

News from the WORLD of SPORTS

FOOTBALL DOPE WAS ALL UPSET

Saturday's Results Bring Excuses for Yale's and Princeton's Poor Showing.

NEW YORK, Oct. 20.—Yale's defeat by the Boston college eleven was the big upset in Saturday's football clashes. Next to it in surprise was the overwhelming victory handed to Glenn Warner's Pittsburgh squad by Syracuse.

Coach Al Sharpe is counting by a great deal of criticism in connection with the defeat of Ohio State. One of the criticisms heard most often is that he drove his men too hard during the week and they were not able to play as strongly as a result on Saturday. Some of Yale's best men, it is charged, were not able to take part in Saturday's game because they were injured in the scrimmaging that Sharpe sent them through during the week.

Reports were current today that a call has been sent out for Ted Jones, coach of the 1916 team which defeated both Harvard and Princeton. Sharpe is quoted as declaring that Yale was beaten because the Blue players did not take advantage of chances afforded them while their opponents relaxed every opening.

Kempson was the star of the back field. He was the only one who could gain ground consistently.

It is pretty certain that there will be tactical shakeups this week in the Yale lineup.

Warner's surprising defeat of Pittsburgh is all the more remarkable because of the fact that the team had shown nothing out of the ordinary before this year. Pittsburgh had given 33 runs in two previous meetings in 1917 and 1917 and Syracuse was out on thorough revenge.

Harvard, who had defeated Stanford 35 to 0, made a disappointing showing by being held to a 7 to 0 score by Brown. Its admirers still figure, however, that it will have something to say in both Yale and Princeton.

Princeton's victory over Rochester was so easy that his chances were considered to see what the Tigers really can do.

MEMORIES OF HONUS WAGNER

One of Favorite Stunts of Former Pirate Brought to Mind by Play of Hal Chase.

Hal Chase precipitated a feat in his first game of a recent double-header in Brooklyn that brought to mind one of the favorite stunts practiced by Honus Wagner when the Pygmy Destroyer was in his prime.

With Zimmerman as first in the sixth inning and Chase at bat, a hit and run play was decided upon. Ott Miller anticipating such a move, called for a pitch-out, which Larry Cheney delivered. Had the ball gotten by Chase Zimmerman, who had darted off its base, would have been trapped, but Chase felled the ball by throwing his bat right at the ball, knocking the pelt into right center for a two-base hit.

EMSLIE IN JAM

Umpire Bob Emstie was the victim of a peculiar play at Cincinnati recently, when a hard throw from Merkle hit him on the wrist and painfully injured him. Emstie had tripped to the stove and Merkle ran out into center field and took Packer's throw, late stopped at third, but Merkle threw toward the plate with all his force.

Umpire Emstie, seeing Packer stop at third, was backing away into the diamond when the line threw hit him on the left wrist. The injury was so annoying that the game was delayed for several minutes while the umpire urged the players to stop to have his wrist and he had them handle the game alone.

Both, however, refused to do so and Emstie, doing the job for the entire afternoon, though his bruised wrist was giving him constant pain. He received the unusual compliment of a round of applause from the fans when it was seen that he was going to stick to his work.

MARTIN C. OSBERG

Martin C. Osberg of Harmony, Mo. who has just enlisted in the army, is the most perfect physical specimen out of 10,000 persons who were examined.

THOMAS AS PINCH MANAGER

Scout for Philadelphia Athletics Takes Hold of Atlanta Team and Wins Many Games.

While Charles Frank was absent looking for talent, Ira Thomas, visiting Atlanta in the interest of Connie Mack, took hold of the Crackers and won several games with them. As a pinch manager Thomas delivered such a brand of goods that Frank has a right to be jealous.

AVIATOR DROPS 500 FEET

DALLAS, Tex., Oct. 20.—While attempting to regain his seat in his airplane after performing a series of daring feats in midair, Captain Nathan Theodore, of Dallas, became exhausted, lost his grip on the ropes which he was clinging below the landing gear of his machine and fell 500 feet to his death here Sunday. Thousands of people witnessed his exhibition and his fall.

Dr. Wely has moved to 541 Main Ave. E., two blocks E. of Times of Ice. Phone 296.

PLANE FOR BUDDING AVIATOR

Well called the Penguin, since it moves fast on Green but is Unable to Fly.

Do you know what a penguin is? You may have read of it, but probably never have seen one. The penguin is an aquatic bird found in the polar regions. It is remarkable for its peculiar structure. It has only stumpy legs in place of wings and, for this reason, is unable to fly. But it is an expert swimmer and a diver. The name of "penguin" has also been given to the training apparatus employed to teach prospective aviators the control of the airplane or seaplane. The wings are well chosen. The penguin swims for training, he is encouraged to run this "penguin" to his heart's content; there is no danger that it will take to the air. In a short time he graduates to a real airplane that can and does fly, and then he can give his attention to the control of the plane without having to worry over the handling of the various controls. The sense of safety he enjoys while learning is a great asset relative to the inexperienced aviator.

REMEDIES CALL FOR FAITH

Truly Wield and Wonderful Are Some "Cures" for Various Ails of the Human Body.

Wield and wonderful are the remedies advised in different parts of the world for diseases which affect humanity.

Sufferers from rheumatism may be pleased to hear that there are people who claim to have found a new cure for their malady by blending split macerated around the affected part.

The town of Lee, in England, claims to have found a cure for the disease known as "Lee Penny." This cure was brought from the Holy Land by a Crusader on many occasions when the health of the people has been threatened this penny has been used. Three drops and one water in a bucket of water were supposed to endow the liquid with healing properties.

In many parts of Europe it is thought that passing under an ash child suffering from whooping cough will bring instant relief.

Almost every one has heard of the curing of warts by touching them with a wedding ring. This "cure" is perhaps not so well known. Make the sign of the cross on a wart, at the same time chanting: "What I see, that I wish; what I wish, that disappears."

Uncrowned English Queens.

