HAILEY BANK BUILDING BURNS

HAILEY, Idaho, Feb. 10.—Fire early this morning destroyed the building here formerly owned by the Hailey County National bank with a loss of \$250,000.

Business firms and homes located adjacent to the structure and suffered the largest losses although insurance was carried by some on their stocks.

Compared with penitentiaries, the discipline enforced is mild, but it is in evidence everywhere. The official fully realize they have some "hard cases" on their hands and are always prepared to subdue inhumanity.

REN MAYNARD'S NEW PICTURE TRAVEL DEVELOPMENT OF STAGE COACH LINES

One of the screen's great gifts to the public in the history contained in such pictures as "The Overland Stage," the Ken Maynard starring feature for First National, at the Orpheum. This impressive production shows one of the really great events in the conquest of America: the building of the stage coach-lines from East to West. The celebration of this historic event was recently re-enacted on a massive scale at the site of its occurrence, Deadwood, S. D., and the Maynard company, directed by Albert Powell, journeyed there to film it as part of their epic.

REAL RANGE RIDER RONALD'S HOTEL RIVAL

Gary Cooper, son of a Montana superior court justice, former student of Gonzaga college, Iowa, and a rider of the range of his native Montana, is cast as "Alto Lee" in the Henry King production of "The Winning of Barbara Worth," which is now at the Idaho theatre.

Cooper has played hits in motion pictures only a year, so the part of the Lee, young engineer of the desert and rival of Ronald Colman for the hand of Barbara Worth (Clara Bow) gave him his most important film opportunity.

According to Henry King, Cooper was ideally cast for his role of Alto Lee. "He is a typical desert engineer," said King. "With his 6 feet 2 inches of height, and 180 pounds of brown and black hair."

NEWS OF THE SPORT WORLD

BABE RUTH WILL SIGN FOR 100,000

Home Run Bambino Will Ask \$100,000 for One Year or \$75,000 for Three-Year Contract; Will Bank \$50,000 Based Partly on Ty Cobb's Contract.

By HENRY L. FAIRBELL. NEW YORK, Feb. 10.—The manager of the Philadelphia Athletics for 1927 and a record announcement by Colonel Jacob Ruppert, owner of the New York Yankees, have revealed that Babe Ruth, in the contract, which soon will be offered Babe Ruth.

Ruppert had his little say when he told sports writers that none of his players would be permitted to report to the training camp of the Yankees at St. Petersburg until he had signed a contract.

While Herb Pennock, the slender pitcher, also had been unable to agree upon his annual wage the announcement of the contract was being made directly at Ruth, now making a move for the public good.

The Babe hits about three words to finish positive for the contract and get his contract difficulties ironed out. The last detachment of Yankees will leave for St. Petersburg on March 5 and the Babe's movie work will stop on February 25. That means that the Babe must hop to New York from the coast, talk with Ruppert and agree to leave for the South—all within 8

days. Ruppert insisted he was not contented with his star slugger since the close of the season and hence Ruth should yet be planned as a football player for next contract bidding for \$52,000 yearly plus options and liabilities were that the Bambino will not be back.

With Cobb drawing down between \$50,000 and \$75,000 from the Athletics, it is conceivable that Ruth will ask for \$75,000 a year for three years. And the answer from Ruppert, who like all owners of pennant winning ball clubs is barraged by requests for salary boosts, may be "try and get it."

The sympathy of fandom is with the Babe. If "Ty" Cobb is worth anywhere near \$75,000 to the Philadelphia club, Ruth is worth at least \$100,000 to the Yankees.

Sooner or later Colonel Duke and Babe will reach an agreement and those who remember Ruth's training difficulties in the past agree that the Babe is worth the money. If he decides it shall be sooner, if Ruth is barred from the training camp because of salary hickering the effectiveness of himself and his team in the early part of the season will be damaged. The Babe, at 35, evidently is planning an old age free from financial care. He has not \$20,000 from the coast to the Bank of Manhattan company here an part of a \$100,000 trust fund to frighten wages from the Ruthian door when his baseball career is ended.

Ruth said he expected to bank \$50,000 more by June 1 and complete the fund before the end of the year. That optimism indicates that the figure of \$100,000 for a season's play has not been his winter dream.

MINNEAPOLIS—Displaying a brilliant offense the Chicago Cardinals hockey team defeated the Minneapolis Millers 5 to 0.

CHICAGO—Muddy Callahan, junior welterweight champion, will make his first appearance in a Chicago ring tonight against "Spug" Myers, hard hitting westerner, in a 10 round bout.

FREE THROWS

Fans are coming to notice that Hollis Martin has a deadly eye for free throws. Both in the football and basketball he aims accurately every free shot count. When Hollis puts them through they usually zip through without troubling the hoop.

Florn Ward, continue to show great improvement in every succeeding game. He was a star for the Bruin side Tuesday night. His final work which was best yet at Bruin's fuster every game. In scoring he came next to Kelly with 3 points. He also managed to get the tip-off most of the time which helped the Bruin a lot.

