Couing Home—Mr. and Mrs. Howard Swoop will arrive here tomorrow from Camp Grant, Illinois. Mr. Swoop having just received his discharge from military service.

Former Pastor Here—Dr. J. J. Sheppard, former pastor of the First Presbyterian church, is here from Trinidad, Colorado, and will preach the pulpit of the local church Sunday morning. Mr. and Mrs. Sheppard arrived in Twin Falls Friday noon for a week end visit with their many friends, having just completed a month's vacation with their daughters in Fruitland and Boise. They are now enroute to their home in Colorado.

WANTED—Rooms and board for students. Phone 526. Gregg Business College.

COMPLUSORY EDUCATION ACT, Sec. 160-A1, XVII—Idaho School Law.

In all districts of this State, all parents, guardians and other persons having care of children shall instruct them, or cause them to be instructed, in reading, writing, English grammar, geography and arithmetic. In such districts, every parent, guardian or other person having charge of any child between the ages of eight (8) and sixteen (16) years, shall send such child to a public, private or parochial school for the entire school year during which the public schools are in session in such district. PROVIDED, HOWEVER, That this chapter shall not apply to children, over sixteen (16) years of age, where such child shall have completed the eighth (8) grade, or be eligible to enter any high school in such district, or where its help is necessary for its own use in its parent's support, or where its good cause shows it would be for the best interest of such child to be relieved from the provisions of this Chapter. PROVIDED FURTHER, That if a reputable physician, within the district shall certify in writing that the child's bodily or mental condition does not permit its attendance at school, such child shall be exempt during such period of disability from the requirements of this Chapter. It shall be the duty of the superintendent of the school district if there be such superintendent, and if not, then the County Superintendent of schools to hear and determine all applications of children, desiring, for any of the causes mentioned here, to be exempted from the provisions of this Chapter. That if the superintendent or County Superintendent hearing the same shall be of the opinion that such child for any reason is entitled to be exempted as provided herein, such superintendent shall issue a written permit to such child, stating therein his reason for such exemption. An appeal may be taken from the decision of such superintendent so proceeding upon such application, to the probate court of the county in which

Get Acquainted With Your Own Teeth

By DR. PARKER
Founder and Executive Head of the E. R. Parker System

BRUSHING the teeth two or three times a day is fine, but it doesn't go far enough.

No toothbrush ever made and no amount of brushing with any tooth preparation will altogether stop the tendency to the formation of tartar upon the teeth, and when tartar forms, the foundation is laid for tooth troubles without end.

Your only salvation lies in having a thorough examination of your teeth made by a dental specialist who knows how.

Registered Dentists using the E. R. Parker System make these examinations without any charge, and the examinations are so complete that you have the satisfaction of finding out the condition of every tooth in your mouth.

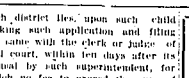

You can also find out in advance how small the price will be for such dental work as you may need. Why not have a free examination of your teeth today according to the accurate E. R. Parker System?

Dr. R. J. Greer Dr. M. J. Welch Dr. M. E. Ruby
Dr. Thomas Ford Dr. V. A. Fitzgerald

Registered Dentists Using the E. R. PARKER SYSTEM

PEOPLE GET RICH IN TWO WAYS

The minority through skill and success in investments and trading. The majority through systematic saving of small sums.

If you save a dollar a day at the Twin Falls National bank, the principal and four per cent interest will amount to \$1,967.84 at the end of five years—\$4,557.74 at the end of ten years. Smaller deposits than One Dollars earn the same interest and will increase proportionately. A Savings Account is the sure way.

A GOOD RANGE

—AND—

GOOD COAL

WORK BETTER TOGETHER

That's Why We Are Using

Kemmerer No. 5 Coal

During the Demonstration of the

SOUTH BEND MALLEABLE RANGE

A STATEMENT

We find we get better results from Kemmerer Number 5 Coal. That's why we have used this coal for our demonstrations all over the west.

J. LESLIE ANDERSON,
H. B. MARSHALL.

Here's an endorsement by experts on not only ranges, but coal: They are at Reynolds Brothers giving a FREE DEMONSTRATION of the SOUTH BEND MALLEABLE RANGE. The range that is giving satisfactory service in more than a million homes. They have traveled all over the country giving these demonstrations and have had an unusual opportunity to study coals and learn which produces the best results—

It Proved to be Kemmerer Number. 5

YOU CAN PROFIT BY THEIR WIDE EXPERIENCE
NO MATTER WHAT KIND OF A RANGE YOU USE
IF YOU BURN KEMMERER NUMBER FIVE

Genuine Kemmerer No. 5 for Sale Only By

CITY COAL COMP'Y

Free Coffee and Rolls served during the demonstration this week at Reynolds Brothers. You are cordially invited.
