Parent-Teachers At Murtaugh Put On Fine Program

MURTAUGH, April 18.—One of the most interesting and largely attended meetings ever held by the organization was that of the Parent-Teachers association in the high school auditorium Monday evening.

The business session was followed by the presentation of a detailed report which was in charge of Mrs. Lewis and Miss Laila Crainey.

At the close of the program of the school assembly, Mrs. Edvard Prange was chairman of the refreshment committee, being assisted by Mrs. William Perkins and Mrs. John Roberts.

Among the visitors at the school Monday afternoon were Mrs. William Lindley, Mrs. Edvard Prange, Mrs. Cloyd Cranney, Mrs. Thelma Williams, Mrs. William Lindley, Mrs. Edvard Prange and Miss Laila Crainey.

Friends will regret to learn that Dady Hill is in a hospital very ill.

Miss Elizabeth Shubert of the Murtaugh school has been elected to the home of her parents in Twin Falls.

ROGERSON

ROGERSON, April 18.—Latest information received here is to the effect that the baby clinic which was to have been held on Tuesday, April 24, has been postponed to some later date because of a case or two of meningitis that have developed in the county.

A doctor and a trained nurse from the State Health Department were directed to conduct the clinic here during the day and then proceed to Hollister Tuesday night to address a public meeting.

Miss Nellie McElroy and Ella and Lola McCauley were shoppers in Twin Falls Saturday.

Rural Community

Fred Peterson and wife motored to Twin Falls Saturday. They purchased a new bicycle for their son.

William and Pearl Watney of Buhl called at the James Boyd home Saturday.

Ed White has recently purchased a new automobile.

Jack Peterson was a Sunday guest at the B. K. Dunham home.

Mrs. John Smith was a week-end guest at the J. M. Stoddard home at Kimberly.

Mrs. Edvard Prange was a week-end guest at the home of Mrs. Dore.

Mrs. Clara McConnel is a week-end guest at the home of Mrs. Dore.

Mrs. Dore White called at the Y. W. building in Twin Falls.

BULL SESSION SENDS GRAINS SKYROCKETING

Unfavorable Weather Reports Responsible for Boost on Oats and Wheat

CHICAGO, April 18.—The Chicago Board of Trade witnessed an extraordinary bull session today, as unfavorable weather reports from wheat, rye and barley countries in all deliveries, cash oats went to the highest levels since 1924.

All months in the wheat pit advanced from 24 3/4 to 25 1/2 July, close at 25 1/2 to 25 3/4.

Other grains reflected the strength. A combination of strong bullish conditions in the wheat section and features into a speculative but bullish rally.

Analysts reported a drought, change to southwest winter wheat that that grain marling in close 25 1/2 to 25 3/4. Much corn announced an increase of unfavorable both weather and soil cash demand, closing 25 1/2 to 25 3/4 higher.

It was seen the most sensational market in many months, prospects of a wild crop harvest, new wheat and a wild scramble of buying. Oats closed 3 1/2 to 3 3/4 higher. Cash oats sold at the highest level since 1924.

That opened the day with a sharp bulge but profit taking near development and all sections. However, weather forecasts of freezing weather for tonight and tomorrow, which predicted a wild scramble of buying. Oats closed 3 1/2 to 3 3/4 higher. Cash oats sold at the highest level since 1924.

NEW YORK STOCKS STOCK RALLIES RESULT IN NEW HIGH RECORDS

NEW YORK, April 18.—Stocks rallied today, the Dow Jones Industrial Average closing at a new high of 290.14, up 1.14 points from 289.00.

The rally was broad, with many individual stocks reaching new peaks. The Standard Oil of New Jersey led the advance, up 1/4 to 41 1/2.

Other notable gains were seen in General Motors, up 1/2 to 28 1/2, and American Telephone and Telegraph, up 1/4 to 24 1/2.

The market was characterized by a strong buying interest, particularly in the industrial and utility sectors.

OIL DRILLING OPERATIONS ON IN WEST IDAHO

Boring for Commercial Oil Expected to Commence Monday.

That all boring operations on an extensive scale are about to begin in Western Idaho is the statement of the Boise Capital News of Wednesday which says:

Drilling for commercial oil will start in western Idaho Monday of next week.