There have been several uncrowned queens of England. The first was Margaret of France, the second wife of Edward I. Money was scarce in the government coffers at the time, and Edward could not afford the expense of a coronation. The four later wives of Henry VIII, Anne Boleyn's successor—Jane Seymour, Anne of Cleves, Catherine Howard and Catherine Parr—were never publicly crowned as queen consorts. Henrietta Maria, the wife of Charles I, being a strict Catholic, refused to take part in a state function which would compel her to partake of the sacrament according to the rites of the Church of England. Sophia Barckley, the wife of George I, and mother of George II, was never recognized as queen of England and therefore can not be classed as one of Britain's uncrowned queens. Caroline of Brunswick, the wife of George III, was not permitted to be present in Westminster hall at his coronation.

Original "Lone Tree"

There was an immense cottonwood, four feet thick and very tall, which stood in Nebraska almost in the center of the continent half way between New York and San Francisco, which was within one mile of that center. Only its branches rested thousands of miles on route to the Eldorado of the Pacific coast. It was the best-known camping ground on the old California trail. From 1849, when the gold-seekers camped across the great plains down to the completion of the Union Pacific railway, the great tree was a landmark to the wagon trains going west.

After the railway was completed there was no further use for the lone tree and it eventually rotted away and died. In 1910 a monument was erected on the spot that the tree had occupied. It represents the trunk of a giant cottonwood and bears the inscription: "On this spot stood the original Lone Tree on the old California trail."

Australian Water Holes.

A curious form of water hole is found in the desert of Australia. It is a shallow, dry by day but yielding an abundant supply of water by night. The flow of water is produced by several hissing and sounds of rasping air. On examining one it was found that the water supply occurred in a long narrow trench, at the bottom of which was a thin plate of gypsum, separated by a cavity from the main rock mass beneath. Apparently the heat of the day causes this plate to expand in the form of a depression, in which the water retreats. When it cools and contracts at night the forces first air and then water beat into the trench.

The average tourist would hardly expect a new article if he knew why we would not. Let's see why you should believe that our article is the "Lone Tree" that you are looking for.

DR. HOWARD TO SPEAK BEFORE MEN OF CHURCH

Presbyterian Association to Hear Educator on Theme "Internationalism"

The Men's association of the First Presbyterian church, at their regular meeting on Tuesday evening, Oct. 23, will have the pleasure of hearing an address by Dr. Frank Howard of the Albion State Normal. Dr. Howard's theme is "Internationalism."

Mrs. O. P. Davall and Mr. Zenas Smith will provide the music for the evening. The program follows a dinner which will be served at 6:40. This is a monthly gathering of the men of the church and congregation and their friends affords an occasion of fellowship that is increasingly enjoyed.

Make Efforts to Resume Operations

CLEVELAND, O., Oct. 20.—An effort to put 12 big steel mills in operation in Cleveland today marked the first concerted move on the part of the Cleveland mill operators to smash the strike which today entered upon its fifth week.

The American Steel & Wire Co., subsidiary of the United States Steel corporation, led the operators in its attempt to resume the manufacture of steel. The management announced that the doors of all nine of their plants in the Cleveland district were thrown open this morning.

The Otis Steel company, the McKinley Steel company and the Upton Steel company were other three announcing resumption.

The Times job printing department is thoroughly equipped to do first class work at reasonable prices.

A Powerful Romance of Alaska

The Way of the Strong

A Smashing Big Story of Thrills, Suspense and Romance

A Striking Drama of the Yukon—a Six-Part Production With an All Star Cast

"The Way of the Strong," a story set amidst the inspiring grandeur of the Yukon—a romance of the northlands—is a play of vision and red-blooded manhood, glowing with fires of love and passion. The gripping drama gives Anne Q. Nilsson a dual role, ranging in emotions that tax to the full the rare talent of the beautiful star. In the early part of the play she is seen as the unfaithful wife—entrusted to her husband and herself and causing misery and grief to all. Later she appears in a role of beauty and strength, bringing love and happiness to replace the other bitterness. The story breathes the spirit of the great northwestern—bright with the glitter of untrodden snow and diffusing the resinous scent of the pines and spruces, larches and hemlocks. It is a story of sublime grandeur—singing of sun-blit heights and climbing the peaks of human emotion.

- 10—Electric railroads of Idaho.

THE BONUS BOOM

There are only about a score of bills pending or proposed in congress calling for larger bonuses for former service men. They are of all kinds and call for sums varying from three months to a year's pay. These measures are proposed by representatives from widely scattered states. Outside the national congress, state legislatures, city councils and many organizations are busily suggesting their pet bonus scheme. As "The Home Sector," an ex-soldier publication, expresses it, "The most popular vehicle in America today is the bonus handwagon."

A good deal of this excitement about financial rewards for the soldiers, sailors, marines and, in some cases, for nurses, is due to the politicians' suddenly developed awe and respect for the "soldier vote,"—in case there should happen to be such a thing. Some of the agitation, of course, is due to a perfectly honest belief on the part of some persons that the \$10 bonus was not really enough to tide over the discharged fighter in his period of re-adjustment to civilian life.

Oddly enough—although perhaps not so odd after all—the soldiers themselves are not making much fuss. Their own magazine groups them in three divisions. The first and largest take in about 60 per cent, who believe that an additional bonus should be granted but who "intend neither to beg nor browbeat for it." Those of the next group, 30 per cent, are militantly out for as much money as they find it possible to extract from a timid congress. The last 10 per cent would not object to an additional bonus provided it did not open the way to a whole train of pension evils such as followed the Civil and Spanish-American wars.

The 60 per cent and the 10 per cent are doing very little talking at present. So far, too, the general public does not seem to have paid much attention to the bonus hullabaloo. It might be an excellent idea for the public to find out from the thoughtful 70 per cent just what they really think and to get together with them in preserving safety, sanity and honor for everybody concerned by the bonus business.

THE RACING PLANES

There may not be quite so much of aviation excitement in the transcontinental race as there was in the flight across the Atlantic, but there seems to be a little more shore reality about it. The meeting of the east and west flyers at Cheyenne may have been a bit more prosaic than the first news from the Azores and the recovery of Hawker from the vasty deep, but it held a little satisfaction of its own.

