**Declares Wilson Incapacitated—
Whoever It Is, He's Doing
a Mighty Good Job**

HARTFORD, Conn., Dec. 23.—That Secretary Joseph H. Tumulty is running the nation, that on account of President Wilson's physical condition he is not disturbed with matters of moment and that "the United States is being governed by a regency such as existed in England when the king was incapacitated," is the charge of Senator Lawrence Y. Sherman of Illinois in an interview printed in the Hartford Courant today.

According to Senator Sherman, it is commonly known among members of the senate that President Wilson was suffering from almost complete paralysis of the left side from the head down. That condition has been relieved, the senator charges, but the nerves of the head have been so weakened that he cannot do as much work as formerly.

Senator Sherman is given an authority for the statement that it is an open secret in Washington that the last message to congress was from the pen of Mr. Tumulty and that the message to the miners came from the same source.

**Suppression of Irish

Men almost generally predicted the fall of the Kolchak government. Twenty Russian brides were also brought on the transport, having married doughboys just before sailing.

**MEN'S SISTER REGIMENTS
IN ROW OVER U. S. FLAG**

RUTLAND, Vt., Dec. 24.—Miss Annie A. Allen, superintendent of the Rutland Hospital, has resigned following an investigation begun into an anti-American incident which occurred at the hospital recently. Miss Allen is a sister of Baron Beaverbrook, a Canadian. An Aldermannic investigating committee was told that Miss Anna Melaney of Woodstock, N. H., when shown a picture bearing an American flag, said it would be pretty "if it were not for that dirty red, white and blue flag." American nurses reported the affair to Miss Allen, but she, it was testified, reproached them.

**NEW FILM SCREEN PERMITS
SEEKING MOVIES BY DAYLIGHT**

LONDON, Dec. 21.—Taking your eye to the movies may have some of its glamour if the new British film screen, which permits motion pictures to be shown in daylight or in strong artificial light, as well as in the dark, comes into general use. At an exhibition of British motion picture films a new kind of screen which can be rolled up like a window blind for easy carriage and which is non-inflammable, was demonstrated in daylight. There was less strain on the eye than with the ordinary film screen.

**PITTSBURGHERS DON'T
MIND BEING BUMPED**

PITTSBURGH, Pa., Dec. 24.—Pittsburghers are daily tacking in politics, according to Harding Bartholomew, chief organizer of the City Club and manager of the "Citizens' union" to give an address, before the Club, today.
Mr. Bartholomew said that while a number of members on the next Monday his way through a crowd, and being bumped together with a hurray pass-by. There takes, together with the alleged foul-up of apologists, his notions of the use of the movement to bring the citizens' union a jar, because the organizers on the one hand are taking up jobs and are being treated at the white house, and a bit suspicious if a man and at the department of justice from who has played the role of a historical producer in different parts of the country.

**BRITISH TREASURY PREPARES
FOR SILVER SHORTAGE**

LONDON, Dec. 24.—The British treasury, which operates through the Bank of England, has prepared for an expected silver hoarding shortage by printing a large number of five-shilling bank notes.

Legislation by parliament would be necessary to legalize the hoarding of such currency.

The steady rise in silver bars has made British silver money worth slightly more than its face value, although it is fixed to meet show. Coal Commission**

WASHINGTON, Dec. 23.—Coal operators this afternoon are expressing all of their efforts toward persuading Attorney General Palmer and other government officials to increase the number of members on the coal committee which President Wilson has named, and to extend the scope of the proposed inquiry to include all mining organizations of the United States, including the "miners' union" to give an address, before the Club, today.

Decalcification over the limited personnel of the commission is generally expressed by the operators. Especially is this true in the fact that they were not consulted before the board represent them was announced from the white house.

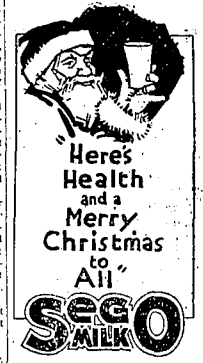

Arrangements are being pushed for the removal of operators from the list. Legislation by parliament would be necessary to legalize the hoarding of such currency.

Beating the Train.
"Now, Thomas," said the foreman of the construction gang to a green hand who had just been put on the job. "Keep your eyes open. When you see a train coming throw down your tools and jump off the track. You like flowers?" "Sure!" said Thomas, and began to swing his pick. In a few minutes the Empire State Express came whirling along. Thomas threw down his pick and started up the track ahead of the train as fast as he could. The train overtook him and tossed him into a ditch. "Sure!" said Thomas, and began to take care and get out of the way? "Why didn't you run up the side of the hill?" "Up the side of the hill, it is all right," said Thomas through the handkerchief on his face. "Up the side of the hill? By the powers, I can't date it on the level, let alone run!" up!"

