## AMERICAN GIRL TO ATTEMPT TO SWIM CHANNEL

Three Nations Will Enter Expert Swimmers in Attempt to Swim the English Channel; U. S. Swimmer Has Had Good Training for Feat.

**BY HENRY L. FARRELL,**  
NEW YORK, July 29.—Gertude Edith McLean, 18, of New York, has the "short voyage" of a whole nation behind her when she attempts to swim across the English Channel next week.

McLean sharp her wills when she becomes the first woman to perform the hardest feat in athletic history, that of swimming alone across the channel.

"If any woman can do it, she can," Joe Judy, swimming star of the New York Athletic club and the world's greatest swimmer, says.

"It isn't merely a matter of swimming that distance," he said. "It is a question of fighting with time and current that will be much more of an opponent on the leg of a water polo player. She is a strong swimmer, and has plenty of courage."

**CAPRI GIRES.** France, July 29.—Star swimmers from three nations may engage in a race against time next week in an attempt to swim across the English Channel.

Three Nations Represented.

Mme. Gertrude Edith McLean, representing the United States, Mme. Aurore Sison will carry the colors of France and Miss Julian Harrison will make her second attempt of the year for Australia.

It was proposed that the three swimmers start at the same time and while the swimmers had no objections, their coaches opposed it.

Captain James Wolff, trainer of the American star, said that in such competition, never a swimmer could be defeated.

"Records to present plane," Miss Sison may start Monday, Miss Harrison Tuesday, and Captain Wolff, Captain Ederon on Thursday. Plans, of course, are subject to weather conditions.

## Coast League

At Salt Lake City: H. H. E. Sacramento ..... 1 5 3  
Batteries: Cawthon and Sher, Nauchefeld; Piercy and Peters.

At Vernon: H. H. E. 1 18 2

Vernon ..... 3 6 4  
Batteries: Crockett and Aznow; Bryan, Eckert, Swanson and Murphy.

At Oakland: H. H. E. 1 18 2  
Goldschmidt and Riedel, Gandy; Batteries: Root and Sandberg; Foster, Boehler and Reed, Dylan.

No game at Portland, teams travel.

**Dempsey Confers with Mgr. Kearns**

**LOS ANGELES**, July 29.—Heavyweight Champion Jack Dempsey and his estranged manager, Jack Kearns, were reported today to have held a secret conference at the home of the lawyers and to have taken preliminary steps to dissolve their partnership.

Neither Kearns nor Dempsey would discuss their future plans beyond saying "everything will soon be adjusted to the satisfaction of all concerned."

The fighters had been training through a light workout at the Manhattan gymnasium, punching the bag and boxing a few rounds with training partners.

## TODAY'S GAMES

Washington ..... 20 10 2  
Batteries: Franklin and Schalk; Zuckay, Marbury and Rud.

SPORT TABS OF EVERY KIND

NEW YORK—Middle western players will be permitted to represent the west in the coming east-west tennis matches and foreign players will be invited to play in the tournament in New York, it was announced yesterday by the Tennis Association of the United States.

It was proposed that the three tournaments start at the same time and while the swimmers had no objections, their coaches opposed it.

Captain James Wolff, trainer of the American star, said that in such competition, never a swimmer could be defeated.

"Records to present plane," Miss Sison may start Monday, Miss Harrison Tuesday, and Captain Wolff, Captain Ederon on Thursday. Plans, of course, are subject to weather conditions.

## LABOR WAR THREATENS

(Continued from page 1)

just now he is inclined to sympathize with the mill owners, although he does not approve of wage reductions.

The president this afternoon will take an outing trip by motor to the Colorado Republican Club celebration at Denver.

Richardson will be a guest of the summer White House today and tomorrow.

WASHINGTON, July 29.—The precarious situation of the unions in the coal fields—where recently industrial commandos attacked drilling for oilmen to prevent them from working—was the topic of a meeting of mine operators at the White House today.

The bureau of mines revealed today that production of coal from union mines is falling far below standard.

Production in the non-union fields is larger than in the union fields, but is not enough to offset the decline in output.

The bureau's figures show that production of coal in the non-union fields is up 40 per cent higher than in 1929.

