WIDOW OF PAT HARRISON IN 'DEBT REFLECTION'

NEW YORK, July 20.—The administration has hauled its foreclosed settlements and lessened the possibility of remote satisfaction of the estate of the late Senator Pat Harrison, Democrat, Mississippi, charged here today.

Referring to recent announcement by Secretary of the Treasury that the terms granted foreclosed debtors were more than lenient, Harrison's widow is quoted as saying: "I am glad to know that at last Mr. Mellon as spokesman of the administration admits that the debtors were given an opportunity to make their own terms and Italy amounts to credit."

Employers Special Staff to Probe Shooting of Lumber Man by Pastor. Grand Jury Opens Investigation in Case of Dr. J. Frank Norris.

PORT WORTH, Texas, July 20.—Special provisions have been maintained by Mrs. D. E. Clippus, widow of the lumber man slain Saturday by the Rev. J. Frank Norris, who is in a hospital in all evidence of the case, it was learned today.

Witness Heard. A grand jury heard today the story of the fatal shooting of the lumber man, by Dr. Norris today.

It is believed to be the only eye witness to the latest sensational episode in the life of Norris—throughout Texas as the "Texas cyclone" because of his vicious habit of being accused from time to time.

RADIO EVANGELIST CLAIMS INQUIRY WINDICATES HER

Probe Results in Triumph for Cause, It is Contended in Story for United Press.

BY ANNE SEMPLE McPHERSON. Pastor of Angeles Temple, LOS ANGELES, Calif., July 20.—(By United Press.)—The most official investigation of my unfortunate experience with auditors, there can be only one ultimate result—vindication of my cause and the triumph of conviction.

Throughout history the progress of truth has been impeded by avarice and by those evasions of the power of righteousness.

This entire affair, I am convinced, was the work of the enemies of Angeles Temple and the four square gospel. Jesus of the success of a safety campaign based on a simple old-fashioned faith in the Bible, by enemies who had endeavored to do me genuine and infamous public ever perpetrated on a public character.

Without seeking martyrdom, I have tried not to dignify the matter by a refusal to discuss it, which has been my sole aim in the wreckage of a profitable campaign.

The continued popularity of Angeles Temple, evidence of the unbroken faith of my people, the temple every day, since the outbreak of the ill-considered attack of my enemies, has been a great help to those who have accepted the Lord Jesus Christ as their Saviour.

The great revival takes impetus from the Word of God. The details of my kidnapping and escape have been related many times, both from the pulpit and in the schools.

There is no malice towards those who have persecuted me since my return. Ultimately their accusations and charges will be disproven.

Until then we shall carry on as before, with the aid of the renewed confidence and faith of our followers who have been strengthened by our help and kind words of encouragement.

SUN DANCE OF INDIANS COMPLETED

Blackfoot and Shoshone Tribes End First Ceremony in Four Years.

Few on Hand As Demonstration Comes to Close; Feasting is Scheduled.

WELLSVILLE, Idaho, July 20.—Invited guests of the "Shoshone Shuffler" in the Blackfoot valley, Idaho, today concluded the sun dance of the Shoshone and Blackfoot Indian tribes, inaugurated in their honor for the first time shortly after sunrise today.

The "Shoshone Shuffler" referred to the annual sun dance of the two tribes, and the first in four years held on this reservation.

Through the circulation of misinformation, many students of the district gathered at the reservation had been expecting to witness the end of the ceremony, but they were, instead, accorded a glimpse of the spectacle at its height.

During the last hours of the afternoon, four or five of the braves dropped from sheer exhaustion and those whose strength kept them in the rite performed an hour's rest just before the twilight shadows settled over the little amphitheater.

Starkers today brought a welcome end to a few early risers in the section were on hand as friends took the dancers in charge.

Feasting was reported as well on the program and, like the Indians of the buffalo days, these dancers were to feast and then lie down to rest.

Princess Gustavus Likes Old Rites. MISA VIRDE NATIONAL PARK, Idaho, July 20.—Princess Gustavus Adolphus of Sweden, who with the crown prince and a party of royal visitors, arrived here today for a visit to the park and to see the monument to the memory of Blip R. M., where Sunday last started excavations into an Indian grave.

Princess Gustavus, having made extensive studies in archeology, has exhibited keen interest in the ancient rites.

