

### GERMANS WILL BAR IN EUROPEAN ART ELECTION

Monarchists Will Not Press One of Wartime Hero for President at Coming Elections; Plenty of Candidates Are Out, But Two Preferred.

BERLIN, March 9.—The "antiform" will probably be barred from the German presidential election, scheduled for mid-year.

While the monarchists would schedule one of the wartime heroes running on a "true German nationalistic" platform as monarchist, they are understood to be prepared not to press such plans.

Two present two candidates are being nursed along by the monarchist crowd—Captain Loebner of the 22d regiment (Los Angeles) and Wilhelm Cuno, director of the Hamburg-Berlin railway.

On the other side of the battle, Chancellor Marx is strongly favored as a "republican" candidate.

Monarchists hope that they can win in the presidential elections so that, with a monarchically-minded cabinet, they can proceed on their path of reconquering the privilege and the power of the Kaiser.

### England Too Poor So U. S. Takes Over Her Explorations

LONDON, March 9.—Great Britain is as the world's country for scientific exploration—as the land of Cook and Darwin and of the American contributions to science.

Almost every one of the world's former sea to Egypt, Asia, India and Greece from the United States.

LONDON—Air Minister, Board and Colonial Secretary, Amery will leave soon on an official inspection tour of the Middle East.

### Idaho Leads States in Seed Production Four Consecutive Years

Nearly Half of Cash Prizes of Great International Hand-Grain Show—Held in Chicago—Have Been Won by Gem-State; The Large Variety of Alfalfa and Clover Seeds Creates Increased Demand for the Idaho Product.

SALT LAKE CITY, March 9.—This is an Idaho story for Idahoans primarily, but it is of interest to every one interested in agricultural advancement in the intermountain west, and, for the premises here understood at the start—any state able to take 45 per cent of its production in five consecutive years deserves such recognition.

The student has been awarded the first prize in alfalfa seed production in the world, and the American grower in the world producer of alfalfa seed.

### Australia Finds Way to Put Her Idle Men to Work

WASHINGTON, March 9.—A system inaugurated in Australia last year of training unskilled laborers as a means of overcoming shortage of skilled workmen and at the same time according to a plan of training for the unemployed.

On the other side of the battle, Chancellor Marx is strongly favored as a "republican" candidate.

### General Mitchell's Policy Endorsed by Connecticut Senator

Senator from Connecticut Advocates Policy of Federal Government Directed by General Mitchell After Watching Demoralization.

WASHINGTON, D. C., March 9.—Development of national defense policy similar to the one advocated by Brigadier General Mitchell, assistant chief of the army air service, has been recommended today by Representative O'Sullivan, democrat, of Connecticut, who represented the anti-aircraft demonstrations last week at Fort Rucker, Va., in an official report on the results of the tests.

GLASGOW—David Kirkwood, 24, tonight succumbed to the house of commons when he beheaded a woman.

### SENATE WILL HAVE TROUBLE SEATING STONE

Many Senators Are Anxious to Leave for Home and Old Guard Will Have Hard Time to Hold Majority for Seating Stone and Ousting Trio.

WASHINGTON, D. C., March 9.—The full session of the senate today was ruffled—today to report senate instructions against the collection of Charles Becker Warren.

Three members of the ex-communicated quartet expect to take the floor in support of the entire matter is to be taken as a court trial—with Brookhart, and Francis pleading their own defense.

They contend that the entire procedure, with their constitution of full legislative representation and is comparable to the famous motto of the revolution "taxation without representation."

### TWIN FALLS MAY GET T. B. HOSPITAL

Twin Falls may have the tubercular hospital as a result of the action of the state in adopting the bill providing for a tuberculosis hospital.

### Wait a Year to Pick Fruits of the Sun's Eclipse

A CHARLOTTESVILLE, Va., Mar. 9.—At least a year must elapse before astronomers know exactly what they learned from the eclipse of the sun on January 24, according to Dr. B. S. Mitchell, director of the Lander McGehee observatory.

THE KANSAS RELAYS  
LAWRENCE, Kan., March 9.—The Kansas relay outdoor track meet in the middle west will be held here, April 15, according to track officials at the University of Kansas.

### CHAMP SHOT LIFTER

TOKYO.—One of the claimants for the Olympic torch was shot and killed in a department store, where he was found.

