The First Ocean Cable, when it was first proposed to lay a cable from Dover to Calais it was denounced as a "mad farrar," a "delicate mistake." So little was known about it that when a fisherman hauled up the line with his haul he thought it was a species of eel. He thought the signals were to be given by pulling on the wire like a doorknob, so they argued the ocean had you too rough and uneven for that. While some objected that it would fill all the fall, others believed that fish would gnaw off the insulating gutta percha covering and put the line out of business. Lieutenant Murray, a marine, not a engineer, ventured to express the opinion that there would be a thin cable enough, the sea smooth enough and wire long enough to ship his cable to by an Atlantic cable. When, after a few weeks of operation, the first Atlantic cable was laid, some declared that it had worked and no objections ever had been sent, and some doubted if it ever had been laid.

The best way to mind your own business is to tell others about it through their newspapers.

## ALBION GIRLS WILL PLAY IN BUHL FRIDAY

### Idaho State Champion, Hoop Squad Will Meet Fast Albion Girls' Team Friday Evening; Normal Girls Have Not Lost a Game; Buhl Girl is Captain.

BUHL, March 18.—Buhl's basketball girls, Idaho high school champions, will play the Albion Normal school girls' team, who this year won the intercollegiate championship of the northern part of the state, at Buhl, on Friday evening, March 20. This game will be called at 7:30.

The Albion girls went through the season without a single defeat, and are said to be a match for the Buhl girls. Their captain is Helen Sander, former captain and star player of Buhl's high school team, and fans who remember that playing say she will be the strongest opposition that Neva Hays, the present Buhl captain and center will face this season.

Little is known about the other players on the Albion team, but they are said to be a group of ex-high school stars representing a number of high schools of south Idaho.

Local fans are anxious to see the game and will be out in large numbers Friday evening, for all other games Buhl has played this season have been decidedly one-sided. The scoring was practically all done by Buhl, but they do not figure this will be the case with Albion.

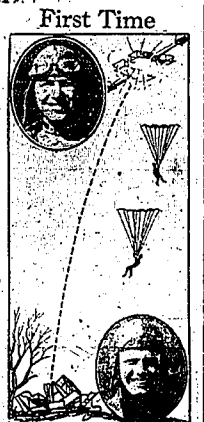

Buhl girls have played 14 games this season, scoring a total of 422 points to their opponents' total of 175. This record is believed to be unequalled by any girls' team on the Pacific coast.

Superintendent M. M. Van Patten and Coach Barry are trying to arrange an interstate game for the Buhl girls. They are corresponding with the state champions of Colorado with a view of getting a game either at Denver or Salt Lake City. Letters and telegrams have been sent out in Denver and Utah which may result in

arranging a game with one of these states in the event the Denver game does not materialize.

East High of Salt Lake is said to have a strong girls' basketball team, although it has not been learned if they hold the championship title of that state. In the event they are champions, Buhl will offer them a game at Buhl or will meet them at Salt Lake.

## BUHL BASEBALL AND TRACK MEN START WORK

### About Twenty-five Men Turn Out for Baseball and Track Men Look Very Promising at West End School.

BUHL, Mar. 18.—Coach Neal has issued the call for baseball and track candidates with the result that a group of 25 young men are turning out for baseball, and about 20 reported for the first work out in track and field events.

The prospects for a good baseball team are bright this year with most of last year's men out in suits again. The pitching staff is missing Joe Tana this year, he having graduated last spring. So far Mullins is the only normal man of experience that has showed up.

The infield will be intact with Tomber at first; T. Hestonick, second; Hamilton, ss, and Muebeck, third base. E. Holmanek caught last season and will probably hold the same position this year. The outfield finds W. Pember, Morris and Boyd as last year's squad, with several promising new candidates to choose from.

The track men showing promise are: Oiler, Joyce, Layne, Peck, having had a few weeks ago when the collection of Orbanal antiques gathered by the late Earl Anderson was put up for sale. There were hundreds of Egyptian gods, seated cuts, with rings in their neck and elaborate engravings on their foreheads, hands and feet. Their place among the deities. There was also a very fine sepulchral form of a woman in primary form in Egyptian wood painted white with eyes in black, described as "the infancy with a pleasing countenance." This woman was named "Sis" as being the original of Sir Rider Haggard's heroine, Mummified birds, fish, cats, and other things were offered. An Egyptian woman's toilet articles, thousands of years old, were also offered and many other similar things.

