FORD SEDAN MEN PROTEST AGAINST HIGHER LICENSES

Those with Ford Sedans say their cars which cost \$2000 are being taxed as if they were \$4000. They are protesting against the higher license rates.

Owners of Ford Sedans of the two door variety are up in arms over the ruling of Commissioner E. A. Jeter which means their cars in the \$2000 class. They say that the weight of the two door 1922 model is 2000 pounds and that five per cent extra mill leaves them in the \$2000 class. Asked about the matter today, Deputy Assessor Jack Schmitt pointed to the specific instruction of the state which reads: "1922 and 1924 Ford Sedans are to be licensed for \$2000, with an exception made for two door or any other model."

They are to be licensed for \$2000, with an exception made for two door or any other model. If they bring me a receipt from the city scales showing that they have weighed and the cars are within the legal limit for \$1500 I shall return a license for that sum. Other wise I can do nothing but collect \$2000. Half a dozen licenses which were forwarded last week were returned today on the ground that the fee was insufficient.

BAPTIST PASTOR RESIGNS SUNDAY

Rev. W. H. Tolliver, his resignation from Twin Falls Baptist Church effective February 1, 1924.

Rev. W. H. Tolliver's resignation has just been received at the church. The church is a member of the denomination but Rev. Tolliver stated that it was final anyway. The resignation is a matter of the church to meet the budget. Recently the church officials made an excess, member services and the pastor was not sufficient to meet the expenses of the church.

Rev. Tolliver stated that he had a number of calls to larger churches in this state to try their financial and but that out of debt before he left here. Many new members have been taken into the church since he has become pastor and we will give a more detailed report at a later date.

NOTE: Pastors' services on all 2nd and 4th months. Special prices on all new and made over garments received before 10:30 P. M. Wednesday. Phone 6282.

TRAFFIC CHIEFS ENDORSE BRAKES

Development in the automobile industry has won from the traffic chief of the country, such a heavy endorsement, that the manufacturers of four wheel brakes, according to a clipping collected by the News & Times, is in every state in the Union and practically every city of any consequence. The chief of traffic and other police officials, however, with safety problem, have endorsed four wheel brakes most heartily.

Here in Birmingham Chief Fred Moffitt is making a push six with four wheel brakes, which he has convincing endorsement, while in Birmingham Chief Fred Moffitt is making a push six with four wheel brakes, which he has convincing endorsement, while in Birmingham Chief Fred Moffitt is making a push six with four wheel brakes, which he has convincing endorsement.

HE'S SATISFIED

Gus Morris, southwest of Jerome, is one of the North Side farmers who firmly believe in the dairy cow, says the North Side News. These cows are all grades, the Holstein breed predominating. For cream sold in October from eight cows, Mr. Morris received \$121.99, an average of \$15.25 per cow. The month brought 48 cents for pound.

These cows were on pasture the entire month and received no grain or other feed. The cream check is an excellent testimonial to the excellence of Idaho irrigated pastures. Morris has eight other cows coming on and expects to receive a monthly cream check this winter of \$200 or better. In other words, he will market \$200 worth of feed, through his cows, every month until spring. Why shouldn't he be satisfied.

NEW RAILROAD WILL HELP JARBRIDGE

We think so much about Contact in connection with the new railroad that we overlook its importance to other places that are not on the line. When W. E. Hudson was in the city Thursday he pointed out its great advantage to Jarbridge, in an interview published in The Times, wherein he announced the great strike of \$1000 to the ton in the Alpha mine. As he pointed out in the matter of getting tools and supplies from San Francisco, the shorter route will be of the greatest importance. As a result of this, of the big Alpha strike and the completion of the 150-ton Bluster mill, he predicted that there would be twice as many at work in the big gold camp next year as during the past summer. The Bluster is a bigger mill than the large Staugheim mill which has run incessantly, winter and summer, for many years, and its machinery is far more modern, as it has all the improvements found during the intervening time. The railroad means prosperity to everybody.