This solitary journey of the racers means that airplane journeying is right here at our doors. It isn't going to be very long before people cease paying \$15 to the aviator who will take them up for a few minutes trial trip just for the pure fun and sensation of the thing as they did at the Flier fair. They will get into the habit of buying a ticket and taking a seat with a suitcase just as easily as ever they do now on the road for the next town.

The planes and the dirigibles are here, and they work. And say what you like about the difficulties, five years from now—maybe five—you will probably have your little airbus in your own back yard, and think no more of it than you do now of your little old-fashioned flyover.

BATTLING A BEETLE

The Japanese beetle seems never to have been included in the gentlemen's agreement between the United States and Japan. Great numbers of this pest have come into the country in the earth around iris roots. A colony of these grubs settled in this country and then proceeded to multiply and spread alarmingly.

The Japanese beetle is an impartial creature and practices its deadly jiu-jitsu on fruit trees, grape vines, a large variety of vegetable, ornamental plants, weeds and sweet corn. It flies to use the ears of sweet corn as its private Pullman car and hauls its way from its original stamping ground to new localities by this means.

Naturally the Department of Agriculture does not intend to let this state of things continue. All the farm produce shipped from the infested region is now thoroughly inspected for this pest before it is allowed to pass. A belt of poisoned foliage has been established around this area, too. Roundwise weeds which harbor the beetle are being cleared out, and the grubs are expected of banking it with sodium cyanide in solution. Also the simple old method of handpicking and destroying is employed in the out-of-the-way far. If farmers and agricultural workers continue to cooperate in this thorough way they will not only check the Japanese beetle but route it entirely, to the great benefit of farm produce and producers both.

Twenty weeks of the special session of congress under Republican auspices have been twenty weeks of empty and expensive chattering. The G. O. P. has given no plan to that old legislative formula "met pursuant to adjournment."

"We may soon see the Republican house of representatives passing a few bills. The "investigating" committees are preparing to pass a few large expense bills up to the treasury for payment.

EVEN THE TENANTS GO ON STRIKE NOW

These tenants of a New York building went on strike against their landlord, who told the court to which he appealed that they had formed a kind of society.

EARLY HISTORY OF COFFEE

Traditions Differ, but the Beverage Has Been Appreciated for Many Hundreds of Years.

There is a tradition to the effect that coffee was found growing wild in Arabia some 600 years ago by Hadji Omar, a dervish. Hadji Omar was dying of hunger in the desert, when he found some small, round berries and tried to eat them. They were, however, too bitter. After examining them he finally steeped them in water—and found the delicious as refreshment. As if he had partaken of solid food, from the return to Mecca, he brought his discovery to the attention of "the wise man," who were so well pleased therewith that they procured Hadji Omar a seal.

In the Bibliotheca Nationale at Paris there is a manuscript written in Arabic by one Abolender, who avers that coffee was drunk for the first time in Arabia in the fifteenth century. Other authorities have it that coffee was used in Persia as early as the ninth century, but there is little evidence to bear out their contention.

Abolender's story of the discovery of coffee is as follows: "A certain Arab, a merchant, was one day returning from Mecca, and was accompanied by a slave named Abolender. He was carrying a pack of coffee beans, and was tired and thirsty. He took some of the beans and chewed them, and found them to be very good. He then showed them to the king, who was very pleased with them, and ordered that they should be used as a drink for his courtiers."

No opposition to the use of coffee appears to have been offered until the middle of the sixteenth century, when the Egyptian sultan sent a new governor, Chay Bey, to Mecca. The governor, who was a very strict and became greatly enraged at the sight of the dervishes drinking coffee in the mosques. Upon consulting with two Persian physicians, he decided that coffee was a substitute for wine, which was prohibited by the Koran, and that, therefore, coffee drinking was a heinous crime, punishable by the death penalty. The result was a decree forbidding the use of coffee. All heretics that could be found were gathered and burned in the market place. When Chay Bey reported his action to the sultan, it is said that he received the following reply:

"Your physicians are asses, your lawyers and physicians in Cairo are asses, and your sultan is an ass. The use of coffee, and I declare that no faithful soul has heaven beyond the skies coffee!"

Abyssinians Claim Recognition

A delegation from Abyssinia bearing letters of credence and a formal request for recognition, and a formal proposal of a treaty of friendship, arrived in London on the 10th inst. The delegation, which was headed by the Emperor Menelik II, is the first of its kind to be received in London. The Emperor Menelik II is the ruler of Abyssinia, and his kingdom is situated in the east of Africa. He has recently been crowned Emperor, and his reign is expected to be a very successful one.

USE BIRDS AS AIRPLANE

Rice Birds Take Free Rides Apparently for the Pure Fun of the Thing.

Size and strength are popularly associated with victory, especially among the lower animals, but in many cases this is far from being the case, particularly in the bird world. The rice birds of the Carolinas, for example, are not only small and all are eaten. The great buzzard is found circling over the fields at all times. He breeds the time for the rice bird to come for him he then nearly pestered to death. It is a common sight to see one of these tiny creatures fly up to a buzzard, and after dodging this way and that around the neck of the buzzard's wings on the lock. Here the little passerenger grabs a few feathers in his beak and holds on for dear life. After enjoying a ride for as long as he desires, the little fellow buzzard off and is gone.

"Mugwump"

The modern mugwump is depicted from the "Mugwump" group, meaning a great man, a chief, and is said to have been used by the Democrats and Whigs in Massachusetts and Connecticut in the seventeenth and eighteenth centuries. The word was later used in a humorous or satirical sense, and was applied to a person who though true of conscience and integrity, in this sense, the word was long in local use and often employed in the U. S. political history. The term was first applied in 1854 to the Independent members of the Republican party who refused to support the nomination of the party for president of the United States, and either sold for the benefit of the Republican party or abstained from voting. The word was first generally known in any sense before that time, but it caught the popular fancy and was at once accepted by the Independents themselves as an honorable title.