In the coal districts, production is down 10 per cent.

Yesterday's bureau figures show that the miners' strike in the non-union fields has been broken. The miners' strike in the union fields, however, continues.

Employers in both the union and non-union mines are employing non-union labor.

# TWIN FALLS DAILY TIMES

Published Every Evening Except Sunday by the Times Publishing Company, Twin Falls, Idaho.

Entered at the Twin Falls Postoffice as Second Class Matter No. 2 Daily Publication, April 11, 1912.

## THE BIG DAM ASSURED

Signing of a contract at Pocatello late yesterday by representatives of canal companies on the upper river for extra supply of water for irrigation, will insure the construction of the higher dam at American Falls, meaning lower relative cost for water and making a material saving for users on this and other tracts in the cost of supplying. While the total amount needed is not yet subscribed, the action Tuesday afternoon insures its adoption. It will do more. It will attract the attention of the world to the great southern Idaho irrigated belt to even a greater extent than at present.

But after all, the greatest advantage was that named by President R. E. Shepherd, of the American Falls district board who after the signing of the agreement Tuesday afternoon said:

"It is of much more importance to round out with security of water the going lands that have been improved and cultivated than to put on a lot of new land. We can use many more farmers on the existing acreage. We are just beginning to learn what these marvelous acres will produce. For instance on the North Side Twin Falls this year we have 9,000 acres of beans and on the South Side 80,000 acres." There will be shipped from these two projects this year white beans enough to bring back \$2,000,000 in cash. Jerome county commenced to learn diversification about the time that the slump came. If you think there are hard times, I would call your attention to the fact that this June ninety-two per cent assessed tax was paid and only eight per cent delinquent. We are diversifying our farming. This tax paying is a sign of confidence. We have the same transportation facilities, the same soil and the same people that we have had for a number of years. We have, however, better methods, more intelligent business-like farming, and a mental attitude much improved."

## BACK TO THE FARM BUNK

There never was anything to this back to the farm movement. It was a figment of romantic imagination. In his mind every man wants to go back to the farm—some time. Furthermore, we do not need to keep all our boys on the farm. Some of them must gravitate to the cities in order to be able to keep the world going. But farmers are leaving the farms too fast. The discouragement of the last few years has made almost an exodus to the towns and it is not wholesome. The cities are becoming overcrowded and this means congestion, which always means poverty. A few will make money but many will hardly be able to keep above the bread line.

The movement from farms to cities, towns, and villages in 1924 was 2,075,000 while the number of persons moving out onto farms and tracts was 1,396,000. This makes a net movement from the farm population of 679,000 persons.

Births among the farm population for the year 1924 was 763,000 and deaths 266,000, leaving a natural increase of 497,000.

Subtracting this 487,000 from the 679,000 the number representing the decrease in farm population is 182,000.

Decrease in farm population through the movement cityward was highest in the mountain states with the Pacific states following closely.—In the New England section alone there has been a gain in farm population.

It is something that many abandoned farms are being reclaimed. They need more farms in New England. Farm life is no longer isolated. Lonesomeness has been obliterated by the rural delivery of mail, by the telephone and most of all by the automobile. Discomforts which many men look back upon with a shudder no longer exist. The dark homes are lighted with electricity and the family wash tub has given place to the bathtub. Drudgery has been taken away from the housewife by electrical appliances and farm life now is more attractive and comfortable than city life. The highways are not so bright, but that has proved the curse of the cities.—Exchange.

## ROGERSON NEWS

People attended the Pioneer Day celebration in Twin Falls Friday and they say it was the best celebration they ever attended.

Mr. and Mrs. George E. Murray of Shoshone had a busy day.

Mrs. Glenn Miller left Tuesday for Jerome where she will spend a week with relatives and friends.

A. D. Harrison was in from the range Friday on business.

Mr. and Mrs. F. C. Antelope, ranchers in Antelope, were in town Friday enroute to their ranch.

F. E. McDonald of Shoshone had a busy day Friday attending to business matters and buying supplies.

L. D. Chapman of Antelope was a guest at the Pioneer Day.

T. J. McMillan, of Oval, Nevada, was in Rogerson Saturday calling on relatives and friends and attending to business matters.

