Final of Supper Series Mrs. W. Orr Chapman and Mrs. Emma Green on Friday evening at the home of Mrs. Chapman entertained with the final bridge supper in a series of four. Condores and callers were with appointments in the same late, decorated the rooms and entered the supper table. At the bridge Mrs. Arthur Vincent was center for high score and Mrs. Thomas Hobson won prize for low score.

Mrs. Craven Hostess in Club - Mrs. J. W. Craven was hostess to the Past Matrons' club on Friday evening, at her home on Seventh. Program consisted of the club included Mrs. V. H. Ormsby, here from St. Petersburg, Florida, for the summer, and a former member of the club, Mrs. Lillian Keane of Boulder, Colorado, who is a guest at the home of her sister, Mrs. P. W. McRoberts and Mrs. K. H. Wheeler of Boulder. Mrs. M. C. West presided over the brief business session which preceded the pleasant social evening. Delightful refreshments were served in tables covered with hosts of sweet peas.

Secretary Members Entertained - Mrs. W. Orr Chapman on each week has entertained the resident members of the Gurnea Hill club on Friday evening. The guests included Mrs. C. H. Ormsby, Eugene Osterander, Kenneth Young, Paul Thomas, Harry Bonini, and Misses Anna Baker, Marjorie Cook, Althea Brunst, Marguerite Ploch and Martha Humphrey. Light refreshments were served at the close of the evening.

War Mothers Entertained - Mrs. David Brown was hostess to the local chapter of War Mothers on Friday afternoon. The usual order of business was transacted and final arrangements were made for the state convention which will be held in Twin Falls, Mrs. J. E. Ross, Mrs. C. E. Howell and Mrs. A. E. Maytag will be delegates from the local chapter. Mrs. David Brown, Mrs. C. C. Britt and Mrs. C. H. Smith are alternate. The hostess and her assistants served delightful refreshments on the men at the close of the afternoon.

For Mrs. P. O. Herriman - One of the most highly commended of the week was given in honor of Mrs. P. O. Herriman on Friday afternoon by forty of her friends. Mrs. Herriman is leaving next week to make her home in Juneau, Alaska. Garden flowers and potted plants made the room most attractive. The afternoon was spent with needlework and conversation, and a handkerchief shower was given the honored guest. Mrs. E. F. Brown making the presentation remarks. Delightful refreshments were served at the close of the afternoon.

Actress Club Entertained - Members of the Actress club were pleasantly entertained at the home of Mrs. C. W. Langenheim on Friday afternoon. Miss Alma Baker was a guest of the club. Officers for the coming year were elected at this time. Results of election were: President, Mrs. C. Iron Price; vice president, Mrs. Thomas Mott; secretary, Miss Anna Baker; Mrs. A. Warner. A social hour followed and delicious refreshments were served by Mrs. Langenheim. Mrs. C. E. Potter will entertain the club on July 16.

Farewell Party - Compliments Miss Phyllis Shaw who is leaving soon for Portland, Oregon. Miss Mittling gave an attractive party at her home on Third avenue west, on Friday evening. A handkerchief shower was given the honoree during the first part of the evening. Quitting names and songs formed the evening's entertainment. Delightful refreshments were served at the close of the evening to Misses Phyllis and Audrey Shaw, Coriella Gabriel, Annona Hall, Mrs. Ottomann and the hostess and her assistant, Miss Ruby Tipton.

Animals With Three Eyes - Some of the islands off the coast of New Zealand are the home of curious creatures known as Tritons which are supposed to be the oldest living type of animal. They are distinguished by a single organ on their heads known as the third eye, which in reality is a third eye.

# ROAD BUILDING

## BIG JOB DONE ON MINNESOTA ROADS

To transport the surfacing material used by the Minnesota department of highways during the year 1925, 1925, better building was the new state highway program took full effect—would require 3,228 tons of steel bridge cars—estimated a distance of 1,541 miles. Charles M. Hays, chief of the department, in a recent statement, said that the department has built 2,525 miles of gravel surfacing and 525 miles of paving in addition to extensive bridge construction and replacement and maintenance operations over the entire 7,000-mile highway system.

