## OHIO VOTERS NULLIFY STATE'S RATIFICATION OF PROHIBITION

### Action Voids President's Proclamation That Three-Fourths of States Had Ratified Measure in Claim of Wet Leaders—Approve Statewide Prohibition, Defeat Enforcement

COLUMBUS, Nov. 7.—Ohio's defeat of the national prohibition amendment in Tuesday's referendum nullifies the state's ratification and voids the proclamation that three-fourths of the states had ratified the measure. This was the declaration of liberal leaders here today, when practically complete returns showed that the voters of Ohio had expressed disapproval of the state legislature's action in ratifying the measure by a majority of probably 10,000.

### FARMERS AND THE 44-HOUR WEEK.

"We know that the 44-hour week cannot feed the world, and we proclaim that it cannot clothe it." With these words the Farmers' National Congress closed its arguments protesting against the ever increasing demand of labor for shorter hours.

The 44-hour week in industry has been gaining so steadily in favor that it is doubtful whether the farmers' protest can check its progress. But sympathy can be felt for the farmers' stand when they go on to say, "Those who advocate the short day in industry cannot expect the farmer to work six hours before dinner and six hours after, with before-breakfast and after-dinner chores thrown in."

A little simple, serious propaganda spread among other workmen as to the effect upon the food supply if the farmers should go in for short-hour strikes might do a great deal of good.

Certainly the day on the farm is unfairly long. The only way to help this condition is to have more farm help and the work better divided. If this is to be done, then the farmer, in order to hire extra help, must be able to buy his farm supplies more cheaply, and have better facilities for reaching his market, or else he must raise the price of his products. This brings the issue right back to the men who are making what the farmer needs. If they fail him, he cannot help falling behind.

The 44-hour week is not at fault. It is rather the failure of many farmers to produce 100 per cent while they are working; or the long expensive strike when they do not work at all. The trouble comes from the fact that too much stress is put upon the 44-hour week for labor, and not enough upon labor for 44-hour week.

### NEED OF COMMUNITY CENTER.

Opening up the motion picture houses may or may not be the solution for the condition complained of by a correspondent of The Times, who says she has no place to go and nothing to do on Sunday afternoons except to sit in her room and watch the flickering flame of a coal oil stove. Certainly sitting around in a room watching the dismal flicker of an oil stove is not inspirational unless the lonely one is blessed with a mind as philosophical as Mr. Marvel's, and can weave about the flickering flame such reveries as his.

No place to go, nothing to do, on Sunday afternoons, is not a good advertisement for Twin Falls community work. Some effort should be made to supply what is manifestly a community deficiency. The city government could take up the work of providing a community center, and it will some day, following in the footsteps of other and older communities. In the meantime there would seem to be a wonderful opportunity for the churches of the city to do some work not only in building up their membership but in supplying what is manifestly a need. If they would throw open their doors on Sunday afternoons with an invitation to all to come in to visit, talk, and just be sociable with each other, they would be filling a place not occupied at present.

It may be impracticable to use the churches so. But it would seem to offer opportunity for community service of invaluable character. When any institution is able to render service its place in the community is assured.

### ROOSEVELT MEMORIAL PARK.

The Roosevelt Memorial, the committee in charge has decided, is to take the form of a park at Oyster Bay. Roosevelt had very much desired such a park, and had so expressed himself in his lifetime. "It is to provide, in the best and most healthful way, amusement facilities for the country at large. It is to have an individuality and atmosphere suggestive of the life and spirit of Roosevelt."

There is to be, in this park, "a dignified open-air theatre, built along the lines of a Greek amphitheatre, which would be used as an international forum for the discussion of grave problems affecting the future of America, and which would, in a vital and useful way, carry out the ideals and teachings of Theodore Roosevelt. It is proposed to call this theatre the Roosevelt Forum."

These ideas seem to memorialize in a most significant manner the spirit of Roosevelt's contribution to the life of the country. The park, with its out-door joy and teaching, and its forum for the discussion and bettering of public life, makes a combination characteristic of the man the country desires to honor.

Hoover says high retail prices are due to "the appalling psychology of the public to buy expensive things," but most of us would be glad enough to change our psychology if anybody would show us something inexpensive that we could buy.

There is one ray of light in the sugar situation—the necessity for sugar rationing during the war led to a marked decrease in diabetes. Better to live without sugar than to die of such a disease.

It does seem as though Gen. Yudenitch ought to be able to beat the Polish Poles with a scratch, anyhow.

