Silver Tea at Washington School—The Silver Tea at Washington School was given yesterday afternoon by the Silver Tea Committee of the Washington Teachers' Association at the Washington school Friday afternoon was a decided success, both a social gathering and a financial success.

The guests were received by Mrs. Gray and a reception committee and were taken to the auditorium where they were seated in the auditorium while the children from the various rooms under the able direction of their teachers, Miss Hennemeyer and Miss Harvey, sang "The March Wind's Secret". Miss Hennemeyer's round song numbers, all spring songs, and some of Stevenson's poems, Miss Mather's round had a singing contest.

The girls from the "Trotter" game room and the girls from Mrs. Stewart's room rendered a Spring Song and a regular.

After the program by the children, Mrs. Gray gave a short talk on the "Silver Tea" which is a "Silver Tea" each noon. Then the guests were invited to the tea room where refreshments were served. A "coffee corner" was established in the center of the table and Mrs. Gray and Mrs. Fries joined the children, receive their noon luncheon. A hundred and twenty-five mothers and friends were entertained and a total amount made almost twenty-five dollars. * * *

Brown and Lillian Jernigan—The Brown and Lillian Jernigan members of the Twentieth Century Club held a pleasant meeting Friday afternoon at the home of Miss Birtle. There were a number of prominent persons who spent the study hour on the "Green Hidde," by William Van Horne.

Misses Brown and Lillian Jernigan represented the characters in the play and gave the first two acts of the play. The third act was to be given at the next meeting. During the social hour dainty refreshments were served by the hostess. Mr. Jernigan was assisted by his mother and Mr. and Mrs. Atkinson.

Honor Ex-Serviceman—Compromising Frank McFarland—Who is here on a enough from home to attend the annual meeting of the Ex-Servicemen, gathered at a six o'clock dinner Friday evening with covers laid for eight.

RHEUMATIC ACHEs
QUICKLY RELIEVED

THE leading, aching rheumatic pain, the aches and stiffness of Scurf's Liniment. For fast, easy, safe, all over the body, the best! No other liniment can be compared.

It penetrates quickly, deeply. You can feel test for its healthy, stimulating action. It is going to do you good.

Mr. Scurf's ready for penitents, ready to serve you well, safe, sore muscles, strains and sprains.

THE RIFKIN

What promises to prove one of the most sensational of the current screen attractions is "The Rifkin," a remarkable Paramount picture produced by George Melford. It was shown with great success at the Idaho theater last night. The story is based on the realization of E. M. Hull's re-

markable novel of the same name, which is now number one of the best sellers in the literary market.

The role of the Arabian tribal chieftain, Sheik Ahmed Ben-Haasan, is portrayed by Rudolph Valentino, the handsome young actor who sprung into fame with his part in "The Sheik."

"The Four Horsemen of the Apocalypse" is a romantic epic and makes a perfect picture as the religious war between the forces of good and

evil. The rugged, silent art work is superb. The cast includes Ruth Miller, Walter Long, and F. R. Butler complete the cast. It is a remarkable picture.

The supreme court has given an epochal decision that owners of liquor which are still in bonded warehouses cannot withdraw them for beverage purposes. This will hold off a fraudulent scheme to build up a trade in warehouse certificates.

We will venture the assertion that many a Twin Falls man would like to have his hand in that robbery of that barrel of horses in Maryland yesterday. Just think of a hundred barrels of bonded whiskey sitting there dry taxes.

Much is being said of bootlegging but the fact is that the man who contains bootleg liquor today does not know but that he is drinking something which will put him in his coffin within 21 hours, and after all there are not so many tools of that kind in this country.