Material involved in the state highway engineering is the certain during the 1925-26 period mentioned 10,749,000 cubic yards of gravel, 2,808,000 tons. To transport this vast quantity would have required 103,000 steel bogger cars of a capacity of 50 tons each.

The department built 225 miles of pavement and there entered into it 1,874,000 cubic yards of material, of a quantity sufficient to construct a full 42-mile-long, 10-foot high and 2-foot thick. The wall would extend from St. Paul to Winnipeg.

The department has used for various purposes 252,000 tons of gravel, 821,228 tons of sand and 1,372,000 tons of aggregate—gravel or crushed rock. The concrete grade and crushed rock material not only into paving but construction of bridges and culverts. All together there were 32,871,000 cubic feet of dry materials, and these made 1,262,000 cubic yards of concrete.

One of the most important of the new or more roads off county roads and nearly all towns of more than five population. Planned out and these routes would make an oval line around the outside of the entire United States and the improved mileage would be 100,000 miles in both its shortest and longest diameters.

Very little criticism may be found in the long night-long bridges, such as are found over one of the streams. The motorist will naturally stop when approaching such a structure, to be sure it will take the necessary precautions to pass over it safely. Such hand-painted details as approach rails, visibility on approach are, on a general rule, pretty well taken care of. There are fewer accidents by far on a bridge of this type than on the small, half-kidney, narrow bridges, such as those—our high-

## Fined Selves

Maytag J. A. Tower, chief of Fort Madison, Ia., industriously drove past a boulevard sign sign by other day. So he opened court next day by filing himself. He, along with thirty other offending motorists. Then Constable Henry Hunter the first passed a stop sign. Another likewise came in voluntarily and was fined the dollar.

way system at intervals of every few hundred feet. The small creek bridge and the culvert bridge both offer hazards to the traveler that are both unnecessary and preventable. Many of these small bridges, being of a width much less than for the modern highway. The slottings, or bridge falls, will extend as much as two and often three feet from the road right of way.

## Highway to Science

An important new development in highway engineering is the certain in which it can be determined how close traffic reaches the point where a paved road will be more economical than a dirt or gravel road. It is not even possible to determine even the type of pavement and the design which will give the highway and the highway to be the best value.

## Good Roads Facts

Good roads being rich returns.

A bad road is a big handicap to good community.

Club will build 100 miles of road in 1926, according to the state road commission. This collection will cost nearly \$10,000,000. The money is large by from the counties supplemented by federal aid.

Highway construction and maintenance in 1926 will equal and possibly exceed the progress made in any other year, according to estimates from the engineering studies conducted by the United States bureau of public roads.

Some factory girls don't make any more money than school teachers.

reported as paying but \$10.00 for top fat range lambs this morning. Earlier in the week Idaho lambs topped there at \$18.00. Local shippers who look advantage of the advanced market were; Lemmon and Winn. W. C. Brown and W. H. Hager of Caldwell. As some of these are not yet on the market, they will not benefit greatly by the advance. Due to range conditions, the market can't hold at an high two miles' shipments from Buhl. Shippers in the past week six cars have been shipped from Buhl in the last ten days some to Omaha and St. Joe. Following the heavy shipments the market dropped again, and Omaha is

# Thanks for Putting Twin Falls and Maytag on Top

Our thanks to the many substantial Twin Falls residents who helped us beat Price, Utah, in this week's Baseball Sales Contest in the Maytag Internountain League. Your purchases of Maytag have put Twin Falls on top in this part of the country and they're helping to keep up the Maytag record of selling more than one-third of all the washing machines made.

washing machine buyer chooses a Maytag—The Maytag washes cleaner in half the time; washes grimy work clothes, collar and cuff bands without rubbing; has the greatest hourly capacity; has the only cast aluminum tub without corners or seams to harm the damtest fabric; is adjustable to your height; is self-cleaning and self-emptying; has a self-adjusting, swinging wringer; occupies only 25 inches square floor space.

We'll gladly demonstrate in your home on your washing the advantage to you of the Maytag which no other washer has. Let us do it today and insure keeping Twin Falls on top where she belongs, in the Maytag Internountain League.

