

TWIN FALLS NEEDS THESE

By L. E. S.

The Times—has—repeatedly stressed the necessity of a diversified source of revenue for southern Idaho and particularly the Twin Falls district so that there will be no such things as "good years and bad years" they now say.

Of course, agriculture is, and of necessity must continue to be the principal industry in this part of the state. A large part of the cause for the "bad years" of the past have been eliminated during the last two years by the development of the American Falls dam which assures even more water than this district could use if there were no rainfall for a year. But additional water will not govern market conditions in their entirety. An ample crop when the yields elsewhere are short, will, of course, result in good income but there are times when the yields in other states are heavy and, then, as at the present, must bear part of the burden of low prices along with the others.

A diversification of industry here, however, most certainly would go far to alleviate bad years, close credit, and the resultant storm of mortgages.

A sample of efficient action in this direction is shown when Holt obtained the new milk factory.

A cursory survey around the Twin Falls tract at this time of the year will show even the inexperienced person that thousands upon thousands of tons of fruit and vegetables are wasted because they do not conform to shipping measurement requirements, because they are slightly bruised or blighted or for some other trifling reason. The trouble is that in years of plenty, like 1927, south Idaho is entirely too well satisfied with receiving the income from strictly No. 1 or first products such as apples, which bring the highest price, because they happen to be the favorite of eastern and foreign markets. This is all very well as long as there are plenty of the "fancy" brands. The seconds or slightly damaged products too often go to waste.

We must have more dehydration plants; canning plants; juice processing factories; etc., etc. There is one dehydrating plant here now and it is doing good work but, as stated before, there are thousands and thousands of tons of products not touched and which might just as well bring thousands of dollars of revenue yearly to this district.

The suggestion is not stretching anything impossible. Dehydrating, juicing and canning factories are considered absolutely essential and rightfully in Utah, California, Oregon, Washington, Wisconsin and other producing and fruit centers why not in South Idaho, and to the same extent as in the other states mentioned.

Another improvement needed for Twin Falls, south Idaho, Utah and eastern Oregon and Washington is the establishment of an airplane passenger, express and freight, air line service.

Laugh, if you must, but the fact remains, after all, the criticism and knocking of the idea has been completed, that hundreds of other districts have found this service a great boon and one which has resulted in heavy increases of revenue and tax revenues.

The proposition could be taken up with the air mail service a great boon and one from Great Falls, Mont., via Helena, Butte, and Coeur d'Alene to Salt Lake City.

The most feasible plan, it seems, would be to establish a route from Salt Lake City northward, making stops at principal cities such as Ogden, and two or three other points before reaching Twin Falls, then on to Boise, Portland and Seattle.

This route, when completed, would go to make Twin Falls the assembly point for all passengers, express and freight traffic. It would also shorten the establishment here of a landing field, properly equipped to handle an extensive business.

If Portland and Seattle can establish a service, as they recently have, "wholly" passengers are carried between the two cities for railroad fare plus Pullman service, why can't Salt Lake City, Ogden, Twin Falls, Boise, Portland and Seattle "set up" a service which will result in closer com-

PRICE FIVE CENTS

BURNS CHARGES U. S. TAMPERED WITH JURY

Cold, Fire, Pestilence Menace Flood Zone

125 DEAD, 50,000 HOMELESS, 100 MILLION LOSS, ESTIMATED TOLL

Vermont and Other States Are Desolated Almost Unbelievably by Inundation; 50 to 60 Cities Beside Wide Country Area Are Devastated by Waters.

By HENRY MINOTT

United Press Staff Correspondent

BOSTON, Nov. 7.—Snow, sleet and rain inundated New England today, where approximately 50,000 were homeless in the wake of the rushing floods that devastated 50 or 60 towns.

General "toss" was estimated by military authorities at 125, with 75

dead, 500 injured and 100,000 made homeless.

The death toll of fire, flooding and disease added to the misery of the suffering population. Fire gutted Ludlow, Vt., but was controlled after a hot fight in the incendiary.

Deserts on Connecticut

While the waters were receding in the hard-pressed areas of New Hampshire and Maine, the crest of the flood had descended into Connecticut, where prospects of great damage were foreseen, and the situation in it was summarized as follows:

Seven major hillsides identified.