Joseph Farley returned Saturday from the hospital. He is reported to be gaining very rapidly. Lillian McGregor, who is working at Nampa, Twin Falls, and here last week end with her parents, Mr. and Mrs. G. L. McGregor. Mr. Richard Gavin visited Saturday at the F. W. Berger home. Mr. Dwight of Filer was a business caller in Berger Saturday. Mrs. J. M. Pierce and Mrs. Felix Stearns attended the show, "The Shepherd of the Hills" at the Lavering theatre Friday evening. Saturday, while getting into a car from one of their homes, Mrs. C. M. Christensen fell, spraining her wrist and sustaining other injuries. Miss Lillian Christensen has been ill several days, but in much better condition. Mrs. John Atkin left Wednesday with her two children for Gilmore, Ohio, where they expect to make their future home. Mr. Atkin expects to leave Friday with the car of stock and goods. Mr. and Mrs. Fred W. Berger, who were expecting the E. L. Lincoln family as guests over Sunday, received word that the visit must be postponed, as the children were ill, and that although uncertain as yet the children might have scarlet fever. Misses Lilla and Meta Christensen took dinner Sunday with their brother, Henry Christensen. Berger school has a right to be proud of some of the students who are now attending high school in Twin Falls. Mr. Atkin's name appeared on the Honor Roll for his average of grades during the past month. It is again time for all members of the Red Cross to renew their membership. Do not feel you are left out if one has not called to get your duplicate but have it ready, for you still may be eligible. The work of the Red Cross is too great to be dropped now, with the excuse that "the war is over." This is not true. "The War of Reconstruction" has just begun. The Red Cross does not stand still.

### EVER SINCE ADAM'S TIME

When men tell you there is not much opportunity any more for a young man with no special advantages in the way of money, position or education, consider that they have been saying this ever since Adam's time. Among men today who enjoy any degree of material success, only a very few had special advantages. Their start was made by saving money. Money saved is an advantage to any young man. It earns interest for him and makes his opportunity wider.

EXPECT MIRACLE IN COAL STRIKE

Feeling Abroad That Miners and Operators Will Get Together to Settle Differences

WASHINGTON, Nov. 6.—There is a strong feeling in all circles here that something will happen to effect a settlement of the coal strike out of court. Despite defiant statements and claims of the opposing factions, it is very apparent that both are willing to get together in an effort to settle their differences providing a way out can be found which will not require a side to retreat gracefully from the field of battle without loss of prestige. Overnight the situation remained unchanged on the surface but today is expected to bring developments tending towards an eleventh hour settlement. Nothing whatever stands in the way of miners and operators getting together and settling the coal strike in the opinion of the department of justice here today. There is nothing in the injunction tying the hands of either operators or miners so far as reaching an agreement between themselves is concerned.

MILBAM TRIN TO INTEREST PRESIDENT LINDLEY IN CASE

MOSCOW, Nov. 7.—Hopling to intercept President Lindley of the University of Michigan in the case, Horace J. Milbarn, a vigorous man who attempted suicide because the young woman he claims as his wife desires to marry when she refuses to have anything to do with him, sent a note to the university official today pleading for an interview. Lindley was busy when the note was delivered, but promised to see Milbarn later. It is the latter's purpose to importune the college officers to use their influence with Mrs. Milbarn, now Esther Digates, to have her to come to Moscow to live. Dr. W. A. Adair, says Mrs. Milbarn says his purpose is much more cheerful, seems to be taking more interest in life, has no temperature and is progressing favorably toward recovery.

No word has come from the University of California agent whom Milbarn alleges to be his wife's father.

Tomorrow; Opening Day of the Clearance Sales at Hart's

WE ARE HERE TO STAY

We have come to Twin Falls with the intention of remaining here. It is not our purpose to merely close out these stocks and move away. It is our hope to win the respect and confidence of the people by our good service, fair dealing and modern merchandising and to build a business that will be spoken of as our other stores, as "a good place to trade."

Our present quarters are rather small for the plans we have in mind, but we hope to enlarge and improve this condition as time passes.

**Health Nurse's Work is Paying**

In an attempt to show with Mrs. Pike, the public health nurse, that the public health nurse's work is paying, the Times reporter this month of the Red Cross, the health nurse's work in Twin Falls has been most successful.

"Many people do not realize," said Mrs. Pike, "that one-half of every dollar collected here in the present Red Cross drive stays in Twin Falls to carry on this public health nursing work and the home service work, both very practical and necessary steps in the war reorganization work."

