

AROUND WORLD NEXT AIR FEAT

Some Aviator Expected to Emulate Magellan by Long Cruise.

STILL NEW TO MANY LANDS

National Geographic Society Says There Are Many Places Where Airplane, Automobile and Even Horse Would Be Curiosity.

Washington, Sept. 24.—"Now that the Atlantic has been crossed and there are plans afoot to fly over the Pacific, the day may not be far distant when some aviator will make an airplane tour around the world," says a bulletin of the National Geographic society.

"There are still many corners of the world where airplane, automobile and even the horse would be a curiosity, and if a man set out to tour the globe and to do so on the roughest of roads, it is not to the pleasure of the world's people that he would have to go."

"Theoretically a donkey in Spanish America and in the Holy Land, a camel should be a camel to traverse African deserts.

"Cross some rivers of India on the rafted skins of buffalo, and others by a raft of logs."

"Using Elephant as Taxi."

"Submit to the seething motion of an elephant when he continued his journey in India."

"Get into a man-of-war's port on the coast of California."

"Doll over for Eastern roads in a motor coach about that drawn by oxen."

"And in China he prepared to climb into a junk, a solar chair or a wheelbarrow."

"A few of these curious means of travel are described in a communication to the society by O. P. Austin, as follows:

"In all parts of that great land of China, stretching from North Africa across Ceylon, to Northwest China, the camel is everywhere in evidence; his total number in the world being estimated at about three millions."

"Not only is the camel a valuable freight carrier, but he serves as the traveling car of the Rockies, the Caucasus, the Alps and the Himalayas, the camel is the pack animal of the desert. When he is chosen for this mode of transport, he wears a light framework of poles upon his back and is loaded with cloths to protect the occupants from the sun and the observation of the passers, and decorated with pompons of various colors. In this gorgeous ornament, which may be as highly trimmed as the palace car of the desert, the master of the camel train places his wife and children, his choice merchandise, his cooking utensils and daily requirements, and travels in state, the observed of all observers, the envy of the wandering natives of the desert."

"Craft on the Euphrates."

"On the Euphrates and the Tigris only remained the curious water carriers of centuries ago—the raft of skins and the circular boat. These rafts are sustained by inflated skins, prepared for the purpose of use, after the raft, float down the river to its destination the inflated skins are removed, the air permitted

Neutral Course at Fiume Advocated

WASHINGTON, Sept. 24.—Steps were taken in Washington today to prevent action by the United States government against Gabriele D'Annunzio and his forces, who are now in control of the disputed city of Fiume.

Representative Husted of New York introduced in the house a resolution providing that it is in the best interests of the United States that the United States should not participate in any military or naval operation against the Italian forces under D'Annunzio now in control of Fiume, and should not attempt to influence the action of said forces or of their commander by a show of force or otherwise. The resolution was referred to the house foreign affairs committee and a public hearing will be held.

POCKET RAZOR STROPE SAVES SOLDIER'S LIFE

CASPER, Wyo., Sept. 24.—A small pocket razor strope in the cherished possession of the great war in Germany saved the life of a British soldier, a young sergeant, who was shot during the action of said forces or of their commander by a show of force or otherwise. The resolution was referred to the house foreign affairs committee and a public hearing will be held.

"To escape, and the slow carefully pulled and curled back to the upper waters, where they are again inflated and used as the support of another and another raft."

"Even more curious to the eyes of the traveler from other parts of the world are the primitive modes of watercraft used in the Tigris and Euphrates rivers."

HERE'S NEW FINANCIAL 'WIZ'

John Fixes the Pump So That His Wife Can Talk in Washing; Charges Her \$1.

Waukegan, Ill.—John Newell of Zion City can lay claim to unique distinction as a financial genius. In the eyes of the judicial court in Waukegan his daughter, Grace, who was taken to Geneva school for six, died and she had been forced to support the family and pay the bills for her father and her mother was compelled to take in washing. One day the pump broke down and she charged her father \$1.00 for getting water so she could do a washing. She asked her husband to fix the pump, Grace said she was charged her father \$1.00 for getting water so she could do a washing. She asked her husband to fix the pump, Grace said she was charged her father \$1.00 for getting water so she could do a washing.

RUSSIAN BRIDES LEAVING MURMANSK WITH U. S. HUSBANDS

Group of four Russian brides on the dock at Murmansk, north Russia, ready to leave on a transport with their American husbands.