## BURLEY NEWS

BURLEY, Idaho, March 18.—Dr. John A. Whitson of the fact-finders' commission and Andrew Weiss of the Denver office of the United States reclamation service, and who the sugar beet industry, particularly together with W. G. Swenson, committee of reclamation for the state of Idaho, comprise the adjustment committee that is visiting the reclamation projects in Burley, Idaho, to prepare data that will be granted the farmers on these projects were the agricultural speakers at the mass meeting held Sunday evening at the L. D. S. tabernacle in Burley and which for the occasion was crowded to its capacity.

Dr. Whitson, who also is one of the speakers in the L. D. S. church, spoke practically upon "Obstacles to Law." He emphasized the point that a material standpoint that adherence to the laws of the land meant the success and prosperity to those who were obedient and that obedience to the laws of God meant spiritual success. He particularly urged upon the people of this project that scientific farming and a general rotation of crops would enable the farmers to overcome their indebtedness and reach a more prosperous result from their efforts. He said that the adjustment committee in its investigations here found that certain relief from the government was necessary for the farmers.

to get on their feet again and that they intended to make recommendations to the department of the interior to that effect. He further stated that in three years extension of delinquency charges would be granted along with other concessions to the farmers.

Mr. Weiss spoke principally on the sugar beet industry, particularly in regard to the depression in this industry in the past few years, due to the advent of various kinds of beet products. He said that the beet industry in Idaho is one of the most important in the state and that it is one of the most important in the state and that it is one of the most important in the state.

## POPELLO SLAYER

(Continued from page 1)

Sherriff L. H. Taylor, in the Pueblo jail 11 years ago.

He cannot bring himself to think that your excellency and the pardon board will so soon give favorable consideration to such a travesty on justice, but I take this opportunity of filling a vituperous post against such pardon.

This narrow was deliberately planned and calmly executed by a desperate criminal, and without any consideration to such a travesty on justice, but I take this opportunity of filling a vituperous post against such pardon.

As a result of his crime, the wife and son of his victim are still struggling alone under difficulties and hardships for a livelihood. The wife mourns most deeply the death of her companion, and refuses to be comforted. She has grown gray and aged beyond her years.

Then, too, my mother, as a result of the sorrow and shock of the death of her son, passed away in less than a year. This man can never expiate the sorrow and suffering his crime inflicted. I bear him no personal grudge, but I can conceive of no better place for him than where he is.

I protest the turning of such characters loose upon society.

"IF IT ISN'T RIGHT BRING IT BACK"

NEW GAS TAX WILL BRING IN ABOUT \$250,000

Comities Get More of Registration Tax Than Under Old Law Motor Tax Is About as High as Last Year

BOISE, Idaho, March 18.—Whether the new gas tax will bring in more than \$250,000 for the state highway purposes will meet general approval in Idaho is a question. While it is true that the state highway bureau will receive one third more gasoline tax for gas used for highway purposes it had to compromise with the counties in the registration tax and now receives but ten percent of the motor registration fee instead of the former 25 percent.

The governor signed the tax net Tuesday evening and Wednesday it became effective all over the state and the state settled down to making \$250,000 on this item alone. The act will become effective March 1st, but it didn't reach the governor's hands until March 10th.

It is estimated that this tax will bring to the state highway bureau for maintenance of the highways of the state approximately \$250,000 per year if there is the expected percentage increase in the use of gasoline for road purposes. However, the new law carries an exemption clause which makes it necessary to pay back the three cent tax to all persons in the state who have bought gasoline for stationary engines, tractors, motor boats and appliances, or for cleaning or dyeing or other commercial use. The tax is applicable only to motor, motor vehicles or other engines operated or intended to be operated upon any of Idaho's roads.

Persons buying gasoline must pay the three cent tax and then apply for rebate if such is due them through the department of law-enforcement.

Motor fuel sold to the United States government or to any of its departments is exempt from the tax. The law requires all dealers to file with the commissioner of law-enforcement a certificate showing the dealer's name, place of business and all agents names and addresses in the state before selling any gasoline.

Bleekers Are Prohibited. The new motor vehicle registration law which has also been signed by the governor besides lowering the license fee for practically all automobiles also sets forth a number of regulations which will be new highway operation laws. For instance it is unlawful under the law for a car to be operated with stickers on the windshield in such a manner that they obstruct the operator's vision either ahead or to the rear. It is also unlawful to operate any motor-vehicle on the public highways of the state with any lighting device which is mounted on the exterior of which shall strike at a height in excess of 42 inches above the ground at a distance of six feet in front of the vehicle or shall strike in excess of 200 feet ahead of vehicle while standing on a level road. It is illegal to operate a car with one light.