Energy Released in Combustion

A piece of coal releases, during combustion enough energy to lift itself about 2000 miles, or say from New York to London, vertically upward against constant sea level gravitation. A piece of hydrogen, one mole, under standard conditions, releases an amount of energy capable of lifting about four times as far, or to a vertical distance, against sea level gravitation, roughly equal to the distance from New York to Manila. But a piece of radium emanation, one mole, releases an amount of energy in the form of heat that would lift it against sea level gravitation not only to the sun, but to the outside fringes of the solar system, and which is about thirty times farther from the sun than the earth is.

How It Comes That Political Bosses Control Public School Systems

By JACOB M. LOEB, Chicago Board of Education

"To build political systems' fortunes upon the school system is trafficking in children's souls."

During more than five years of service as school trustee one sees much of school boards, something of the public, and very little if any cooperation between the two.

To appoint as school trustees men and women unknown and untried is taking a gambler's chance. To commit the administration of a vast business enterprise to those without experience or training is poor judgment. To confer upon hucksters the responsibility of preparing budgets of expending millions, or negotiating leases, of making real estate transfers, is signal improvidence.

The public is divided into three classes: The educated, who keep aloof from public questions; the class that can think but won't, and, thirdly, the class that cannot think for itself and accepts the ready-made judgment of others. The latter class is led by various types—the parlor pugnaist, the agitator and the political tycoon and the boss type, more dangerous and controlling than the others.

So we have a public a part of which is thoughtful but inactive, a part unthinking and directed by various leadership.

JOHNSON & LYMAN

Real Estate Bargains

- City Property
- 7 Room modern house modern excepting heat. Fine location, nice shade and lawn. Our price \$5300.
 - 5 Room modern bungalow, nice basement. This is a snap. Price \$3000.
 - 5 Room house, good basement, good garage, oak shed, 2 screened-in porches, nice lawn. Price \$2000; \$800 down and \$25 monthly.
 - 3 Room modern house, good lawn, good house. Price \$2500; \$200 down and \$25 monthly.
 - 2 Acres with 4-room house, cistern, etc. This is a very desirable little home for the man with small means. Price \$2400 and only \$800 cash to handle this.
 - 5 Acres highly improved, close in, and one of the best things in town. Price \$6500.
 - 1 1/4 Acres tract with lots of fruit and fine modern house. Close in. Our bargain price is \$4000.
 - 20 Acres. We have a fine ten acres if you want something good.
 - 10 Acres. Now if you want to raise chickens and also garden truck, we have just the 20 you should have. Small house, a very nice small family orchard and fair out-buildings. Price \$360 per acre; \$1200 cash and \$1000 yearly.
 - 40 Acres near Twin Falls all in hay, fair improvements. Price \$335 per acre.

We also have some very highly improved 40 acres ranging in price from \$400 to \$550.

One of our partners has just returned from Caldwell, Parma, Wilder and Gem district and for those that wish to seek a little lower altitude and a little longer growing season we believe we have some remarkable good bargains. We can tell you about just a few of them here, but will say that we expect to make another trip to this section this week and will furnish free transportation to any land buyer that may wish to go with us.

80 Acres, 50 acres of this in hay, but no buildings. This is some of the best hay land in the state. Priced for the 80 only \$6500; \$1500 cash will handle this and very easy terms on the balance.

80 Acres, very fine deep soil about one-half in hay, 35 acres in alfalfa, 45 acres in grain, looking clean just across the road. No rocks or defects. We consider this a big bargain at \$225 per acre. About one-half cash.

80 Acres. This is as near perfect as 80 can be, a fine modern home, good cut buildings, wind mill, deep well, etc. Five family orchard loaded with all kinds of fruit. This is a big bargain at \$300 per acre.

80 Acres. This 80 is another big bargain. Now listen to the exact advantages. First the very best land in Idaho. Nearly all in hay. Has very fair 6-room house, deep well, and electric motor to pump. Telephone. On main gravelled highway. Road never muddy. Just 1 1/4 miles to station on main line. Now you can live in the country and have all the modern conveniences of the city. We will show you a man very near this farm that has paid out in two years on his land. This is one of the best buys in Idaho if you want a fine home and the best land. Price \$325 per acre. Good terms.

40 Acres. This is also a good bargain, fine land, all in hay, has good 6-room house, deep well, right on electric car line and you can step on car almost at your door. Price for 40 \$10,500 or a little more than \$200 per acre. Good terms.

80 Acres. A dandy all in hay, very fair house, no rock or coal, finest hay or potato land or anything else you wish to grow. We have a bargain price of only \$150 per acre and \$6000 cash. Think of this 80 acres for \$12,000.

We have many other good bargains and we will be glad to tell you or show them to you, if you are going to buy. Come in soon and see us.

COUNTY AGENT APPROVES SALE OF SHORTHORNS

Calls Attention of Stockmen to Fine Opportunities for Founding Herds

Farmers and stockmen on the Twin Falls river are being interested in the four sales of registered Shorthorn cattle scheduled for this week in Twin Falls county and Durley. This interest is heightened by a circular letter received from County Agent Charles H. Bohrer, who recommends the opportunities offered by the sales for founding Shorthorn herds.

In his letter, Mr. Bohrer writes: "I am writing you calling your attention to three large sales of Shorthorn cattle which will be held in Twin Falls county in the near future and one which will be held at Durley, Idaho."

The first of these sales will be held at the Pileur fair grounds, on October 23rd, at which will be sold 44 head of Scotch and Scotch Topped Shorthorn cattle. Thirty head of these are one and two year old heifers, and 20 head are cows and calves of their sides and others to freshen soon, and there are four young bulls. These cattle are from the herds of H. H. Hays and J. C. Hayden of Castleford, who are well known breeders in this section of the country and have cattle of excellent quality and name.

On October 22nd there will be a sale of 46 head of Shorthorn cattle, including 17 aged cows and 10 calves at their sides, 7 heifers and ten bulls. These cattle are from the herd of Nat Holmes and E. R. Brooks, and will be sold at their ranch one-half mile south of the Durley corner at Hah. The Holmes-Brooks herd of Shorthorn cattle are well known in this section of the country and are cattle well known of Shorthorn quality.