Yankee Dead Will Rest in Flanders

PARIS, Sept. 24.—Many of the mothers of our soldier dead in France can never be returned to rest in their native soil. It is even doubtful if relatives and friends of hundreds of these mothers, who made the supreme sacrifice over here would want their remains disturbed if they knew the circumstances under which they were buried. It is a delicate subject that the army authorities have only hinted at in their desire to give bereaved mothers and fathers unnecessary pain. To put it as gently as possible, many bodies were buried in such haste during the hottest fighting that they are in no condition to be moved.

TROTSKY SHOWS TEETH TO WEST

PROMISE ROUGH TREATMENT TO ENGLAND AND ESTHONIA AS BOLSHEVICKS TAKE CARE OF KOLCHAK PROPERTY.

PHILADELPHIA, Sept. 24.—Threats against the entire and Esthonia are contained in a fiery speech of Leon Trotsky, the bolshevik minister of war in a speech to the Petrograd soviet, according to cables from Petrograd today.

"The soviet from the Petrograd soviet of war in a speech to the Petrograd soviet, according to cables from Petrograd today. The soviet from the Petrograd soviet of war in a speech to the Petrograd soviet, according to cables from Petrograd today.

1918 Cement Output Low. Complete statistics of the output of hydraulic cement in 1918 compiled under the direction of Ernest F. Burdette of the United States Geological Survey, indicate a marked decrease from the output in 1917 and show that the production of Portland and other cements in 1918 was the lowest since 1912.

Scotland Turning to Peace. In Scotland the progress from war to peace is proceeding at an active pace. One of the new specialties in the manufacture of internal combustion engines authentic for 1919 before the war. In the northeast in multiple factory has turned to the manufacture of chronometric engine by Germany, while in Glasgow two machine has superseded war material and gives employment to numbers of discharged soldiers.

HAPPY THOUGHT. Leading Man to do the stranded (troop)—Sitting to do not walk back to dear old Broadway, methinks. Leading Woman—But think of the expense! Inquire—And the rest of it? A Hot Spot Chalmers Costs \$1685 f. o. b. Detroit

THAT is the price of the five-passenger model. great cars of the world today. It is one of the largest selling six-cylinder cars, it holds the world's 24 hour record, and it has multiplied its friends in all the great centers.

Yet it's not merely a "boulevard car," although it is well dressed; and it is not a "one year car," as it runs even better the second and third year than the first.

The great advance of Chalmers is due to Hot Spot and Rati's-Hot.

If you've been driving a \$5000 car come in and take one ride. You'll forget your evening engagement.

It's true it's a quality car, quality all the way through; it looks well when purchased—and four years after—and it often runs 10,000 miles without a penny's outlay.

And it has in Hot Spot and Rati's-Hot two devices that lift it entirely out of its price field and make it one of the few EXHIBITS PLANE WHICH WILL RISE VERTICALLY. NEW YORK, Sept. 24.—The model of an airplane which will rise vertically being exhibited at the rooms of the Aeronautics Society here by W. J. Beach, an inventor. The fundamental principle of Mr. Beach's invention is that it is lifted straight from the ground by means of revolving aeroflutes rotated from their outer periphery. Horizontal and longitudinal stability is assured by revolving ailerons and stabilizers. Because of the revolutionary effect such a plane would have on the airplane market, the exhibit is attracting more than passing attention.

Big Opening of Irrigated Land

In the Very Heart of the Best Section of

IDAHO

18,750 Acres of Irrigated Land Reclaimed Under the Second Owsley Project

Located in Jefferson County, Idaho, the Famous Upper Snake River Valley, Near Roberts and Hamer, Idaho, on the Main Line of the Oregon Short Line Railroad

OPENING TO BE HELD AT ROBERTS, IDAHO, OCTOBER 9, 1919

Second Owsley Project—Location

The Second Owsley Project is located near Crystal Lake (formerly called Mud Lake), Jefferson County, State of Idaho, and is accessible either from Hamer or Roberts, Idaho. The pumping plant is located about thirteen miles west of Hamer and about twenty miles northwest of Roberts. Roberts and Hamer are located on the main line of the Oregon Short Line Railroad, about half way between Salt Lake City, Utah, and Butte, Montana.

Approved by State

The land under the Second Owsley Project was surveyed under the Carey Act and a contract entered into by the State of Idaho with the company to reclaim the land for the State and Government. Profiting by fifteen years of Carey Act developments in the State of Idaho, the State has maintained a rigid supervision over the Owsley Project at all times and all construction work has been under the direct supervision of the State Engineer.