Mr. and Mrs. H. L. Pansbury of Jordida, Nevada, were in Rogerson Saturday enroute to Twin Falls. They were accompanied by their son, who is here visiting with friends. They were great guests at the home of Mr. and Mrs. C. O. Boe, before returning to their home in Jordan Saturday.

T. C. Cox was in from his ranch Saturday on business.

Mr. and Mrs. W. G. Shoshone, proprietors of Shoshone Drug Store, were in Twin Falls Saturday.

A steady stream of Rogerson people

## BOOKS FOR THE YOUNG READERS AT THE LIBRARY

Assignment of Volumes Are Placed on the Shelves, Covering Wide Variety of Fiction and Non-Fiction.

An assortment of books for high school students have been placed on the shelves of the Twin Falls public library and are now ready for reading. This list follow:

Land and Sea Tales for Boys and Girls—Kipling.

How to Be a Husband—Fisher.

Secrets of the Subplot—Sibley.

My Own Book of Adventures—Hart.

Book of Escapes—Buchan.

Hugh Gwyth—Dix.

Mystery of the Hive—Everard.

John Deering—Farnol.

Golden Numbers—Wilson.

American Boy's Book of Birds and Animals—Hart.

Children's Fairy Land—D'Aulcy.

Children's Book of Celebrated Sculpture—Bryant.

Pan the Piper—Chandler.

**What to Expect of Electricity;**  
**Tips About Home Appliances**

An Ironer Will Save More Time Than Any Other Electrical Appliance

By MILDRED NICHOLS

In Charge Electrical Housekeeping Department, Western Electric Co.

When you are contemplating buying any electrical appliance you are naturally interested in how much it will cost and just how and why it will be an asset for you.

To get the very most out of your clothes, you should make the following check these points: Never fill the washer by lugging pants or a few items of common garden hose. Use a few drops of soap.

Always have a suitable arrangement for easily draining.

Permit the iron to stand a full length of hose running to a floor drain, an ejector, or even a small washer pump with an electric motor.

The cost of the iron is about one-half the cost of the washer, and just remember that the iron is a good buy.

Get it "on" position before turning on the current. This eliminates the chance of blowing a fuse.

Never attach the cord to a light socket. A two-way plug is almost a must.

Never use an iron on a gas stove.

This enables you to have light and power at the same time.

The electric iron is practically trouble-free. You know right away if there is such a thing, but we dismiss it with a "Oh, yes, I know, I've had a flat piece and had to fix it."

That is about the only trouble.

The iron is a small ironer useful for a family of two as well as a roomette.

It is two or three times as efficient as a larger ironer can handle.

Ironing is a little task that takes twenty to twenty-five minutes to iron by hand, comes through in five minutes.

After you have ironed, you are overlooking an exceptionally good job.

Not much need be said about the electric hand iron. Practically every family has one. It's a record-breaker. The heat is constant and steady, constant heat when and where you need it, the saving of time is great, the joy of ironing in a room where it cool have overshadowed the question of "How much current does it take?" It's a good iron, too, for two different types of upstairs and down.

Ask the user of the iron in your home how he likes it. If he says it is good, then you know there is such a thing, but we dismiss it with a "Oh, yes, I know, I've had a flat piece and had to fix it."

That is about the only trouble.

The iron is a small ironer useful for a family of two as well as a roomette.

It is two or three times as efficient as a larger ironer can handle.

Ironing is a little task that takes twenty to twenty-five minutes to iron by hand, comes through in five minutes.

# SEED MEN MEET HERE IN AUGUST

**Noted Authorities Will Spend Two Days in Twin Falls County Getting First Hand Information on Conditions; Personnel of Party.**

A number of the most eminent authorities on seed needs will accompany the party which arrives here Saturday, Aug. 9, to spend two days on a tour of inspection and progress in the county. It was learned by County Agent E. E. Broadhead this afternoon on his return from the annual meeting of the National Seedmen's Association in Utah. Steps will be taken at once to arrange for a meeting of seed men of the Salmon and the Snake River districts, with a view of presenting conditions fully to the noted visitors.