A diamond drill which arrived in Boise this week, accompanied by an expert crew, will start to bore for oil at Letha in the state of the holdings of the Cooperative Oil Exploration Fund, Paul G. Savic is the trustee for the fund.

This is the first attempt in Idaho to attempt to locate the strata of commercial oil sands believed to exist in western and southern Idaho.

It is interpreted as but the vanguard of numerous other attempts on the part of interested companies which will attempt to find petroleum in the Payette, the Snake Creek, the Vata and the Hammett sections, Letha, its residents, and hundreds in that section of the state plan a big celebration Sunday as the preliminary to the event. Speeches and band music are on the program.

The actual initiation of drilling operations is the culmination of many years of research work in the district on the part of Mr. Savic and his colleagues, and of many months of organization work since the incorporation of the antilime was completed by Mr. Savic.

The point where the drill is being set up is less than a mile from the village of Letha, which is located about eight miles directly west of Emmett.

The drill and crew were brought by Mr. Savic and his field superintendent, Roy E. Burt, from Michigan City, Ind. The firm Sullivan dynamite drill is capable of penetrating to a depth of 8000 feet, and can be lowered down 5000 feet in 40 or 45 days.

Because of the fact that the function of the Sullivan dynamite drill is to bring out actual cores of the formations being penetrated, however, it is probable that work will not be rushed, as the first drilling is primarily for test purposes.

To Establish Geology.

The drill with certain equipment doubt the character of the strata being prospected. It will locate key beds or markers and establish geological facts definitely, which are of types of drills conjectured as to the geological significance of various formations found.

The drilling of the old city was made through microscopic study of particles of drillings.

Thus the drill is guaranteed to establish the possibility of producing oil sands, and is also claimed to eliminate dangerous encounters with accidents by absolutely controlling the sudden gas of oil obtained.

Paul Savic's statement that his men will be ready for actual drilling Monday came as a surprise in Boise.

IDAHO POTATO COMMITTEE IS UNDER REBUKE

Dealers All Over Country Allege Sharp Practice in This State.

Day of Open Cars Drawing To Close Verdict Ed George

The popularity of the closed car has been appreciated by the fact that the price differential which existed between the open and closed models, has decreased to a point where there is now little difference between the prices of an open and a closed model, stated Ed George, local chamber of commerce secretary.

Seven or eight years ago closed cars were considered by the industry as a whole averaged 15 per cent open cars.

A graphic picture of the increasing preference on the part of motorists for closed cars may be had from examining automobile production figures for 1926 and 1927.

Statistics furnished by the S. A. C. show that in 1926 closed cars formed 72 per cent of the industry's entire production. In 1927 the growing demand for comfort was expressed by closed car production of 70 per cent.

In 1925 the demand jumped to 54 per cent, in 1924 to 45 per cent, and finally in 1923 it passed the 30 per cent mark by jumping to 62 per cent. During 1926 and 1927 closed car production passed an extraordinary mark by reaching approximately 80 per cent of the entire automobile output of every five-year period.

In the entire twenty-five models available for sale last year, the Buick and Special Six models, only six are open cars, while the balance are directly closed—either touring, coupe and runabout.

In 1927 the demand for Chrysler closed models was so great that approximately 50 per cent of the total Chrysler production was of the closed type, while only 10 per cent was open cars.

WATER TOWER TO BE TAKEN DOWN

Workmen for the Burhanou Construction Company of Boise, Arrived in Twin Falls This Week to Begin Work on the New Water Tower.

Workmen for the Burhanou Construction Company of Boise, arrived in Twin Falls this week to begin work on the new water tower. The tower, recently sold to the Burhanou company for \$705, the tower has not been used for some time and will be taken down and prepared for shipment.

The tower is located on the corner of 1st and 2nd streets, and is a concrete structure. It is 40 feet high and has a diameter of 10 feet. It was built in 1910 and was used for the purpose of storing water for the city.

The tower is now being dismantled and the concrete is being removed. The work is expected to be completed in a few weeks.

DREDGING PROGRESSING

Final Company Force at Work on Low Line Central Laterals Dredged.

The dredging work on the central laterals is progressing rapidly. The final company force is at work on the low line central laterals. The work is being done by the Idaho Dredging Company.