On October 17, 1917, Frank F. King, State Engineer for the State of Idaho, in a report to the State Land Board, stated: "I think it is safe to assume there is easily 50,000 acres of land of this character, and I believe there is water enough for two or three times the amount it is proposed to irrigate."

In a report made December 3, 1918, by State Engineer Fred A. Wilkie, he states: "In conclusion, I am satisfied that there must be in the neighborhood of 100,000 acre feet annual inflow to Mud Lake. This would give an ample supply for at least 20,000 acres of land."

In his final report, State Engineer Warren G. Swenson, said: "This is the first project ever built in the State of Idaho that was complete ahead of time, and the character of work and the project in general is the best piece of construction that has ever been done of any Carey Act Project within the State."

Approved by the Government

At the time that the land was temporarily segregated by the Federal Government an exhaustive study of the Owsley Project was made by the Federal Carey Act Inspector, both with reference to the physical features affecting the development, and with reference to the water supply.

In an able, exhaustive and profitable study of the water supply covering a period of approximately five years, made by George B. Archibald, Federal Carey Act Inspector, with reference to the Second Owsley Project, he stated in his report to the Commissioners of the General Land Office in May, 1917: "There appears to me to be no question as to the fact that at least one hundred thousand acre feet entered Mud Lake and the associated bodies of water during the year ending with the Spring of 1917. Irrespective of his source, a field investigation of the locality generally leaves little doubt as to the source being Eden Bench, aside from the relative small amount furnished by James Creek. As to the water available at the present time, with the present time, at least one hundred thousand acre feet are entering Mud Lake annually, with the attendant probability that 100,000 acre feet or more will eventually be available. Only 25,000 acre feet gross would actually be involved in the Owsley Project after Segregation List 71 is added, there appears an ample supply of water available at the present time, with the attendant probability of an increased supply from year to year." "In view of the entire feasibility of the project and the ability of the construction company to carry the development to completion, it is respectfully recommended that Segregation List 71 be duly approved."

After the examination was made, the Federal Carey Act Inspector recommended that a permanent segregation be made and the company be permitted to construct the irrigation works, under the supervision of the State Engineer, necessary to reclaim the land.

Snake River Valley District

The crops raised in this district consist principally of wheat, oats, barley, peas, potatoes, alfalfa and sugar beets.

The average yield per acre being from 107 to 110 bushels of wheat; 15 to 100 bushels of oats; 10 to 50 bushels of barley; 400 to 600 bushels of potatoes; 1 to 7 tons of alfalfa; and from 10 to 20 tons of sugar beets. Remember, this are average yields. We have positive evidence of much larger yields in exceptional cases.

Twin Falls, the metropolis of this district, is the largest originating point of land production in the world; also the largest shipping point on the Oregon Short Line Railroad.

The value of land in this district is a high rate of cultivation runs from one hundred fifty to five hundred dollars per acre. The average price being from two to three hundred dollars per acre.

Character of Lands

The land is level with a gentle slope back toward the lake to approximately two feet to the mile. It is covered with a heavy growth of sage brush, is free from alkali and is of volcanic ash and silt formation, and part of the land has an accumulation of sand from its surface, and all the land is underlain with an impervious clay subsoil, which gives to the remarkable depth of from twenty to one hundred feet. This land is unique in character to the Twin Falls County, except that it is more level and can be put in a high state of cultivation with less expense. Anyone familiar with the water supply in the intermountain country must know that there will be but few more opportunities to purchase good irrigated land at ground-floor prices.

Water Supply

The source of the water supply is from Crystal Lake. The company holding a water permit for 157 second feet of water, which is sufficient under the duty of water fixed by the State Engineer to water 18,750 acres. This permit being the second water right on the lake, the quantity of which has been approved by both the State and Government Engineers.

The past season has proven that this is one of the best, if not the best, water rights in the State of Idaho. Many good districts were short of water, and one water supply was greater than any previous year.

The company agrees to deliver to each acre of land two and one-half acre feet during the irrigation season, which is more water than can be successfully used.

Irrigation System

The irrigation system consists of an intake of about one mile in length in which the water flows to the pumping plant by gravity. At the pump-house the company has installed three 36-inch flat iron Works Centrifugal Pumps, which are propelled by three 250 H. P. General Electric Motors. The pumps have a capacity of over 35,000 gallons per minute.

