

GEO. G. MARSHALL, Pres. & Supt.

J. T. MAY, Vice-Pres. & Gen. Mgr.

S. HENRY BOLTON, Ass't. Sec. & Treas. & Fiscal Agent.

United States Silver Mining Company

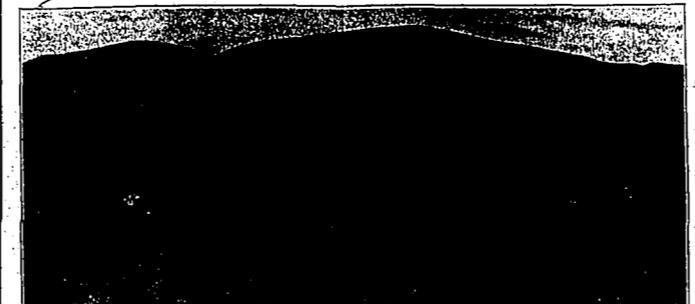

This is a picture of Geo. E. Eckman, who located this property under the name of World War. World War No. 1, 2, 3, 4, 5, 6 claims in all. Eckman is a real man, a faithful hunter, a true blue prospector. He has made other stakes but earlier in life was a horse fighter. Note a clean, sober gentleman.

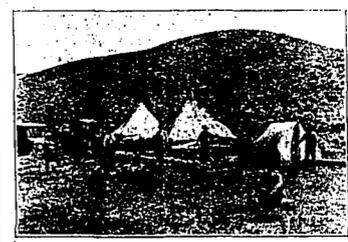

This is the face of the Ruby tunnel at the recommendation of Walter Hovey Hill our consulting engineer. There is in this picture S. Henry Bolton with the big hammer. Every body knows Bolton as a "Knacker", Pres. Marshall, Vice-president M.F. Shorty of the C. W. & I. Co. The locator and his dog.

Aug. 16th, 1920
In company with Harry C. Howl, the attorney for the company, I left Twin Falls on Thursday morning at 5:30 a. m. for the property of the United States Silver Mining company where we arrived driving the auto right up to the camp, we arrived Friday at camp with a big load of provisions and the president of the company and others at 11 a. m.
We went up to the Free Silver vein and on to the Ruby vein about 500 feet west. The tunnel is in 61 feet and is all ore matter with plenty of rich rock. I have two samples of this ore that shows rich in Ruby Silver. From what I have seen the representation of the promoter has not been exaggerated.
There is evidence of a big Silver mine that a novice can see actually exists in embryo.
Ansel Fish.

This shows the side of the mountain which runs up 381 feet above the creek. It also shows where we have been working on the Free Silver vein with dumps on the hill at each opening. It also shows to the left of these workings the Ruby vein where we have the rich Ruby ore in great abundance as you will see for yourself.

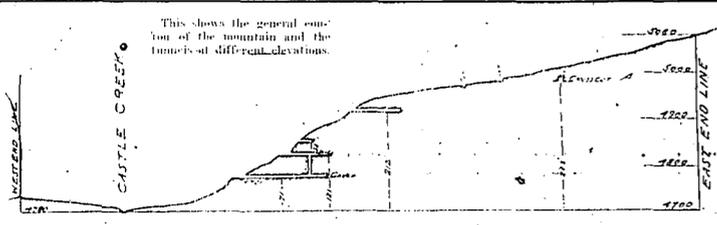

The store of the assays from this property is interesting and is here recited. J. T. May has had a hundred assays with values of pocket samples from 12.2 per cent 100 3 to 665 6 per cent.
When I visited the property last October the full face of the small cut was sampled and taken for 2 feet on the vein and run 117.26. Geo. E. Marshall sampled in November the same place and got 175.02 ounces.
This is the facts: Walter Hovey Hill sampled 23 lots and got values every time and when they went as high as 173.27, averaging about \$40.00 on the average. The last assay from the Ruby vein assayed 2.
Come and sample for yourself.
S. Henry Bolton,
Perrine Hotel.

This is the picture of the camp, only a temporary affair, with cook tent in the center presided over by Fred A. Haug a wonderful cook and worker. He may have brook Trout for dinner. If so, you have a feast. He knows how to make good coffee. The cream used will come from the Tunnis ranch. Sugar from Twin Falls' Goodland's Cooperative store and etc.

