YOUNG BRIDE FOUND SLAIN IN HER HOME

New Hammer Murder Mystery
Stirring Eastern Circles; Body Found in Honeycomb Cottage; Husband Has Both Legs Cut Off in Accident.

PITTSBURGH, Pa., July 18. A brutal hammer murder was discovered yesterday morning in a small cottage in the shade-body of Mrs. Walter Coyne, 18, bride of five months, in her honeymoon cottage at Port Perry, near Bedford, Penn.

Only four hours before the badly battered body was found, the husband, Patrick Coyne, a brakeman, lost both legs in falling from a train of cars which derailed, dying in the West Penn Hospital.

The girl's body was found by her father, John Coyne, who searched for her throughout the night to inform her mother of her disappearance.

The door and windows of the cottage where Mrs. Coyne's body was found were securely locked. Finally Coyne forced his way in and lowered down the door. The body was found covered with blood on the bed.

Mrs. Coyne, a beautiful, auburn-haired girl, was well known in the Bedford district before her marriage five months ago.

Mrs. husband's work from three o'clock until 11 at night and the girl never came home during his absence, he said. Coyne was seen leaving his home and never returning. The data will be assembled and discussed in a cabinet conference with these interested persons, who have studied Alaskan conditions as scrupulously and painstakingly as the officials.

The president will work out a general plan for Alaska, upon which the Alaskan delegation will act. The independent movement probably will be started.

Kennedy will be selected by the United States delegation today, as a compromise choice between the various progressive groups. It is believed, however, that Kennedy will be chosen.

Kennedy will put up before the republican convention as an opposition candidate to President Harding. The Alaskan delegation will support him.

President Harding today will include that the country's future is in the hands of graduate and probably now developing for the next decade at least.

President Harding today will receive an official invitation from the governor of Alaska to speak at the Alaskan delegation before returning to Seattle. The invitation will probably be declined.

No comment was made on the early returns of the election.

The Alaskan delegation is due to arrive at Seward late today and will go aboard the Henderson, leaving shortly afterward.

Harding Refuses to Be Concerned Over Farm Crisis

WITH PRESIDENT HARDING, SEWARD, Alaska, July 18.—President Harding is unimpressed by the political menace seen in the Minnesota agricultural crisis, and is not worried over local conditions.

"Warning" of Senator Brookings that something must be done for agriculture did not impress the president. "He will not embark on an opinion of farm conditions," Mr. Harding said of the農業家. "He doesn't care to have his farmers say any other class by artificial means such as legislation or executive action. He wants to let them do what he can do for himself, as far as he can attempt to lift himself by his own bootstraps."

Farmers don't like classes that would segregate people according to whatever help the government can give in the normal, regular way, the president feels.

PRESIDENT BIDS ALASKA GOODBYE

AROUND PRESIDENT HARDING'S INTENDANCE TO SEWARD, Alaska, July 18.—President Harding is going to have a cabinet meeting on Alaskan problems soon after leaving the transport fleet here to Seward today. Secretary of War Wallace and Hoover will complete their intimate study of fisheries, coal, railroad and general transportation problems of Alaska and Seward. The data will be assembled and discussed in a cabinet conference with these interested persons, who have studied Alaskan conditions as scrupulously and painstakingly as the officials.

The president will work out a general plan for Alaska, upon which the Alaskan delegation will act. The independent movement probably will be started.

Goes to Europe for Revenge on Butler Who Stole from Him

NEW YORK, July 18.—On a quest to which it will devote the remainder of his life if necessary, Alvin Karpis, the gangster who has been condemned for France to spur the police of Europe in the search for a former butler who robbed him.

Henry Pollard, the swashbuckling jewel thief who has won a \$100,000 reward for his capture, offered \$15,000 reward for his capture.

It was not a question of the stolen jewels. Mr. Karpis, who was considerably impaired by having locked in the vault, slowly sifted, only when their faint cries were heard outside. But still there was no sign of his butler, who had left his home and his husband through the vault that nearly caused their deaths in the robbery of April, 1920.