## 9 Outstanding Maytag Features

- 1—Washes faster. The Gyroform Principle creates a more highly energized, turbulent and continuous flow of water.
- 2—Washes cleaner. The Gyroform Principle mixes the soap evenly throughout the water and forces the super-cleaning, sudsing washing action through the meshes of the clothes. No side action.
- 3—Largest laundry capacity in world—50 lbs. ordinarily wash per hour. Tub holds 21 gallons—4 gallons more than ordinary washers.
- 4—Most compact washer made—takes floor space only 25 inches square.
- 5—Cast aluminum tub can't warp, rust, swell, split nor corrode—retains life for 30 years.
- 6—Easily adjusted to your height and height of tub.
- 7—Clothes can be put in or taken out while washer is running.
- 8—Metal swinging wringer. Low swinging position. Adjusts itself automatically to clothes or blankets. Automatic disengagement mechanism. All parts enclosed.
- 9—The Maytag is furnished either with electric motor for wired home or with in-built gasoline motor where electricity is not available.

## 9 Reasons For World Leadership

For homes without electricity, the Maytag is available with in-built gasoline motor.

NEWS OF THE SPORT WORLD

SALT LAKERS BOW TO ZAM, SCORE 7 TO 4

Manager Keeps Thirteen Hits Well Scattered. Bowlers May Fling Today.

(Special to The Times) SALT LAKE CITY, June 19.—Although he pitched against nine men who were still in their prime when he was up his game, Carl Zamloch, player manager of the Twin Falls triplets, showed through him his old-time stuff today in a three-innings series.

Zamloch's decision to take the mound for something of a surprise to local spectators follows for it was thought Zamloch was a certain pitching liability for the Twins.

Although the bees rapped Zamloch for thirteen hits, they were kept so well scattered that the Twins could score four runs while the Bruins were able to make seven hits off Mollay after seven throws.

WHO IS YOUR BOSS?

Many men will boss whole departments of other men are not their own boss.

They do not make their own choices, determine their own actions, or govern their own movements. They are the servants of a set of tyrants whose word is law. They are as helpless in the grip of these tyrannies as pawns in the hand of the player.

"I can't work if I do not have my coffee," says an irritable woman. "Wait until I light a cigar," apologizes the nervous man. "I can't work near that window," pleads the distracted clerk. "I'm nervous, you know," the head bookkeeper explains.

Victims all! It is by submitting to the little tyrannies that slaves steals upon us. A weak surrender to habits, worries, fears, nerves, distractions, irritations, and time-consumers, results in a total loss of liberty.

The strong man is the boss of his own habits. He will allow no man to give him orders. By keeping himself physically fit he stills the clamor of nerves. By mastering his own mind he concentrates and little distractions and irritations whine and scratch at his door in vain. By keeping faith with his own conscience he slams the door on worry and sits down to his work in peace and sobriety.

No man can succeed greatly in slavery. The beginning of success is in the mastery of self, in asserting one's authority over his own nerves, habits, environment.

An impulse you can't resist is dangerous. The first servants become the most tyrannical masters once we surrender the authority to them.

"He is the best salesman I ever had but he couldn't leave booze alone," the president of a big corporation said in explanation of the dismissal of a popular fellow. Neither the president nor the man was boss. Booze was boss. The man had to go.

"He that ruleth his own spirit is greater than he that taketh a city," said the Teacher of Galilee.

SAFETY IN CHECKS

One of the subjects most prolific in the way of texts for comment is that of the safety provided by banks to persons to engage in financial transactions of any kind. Many more persons should adopt the plan of making payments of all kinds by checks instead of in currency.

Every few days the newspapers publish accounts of thefts which have been committed in cases of persons who withdraw sums of money from the banks, or use money they have kept in their homes for payments on property or other transactions.

A bank check eliminates all possibility of loss of money in making payments. Bankers are particular to know that persons presenting checks for payment are entitled to the money, and even if a check is stolen it is highly improbable that it can be negotiated by the thief. Banks require identification before making payment on checks, and the writer of the check immediately stop payment and the writer of the check can immediately stop payment.