### U. S. SUIT TO BREAK NAVAL LEASE IS ON

Cheyenne Is Filled With Attorneys and Court Attaches in Trial of Government to Break Lease With Sinclair on Teapot Oil Dome.

CHEYENNE, Wyo., March 9.—The government's attempt to break the lease of Harry F. Sinclair on the Teapot dome tract of oil reserves started today before Federal Judge T. B. Keenan.

A two months' suit for Colonel Stewart, chairman of the Board of Directors of the Sinclair Oil Company of Indiana, was identified with the government today.

Federal attorneys have ordered their presence in Cheyenne and are to make a final effort to locate the missing oil man.

### Fishermen Perish in Iceland Gale

LONDON, Mar. 9.—Seventy-six fishermen perished in the terrible storm off Reykjavik, Iceland, says the Central News agency from the city.

### Coolidge Acts as Arbitrator for Chile and Peru

WASHINGTON, D. C., March 9.—President Coolidge is arbitrating the controversy between Chile and Peru over the sovereignty of the provinces of Arica and Antofagasta today.

### SCHOOLMASTERS CLUB ORGANIZED AT BUHL BANQUET

BUHL, March 9.—Thirty teachers and superintendents representing the schools in all sections of the Idaho Southern Railway district met at the Buhl banquet.

### BORAH FLAYS REPUBLICANS

IDAHO SENATOR SEVERELY CRITICIZES SPEECH MADE BY REPUBLICAN LEADERS AT WASHINGTON, D. C., MARCH 5.—Republican leaders were flayed for their speech today by Senator W. E. Borah, Idaho, republican, in a scathing speech today.

### League of Nations Council Faces Inter National Problems

Many International Problems Face Council of League of Nations at Their Opening Session Today in Geneva; Among the Most Serious of These Problems Is Lord Balfour's Proposal Involving England, France, Belgium, Italy and Germany.

GENEVA, March 9.—The council of the League of Nations today opened its ten-day conference during which the most important international problems confronting Europe—that of security—will be considered.

THE KANSAS RELAYS  
LAWRENCE, Kan., March 9.—The Kansas relay outdoor track meet in the middle west will be held here, April 15, according to track officials at the University of Kansas.

## JACK DEMPSEY ACCEPTS N. Y. COMMISSIONS CHALLENGES

Richard Commission Have Two Big Bouts on Their Hands and Don't Know What to Do with Them; May Call on Tax Rickard for Help.

BY HENRY L. PAIRRELL.  
NEW YORK, March 9.—Jack Dempsey's reply to the New York boxing commission accepting the challenge of Harry Wills and Tom Gibbons, pushed the commission down into a hole of its own digging.

The commission now has two perfectly good heavyweight fights—worth more than a million dollars—on its hands and it does not know exactly what to do with them.

Richard said today that he might take a shot at a Dempsey-Wills fight, but he was not very enthusiastic over it. He said he was not in the business to do a prand of money and that it was all a mere display of exhibition with him.

If he does not decide that it is possible to stage the fight in New York, he will make a bid for it, but it will not be of the size that Dempsey is expecting.

Jack Kearney, said some time ago that he was going to get \$750,000 for Dempsey's next fight, and he believes that he is a little bit "crazy," Richard said. James A. Farwell, the new chairman of the commission, who issued "the ultimatum" to Dempsey that he must accept the challenge of Wills or Gibbons within 24 hours, did the same thing that William Muldoon did in the case of who he may be the champion. Farley, however, may have a better way of settling the matter.

Muldoon ordered Dempsey to accept the challenge of Wills and the samples of the fight. This is the same as the fight that Dempsey fought with the promoter stepped forward and Muldoon did to announce "eventually" that the fight could not be staged.

"I had to run around since with a championship on my hands, and don't want to do it again," Richard said. "In these days you have to pay \$100,000 on the line before you can make a move to stage a heavyweight championship and you have got to be pretty certain you are safe when you put that amount down."

The commission's inaction tomorrow and the reply of Dempsey will be brought up officially. Dempsey's suggestion that the fight be staged in Mexico and guaranteed the fight can not be accepted, of course, and that gives Dempsey the out, if he is looking for one.