**Want First "Hand" Facts.**  
A number of the visitors will be accompanied by their wives. The object of the trip is to study first hand the seed conditions in Twin Falls county, and other needs in the country. The party expects to lay the facts before them. The party will arrive about noon, and will leave for Blue late on the afternoon of August 10.

**Personnel of Party.**

L. F. Shuttleworth, manager of Indiana farm bureaus' department, president of Federated Seed service.

C. F. Barnum, secretary-treasurer of Federated Seed service, manager of the Michigan Farm Bureau Seed service.

Prof. J. F. Cox, farm crops department, Michigan State Experiment Station.

R. H. Shaw, son of Dean I. S. Shaw, director of the Michigan experiment station.

H. G. Luther, secretary of the Michigan Crop Improvement association.

R. Carpenter, Merrimack Farmers Exchange, Concord, N. H.

Mr. Wadsworth, representative of business planter, U. S. Department of Agriculture.

E. Bradford, of Ohio, president of American Farm Bureau federation.

D. H. Ollis, chairman bankers' agricultural commission.

Edwin B. Reid, legislative and Washington, D. C., representative of the American Farm Bureau federation.

Prof. D. R. North, Carolina agricultural experiment station, Raleigh, North Carolina.

W. H. Stuckey, president Indiana Farm Bureau federation.

E. P. Collier, Hancock, Md., president Maryland Farm Bureau federation.

E. P. Taylor, organization-director of American Farm Bureau federation.

Prof. H. W. Hubert, University of Idaho, Moscow.

C. H. Atkinson, Idaho state seed commissioner, Boise, Idaho.

In addition agriculturists and other railway representatives will accompany party most of the time.

**MISS RUTH ELLIS IS ATTENDING THE SUMMER SCHOOL IN CALIFORNIA**

**Mrs. Ruth Ellis of Twin Falls is attending the summer session at the University of Southern California at Los Angeles, Calif., and will last six weeks.**

Miss Ellis, known instrumentals violinist, is university graduate summer and the session is the largest ever held there, more than 2400 being enrolled.

**Sheriff's Force Turns Dope Case to Uncle Samuel**

If Uncle Sam has any curiosity regarding the young woman discovered at Curry Friday evening, he may investigate just what caused her to be unconscious when she was found.

Charles E. Jones, having arrived at the conclusion that the trouble was due to the use of some narcotic, and that the young man in the case was innocent in act and intention, threw up the case on his return home, and turned it over to the sleuths of Brother Jonathan.

He declined to cite out any name, owing to the fact that the government might want to probe further.

**Pike Highway Heads Hold Large Meeting**

COLORADO SPRINGS, Colo., July 22.—Delegates from Texas, Oklahoma, Missouri, Kansas and Colorado are here today for the annual meeting of the Pike Highwaymen.

A number of governors are representing their states as delegates.

A plan for an east to west highway between eastern Kansas and southern Colorado is to be considered.

## City Briefs

**Home Town Grown—** Mr. and Mrs. Carl E. Anderson recently returned from a trip to their old home town, Rockford, Ill., and find it has more than doubled in population in the last seven years since they have been away from there. It is now a city of more than 100,000 and when Carl went there to visit him, Mr. Anderson found that the manufacturing plants account for much a growth.

**Check on Work—** E. B. Johnson, assistant secretary of the American Falls district, went to Boise today to check on matters pertaining to the district. He is a member of the Commissioner W. G. Swenson.

**Old Bush Broadcast Heard—** A. Miller, 80 years old, a retired lumber dealer in Bush, arrived yesterday from the Imperial Valley in California to visit his brother, H. O. Miller, for a short visit to relatives in Idaho before returning to the low country in California.

**Standard Oil Girls Offers—** The Standard Oil company has canceled the offices at 109 Shoreline street, recently occupied by the Contact Towing company.

**Their will be a pre-communal party at the Presbyterian church toasting at which there will be a special musical program.**

**Looking for Car—** Requested to the sheriff's office Monday evening from Standard Oil company, 109 Shoreline to find a car, license No. 123,263, model, Idaho license No. 13,643, was met by Edith Well, who said she had been married 21 years to a man named John, on the 15th, around that time he had taken the machine.