Senator Lodge is now getting some of his own folder. He was more responsible for the defeat of the League of Nations than any other man perhaps, and this indirectly caused the breakdown of President Wilson. He is now showing where the greatest president stood and trying to do for this nation what President Wilson attempted four years ago. His treaty is not any more nearly perfect than was the League of Nations and even admits that the armistice conference was an experiment yet he has the temerity to stand here for this great legislative body and accept a treaty which is very much like the one which just a few years ago he spurned and urged all thinking people to turn down. One might well ask: when is Mr. Lodge honest in his convictions—at that time or at the present? If world peace was right then it is right now and if it was wrong then it is wrong now. If we understand Mr. Lodge correctly he is nothing less than a traitor to his country and the voters of Massachusetts should punish him this fall by refusing to return him to the senate of the United States.

The Duroc-Jersey association petitioned the county commissioners not to discontinue the county fair as has been proposed because of the expense upon the taxpayers of the county. We agree that Twin Falls county should have a fair and some means should be provided for the maintenance of same but we feel that the burden of that expense should be taken from the shoulders of the county. Some sort of an organization should be effected which would back the county fair so as to give it financial standing without throwing the burden upon the county. There is no doubt that this fair is one of the greatest advertisements for this section

that can be found but the taxpayers should not be compelled to bear the burden when the fair does not meet its own running expenses. Perhaps the Duroc-Jersey association would like to take the initiative in financing the county fair or in getting other organizations interested to such an extent that several such organizations might go together and keep this splendid show alive but relieve the county of this burden.

TWIN FALLS HAS A CAMPFIRE

Camp Fire is well established in Twin Falls, and is bringing the fine results always mark this line of endeavor.

An in-all projects of this sort, however, are important in proportion to the quality of adult leadership. Nowhere is personality more effective.

Camp Fire is not a social club. It is not a place of amusement. Under adequate and understanding leadership it provides a powerful incentive for the faithful performance of those things which possess for a young girl the highest educative value.

Camp Fire provides a reward for the performance of duties and renders attractive the most distasteful tasks.

Likes the boy Scout, the real earnest Camp Fire girl is rarely found among the dandies.

Work and play insure their proper relationship, and the rewards of labor are shown to be certain and sure.

For the mother who has a problem in keeping before her daughter, the ideals which make for real womanhood, the Camp Fire offers the solution.

There is a basis of wholesome living in it, which seems to be far removed from the conditions now prevailing in the ordinary social life of the young.

It is well for every patriotic citizen to get behind the Camp Fire movement and give it patriotic support.

There can never be too many leaders of the highest class.

—

EXPECTATION OF INCREASING BUSINESS

The expectation of a growing volume of business in general is evidenced by the recent purchases of railway equipment. January orders of freight cars for foreign and domestic delivery are estimated at more than 10,000 cars as compared with 29,558 for the whole year 1921. During the first two weeks of February, 7,300 more freight cars were ordered by one railroad system alone, making the total orders for the first six weeks of the new year only about 11,000 short of the total orders for 1921. Orders for passenger cars placed so far this year by Class I railroads are said to exceed the total for 1921. The extent of the depression in the car-building industry is shown by the fact that from 1901 to 1913, inclusive, annual orders for new freight cars fell below 100,000 only once, in 1908, when orders amounted to 82,969. It has been said that this country will need about the next three years about 500,000 new freight cars.

The production of pig iron in January was at a daily rate of 12,861 tons or slightly less than the 33,196 tons for December, January production, however, with the exception of the December output, was the largest since February, 1921, and about 20 per

TWIN FALLS DAILY TIMES

cent in excess of the average monthly production for last year.

The rate of production in the steel industry has been accelerated considerably since the first of the year. The reported production of thirty steel companies in January indicates a yearly output of steel ingots by the industry as a whole at a rate of about 22,750,000 gross tons per year, as compared with a rate of 20,000,000 tons in December. By the end of the month the rate of production had speeded up to a point equivalent to a yearly production of 25,000,000 tons as against 18,000,000 tons at the end of December. By the middle of February, the indicated yearly output, based on the current rate of production, was 24,000,000 tons, or about 50 per cent. of capacity, which is estimated at about 52,000,000 tons per year. Unfilled orders reported by the steel corporation as of January 31 totaled 4,216,618 tons, a deficit of 26,735 tons, and were actually the lowest since April, 1919. For several months steel prices in general have continued downward and the composite of steel prices is now the lowest since December, 1915, and is not quite 20 per cent. above the 10-year pre-war average.