Vermont reported 54 dead.

New Hampshire 42; Connecticut 46, and Rhode Island one.

Military authorities estimated the loss at \$125 and damage at \$100,000.

Many persons were unaccounted for. Approximately 50,000 were homeless.

Fifty cities and towns were wholly or partly destroyed.

WIDESPREAD WASTE

MONTPELIER, Vt., Nov. 7.—Montpelier and adjacent sections are desolate.

Of the houses there, sections of the United States has become a wasteland.

Broken houses, uprooted trees and twisted, cut and razed rails, like dried-up bones, have been scattered.

In many places, drowned cattle lie in heaps where the receding water left them.

Thousands have perished, including Governor Larimer Jackson, including Lieut. Gov. Holister Jackson.

Drowned at Waterbury

At Waterbury, Conn., 49 persons lost their lives and three were missing.

Continuing on the Wisconsin river valley at Waterbury, persons were known to have perished and between 10 and 12 were missing. At Jonesville four persons were drowned.

At North Hinsdale, near Waterbury, 25 persons were drowned.

At North Hinsdale, four bodies were taken from the river Richmond.

In Vernon 225 were reported missing.

Approximately 50 cities and towns were destroyed wholly or partly, reports showed.

Army officials, after an airplane

had been shot down in the

vicinity, said they had found

the scene a colorful one.

Twenty-four individuals for trial

are accused of killing J. P. "Slim" Harris, the common law husband.

It was a strange thing that passed into the court house to hear the story of how "Hilling Slim" died from a knife driven into his heart here September 2, following a fever quart.

Buckarons from the vast stretches of territory in central Oregon, and from nearby Nevada filled the spectators' gallery. Radio favorites and older women who were fond of the "radio queen," accused of killing J. P. "Slim" Harris, her common law husband.

Surgeons, dentists, the radio apparel of the men and women ladies made the scene a colorful one.

Twenty-four individuals for trial

are accused of killing the wife with the knife with which "Slim" was killed.

Conviction may carry the extreme penalty of death by hanging.

DREAD DISEASE HAS NOT MADE SHOWING HERE

Public Welfare Department of State Issues Bulletin on Infantile Paralysis.

Infantile paralysis, the disease commonly known as "dread," has so much to do with rate, but because of serious lack of information did not make its appearance in Twin Falls county, it is stated by Dr. George C. Bailey, county health officer. There are no cases reported in this department and there are none reported except for a few cases of whooping cough in the district. There have been two cases of meningitis in the county, one patient having died. The road to recovery and the other still under review. Meningitis and the infantile paralysis are different diseases according to the doctor, and require different treatment.

A special bulletin of the state department of public welfare has been issued on infantile paralysis. Following is a portion:

"For the past several weeks, Idaho has been surrounded almost completely by a severe epidemic of infantile paralysis, and there is no sign of a miracle that this disease has not gained a foothold in this state. The disease has been reported in the various sections of the state and the department of public welfare feels it advisable to advise the people to be on guard against the possibility of this disease in their respective localities."

"This disease is extremely infectious and can easily spread either directly from child to child, or from an adult carrier to a child by means of secretions. Contrary to the general belief, the disease does not start as cold but the first thing noticed with the child usually is that the patient is listless, has a temperature which may be normal or high, and is unable to move a limb, but can run about without apparent pain and goes on from this state either to a recovery or to paralysis or death. The first thing that parents should do if they suspect that their child is ill is to keep their children out of doors as much as possible, keep them away from crowds, and if possible wash their face or liss them on the month, and as soon as any of the above mentioned symptoms appear have the case diagnosed by your family physician. Early diagnosis and treatment will save many lives."

"While we hope that this disease will not assume epidemic proportions in Idaho, we must be prepared for the eventuality of its appearing. It is advisable to urge that all possible precautions be taken to prevent against until the onset of cold weather."

munitioned and much more revenue! They can, without question,

The projects mentioned above, particularly the first, have been outlined previously by The Times editorially and The Times now proposes to "keep the pot boiling" until some action is taken. In view of the recent election of new directors and officers by the Twin Falls Chamber of Commerce, The Times can not vision anything more appropriate than for these officers and directors to move straight to action. These suggestions, surely, any program which will undoubtedly result in additional incomes is worthy of the most thorough consideration.