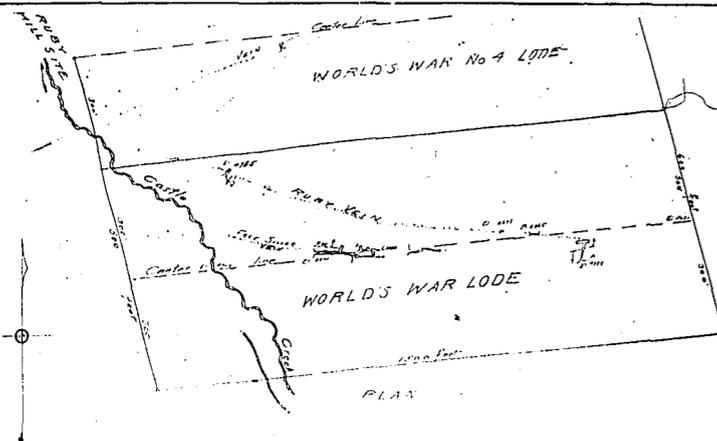

This is a picture of the Tunnis ranch when our automobile party will stopover night located 12 years ago. Presided over by Mrs. Tunnis. The terms of Shoufly ranch: check 50c, meals 50c, north 100 or more. You will enjoy the hospitality of this place. We arrive there about 5:30 p. m. on an early breakfast and we are away to the property of the United States Silver Mining company, when we arrive about 9 a. m.

This shows the general elevation of the mountain and the tunnels at different elevations.
The Ruby Tunnel and vein is about 500 feet to the left. The Ruby vein is 500 feet from tunnel opening. When we get there we produce 1000 oz. per ton. Ore shows on top of the hill for 3100 feet.
LONGITUDINAL SECTION THROUGH CENTER LINE WORLD'S WAR CLAIM Scale 1 inch = 100 feet

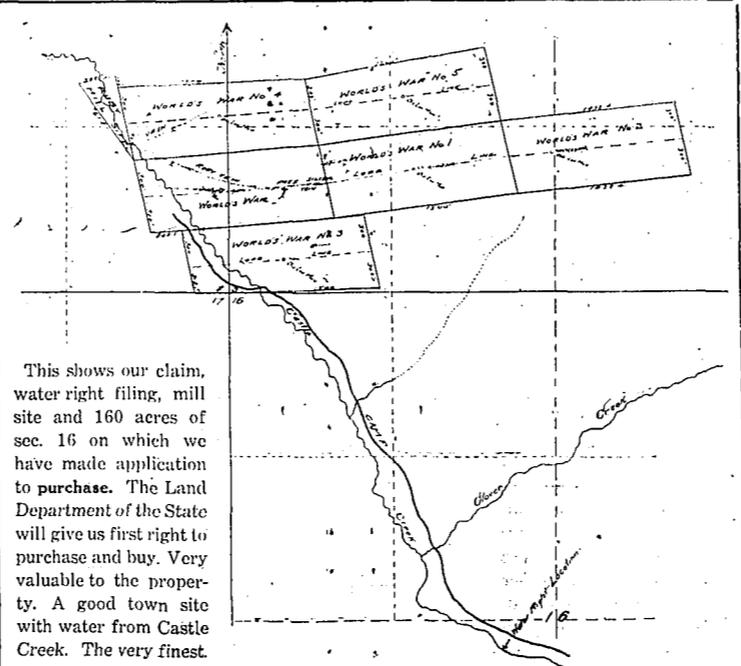

Property Is All That Is Represented

The ore at 61 feet is better than it was at 40 feet. Neither side wall has been encountered. We will cross cut at 100 feet and then the stock will sell more readily at \$1.00 par than it does now at 25c. In my judgment the stock is actually worth \$1.00 par today. It is giving buyers all the best of it at the 25c price. No further ads will appear offering stock at less than \$1.00 per share from this date, August 16th, 1920. There will be special stock holders meeting at the Perrine Hotel September 1st at 8 p. m. The President Geo. G. Marshall will make his report at that time of progress made and results attained.
Walter Hovey Hill our consulting engineer will have made another visit to the property and he will give facts and figures likely to the cost of the 8 miles of road to be built down Castle Creek, which will not only save 15 miles going to Mountain Home, but will give us a down hill pull, so we can make a round trip a day with a 3-ton load. We are sacking high grade ore now every day. Our first car of ore from the Ruby vein will go out during the fall early.
Don't hesitate to BUY this stock at 25c.