He said before leaving here that he believed from what observations he had made it was possible there was a burial site near the mound of Blip R.

At PASO, Texas.—Tommy Wingo, manager of the Paso Stock and Cattle Co., has been elected to the position of president of the organization.

Now—for America

a revolutionary European-type high-speed Light Car

- This New Car Offers:**
- 30 miles on a gallon of gasoline
 - 55 miles an hour—5 to 30 miles in 13 seconds
 - 4-wheel brakes—stops in 51 feet from 40 miles an hour
 - Turns in 34-foot circle—easiest car in America to park
 - 5 feet 8 inches high—lower gravity center—greater safety
 - European-type body—more inside room than any other light car

One of the first Whippets being inspected by Miss Lois Wilcox at her New York vacation party studio

A three-minute study of these remarkable facts may save you from buying an obsolete automobile

THIS is the announcement of a revolutionary new type of car, different from anything you have ever known before.

A car that combines the advanced engineering practice of Europe with new and improved standards of American performance.

This new car has a low, European-type body. With height and length in truly symmetrical proportion.

It is 5 feet 8 inches high... not as tall as the average man. Yet it provides more room and comfort than you've ever found in any automobile of this class before.

It has a high-torque, 31 horsepower motor of small bore and long stroke—the same engineering principle used in the fastest racing cars of America and Europe.

It turns in a 34-foot circle... that's less than the width of an average city street. You can park in a 4 feet... which is much less than the space required for the ordinary car.

4-wheel brakes are an integral part of this new car's chassis design... a necessity which light car owners have not hitherto enjoyed. Measured tests show that it will stop in 51 feet from a speed of 40 miles an hour.

Its center of gravity is extremely low, with ample road clearance... a sense of security you have never found in any light car. Something you actually feel when you drive this car.

Two engineering ideals combined

The Overland Whippet represents a combination of the most advanced European and American engineering thought.

Compare with old-fashioned, bulky cars the Whippet appears smaller and much more graceful

It is a complete new car... designed and built as a unit... not an old-fashioned reconstructed chassis.

For over three years, Willys-Overland engineers in Europe and America have been developing it. Over 360,000 miles of road tests proved the practical advantages of this car before it was released for production.

The distinctive body lines of the Overland Whippet frankly resemble the smartest automobiles of America and Continental Europe. Stand in front of this car and you can imagine yourself on the boulevards of France.

Low-slung... graceful... that's the only way to describe it.

Complete symmetry of design has been achieved with compact external dimensions.

Compared with contemporary big, bulky cars the Overland Whippet appears

years smarter and much more graceful. That's because height and length are in true artistic proportion.

In the Overland Whippet you have the feeling of riding close to the ground... with the resultant sense of solidity and absence of that sideways so noticeable in the conventional type of car. That high-up-in-the-air feeling is gone... here is a new kind of riding comfort. Step into this car and you will be surprised to find so much spacious room.

You can compare the Overland Whippet with all other American light cars on the basis of price alone. But from the standpoint of engineering, performance, comfort and quality, it has established an entirely new criterion by which all other light cars must be judged.

The Overland Whippet is furnished in three body styles... Sedan, Touring and Coupe.

See this new-type car

You have never seen a car like this before.

With the introduction of the Overland Whippet, it is not sound judgment today to consider the purchase of a less modern car.

A new trend of automobile design is dawning in America. Other light cars of this design will follow this one.

But Overland... and Overland alone... offers you these unique engineering attainments.

In fairness to yourself, see this wonderful new type.

IDAHO INVESTMENTS

Idaho's investments have increased five million dollars since 1919. E. M. Hoover, commissioner of public investments, states in an analysis of the cost and the business of his department, made public recently...

Earnings on endowment funds go to the state institutions. The public school fund earnings are apportioned among the various school districts. Every district receives its pro rata on the earnings of its own bonds and those of other districts held by the department.

The present organization of the department has increased the holding of bonds, since January 1, 1924, until it is now 62 per cent of the total investments. The increase, \$1,904,890.06, is an increase of 33 per cent.

The office handles about 8000 sales certificates, collecting the principal and interest installments, sending notices and caring for correspondence; negotiates for bond issues and prepares bonds, collecting interest and principal. It now has about 700 issues on the books of districts of the state. There are farm mortgage loans in 43 counties, totaling \$3,990,112.46.