The Link.  
"Augh—waugh—gr!" It was the baby, and he had made similar remarks lately for the last hour. Mr. Newport's hair, which was left off its stand on "Glow ah-wa-wa-wa, goo-oo," remarked the baby, lustily, while the people looked on with interest from their seats and closed their windows accordingly. Mr. Newport ground his teeth. "To think he murmured, what a show! I should like to become the father of a train conductor!"

Uncle Eben  
"My ole nodd," said Uncle Eben, "balked in the middle of do road, held up a line of drivers an' kicked at do traffic cop. An' he says he's 'naked' Mistob Meia, you may have a bad disposition; but you sho' has got courage."—Washington Star.

## Fights and Fighters

NEW YORK.—Three bouts of the second round of the lightweight elimination will be staged tonight at Madison Square Garden; Benny Vaino meets Basil Galliano, Jim Goodrich, will meet Clyde Jackel, and Jimmy O'Connell takes on Solly Seaman.

MEMPHIS.—Fight—Arthur and Harry Farnes, Columbus, O., meet in eight-rounds here today.

## BUHL GIRLS WIN SO. DISTRICT BASKETBALL CHAMPIONSHIP

Parma Will Play in Buhl Friday Evening for Inter-District Championship.

BUHL, Idaho, March 9.—The district basketball tournament at Buhl was the first I have ever attended," said the coach of Superintendent Earnest Bloom, of the Twin Falls city schools, as well as many other superintendents and coaches following the final game here Saturday evening, when several hundred people were turned away at the doors because the gymnasium was so crowded.

M. M. Van Patien, manager of the tournament placed checkers at the entrance of the gym by letters, many people attended the game. The checkers, all counting by number, approached the 1200 mark, number of fans brought lunches at the afternoon games and they remained for the championship contest in the evening so as to be sure and see the end of the run by letter.

The spirit of the visiting teams was splendid, according to Manager Van Patien, and the game was one of the best of the season. The Buhl girls' team received much praise as a result of their work on Saturday night in the tournament. Many coaches and school officials declared Buhl was the strongest girls' team they had ever seen in college, university of high school, and if there was any other team in the state, this team should be entered.

The game with Parma here Friday will be played at 7:30 and following this, the sub-district declaratory contest will be held at the high school auditorium.

Harry W. Barry is coach of the basketball team. Previous to this year he coached boys' high school athletics in Buhl for ten years.

Buddhist Bible.  
At Litang, about a hundred miles to the east of Batang, in Tibet, where there is a large monastery, and in the territory of Derge, about 200 miles above Batang, in the Yangtze valley, the printing of religious books is an industry of importance. The Kuehler, which is the Buddhist bible, and the Tanjur, its commentary, each comprising 108 volumes, are printed in the two monasteries from blocks on which characters are carved. The blocks occupy many large rooms, and the printing of one set requires the work of many other many days.

Litang, until recently, there was a copy of the Tanjur which was written out by hand in gold and silver. The paper had first been soaked with Chinese ink. The gold and silver fluids in which the characters were written were made by rubbing the precious metals on a rough stone and making the powder with glue water. It was prepared a few years ago by Chinese soldiers who understood nothing of its value.

Friendship Invaluable  
Paddle your own canoe is mighty good advice; but better is that which admonishes that we help the other fellow. If we are going to be true to ourselves if we would have friends, and friends are an invaluable asset.—Orin.

## Idaho Leads States in Seed Production Four Consecutive Years

(Continued from page 1)

Thus, he the season normal, wet or dry, the Idaho grower goes cheerily about raising prices winning seeds. It has taken Idaho many years to develop this industry to its present substantial position and these years are filled with color. Fourteen years ago there appeared in the papers of Idaho, recalls A. J. Snyder of Springfield, chosen president of the Idaho seed growers for 1925 at their last meeting, who was one of the first to plant seeds and potatoes for seed.

"Seed growing, in Idaho was then in its infancy," Mr. Snyder continues. "The best farmers were poor judges of pure seed; noxious weeds were not recognized; seed dealers were careless; here we no state seed grades; even college trained farmers who understood the value of best seeds, did not know how or where to obtain them. Hand sowing prevailed."

"There were no well established standards in grains, small seeds or potatoes. Neither was there any way or place where, by comparison with similar products grown by others, the average farmer could know whether his products were what they should be or better, or worse, than the market required."