PREDICTIONS ARE FULFILLED

Depreciation of European Money Is Having Disastrous Effect on American Manufactures

WASHINGTON, Dec. 23.—Predictions that the senate's failure to ratify the treaty would depress and depress business in this country and retard reconstruction in Europe are being fulfilled in a way that is alarming Republican senators. The already depreciation of foreign exchange, with the threat of curtailing the exportation of American products which Europe needs, and which the exporters of this country must sell, if production is to continue, is but one effect of the treaty's defeat by the senate.

Among the signs of four among Republican senators who had the principal part in the authoring of the treaty is Senator Knox's proposal to repeal the resolution declaring war with Germany. On its face this would not appear to be an evidence of weakness or surrender on the part of Senator Knox, but those who have followed his course while the treaty was before the senate regard it as a concession born of conviction that further delay in ratifying the treaty will bring calamity to American business and a day of reckoning for the Republican club in the senate.

Other Republicans agree to appear to be discouraged by the return fall in the value of foreign money and fear its effect on American business. It is believed that they are aware that if the senate's refusal to ratify the treaty is not the sole cause, it is a principal factor in the present deplorable situation of American business, life and morals. They seem to understand that a further depreciation will slacken and begot unemployment and that American production

will slacken and begot unemployment and financial depression in the United States.

It would be too much to say that the Republicans are showing signs of full retreat from their former position, but it is within the truth to say that they are planning for a "strategic retirement."

FIND HIGH EXPLOSIVES IN RAID OF SMOGHS IN IRELAND

Real Crimes.

Many crimes and vices are being subjected to a reclassification in the course of which they are entering by the way in no few instances to be changing places. The students of criminology taught by Danic to his inferno of lost souls is being every year more closely approximated; sine of the crimes are being reclassified as being "real crimes" and having a really "real" of "atavism" in them are being judged legal, when they are committed since all, and the cold-hearted sins of cruelty and calculation and cowardice, are being ranked up as the real crimes against God and man.—Richard Le Gallienne.

Meaning of "Selah."

The word Selah, which occurs frequently in the Psalms, is usually believed to be a direction to the musician who chanted the Psalms in the temple. Matthewson, the great musical critic, wrote a book on the subject, in which, after rejecting a number of theories, he came to the conclusion that it is equivalent to the modern "adagio," and is a direction that the air or song is to be played from the commencement to the part where the word is placed.

Old Emerald Mine Is Rediscovered

NEW YORK, Dec. 23.—An old-fashioned mine, supposed to be fairly rich, once worked by the faces before the coming of the Spaniards and buried by them to prevent its falling into the hands of their conquerors, is reported to have been rediscovered in Colombia, South America.

The mine remained lost for centuries. It figured in tradition under the name of the "Chivoro mine" and a search for it has gone on intermittently since the days of the conquistadores. Interest in it was revived in 1845 when another old line, a small mine, was rediscovered. There it was found in the hands of the Spaniards. Millions of dollars worth of emeralds have since been taken from it and it has become one of the great sources of supply for these beautiful gems.

A group of New York capitalists, said Colombia last spring to look for all hands, they heard the tradition regarding that mine. The romantic story intrigued them. They found a pool of \$100,000 to finance a new search for the lost treasure. The capital was divided into 4,000 shares of \$25 each and some of their friends in New York invested.

Since the organization of the company searching parties have been out in the wild mountains over 1,000 miles northeast of Bogota, capital of Colombia, where tradition located the mine. By what lucky accident the old mine was found is not known in this country yet, but a cablegram announcing treasure found sent the stock of the company of adventurers skyrocketing to \$1,000 a share in Wall street with none offered for sale.

If the richness of the mine proven equal to the fame tradition has given it, it will pour millions of dollars into the pockets of its owners. Emeralds are scarce and as they grow scarcer their popularity and value is increasing. Their price has advanced in recent years until carat for carat they are almost as valuable as diamonds.

SOLDIER BILL DECLARED DEAD

Lane's Farm Measure, Rechristened Mondell Bill, Killed by Republicans

WASHINGTON, Dec. 23.—Seven months have passed since the extra session of congress closed and the prospect of practical recognition of the claims of the soldiers, sailors and marines for work done in the World War is still as uncertain as ever. Secretary of the Interior Lane's soldier farm measure—held back in the previous congress by the Republicans and rechristened the Mondell bill—is still in a state of coma, and all attempts of the Democrats to inject the breath of life into it have been rebuffed.

So the Democrats in the house of representatives took the initiative and passed a soldier's land bill of their own making. The first constructive measure of the kind to be approved by either house of congress since the war, which was introduced by Representative Scott Ferris (Democrat of Oklahoma), was favored in its absence by Representative Edward T. Taylor (Democrat of Colorado). It provided that when any land is thrown open to settlement within the next two years, soldiers, sailors and marines will be given preferential filing rights for the first 30 days.

This practically means that all the land described will be settled by the men who fought for Uncle Sam in the war.

In the course of the debate preceding the passage of the bill Representative Taylor and W. H. Bankhead (Democrat of Alabama) prodded Republican leaders for their inability or disinclination to do anything for the fighting men.