Persons who keep money in considerable amounts in the home do so at their own risk. Would-be thieves have means of securing information which may not be suspected by the person who keeps money in his home, or they may even take a chance of finding currency hidden about the house. The resulting loss is the same.

There is no reason why any individual should draw currency from the bank when a check will complete a financial transaction; neither is there any excuse for a person who receives money undertaking to be his own banker.

"An inconvertible thing," he interjects to have with something. "What?" "My daughter."

"Nothing abnormal about that. Tell me what you want to, and I'll answer as an honest friend."

"What do you know about this fellow Mansfield?" "He's bound to please your point of view. You've made him too good."

"Because he represents that and you represent might?" "That's right, speaking of might."

"All this is quite complimentary to me," said Mansfield, dryly. "Then you mean to throw up my hands? John, my position is irrevocable."

"In the money side, yes. But there's a great thing under your hand. Make a clean breast of it to that girl."

"Mansfield drew his palm across his forehead. 'After that, he can't find out where Cutmore got his four hundred thousand. Did you know that he had that amount in the bank lately?'"

"Do you accept him in your house as an equal?" "Absolutely not. I'm a man of my word. I can't promise you that. But one of us must break."

"I'm on the boy's side, Mansfield," replied Mansfield, spitefully. "I'll repeat my advice: Call up Cutmore; give him what he wants."

"The doctor left."

"That girl he has to go before the fire in the library, his office hours over, his pipe smoking comfortably. Nancy walked over to the window, and took the pipe from his desk, and laid it on the shelf. Then she seized his cup and drew his head right about face."

"Father Madoff, who is High Hallway?" "He's a man who's been here for years. He's a man who's been here for years. He's a man who's been here for years."

"From you?" "From you?" "From you?"

"From me?" "From me?" "From me?"

# BUHL BOY IS GRADUATE OF PENNSYLVANIA

Hart E. Van Ripper of Buhl was among the students of the University of Pennsylvania to receive the degree of bachelor of arts, at the annual commencement exercises of the institution, held at Weichlen Hall, the university gymnasium, Wednesday.

This year's graduation exercises in which Van Ripper was a participant mark the one hundred and seventh annual commencement of the University of Pennsylvania. At the ceremonies which lasted throughout the day, a total of over 1700 degrees and certificates was awarded, the recipient of which represented every state in the Union and over 20 foreign nations.

Van Ripper is a member of Kappa Sigma fraternity, and was a member of the student government of the University Christian association during his senior year. In his junior year he held the position of secretary of his class.

Van Ripper is a graduate of the Twin Falls high school and is a member of the Rocky Mountain club of the university.

# LOOKING FOR TRACES OF NEANDERTHAL MAN

When Dr. Roy Chapman Andrews expressed his belief that skeletons of Neanderthal man will be found by his forthcoming expedition to Asia, he opened a window on one of the most romantic views which arise in man's hoping to explore. Few human mysteries are more enticing than those which elude the grasp of the human species which speculate call Neanderthal man.

About a hundred thousand years ago in Europe these men were plentiful. Major J. H. R. Allen has been found. The craggers were shorter than we and much more powerful. They walked erect, but always with a stoop, so though unable to be over credited for a leap from danger or toward an enemy, their skulls were thick and strong. Beyond enormous brows and low foreheads their small, deep-set eyes looked on fearfully on what was to them an inhospitable and terrible world. If these creatures survived today they would seem to us, we may imagine, the very picture of frightfulness.

Neanderthal man's mind. A little of his blood runs, perhaps, in the veins of western Europe, but this trickle is slight. In fact, he has been found placed and killed thousands of years ago by men more like ourselves, able and vigorous men whose direct descendants we are. There is small mystery about this, but there is a great mystery about where the Neanderthal man came from. They did not originate in Europe. The men who had preceded them in that continent were of still other types. "Never were they any more like us," says the story we now know, in either of the Americas. Africa and Asia have been less explored. Almost anything may still be discovered.

