# PALMER SURE THIRD BALLOT WINNER, SAID

### Private Secretary Touches Up the Fireworks on Prediction Row

By FRANK A. STEINSON,  
I. N. S. S. Staff Correspondent.

SAS FRANCISPI, June 21. Predicting the nomination of his chief on the third ballot, Robert T. Bent, secretary to Attorney General Palmer today started the fireworks of what promises to be a very interesting pre-convention work.

"The big leaders of the democratic

party are out of town enjoying the hospitality of Senator Nelson at his country residence at Yalla Montana, when Mr. Bent decided that it was time to probe the lethargic journalists from around with a few well-timed remarks. General in the contest marks out the chances of the Attorney General's nomination appear very bright," asserted Mr. Bent. "With Mr. Adams definitely out of the race it is very easy to recognize that Mr. Palmer is the strongest candidate and a great majority of Mr. Adams' adherents will come to Palmer. I am confident that the attorney general will receive the nomination on the third ballot."

Mr. Bent then went on to explain how this would be brought about. "Mr. Palmer will receive about 100,000 votes on the first ballot," he said, "more than double that of any other candidate. On the second ballot the vote will be very unorthodox because the third ballot will see the big pull getting on the band wagon."

## Why Does Twin Falls Grow

Intensive irrigation farming and allied industries, combined with its plant and healthful surroundings, give Twin Falls a staple impetus for growth.

The facts about farm production sound miraculous to the person unfamiliar with this big, fruitful country. Southside Twin Falls 1919 crops \$13,245,000.

Since Twin Falls tract is the largest and one of the oldest irrigated bodies of land in the state, it is a practical demonstration of ideal irrigation practices in Southern Idaho.

SOIL.—The soil of the Twin Falls country is of a volcanic ash, of good depth and exceptional fertility and over porous volcanic rock.

These Snake river plains have in general a slope of 20 to 40 feet per mile, hence reduce the problem of drainage to an insignificant matter.

### FARM CROPS

The principal farm products raised are: Alfalfa, grain, potatoes, beans, clover and alfalfa seed, livestock, sugar beets and fruit.

LIVESTOCK—Thousands of sheep and cattle winter on Twin Falls tract each year. Alfalfa hay is plentiful and dairying is carried on with large profits in this country of abundant feeds and pastures. Twin Falls county pure blood livestock sales in 1919 netted prices no less in average as any in the Northwest. Shorthorn, Jersey, horse and swine sales are held regularly each year. Twin Falls banks finance several boys and girls pure-blood livestock clubs in this county.

### C. S. CLOCK MAKERS WANT TOP PLACE IN INDUSTRY

CHICAGO, June 22. The United States just now is fighting a battle on which huge supremacy in the clock market of the world. Its rivals are Switzerland and Japan.

American clock manufacturers for the last six months have been equipped with foreign orders. English firms recently are placing heavy orders for American clocks, which are now regarded as the best in the world.

The manufacturer recently received an order for clocks to be shipped to England in large numbers weekly, which will keep his plant working night and day for the next three months. Another company has been filling large weekly orders from France, South America, A. secured with agents of Japan in France, but has not yet heard of American clocks and is placing heavy orders.

Because of the shortage of skilled labor, American clock manufacturers are finding it difficult to fill all their orders. This is a serious handicap. If American firms fail to fill their orders, foreign buyers may turn to the Swiss and the Japanese and the chance of the United States to dominate the world's market for clocks may be lost. Japan in the last five years has become one of the greatest clock manufacturing nations in the world.