At the pumping plant the water is lifted to a maximum height of eighteen feet and from this point it runs through thirty miles of main canals and laterals by gravity. The system is built so that the water is delivered to within one-half mile of each land subdivision of one hundred sixty acres and directly on a majority of the land.

Proof of completion of work was made on August 30, 1919.

Operation and Maintenance

The operation of this plant will be turned over to the settlers, free and clear of all by contract, the same to be operated by an operating company with 18,750 shares, each share to be appurtenant to one acre of land and entitling the owner to one vote in the management and operation of the company.

Owing to our well constructed ditches and laterals and the low power charge of \$16.00 per horsepower per season, the maintenance of this system should never be in excess of one dollar per acre and for a number of years should not be in excess of fifty cents per acre.

Heretofore, in many instances, Carey Act settlers have located upon land and have had to wait several years for delivery of water, and in some instances, owing to the company's inability to complete their works, never received water. Our company can deliver water to every acre of its land NOW.

Wonderful Opportunities

The future of this district is assured, as the company has already built what is known as the First Owsley Project. This has been sold to settlers, has been approved and accepted by the State of Idaho and the management turned over to the settlers. A small part of the land has been farmed during the year 1919 and practically all of it will be farmed in 1920.

As an illustration of what can be done, Oscar W. Linger farmed 35 acres on the First Owsley Project and raised 400 bushels of wheat and 100 tons of alfalfa on 35 acres in the year 1918, 82 tons of the alfalfa being raised on 46 acres, the same having been planted in 1917, this being the first year's crop.

In 1919 the yield off of 35 acres will amount to more than 200 tons of alfalfa, and Mr. Linger has sold this for \$20 per ton in stock, making a gross yield of more than \$100.00 per acre.

The price of this land and water is fixed by the State of Idaho at \$75.00 per acre and the company cannot sell it for more. It is easily worth from \$190.00 to \$150.00 per acre and, on the terms that it is being sold, the yearly payments are not any more than a fair rental value of the land.

The land, if put in shape for cultivation and irrigation, will pay for itself, at the present price of crops, in one year. Proof of this is made by what Mr. Linger has done, all of which can be verified by visiting his place.

Recreation

Crystal of Mud Lake is famous for duck hunting. In the fall season there is every variety of duck known to this country; also many wild geese. The lake is also noted for its fine trout fishing.

The desert near by abounds with sagheens, and in the foothills and mountains directly on the west you can find every variety of grouse; and higher up there is plenty of deer, sheep, goats and bear. The writer has left the project one day and returned the next with his limit of big game.

The project is located in the center of this sportsman's paradise.

Terms

The land will be sold to qualified Carey Act entrpreneurs for 50 cents per acre; one-half payable at the time of filing and one-half payable on or before May 1, 1924; and the water will be sold and made an appurtenant to the land at the price of \$75 per acre; one-tenth payable in cash at the date of filing and the balance payable in nine equal annual installments, with interest at the rate of six per cent per annum.

Remember that it only takes about one hundred entrpreneurs to buy all this land if they take one hundred sixty acres each. You can't take less than forty nor more than one hundred sixty acres. The company has had more than five hundred inquiries on this land.

If you are in the market for good irrigated land located in one of the best farming districts in the intermountain country, at less than its value, don't fail to investigate and register early, as you may regret the fact that a town will be built on or one of the quarters adjacent thereto.

Opening and Drawing

The opening of the land will be held at Roberts, Idaho, on October 9, 1919. Arrangements will be made to meet anyone out here before October 10th at Roberts, Idaho, to show them the land by automobile. Either notify the company or go to Roberts, Idaho, and inquire for J. L. Bussey, who is in charge of showing the land.

A representative of the State of Idaho will be in charge of the drawing, which will be held at Roberts, Idaho, at 3 p. m. on October 9, 1919.

Those desiring land had better register early as the company has received a great number of inquiries and we do not believe there will be enough land for all those who register. You may register at any time with the company in Salt Lake City, Utah, or with Rose H. Matkins at the Elmore Hotel, Idaho Falls, Idaho, or with W. A. Davis, cashier of the Bank of Roberts, Roberts, Idaho, or with H. G. Price at the Bechtel Hotel, Rexburg, Idaho.

A representative of the State of Idaho will be in charge of the drawing.