**MILHAM IS ON ROAD TO RAPID RECOVERY**

He told the Advertiser that he had been in the hospital for five days prior to the tragedy, because of worrying over the action of his wife. He declared that it is this fact which Milham is receiving an allowance from the government as his wife, E. H. Irby, Milham's friend and associate, says Milham received \$5 a month from the government and his wife \$25. According to Irby's statement Milham is 28 and Mrs. Milham 19. **Seattle Theater Man Recommends "John Ferguson"**

Strongly recommending the play, "John Ferguson," which will be presented at the Lavering theater Friday and Saturday, a letter has been received by Manager E. C. Lavering from George T. Hood, manager of the Metropolitan theater at Seattle and looking agent for Iowa and Oregon in that city. His letter follows:

Dear Sir:

I just called you to hold November 7 for "John Ferguson." This is without doubt the greatest dramatic attraction we have ever presented to our patrons and wherever the local managers have gone out and done personal work the business has been booming. The only difficulty in some cases has been that neither the local manager or the patron knew anything about the show. They supposed "John Ferguson" was the name of some star, but as a matter of fact, that is the title of the play. You can take my word for it that this is a well-acted attraction and one that you can afford to go out of your way and tell your patrons about it. In other words you can guarantee it to them every step of the way. The University of Washington, bought the entire house last Tuesday night so that the students could see the play.

The play itself has a strong dramatic appeal but the beauty of the performance is the work done by the cast in each and every number, or the cast is perfect in his or her part. I herewith enclose a newspaper clipping from the Seattle "P-I" which I want you to read through and show it to some of your prominent people.

I had read in the dramatic papers and elsewhere of the wonderful success of "John Ferguson" in New York. It was produced by the Theatre Guild which is an organization which I think you would like to try out plays in their New York theater for one week only. The object being to turn out as many plays in a season as they possibly can. When they produced "John Ferguson" it created such a favorable impression they were induced to continue it for two weeks more and later it was taken to the Fulton theater, New York, where it ran all through the summer and I believe was the only show that played through the entire strike, successfully.

I had the advantage of knowing this and by telling my patrons was able to work up a big house the opening night and after the show closed it hoisted itself.

As long as I have been thinking attractions for your theater I think this is the first time I have ever written you in this manner and I would not do so now if it were not for the fact, as I said before, that it is an unusual show. The best in dramatic form that the patron will ever see.

Yours very truly,  
GEO. T. HOOD,  
Looking Agent and Manager Metropolitan Theater, Seattle, Wash.,

**SAYS 'TONEY' OPINIONS SEVERE WINTER PREDICTION**

HOLDEN, Cal., Nov. 6.—The case has confirmed the wild duck's prediction of a long, cold winter.

"The case is a species of rabbit that inhabits the higher rocky areas, feeding on "Tibetian" vegetation," according to Webster, but Ed. Tanen, mountain climber, says he's only part rabbit. "He looks like a rabbit," says Ed. Tanen, "but looks like a prairie dog, hibernates like a bear and is as bashful as a heaver. And is a real weather prophet."

Tanen declares he recently saw scores of the little animals gathering their winter store of food, which he says is a sure sign that the winter season will be here soon and will be very severe.

# KNOX OFFERS RESERVATION

## Would Make United States "Coal-sulting" Member of League Ratifies Peace

WASHINGTON, Nov. 7.—A reservation to make the United States a "coal-sulting" but not an integral part of the league of nations was offered in the senate today by Senator Knox, Republican of Pennsylvania, former secretary of state and member of the senate foreign relations committee.

The reservation was presented by Senator Knox in the form of a resolution "that the United States does not severally advise and consent to the ratification of the treaty of peace with Germany in so far as it provides for the creation of a status of peace between the United States and Germany."

Senator Knox explained that the purpose of his reservation was to put the United States "in the league, in principle, without making us an integral part of the league in all its complicated details in all its perils and uncertainties and obligations."

The Knox reservation reserved in the United States the "fullest and most complete liberty of action" with regard to any suggestion or proposal of the league of nations and the international labor conference created by the treaty and also the "sole right of determination in our relations and duties and course of action" toward the league or any other members of it.

adult. We may continue our search for an outfit for life, forever, expecting to find one containing iron. With this exception, milk offers all the ingredients essential to growth.

Until the people in general are educated to these facts it will be difficult to enforce measures providing for pure milk. Pasteurization does not render milk safe. It merely inhibits growth of bacteria. Unless it is kept cool after pasteurization, it will grow again just as rapidly if not more so, owing to destruction of milk by the heat. Evaporation of creaming agents of the enzymes or fermenters of the milk destroys the growth factor.