Asia, Dr. Andrews thinks, is the better possibility. Stone tools and other objects of the golden age have been found by his years' expedition. However, he has not yet found them. Somewhere on earth the creature who made the Neanderthal man must have split off from the main stem of human evolution.

Dr. Andrews and his team learned to make fire and to use stone tools. From some center of their race but sufficient culture they spread out into Europe, where their bones were first found. How these things happened, how this vast drama of the beginnings and continuance and end of the species unfolded itself on the terrestrial stage, is something we may hope some day to read. Dr. Andrews' expeditions, from the digging and sifting of those far-away Asian sands—New York Herald Tribune.

**No Hero in Home Town**

The prophet is not the only person who is without honor among his countrymen. The writer of fiction, declares Mr. Harold McGrath, one of the most popular of young American story-writers, is in the same class. Not long ago, he says, his wife was doing some shopping in their home town of Syracuse. An old lady standing beside Mrs. McGrath heard her give her name and in charging several packages.

"Is that Harold McGrath, the author?" asked the lady.

"Yes."

"And are you his wife?"

"Yes."

"Well, who writes his books for you?"

"He writes them himself, of course. Why?"

"Well," doubtfully replied the old lady, "it may be true, but my two boys went to school with him and they are only bookkeepers now, and they say he won't even do Bart, then."

**Continents Connected?**

Bones of great size like those that still exist in Africa, have been found in India, and some geologists believe that at one time there has been a land connection between the two continents.

**THE FINANCIAL PILOT**

Is As Important as the Seagoing Pilot!

And they both learn in the same school—the only school that teaches the kind of judgment they need—the School of Experience with its long, hard course.

The pilot is a specialist in finance or on the seas. One of our business and financial specialists of long training and wide experience covering many, many years. Their judgment is at the service of the business men of this community—to help in the solution of knotty commercial problems and in laying down sound financial policies. Come in at any time. You are very welcome!

# Get-Films of Eagles

**Feeding Their Young**

My little son, built on the side of a cliff on one of Colorado's wildest mountains, and before me there was a large eye of the golden eagle looking down at the nest of his birds to build their nests. My son was a million picture camera, and the work was all the more exciting because I had never before had those great birds been filmed, writes Oliver G. Pike in the London Mail. Suddenly there was a noise like a great whistle—the eagle had returned. The hen came first, then immediately behind her another eagle with a great whistle—the eagle had returned. Together they sat on the nest, and portions of the flesh torn from their prey were given to the eagle.

Several times during my stay at the nest the birds came out. Once I saw the male flying across the great valley a mile away. Evidently his distance I could see that he was carrying a load, and as he came nearer I saw that he was bringing another bird. This was dropped on the side of the cliff and now the hen brooded over her youngster, while he went off over the wild mountainside to forage for a meal for himself.

This the most difficult work is filming the eagle away from the nest, where there is no youngster to act as bait for the parents to return. This has, however, been successfully accomplished and many scenes in the life of our king of birds have been recorded.

On an one-toned moor there was a wind-swept tree. At its base were a few sheltered benches and these have the life of a sheep's back. Above the eagle was another bird. Thus the bird led the projection of the tree the eagle flew from his perch and endeavored to strike, but each time he missed the bird ran quickly to shelter. The bird had the good sense to remain under the tree, where the eagle could not, early attack, until darkness came but then he was treated and joined her herd.

**THE FINANCIAL PILOT**

Is As Important as the Seagoing Pilot!

**TWIN FALLS NATIONAL BANK**

MEMBER OF REGIONAL BANK FEDERAL RESERVE SYSTEM

# All in Ten-Days' Time

Ten days after Grace Buttery, 18, of Kansas City, learned how to dance the Charleston the Kansas City Journal-Post held a Charleston contest. She entered and won first prize. Now she has a contract to appear on the New York stage.

# Old Castle Crumbling

In a crumbled castle walls a huge breach has been discovered. And there is a danger of this ancient Chateau-Valleu falling into ruin. An architect reported that the castle walls had been crumbling fast in recent years, and a great restoration work was undertaken. The castle was built by Welsh princes, the castle was built by Edward I. It was besieged and dismantled by Owain Glyndwr. It was repaired by Cromwell, and once more repaired. The government has been asked to preserve the ancient pile.