"Idaho was then scarcely known as a producer of clover and alfalfa seeds and not a few farmers sold their best seed at too low a price and then used fallings upon their own land to produce more seed and weeds."

"Unavoidable ignorance, inability to compare and judge, lack of grading and standardization were costing the farmers of Idaho many thousands of dollars and putting some out of business in sections where weeds had increased until seed production had to be abandoned."

Out of the seed show at Idaho Falls there came an embryonic organization which later became the Idaho State Seed Growers' association. As Mr. Snyder recalls, there were 35 gathered for the talks given by experts from other states in growing better potatoes and alfalfa seeds in Idaho. "That year could be grown in Idaho was the visionary dream of a university professor."

These 35 ambitious seed men had no funds with which to organize; they had no known similar organization in any other state; Mr. Snyder declared there wasn't a one who did not feel the need of an organization.

"A board of directors composed of men willing to devote their time and knowledge to the cause, outlined the aims of the Idaho Seed Growers' association and undertook this management of annual seed shows and potato seed shows. The best farmers were poor judges of pure seed; noxious weeds were not recognized; seed dealers were careless; here we no state seed grades; even college trained farmers who understood the value of best seeds, did not know how or where to obtain them. Hand sowing prevailed."

"That year could be grown in Idaho was the visionary dream of a university professor."

These 35 ambitious seed men had no funds with which to organize; they had no known similar organization in any other state; Mr. Snyder declared there wasn't a one who did not feel the need of an organization.

"A board of directors composed of men willing to devote their time and knowledge to the cause, outlined the aims of the Idaho Seed Growers' association and undertook this management of annual seed shows and potato seed shows. The best farmers were poor judges of pure seed; noxious weeds were not recognized; seed dealers were careless; here we no state seed grades; even college trained farmers who understood the value of best seeds, did not know how or where to obtain them. Hand sowing prevailed."

"There were no well established standards in grains, small seeds or potatoes. Neither was there any way or place where, by comparison with similar products grown by others, the average farmer could know whether his products were what they should be or better, or worse, than the market required."

"Idaho was then scarcely known as a producer of clover and alfalfa seeds and not a few farmers sold their best seed at too low a price and then used fallings upon their own land to produce more seed and weeds."

"Unavoidable ignorance, inability to compare and judge, lack of grading and standardization were costing the farmers of Idaho many thousands of dollars and putting some out of business in sections where weeds had increased until seed production had to be abandoned."

Out of the seed show at Idaho Falls there came an embryonic organization which later became the Idaho State Seed Growers' association. As Mr. Snyder recalls, there were 35 gathered for the talks given by experts from other states in growing better potatoes and alfalfa seeds in Idaho. "That year could be grown in Idaho was the visionary dream of a university professor."

These 35 ambitious seed men had no funds with which to organize; they had no known similar organization in any other state; Mr. Snyder declared there wasn't a one who did not feel the need of an organization.

# What's back of this shift in cigarette popularity?

Is it only a desire for change?

Is it a matter of price?

Or is it all a question of taste?

No—mere desire for change will not explain why so many thousands of smokers all over the country are changing from other cigarettes to Chesterfield.

No—price does not account for this sweeping turn-about in cigarette popularity, for Chesterfield is sold at the popular price—it costs the same as any of the other largest selling brands.

Yes—that's the answer. It is taste and taste alone that explains Chesterfield's sweeping gains. And taste is a matter of tobacco quality.

We state it as our honest belief that the tobacco used in Chesterfield are of finer quality (and hence of better taste) than in any other cigarette at the price.

—and this belief is shared by cigarette smokers the country over.

SYNOPSIS

Malone, a London newspaper reporter, reflects on the girl he loves because he has no great desire to his credit, appears to his editor for a dangerous assignment and he seems to intercept the transville Professor Challenger, a scientist, who has recently returned from an expedition to the South Pole with an amazing story, which no one believes. The evidence there on a great variety of many forms of prehistoric life. By way of proof he shows Malone two sketches— one of the cliffs beneath the plateau, the other of a monstrous animal resembling the stegosaurus, which had been among the passengers of Challenger's expedition. Malone had found dead a stegosaurus; some blurred photographs of what appeared to be the same cliffs; and a piece of the skin of a huge flying serpent, or pterodactyl, which he had shot down. Malone is convinced of Challenger's sincerity. He accepts the professor's invitation to attend a scientific lecture that evening by a Mr. Waldron.