This cut shows an enlargement of the main claim called "World's War". It also shows the workings of both the Free Silver vein and Ruby vein. No man going in our judgment but will be more than satisfied with the statements made by those interested. The stock we honestly believe is worth \$1.00 per share today.
It surely is if it was worth 25c when we first sold this stock. Wm. James Kunkle bought the first share. No stock sold by this company for less than 25c.

I say to my fellow townsman. Believe my word. Go and see. Invest the limit of your buying power. Don't go in debt or borrow money to buy but buy on the installment plan 10 per cent down, 15 per cent September 1st, 25 per cent October 1st, 25 per cent Nov. 1st.
1st balance December 1st. All payments must be made by December 15th at latest, unless settled by note of commercial value at that date with bankable interest. All stock not paid for by December 15th will be issued for all that has been paid and the balance unpaid will be canceled. If interested see me at Perrine Hotel parlor, which I have engaged up to Thursday morning, August 19th at which time the bunch of business men from Rupert, Idaho meet us here stopping over night at Perrine and leaving for the property.
All oil and gas used in making the trip I will buy and pay for. The expense for the trip per person will be between \$5.00 and \$10.00. I cannot afford to pay that expense out of the small commission allowed me for stock selling.
Home Phone 775-J, Perrine Hotel
S. Henry Bolton Phone 57 Ladies Parlor

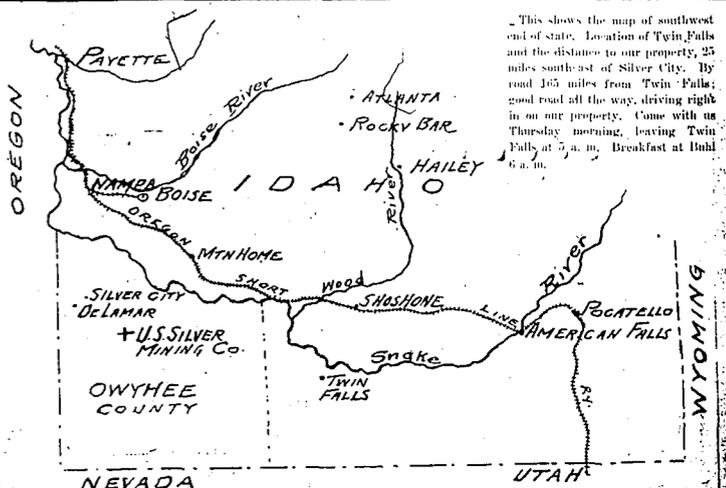

This shows our claim, water right filing, mill site and 160 acres of sec. 16 on which we have made application to purchase. The Land Department of the State will give us first right to purchase and buy. Very valuable to the property. A good town site with water from Castle Creek. The very finest.

This cut shows the small drift on top of the mountain when Eckman shipped 3333 pounds of ore last September. See prospective for record of 149.15 of silver and some gold.

The Story of the Property.
Geo. E. Eckman the locator of this property has known J. T. May for years. About four years ago, Eckman came via Contact to Twin Falls to look up his old friend May.
He found him on a ranch, two miles out on Addison avenue just this side of the Hamlin place and just across from the 20-acre Stover place. I was farming the Stover place then in apples and alfalfa. Eckman stayed in the spring and helped May put out his crop. When this was done he said to May: "Tom, I am going prospecting. I want an outfit". The outfit was got together and away went Eckman with his light wagon, Dog team, etc.
In the fall he returned with samples of his find. It looked good. It sampled and assayed, showing good value.
The next season Eckman did the same thing and returned in the fall. During this time I got interested and said to May: "When you get ready to finance the proposition and form a company let me know, as I want to get in with you". Silver was then about 56c an ounce. The next year silver came up as you know and May told Eckman to get out a ton, two tons or more in doing his assessment work. He did so shipping 3333 pounds of ore which the Salt Lake smelter and Refining company settled with him for at \$149.15 oz. silver and 87c in gold.
More could be said. Every officer paid his own good money for their interest.
You should get yours today.
S. Henry Bolton.

