TWIN FALLS, IDAHO, FRIDAY, SEPTEMBER 28, 1923.

OLD VOL. NTH. NO. 55.

## FARMERS MAY GET BEHIND SUBSIDY BILL

**"Farm Subsidy"** Bloc Is Feared in Congress if December Unless Help Is Given Farmers at Once. Shipping Board and Other Bureaus Will Get Nothing Until the Farmer Gets His.

**WASHINGTON,** Sept. 28.—Unless effective help is rendered the farmers, the agricultural and liberal blocs in congress will get behind a "farm subsidy" bill unless it is passed, for which will be started ruthlessly from appropriations for government departments.

The most basic measure determined on by bloc leaders who are putting the utmost pressure on the administration to start action on the agricultural program.

If such a revolutionary step were resorted to it would mean wrecking of the entire agricultural program and would involve a fight to a knockout between administration and the bloc.

But the basic measure determined on by bloc leaders is to keep the balance of power in Congress.

Just what form the bill would take has not been determined, as the bloc leaders have not yet decided.

They say they hold it as a last resort, keeping it as a club over the administration to force action instead of mere talk and conference about the farmer.

But the idea back of the plan is to keep the bloc in control of the ship building board or, for instance, bureaus of the government until the farmer has taken care of his own.

It is felt that the bill will be stalled heavily or refused entirely and a general filibuster against administration legislation.

On the other hand, the bloc leaders have decided to start a relentless drive to force from party leaders a definite helpful program for the farmer.

Farm bloc leaders are disposed to give Mr. Coolidge a fair chance to carry the situation and agree with him.

They believe he has done enough to deserve a chance.

They want to continue.

Daily, one month .60

## DID YOU EVER STOP TO THINK

(By E. R. WAITER.)

That your newspapers are a productive advertising medium for manufacturers, distributors, and retail merchants, because they prove the buying power of their readers.

That the unselfish motive on the part of the five men who are putting your city forward, will be one of the chief reasons for its success. THEY PLACE SERVICE TO THEIR CITY FIRST.

That your city is a great retail center. She has stores of every kind. BUY AT HOME!

That your business community has never willed a thing and failed.

That your city should take advantage of every opportunity that beckons.

That no matter how difficult some city problems are, a little analysis and common sense will disclose that they are built up out of simple things that are easily adjusted.

That what others have done, your city can do in proportion to its capacity.

That the thrill of doing must first find lodgement in the minds and purposes of the citizens before any municipal benefit can be accomplished.

That the spirit of improvement is in the air. With a city that has so many natural resources as yours, why not go a little harder after the business in your trade territory.

That your city and county need better business... better business for the city man and better business for the farmers.

That advertising and better business go hand in hand. We do not advertise more and help your business and your city!

That you should visit city knockers.

That enough knockers will soon make a live city look like an electric-lighted graveyard!

## CROPS WORTH \$20,000 AN ACRE

Would you like to have a farm with crops worth \$20,000 an acre a year? That's what is done by "glass farmers" who grow vegetables and flowers in greenhouses.

A census report shows 3800 acres devoted to glass farming, with a crop of twenty-seven million dollars a year, about \$20,000 an acre.

But that doesn't mean \$20,000 profit, by any means.

The glass farmer averages an enormous waste of crop. He also has an exceptionally big cost of production. The census found that it keeps two or three men busy for each acre farmed under glass. Then there's the cost of building the greenhouse, supplying steam heat, and other items of intensive cultivation.

Despite all the "but's" and "however's," there's something fitting to the imagination in any kind of farming yielding \$20,000 an acre a year.

It gives us a glimpse of the future—the possibilities that lie in highly specialized scientific farming.

Time will come when there'll be no "out of season" for any article of food. That condition is practically existent now, due to glass farming and fast express transportation from warmer climates to districts where winter makes impossible the all-year round cultivation of phone flies.

Many of us can recall when the average family in the northern states never had fresh vegetables in winter time. Even potatoes were stored in the fall in a bin down cellar.

The department of agriculture cautions the enthusiasts of would-be glass farmers by warning that "the quantity of coal used to maintain each acre of space enclosed in greenhouses at the required temperature, varies from 320 to 300 tons a season."

Oh, well, we'll continue dreaming about chicken furniture.

A Geedy Complexion  
A fat, red and shiny face with wrinkles over and over. The mother, the boy with tomato seeds in his face.NEW LAMP BURNS  
94% AIR

Beats Electric or Gas

A new oil lamp that gives an amazingly brilliant, soft, white light, even better than gas or electricity, has been tested by the U. S. Government. It is reported that the lamp was found to be superior to 10 ordinary oil lamps. It burns without odor, smoke or noise; no pumping is necessary; it costs only 9¢ per gallon of oil and 6¢ per cubic foot of compressed air.

