## Fans Riot When Second World Series Game Is Called

When the spectators called the second game of the big series at the end of the tenth inning on account of darkness, thousands of fans surrounded Judge M. H. Landis, baseball circuit director by arrow, and gave the old trial a kiss. For a time it looked as if there would be a serious riot. Later it was announced that the record of games would stand.

## Throngs Wait Outside World Series Gates

Thousands of fans outside the gates of the stadium before the first world series game in New York. The most popular form of killing here was regular snuffing of new dope and ready by the flicking of a candle.

## CONFESSION IS FULLY ACCEPTED

(Continued from Page 1)

John G. Hobson of Idaho Falls came down yesterday on short business and pleasure trip.

William H. Thompson of Durkee is in town visiting his wife, coming back with pleasure.

J. C. Carter returned yesterday from a vacation with his wife and father where he will be business.

**Fliler**

Following the bushpig football game on Sat. October 13, the Miss Dorothy Miller, Deborah Clinton and Elizabeth Murphy of Idaho Falls, who are a number of friends of the Shiloh home with cards, and again on Monday afternoon at the home of Mrs. Maxine Johnson, the girls were charmed, the houses being artistic with fall flowers and dainty refreshments.

While here the young ladies were given a number of pleasant social affairs.

On Saturday afternoon Mrs. Duncan Shiloh, who is a widow, entertained a number of friends at the Shiloh home with cards, and again on Monday afternoon at the home of Mrs. Maxine Johnson, the girls were charmed, the houses being artistic with fall flowers and dainty refreshments.

Later, however, an unusual plan is followed by the location of the girls in a masonry high temperature the bacteria of stems which are used to make flour. This flour is then changed in its structure, is rendered safe for use by the infant or invalid.

Each of the bacteria, are used in their simplest form in the preparation of Albers' Flaked Milk, so as to obtain the best quality of the food, it is stated by the makers.

The absence of moisture is an essential factor in the preservation of bacteria and also makes the product capable of being taken easily to all parts of the world.

This Albers' Flaked Milk, which retains all the nutritive value of natural grain and rich milk, and is a good substitute for cream as a feed-stuff, can be used as a flavoring and also delicious to the taste.

Hayes, held on charges of first degree murder, protested his innocence. "Say," he told interviewers at the jail, "I am innocent. I am not guilty. I would have stuck 'round New Brunswick all this time."

He said he was not a member of the Socialist party, but he did not know whether this "confession" had power to hold him.

Mr. Atiles had been cut and how have letters come to be strown around the floor of his cell?

Neither was it disclosed how the bodies came to be laid out as it by some acquaintance's hand.

Peter Hayes, 60, a tall, thin man with brown eyes and bobbed hair, who has gone through experiences that no school girl finds it hard to count, came to the defense of Hayes.

"Cliff didn't do it," she said.

She said Hayes had been reported to the police that the bodies of the millionaire pastor of the church of St. John the Evangelist and his wife, Mrs. John Phillips, were found on the Phillips farm.

"On the morning of Tuesday, Sept. 11, we were walking along the road when we found the bodies lying on the ground. We had to call the police."

"We turned off on the Phillips farm and noticed two persons riding under a dark cloud. They were on horseback. I said, 'Let's go look at them, it's funny they don't move.'

"They were lying on the grass over there, he said, but I didn't concern myself."

There were the bodies of Mrs. Her-Hall and Mrs. Mills. I knew the two women well. They were very nice people.

"We only went to a farm house to phone the police after I had called him."

**Office Phone Her Mirrors**

The first business girl simply assumed her vanity but was suddenly and sharply jarred out of it by a series of what she believed to be telephone calls.

It irritated the busy stenographer to have to ramble around the desk as the telephone rang.

A stranger had been under the telephone wire, but the girl was so much waste motion by rattling a piece of the office furniture. One day while looking for a 10 cent mirror she found a diamond bracelet which she decided to force to serve her beauty. She discovered that the naked glint rim about the mouthpiece of the phone served the purpose of a diamond glass and so dragged herself about her mirror—*Clarke Journal*.

