The day stands pat on Top.
 Some news and all news refuse to listen to reason.
 You will have time to sign up on the railroad books.
 In your name on the railroad books list? If not, why not?
 Now is the time for all good men to come to the aid of that railroad.

One of the greatest worries that a chronically gloomy man must have is that he won't be able to attend his own funeral.

Recently reported in Montgomery show people had had mortgages \$100 kept ago, some as low. And probably just as much trouble paying them off.

You have all heard the old story about the hen and a half and a shegg and a half in a day and a half. Twin Falls can get that railroad if we all "chip in," without any half way about it.

We are told that some of the lingerie for the Grand Duchess Zena, who is about to be married, is "worth a prince's ransom." There have been some princes gone to the United States, who's ransom would not "purchase" a cotton undershirt.

GET TO WORK

Congress, at least the upper branch of it, will return to town tomorrow. The lower house doesn't expect to get down to business until Oct. 3. They will want to see what the senate is going to do with the tax bill, which we are informed will be the first thing that the members of the senate will give their attention to.

It is not going to be an easy matter to get any bill through without a lot of talk, the major part of which will be sent broadcast over the country in pamphlet form in order that the voter may read what he or she will follow him to some place, besides, identify the voter will get for the mail carriage on the speaker, even though they do come under the frank act.

But perhaps we can stand the cost if they only do something "heavenly." The country is being first and disgusted with the way congress has looked along in the tax matter. We know had promises galore with nothing definite so far accomplished.

Get down to business, gentlemen, and do it quickly.

THE COST OF WAR

At the request of the state department Secretary Mellon is having prepared a statement showing detailed and exact figures of the amounts spent for arms and war supplies of all of the major countries of the world. This figure will be presented to the arms committee which will meet in Washington November 11.

We are not told just how far back in the world's history the search for data will go, but should it go far back to the last ten years the figures will be appalling.

But they will not represent the cost of war, no figures that will, or can ever, be prepared could convey even the faintest idea of the cost of war to the funds mind. The recording agent alone has those figures, and we doubt if they will deal with dollars or cents, pounds or marks, francs or deats. Rather do we suspect that they tell of the heartaches, the sorrow, misery, suffering and anguish that war brings to mankind.

Perhaps the figures which the secretary of the treasury will turn over to the state department will have some effect on the Silycks of the world but they will have little or no effect on the heart ones of the world who made the supreme sacrifice nor upon the tens of thousands of maimed and crippled humanity who must go through life marked with the curse of ambitious greed.

DEBATING SOCIETIES

Now that the Twin Falls schools are organized for the winter months we would like to see a debating society organized in every school, one of the directions of the supreme sacrifice nor upon the tens of thousands of maimed and crippled humanity who must go through life marked with the curse of ambitious greed.

There are few things in school life, especially, that will give the breadth and study to the young mind as well as good debating society. To begin with, the successful debater not only looks at his, or her side of the subject, but delves into what the other fellow might say when the debate is held. It furnishes the mind a fund of information which he or she would not otherwise get. Let those in charge of school life try topics to be debated and you will soon find out that the members of the society take a wonderful interest in the work and that each and every member is a much better student in school than they otherwise would be.

Have a number of debates during the long winter months. Near the close have the best frames met and by a process of elimination, it would be an easy matter to have the two best in a debate that would attract hundreds of listeners.

We believe that it would be an easy matter to persuade some merchant, or prominent man, to offer a loving cup or a medal. Then let the school which won the cup or medal for, say three times, be the possessor of it for all time.

If something of this kind is tried we feel sure that the benefits derived will be of lasting value to all concerned.

News of the Sport World

RUTH BREAKING HIS OWN RECORD!

THIS YEAR LAST YEAR
 Babe Ruth broke his own record of the season and beat Ty Cobb's 1911 record of 37 home runs.
 Larry Green, Cleveland, hit a single and two triples and batted in six runs and the first strike by Faber for eight innings, the White Sox winning six to one run over Detroit.

Here's Babe Ruth (right) when he broke his own record at the New York Polo Grounds with his 34th home run in 1921. His record last year was 37. Zimmerman rained out to great him just as he crossed the plate.

WATCHING THE SCOREBOARD

Yesterday's baseball scores:

The Red Sox trounced the White Sox (win, 5 to 2 and 8 to 6.)
 Rockell and Barbero got seven hits between them and the Braves beat the Reds 3 to 2.

The Cardinals made four straight from the Phillies, by winning 5 to 2.
 Babe Adams' ended the winning streak of 19 straight for the Giants when the Pirates trimmed the league leader 2 to 1.