TIMES ARE BETTER

A survey of business conditions at Weiser shows a great improvement over a year ago, notwithstanding the fact that Washington county prune growers were hard hit. Improvement in other lines overcame the loss sustained by prune growers, so that business houses and banks report much more satisfactory business conditions. Merchants report from 10 to 25 per cent increase in volume of business. Banks report a material reduction in loans, and good liquidation. A like change for the better can be reported from almost every town in the state.

Idaho has had wonderful crops. Not all of them have been marketed at a profit, but most of them have. The pine grower may not be able to see any silver lining to the financial cloud. To the dairyman and the seed grower, however, the cloud has all but vanished. If the potato grower feels like he is in contrast with his neighbor who grows sugar beets. The bean and pea growers made more than good. Some of them cleared enough to more than pay for their land. The corn grower has prospered greatly, and grain and hay growers have generally done fairly large gains. Some of them wiped out their debts and many have made large gains.

The financial stern proved by the year has made gains that swept not a few to ruin and left new untouched, but others will not be losing where long-term records are so great as they are in Idaho. Idaho still is a home of wealth that will be in a period of years, pay big dividends.

OAKLAND-TWIN FALLS

Awakening on the part of Oakland to the importance of Twin Falls trade is indicated in an editorial of the Oakland Tribune of recent date, reviewed by the secretary of the chamber of commerce, from Orton E. Lucas, manager of the information bureau of the chamber of commerce. The report made 12 years ago, copied in the Times in a recent article through the courtesy of G. D. Adson, is referred to and activity is urged on Oakland. The editorial follows:

Twelve years ago the Chamber of Commerce of Oakland and San Francisco discovered that vast trade possibilities could be opened with the building of a railroad to connect Twin Falls, Idaho, with Wells, Nev. The situation was gone into thoroughly and it was demonstrated to the satisfaction of investigators that this state and these ports could handle great quantities of produce from the Twin Falls district and that there was a growing market there for California manufactures.

Twin Falls is 730 miles by rail from Portland, 250 miles by rail from Ogden, and 200 miles by rail from Salt Lake, Wells, in Nevada, is 125 miles from Twin Falls. If a railroad were to be built from Twin Falls to Wells the distance, by that road, from the former city to Oakland, would be 725 miles, or a little less than the distance to Portland. By the present route through Ogden the rail distance is 1045 miles to San Francisco bay and 815 miles to Los Angeles. That was the situation 12 years ago and it is the situation today.

However, it is said, the railroad is now to be built. The rich Idaho country is to be moved 300 miles nearer to Oakland and San Francisco, is to be made as close as it is to Portland, and a hundred miles closer than it is to Los Angeles. The spirit which undertook the investigation 12 years ago and the same realization of possibilities must be directed to present opportunities if the benefits are to come.

FLENNER COMMENTS ON BEGINNING OF THE RAILROAD SOUTH

HOUSE, Idaho, Dec. 10. The news that actual work had been started on the Jeffersonville railroad was received here with many expressions of gratification. The fact that western Idaho is only indirectly connected with the development, in part, of the building of the distance to the California markets will also greatly benefit this part of the state. The earlier developments in the region here were somewhat contemporaneous with the campaign for the American Falls project. The Chamber of Commerce of the Idaho Reclamation Association which helped in successfully and later that undertaking as the financing was pressed himself most emphatically and with many expressions of pleasure in the construction of work on the coast.

It appears a thing to all south Idaho, he said. "During the American Falls campaign I repeatedly pointed out that this railroad, in connection with the reclamation projects, would help solve our problems. That these many doubting Thomases, would not believe the Union Pacific was sufficiently interested in it to go to that great expense to open up nearer markets. If any one doubts now, he will be coming into that southern part of Twin Falls country and see the dirt moving."

Coming back. "People are coming back. They are coming back who have banked on Idaho and sunk, and they are coming back who have gone away discouraged."

After all, he says, it is really difficult to find a better place than Idaho. It is not a wide world, but it is a wide world, and it has a monopoly on all the best land in the world. It has the best opportunities to be heard have undertaken to make it appear that the country is in the state of bankruptcy and many thousands leaving; and they overtook the mark. The people are coming back, and they are leaning on it. Of course, that sort of thing helps us on the outside, but can overcome it if we will all stick."