The fourth second time Shatuck has asked for France to hasten his pursuit of international police. Pollard's trial is set for Aug. 1.

—**PIRATES ATTACK SHIPS.**

SHANGHAI, July 18.—Chinese river pirates attacked a British steamer, the "Fah Wo," on the Yangtze River, killing the Chinese captain and cabin boy, according to reports reaching here today. Two Chinese passengers are said to have been wounded. Details are available.

—**BROWN IN RIVER.**

BERLIN, July 18.—The German submarine is alleged to have sunk the liner "Bremen" in the North Sea while setting out from the harbor last week. Twenty-eight were reported drowned.

H. J. JOHNSON BOOMED FOR PROTEST IN WHITE HOUSE

COMPROMISE BETWEEN HARDING AND LAFOLETTE FOLLOWERS Might Right in Nomination of California's Kenyon Is Favored by Group of Iowans.

WASHINGTON, D. C., July 18. A brand new presidential boom for Senator Johnson and his progressive supporters has begun. Mr. Herbert LaFollette, Senator LaFollette was being hunted today upon the wreckage of the republican defeat in Minnesota.

Johnson's friends are the only ones behind him. Some stand-pat leaders were discussing seriously the admissibility of the California senator's proposal to nominate his party to head off a third party move by Senator LaFollette.

The overwhelming no-called radical-progressive victory of Magnus Johnson in the Senate election of Minnesota has almost a certainty.

Agricultural discontent is the main issue behind the boom. Some stand-pat leaders were discussing seriously the admissibility of the California senator's proposal to nominate his party to head off a third party move by Senator LaFollette.

Editor's Note: Arthur Capper, president of the University of Kansas, in an article written for the United Press, says in the election of Magnus Johnson a protest against "destitution and the destruction of the agricultural economy" was made.

By SENATOR ARTHUR CAPPER, TOPEKA, Kan., July 18. The most important issue of the election of protest against deplorable conditions prevailing through the agricultural economy is the right of the farmer to accept his diploma in protest against the administration.

Agricultural relief organization by the last congress did not consist of uncompromising panacea but of constructive measures for which farmers are entitled.

These efforts have not had time to try out and to produce results. In the meantime Minnesota farmers have sent a protest notice that protesting must stop; that the presently evident economic wrongs of which they are victims must be righted.

The factors that I believe had great influence in the Minnesota election and that farmers throughout the west are greatly disturbed over, are high freight rates and excessive tolls on necessities of life.

UNION, PACIFIC, OFFICIALS ON WAY to Contact Optimistic; Report to Public Utilities Commission Reveals That Heavy Rail Will Be Used.

IT IS probable that dirt will be moved in the line between Roger and Wells within a month, if not earlier, as indicated by a report given by some of the members of the party that accompanied Pres.

President T. G. Gray, of the Union Pacific, who today gave his first official statement regarding the proposed railroad to the south, said that heavy rail will be used.

The case is causing much consternation locally and public interest are high in pursuit of the cul-

perpetrator. The committee will act on the application for a certificate of convenience and necessity.

QUESTION AND ANSWER BOX

(Conducted by Auntie Sue.)

Q. Dear Auntie Sue: Again I turn to the book of knowledge and that means you.

I wish to know whether you hear of any place where "Thumper" receives the belt? If Dempsey receives a real belt or is it only an expression.

If only an expression, then what does he receive? Please send me the name of the belt and the medal! And Auntie Sue let me know if you know of any place in Twin Falls where I can have a pair of leather belt loops made either for something or nothing as I am now only an aggravation.—Respectfully yours.—N. B.

A. Dear Auntie Sue: I hear from you again, Mrs. N. B. I thought you had forgotten me—for-sure-by-now. I have never heard that expression, "Dempsey receives a belt." I have never heard of any place where "Thumper" receives the belt. If Dempsey receives a real belt or is it only an expression.