# Remarkable Penny

For 235 years a penny in Liverpool, Ill., has thrived and borne its crimson blossom. Just one it has been transplanted to the home of its first owner, four specimens removed from the original owner. In 1750 George Henshaw, one of the first white settlers in Edinburg, Ill., sent to his home in Germany for the plant. It has survived several transplantations, as the different generations have moved to other houses—in Indianapolis, News.

# History of Corduroy

Corduroy, which is said to be now in little demand, has greatly declined in status in the course of the century. Its name, cord, do, red, indicates that it once enjoyed royal favor, and it is said, indeed, to have been invented by court tailors to provide material for the hunting dress of an old-lie king of France. In its great days it was woven of silk, says the London Chronicle.

# Chinese Superstitious

Because they believe that no Chinese will enter heaven unless he is finally buried in China, natives of that country in the West ship the bodies of their countrymen homeward through San Francisco.

If you don't need it someone else does. Try a want ad.

# Shaping Ships for Speed

One of the wonders of modern engineering is the ability to accurately estimate the time that will be taken by a ship on her maiden voyage from Great Britain to New York, or vice versa. The plan adopted by the builders of one of the largest Atlantic greyhound lines was to make a small size model of the hull, according to the preliminary design of the hull. The model was floated in a tank 400 feet long and 20 feet wide and was then drawn through the water at a rate proportional to the designed speed of the ship. In this way the water resistance was measured and slight alterations in the shape of the hull were made until the water resistance was as small as possible. A large reservoir was built up on the shore to receive the water. The final shape was given to the hull and the best site found for the propeller.

# Snake Falls Well in Japan

While hunters were at work in the grounds of the Imperial Palace in Tokyo, they came across a live snake, so large that they first believed it was a dog and started to move it. The reptile came to life and the workmen noticed it. However, they could not find any way to kill it. The court officials ordered that the crawler be kept in a cage and that it be kept in a cage. The snake was kept in a cage for several days and then it was found that it was a cobra. It was kept in a cage for several days and then it was found that it was a cobra. It was kept in a cage for several days and then it was found that it was a cobra.

# Slow Growth of Oaks

English oak trees are slow growing. Many oaks were cut down during the year 1544 and were grown up in some places. It is said that an oak tree of 100 years old is not really any good until the tree is four hundred years old, and people today cannot afford to grow oaks for profit. Originally large parts of England were covered with oaks. The trees are almost a century old in some places. It is said that an oak tree takes 100 years to grow to a full size, is mature in another 100 years, and takes 200 years more to decay. In some cases it would say this.

# Banish Worry

Life is very short. We can't afford to squander the time resources with which we are most plentiful. Originally large parts of England were covered with oaks. The trees are almost a century old in some places. It is said that an oak tree takes 100 years to grow to a full size, is mature in another 100 years, and takes 200 years more to decay. In some cases it would say this.

# MILNER TRACT GETS PRAISE OF COMMITTEE

### Bondholders' Representative on Visit Enthusiastic Over Low Lift Project and Other Twin Falls Plans; Tentative Agreement Reached Will Be Submitted

Surprised and delighted at a splendid condition which they found in the Milner Low Lift Irrigation district, its committee of bondholders representing the obligations of the district today completed a tentative agreement with the district officers which will be laid before the bondholders of the tract for adoption or rejection in the near future. Details were not announced but it was stated that the proposed scheme will include segregation of individual lands into individual landowners.

The bondholders committee consisted of Robert Denison of Olat, La. A. Johnson of Los Angeles, and E. C. Peterson of Santa Barbara. This is their first visit to the tract regarding the obligations of the district. They were accompanied by C. C. Eberhard, bondholder attorney and William Plunkett, representing the bonding houses of Stevens, Page and Sterling.

All Express Surprise. "I was greatly surprised at conditions which I found on the tract during our investigation," said Mr. Denison. "It is a wonderful country. The land is infinitely good and the soil unusually deep on the Milner tract." Which is some indication for an Imperial valley landowner and farmer of Idaho, observed Mr. Eberhard.