The inventor, W. E. Johnson, 101 N. 1st Street, Twin Falls, Ore., is offering to send a lamp on 10-day FREE trial, or "even to give one FREE to the first man in each local newspaper who has him mentioned." Write him today for full particulars. Also ask him to explain how you can get the agency, and without experience or money make \$250 to \$500 per month.

# IMPROVED UNIFORM INTERNATIONAL Sunday School Lesson

By REV. F. J. WETZWATER, D. D.  
Teacher of English Bible in the Moody  
Bible Institute of Chicago  
(See page 10, Western Division, Times)

## LESSON FOR SEPTEMBER 30

**REVIEW: GREAT MEN AND WOMEN OF THE NEW TESTAMENT.**

**DEVOTIONAL READING:** — The Golden Text—wherefore seeing we also are compassed about with so many difficulties, let us lay aside every weight, and unto the ship which doth so easily break us, and let us run unto him who is the rock that is set before us.—Heb. 12:1.

**PRIMARY TOPIC:**—Favorite Story of the New Testament.

**JUNIOR TOPIC:**—Favorite Heroes and Heroines of the New Testament.

**INTERMEDIATE AND SENIOR TOPIC:**—Some Great Characters of the New Testament.

**YOUNG PEOPLE'S AND ADULT TOPIC:**—Life Lessons From This Quarter.

With the senior, and adult classes, three methods of review may be profitably employed:

1. The descriptive work method as presented in Parallel Bible Notes.

2. The Faith-filled Virgin Mary.

3. Impulsive Peter.

4. Loving John the Apostle.

5. Theological Master.

6. Ancient Mary Magdalene.

7. Busy Martha and Open-hearted Mary.

8. Faithful Stephen.

9. Generous Barnabas.

10. The Good Shepherd Paul.

11. Kind Mark.

12. Helpful Luke.

13. Consecrated Timothy.

2. Presenting Life Lessons as given in Christian Life Lessons:

1. Mary: Glorified Motherhood, Lesson 7.

2. Magdalene: Adoring Gratitude, Lesson 1.

3. Martha: Bound Womanhood, Lesson 7.

4. Leader Lesson.

5. Peter: Compacted Zeal, Lesson 8.

6. John: Ripened Love, Lesson 8.

7. Paul: Passionate Devotion, Lesson 10.

III. Helper Lessons.

1. John: Faithful Pioneering, Lesson 11.

2. Matthew: Divine Transformation, Lesson 6.

3. Stephen: Heroic Witness, Lesson 8.

4. Lazarus: Greatness-Greatness, Lesson 11.

5. Mark: Return of the Quitter, Lesson 11.

6. Luke: Double Dealer, Lesson 12.

7. John: The Glorious Ministry, Lesson 13.

The Summarizing of Content.

The following is suggestive:

Lesson I. John the Baptist was a honest man, but he did not take kindly to himself nor trim his message to suit the crowd.

Lesson II. Mary should not be worried—but she is worthy—of great honor. Her faith in God was evident in her desire to have Jesus born in her womb in spite of the fact that she knew that her character would be suspected.

Lesson III. Peter, while being bold and courageous, was a bit afraid and cowardly in his attitude toward the Master.

Lesson IV. John the Apostle was a patient man. He did not say much about himself, but was passionately in love with his Lord.

Lesson V. Lydia, though humbly born, was a man of force of character and decision. He left all and followed Jesus.

Lesson VI. Mary Magdalene, before she met Jesus, was weak, decadent, because of her devotion to the Lord. Because of this, she was able to tell the good news of the resurrection to the disengaged disciples.

Lesson VII. Martha born loved the Lord. Martha was mistaken to the best way to please Him.

Lesson VIII. Stephen was so completely filled with Christ that his face shone as the face of an angel.

Lesson IX. Barnabas was a good man and filled with the Holy Ghost. He was qualified as a teacher or mentor.

Lesson X. Paul's knowledge of Jesus was so real that he had as his supreme goal to preach him.

Lesson XI. Martha became turned back from the work, was restored—and became a great and honored minister of Christ.

Lesson XII. Luke, thin and plain and popular, yet gained himself up to be the attendant of the missionary of the cross.

Lesson XIII. Because of Timothy's religious training, he became a worthy minister of the gospel.

Lesson XIV. Corner Stone of Society. The sanctity of marriage and the family relation make the corner stone of our American society and civilization.

"Our Kingdom."

