Shoshone Falls Is Urged
For National Or State
Park by A.A.E. Meeting

Convention Adopts Suggestion of Welcoming
Speaker; Grandeur to be Perpetuated; As-
surance Is Given That Owner Will Turn It
Over for Purposes; Oil, Water, University,
and City Managers Are All Considered;
Banks to Have Last Paper.

Recommendation that a commission to advertise the scenic
beauty of Idaho, endeavor to have Shoshone Falls, created into
a national park, and that steps be taken to carry into effect
the plan for preserving the waters so that the grandeur of the great
cataract shall be preserved unimpaired during the irrigation season,
was contained in the report of the committee on resolutions
adopted by John Chapter of the American Association of Engi-
neers here at noon today. The idea was suggested yesterday in
the address of welcome by John W. Graham, Burton E. Morse,
of this city, assured the meeting that Fred J. Adams of Minneap-
olis, who owns the falls, had already worked out a plan by which
benefitification through an engineer and declared his willingness
to donate the right of water or water to a park.

The resolutions committee, to
which the recommendations of
the committee on resolutions
outlined in The Times yesterday
were referred, modified several
of the resolutions and recom-
mended that the committee
disposed of the endorsement of
the city manager. The committee
to study all forms of city govern-
ment in view of Idaho conditions;
referred for further con-
sideration the matter of regis-
tration, which was previously
endorsed; the plan for a com-
plete landscaping library for the
city manager; referred to the
latter committee the proposal to
shorten the penalty limit on re-
solutions; referred to the latter
committee the plan for an "approval"
for securing the right of water
referred by Will H. Gibson of the
utility commission and thanked
the speaker for his address and
expressed cordial wishes.

High Interest was aroused in the
declaration of Donors for the
fund regarding investigation in the
oil and gas situation, wherein
high interest was shown. There
were evidences of this in the
Southern area, particularly in the
southern part of the last named
section. He told about the widespread
interest in the oil and gas situa-
tion in the state, and predicted that

Help Her If He Could.

SAN FRANCISCO, Cal., Jan. 17.—
San Francisco was aroused today
as it seldom has been over the case
of Dorothy Elingson, the 16-year-
old "Zippian" who shot to death
the teacher who objected to her
participation in a life of mad gals.
Social workers, police and fed-
eral officials and public organiza-
tions were busy trying to answer
the question of what should be done.
Action thus far has consisted of
the arrest of four of Dorothy's
"chickens" and the arrest of 13
others; arrest of Max Fitzgerald,
her companion; a plan for a general
re-arrest of all girls who are on
probation; and rigid in-
vestigation of sale of liquor in
out of the way, all cases.

Plans for Dorothy's appearance in
court were modified today.
Under California law she is to an-
swer first to the juvenile court but
Judge F. J. Murray has announced
he will remand the case to the ap-
pellate court. "This seems to be too
serious and surrounded by un-
usual circumstances that it should
go to the regular criminal court,"
said Murray. "Investigation was
made in Minneapoli's where the girl

Animal Fund Is
Done Away With
by Idaho Solons

BOISE, Jan. 17.—The predatory
animal fund, based at Hiram, Kan.,
has met its end here today.
Thursday complied with a request
of the state legislature to
association and abolished it.
Introduced by John Madrony of
Hiram, Kan., the bill was passed
by the legislature today.
The fund was established by the
legislature in 1910 to provide
money for the purchase of
predatory animals. The fund
was to be maintained for a
period of 10 years. The
legislature today voted to
abolish the fund and to
return the money to the

Prospects Bright for Better Horses

Both farm and city are demanding more and better horses, according to the South-Household Agricultural Foundation. On January 1, 1924, there was 13,235,233 horses, compared with 12,555,000 six years ago. This was the smallest number since 1907. \$311, 177 per cent of all-weld work is done by horses and mules. Annual 1915, under the influence of almost all production and replacement mechanical power, horse production declined. In 1925, the average value per head was the lowest since 1907. Milk prices, unlike horses, advanced during the war, reaching their peak in 1922. In 1923 there was a third more horse and mule sold than during the previous year. Good mares and stallions are scarce. During the war horse breeding languished. The number of colts produced failed to keep pace with the increase in demand. Between 1910 and 1925, horse and mule colts combined increased 22 per cent, but during the last three years there has been a decided trend in the opposite direction.