"I do not know, in the long run, whether this congress is going to pass any effective legislation for the benefit of the service men or not, but I do not know, in the long run, whether this congress is going to pass any effective legislation to give to the service men the right to purchase land in preference to the general public," said Mr. Bankhead.

In an effort to speed up legislation affecting ex-service men Democrats introduced into the house a resolution providing for a special committee of 18 members to pass upon all such proposed legislation. As things now stand, the bills are scattered among more than a half dozen committees with no facilities provided for the handling of all the various ideas into a small number of comprehensive compact bills.

The one measure in the interest of ex-service men, now ready for passage is the Lane or Mondell bill which provides for the redemption of arid

The Ounce of Prevention

It is the "ounce of prevention" which today inspires medical science in its fight for the race. Vaccines, antiseptics, health movements, all carry interesting possibilities of better prevention. Science has now developed an agent that effectively meets the conditions which is the starting point of over 70% of all diseases—constipation.

This effective agent is Nujol.

The dangers of constipation are so widespread because through accumulating it reduces the body's power of resistance. Nujol by relieving constipation prevents absorption of poisons, which otherwise would be taken into the blood and undermine the whole system.

Leading medical authorities agree that pills, salts, castor oil, etc., simply force and weaken the system.

Nujol differs.

Nujol softens the food waste and encourages the intestinal muscles to act naturally.

Nujol helps Nature establish easy, thorough bowel evacuation in regular intervals—the healthiest habit in the world. Get a bottle from your druggist today.

BETTER THAN COAT OF ARMS

Symbol of Pennsylvania Family Head Origin in Gratitude for Providential Help. There is a quaint symbol engraved on the silver plate, the library book plates and the note paper of a family in Pennsylvania, but more a crest, or coat of arms, by any means. In fact, it has no connection with the heraldry of the old world but is typically American.

The design is of a cat carrying a rabbit in its mouth, and there is an interesting legend to go with it. The first of the family to emigrate to this country was the father of ten children. He sailed the same year Penna. died and on the voyage, leaving his wife to land alone with her helpless children. She had a great deal of trouble. It is said, but no money, and so was obliged, like many of the first immigrants to our shores, to take refuge in a cave dug out of the side of a hill.

"ANY FOOL CAN FIND FAULT" Phrase is as True Today as When Great Man Said it Many Months Ago.

There is nothing however good but a person may find some fault in it, he is determined to do so. There is nothing perfect that is of man's making. The Bible says, "There is not a just man upon earth, neither one who performs but a few things more or less of his weakness. Worth, like water, must stay below the level of the sea. It is the same with a person about himself. The seven days dispute as much as the theologians. Every time one takes a new standpoint he changes his opinion. Every time he meets a friend he finds that he differs.

So we must make up our minds to disagree, but this disagreement may be of advantage if we disagree in the right way. If we do not disagree and our disagreement falls into ill will and animosity, then we are enemies of each other and not peace bringers. The persons we respect are those who are able to see with many eyes and observe things wholly wrong. It would make us feel that we are not alone in our opinion of a violent controversy, to have a second light let in on the controversy and thereby show us a new and a different aspect, so far as our own interest toward him is concerned, it is reasonable that he may be right and that his acedology—Otis Stinson.

White Man Finds Joy in Work

White man has been kind to China in the gift of natural resources, the nature and quality of her people justify high expectations of their ability to utilize these resources for the benefit of mankind. The Chinese have wrought out a standard of living which for efficiency in the realm of labor challenges the world. When the winter comes the Chinese are able to work for 12 hours of the 24 for 12 cents a day and hard labor, the suggestion will naturally come to mind but what of the quality of the work? The Chinese has not yet raised the question of the number of hours which constitutes a day's work. It is a matter of complicity from break of day until the evening star is clearly in sight, and this he will do every day of the year. Holidays are not frequent, and work is the source of his joy.

ONLY PART TO TAKE PART IN EVERY GAME

Bunny Hoyer, whose real name is Anthony Borjasi, was the only player in the American association this year to take part in every game. He played 152 games for the Kansas City mill, nearly all at first base. His first work for the Kaws this year was at third base. Brief was with the Pirates in 1917, and during that year was sent to the Louisville club. Last year and this he was with the Kansas City team. He pitched his first game with effect during the season, getting a batting average of .324.

OLD BELIEFS STILL SURVIVE

Quaker Marriage Customs and Superstitions Extant in Many Parts of the Old World. It is an old belief that marriage should take place when the moon is waxing and not waning. If it is to be a lucky match, and in many north-country districts a strict inquiry is made as to the state of the moon before the wedding day is fixed, according to a writer in London Answers. In the north, too, no wise bride will ask an old number of guests in her wedding feast, for an old superstition has it that if this be done one of the guests will die before the feast is out. In the highlands it is taken as a terribly unlucky sign if a dog should run between the bride and groom on the wedding day. In Perthshire prospective brides all tell the story of their wedding and decorate the houses for the occasion. In parts of England and Scotland there exists an ancient custom for which reason is hard to find, by which part of the wedding cake is broken over the head of the bride and the guests scramble for pieces.