FILER WANTS FAIR—CONTINUED

(By JAMES D. WHELAN)

The File-Record is, perhaps not unnatural, exercised over the recommendation of the tax committee of the Twin Falls Chamber of Commerce, that the county agricultural fair be discontinued. It is but fair to say that the figures which it quotes from the annual report of County Auditor O. C. Siquier do not tell the whole story in favor of the fair. These are based on the average levy for two years. In the statement comparing the levies of 1920 with 1919 it is shown that there was an actual decrease of \$5,157.77 last year, and that the actual appropriation for 1921 was but three-tenths of one per cent., instead of five-tenths in 1920, or four-tenths for the two years.

However, it is quite certain that some criticism is due in regard to the management. J. M. Market was no doubt an efficient secretary, and beyond question worked conscientiously to secure exhibits—but it was wholly useless to employ a secretary all the year around and the action tardily taken at the beginning of this year should have been taken long ago, or rather the custom should never have been started. It is fair to presume that there were other links in the management without any purpose of cheating the county.

The question of whether the fair should be continued or not, and if so whether by a private corporation or by the county is a matter for the people to determine. The Chamber of Commerce made an honest and conscientious effort to find out what people wanted, and the tax bureau based its report on what the majority of those answering questionnaires recommended.

Of course, it is natural that those who have the biggest kick-in-the-butt respond most readily and enthusiastically. Those who fawn an institution, like those who love an individual, are apt to defer sending flowers until after the death of the patient; while those who have a knock hasten to get it off before the victim passes away, so as to be sure that it will be felt. Perhaps had all who failed to respond to invitations to send suggestions, complied with the request, some of the recommendations would have been different. Nobody can tell.

The tax bureau acted at the vote of the majority of those who did answer. Its report, as the Record says, is not official. It is up to those who disagree therewith to show that the majority of the people think otherwise.

But nevertheless made-on-the-hush information obtainable has the merit of stirring up interest and in increasing efficiency on the part of officials in charge of institutions like the county fair, even should the people decide that they should be retained and conducted by the county.

NOTICE OF WRIT OF ATTACHMENT

In the District Court of the Eleventh Judicial District of the State of Idaho, and for the County of Twin Falls:

C. M. Neuner, Plaintiff, vs. Joe Smith and Nick Smith, Defendants.

Plaintiff, C. M. Neuner, states that on

1/2/22, a sum of \$1,000.00 was foisted out of the above entitled court

in the name of the above defendant, for the sum of \$164.875.

In witness whereof, I have hereunto set my hand and the seal of this court this 1st day of March, 1922.

(SEAL)

C. C. BIGGINS,

Clerk of the District Court.

By, J. C. DOUGLASS,

Deputy.

Homer C. Miller,

Attorney for Plaintiff,

Twin Falls, Idaho.

rent in excess of the average monthly production for last year. The rate of production in the steel industry has been accelerated considerably since the first of the year. The reported production of thirty steel companies in January indicates a yearly output of steel ingots by the industry as a whole at a rate of about 22,750,000 gross tons per year, as compared with a rate of 20,000,000 tons in December. By the end of the month the rate of production had speeded up to a point equivalent to a yearly production of 25,000,000 tons as against 18,000,000 tons at the end of December. By the middle of February, the indicated yearly output, based on the current rate of production, was 24,000,000 tons, or about 50 per cent. of capacity, which is estimated at about 52,000,000 tons per year. CARAVAN FROM WYOMING COMES TO JEROME CO.

There has arrived in Jerome county during the past week in one party exactly 150 new settlers. These people are from the town of West Yellowstone, Wyoming, and come to Jerome, says the Northern Eagle.