This shows the map of southwest end of state. Location of Twin Falls and the distance to our property, 25 miles southeast of Silver City. By road 165 miles from Twin Falls; good road all the way, driving right in on our property. Come with us Thursday morning, leaving Twin Falls at 7 a. m. Breakfast at Dulh 8 a. m.

S. HENRY BOLTON, Ass't Sec. and Treas. and Fiscal Agent

BANK OF NORTH DAKOTA GROWS

Fine Progress Is Reported, and Loans Made Are of Great Benefit to Farmer

FARMER, N. D., Aug. 16. (United Press.)—The Bank of North Dakota has made farm loans of \$2,750,235.20, according to the July bulletin of the bank, just published. Margin over expenses for the first six months of 1920 is \$1,000,000.

Individual deposits of North Dakota citizens are not accepted by the bank, a report shows that loans of \$1,000,000 from North Dakota outside the state have deposited \$397,561.10 in the state-owned bank. Public deposits on July 16 total \$1,485,610.

The bank of North Dakota bulletin comments as follows on the dairy cow law now in effect, which was enacted by the farmers legislature at the special session:

"The special session of the 1919 North Dakota legislature assembled and did an excellent business in the cultural cooperation in the state. Reorganizing the diversified agriculture in the state, the legislature has provided for the conservation of soil fertility and that profitable diversification of agriculture, the growing of livestock and dairy products, the people's representatives have provided a means by which farmers not able to finance them selves, have acquired the funds they need by forming co-operative associations and securing public aid. The dairy association law, which will make it possible for the stock and county commissioners of any county to issue or sell county bonds or warrants with the proceeds therefrom to purchase cattle for the county and to sell them to persons who have formed themselves into an association as provided for in the law, will warrant shall be issued whenever a petition in writing by not fewer than 60 resident freeholders of the county has been filed and approved by the county commissioners. Ten or more persons may file a petition, which petition shall be considered by such rules and regulations as may be prescribed by the dairy association and approved by the county commissioners, such rules and regulations to include provisions for the insurance of animals purchased for the protection and breeding of such stock, and for the purchase of profitable stock, and the raising of the funds derived from the sale of such a number of shares of stock as shall be determined by the association, a person taking such a share to comply with all rules and regulations, such agreement to be binding and the obligation for the purchase of stock for such member has been met. No person shall become a member of a dairy association without the written consent of the majority of all others proposing to form an association. Members are jointly and severally liable for all contracts, debts and obligations of the association, to the extent of 10 percent in addition to the purchase price of such cattle as such member shall receive through the association."

Next to the ownership of land, the ownership of profitable dairy and meat animals is the most important element assuring well rounded and permanent farm prosperity. Next in importance is effective local co-operation for the production, distribution and marketing of products and the securing of credit. Once an association has been formed for any financially important agricultural enterprise, it will be relatively easy to extend its functions, so as to include all other activities which can best be carried on collectively. This is especially true of the dairy industry, which is firmly established, such local associations, by pooling their assets can secure credit for reasonable operations and for the marketing of their crop as early as for the purchase of the stock. They will also be able to connect up with the state or other marketing services for the buying of equipment and supplies, and for the selling of their production.

The dairy association law has been called "the single piece of legislation ever enacted by the North Dakota legislature." It is the realization of its benefits will depend upon the extent in which it is taken advantage of by North Dakota farmers who are forming such associations. The dairy stock purchased and a sound foundation laid for co-operation along all lines. There are excellent prospects that work under this law will be pushed vigorously and successfully. The state dairy commission has just issued a pamphlet entitled "The Cow Bill," containing an analysis of the law, and giving very comprehensive instructions and suggestions as to how to proceed under it. Interested farmers who have not received a copy of this pamphlet would do well to make application for it immediately to the department of agriculture and labor at the state capital, Bismarck, N. D."

TUNNEL IS LEICHTFIND BEHNE, Aug. 16. Electric trolleys are now passing through the St. Gobard tunnel. The St. Gobard tunnel is to be battery electric, a further section intended to connect, just having been completed.

Circus Next Monday Will Be Treated to All

The circus is coming to town. The body of all citizens, old and young, is looking to Twin Falls and will give two performances here on Monday, August 23rd.