Games at Bruin and Shoshone have seemed to prove that the Bruin's style of play this year is aided by a large sum. Especially at Bruin, the larger sum was a distinct advantage to the Twin Falls team.

A very simple signal play drew the Bruin from the Bruin game and sort of took the Yellowjackets' breath. Ward got the tip-off and the very first play, tipping the ball off to Kelly-Kelly passed it to Haynes. Haynes passed again to Ward and Ward slipped in the ball for the first point of the game.

LINCOLN DEFEATS C. OF L.

MEMPHISVILLE, Ore., Feb. 10.—The College of Idaho dropped to the bottom of the Northwest basketball conference here last night when Linfield defeated the Coyotes 27-17. At half time the score favored Linfield 12-11.

BRUINS TO PLAY GOODING TONIGHT

Tonight both the Bruin boys and girls are out for Gooding's goal. At Gooding tonight they will try to avenge some of the Saturday's defeats. With the decisive halloping handed to Bruin Tuesday night in mind, the Bruin boys should come through with a win. And if they win at Gooding tonight they will be rated on par with at least one of the strongest teams in the district. The girls put up a strong fight against Gooding Saturday night and it is altogether possible that they will turn the tables too.

Captain Bertsch showed up at practice last night—the first time this week. Coach and men were mighty glad to welcome him back, even though he didn't suit up or play. His foot is much better and he is now on the right road to recovery. However, he will be unable to play tonight or to practice for the rest of the week. But for the Bruin and Piler gang next week he will probably be back in his old position.

Rheumatism can't be rubbed away

Are you one of those unfortunate who suffer with pains in your muscles and joints, making you irritable, less efficient, interfering with your working hours, ruining your sleep? You may have tried many things without relief. Why not try S.S.S.? For more than 100 years it has been giving relief in thousands of cases, as testified to in unolicited letters of gratitude. I suffered from rheumatism for a good many years. At times my joints would swell so, I couldn't walk. I tried most everything that went to my spine and finally I decided to try S.S.S. I took a course. In a short time the rheumatism was gone. I also had a breaking out on my hands for years that nothing would heal, but now this has disappeared, and I am sure that it was S.S.S. which removed the cause, and I am now in perfect health, and want to add that I have tried all kinds of medicines but I think S.S.S. is the best. Your pipe can be a cheer or a chore

IT DEPENDS on what you feed it. Put it on a regular ration of Prince Albert and it will yield you pleasure, without stint or limit. "Never," you will say, "has the old pipe tasted so good." There isn't the ghost of a doubt about it. Just try it!

As you open the tidy red tin, close your eyes and drink-in that rich, rare aroma. You can hardly wait to get the taste of tobacco that smells as good as that. Then the big moment: You load up and light up. That's Prince Albert. Men, prime favorite of veteran smokers.

Cool as a magistrate fixing a fine. Sweet as the news that you won't have to pay it. Mild as a wifely rebuke for having spent too much on her birthday present. Mild, yet with that full tobacco body that satisfies your smoke-taste to the limit. A smoke!

Buy yourself a tidy red tin of P. A. and give your pipe a chance to deliver capacity joy. No matter how settled you appear to be on a smoke-program, try Prince Albert. Millions of pipe-happy men declare that no other tobacco is like it. You'll say so.

PRINCE ALBERT
—the national joy smoke!

P. A. is sold everywhere in this and five foreign and half-penny tin form. Also, and special crystallized handbags with pipe-keepers. All sold always with every tin of this and each purchased by the Prince Albert process.

Don't profess too much. Be careful how you give in your holdings.

Any way you take it, at last money-making is a solid business.

Lead some soul into the larger life—where first you must abide.

In some quarters a man and his family are not really considered respectable unless they indulge in conspicuous waste.

Many a fellow is defeated by his double—his lack of confidence. Take the risk—to falter would be sin.

He who is worthy of being called a man is unshaken in adversity, humble in prosperity, courageous in danger, and, if not learned, has at least a love for learning.

There is an irresistible fascination in the life devoted to letters. The path of the literary genius is paved with honors. Few there are who turn their faces to the hills beyond the desert who ever live to cross it.

Let your friends be numberless. But that inner circle—be wary of its growth. The day that Napoleon reduced it to three personages he paved his way to the crown.

In this remarkable age of heart-exposure, when all is being brought under a light surcharged as with radium, may we not ask: "After all, is not everybody about as bad as anybody?" But we must try to keep from the re-eminings of the mere pessimist and the employment of the detestable character-assassin.

IDAHO URGED TO RAISE COWS

There is a lot of efficacy in what one of our university professors says, when he states that Idaho farmers should raise their cows instead of importing them. However, there is two sides to this sort of a question and unless you import some new seed you will not be able to materially raise the standards greatly. But we will give the professor an opportunity to have his say this time and we will reserve judgment until then.