The laterals are being dredged to a depth of 10 feet. This will allow for a greater flow of water and will improve the irrigation system.

The work is expected to be completed by the end of the month.

Russia Big Field For American Cars

Result Real Test

American manufacturing methods and American methods of building cars are three highly important factors in Russia today, according to Joseph A. Marcus, special representative for the Studebaker Corporation of America in Russia.

"Lack of transportation in the great Russia to the development of Russia today, according to Joseph A. Marcus, is a factor in the need of good roads. The next five years will see the greatest road building activity in the history of Russia and American automobiles are bound to play a leading role in uniting the village and the city."

"Just as an example of the importance of American motor cars, it was a Studebaker President Torque that was first prize in the 6000 kilometer race from Leningrad to Tiflis and back to Moscow over the worst roads in the world. This car completed against 'foreign' cars in from two to three and one-half times its price and came out victor. The Studebaker returned to Moscow without the slightest damage."

"On the streets of Moscow, Leningrad, Kharkov, and other cities, Studebaker cars of 1914, 1915, and 1916 will show up as a pink layer."

SMITH FORMALLY BROUGHT OUT AS PARTY CANDIDATE

By United Press

NEW YORK, April 26.—Gov. Alfred E. Smith was brought out formally today for the Democratic presidential nomination. Former Lieut. Gov. George H. Ladd, of Schenectady, offered a resolution before a meeting of the New York State Democratic committee saying that Smith's name would be presented to the convention.

Smith was added, conditions had changed from what the present control of the Republican party is being vigorously challenged by its own members.

Lined With Famous Cedar

The Jerusalem chamber of Westminster-shire takes its name from the cedar wood with which the walls are lined, and which is said to have been brought from Lebanon.

COAL OPERATORS AFRAID OF FEDERAL INTERFERENCE

No element of surprise exists in the substance of an address delivered by the president of the Utah Coal Producers' Association before the Idaho Retail Coal Dealers' organization at Boise this week in which the miners' union came in for vigorous denunciation.

And let it be said that the Idaho retailers are not responsible for the outburst of the Big Boy from Salt Lake, representing the Coal Barons, the operators and mine owners. What he had to say was to be expected—there was nothing new in a single word uttered.

So far as we know, the coal operators constitute the only remaining element of disorganization in so-called big business in the world today, certainly on the North American continent. United States Steel, Standard Oil, General Motors, Henry Ford, the rail lines—all these have been discovered to possess a soul and to have some regard for ethics in the conduct of business. Not so with the Coal Barons. Read the official report of Senator Frank Gooding's senatorial committee of inquiry after the visit to the coal regions of Pennsylvania to see what has happened as a result of the strike of the miners for an opportunity to level. That report is of itself sufficient to condemn the coal operators now and for all time. And it is the program of these operators that will, if it ever does happen, force the government of the United States to take over the mining of all coal supplies in this country. It is the fear of this that leads men occupying positions similar to that of the Utah gentleman, to indulge in outbursts against the miners' union. One would think that ordinary common sense would lead to a different program. The people are not deceived. They know perfectly well that the coal operators would be happy to have their able to hire labor at 25 cents a day, having nothing for the welfare of the men left alone that of the women and children, hungry and half naked.

Talk about your Socialists and Communists! They are being made by the thousand every day in the coal regions of the East, all because of the stupid policy of those who would fatten off labor, spending their winter vacations at the Havana race track, on palatial yachts in Florida waters or in California.

Mr. Orr's tirade against the men who toil and sweat in the mines will avail him or his organizations throughout the country nothing at all. The public knows and understands the selfish and greedy methods which inspire such twaddle.

On the other hand there is a high regard for the ideals behind such organizations as the Idaho Retail Coal Dealers' Association which was to have held its annual convention in Twin Falls but for good and sufficient reasons was forced to transfer the convention to Boise. That organization has a code of ethics which is lived up to as closely as possible; the purpose is not to exact the last dollar from the buyer of fuel but to so conduct the business that those engaged in it may be able to earn a fair and honest return on the investment, render the public satisfactory and efficient service and supply the market with the best coal that can be obtained. Certainly Twin Falls has no apologies to make for the firms engaged in retailing coal supplies in this territory for the service is, by unanimous agreement, prompt, efficient and courteous.