Breaks All Others. "This is the greatest country," said Mr. Johnson. "I have been in all the states in the Union, except three and I have never seen such fine alfalfa as you have here. You have magnificent wheat and sugar. If the in California and was raised in Iowa, but I must take off my hat to this part of the country in this respect. Sweet clover, which we used to think a post years ago in Iowa is coming to be the salvation of many places and I believe it grows better here than in Iowa, though you have to patch it up. Speaking of the Milner tract it has one great advantage which will be

## Interest in the Chautauqua Grows

Interest in the Chautauqua has grown since the program has been presented. Mrs. Thoma Miller stated that a number have said that their enjoyment and that many are expressing desire in anticipation of the big program of music and oratory.

## HIGH ECONOMY SHOWN BY STAR

Created by A. A. officials of the Economic company contest with Rankin made the highest gasoline mileage of all cars entered in the trial. The 2400 cc. engine running on every gallon of fuel out of its tank.

A 1925 Star entered was a four-cylinder 2400 cc. and it averaged 22.5 miles per gallon in the 200 mile race. The Star made 100 in the 200 mile race. The 2400 cc. engine averaged 22.5 miles per gallon in the 200 mile race. The Star made 100 in the 200 mile race.

Appreciated later; its drainage is better than any other tract we have seen. Mr. Peterson emphasized the remarks made by the others.

Harry J. Bond is Twin Falls attorney for the bondholders, who will be holding a legal representative of the Milner Low Lift.

ENTERTAIN your brother, "metal" and private parties at our Country House, East Center St., Kimberly. Special attention given to Sunday dinners. For reservations phone 24.

When you need a job, use The Times want return.

## PETERS SEARCH PETERS OUT IN GOLDEN STATE

Latest address from Long Beach indicate that no further word has been received regarding the whereabouts of E. S. Peters, since that search by officers of San Bernardino county has been practically abandoned. The last time anything definite about him appeared was June 1, when he played the reed at the McVee lunch at Harston.

## NOTED DOCTOR TO SPEAK HERE

Whitfield Scott Hall, M. D. of Chicago, will speak in the First Presbyterian church to boys and especially boy scouts, at 7 o'clock Sunday afternoon, June 20, to 10:15. Hall will address young men, both young and old, men and the male students, long from college and university.

## Popular Airs of Boy Band Please Big Crowd in Park

With colors flying from his automobiles 25 members of the Boise Boy band and the direction of E. O. Spies and sponsored by C. B. Sampson of the Savings Bank company, arrived in the city last Friday afternoon after having played for the people of Lind and Ellier while on the way here.

They were greeted with applause following by an honorarium stood in the city park, where Messrs. Sampson and Spies were introduced by Mayor E. L. Arvink. Mr. Spiespointed that the band is self-supporting and that it is the highest educational during the last 10 months under the direction of Mr. Spies.

Announcements The football club will entertain with a family picnic at Artesian Sunday, June 20.

## WINDY WARE MERCURY TUDDE UP

Whistling winds from the north pole sent the mercury down last night to 48 at 2:30, when it rose to 50 at 4:30 today. The night thermometer reached 50 above yesterday, or about 5 under the highest point reached Thursday.

## NEWS IN BRIEF

Girls to Detroit—Mrs. Kenneth T. Thoma left this morning for Detroit. Comes to Visit—W. W. Cavallari arrived today from Los Angeles to visit his daughter, Mrs. E. T. Thoma.

Here from Los Angeles—Earl Reister, accompanied by his wife, is here to visit his son, L. Reister and family.

Off for Vacation—Asher B. Wilson and family left yesterday for Harston and other points and will be gone about two weeks.

Home from Iowa—Mrs. C. E. Adams returned today from Iowa where she had been called by the illness of her father.

Back to Colorado—Mrs. Stella and Mrs. John J. Allen left for Denver, Colorado, after visiting a couple of weeks here.

Missing Car Recovered—The Park and car stolen Thursday night from where it had been parked by the Mrs. J. W. Webb, of Park, Utah, when it returned to Park.