On October 23rd at Twin Falls 60 head of Shorthorn cattle will be sold by C. A. McManister and Son, three consist of 25 Scotch bred cattle and heifers, 25 Scotch Top cows, some with calves by their sides; and six Scotch and Scotch Topped bulls. These also are cattle of high quality and of good Shorthorn breeding.

We are calling attention also to the sale of W. S. French and Son, who will sell 40 head of Shorthorn cattle at Durley, Idaho, on October 24th.

I feel that this is an excellent opportunity for any breeder of fine horn cattle to secure some good stock to add to their herds and also a good opportunity for owners of range cattle to get some good stock to head their herds, and for this reason we are calling your attention to these four sales, at which will be sold nearly 200 head of high quality Shorthorn cattle.

Yours very truly,
CHAS. H. BOHRER,
County Agent.

CENSUS TAKERS WANTED IN CITY

City Clerk Has Particulars of Job—Service Men Given the Preference

Enumerators and field census takers are wanted in Twin Falls, according to work just received by City Clerk J. W. Younger. Edward A. Goddard, supervisor of the second district of Idaho for taking of the census.

Every ten years the United States takes a count of its people and preparatory are now under way for the 1920 census. It is pointed out in the communication from Mr. Goddard that accurate count of population is important to taxpayers and property owners of a community and that reliable census takers should be provided.

Returned service men will receive preference in the work. Any applicants desiring particulars are notified to call on City Clerk Mitchell.

APPRAISERS MAKE REPORT OF FINDINGS

Booze Haul Made by Officers—Two Boys in Mischief—Sarcatic Youngster in Jail

Commissioners appointed by the court to determine damages to be assessed in the condemnation suit of the Idaho Farm Development company which would result in the irrigation ditches across property of Mr. and Mrs. Samuel Durst and J. M. Durst in the west end of the county, have returned findings, their appreciation being \$300. The commissioners were Henry James, J. S. Durst and J. W. Jackson. Their findings were filed today with the district court clerk.

To Quiet Title
Suits to quiet title to new ferry area tracts has been filed in district court by Garrett C. Conover against Little T. Zimmerman, A. W. Conover and Maxie Farraday. The two first mentioned defendants are his children, the last named being a granddaughter.

Not on Side
James H. Diebolt of Bohler and company, hardware firm at Bohler, seeks to recover \$2134 alleged due a note, from L. A. McManister and W. McManister.

Walt for Labor
James Walrus is suing Geo. Carlson for \$250 which is alleged due for labor and team hire.

Make Those Haul
Members of the sheriff's and justice forces joined in a raid on the John Swain home at 26th Street, south Saturday night and brought back Swain and a quantity of liquid petroleum. The field finders a strange, seldom seen familiar to the Idaho man, but now so readily remembered as to necessitate an

Local News

Club Will Meet—The M. S. and S. club will meet with Mrs. A. A. Hays, Wednesday, October 23rd.

Marriage License—Living in Wood was issued today to Charles G. Brown, 15, and Annie L. Berry, 16, both of this city.

Boys Break Into Barn—Two boys have been placed under arrest for entering the barn of W. C. Huthorn on Second avenue south and cutting up a number of clover bales.

Fork in Road—A fork in the road was directed at the juvenile authorities "Chad" and "Come home and get your clothes" and "Come home here to bed" was the merry call down from the jail on the fourth floor of the brick building today by seven year old Freddy Myers, taken into custody for the "stealing" time for running away from home. Freddy's sarcasm was directed at the juvenile authorities for the benefit of all listeners on the lower floor.

Brink Boy's Fine—Roy Strickfield was assessed a fine of \$20 and costs, which amount to \$25, when he appeared before Judge J. S. Durst this morning charged with being drunk.

Homesick Trip—Don Loman of the newly firm, Johnson and Lavan, returned Saturday from a trip with a party of six hantochers who visited the Caldwell, Warner, Wilder and Ben districts, leaving here Wednesday.

Applauds—A big sale of farm implements and livestock will be held on October 31 at the John L. Peters farm south of Kimberly. Mr. Peters, who is one of the pioneers of the Twin Falls valley, is preparing to move his farm to Wapton, Wisconsin.

Demonstration—J. B. McGraw, president of the Copper Clad Range of St. Louis, is in town this week, putting on a demonstration of the Range at the Director Farmers store on Main avenue South. A free lunch of biscuits and coffee will be served to anyone during this demonstration.

Oaks Currier Club—The Oaks Currier club of Kimberly held its regular meeting at the home of Mrs. O. J. Callier recently, a good attendance for the affair. Among those present was Mrs. Edna Ludwig, interesting talk on the homemade type of ladies dress forms, which the club members are much interested in. This was followed by a business meeting in which the club's next meeting will be held on Monday evening's appointment, the council was organized to be held at Mayne Edlin's residence, coming before the council for ratification.

MACHINISTS STRIKE GOES INTO EFFECT

Nearly Fifty Men Walk Out This Morning From Shop: No Sign of Agreement

The strike of the machinists went into effect at 6 o'clock this morning when nearly fifty men walked out of the shop. No sign of agreement was seen.

DID YOU EVER SEE ASBESTOS SWEAT?

Is There a Doubt in Your Mind?

Can't you see and say? See the sweat roll up in beads on the iron body. See the steam that gives Steam-Blast, a device that rolls up and rains down from the inside. Then, see how good, old, everlasting copper is placed between the asbestos and range body. See the domes on the sheet of copper. See the air spaces formed by the domes. See the thermos bottle principle actually applied to ranges.

THIS SET OF ELEGANT ALUMINUM WARE FREE

"Free" means that this ware does not cost Copper-Clad buyers a single penny. It is a reward for buying while the Grank is here and is offered by him to justify you in attending this sale.

This ware is very substantial and just the kind that you would select if buying for your own use. The 7-in-1 convertible cooker takes the place of seven different vessels, as shown by figures 1, 2, 3, 4, 5, 6 and 7. You can use this utensil in some form every day.

Free to every Copper-Clad buyer during this sale. Come—See the Asbestos Sweat

HOT ALFALFA BISCUITS

Alfalfa biscuits baked in a Copper-Clad oven is about the Goodest Biscuits you ever tasted. Come and taste—see they eat. Alfalfa Biscuits with butter and hot drip coffee will be served every day.