STANDING OF THE CLUBS

Chasing the Pigskin

The first game has announced that the first game of the season will be played on September 20 with both on the local field. The complete schedule for the season has not yet been filed.

The Athletic Association, this district was announced to be three parts, the Olympic and High A district, the Twin Falls district, and the North Idaho district. The winners of each sub-district will contend for the district championship. In the draw Twin Falls will play the Olympic and the Bruins are set for their stadium fall practice. The Olympic team will be picked for scrimmage work to what shows on the field.

The student-athlete men who have been picked in the Olympic district are: Van Hilper, John McArthur, Wilson Jackson and George L. Baker. The chief duty is in applying to the school in great abundance around the district. They are under the supervision of Dr. Wm. F. Power. George Thomas, who withdrew from school last year to attend a college, has enrolled and is back on the field.

RECLAIM LANDS TO AID JOBS

WASHINGTON, Sept. 20.—Congress drew to a close in an unimpaired by members a nationwide "protect our lands" drive and a program of prospective lands, organized labor believes.

The American Federation of Labor will exert every effort to bring about national passage of the Borchgrevink reclamation bill. This bill provides for the reclamation of water lands throughout the country and the establishment of rural homes. The reclamation bill will be applied to the water lands which will eliminate the government loss on its land holdings become private.

The legislative committee of the American Federation of Labor has approved that passage of the bill. The bill provides for hundreds of thousands of acres of new lands and waters of public lands to be opened up to the public.

Proponents of the bill also stated that it would be a benefit to the nation. The bill would provide for the reclamation of water lands throughout the country and the establishment of rural homes. The reclamation bill will be applied to the water lands which will eliminate the government loss on its land holdings become private.

WIRE WINKS

HANNOV, China, Sept. 20.—Painters strike for an additional 20 cent per day wages. Now down 60 cent per day. Employers refuse to give more.

LONDON, Sept. 20.—A statue of Joan of Arc, designed by J. N. Compton, is to be built in the cathedral of Winchester. It will stand within the choir of the cathedral. The statue of Winchester, who was captured at the trial of Joan of Arc.

SHANGHAI, Sept. 20.—A Shanghai offer for sale a motor vessel of 100 tons, built in the United States, for sale at a low price. The vessel was a member of a million.

MONKEY WRENCH FILLS CRENCH

NEW ORLEANS, Sept. 20.—Happening a state with a monkey wrench that the Governor-elect, Dr. H. R. Foster, Jr., announced that he was going to Louisiana.

That what Parker found on his desk a heavy package wrapped in straw. The package contained a three-foot monkey wrench. Foster said: "Use this one—the machine and the old wrench of Foster's."

The finest architectural and mechanical college in the south today, with \$250,000 in plant and start building operations and will have more for maintenance.

Millions more deflected to the upbuilding of the eight-million state capital building of Oklahoma.

For years the moneyed interests of the country have been taking from the state its natural resources as timber, tungsten and resin, sulfur and coal, gas and oil, and paying almost nothing in return.

What is how it was accomplished? For years the moneyed interests of the country have been taking from the state its natural resources as timber, tungsten and resin, sulfur and coal, gas and oil, and paying almost nothing in return.

LOW VALUATION IMPORTS COSTS U. S. MILLIONS

Evidence Shows Germans Have Two Sets of Prices—One For Officers, One For Buyers

NEW YORK, Sept. 20.—(Understatement)—The United States government from 10 to 40 millions a year under the tariff act of 1913, because of the foreign origin price of goods, will be forfeited to the United States valuation price of merchandise, according to a report in the new tariff act which the senate has just passed.

Adm. F. L. Jones, secretary of the tariff commission, said that the tariff act of 1913 was one of the most important pieces of legislation since the war, and that it was a great success. He said that the tariff act of 1913 was a great success because it was a great success in that it was a great success in that it was a great success.

Adm. F. L. Jones, secretary of the tariff commission, said that the tariff act of 1913 was one of the most important pieces of legislation since the war, and that it was a great success. He said that the tariff act of 1913 was a great success because it was a great success in that it was a great success in that it was a great success.

and groups of manufacturers feel that they are completely in the hands of the law if they can in any way establish a foreign market value for their goods. The actual selling price or cost of production, and the duty upon the low valuation tariff, which when sold on the open market, would bring a profit of 100 to 200 per cent of their factory cost. One case I have in mind is that of a certain manufacturer, in the year showed a profit of 150 per cent. The actual goods costing 20 cents a dozen and selling for \$1.50 here.

Adm. F. L. Jones, secretary of the tariff commission, said that the tariff act of 1913 was one of the most important pieces of legislation since the war, and that it was a great success.