KEEPING WELL

SAVE THE BABY'S NECK.

STAMPING OUT tuberculous is saving our babies' necks. Tuberculosis may affect any part of the body, but the lungs are the most common seat of the disease. The loss of the lungs is called consumption, because the lung tissue was consumed or destroyed, and great cavities were formed in the remaining tissue. Tuberculosis of the skin was called leprosy, or wolf, because the skin became reddish-brown, like a wolf's coat. Tuberculosis of the glands was called scrofula. In England, it was for centuries called King's Evil, because it was believed that it could be cured by the touch of the king. So the word of cure for this disease was brought to the king for cure. Some of these children recovered or improved, because they were carried away to the mountains where the fresh air and the sun's rays were thought to have done otherwise. But it wasn't the king's touch that cured them. King William of Orange, who died in 1702, was the last English king who touched for the disease. His cure was the result of his ability to give the patient whom he touched the word, "God bless you." It was the word that cured them. Haynes to Be Replaced As Prohibition Commissioner

WASHINGTON, Jan. 17.—The situation in Washington was calmer today after official pronouncement from the White House that Secretary Herbert Hoover would continue as head of the department of commerce and that the president expected, for the time being, no further changes in important posts.

The capital is still ending one of the most unquiet weeks in its history and its nerves are jumpy. Reorganization and reorganization kept its nerves in a state of tension. The fast-moving man in the White House was going to do and what public officials would be next to do. Late developments were that federal prohibition Commissioner Roy A. Haynes is slated to be replaced soon by congress votes on the Cramm bill to make an independent department out of the prohibition bureau and that General Frank Hines will resign his head of the veterans bureau. Arthur Woods of New York was talked of as Haynes' successor, but he denied the post had been offered him. Governor George Leonard Wood, who was talked of once before when enforcement conditions were scarce, was again spoken of but with little conviction. Theodore Roosevelt Jr. was mentioned in connection with Haynes' succession. Roosevelt is at present available but the president's choice may land on him. Secretary Hoover's last statement clearly refused to accept the secretary post was explained today by his friends as planned resignation. Hoover had many children in the world. He was a very busy man. He was a very busy man. He was a very busy man. He was a very busy man.

DEER SEASON ON KAIBAB FOREST IS SUCCESSFUL

ODDISH, Utah, January 17.—During the period from November 16 to January 1, there were 675 deer, principally bucks, killed on the Kaibab National Forest by 11 men, who were given authorization to kill, states J. H. Patton, district forester. Most of the men had as their objective three deer. From the figures it is clear that the law was obeyed. All hunting was well away from sections visited by tourists, no shooting allowed by hunters. The hunting area was divided into sections and the hunters were carefully supervised. This riding indicated that the hunters were being watched carefully, as very few wounded deer were found.

From the viewpoint of the Forest Service the kill was less than is held desirable as the number killed is only 2 1/2 per cent of the estimated number ranging on the forest. This small kill will not serve to materially relieve the overgrazing of the deer range, and with the usual increase of 3 per cent each spring the situation will be no better than this year. It is still possible that starvation this winter will make up for failure of the hunters to seriously reduce their numbers. However, the season allowed the deer to scatter away from the water holes and helped the situation materially. If winter conditions are such that serious starvation losses do not occur, the situation will still remain critical due to continued overgrazing of the range by deer and the resulting reduction in grass production. More deer should be shot to distribute the deer more widely.

This situation was brought about by the interests of the season during which the forest was open to the cooperative hunters, and the inclement weather during the last two weeks of this season. Another year it is hoped that the reason may be opened earlier and with complete cooperation by the state, under which circumstances the shooting could be given a valuable means of holding the deer herd to areas where it will not consume the forage on the Kaibab Forest more rapidly than it grows.

