

NEWS OF THE SPORT WORLD

OUR GIRLS IN PARIS SMASH ALL RECORDS

English and Swedish Maidens Far Behind the Contestants from the Good Old U. S. A.—American Men—All Come Out Ahead of Competitors.

DAVIS, July 18.—The American women's 400 meters relay team, composed of Miss Edie, Wehren, Larkie and Donnelly, smashed the world's and Olympic records in the pool at Les Tourelles today with an effort to 4:36.6 seconds and second place in the final. The Americans' time was 4:36.4; England's 5:17; Sweden's 6:36.3-6:36.

Johnny Wenzel, C. S. A., defeated the English champion, who had the inside track, winning the men's free-style event, swimming in 4:04.2. Bob was one and one-tenth seconds behind the American star, with Charlie Atkinson third. All three broke records in their respective events.

Sweden was fourth.

At 100 meters Anne Burg was leading, covering the distance in 1:01.2. At 200 meters, Wehren had drawn into 4th lead, making the half way mark in 2:02.2. She held the lead to the finish at the 300-meter mark, which he reached in 3:37.2. From then on it was nip and tuck to the finish, with the American always greater speed in the final dash.

HUGGINS PREDICTS YANKEES' DEFEAT

NEW YORK, July 18.—"The season of 1925 will mark the end of my career as a major league manager," says Miller Huggins of the New York Americans, three-time pennant winner.

"I intended to retire at the close of this year." Possibly "not if my club was going as well as it was a year ago, but it isn't."

The Yankees team is beginning to break up. I don't like to get just white players, so I would much prefer to hand over a strong club to my successor."

"In several departments of the game the club must be rebuilt, notably in the field."

"Good pitching has made the Yankees here, been a big asset in winning three pennants, but pitchers cannot go on forever."

"A regular member of the all-star pitching staff that has done big things for his club are beginning to slip. The fact that a couple of the vets are going back is very pronounced."

Pitchers Have Run Their Race

"Herr, alone of the Yankees' staff, is a young man, and he is a veteran in the art of pitching experience."

"My club has not been very fortunate in getting good pitchers, and has been picked on. Conditions have reached the point where the owner of the club must go out and buy up the best pitchers, the minor league leaders, and the like. The personnel of the Yankees must be reorganized."

"Thought must also be given to the position of shortstop. Everett Scott, one of the greatest defenders of all time, is fast showing up. His great defensive record has earned a certain toll."

Everett Scott on His Last Legs

"Looking to the future, shortstop is one position that must be considered. A new shortstop who can step right in and fill the bill, is very necessary if the club is to continue a pennant contender."

"A matter of fact, the Yankees as a team are static and must be given an infusion of new blood to carry on."

"It is going to be a tough battle to win this year. If my club runs over the crease, it will come to help, the veterans, particularly the pitchers."

The Yankees are liable to be staggering at the close of the present race. I don't want to quit a club when it's greyed and on the ropes, otherwise it would be mortals for me at the finish of 1924."

HURRICANE FINISHES SICILY

On July 15th, the British island of Sicily, off the volcanic chain of Pantelleria, Sicily, the Italian cruiser Olfato of 250 tons, sank in the Mediterranean during the storm Thursday.

The crew is reported rescued by a Japanese steamer, but airplanes, dirigibles and steamers were dispatched to the spot where the cruiser went down.

Daily, six months	3.00
Daily, one month	.60

Filer is afflicted with an old-time pest, chicken thievery. But they do not treat them as rough as they do Hagerman. In this latter city they place a gun loaded with buckshot in the cherry trees and when the thief comes along he pulls the trigger when he enters the orchard which sends a load of buckshot into his body. If these Hagerman friends would just use bird shot the deed would not be so dastardly and if Filer would set a steel trap for the chicken thieves and pinch them about the toes or the fingers it might be a good lesson in "paying the idler."

The Twin Springs resort seems to be growing in notoriety and its manager has been in the limelight previously in connection with a rooming house here. It seems strange that this Dawson gang cannot be brought to justice more speedily than the present suits seems to indicate. It is little wonder that our courts are criticized and our peace officers blamed when such people succeed in keeping from justice and the penitentiary of our country and state. We are told that justice is exacted much more quickly in Canada and Great Britain and therefore criminals fear the law and the punishment handed out much more keenly than in this country.