**First Stop at Westport—** The first stop which will be made by L. J. Sullivan and wife, who leave for California August 1, will be at Westport, where they will remain until relatives. They will spend about two months in the Golden state.

**Married by Hodges—** E. R. Conover and Ella Card of Rosemead were married by Probate Judge J. L. Hodges yesterday.

**Look Was Small—** The leak in the canal near Murtaugh proved to be a very small affair when visited by the sheriff's men, and they will take care of it at once.

**Hilarious Hear Talk—** A brief address on Rotary Club No. 1, a meeting of which he attended while at the national Rotary meeting, was given at the presentation at the dinner at Tom's cafe today.

**Warder Did Not Come—** E. T. Thompson, who has been visiting here, has visited this city today was unable to come and went home via the northbound.

**On Technical Charge—** Whether filing out a blank for hall insurance for Mr. H. C. Gettier is agent in the absence of the agent, or whether it is a violation of the law forbidding an agent to sell insurance without a license, remains to be seen in the case of Mr. T. T. Tamm, who filed an application that he could "take care" of insurance, and that while in the nation, he would be able to do so, he might not have "selected" until he comes within the statute. The defense represented by Captain E. M. Smith, contended that the warder did not have a technical violation where none was committed. The case was not finished at press time.

**Twin Falls Grange Meets Thursday Evening, July 30**

The regular meetings of the Twin Falls Grange will be held Thursday evening in the Business and Professional Women's club rooms in downtown. The Friday, an originally planned meeting, will be rescheduled, will furnish the preliminary date of the meeting until L. H. Marlow, who directs municipal power, can be present.

The charter, which will be open to all, the public is invited to attend. The meeting will not begin before 8:30, as many of the members cannot eat in earlier.

## SCOTT MAY BE PRISON CRAZY

**Experts Are Making Extensive Tests to Prove That Slayer Is Insane; Has Escaped Maniacal By Two Days of Sentence.**

CHICAGO, Ill., July 29.—Three alibies are being urged by the defense in the trial of George E. Scott, in an effort to prove that he is "not crazy." If they can convince a jury that Scott is insane, his prison sentence on two counts of second degree homicide in previous cases of execution, will go to an insane asylum instead of the gallows.

Scott's cell today was a scientific laboratory, filled with numerous trinkets, the debris of his life in the Lincoln-Lock case, and Mrs. Clarence A. Naumann are scheduling tests to exhaustive examination.

Willard Scott Stewart, chief defense attorney, who has been trying to prove his client is suffering from "post-madness" brought about by his 18 months in jail and the ever-present Dr. William O. Krohn, who was on the side of the prosecution in the Lincoln-Lock case, has been retained.

Scott was found guilty of killing fellow inmate, a drug store clerk, Monday, and the jury will be selected to sit on Scott's mental fitness trial.

Scott's defense and state the no extra testimony will be heard on this point, but the defense will call witnesses. Jim Darrow, who said during his trial, he was an effort by the defense to bring a little emotional appeal for mercy, similar to the one delivered by Clarence Darrow in the Leopold-Lock case.

An advertisement worth looking over is never overlooked—in this newspaper,

## STANDARD OIL ERECTING NEW STATION HERE

**California Oil Company Will Open Its First-Mile Station Here—** This is Second in Idaho.

**New Company Will Operate Four Trucks and Employ Eight People.**

The Standard Oil company (California) is erecting a distributing station in Twin Falls, from which it will distribute motor gasoline and lubricants to the oil companies in Twin Falls and the country around.

The company's decision to establish a modern

distributing plant was reached by the

study of business conditions and

progress in the community, and particularly the community's prospects

for future development.

The new plant will be located at

the corner of Main and 5th streets.

The plant will be built on a

lot 100 feet wide by 150 feet

deep, and will contain

four tanks, each holding 10,000 gallons.

The plant will be equipped with

modern machinery and equipment.

The plant will be operated by

two men, and will be supervised

by a third.

The plant will be open to the

public at all times.