If only an expression, then what does he receive? Please tell me the name of the belt and the where?—Hats off to you, Auntie Sue. Please tell me again, Dan, that's easy.

Q. Dear Auntie Sue: I wish to secure the names of the leading

Latin words in English language. Nearly one-third of the words in the English language are of Latin origin. Anglo-Saxon—was adopted in England under King Alfred the Great in 896 A.D. William the Conqueror in 1066. With the Norman Invasion came the introduction of French into the English language. Several thousand of the French words were Latin with a few alterations. Latin words in a larger number of Latin words were introduced into the English language.

Jenny Lind as Inventor.

We again the records of the patent office to vain to find the name of Jenny Lind as an inventor. Let us hope she has some other name for the "piano car." When she was brought to this country by P. T. Barnum she was obliged to spend much of her time in traveling from place to place giving performances in cities of the period. So, to reduce the discomforts of the trip she had the seats of an ordinary car removed and the vehicle furnished with chairs, tables and other conveniences. This was the first piano carriage ever presented to a piano. She recently called this her "piano car" and it is undoubtedly from this that we get the name for our Pullman chair cars—Scientific American.

HEAVYWEIGHT TITLE FIGHT IS ASSURED

Time of Bout About
Only Uncertain Thing
at the Present: Firpo
Is Under Contract to
Meet Dempsey This
Year.

NEW YORK, July 18.—Another decision has been made on the part of one or more persons about the Dempsey-Turpin heavyweight championship match was made today by Tex Rickard.

There was not a few little details to be straightened out before it can make a definite announcement of when and where the match is to be held, Rickard said.

Heckle, according to his best knowledge, the South American would meet Dempsey for the title before the end of the year, either in the United States or in South America.

"I have Firpo under contract to meet Dempsey this year, and if I can't make the match I am no promoter," Rickard said. "It is more interested in the date as he has been talking to Dempsey about Firpo and Wills before the end of the year.

Kearns prefers Labor Day for the fight, but he has not yet decided whether to have it in or near New York around world's series time.

Given a world's heavyweight champion, and the man who has the classic may cause the major promoters to froth plenty and they have been frothing plenty all summer because of the boxing card has been placed in competition for the "Grand Old National Pastime."

Unless some action is taken soon to close the baseball parks to boxers, the club owners are powerless to stop big matches.

While heavy conversation is being centered in the heavyweight, to the exclusion of the other sport, the Law-Tender-Leonard fans are getting restless.

The Leonard-Tender fight is a nonentity now, and the tickets are going as though there was no such a thing as a heavyweight.

WATCHING THE SCOREBOARD

Homers by Snyder and Groh produced four runs and gave the Giants a 7 to 3 victory over the Cubs.

Adolfo Luque, star pitcher of the season, hurled the Reds to a double victory over the Cubs, 9 to 7 and 9 to 6. He won the first game and the entire distance in the second.

Houser's homer was the only tally counted off Clevengroes and the Altimers lost to the White Sox 1 to 8.

George Ulte hit the Yanks down with four double hits, and the Indians who to 0. Babe Ruth and Lou Gehrig were the only Yankees to set-asides in the second.

Four singles, a double and a triple by the Pirates, 6 to 5.

Fred Tenney battered Jimmy Ring in a pitchers' battle, and the Cards beat the Phils, 2 to 1 in ten innings.

Steady pitching by Johnson enabled the Tigers to beat the Senas 4 to 2.

Dave Danforth pitched great ball and the Browns made it fit straight over the Red Sox with a 10 to 1 win.

Member Planet

Everybody comes with the sun at sunrise, said Jim. The little dark sun-spots which you see at sunset through the medium of a smoked glass are most of them, many thousands of miles away. One man found a sunspot which measured 13,000 miles—which means that the sun could have been puffed into it like a soft ball into a pipe water.

WHY FAIL?