There's a gulf a million miles wide between the retail dealers and the operators, a gulf quite as wide as that between the barons and the poor unfortunates who are cold and in misery in the mining sections or some of the Eastern States, a condition that reflects no credit on the people of the United States.

UTILIZING A LOCAL COMMODITY FOR HEALTH

Idaho has an abundance of good milk, perhaps an unappreciated blessing that would be the envy of other sections of the country.

Health authorities agree in the statement that milk is a nourishing and invaluable article of food. Demonstrations of the truth of this are to be found in every part of the United States and Canada in which milk has been introduced as part of the daily diet for school children. Particularly is this true with regard to the younger children. Actual tests over a given period of time have shown not only a more healthy and more normal body but a market quickening of intellect on the part of the child. In the case of Idaho a double purpose can be served by the liberal consumption of milk. The health of the children can be improved and maintained and healthy children are happy children, growing up to be good citizens. At the same time an enlarged market can be provided for a "home-made" product.

Other Viewpoints

FEMINISM A MENACE

Quebec, Ontario, Mercury.
A "man in the street" is likely to be in for considerable criticism from the feminist group in Canada if he has been correctly reported at a recent meeting in that city. Feminism may hardly be described as something new, it is as old as the hills, from the heathening woman has played a more or less important part in the whole scheme of things. Even in the earlier days of our nation's work to correct evils, and their work has been duly chronicled in the history of the world.

Of late years women have been taking a more active part in national affairs, the welfare of the country, in politics they may be just beginning, but from appearances they are going to persevere in their efforts to do what more men may say to discourage them.

Quebec women recently made a bid for votes in the provincial election. The immediate result of that bid was the declaration from a disinterested observer that the women's influence, and that votes for women is not the cure. He believes "that women with the right to the vote of the province should abandon political preoccupations to occupy themselves with the questions of charity and with things truly social. This may be discouraging to Quebec women, but by the same token the women of other provinces will be followed and that government will be held from the experience of the women of Great Britain, where 12 millions of those of the age to vote in the provincial election. Quebec women will try and point out the need for a woman's influence in the shaping of laws that affect women so directly, and will decline to see in their interest in public affairs a mere selfishness, their children or the state.

Like a wave of the sea rolling forward, the women's movement is in politics. It may be stayed for a season, but indications all round the world point to their continuing the right to vote in all elections.

GREAT BRITAIN AND WAR

It's been a long time since a good many of us have been talking about war between England and the United States. Some of these people are still clinging to the idea of planning for the future.

But W. C. Bridgeman, first lord of the admiralty in England, had been secretary of the navy ever here isn't one of them. In his recent report to parliament, Bridgeman points out that "many important services other have been deferred entirely or are being provided at a less standard than that which has been the normal period of peace since 1914."

In other words, England is getting her navy back to its former strength, but not on the horizon. And that wouldn't happen if Britain could have the cooperation of the United States in the near future.

SOEMEN GOOD, ANYWAY

Christian Science Monitor
The character value of the Italian and the increasing number of Italian that may be fought with it make doubly interesting the statement of an industrial engineer who is expected to give his views in the next few years. He will be lowered and wages raised to such an extent that the employer and wage earner will have the opportunity power, which today is enjoyed by only those who have incomes of \$10,000 a year.

Daily Poem

THE ROMANTIC
D. M. Sanders, Jr. in Williston Monthly
There was a wind that day,
A little sail that hung upon the bay
And when the wind came, it was not just
With broken wings—it was not just
A boat.

And where a shaft of light
Had shivered in a sudden stream
Of white.
It was not but a sail that broke the
The sky had smiled—and flashed a
Simple there.

The day was dreary,
I held captive in a web of words, the
Stood breathless, gladly bound, it
Could not be.
The day would dream, and leave us
One!

Lighter Side

HIS CREDENTIALS

Mr. Peck: "I'm going to do you ever done in your line that makes you think I'll let you in."
"No, I'm not going to let you in, I've never written a parody on 'Mary Had a Little Lamb'."
"That's all right, brother, pick your own."