CHAPTER V (Continued) It was a bird's-eye view of creation, as interpreted by science, which, in language always clear and somewhat picturesque, he unfolded before us. He told us of the globe, a huge mass of flaming gas, flaring through the heavens. Then he pictured the solidification, the cooling, the wrinkling which formed the mountains, the steam which turned to water, the slow preparation of the stage upon which was to be played the inexplicable drama of life. The origin of life itself he was discussing by vague. That the germs of it could hardly have survived the origin of life, was his conviction, fairly certain. Therefore it had come later. Had it built itself out of the cooling, inorganic elements of the globe? Very likely. Had the germs of it arrived from outside upon a meteor? It was hardly conceivable. Or, he suggested, was it the least man was the least dogmatic upon the point. We could not see the origin of life, he said, but he was up to date in making organic life in our laboratories out of inorganic materials. The salt between the origin of life was something which our chemistry could not as yet bridge. But there was a higher and more probable theory, he said, which, working with great force over long epochs, might well produce results which were impossible.

Interupter, the lecturer went back to his picture of the past, the drying of the seas, the emergence of the land-back and the animal life which lay upon their margins, the overcrowded lagoons, the condensation of the sea creatures, the take refuge upon the mud-flats, the abundance of food awaiting them, their consequent enormous growth. "Science, ladies and gentlemen," he added, "that frightful brood of asurians which still afflict our eyes and noses in the West and in the Solomonish straits, but which were fortunately extinct long before the first appearance of mankind upon this planet. "Question!" boomed a voice from the platform.

Mr. Waldron was a strict disciplinarian with a gift of self humor, as exemplified upon the gentleman with the red tie, which made it perilous to interrupt him. But this interjection appeared to him as a racial insult, or the astounding word to deal with it. So looks the Shakespearean who is confronted by a racial insult, or the astounding word to deal with it. He is assisted by a star-struck female. He paused for a moment, and then, raising his voice, repeated sharply his words: "Which were extinct before the coming of man." "Question!" boomed the voice again from the platform.

Waldron looked with amazement along the line of professors upon the platform until his eyes fell upon the figure of Challenger, who leaned back in his chair with closed eyes and an amused expression, as if he were smiling to himself. "I see!" said Waldron, with a shrug. "It is my friend Professor Challenger, and my husband who renewed his lecture as if this was a plain explanation and no more to be said." But the incident was far from being ended. Whatever that the lecturer had said that a host of the past pointed unwarily to lead him to some assertion as to whether or not the professor's lecture was intended to anticipate it and to raise the question of the same. The packed benches of students joined in, and every thin Challenger's board opened, before any sound could come forth, there was a yell of "Question!" from a hundred voices, and an answering counter cry of "Order!" and "Shame!" from an as many more. Waldron, though a hardened lecturer and a strong man, became rattled. He

"I must in turn ask you, Mr. Waldron," he said, "to cease to make assertions which are not in strict accordance with scientific fact." For us, "Thou the matter must be left." This brought the lecturer to the great ladder of animal life, beginning low down in molluscs and feeble sea creatures, then up and bang by rung through reptiles and fish, all at last we came to a kangaroo. "A creature which brought forth its young alive, the direct ancestor of all mammals, and presumably, therefore, of everyone in the audience. (No, no, from a sceptical student in the back row.) If the young gentleman in the red tie who cried "No, no," and who presumably claimed to have been backed out of an answer, would wait upon him after the lecture, he would be glad to see such a curiosity. (Laughter.) It was strange to think that the climax of all the aeologic process of Nature had been the creation of the gentleman in the red tie. But had the process stopped? Was this gentleman to be taken as the type of the creature which he maintained that whatever virtue that gentleman might possess in private life, still the vast processes of nature were not fully justified if they were to end entirely in his production. Evolution was not a spent force, and it was not working, and even greater achievements were in store. Having thus, amid a general titter, played very prettily to his

We had anticipated a city election in Twin Falls with only one ticket in the field, because the time has come, if the Magic City is to get anywhere, we must get together and work as one body. Just so long as we pull apart and have small factions here and there we cannot go ahead as we should. There is no real objection to two tickets in the field at a city election, but it is only another indication of our failure to agree on critical issues as a community.