BIG SAVINGS MADE ON SEWERS FOR AMERICAN FALLS

Material savings that are being made on estimates for street work, sewer systems and water mains in American Falls will permit more work to be done on sidewalks and other municipal improvements according to A. Frank, who has just addressed the chamber of commerce Monday night at the West Fall, says the American Falls Press.

The contract for the construction of the sewer system was at a figure several thousand dollars below the estimate. Frank after it was made the street lighting in the new town.

This money, which will add more to the savings fund. The amount saved out of actual work done will go to further improve the city, says the city engineer. The city engineer specifies that \$12,000 will be expended on sewerage improvements and this sum is to be used for emergency expense.

The successful bidder for the construction of the new sewer system, will not be announced until after the various bids have been studied by the city engineer. It is probable that it will be about \$100,000, which is a low bid.

RIGHT OF WAY FOR RAILROAD TO BE BOUGHT

Oregon Short Line Calls Attention to Conditions Named in Telegram of May 10 and to Application for Certificate; Twin Falls Must Furnish Land Free; Request Made for Blue Print by Local Committee.

That the Union Pacific expects the local railroad committee and chamber of commerce to furnish deeds to the right of way all the distance between Hoquiam and Wells was made clear in a communication received by J. S. Keel of the railroad committee on the subject from Chief Engineer W. H. Armstrong. The matter was raised by Mr. Keel when Thomas S. Hall, railroad right of way engineer for the Oregon Short Line was here two weeks ago, in order that there might be no misunderstanding.

In his letter, Engineer Armstrong quotes the telegram sent to General Manager H. V. Platt of the O. S. L., sent to President Arthur L. Swin on May 10 last, whereby it is specifically stated by Mr. Platt on his own behalf, and in a message from President Carl R. Gray of the Union Pacific, which he incorporated, that it was understood that Twin Falls would furnish free the right of way and terminals as well as the certificate of the Idaho Central. The certificate and the deeds to terminals have been furnished, and so has a considerable part of the right of way. The same provision regarding the purchase of right of way and terminals is incorporated in the application for a certificate from the interstate commerce commission.

Mr. Keel said today that there was no question regarding the responsibility of the people here in the matter of furnishing deeds. He raised the question with Mr. Platt to prove to make the matter definite. On receipt of the communication from Mr. Armstrong, he was somewhat shocked. A blue print to learn exactly where the land lay for which deeds had not yet been secured. In a message to the interstate commerce commission the O. S. L. estimated the total cost of terminals and right of way at about \$80,000, including certificate at \$25,000.

Why Take More Money? Unless those who have not yet made deeds shall do so, the purchase of the rest of the right of way will be necessary, but what will be required, if any, cannot be told until the arrival of the blue print and the investigation that will follow.

Work Temporarily Halted The bad weather Saturday temporarily halted the work on the roads. Visitors yesterday were surprised to find that over 400 feet of grade had not yet been put up already. The two car loads of tools and two of horses unloaded here last week which it was assumed would go to Hoquiam will be used in putting in switches and getting ready for the winter construction at this point. It is reported.

Scarlet Fever Is Epidemic in the Castelford School

One of the worst epidemics of scarlet fever ever reported in this community has been brought to the attention of the officers here as prevailing in the Castelford neighborhood, where nine families have already been placed under quarantine. Inhabitants of the town and where it is known that other cases not yet quarantined. Sheriff M. E. Finch and Dr. C. J. Weaver are in the neighborhood this afternoon, finishing the investigation. The school was closed this afternoon.

Hear Court Case—Madame was taken this afternoon in the district court in the case of Everett Hall against A. M. Stange. It is a case of partnership in the Bull packing house. William R. Johnson, defendant, and W. E. Guthrie, plaintiff. The case of the Idaho State Lumber company against J. H. Stange, J. H. Chapman, against Thomas Heller, et al, represented by Walters & Perry and H. Smith, was settled out of court.

Two Distress Filings—W. McGinnis filed a suit for divorce for Boyd News against Mattie News, asking divorce, and liquidation of property. She had a similar case for Alice Hopkins against James E. Hopkins. Both charges deserted.