Success is easier to attain than failure, wrote Ed Howe, the retired editor and country town philosopher at Poston Hill Farm near Atchison, Kan. Right, in a sense, for the road to failure is harder for us than the road to success.

Ed Howe's philosophy is thus success; after all, is not so difficult—trouble is most of waste run much time seeking an impossible short-cut to it instead of following the old reliable road may—hard work, patience, perseverance and common honesty.

One of our national weaknesses is a bent-mind for magical formulas. We'll never be satisfied until we are able to cure any disease with one pill, have a pocket-size radio without batteries, and make life an endless period of prosperity without the traditional spells of depression.

Still, that's the right attitude in the sense that it's the only way we'll ever attain the perfections we crave.

American mentality does not admit that anything is "impossible"—except where it applies personally to the individual. If we had the bold confidence in our individual selves that we have in our herd or social group, it wouldn't be necessary to talk so much about how-to-succeed.

—O—

To those ambitions, it often seems that life is an unending series of failures. Success is the sum total of these failures. This angle of the discussion is turned by President Harvard.

He adds: "It has been asserted by military critics that a nation is never finally beaten in war until it believes itself beaten. With not less accuracy, it may be said that so long as a man lives he is not failed unless he believes that he has failed.

The man who rushes ahead repeatedly into the same stone wall has the kind of head least likely to be affected by the process. He shows perseverance, but not determination to succeed. Wisdom consists in changing the method as the result of experience."

In other words, try hitting the head against other parts of the wall until we find a weak spot, instead of repeating at the same point of attack.

—O—

The careers of most great men prove that success comes only after a series of failures. Abraham Lincoln in his younger days tried to be a successful storekeeper, at which venture he failed twice. Goodyear failed in thousands of experiments before he discovered how to make sticky rubber gum into a useful and useful commodity.

William James tried to succeed as an artist, then as a doctor, and wound up successfully as a psychologist and philosopher.

So it goes. When failure becomes chronic, it's often because we're attacking the wrong part of the wall—trying to succeed at the wrong vocation. For every person in the world there's some line of work at which he is certain to be highly successful. The job is, to find it. Instinct will guide us more accurately than reason.

Is Green No More

"My experience with your medicine has been wonderful. My stomach and liver trouble, which I've had for over ten years, are now gone. I took two tablets a day when I took on an olive green complexion. I spent \$1,200 with doctors and specialists trying to get rid of them, still I grew worse. A friend advised me to take Marr's Wonderful Remedy and I am green again. More, my stomach and liver trouble are all gone." It is a simple, harmless preparation that removes the catarrhal mucus from the intestinal tract, just allows the body to digest food with greater efficiency. It cures all stomach, liver and intestinal ailments including appendicitis. One dose will convince you of money returned.

Supremacy of Marr's
Marr's has daily work of body and spirit, which requires his delicate and other animal tissues and of their doing God takes to account—Marr's.

Bible Thought of Today

PSALM 103:12-13—They shall be my people, and I will be their God. I will walk among them one moment, and one day will they bear me no more, for the good of them, and of their children after them.—Jeremiah 31:33, 34.

CHAUTAUQUA OPENS SPRING SESSION
Week's Series of Programs, Centered In Drama to Please Audience.

With its opening number given before the curtain was drawn, the first night of the new season at the Chautauqua Hall, G. Eliot-White chautauqua got off to a good start on its annual summer meeting exhibition in Idaho last night. The first offering was the well-known play, "Turn to the Right," presented by a good company of players, consisting of nine persons.

It is difficult to present a drama effectively with the handicaps of a small stage and under canvas, but the play did turn to the "Right" overcomes those difficulties and made the audience forget everything but what was going on before their eyes. The play required but little attention from start to finish.

The thread of the story is intensely interesting with flashes of humor穿插ing through it at intervals, but the play had a heavy, heavy atmosphere around the playgoers.

The finish was exceptionally well done and proved highly satisfactory to the audience.

Enormous Pecan Tree.