Remember, This Is a Completed Project, Ready for Operation. You Can See Just What You Are Buying. We Ask That You Give It a Thorough Examination. Write for Descriptive Literature, or Take a Trip and See It, as It Is Impossible to Describe This Land; It Has to Be Seen to Be Appreciated

Mountain Brand Ham is Real Ham

There's nothing up to eating to the taste as the fragrant aroma that steams up from a freshly-baked MOUNTAIN Brand HAM. It's cured the "MOUNTAIN" way with Arkansas Hickory and Apple Wood. Sweet smoke—slow cure—old-fashioned Southern Ham flavor.

BY A WHOLE HAM. It's wrapped the "MOUNTAIN" way—branded "MOUNTAIN" Ham—Government Inspected, No. 591.

A WHOLE HAM is economical—and you get the real factory product—inspected, stamped, sealed, just as we prepare it for you—sweet, tender, juicy.

Ogden Packing & Provision Co.

If a Person Asks for a Price on Coal Nowadays a Conversation Something Like This Takes Place

Customer—"How much is lump coal?" Dealer—"At 10.25 at yard, \$11.75 delivered." Customer—"Why, I can get it at the City Coal company for \$9.75 at the yard or \$11.25 delivered." Dealer—"Yes, that may be so, but it's a cheaper coal. It's a lie and to prove it we give the wholesale price on all lump coal sold in this city."

Name of Coal	Price at Mine	Freight Rate
King	\$3.65	\$4.40
Kemmerer	3.85	4.20
Hiawatha	3.65	4.40
Aberdeen	3.65	4.40
Castle Gate	3.65	4.40
Spring Canyon	3.65	4.40
Hi Heat	3.65	4.40
Cameron	3.65	4.40
Clear Creek	3.65	4.40
Black Hawk	3.65	4.40
Standard	3.65	4.40

Note that there is a special tax of ten cents a ton on the above.
We quote the price and freight rate on lump coal as above will not permit us giving size No. 1. They both cost less and the freight rate is less, but all brands are the same price laid down here.

The next time a dealer tells you the City Coal company sells a cheaper coal just bear in mind that he is trying so to enable him to get away with the high price.

Because we refuse to join the combination we are the target for all sorts of criticisms.

Our credit is live, and let live. We believe in free competition in business, and accept our right to sell our product at a price that will be fair to the consumer.

We again declare that we will not join any combination to maintain prices, no matter what obstacles should arise.

We specialize on King and Kemmerer No. 10. Five coal because we believe there is no better coal mined. We guarantee them to please and satisfy you in every respect, or we will refund the full price paid and stand the drayage expense of returning the coal to our yard after a three-day trial.

City Coal Company's Fair Prices

	Yard Price	Price From
	Ton Lots	Car
Lump	\$9.75	\$9.50
Egg	9.35	9.00
Nut	8.35	8.00

A further reduction of 50c per ton will be given on coal in 5 ton lots.

HONOR OLD FRIEND

Black Hills Pioneers Name High Peak for Roosevelt.

At Its Summit a Cairn Fifty Feet High, Constructed of Blocks of Native Granite, Has Been Erected.

On July 4 the Black Hills pioneers honored the memory of the late Colonel Roosevelt by naming for him the highest peak in the Black Hills. Thruout the Black Hills Homecoming week for Deadwood and other Black Hills communities, this ceremony was a manifestation of the affection which all the residents of that section of the country felt for Colonel Roosevelt.

The peak which will henceforth be known as Mount Roosevelt was called Sharp mountain or Round Top. It is a detached eminence with an elevation of 8,000 feet, three miles from Deadwood, 15 miles from Wyoming and 25 miles from the Montana state line. It is on the Black Hills forest reserve, and will be the center of a bird and game refuge also dedicated to the memory of the ex-president.

All that section of the country has been intimately associated with various periods in the life of Colonel Roosevelt. The peak which now bears his name overlooks the foothills and valleys of the northern Black Hills where the robust Indian buffalo, the sight from the summit his cattle range and his trail to Deadwood, as well as sections of Wyoming and Montana, are recalled in his early days. Glances of the Belle Fourche, the Redwater and other streams flowing down the valleys attract the spectator. The peak and the territory around it are now embraced in the Belle Fourche irrigation project, which Colonel Roosevelt advocated when president. This is making an arid prairie over into fertile farming country.