Again we read of a promising young man of Filer getting injured in an automobile accident when this fire blew out in the neighborhood of Hurley. This only reminds us that it is remarkable that the number of injured and killed does not mount up from year to year several times as great as it is. So many drivers and so many flavors of various degrees and types are on the highway today that it seems to be a miracle that more people are not killed and maimed for life in this congested right of way which is a public thoroughfare for all comers. We are told that 14,000 persons were killed by autos in 1922 in this nation and yet when we consider the number using the road we are really surprised that this number is not double.

The band concert last evening in the Twin Falls city park was a splendid diversion from the regular routine of our humdrum life. It was augmented by the splendid end evening which made it very pleasant for those wishing to listen to the music. Such musical groups are worthy of consideration by the business and professional interests of our city and should be supported just as well as many of the other community movements which come along from time to time. Twin Falls has a good band and the younger boys and girls should be encouraged to learn to play in order to have a good musical organization in the future. It is commendable that these musicians are furnishing this splendid music without one cent of compensation.

Twin Falls fans will be treated to some good baseball games in the next few weeks. Arrangements have been made to bring light here for some twilight games and Bill has a strong team. This will make it possible for those who object to Sunday baseball to help the national sport and yet not violate the Sabbath injunction. American Falls will play here again, and looking over the score for their last game it would seem that they have a team worthy of the time of the average fan in this "bus" league contest. When a baseball game finishes with the score of 1 to 0 it seems to us that it is a pretty good stand and certainly worthy of consideration. Let's support baseball along with the other good things which are coming to our city.

MAY BE CAUGHT IN THEIR OWN NET

(By JAMES D. WHELAN.)

The republican politicians are very evidently now trying to play the same game nationally which worked successfully in the greater part of the state of Idaho last year, and in 1920, namely to throw as much support to LaFollette in certain sections as possible in hope of getting in between the divided forces of the opposition.

Last year, it will be recalled the republicans raised the cry, "Alexander is slipping;" this was caught up by progressives and where not combatted Alexander did slip.

Now we find republicans meeting their LaFollette will get more votes than Davis and the amount of money thus reported to be offered sounds very suspicious. Whatever else may be charged to LaFollette it has never been imputed to him that he received huge political slush funds from trusts for campaign uses. And the sort of bets now freely offered in some quarters according to reports are the sort that are generally put up by big interests on the eve of election to influence votes.

And this early and very suspicious circumstances may indicate that there will be a change in tactics later in the year.

For instance, early in 1918, Frank B. Goding, in an interview published in the Spokesman-Review of Spokane, attacked the Wilson administration... The evident purpose of this was to alienate the non-partisan league from the democrats. Later in the year he presented himself on the value of his co-operation with the administration, refused newspaper space to give views on the adminis-

STONE MOUNTAIN — GIANT CAMEO OF HEROIC SOUTH

SPLENDID in its magnificence, challenging the sculptural efforts of all ages by its very vastness of conception and execution, another section of the Stone Mountain Confederate Memorial will be unveiled in mid-June. At that time, shortly after the anniversary of the birth of Jefferson Davis, president of the Confederate States of America, the completed heads of Davis and Stonewall Jackson will be revealed.

In the months immediately preceding the Daughters' of the Confederacy's annual meeting at Atlanta, the Daughters of the Confederacy will present to Confederate military leaders Lee, to a panorama of military splendor, carved in full relief, 1,350 feet long and containing about 700 figures, which will appear a tedious evolution, but in reality it represents a single bold leap of the imagination of the sculptor, Gutzon Borglum.

His every creative instinct fired by the enthusiasm of the post-war period, he has planned a series of scenes which will be easily grasped and grasp the gift of the South and of Borglum to memorial art of all time.

Mountains of Gold Stone

During all the "ages" since the laboring earth disengaged it bare to man and woman, he has been compelled to make considerable changes in the face of Stone Mountain. Situated sixteen miles east of Atlanta, in De Kalb County, Georgia, it is as its name implies, literally a mountain of granite in the world. It is 2,600 feet long, seven miles around the base, and a mile to the summit up its sides. It is bounded on the north by the Little River, a tributary of the Georgia, and its substrate have been encountered 250 miles distant. It is across this mammoth page of rock that Borglum has carved his masterpiece, a veritable tribute to the men and women who fought and suffered for the ideal for which this Confederacy stood.

The first section, which was invited by the United Daughters of the Confederacy to visit Stone Mountain and pass upon the suggestion that a column of General Lee be carved on the side of the mountain, the real idea was given birth. Gazing upon the mighty back ground, looming a thousand feet above him, the sculptor received an instant impression that a single figure on such a vast expanse would be entirely too small.