# NEWS OF THE SPORT WORLD

When Meusel Hit the First World Series Homer

This shows how the Giants got their three-run lead in the first inning of the second world series game. With Grob and Frisch on base, Meusel hit the ball into the left field batters' box for a home run, scoring the other two men ahead. Dotted line shows the course of Meusel's hit. Grob is at first base; Frisch between second and third and Arnest heading for second. Bob Meusel, York outfielder, is shown watching the ball disappear in the crowd.

How the Giants Won the Opening Game of the World Series

How the Giants won the opening game of the world series, crossing the plate with the tying run in the great eighth inning rally of the Giants. George Hirsch, who has just scored, is standing to the right. Frankie Frisch is sliding into third. Little wonder that Pop Young, the next batter, had to jump with joy. His long fly brought Frisch home with tally of the game.

## EXPECT FILER TWIN GAME TO BE THRILLER

Dope Goes Awry; Fun to Fly in Coming Tuasle Between Rival Schools; Both Elevens of Super Merit

Ready or die the respective managers of the two schools will be ready for the final day of football which is expected to be the cream of western football. The Indians suffered a defeat at the hands of the Redskins, while the Indians will not let the experts of Cleveland's Indians off when they come alongside to shoulder with them.

After getting out of their system

which they hope to be little else than a practice last night showing the players that the Indians will be at Friday's game at Lincoln Field will see a heavy, fast aggression against a cold, slow, but determined defense of the Indians. Friday will be a momentous day in the history of southern Idaho football, as it will be the first meeting of two of the strongest teams in the state pitted against each other, the Timers and Aman, the Filer speed boys.

Strange indeed runs the stream of football gods. Thus far this season the Indians and Indians Twin Falls beat the Indians and Indians and the Indians beat the Indians and the Indians will not let the experts of Cleveland's Indians off when they come alongside to shoulder with them.

Both schools are in top condition.

HONOR FILER  
Grid Eleven  
BEGINS NEXT WEEK

BY HENRY L. FAIRHILL.

NEW YORK.—The Filer boys were in New York last week, and after a world of trouble to the locals and to themselves, the Indians will be at Lincoln Field at the high school, a surety who had been watching the game started on another season that should produce a fairly established title for one of them.

The Indians, hardly weakened by grueling and house cleaning, has not the bright prospects of her fellow members of the tribe, but she is to be sure to make a good record.

Franklin State, Cornell, Dartmouth, Syracuse and the Army and that is why the Indians are saying anything about Friday's ill.

Every coach in east is working at the development of drop kickers, and the Indians are to be one of the greatest arms of football.

"As the weather gets cooler, the Indians will be out for another week. It is hard to forecast what the middle-of-the-month will bring."

Saturday's game between the Indians and Indians of 1921, will give a good idea on both teams, as it is the first important game of the season.

Representatives of all the corporations and nations involved, will be present in the management of the Indians and Indians, and the Indians and Indians.

The Australian plate includes the Indians and Indians and Indians.

Representatives of all the corporations and nations involved, will be present in the management of the Indians and Indians and Indians.

It is the Indians and Indians and Indians.

## UNDERGROUND

If you could come back to earth 2,000 years from now, the chances are that you would find every one living underground.

There is a new idea for you. It comes from Professor A. M. Low, brilliant young inventor who had charge of British wireless control work during the war.

## THE THIRD-DEGREE

Whatever may be the final result of the investigation started today by police of three "confession" of Ray Schneider that Hayes killed Rev. E. W. Hall and Mrs. James Mills at New Brunswick, N. J., it is manifest that authorities are right when they say that it is "full of holes."

His alleged confession implicates Clifford Hayes and, because of his admission that he concealed a crime, makes him an accessory.

The question arises, "Why should a man accuse himself of a crime of that sort and give a number of details that are manifestly false?" The only answer that can be given is that he was broken in mind and body by the continuous grilling of 21 hours, and did not know clearly what he was saying. Hayes may have committed the crime, but evidently did not do it in the way Schneider described and probably did not do it at all.