In the first place, Professor Atkinson points out "Cows can be raised in Idaho as cheaply, or more cheaply than in other states, because the price of feeds, especially alfalfa hay, is much lower than in most states; secondly, the practice of maintaining herds by purchasing cows invariably results in slower progress in herd improvement because a farmer must constantly buy the less desirable animals from other herds. By the use of high quality, herd sires and proper methods of rearing calves from the better cows rapid improvement may be effected."

There were on January 1, 1926, approximately 163,000 dairy cows in Idaho, according to Professor Atkinson. Usually cows are milked about five years, which means they are replaced when they are about seven years of age. On this basis it would be necessary to raise 32,600 dairy calves each year in order to replenish the existing herds. Furthermore, he says, dairying is expanding very rapidly in Idaho. More than enough calves to maintain the present herds are now being raised.

Considering the cost of getting calves to producing age, more than two million dollars must be spent each year in raising dairy cows to replace the ones that are discarded. The expenditure of such a vast sum annually requires careful study of the problem. Professor Atkinson stresses the idea that it is essential the calves be reared properly so that they will be valuable cows, otherwise the expense is not justified.

OSTEOPATH BILL TABLED BY IDAHO LEGISLATURE

Profession Seeking Greater Recognition—Come Under the Department of Lay Practitioners

BOISE, Feb. 10.—The osteopaths of Idaho are seeking recognition from the present Idaho legislature, by amending the present laws so as to elevate their profession. Their bill was introduced in the house of representatives Monday, and tabled Tuesday. It not only had the backing of the osteopaths of Idaho, but of many other people, it is claimed, who are interested in the osteopathic profession.

The measure sought to give to osteopaths the right to perform operations. It is said that graduates of osteopathic colleges will not locate in Idaho in sufficient numbers to supply the demand when they have their practice so limited that they have to call in a surgeon to lance a boil for one of their patients needing this very simple surgical care. They can locate in California, Oregon, Washington, Nevada, Utah, Colorado and many other states where the practice of osteopathy is only limited by the ability and training of its practitioners.

During the past year, while the practice of surgery, and the art of healing, has made the greatest advancement, the osteopathic school has developed from that of the practice of one man, Andrew Taylor Still, M. D., to that of a profession which numbers 7000 graduates and six colleges having from 250 to 750 students. The Kirksville College of Osteopathy and Surgery at Kirksville, Mo., with its 750 students, is at the present time the largest medical college in the world.

Father Will Face Charge of Bombing Home. Killing Two

PITTSBURGH, Pa., Feb. 10.—Local strategy on the part of state attorney caused Earl Mayberry to be returned to jail yesterday, charged with ending Mrs. Mary Davis to a gas, Okla. for alleged purposes in July 1925. Mayberry had been held three or four days in connection with a dynamite explosion last Sunday night at the home of his estranged wife. The blast killed the two children and seriously injured Mrs. Mayberry. Prosecutors did not want him freed until the explosion can be properly investigated. Mrs. Davis also was arrested and has been questioned by prosecutors before a coroner's jury for two days. She admitted that she had seen Mayberry and that they planned to marry when he came out of jail. Mayberry filed suit for divorce recently. Mayberry would say little about the complex family affairs but Mrs. Davis described the twisted love tangle between herself and Mayberry and her husband and Mrs. Mayberry to the surprise of the attorneys and witnesses. The district attorney said Wednesday he will place a charge of first degree murder against Mayberry in connection with the bomb deaths.

Democrats Rival G. O. P. Senators in Oral Feats

Taking a cue from the national performance of the individual in the Senate, Frank H. Goggin and J. D. Fee in the U. S. Senate Wednesday when the latter took exception to the statement of the former that the tariff did not protect the farmer and just to show that democratic eloquence was on a par with republican eloquence, Sheriff M. E. Finch and Deputy Auditor Harvey Cogburn placed a discussion point in the committee's room last evening at 4 o'clock. Finch and Lane don't prize ring rules prevalent, would have wanted in severe invectives. It all came along over a midnight slanting evening session in which the deputy auditor went on the assumption that the names of federal court judges appeared on the arrival, instead of being entered merely on the roll record on that date. Finch asked a verbal question in both hands and Cogburn had a witty and appropriate answer. Commissioner James L. Barnes and Deputy Sheriff Charles L. Jones tried their hands as a means to separate the debaters in their respective attacks. The production of the full record cleared the subject and when the air had been taken from the heated argument work. The record showed presence of women prisoners in the jail on all occasions when a matron there was made.

Salmon Water Shed Has Much Wet Snow

Heavy snow on the Salmon water shed this year are reported by P. E. Yalton, who has just returned from the Idaho mines. The snow is packed and full of water, he says. The forest ranger in Shoshone Park reports 12 inches of wet and packed snow. With the expected accumulation of the 2000 acres of lateral "A" the retinal tract will have ample water next summer, and probably for all time thereafter. It is predicted.