The Twin Falls high school basketball team is to be congratulated on the splendid showing they made in the district tournament held last week in Buhl. They came up to the semi-finals with fewer games lost than any other team in the tourney. Two of these players should have a place on the All-Star team, but whether they get this honor is largely a matter of opinion of the coaches, but this thing is true, Twin Falls should give her athletic teams better support than was given our home boys at Buhl last week. At a majority of the games Twin Falls rooters were far fewer than any other school and yet we were within 18 miles of the tournament and a hard surfaced road all the way. Let's bow our heads in shame and make a solemn promise never to allow this to occur again.

In view of the exhaustive reports that have been made on the various power sites in regard to costs and maintenance, the testimony that has been given by the Idaho Power company and by municipalities before the public utilities commission and in tax cases, wherein the best engineers in the west have furnished facts, there is no reason to doubt the correctness of the estimate of Engineer E. V. Berg, orally given to the last meeting of the city commission, that he would furnish data required for the construction of a municipal plant with power from the sites named for the sum of \$250. In view of this the council acted with justice and liberality in springing the sum of \$50 and making it \$300. Nor is there any doubt about the competency of Mr. Berg to make the report. There is no use in paying a large sum to a power company engineer for information when we have home talent that can get us the facts at a reasonable sum.

## COLLINS, BEING DEAD, OUGHT YET TO SPEAK

One phase of the Collins tragedy deserves further attention. That tragedy stirred the souls of the people wherever the English language is spoken. Why? Because the people came to visualize the plight of the victim. They could see and feel him, entrapped far underground, in the horror of darkness, alone and starving to death. In consequence, they were ready to do all in their power to rescue him. That state of mind was wrought in them by publicity. The newspapers did it. But greater tragedies, occurring daily, scarcely register their existence upon the popular mind—child slavery for instance. Thousands of children in the United States are daily driven to tasks too hard for them, under conditions that stunt and maim them in body, mind and morals. If their misery were exhibited to the people as the newspapers are able to paint it, what would be the result? Instead of piddling about an ineffectual amendment to the constitution of the United States, public indignation would find lawful ways for immediate expression and the tragedy would end in six months.

## THIS IS THE LAND WHERE HATE SHOULD DIE!

By Denis A. McCarthy

This is the land where hate should die,  
No feuds of faith, no spleen of race,  
No darkly brooding fear should try—  
Beneath our flag to find a place.

Lo, every people here, has sent  
Its sons to answer Freedom's call,  
Their life-blood is the strong cement  
That builds and binds the nation's wall.

This is the land where hate should die—  
Though dear to me my faith and shrine,  
I serve my country well when I  
Respect beliefs that are not mine.

He little loves his land who'd cast  
Upon his neighbor's faith a doubt,  
Or cite the wrongs of ages past—  
From present rights to bar him out!

This is the land where hate should die!  
This is the land where strife should cease!  
Where foul suspicious fear should fly  
Before our flag of light and peace!

So, let us purge of poisoned thought  
That service to the State we give,  
And so be worthy, as we ought,  
Of the great land in which we live!

Note—This poem was written by an immigrant, and sung by 120,000 Boston school children.

## ALIAN NUMMONS

In the District Court of the Eleventh Judicial District of the State of Idaho, in and for Twin Falls

Phibis Tammer, Plaintiff,  
vs.  
William Jay Trammer, Defendant.  
The State of Idaho sends Greetings to William Jay Trammer, the above named defendant.

You are hereby notified that a complaint has been filed against you in the District Court of the Eleventh Judicial District of the State of Idaho, in and for the County of Twin Falls, by the above named plaintiff and you are hereby directed to appear and answer the said complaint within twenty days of the service of this summons, or the complaint, in said judicial district, and within forty days if notified elsewhere, under penalty that unless you so appear and answer said complaint within the time specified, the plaintiff will take judgment against you as prayed in said complaint.

This action is brought for the purpose of dissolving the bonds of matrimony heretofore and now existing between yourself and the plaintiff herein, upon the grounds that you have failed to support the said plaintiff, as well as the children, the issue of such marriage, for more than a year last past.

Witness my hand and the seal of the said District Court, this 16th day of February, 1926.

C. C. SIGGINS, Clerk.

(SEAL)  
E. V. Larson,  
Attorney for Plaintiff,  
Residing at Twin Falls, Idaho.