COME—bring your friends and make yourself at home.

One Week Beginning October 20th

WET WITH SWEAT

Every time a fire is built in a range the body gets wet with sweat.

Sweat Rusts

The Copper-Clad Range is as Plain as an Automobile Body

The first automobiles made were fussy, full of ornaments, hinges, catches and levers, but the men who cleaned the automobiles kicked on these things that made so much work and trouble. Then the hinges and levers and catches were put on the inside of the body, clear out of sight—clean out of view. If men cleaned ranges, the frills and ornaments, and fuses and levers all have disappeared 40 years ago.

Clear, smooth, plain, elegant, lined with copper to prevent Sweat-Blast—width four wide and an air space to confine the heat like a thermos bottle—the Copper-Clad is King of the range world. No range compares in any way at any point.

Copper-Clad Means
Pure Sheet Copper is placed between the sweaty asbestos and the range body. To places it elsewhere would be like climbing on top of a roof to get out of the wet.

BRITISH LABOR PARTY STRONG

Not Beyond Possibility That It May Take Up Reins of Government.

ALREADY POWER POLITICALLY

Unification of the Various Groups in Parliament All This is Necessary, Since Leaders of Recognized Ability Have Made Themselves Fit.

With the rumblings of approaching dissolution of the coalition government, and recent developments in the industrial world, all eyes are turned to the labor party in the British house of commons and the question, "How long before a labor government takes power?" which would have been thought of ten years ago is asked seriously.

For labor alone of the political parties stands better than ever before, and political experts declare that labor can never expect to find itself in a more favorable position, politically. The coalition is dissolved, but neither of the old parties, Liberals and Conservatives, can go back to their previous status.

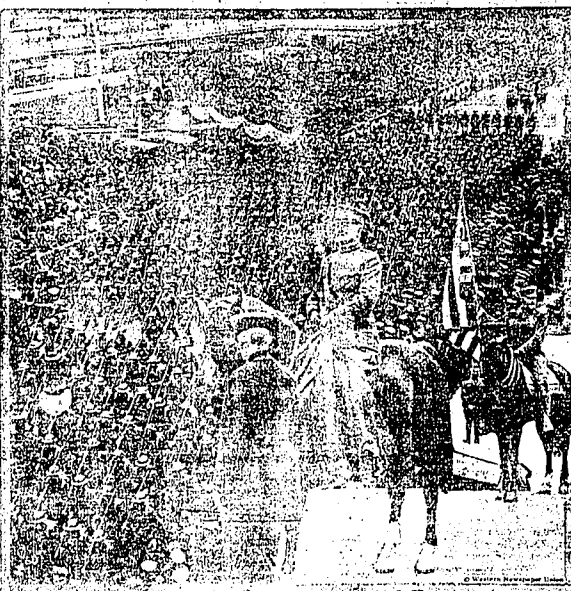

With and other familiar socialist. There are George S. Barnes, cabinet minister, who fathered the labor cause in the United States, G. H. Roberts, first candidate in the present government, Stephen Wadell, at present holding a minor government post, William Brown, Vernon Harcourt, W. H. Thomas, James O'Rourke, J. H. Thomas, railwayman's leader, William Adams, the official leader of the labor party, Arthur Henderson, and last, but not least, Robert Skellie, president of the miners' federation of Great Britain.

Of those Skellie stands out most prominently from the others, probably he has taken in the settling of past war labor problems, and he is probably the most powerful man in the labor world today.

It is generally certain that labor today could defeat both of the old political parties, working independently, and the proposed coalition party is a combination of the two, and not a certain of securing a majority over the united ranks of the opposing labor parties. The main problem for labor today is whether the extremists are to prevail. At the last election the extremists were roughly treated at the polls, but while there has been the inevitable reaction since the signing of peace, their policy is not popular.

PERSHING LEADS FIRST DIVISION IN NEW YORK PARADE

A view of the parade of the First Division in New York, and of General Pershing leading it.

WONDERFUL ANIMAL, THE GNU

And Voles Would Grow to Be Not the Least of His Remarkable Qualities. Few people know what a satisfactory animal is the gnu. Quite a number of hotel admirers, if they see and the animal, are so struck by his unusual combination of characteristics, that they long to see him. He has the long qualities of his own. He has a body like an antelope, but with a head and neck that are so different from those of any other animal.

NOT ALL A CHESTERFIELD

Writer Outspoken in His Definition of What is Known as a "Perfect Gentleman". Somewhere in the back of every man's mind, there dwells a strange, idealistic desire to be thought a Perfect Gentleman. And this is much to his credit, for the Perfect Gentleman, as this widely contemplated is a high goal of human behavior, although in the narrower, but more practical sense, it is a high goal of manly life.

Plant All Animals, Hate

A few gardeners have been the victims of a new and very dangerous plant, the "Hate Plant". It is a small, but very hardy, plant, which grows in the garden, and is very difficult to get rid of. It is a very common plant, and is found in many gardens.

HONOR HELD BY QUAKER CITY

First American Edition of the Hebrew Scriptures Now on Type in Philadelphia. The Hebrew Scriptures, as they are known, are the most important of the world's ancient literature. They are the foundation of the Jewish religion, and are also one of the most important sources of information regarding the life and times of the Jews.

SUPPLIES IN SIBERIA

Two thousand physicians assembled at the Imperial university in Kyoto to hear Dr. Shirogane lecture on typhoid fever. The cause of which is much disputed among medical authorities, but it is generally believed that it is caused by a bacterium. The disease is very common in the tropics, and is also found in the United States.

Bluebird Herds Spring

The bluebird is among the first, often the last, to arrive in spring in the northern part of the United States. The bluebird is a very common bird, and is found in many parts of the country. It is a very beautiful bird, and is also one of the most useful.

Hold on to this idea

You Can Make Millions in Oil

Of all the Investments you have here-to-for made you never had a chance to get in on one like this.

A CHANCE WHERE YOU OWN YOUR OWN OIL FUTURE and where the speed of the development lays in the hands of a Local Syndicate.