Wanted in Montana—Russell B. Rose was taken into custody here last evening by Sheriff E. E. Finch on request of the office of Kallispell, Mont., who stated that Baker was wanted for a murder in Montana. He is about 20 years old.

Shipped by Air—The Anderson luncheon referred to yesterday as having been raised by Laug & Silcher, was shipped, it is stated, 75% tonight. They were able to hurry the shipment of Kimberly before they were shipped to Olat by the purchaser.

Divorce Granted—Mattie Leggett was granted a divorce by Judge W. A. Babcock Friday from Cecil B. Leggett on ground of cruelty and non-support. The case was not contested. She has custody of the two children, Harry J. Bond is Mrs. Leggett's attorney.

World Bond All Lines—Arthur E. Stice of San Francisco, patent attorney, and manager of the caravan from the Golden Gate, arrived last evening with his wife on their return trip. This find of the caravan to come back this way, says the office of Idaho and surely its great agricultural resources should be advertised.

Appoint Special Master—John Jensen, watermaster of the Twin Falls Canal company was appointed to have special charge of the water flowing through a ditch in William George and Dr. L. H. Giffen, who are in litigation over the flow. Judge Babcock made the appointment pending determination of the litigation in question.

Peterson and her aunt, accompanied by her son Otto, arrived today from Henefer, Utah, to attend the funeral of Lewis H. Jerome, which was held this afternoon from the Gerson chapel and it was conducted by Rev. D. G. Humphrey, pastor of the Methodist church.

Here from Oregon—Glen Schneider and wife of Eugene, Ore., are visiting the home of their parents, Mr. and Mrs. E. C. Schneider. Mr. Schneider received his degree from the University of Oregon this spring and will be in the city for some time in the near future. They will leave in two weeks for Eugene where Mr. Schneider will take up his work as assistant register at his alma mater.

Here on Vacation—W. C. McArthur, former Twin Falls manager of the Schramm-Johnson Drug company is in the city from Dinwiddie, Canada, with his wife. They are in the city for some time in the near future. They will be here until Tuesday when they will be joined by another family from Salt Lake City and will then proceed on their way.

Girls to Utah Capital—Mr. Glenn Blake, connected with the local branch of the Profit System who has been an opportunity to make it by becoming a partner of the Producers & Consumers Trust Co. will let it explain, 357 Blount St., South, Twin Falls, Idaho.

## HUBER SAYS BRIDGE WILL BE ERECTED

"I am here to remain a few days in order to get things under way on building the bridge," said Mr. Huber of Portland, successor of the late C. W. Sears as president of the Twin Bridge company, told in a speech representative this afternoon.

"You are really going to build it," he was asked. "Why, yes, certainly, what do you suppose I am here for, my health?" he replied laughingly. "I certainly enjoy the fine climate of Twin Falls but I have not picked on it as a summer resort this year. I am not prepared to make a detailed statement at this time until I have gone into the situation, but may have something to say in a short time. I shall be here a few days before returning to Portland."

of the Mustang Intermountain company left today for Salt Lake City, where he will be married on Tuesday of next week in the Mormon temple.

Will Visit Parents—Mrs. C. P. Bowles has started for Los Angeles to visit her parents.

Start for Illinois—Mr. and Mrs. O. S. Black left this morning for Illinois to accompany the body of Mrs. Black's mother.

Takes Body Away—Ellis Mitchell left today evening with the body of her father, J. W. Webb, of Park, Utah, when it returned to Park.

Enters Annually—Lawrence Tutson, son of Mrs. Burton H. Smith, has passed all required examinations and has entered the U. S. naval academy.

"Human Flue" Drills Monday—Registration and drill for the "human flu" a feature of the Fourth of July celebration and under the auspices of the Henry V. Wallace Circle Ladies of the G. A. R., has been called for in a check Monday morning in the city park. All girls and boys between the age of four and twelve are asked to participate.

Pastor Returns—Rev. C. C. Curtis of Twin Falls, who has just returned

from the South Idaho convention of the Christian church at Caldwell was elected vice chairman for the coming year. E. M. Tomlinson of Bluff, a member of the board of directors. The next meeting will be in Jerome.