Hallelujah Victory

The Hallelujah victory was that gained by the Britons over the combined Picts and Scots at Moch, in Flintshire, England, March 30, 430. It is said that from the war they adopted by the Britons.

STANFORD AND U. S. C. STAND OUT AS BEST IN PACIFIC CONFERENCE

Cardinals Take Washington Huskies After Hard-fought Game and Are Doped to Win Remaining Two Games; Trojans and Idaho Still in Race.

By ERNEST L. STONE

SAN FRANCISCO, Nov. 7.—Stanford and the University of Southern California stood out as the leading contenders in the race for the first place among the Pacific coast conference teams. California, which had been third in the fall, slipped away after their invasion of Seattle with the scalp of Washington, but Stanford tucked securely under their belts the results of the earlier games fought in the season.

But two more games are listed on the Cardinal's schedule and they are expected to take hold. Next Saturday Stanford returns to Berkeley for a conference game and the following week clash with their ancient rivals, the California Bears in what is called on the Stanford program as the "big game."

The last week, the Trojans of Southern California face hard competition for the rest of their scheduled 1927 games. They play at San Francisco, Colorado, Notre Dame at Chicago, November 26 and the following Saturday the Huskies at Los Angeles.

Idaho is another team that yet out of the race, but which, though unheralded, are undefeated, but have played two games. An early season score decide with the University of Oregon and the University of Washington for the latter game being a non-contest contest.

California met unexpected resistance from the Mountaineers last Saturday but won by a 33 to 43 score.

Shamrock Pupils to Give Pageant Nov. 11

The pupils of the Shamrock school will give a pageant, "In the Land of Shadows," at the school house, Friday evening, Nov. 11. The pageant will be given in costume and will consist of a series of scenes of history with a tableau, and appropriate music at the end of each episode.

A box seat will be held for the principal proprietress, who will be contributed toward the purchase of a Victrola for the school.

Conquered by Beauty

We the Britons have the girls foot, just as the Scotchmen don't have their a particle for exercising every effort to that end, but it is a little easier to have the charming young woman in the cur just when you come to devote yourself at home to something to her taste after the green has come on—*Odeon Star Journal*.

Mom 'n Pop

We'll Say

children eleven about the country. If I were better to train hard enough to make a girl team, coached by the grand old Gilm S. Watson.

As proof of the absence of foreign decline of basketball. Last year there, the Cal, a school of Chinese, won the national championship. This year, the Americans, the Indians, the Chinese, and Dutch, are in the running. The Indian team, however, has not made its appearance. The football game between the Navajo Indians and the Sioux Indians is to be played in Minnesota next Saturday. The Indians are bound and the Sioux are loose.

The baseball players, the Indians, the Sioux, the Navajo Indians, and the Sioux Indians are to be played in the Navajo Indians.

The growing number of foreign students can mean only two things. One is that the body youths of foreign birth, born parents are not taking to our American athletes. The other is that the American students, having the same other advantages, are trying to less rugged forms of recreation.

Teaching High School, Junior and Senior High Schools, and Colleges, the growing tendency of our first families and the sons of wealthy parents to pass up the solid strenuous pastimes of football, basketball, baseball, and tennis in favor of the intense training, knowledge, discipline and skill of the condition sports.

It is lamentable that so many high school and especially college students are not willing to give up their romances, night life, dances, reading, and other pastimes in order to develop the finer kind of sportsmanship, leadership and good citizenship. The situation may not be fair, but it is true, and the fact that it's not fair enough, especially among the sons of wealthy parents. And the trend is to have it become worse. There are too many good physicians, fathers, mothers, and others who are unable to find the time.

To do justice to at least one youth who is able to millions and yet has the time to play, I say, "Good for him." And we are not referring to Fred Flinchback, fullback of Stanford. He is a boy of 19, stands more than 5'10" feet tall, weighs 180 pounds, and is the son of Herbert Flinchback, Sr., prominent San Francisco banker and multi-millionaire. What it is that makes him prefer to disregard the luxuries which are his. He