No matter how bad you might wish to be in the oil game, no matter how much money you have to spend; **HOW ARE YOU GOING TO SPEND THE SAME SO AS TO HAVE 100 PER CENT CHANGE ON YOUR MONEY?**

THERE IS ONLY ONE SURE WAY—That way, is to buy the lease on lands near to where they are drilling for oil.

The investors are now laying waste. The value of acreage depends on the distance from where oil wells are actually being drilled. Oil leases at Black Burnett were worth, before the first well was drilled, nothing. During the time the first well was going down acreage sold rapidly at \$200 to \$300 per acre. After the well was completed, acreage sold from \$500 to \$1000 per acre. When a person buys acreage there is no chance of losing it, it belongs to you, and no matter how valuable it becomes, you are the one who gets when it sells. A local syndicate is now drilling for oil in Oklahoma, where over 50 per cent of the wells are money-makers, in a country where checks are actually written in millions.

This local syndicate is made up of well-known business men at the head of which is J. O. Noggle of Elmer. This syndicate sent Mr. Noggle to California one and to Wyoming twice to pass on oil propositions. Each time he turned them down and saved thousands of dollars for these men. They then sent him to Oklahoma, where all fields are being drilled one each year. The proposition looked so good to him that with a number of local business men he has begun the drilling for oil and gas on a business tract. This judgment is of great value to men who know him and he is in the oil game to day. There are a few acres within one mile of where you have actually begun the drilling of the well, which still can be leased.

MONEY MADE EASY IN OIL FIELDS

Says a Drug Store Clerk, if a Person Has Some Money, a Little Nerve and a Chance to Buy a Lease Near a Well Actually Drilling

"Only one way of investing in the development of oil, that will insure a chance," says the Oklahoma Investor, in an interview with Richard Leonard, a man who has stripped from a poor clerk in a drug store to a multimillionaire, asking him how he did it. He said:

"I did not take too long to find out that Oklahoma had the oil, but how could I get a part of it, was the problem I wished to solve. I had a very limited amount of money, and a fair job. I knew if I bought some land that was supposed to have oil under it, I could not drill a well as it took several thousand dollars to drill. In fact many thousands to buy even the casing after the well had been drilled, so I decided that my life was passing up and I must act at once. Feeling that if I did not attempt to better my condition it would not be bettered, so I decided to buy 40 acres of oil lease near to where some responsible fellows were going to drill, so I purchased 40 acres at \$200 per acre. The lease was a five-year lease. The well was drilled to the depth of 2800 feet and oil was found. My lease was worth \$2000 per acre."

"The reason is that the farmer in Ohio sold half of it and retained the other part. Then I bought some more leases where wells were being drilled, and it was not long until I was very independent. When asked if he bought stock in any of the oil companies, he said yes, he did until experience taught him that the sure way to get the most out of what you own and play the game as safe as possible. You will find people in the oil fields buy leases and they must be reasonably close to the well that is drilling. "What do you mean by 'reasonably close'?" "Then the main thing is to know that the covers that you are near will drill." "Yes, that is it, exactly. You will notice in Oklahoma, shoe shiners, barbers and bankers alike make millions when they play the game successfully, by buying leases. Oklahoma is as much of an oil state as Ohio is a farming state and farming is not a serious matter in Ohio, is it?"

The reason is that the farmer in Ohio takes the lease amount of chance possible in farming, and the men who buy in Oklahoma do the same oil, so buy leases."

"Who is it that many people in Oklahoma have lost money by playing the oil game?" was asked.

"Well, it is one thing, why has Oklahoma passed a blue sky law," was the answer.

"Because so many companies were operating that had no capital, I suppose," was the answer.

"Yes, you guessed about right, and if the company did not have the money that became of the stock holder? He just had the pleasure of believing that he had something for a short time, that's all, and if the investor had owned a horse he yet would have had something, because the well will be completed by some other people. Oil investments are the best. If you win, and the best chance to win is by buying oil leases, in an oil country, and Oklahoma is sure an oil country."

"I mean within two miles."

"Then the main thing is to know that the covers that you are near will drill."

"Yes, that is it, exactly. You will notice in Oklahoma, shoe shiners, barbers and bankers alike make millions when they play the game successfully, by buying leases. Oklahoma is as much of an oil state as Ohio is a farming state and farming is not a serious matter in Ohio, is it?"

The reason is that the farmer in Ohio takes the lease amount of chance possible in farming, and the men who buy in Oklahoma do the same oil, so buy leases."

"Who is it that many people in Oklahoma have lost money by playing the oil game?" was asked.

"Well, it is one thing, why has Oklahoma passed a blue sky law," was the answer.

"Because so many companies were operating that had no capital, I suppose," was the answer.

"Yes, you guessed about right, and if the company did not have the money that became of the stock holder? He just had the pleasure of believing that he had something for a short time, that's all, and if the investor had owned a horse he yet would have had something, because the well will be completed by some other people. Oil investments are the best. If you win, and the best chance to win is by buying oil leases, in an oil country, and Oklahoma is sure an oil country."

"I mean within two miles."

"Then the main thing is to know that the covers that you are near will drill."

"Yes, that is it, exactly. You will notice in Oklahoma, shoe shiners, barbers and bankers alike make millions when they play the game successfully, by buying leases. Oklahoma is as much of an oil state as Ohio is a farming state and farming is not a serious matter in Ohio, is it?"

PLANTED BY BIRDS

Simple Reason for Uncommon Position of Trees.

Tall Palmyra Palm Growing on Top of Balmby Field Presents Curious Appearance—Nature Explains Apparent Phenomenon.

Every one has heard of small trees getting soon on larger ones, and appearing like little babies on the branches of their hosts. But in India it is in some places that the tall Palmyra palm growing as if from the top of the tree called Balmby field. The appearance this presents is most curious and it has engaged the attention of nearly all travelers in the Thibet district of Bombay, where the palm is especially numerous.