The people of Deadwood built at the summit of the mountain a cairn 50 feet high of blocks of native granite, 40 feet square. One of the most prominent associates of years ago, obtained the permission of the local committee in place in this manner. The cairn is with the cattle brands of his old friend etched thereon. The dedication of this monument took place on Independence day when a tablet is inscribed "In Memory of Theodore Roosevelt, the American" was fastened to one of the boulders.

Some Logic in His Protest.
A good story was published in Le Follet in connection with the news that a monument is being erected at Tereon in memory of Alphonse Danz, the French socialist who has been immortalized that quiet town by his "Tartarin." It seems that the town still numbers among its inhabitants persons almost, if not quite as eccentric as the renowned Tartarin. The story is that a Tartarinian recently expired at the local railway station with a man, and after purchasing a couple of tickets, gravely led the animal up the forty steps by which the station is reached. On attempting to enter a first-class compartment he found his passage barred. He waved his two tickets into the face of the guard and tried to force his way in but the official proved inexorable. Explaining the situation, "So many laws travel first class that I fell to see why a mule should not," the muleowner stalked away from the train. "Pleasure" in Indianapolis Star.

He Knew About It.
The other evening while doing home work the small son of a minister was arguing and trying to convince himself that "congregation" and "congregation" are some thing, for that was what his teacher had told him. Into the argument, which the minister could not help but overhear, he came and said: "What's that you are saying? That congregation and collect are the same word?" "That's what teacher said." "Quite wrong," replied the father. "Tell me the teacher is quite wrong. There is all the difference in the world between a 'congregation' and a 'collection'."—Columbus Dispatch.

What He Wanted.
He had a hard day and was grumpy. Besides, through a long and varied life he had come in contact with so much language on the part of barbers that was always on the defensive when in a barber's chair. Thus it was that on this particular morning as he entered the shop for a shave and haircut, he was greeted by a request in an irritable tone of voice: "I don't want a haircut, a shampoo, a massage, a hair tonic, a hair singe or a manicle. Now can you give me what I want?" "Yes," replied the barber, softly, "manacles."

Great Hawaiian Honored.
Hawaii, a few days ago, paid tribute to the memory of Kamehameha, the first, founder of the Kamehameha dynasty, who, in a series of wars, brought all the islands of Hawaii under his rule more than 100 years ago. Kamehameha's burial place is unknown, the few aged Hawaiians who held the secret having died. A great street parade was a feature of the centennial in Honolulu, with floats illustrating his life in the life of the "Kamehameha of the Pacific." There were ceremonies in front of the statue of Kamehameha which faces the capital.

He who dispenses counsel is on the way to misfortune.

Whoever believes everything said has no mind of his own.

Woman in trousers stops traffic. How can a traffic cop resist a lady in trousers? This one cleared the busy corner of Fifth and Fourth streets in order to let Miss Purdie Harley, exponent of advanced ideas in woman's attire, cross in safety.—Lishman Telegraphed Photo Service.

Eden News

Mr. and Mrs. W. A. Thompson were business visitors in Twin Falls Saturday.

J. H. Coates, the "Edison" man from Jerome, was in town Saturday afternoon.

L. W. Liebman's one yielded 55 bushels to the acre. Considering the shortage of water this is a good yield.

Art Shields left Sunday for Omaha, Neb., where he expects to join a party on an expedition to South America.

The Ladies' Civic Club will be entertained at the home of Mrs. J. L. Cox on Wednesday evening.

Mr. and Mrs. H. L. Shannon expect to move to Idaho in the near future. Children they will not let the children in school for the coming year. Clyde is already located for the coming year.

Miss Bang is substituting in the grammar room and a permanent teacher is secured.

The Ladies' Aid met with Mrs. W. J. Young Thursday afternoon. Conversation was lively and a number of ladies were present.

E. O. Bennett, vice president of the First National bank of Jerome, visited in Eden and attended the fair.

Mr. H. Henry and family have moved in from the bond and are now at home in the residence in town where the children will be in school the coming year.

Miss Helen Meyer, of Jerome, spent the week-end with her mother, Mrs. Mary Meyers.

Mr. Ray Gordon, who has been suffering with the grip, by means of old acquaintances here, the past few days.

The Kelly garage is almost completed now, as is the fine residence of Clyde Oakes.

A new residence belonging to Mrs. Godrich is being constructed across from the Presbyterian church.

Blaine Ferguson, from Parline, was transacting business in town Friday.

Mr. H. B. Eakin was a business visitor in Rupert Thursday.