There are twenty famous male and female clowns in wonderful feats of horseplay with the circus, coming to Twin Falls, Monday, August 23rd. The big show will reach town Sunday, coming from Los Angeles.

The special session of the 1919 North Dakota legislature assembled and did an excellent business in the cultural cooperation in the state. Reorganizing the diversified agriculture in the state, the legislature has provided for the conservation of soil fertility and that profitable diversification of agriculture, the growing of livestock and dairy products, the people's representatives have provided a means by which farmers not able to finance themselves, have acquired the funds they need by forming co-operative associations and securing public aid.

Next to the ownership of land, the ownership of profitable dairy and meat animals is the most important element assuring well rounded and permanent farm prosperity. Candidate of Third Party Regular Chap

NEW YORK, August 12. (United Press.)—Charles P. Christensen is an "original non-partisan candidate." He is the nominee of the farmer labor party. At Washington there is a staff report which is interestingly reported when Christensen bowed in like a soldier, his six foot four inches, 160 pounds, white hair, white eyes, white, white panama, white suit, white shoes, white socks and the only touch of color in his get-up being the tie which he wore, which he freely on the road expense of his labor.

"Hello, everybody," he boomed in a deep, hoarse voice that filled the hall. "Make yourselves at home. They were 'waked up' to each newspaper man with the greeting, 'My name's Christensen, what's yours?' He had a big sturdy face in which the heavy supporting brows were well defined. He looked up and looked down. He said, 'I'll be glad to have you come in just the same when I get to the White House.' He said, 'I'll be glad to have you come in just the same when I get to the White House.' He said, 'I'll be glad to have you come in just the same when I get to the White House.'"

The farmer labor candidate is about 60 years of age and is called by his first name. He has been known for five decades. He said there was a "criticism" that he was a "Mormon" and he vigorously denied this. He is a "Christian" by faith and an independent by politics. He is a "Christian" by faith and an independent by politics. He is a "Christian" by faith and an independent by politics.

The three job printing department is thoroughly equipped to do first class work—reasonable prices.

Prices Take a Fall As Spending Stops

By CHARLES MCCANN

(United Press Staff Correspondent.)—LONDON, July 27. (The Daily Mail.)—In London prices have fallen since they were caught up with demand in a great measure recently. For four years the July "sales" were more pretentious, but this year the "sales" purchaser has been able to buy more goods than he has been able to sell for some time past. He has been able to buy more goods than he has been able to sell for some time past. He has been able to buy more goods than he has been able to sell for some time past.

The fall of prices is due to the fact that the demand for goods has fallen. The demand for goods has fallen. The demand for goods has fallen. The demand for goods has fallen. The demand for goods has fallen.

In addition the improved rate of exchange between Great Britain and America has brought prices down considerably. This is especially noticeable in the case of goods which are imported from America. The improved rate of exchange between Great Britain and America has brought prices down considerably. This is especially noticeable in the case of goods which are imported from America.

MINERS HARK BACK TO WASHINGTON, Aug. 16. (United Press.)—The miners of the United States have broken all records for output, according to a report by the Bureau of Mines. The report shows that the output for the first seven months of the year was 1,411,000,000 tons, or an average of 1,411,000,000 tons per month. The report shows that the output for the first seven months of the year was 1,411,000,000 tons, or an average of 1,411,000,000 tons per month.

CURTAIN MEZZER CAR SALES SEATTLE, Wash., Aug. 16. (United Press.)—Frank H. Harkins, an opinion leader here, has been quoted by the press as saying that the automobile must be brought down to a level where it can be sold to the masses. He said that the automobile must be brought down to a level where it can be sold to the masses.

Perhaps You Are, Too

A friend of mine was worn out running around trying to buy a particular something-or-other.

My friend said: "How did you know?"

Hours had been spent, also strength and temper, and the desired article had not been found.

"Easy," I replied. "They advertised them last week."

I asked if a try had been made at such and such a store.

Without seeing the joke, she said: "I never have time to read advertisements. I'm too busy."

The reply was "No, of course not, they don't carry such things." I disagreed. We went together and found what was wanted.

Perhaps you are, too. Many people are too busy to take time to save time, trouble, and money. They buy by chance—and hard work.

Reading advertisements is more than a time-saver; it's a good safe investment in information concerning the best things the market offers you.