The largest pecan tree in the United States first became known to the public when it was obtained from its one year old seed and sold for \$500. When the tree was sprouted recently by the state inspector of pecan trees, he used 100 gallons of spray. The tree is more than 300 feet in height.

EXECUTIVE OF BOY SCOUTS IS WORKING HERE FOR THE TRIP

P. D. Hawley back from Buhi Camp in Hawthorne Declares Conditions There are Excellent—Hopes for Large Crowd for Trip Tomorrow.

F. Douglas Hawley, scout executive on his arrival today from the boy-scout camp of Buhi in the Sawtooth mountains at Mountain-top-the-world's highest point, said he had been talking with other boys who will leave at 1 o'clock tomorrow for the cabin. That will be delegations from other towns, he believed, but Mr. Hawley said he had no definite knowl-edge until late tonight.

There are 31 boys besides scoutsmen in the Buhi camp and all are first-class men. He said he did not know yet how many who are not scouts members here will go to the camp, but it is hoped that there will be a goodly number.

Many New Guests—A dozen new residents of this city have been placed on the list this week for use of city water. Real estate men say the empty houses are filling up.

Back on the Job—Probate Judge O. D. Tullval, who with his wife, visited Zionsville recently at the invitation of the First Christian Church, was conducted in the parsonage, received the afternoons and lectures at night.

District Superintendent J. E. Baker, Extricator, son of E. J. Baker, of Bay City, was elected as dean for year.

President W. C. Tracy of Training college and Rev. C. E. Deal of Flores were also identified with the conducted the recreational and class work and Dr. Teller of Brooklyn was the principal lecturer. His address on "The Social Problem" was particularly interesting. Two Falls people there were: Mr. and Mrs. Marshall Holden.

Mrs. Fred. Bess, Anna Hess, Dorothy, Mrs. Blake, Dickie, Ralph L. C. Jones, Earl Jones, Frank Hess and Anna Pickett.

Attendance Convention—Mr. and Mrs. Carl E. Wright of the Kimberly Inn attended this week in Boise where Mr. Wright attended the Pacific Coast Neurosurgeon's convention and discuss ed the subject of "Cash Payment with the Order" plan.

Daily Fashion Hint

PARIS EXALTS SIMPLICITY

The whole world of fashion looks to the slim-line fashions and this will in every way be typical of what Paris is wearing.

On either side of the Seine, the girls in the department stores are dressed in the latest fashions of hand-trimmed tucks and bows, but the side panels are content to be gathered at the edge and tucked under.

The medium requires 4½ yards of best material.

List in a Sure Way
"It's no good kickin' a dog," said Charley, "but I'll do it in your ear! Get a dog's tail wrapped around a pick an' sing an' dig!" —Richmond Times-Dispatch.

Pit Apparently Battlemented

In a volcanic crater in the Sage Creek mountains in Bear Lake County, Idaho, a large, smooth-bottomed pit with black marble sides, is which depth conditions of 1,200 feet have failed to touch bottom.

On Prospects Brighter—That J. O. Neary, of the State Department of Agriculture, within the month, expects to receive information that has been received here. It is said that the people of Kimberly are confident that they will have all within 60 days.

Total Are Checked In—The totals for the June 1928, collections on the farms of the state fair, now complete, are \$400,000 has been collected and \$22,000 is still delinquent. This is much better than the June, 1922, tax, general speaking.

Cattle and Sheep Often Contract Shipping Fever

Pratt and others write that the disease through the large stockyards often reappears a disease known as hog cholera, septicemia or shipping fever. The losses occur most commonly in the fall and early winter, when advances and heatless nights usually occur. Stock-feeding rations and feeding rather than grazing cows and sheep may be affected.

Also, items are deprived of a good ration during the summer often go into a sharp weight preparatory to the fall and winter, and not eat. Farmers have been advised that when animals are low producers and often good horns are discarded when they would be all right if properly fed.

Items that are slow producers when properly fed can soon be culled out properly.—J. L. Gordon, Iowa state college.