Mr. B. L. Eakin has sold his ranch adjoining the town to Antoine Gaudin. Consideration \$2500. per acre.

Mr. Eakin will move to Dubl with his family in the near future.

Mr. Scott Eason returned Saturday from Grouling.

Mr. and Mrs. W. O. Brown, accompanied by Mrs. T. Wilson, spent Wednesday and Thursday in Twin Falls.

Kenneth and Glen Eakin, who are attending high school in Dubl, spent the week-end here visiting their parents, B. L. Eakin.

Arvid Ottosen left Saturday for Boise, where he goes to enter school for the winter.

Mr. and Mrs. Scott Eason spent Sunday with their son Earl and family on the ranch south of town.

ALL HUMANITY MUCH ALIKE

Only in Early Life, That the Average Man Feels He is Different From Others.

One of the great discoveries that come to us as we advance in life is the fact that deep down in the human heart all men are alike. In early life we think we are different from the rest of the world, but as years go by we find that this is not so, that other men have the same hopes and aspirations, the same troubles and anxieties, the same yearnings after happiness and peace. We learn this from our friends, from those who tell us their troubles and ask for sympathy and advice. Then we learn it from books: from the works of great poets and writers, and especially from biographies and autobiographies.

As a child I was sensitive and shy, and felt that I was peculiar in this respect, different from the others. I always seemed to take themselves for granted. And yet I have discovered that this is the universal lot of all men. G. Stanley Hall speaks of a "specially revealed and more dignified" that works countless tragedies in life—that the child's feelings of inferiority should become dominant and make him feel in his earliest years that he is condemned to a low level of existence, without respect, appreciation, admiration or love. This the chronic teacher or doctor only do great mischief to the tender soul of the child. The child is always asking himself unconsciously, "Do I look worse or better than others?"

This tendency lasts with most men all their lives. We are all the time comparing our lot with that of others. As Emerson says: "Every ship looks miserable except the one we are on" and again, "Every man's life seems to him covered with the silms of failure and defeat, while that of others seems ideal." It is a great help to know that men are alike in this respect. I could give a long list of well-known men and women who suffer from this feeling of inferiority, incapacity and defeat, followed by words of gloom and melancholy—men like Tennyson, Ruskin, Lowell, Strenuous, John Stuart Mill, and, in our own day, Rudyard Kipling, Richard Harding Davis and others.

Exchange.

There are two strengths in tea: tea-strength and tannin-strength.

Tea-strength is entirely agreeable and is good for you.

Tannin-strength is puckery and is bad for the insides.

Fine tea is mostly tea-strength—almost no tannin unless you steep it too long.

Common tea is mostly tannin-strength—not enough real tea-strength to satisfy you, and that little is smothered by tannin.

Which will you have—tannin-strength or tea-strength, common tea or Schilling Tea, the practical, economical fine tea of this country?

There are four flavors of Schilling Tea—Japan, Ceylon, India, Oolong. English Breakfast, All especially in quantity divided into unimpaired packages. At grocers everywhere. A. Schilling & Co. San Francisco

The dances at the Lavering Pavilion will be changed to run Wednesday, Friday and Saturday nights.

Sunday and Daily Times—\$1.00.

The Times Job Printing Department

I S thoroughly equipped to do the best grade of work obtainable. We buy material in big lots, thereby getting the advantage of all discounts for quantity purchases, and it is our policy to share this saving with our patrons.

As an instance of our buying, we recently placed an order for (and now have in stock) fifty thousand butterwrappers and our lines of bond, linen, ledger and wove paper, envelopes, cards, wedding stationery, ruled goods, etc., are in the same proportion—the largest carried by any Twin Falls printing concern. And this big stock embraces many grades and weights, insuring a selection for any and all purposes.

WE invite you to call and look over our stock of printing material when you need anything in this line. We are always glad to figure on your work and to quote prices. With an investment in the Daily Times of \$50,000—with a pay roll approximately \$2,500.00 per month—with an unquestioned prestige in the field of Idaho newspaperdom—with a reputation for fair and honest business methods—The Times lays claim to the fact of being a legitimate, dependable, worthy business institution, and upon this claim it respectfully, solicits your patronage, and assures the public that it has the material, the men and the means to give.

Satisfactory Printing

Lessons in violin, piano and harmony. Marion Ester Smith. Phone 565-J-4. The best ones are advertised in the Times.