With characteristic frankness, Borglum gave the opinion that the head of Lee should be the death knell of some vast business scheme. But he was dealing with a group who were averse on every point to anything which could be construed as dissension. They compelled him to produce a plan by which the face of the mountain could be made to tell of the grandeur and valor of the Confederate armies.

Panorama Recommended

Accepting the challenge, Borglum began to make a study which took into account every foot of its great contours. This study produced his startling recommendation for an heroic panorama, which would be a vast cross section of the entire military organization of the Confederacy.

It was something more than a daring sculptural inspiration—it was an enormous engineering feat as well. And it these same exciting phases, bursting into play the romance and drama of the drama, little associated with the other arts, that have centered upon Stone Mountain the attention and interest of a vast army of people to whom the "purple mountain majesty" would have appealed but lightly.

Without the panoramas of which it will be a part, the central group alone would outlast all others. The head of Lee's figure, of which the head only has been completed, will be nearly 200 feet high from the crown of his hat to the top of his helmet. In front of this is a two-story office building. The head of Lee covers an area of 30 feet square. The central group, representing the seven figures representing the Confederate high command, will cover an area of one and one-half acres or 60,000 square feet.

Ingenuity of Borglum

The question that arises here is how are such tall figures to be roughed out of the solid granite? The particular face of a granite mountain, hundreds of feet above ground. In solving that very problem Borglum proved his ingenuity, which was usually associated with art or sculpture. He had specially designed and presented to the Memorial by Edwin Porter of the Precision Machine Company. One dark night "the power" was used to bore a deep hole through the granite, which was and in the distance there sprang into being the dream

of Borglum—the Confederate high command, mounted on steaming horses proportioned to their riders. Another revolutionary step in sculpture had been taken. A problem which seemed insoluble had been solved.

With the image held steadily to the face, the primitive, workmen-like tools of the masons, plumb and square, the masons stepped down the mountain, silhouetted. In the morning the outlines of the group appeared in white, and the work of "carving" the images was begun.

The hewing, picketing method will be employed in outline over etching.

With the completion of the heads of Lee, Davis and Jackson, the artist will proceed to the carving of the body of General Lee down to the saddle. Borglum's contract calls for the completion of the

head, and the completion of the body will be left to the artist.

With the completion of the heads of Lee, Davis and Jackson, the artist will proceed to the carving of the body of General Lee down to the saddle. Borglum's contract calls for the completion of the

The estimated cost of the varieties for the purpose in the center of plan is \$2,000,000 and a highly valuable Memorial Hall, expensive the most valuable feature of the mountain of iron. Gold will be used to construct this one, so that in the proprietorial intent of any future owner it need hardly affect the value of the land.

Land acquisition is the next item in the field.

The Memorial fund was launched by the United Daughters of the Confederacy, Atlanta, April 26, 1923, with a collection started by the governors or their delegates representatives of all the states, composed of the Daughters of the Confederacy. At that conference the map of the entire South was enthusiastically plotted, and an monument to the Confederation was recommended to the organization with reference to the raising of funds to build and maintain a Confederate Memorial.

One individual states that since the fund has progressed rapidly, and at a stage that the original amount of \$1,000,000 is no longer required, the amount required will be made available without the employment of any unusual solicitation methods.

There are three methods of raising money for the fund. The first, known as the "Founders' Hall," is for individuals, family groups, patriotic organizations, civic clubs, business firms, insurance companies, contractors, groups, authorizing \$1,000 each.

The second method is the "Children's Fund," founded by the "Daughters of the Confederacy," for boys and girls up to eleven years of age, who contribute \$1.

The third method is the sale of the Stone Mountain Memorial half-dollar, authorized by Congress, the coins to be sold as souvenirs for one dollar each.

These are three methods of raising money for the fund. The first, known as the "Founders' Hall," is for individuals, family groups, patriotic organizations, civic clubs, business firms, insurance companies, contractors, groups, authorizing \$1,000 each.

The third method is the sale of the Stone Mountain Memorial half-dollar, authorized by Congress, the coins to be sold as souvenirs for one dollar each.

This has been done about the here-to-keep a desolate feature of the creation of the memorial, which is the removal of the trees, which is a costly and painful process, but one of unparalleled difficulties.

The machinery used in the operations of the perpendicular precipice will be suspended in slings from the summit. No explosives, except for fear of blasting, porting off the top of the mountain. The machinery will be suspended from the top with the utmost precision, for once damaged, the material on which the figures are being carved could never be replaced.