The personnel of the department consists of the commissioner and five employees, who are bonded for a total of \$105,000. The cost of administration is less than one-fourth of 1 per cent on the funds handled.

RECORD OF SIXTY-NINTH CONGRESS

The first session of the sixty-ninth congress passed hundreds of bills. Ninety per cent were of purely local interest—increasing one's pension, granting permission to put a bridge over a navigable river, authorizing a citizen to sue Uncle Sam in the court of claims, etc.

The important work of the session may be summarized as follows: Bills Passed—Mellon tax plan; of great benefit to the very rich.

A number of administration bills to compromise debts owed this country by European nations. Italy got off with a promise to pay 2 cents on the dollar. The international bankers were back of the compromise, largely because they desired to pave the way for huge American loans to Europe.

Railway Labor Act for the settlement of disputes between the carriers and the employees.

Resolution announcing this country's willingness under certain conditions to become a party to the world court.

La Follette's resolution to investigate the "deal" between the department of justice and the bread trust.

Bills providing for the expenditure of between \$150,000,000 and \$200,000,000 on the air forces of the army and navy.

Continuation of federal aid for roads.

Usual appropriation bills, total expenditures showing a marked increase despite the administration's talk of economy.

Killed—Agricultural relief legislation, including the "Corn Belt" program and the president's substitute.

Sidetracked—La Follette-McNeely resolution to regulate expenditures in primary campaigns; this measure would have put an end to "Newberyism."

Bill to present Muscle Shoals to the power trust; will be revived after election.

Regulation of coal industry; blocked by the mine owners' lobby.

Rivers and harbors bill, carrying a number of juicy grafts including the scheme to unload the Cape Cod canal on the government at a fancy price, thus permitting a group of New York bankers to avoid heavy losses. This is scheduled for passage in December.

French spoilation claims; a scandalous proposal growing out of our misunderstanding with France more than 130 years ago. The "claims" were bought up by speculators and now they are endeavoring to "cash in."

Regulation of radio, a tremendously important measure.

Ogden Mills' Bill—Mills' bill to make Uncle Sam pay for the damage done American interests by the Kaiser and then take chances on recovering the money from Germany. When it first appeared in the house, this measure, sponsored by the administration, caused such a scandal that it was "put on ice" until after election. About \$250,000,000 is involved and the Wall Street lobby will be very much "on the job" in December.

McFadden bill granting national banks the right to establish branches and extending the life of the federal reserve system for 50 years.—Labor.

BORAH RAZZES WET MOVEMENT

AGUSTA, Ga., July 19.—The prohibition nullification movement is being organized in this section of the state. William H. Borah, senator of Idaho, is identified candidate, as a "help from the same kennel" as Bullockston, Fessenden and military dictatorship.

Speaking here recently on his way across the country, Borah declared the motion must stand against nullification movements, maintain respect for the constitution, and if it is to seek success—seek it through proper channels, mainly a daily amendment of the constitution.

He ventured to say that there could be no greater exhibition of self-education, of national development, than for this great people to leave the eighteenth amendment in the constitution and, as a result, seek for it and live in daily disregard of it, he asserted.

"Instead of amending the constitution so as to take this matter back to the states, if it is thought wise to do so, it is seriously proposed that the states shall be given control, regardless of the constitution through these referendums.

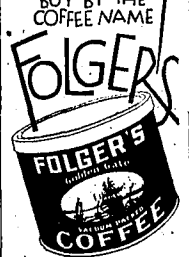

Borah said that if the eighteenth amendment "was an injustice, the distribution of power between the states and national government, then the people can take it out of the constitution in the same way and by the same process they wrote it into the constitution.

RADIO INVOKED IN CAMPAIGN

DALLAS, Tex.—The radio will be utilized this week in an attempt to elect James Ferguson, governor.

Lucretia Davidson, one of the principal contestants for the honorate nomination as governor, plans to spend the week electric speeches over the radio.

James Ferguson's final campaign appearance will be Friday night at Austin. Former Governor Jim Ferguson has arranged for a big public celebration.

Practice Discretion. Discretion of speech is more than eloquence; and to speak agreeably to him with whom we deal is more than to speak in good words or in good order.—Bacon.