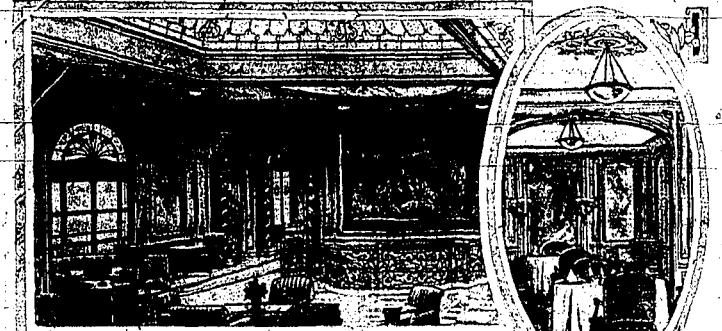

A nicely tailored gray may just again, but the recocaled one is truly vanquished—Schiller.

"Hatred."

"When our hatred is violent, it sinks us even beneath those we hate."—Le Rochefoucauld.

Times Wantads Get Results.

# Italy in New Maritime Plan Sacrifices Size, To Elaborate on Art and Magnificence

The artistic lounge of the *Duilio*, decorated in the period of Louis XIV.

BY JOHN V. CLARKE

We are prone to think of Italy as the artistic treasure-house of mankind, beautiful as a dream and somehow, quite as unreal. The hard problem is to realize that she is still a nation most of us. We become temporally suspicious of beauty. Yet we know that the weakness lies in us, believe, "the perfect adjustment of parts will not suffice if they also serve as a very good definition for strength."

Modern Italy is strong. Nowhere else in the world is there such a fleet upon the seas; not in naval armament, but in the growing importance of her merchant marine and passenger fleets. It is interesting to note that her development of a great naval power has come out of the most unlikely source, the result of a fierce competition from the other great maritime nations. As in naval affairs, the race has been upward to the stars. She will not stop to see the largest ships have been a chief talking point of the competing nations.

*Italy's New Policy*

Up to a certain point Italy strove for size. She built and builds, very large ships. But she has deliberately switched her effort to a new direction. Her modern ship-builders have some to believe that comfort, luxury, beauty of design and artistic effect rather than mere size are the enduring values. They have propounded this as the goal of the future and stressed the idea that the size of the vessel will be obsolete and the standard of excellence will rest on the building of pleasure and comfort.

The *Duilio*, built for the American passenger service in November by the Navigazione Generale Italiana, is an example of this change in policy.

A Double Bedroom on the *Duilio* With Two Private Balconies.

Antient Art is contributed to the whole, for historic tapestries adorn the galleries, and the walls are covered with the works of the better first-class artists. Instead of paper or paint, canvases of beautiful pictures overhang the decks.

A section of a private dining room in the *Duilio*.

beds (for the *Duilio* besides private baths, has beds instead of berths) harmonize with the walls, picture frames and curtains, and are lighted by oil or water colors by famous artists.

The furniture is antique and blends perfectly with the interior decoration.

In short, the *Duilio* is a beautiful floating gallery of art.

*Explanation of Maritime Success*

Much of the Italian success in passing the British in naval armament is due through an appeal more primitive.

The Italian *giovane* is fitted

with a greater desire to learn and to go to sea.

She has another way

conspired to help the Italian effort

upon the seas. No less a person than the Queen of England is interested with this.

Americans who were interested

in seeing the famous tomb of the King found that

it could make the connection

at Naples, travelling thence on the great liner *Egyptian*, so luxuriously appointed.

It is the same with Americans.

They are also selecting the direct route to the Mediterranean, on their way to India, and rest of the Indies, thus bypassing the Suez Canal and avoiding railway travel.

This affords some explanation

of the remarkable developments

of Italy in her transition from the last decade from a country whose people were almost illiterate to a world lay in the art treasures of her luminous past, to a country, alert and progressive, taking a notable place

in the one word that describes that tasty taste and flavor of Scully's Skookum Syrup. Nature's best product. An "every meal" delight. It's the pure cane and maple sugar that makes it so appealing. Get the Skookum habit—it's a good one.

**Habits That Pay Off.**  
In Australia Hobbit fair is said to be snapshotting wool in felt making. The fair is considered much superior to the dress merrins for this purpose, and millions of rabbit skins are used annually.

**A Ponderous Quest.**  
Another question is whether an elephant takes the peanut on its own account or just to please the child.

Times Wantads Get Results.

— the one word that describes that tasty taste and flavor of Scully's Skookum Syrup. Nature's best product. An "every meal" delight. It's the pure cane and maple sugar that makes it so appealing. Get the Skookum habit—it's a good one.

In tight, double sealed bags, top cans, your protection.

You See Them Everywhere.

And where you see them, there also you see fat hogs and fat hens, and the *Raw Milk*—offering 30% abundance of pure cream. You never can ever get a day without eggs, and the *Raw Milk*—offering fresh water healthy stock.