Since Memorial Hall is to be immediately below the central group, it will not be possible to begin its excavation until the several heads of the high command have been completed. At the present time there is a continual cascade of granite down the face of the mountain, about every frontage of the institution for Confederate Hall to be made.

Chamber in Solid Rock
Third incisions will be made for removing the granite in the creation of Memorial Hall, and will be made in the form of the wings and central entrance, each opening being dedicated to a Confederate State. Running for a distance of 320 feet parallel to the base of the mountain, the hall will be 90 feet deep, and 10 feet in height from floor to ceiling.

No building material of any description will be introduced except the granite which is to be cut and stained green in the windows. A broad granite escalator will sweep across the front, being formed by cutting a shelf into the mountain, while at the crest of the horse, the depth will be twenty feet. The depth of the greatest height in the middle of the staircase will not exceed four feet.

The top of the stairs in the central group will appear 300 feet below the summit of the mountain, while the figures of the soldiers will be 300 feet above the plain.

Yet Difficulties
Probably never before has sculpture been attempted under such

unusual conditions. Removal of the granite around the figures pitted upon the face of the mountain is a strenuous quarrying job, but one of unparalleled difficulties.

entire central group by the spring of 1924.

Hall and Amphitheatre

But the panorama is not all of the memorial plan. Two other features, either one of which would in itself constitute an unusual and tremendous monument, are Memorial Hall, to be quarried out of

the granite, and the amphitheatre, where the armies mobilizing around their leaders. At the top will be the cavities, appearing as if coming from beyond and dropping down over and to the left heroes that were to be the world procession of men, horses and guns.

Moving downward against the face of the mountain will appear the cavities in strikingly varied

and motion, and in the center, where the precipices bulge forward, is being carved the central colossal group.

Swinging away to the left is the group of the high command, upon a column of gray-clad granite, truly symbolized in the gray granite of Stone Mountain.

To Portray Generals

In addition to the major figures of the Confederate high command, there are also to be included in the structure, the individual likenesses of sufficient size and power to meet those exacting requirements, produced by National Carbon Company.

It is the plan of the Precision Machine Company to have the figures specially designed and presented to the Memorial by Edwin Porter of the Precision Machine Company.

One dark night "the power" was used to bore a deep hole through the granite, which was and in the distance there sprang into being the dream

of Borglum—the Confederate high command, mounted on steaming horses proportioned to their riders. Another revolutionary step in sculpture had been taken. A problem which seemed insoluble had been solved.

With the completion of the heads of Lee, Davis and Jackson, the artist will proceed to the carving of the body of General Lee down to the saddle. Borglum's contract calls for the completion of the

head, and the completion of the body will be left to the artist.

The third method is the sale of the Stone Mountain Memorial half-dollar, authorized by Congress, the coins to be sold as souvenirs for one dollar each.

Memorial Tablets

A "Founders' Hall" subscription carries with it a bronze tablet to be permanently bolted to the wall inside of Memorial Hall. On this tablet will be inscribed the name and rank of any Confederate soldier or military unit. There is wall space for 2,400 such tablets, making a possible income from this source

of \$2,400,000.

These tablets are being taken at the rate of from \$100 to \$200 each, according to size and quality.

The fourth method is the sale of the stone tablets, each approximately one-half inch square, and a bronze tablet to be placed on the wall of the amphitheatre.

The fifth method is the sale of the stone tablets, each approximately one-half inch square, and a bronze tablet to be placed on the wall of the amphitheatre.

The sixth method is the sale of the stone tablets, each approximately one-half inch square, and a bronze tablet to be placed on the wall of the amphitheatre.

The seventh method is the sale of the stone tablets, each approximately one-half inch square, and a bronze tablet to be placed on the wall of the amphitheatre.

The eighth method is the sale of the stone tablets, each approximately one-half inch square, and a bronze tablet to be placed on the wall of the amphitheatre.

The ninth method is the sale of the stone tablets, each approximately one-half inch square, and a bronze tablet to be placed on the wall of the amphitheatre.

The tenth method is the sale of the Stone Mountain Memorial half-dollar, authorized by Congress, the coins to be sold as souvenirs for one dollar each.

The eleventh method is the sale of the Stone Mountain Memorial half-dollar, authorized by Congress, the coins to be sold as souvenirs for one dollar each.

Has Long Suit.

He has a waist amount of money, but

he has only \$2000 in his pocket.

One day he was asked if she

was tired of art. "Pond of art" she

exclaimed. "Well, I should say I was."

I'm an artist in a city where there's

an artist, I want to visit all the

times.