IDAHO TAX LAWS INCONSISTENT

The following resolutions were adopted by the county commissioners of Idaho in their convention in Boise last week and deserve consideration.

Whereas, the tax burden is becoming unbearable and in many cases amounts to confiscations and whereas we believe that some changes should be made to our laws and the execution of them, be it, therefore,

Resolved, That we recommend the passage of a severance tax and a levy of 5 per cent of the actual value of all our natural resources, such as lumber, ore and electricity, as they leave the state. The proceeds to go to the school funds, to be divided as follows: 25 per cent to the state institutions and 75 per cent to the county for public school purposes, to be proportioned according to the school census.

We recommend the repeal of section 3212 of the compiled statutes, pertaining to county liability for state taxes. Each county is liable to the state for the full amount of all state taxes apportioned to such county by the state board of equalization, and such taxes must be paid to the state in full without deductions before the second Monday in July of the succeeding year.

We recommend that a committee of three county commissioners be elected by this convention to attend the meeting of the state board of equalization to represent the counties and defend the assessments as made by them, and insist that the public utilities be assessed on the same basis as other property in the various counties.

We recommend that a law be passed requiring all licensed auditors engaged in public accounts be bonded, guaranteeing the correctness of their audit as pertaining to all matters of record.

We recommend that section 3282 in regard to assessing of state land, be amended to read as follows: 'Equities in state lands shall be assessed the same as other lands of the same character, the amount due the state to be deducted from such assessment.'

Twelve states and the federal government have income tax, and it has been demonstrated the most effective way of requiring people of substantial incomes and little property to pay their share of the cost of schools for the education of their children. Those that pay no property tax should be made to pay on incomes of over \$2500 a year.

We recommend that terms of office of county commissioners be changed from two years to two, four and six years.

We ask for drastic legislation in the enforcement of the prohibition act.

We recommend that section 1360, compiled statutes, be amended to read \$500 in place of \$100. (This limit above which cost of repairing or construction bridges must be authorized by county commissioners.)

Whereas, it has been called to the notice of the convention that an appeal from the action of the county commissioners of Jerome county, acting under the provisions of section 3403, compiled statutes, in making a lease for premises to be used for court house and county offices, has been sustained and lease declared void, and whereas, the provisions of said section are so vague, ambiguous and indefinite, now therefore, be it resolved that this body go on record as favoring and urging an amendment to said section 3463 which will clarify the situation and give boards of county commissioners definite authority for providing court house, jail and such other public buildings as may be necessary and the proper furnishing of the same.

The resolutions were drafted by a committee consisting of Henry Beck of Canyon county, John R. Williams of Bingham, Ed C. Rich of Bear Lake, Otto K. Blackaby of Owyhee and B. E. Dyar of Gooding.

Chapter III

Every morning throughout November it was the same. At six o'clock: 'Mrs. Peake, oh, Miss Peaker, it's you!' solina would call in what she meant to be a nice voice, through fatiguing teeth. 'Mrs. Peaker come down and dress for the day, you see the stove?' Perching down the perforations in the floor-hole through which the party clothing slipped, solina could vaguely discern Mrs. Peaker standing just below, her face upturned. 'That's my morning!' on hearing this invitation, solina had been rucked between humor and wrath. 'I'm not even ready. I'm almost dressed. It's been down directly.' Marjorie Peake must have sensed some of the 'look' in the girl's voice, for perhaps even some of the ruckered. 'Toad and Jakob are long of already cutting. Here back of the stove you can dress warm.'

FOREST CASH FOR HIGHWAY IS ASSURED

Assurance that \$75,000 of forest money now available to fix the road from Warm river, near Ashton to the Salmon falls, near Coeur d'Alene, is being received from the U. S. Department of the Interior, to President Walter Mead of the Old Oregon Trail Association, who is here attending the Idaho Engineers meeting. An effort will be made to have Montana improve about six or eight miles of road from the line to the west extent of the Yellowstone park, and thus create a great feeder for the Old Oregon trail from that direction.

