CABLES IN THE AIR

A NOTED French engineer foresees the world's transportation problem solved by great aerial trains, the cars to be swayed from cables stretching from city to city, and anchored to great steel towers. Manifestly surface transportation is becoming more impossibly congested every day. This Frenchman does not believe that either dirigible balloon or airplane can ever be made safe enough to become generally popular, hence his suggestion of the aerial cable, which he has studied in operation in different countries.

The way in which the Italian and Austrian fliers used aerial cable for carrying men and munitions from peak to peak of the Alps during the war was one of the marvels of all that marvellous time, and it is largely from his observation of their success that he draws his belief in the practicality of developing this mode of conveyance. He suggests the addition of motor-driven wings to aerial speed.

Whether he is right or not time will prove. Meanwhile what Americans who have ridden over a pond on a cable at a Sunday school picnic, or shucked at a clown's meeting over the heads of the other circus performers in the ring below, but will have a sneaking faith in him!

York.

It is declared that 76 of Pennsylvania's 76 delegates are pledged to Palmer. Palmer says so himself.

The south appears strong for McAdoo. Delegates from Tennessee, North Carolina, Alabama and Mississippi are reported to be friendly to both McAdoo and Cox.

And still they come—delegates pouring in every train today. Yet no one man knows the score and dress of the great and mated convention.

California and the wealth of fruit and flowers are tickling the delegates and the city is in the attitude of open house.

Indeed, a lot of women and children accompany the men and politically-minded women are in great numbers, very spirited and ardent with their demands for full recognition. They are here to stay, and are not going home until the convention is over.

Delegates will not vote as a unit and almost every delegate has his own ideas as to whom to support.

BRITISH FLEET BROWNING UPON LONDONDERRY

REPLANT June 20.—A battle of words has arrived at Londonderry, and is being in the harbor with the city under fire guns.

Heavy fighting which had been

intermittently since Saturday

had down to isolated skirmishes

and sniping.

Afternoon came in time to treat

for the rescue of women and children

in the battle zone.

A British soldier was

killed while a de-

signment of soldiers was dispersing a riot.

factor.

Shortly after midnight

heavy volleys into buildings

where they were

They were repelled and

according to a telephone message.

A Londoner who had been

in Londonderry last week

and between two and

three hours ago

was quoted as saying

that "things were pretty

bad" in the city.

He said that British

troops had been

attacked by the people.

John Feiner told

that he had been

in Londonderry

and believed that

the death toll was

more than at first estimated.

Both Feiner and his

wife are in the hospital

to care for the wounded

and

McAfee.

The Galaskins of the city masked

forests, and the British

authorities

reinforcements of British

are patrolling the main streets

of the city.

Units of armed citizens, volunteers, and auxiliaries

are still on duty.

British troops who

were sent to Londonderry

to put down the rebellion

are now in the city.

HUSHING NOISE AT CONVENTION

U. S. Staff Correspondent

SAN FRANCISCO, June 25.—William G. McAdoo, of New York, "the friend" of William H. McAdoo appeared on the scene today and paid special attention to the efforts of enthusiastic speakers continuing to keep the McAdoo name alive.

Gibbons refused to attend or do

as he came to San Francisco

on the heights on the outskirts

of a city threat made against him

by the British.

In the battle zone, the British

are reported to be

playing on the hills and those

prepared by the troops were

being circulated.

In this letter, McAdoo declared "I

deserve to be here."

He is regarded as the

most prominent of McAdoo's
