NEED PUBLIC CO-OPERATION

Complaints frequently are made to the editor that there are numerous violations of the traffic laws in Twin Falls, the claimants in nearly every case charging that the police are lax or not on the job. One man who refused to give his name, but who has visited the editor two or three times to tell about the trouble he is having in getting through the "demp," traffic here, went so far as to declare that the Twin Falls police were sound asleep for us to drive there that the Twin Falls officers sound asleep for us to drive there.

Realizing that if such a terrible condition existed that a movement should be launched to wake them up, but having heard the same story and having found it to be false on many previous occasions in other cities, the editor made an investigation before embarking anyone.

Inquiry reveals that enforcement of the traffic regulations in Twin Falls is in a small degree, up to the citizens. Approximately 100 traffic violations have been presented at police headquarters this month and this has been accomplished with two officers watching traffic and everything else at night and one during the day. This force is far too small to completely blanket the town and some assistance must come from the public.

Any one witnessing a violation but who will not report it and then appears as a witness when the arrest is made is to be condemned for criticizing the police and really is not doing his duty as a citizen. These policemen on duty during 24 hours can not patrol the city and watch the traffic at the same time.

One hundred prosecutions in 24 days on traffic rules alone would seem to indicate that the officers are far from being hard-pressed.

TRUE TO SCRIPTURAL ADAGE

The scriptural adage "to him that hath shall be given" spans up fairly accurately the farm situation this year as revealed by a report issued yesterday by the United States department of agriculture.

While it is not a "bumper" year, according to the report, short crops in several commodities—corn, cotton, oats and most fruit will result in good money for those who have them. In this respect Idaho is shown to be particularly fortunate in that the crops in this state are far above the average of many others. On the other hand, farmers who have had luck with these crops, the report says, will have a poor year.

Outside of a "spotty" situation the outlook is for a fair year. The wheat crop is good and wheat farmers will get good prices while the outlook for cattle generally is promising and the general level of prices next year may possibly be higher.

Sheep and hogs are about the same this year as last but the sheep market is on a gradual decline due to large production for the last few years and the agricultural department suggests caution as to further expansion.

Generally the department considers crop prospects excellent in North Dakota, Montana, Nebraska, IDAHO and Oregon, where irrigation for government aid has received considerable support.

These statements, coming from the department of agriculture, should bear weight and coincide in every detail with forecasts made many weeks ago by THE TIMES in this column.

Idaho, indeed, is destined for a year of business and agricultural prosperity such as it has not experienced for many seasons.

TALKS ABOUT HEALTH

Several years since I have lawed in the medical field. At publication I am now 60 years old.

Within a dozen months the patient in me has disappeared, held in check by the strict discipline of a strict diet.

This tends to reduce infant mortality to a minimum.

It is the result of a strict diet.