The Old Oregon Trail Association has a view of concluding arrangements for making the Oregon trail the western connection of its system. This will add several thousand to the number of cars that will pass through Twin Falls during the coming year. Traffic over the trail increased 50 per cent last year over 1923 and a good increase is expected for the present year.

The supply of 20,000 staked sticks of wood for the trail is estimated to be 400,000 in addition to the history of the trail.

EAGLE BANK ROBBER PLEADS GUILTY TODAY

Sweeley Replies to Rate Association on Gooding Measure

Former President of the Public Utilities Commission Fails to Agree with Conclusions Drawn by Organization at Spokane and Reproduced in The Times; Covers Criticisms of Former Interview by Implication.

Replying to the plea for the enactment of the Gooding bill on Gooding in a pamphlet received Monday in Spokane and published in the "Times" on that date, and covering by inference and criticism of his attitude in opposition to the Gooding long-ago short-hand measure for the rate of the Idaho utilities commission, this is to say:

A. C. Sweeley, Intermedial Association, issued at Spokane, Washington, carried the title, "Shall the Railroad Rate be Fixed?" and J. H. Jankins the Panama Canal and Destroying Boat Competition." It is chiefly remarkable for the disclosures that it does not make. The questions that we in this valley are invited to consider are: (1) Is the mountain country area really concerned with rate?

(2) If the rate bill threaten favorable result to the freight rates of our outgoing products?

(3) If the rate bill let us in for future car shortages?

(4) If the rate bill will have upon the development of our market of our own?

We are producers of basic products for the world. We are not a mere market and from which we must pay for our products. We are not a mere market and from which we must pay for our products. We are not a mere market and from which we must pay for our products.

IDAHO PROBLEMS THEMES AT THE ENGINEER DINNER

Various "Times" of Similar in (Item) State Area Hereafter at the Gathering Last Evening Song and Story. Chief the language follows.

Mirth, mirth and eloquence characterized the banquet given by the Chamber of Commerce, under the direction of the Forum committee, to the Idaho chapter of the American Association of Engineers at the Forum last evening. The banquet, which was in the nature of a thanksgiving dinner, was well planned and well served. The speaker, Mr. E. H. Booth, led the community in a fashion that got every body doing team work enthusiastically. The musical numbers by the quartet composed of Mrs. D. I. Alexander, Mrs. W. Zenas Smith, D. A. Salmon and Nelson Hayward were much appreciated, and the Society of Engineers at the Forum, the sons of Mr. Hayward were received with warm applause. Mrs. Fred Boyd, Jr. played the accompaniment for the quartet, and Mrs. Alexander for the piano.

Wilson Introduces Baldwin.

After this Wilson introduced George Baldwin, who had just returned from the States. He is a member of the American Association of Engineers, and the Secretary of the Idaho chapter. He declared it to be in the duty of the engineer to secure the best of his country, and to secure the best of his country, and to secure the best of his country.

CAR KILLS SEVEN YEAR OLD SON OF O. E. HOUSE TODAY

The 7-year-old son of Oscar E. House, who lives on Second avenue east, was fatally killed at about 10:30 a. m. today near the Coeur grocery on Main Avenue east by contact with an auto. The auto was backing. See for how he was driving it a few coming toward the city. A number of boys playing on Main street. They slowed down the Ford to eight or ten miles and then hit the boy. The boys got out of the way and the car jolted and stopped in a short distance. Only to see that the boy lay with skull broken and blood running out of his head. They picked up the boy and took him to a doctor's office, but he was dead by the time of arrival.

No report was made to either the sheriff's office or police until about 2:15. Coroner P. J. Grossman, went to the scene and found the boy had got any more facts than those set out above. The doctor said he knew the boy and thought he was a doctor's office, but he was dead by the time of arrival.

The skill was broken at the base of the skull. The doctor said he had seen the boy and the boy did not see one another. There is some difference of opinion as to whether the boy was walking on a sidewalk or walking across the street.