ALWAYS TO BLAME

Teacher: "I don't want to see you at school, Johnnie, you may go home now."
Johnnie: "I don't want to go home, there's a new toy just come to our house."
Teacher: "You need to be glad to go home, a dear little baby."
Johnnie: "(sighing) "I ain't glad, Pa'll blame me—the blame the for everything."

INFORMATION FOR GROWERS USE ARSENIC

Department of Agriculture Officials on Deadly Drug Tolerance.

The following information has been sent to growers and shippers of apples and pears by W. O. Campbell, director of regulatory work, Department of Agriculture, Washington, D. C., relative to the arsenic tolerance on fruit, as it applies to apples.
At the Salt Lake City conference of Feb. 21, 1927, the conclusion was reached that the arsenic tolerance on fruit should be increased to 0.05 grain per pound. This increase was based on the fact that the fruit crop of 1928, but in recognition of the difficulty of meeting this figure universally in 1927, it was agreed that legal arsenic would not be limited on the 1927 crop unless the amount of arsenic actually found exceeded 0.05 grain per pound.
Very rapid and satisfactory progress has been made by the industry toward the solution of the spraying problem through modification of spray schedules, adoption of other methods of protection, and particularly by the employment of the washing method. All sections have united in whole-hearted fashion in working for the solution of the problem. While the department was of the opinion at the time of the Salt Lake City conference that the 0.01 tolerance could be reached without serious difficulty in 1928, evidence has continued to accumulate during the past season that most of the growers in the country, at least a portion of the crop cannot be made to meet this figure in 1928. Plans of a very exact character have been made for a delay in the adoption of the world

tolerance for at least one more season. Had there been a lack of effort on the part of the industry to respect the existing standard, the department could not have looked upon these growers with any degree of sympathy.
It has been considered in its desire to control traffic in fruit in a manner which would not impose an undue burden upon fruit producers and shippers. Upon receipt of reports from the industry, the department has been unflinching through its own investigations and through cooperation with representatives of the industry in many sections to get a true picture of the situation and to determine as accurately as possible in advance of the growing season, what conditions can be met this year if whole-hearted efforts are continued by the industry.
As a result, it has been decided by the secretary that for the season of 1928, prosecution against growers will not be instituted against fruit which shows not to exceed 0.02 grain arsenic per pound. This figure applies only to the fruit crop of 1928. The department has every intention of continuing to reduce the tolerance and anticipates that for 1929 the world tolerance of 0.01 grain per pound will be met by all fruit, but the country heretofore mentioned in the way of developing and installing cleaning equipment, modifying spray schedules and seeking substitutes for lead arsenate will need to continue its efforts to attain this end. It should be noted that the world tolerance of 0.01 grain per pound is in effect in Great Britain and Germany and that fruit intended for export to these countries as well as to other European points will need to be within the world tolerance if serious difficulties and probable embargoes by these countries are to be avoided.

THE FEATHER RIVER ROUTE

"Lookit—that car we just passed is a mile behind us already"

OUT on the great proving grounds of the nation's highways—where driver vies with driver and car meets car in all kinds of friendly contests—today's high-powered Chandler is the victor of victors!
It is absolutely spectacular the way today's Chandler outgrips its contenders in the race on steep hills and outruns them in straight going.
And the reason is anything but a secret: Chandler has further increased the power of its Pikes Peak engine principle—in its new Sixes as well as its new Royals Eight.
You'll find, too, that any new Chandler you drive is much better equipped than you ever knew. And the reason for that is Westinghouse Vacuum Brakes—three times safer than any kind of mechanical or hydraulic brakes that depend entirely upon atmospheric pressure.
Easy, too, to lubricate the chassis. Just push a plunger and Chandler's "One Shot" System automatically lubricates the car from end to end. No fuss. No time out. Money saved.
And just look around and compare other cars with Chandler for beauty. See how sumptuously Chandler endows its new Sixes and Royal Eight with all the trappings and trimmings of elegance. No skimping, no cutting corners anywhere.
Chandler is Chandler-built—through and through—Chandler's great \$10,000,000 plant. Built step by step with scrupulous care in strictest conformity to the hard and fast rules of quality and accuracy.
Don't buy a new car without seeing and driving today's Chandler. Thirty magnificent models—\$995 to \$2195, f. o. b. factory—and the finest cars \$995 to \$2195 can command.