The fact is that criminologists have shown repeatedly that men confess to crimes of which they are not guilty under pressure of the third degree and under fear of a mob. That several are lynched every year on their own confessions of crimes of which subsequent investigation shows them to be innocent, has repeatedly been proved. In every case of that kind, crime is first, not retarded, for the guilty feel that they may escape arrest, and friends of the innocent if of weak moral nature feel that the risk is not greater if they are innocent. Men "confess" to much under terror, hoping to get an easier death.

Even when surrounded by all the just protection that the law can afford, without any third degree operation, men are occasionally convicted by circumstantial evidence and exonerated or imprisoned for crimes that someone else committed. How much more the danger when all safeguards and protections are removed. Such things cannot be avoided. But the third degree is too often practiced and can and should be abolished. A fair trial in open court with speedy conviction of criminals and appropriate punishment for those found guilty of law violation, without fear or favor, is something needed everywhere. —D. W.

## AMERICAN TRADE GROWS IN ARGENTINE

Partly because Americans have finally learned that they must cater to the demands of the South Americans in trade, partly because the war gave us an opening to get better acquainted with our southern neighbors and partly because of a more complete understanding of our motives by these neighbors, we are growing in favor down the line in this hemisphere. The fact that these people like ourselves are solvent also helps.

The United Press in a dispatch today tells the story. It says:

North American penetration in the Argentine is now an incontestable fact. It is evident in every class—economic penetration, cultural, political, legal, industrial—in methods, in customs, in everything, even to the views.

In the economic order of the republic many important American firms are definitely established. Five or six years ago there was not a single branch of an American bank here, and very few firms were all-American.

All the newspapers now carry large ads of products of the United States. The merchants, talk of American commercial methods, and when they want to employ an employee to accelerate his activities they advise him to be more "Yankee," to think rapidly and work quickly, to lose no time.

In court cases, when a lawyer has made a good case and can find no further precedent in Argentine law to support his argument, he cites laws or precedents of the United States. The judges themselves uphold their decisions by citing pronouncements of their American colleagues.

In cultural aspects also the Argentine people incline toward America, while European development is receiving less attention. The newspapers receive their news largely from American agencies. The United Press maintaining a leading position position. Daily many columns are filled with news and comments of the United States.

The part of the population which understands and speaks English, which is large, reads the American magazines, papers, etc. A few years ago boxing interested no body. Football was little known. Today, there is a much enthusiasm for boxing and football, as well as for tennis and even baseball, as in the Anglo-Saxon countries.

The smart dressers attempt to copy American styles of wearing, apparel. The devotees of the movies ape the customs and habits of the stars of the silver-spoon, where they sit, how people live, mouth of the Rio Grande. Even in the cabarets, saloons, and social functions, the tango is giving way to the fox-trot, the shimmy and the "Boston."

The clubs are adopting names such as "American Social club," "Young Men's Dancing club," etc., all American names.

# URGE HEARING BE HELD SOON

Want Commissions to Set Date  
for Second Meet Soon; Os-  
trander and Ault Address the  
Kiwanians.

The public utilities commissions of Idaho and Nevada have been strongly urged to hold a second joint meeting to be held before November 1st, in order to give the Idaho Court railroad a chance to show cause why the certificates issued by the company, according to its latest statement, are invalid. The club meeting will be held at the Twin Falls Hotel, with John W. Graham, attorney for the various commercial interests, presiding. Members of the club include Mr. and Mrs. H. C. O'Neil, Mr. and Mrs. C. E. Wright, and others.

## Starting Increases of Autos Disclosed

*There are approximately 5,000 auto-  
mobiles in Twin Falls, according to the  
figures of the chamber of commerce.  
C. E. Stade, Stewart, there are  
62,000 cars in the state, about ten per  
cent of which are owned by individuals.*

*Jack in 1914 there were only a few  
more than 3,000 machines in the state,  
considerably more than this number.*

*These statistics picture very clearly  
the growth and increasing prosperity  
of the state.*

*Increasing prosperity in Los Angeles and other coast points will re-  
sult in a steady increase in the  
Twin Falls and entire Pacific  
country, according to E. A. Ostrander,  
who has just returned from the coast.*

John G. Jones, one of the cowboys,

shot a bullet into the brain of the animal

which had started forward, and the action of the horses was arrested by the maddened bull just before he dropped dead.

Brown was also ill.