If one fancied how inconspicuous a very tall telegraph pole fixed into the middle of an oak tree and surrounded by a small crowd of fan-shaped leaves would look, it can be realized how astonishing the first encounter with the Palmyra palm is to the visitor suddenly united with a fig tree. An explanation, of course, had to be found, and the first casual observers might be said to have done this, but in a case of a hybrid, and the remainder who considered it a graft. But botanists know that this is not the case, as never been produced between two species that are so distantly related as the palm and the fig.

After collecting a few of these, they usually fly off to the top of a tall palm tree in the same position. The palm trees fall and become lodged in the joints where the leaves spring from the trunk. Here, in process of time, they germinate and grow up as if from a new tree, and leaves above and below, but the roots of these fig trees are not cut to show the connection with the food from the little pocket of sand and dust into which they happen to fall. They soon multiply and spread far beyond the original home, and form a network that covers and envelops the whole of the lower part of the Palmyra tree, and in the end the whole tree is a web of figs, forming a large bush which, with the roots, monopolizes the situation and makes the palm look like a mere sapling. But the wind does not mind. All the air it wants is for the leaves above.

The surprising element of fig roots, moreover, causing it to get up and grow because it would not, in any case, increase its width after it had cut itself from the ground. It is in fact, a case of symbiosis or mutual accommodation between the two species. The palm gives the necessary assistance to the figs and the figs in return give the maturing branches, while the foliage which these bear provides welcome shade and shelter for the palm. The National History Society of Bombay.

Police of Japan do not like to see kissing in public and therefore film stars are not permitted to occupy the screen. It is in fact, a case of symbiosis or mutual accommodation between the two species. The palm gives the necessary assistance to the figs and the figs in return give the maturing branches, while the foliage which these bear provides welcome shade and shelter for the palm. The National History Society of Bombay.

Three hundred and fifty-three people were killed and 127 wounded during the earthquake in Japan. The National History Society of Bombay.

When his turn came he climbed into the machine and started it. The instructor left on a lunge and his cadets were assigned to other "dights" for their being jarred. By mistake one was attached to a "drows" squad.

When the machine had dropped to 200 feet, the instructor became alarmed and looked back at the cadet, who waved his arms above his head and grinned. The pilot grabbed the controls and made a safe landing.

The cadet explained that this was his first flight and that the instructor was trying to kid him when he waved, so he pretended he wasn't scared.

The police of Rome, in the suburbs of Ancona, is to be reconstructed by the Government and the city of Ancona for the purpose of the Spanish conquest. The structure, 400 years old, has been almost in full ruin. The city is surrounded by a wall of stone, and the courtyard are ancient trees, under which Horatio Cortez and his followers were wont to rest. There are many deeds of years older than the ancient building itself. The chapel attached to the palace is still in good condition.

Arizona Judge Makes Beer Legal. Sale of beer containing 24 per cent alcohol is permitted by a decision by Judge William H. Sawtelle in dissolving a denunciate of the Reiter Brewing company, which asked a general injunction to prohibit the sale of such beer be dissolved.

LAW AFFECTS LABOR UNIONS

Court Decision Holds Organizations Responsible for Illegal Acts of Individual Members.

David Clark, editor of the Southern Traffic Bulletin, is calling the attention of manufacturers and others to a recent decision of the United States Court of Appeals for the Fifth district that labor unions are responsible for trouble damage for injury to or destruction of property by its members, provided notified out by Mr. Clark says:

"The most important decision affecting the responsibility of labor unions is the first instance in the United States where a labor union has been held liable for an act of its members in its recent decision by the United States Court of Appeals in imposing against the United Mine Workers of America damage to the amount of \$25,000 for violation of the Sherman anti-trust act.

"These essential principles are established by the decision. First, a labor union is responsible under the Sherman anti-trust law for trouble damage for injury to or destruction of property by its members; second, that the organization is responsible as a principal for the act of its district and local branches, their officers and members; third, that the organization is responsible when it takes no steps to correct the discipline of its officers and members for acts of violence.

Unorganized Workers Suffer. Although striking New York are demanding \$55 a week for a six-hour day, and garment workers in Boston are said to be receiving \$44 a week for a four-hour day, the same advertisements in daily papers show that clerical positions are generally filled by the unorganized and unorganized workers have apparently gained little in salary advances, despite the increased cost of living.

The distinction is more noticeable where advertisements for help in well-organized trade unions appear. These advertisements are more noticeable where advertisements for help in well-organized trade unions appear. These advertisements are more noticeable where advertisements for help in well-organized trade unions appear.

A "mechanical engineer for assistant engineering work can get \$100 a month at \$22 a week. If he is qualified, but a comparatively small street railway company, operating under the largest of a union, calling a wage and than that paid in Boston, announces that it needs help and that its men are not getting \$100 a month. Numerous positions for girls in office work are offered at \$8, \$10 and \$12 a week.

PREACHERS TEMPTED TO STRIKE, HE SAYS. "Only a lingering sense of duty and service prevents the preachers of America from forming a union, calling a wage and telling the country to go to hell," said the Rev. John Hugh Straton, pastor of Calvary Baptist church, New York, in a sermon on the devil's responsibility for polluting and labor, Sunday.

GOSPEL MEETING PARISH HALL

A series of gospel meetings will be held at the Parish hall beginning Tuesday evening, October 21, and will continue over November 2.

These meetings are not being conducted by some unknown, or questionable evangelist, but are being held under the auspices of the Free Methodist Church—a church with forty-year conferences in the United States and Canada, and a foreign work which constitutes nearly ten per cent of its entire membership.

The evangelist who will conduct the meetings is one of the four General Conference evangelists elected by the late General Conference, held at Greenville, Ill. last June, and assigned to the field work by the Columbia River conference, held at Belleville, Wash., last April. Rev. Hucker, the evangelist who will conduct the meetings is one of the four General Conference evangelists elected by the late General Conference, held at Greenville, Ill. last June, and assigned to the field work by the Columbia River conference, held at Belleville, Wash., last April.

The church has an altar number in coming to Twin Falls and any evangelist upon the churches or milliners of this city. It earnestly desires to promote a revival of vital religion in your midst. We sincerely believe that the only solution of the problems of the world's great need in these times of confusion is the rebirth of Christ in the hearts of men.