"These new settlers are all farmers and have been sent by the State of Wyoming. The Fall River Land and Water company, represented by R. E. Shepard, general manager for the state, has sent a committee from Wyoming representing the new settlers, visited the tract, to spy out the land and report to their neighbors on the country to keep favorable, and the organization of the colony proceeded.

When the time came for these people to begin the work of moving, 1,000 men of the Land and Water company staff and representing Mr. Shepard, went to Wyoming, accompanied by some 100 men. These people are a class of citizens, that the people of Jerome did not know, but who and Wyoming did not know either, that the colony had been placed in his way. These were nearly all overcomers, and the "caravan" bigger by far than any caravan that struck the trail from Brodhead to the Roosevelt trail in this state, and real "old" farmers into the bargain, but the men, women and children, though part of the same movement, through passenger train in five coaches and in two sections, one section having arrived. The drivers, implements and farm goods made a fairly respectable train shipment of sixteen cars. Arrangements were made so that the passenger cars were left at the Jerome station and the passengers provided for in such a manner, that they are now located on their new homes. The detachment arriving last Saturday numbered the men, women and thirty-two children, and the remaining, and rendered three times each week.

Banks-Await Approval of Washington on the Agricultural Loans

The arrangements made at Potatocito have all been approved by the state legislature, and the Idaho Agricultural Credit Bank, which various banks of the county are connected, will be ready to make loans.

The banks put in 20 per cent of the war taxes, except for the first

loan, which was to be entirely

paid out of the proceeds of the

taxes, and the remainder was to be

paid out of the net of the con-

tract.

We called attention recently to the fact on our front page that every day this company will run something which will be of interest to farmers. That call attention to care of farm machinery and folk, in

the hope that we may be able to do something for the industry in which the company is especially interested.

We will call the farmers of this tract attention to the advertising which started today. In the Times for the Agricultural Credit Bank.

We wish to call the farmers of this tract attention to the advertising which started today. In the Times for the Agricultural Credit Bank.

Fish Hatchery, the Big Work.

FISH AND GAME BANQUET PROVES GREAT SUCCESS

Many Wild Birds, Educational, Talks About Indians, Nenad, Previews and Increases Game, Wins Trophies.

Tom on Department Gets Reference.

Fish Hatchery, the Big Work.

With news and notes regarding the sale of anglers and hatcheries, with emphasis on the necessity for conserving the precious game future.

Mr. H. C. Johnson, state director of the state fowl commission, gave efforts to emphasize that his headquarters will be at Roseau.

"At present we have no office, but we are looking for a suitable place to locate our headquarters," he said.

He also said that the department

had been placed in his way.

These were nearly all overcomers, and the "caravan" bigger by far than any caravan that struck the trail from Brodhead to the Roosevelt trail in this state, and real "old" farmers into the bargain, but the men, women and children, though part of the same movement, through passenger train in five coaches and in two sections, one section having arrived.

The drivers, implements and farm goods made a fairly respectable train

shipment of sixteen cars.

Arrangements were made so that the passenger cars were left at the Jerome station and the passengers provided for in such a manner, that they are now located on their new homes.

The detachment arriving last Saturday numbered the men, women and thirty-two children, and the remaining,

and rendered three times each week.

These repairs should be made TODAY in order that you may go into the field tomorrow if advisable.

The crops which are to be planted should be sown now.

Now there will be no time when field work should be

done, and when the weather is cool.

Soil should be prepared, then plow, then harrow, and then seed.

Plant and prepare for the work which must be done to-morrow.

The best farmers and agriculturists are getting those plows and sowing machines to balance their farm units in good condition to work the land; they potato seeds, grain and drill a

ready to plant their crops, and their horses, and harrows are ready to till their fields without delay, for repair or trip to town for material.

These repairs should be made TODAY in order that you may go into the field tomorrow if advisable.
