TWIN FALLS, IDAHO, FRIDAY, NOVEMBER 24, 1905

NUMBER 5

HALF YEAR'S WORK ON THE EXPERIMENTAL FARM

Interesting Report Submitted by Superintendent McPherson—Farm More than Paid Expenses, Although the Season Was Two Months Advanced Before the Work of Cultivation Began.

The report of the first year's work on the Twin Falls experimental farm, which appears in detail below, should be read with a great deal of interest by every farmer on the tract. It contains a great deal of valuable information and useful data which the farmers would do well to preserve for future reference.

In his report, Superintendent McPherson made no effort whatever to magnify the productiveness of the Twin Falls soil, or to exaggerate its possibilities. He simply detailed the actual results obtained upon the experimental farm, giving quite as much attention to the failures as to the successes.

It should be borne in mind that the experimental farm was cultivated purely for experimental purposes and as an object lesson with regard to irrigation on the Twin Falls tract. No attempt was made to farm for profit, and yet his report showed that after all expenses in connection with the farm were deducted there remained a small balance on the right side of the books.

For instance, had the entire acreage been planted in potatoes it would have yielded about \$12,000. This might also have been done by other crops. The primary object of the farm was to discover the best crops for the Twin Falls tract and how to grow them. All work done by the superintendent on the farm was performed as it might have been by any other farmer. As a matter of fact, any other farmer could have done the work more cheaply as all labor on the experimental farm was hired at a high rate of wages.

Although the experimental farm was supposed to be 40 acres in extent, only 34 acres were cultivated, of which 22½ acres were planted in crops which produce a very little, if any, income the first year. Several acres were set aside for crops which produced no returns. In fact, the entire revenue of the farm was obtained from less than nine acres of ground.

Already 15 varieties of winter wheat have been planted this autumn and a larger number of varieties will be sown in the spring. It is proposed to raise at least 100 different kinds of crops on the farm next year. During the next irrigating season exactly five-eighths of an inch of water per acre will be used on the farm. This water will be measured with a government register and the duty of the water will be fully determined.

The work accomplished on the experimental farm should not be taken as a test of production on this tract, or the reason that farming operations were commenced two months later than they should have been, consequently all crops were grown out of their season and did not have a fair chance to thrive or mature. However, the experimental work indicated, to a limited extent the possibilities on this tract. The farm record will be of great permanent value to every farmer in the arid districts as it shows the number of times and practically the amount of water used in crop production, which was far less than the quantity ordinarily used by the farmer.

In order to demonstrate the fact that dairying and production of such necessary adjuncts of a well conducted farm, Superintendent McPherson has secured three Jersey cows and three thoroughbred hogs. An acre record of the food consumed by the animals and the revenue they will be kept for the benefit of the farmers.

The farm will be maintained as an experimental station, owned and operated by the Twin Falls Land & Water company for the sole benefit of the settlers on the tract, that they may have every facility afforded them in studying modern methods in farming and thus avoiding costly mistakes.

as well as having pointed out to them the most profitable kind of farming. Following is the complete report of the superintendent:

TWIN FALLS, Nov. 6, 1905.
Gentlemen—I herewith submit a statement of my work on the Twin Falls experimental farm covering six months; commencing April 15 and ending October 15, 1905.

From April 15 to May 10 I was engaged in planting about 4,000 shade trees in the townsite, preparing the ground and planting the trees in the park.

I began work on the experimental farm May 10, grubbing sagebrush, and finished planting crops there May 20. As it was late in the season, I had to forego planting a number of kinds of crops. However, I planted the following kinds and varieties, 35 in all: Sugar beets, stock beets, 13 varieties of potatoes, two varieties of corn, three of beans, two of wheat, two of oats, one of barley, corn wheat, three varieties of millet, two varieties of buckwheat, clover, clover and timothy mixed, alfalfa, alfalfa and orchard grass mixed, field peas and flax—25 in all, counting the mixed grass as one crop. With the exception of field peas, buckwheat, flax, sugar beets, stock beets and one variety of beans, the results were eminently satisfactory, especially so when the fact is taken into consideration that I was late in planting and the ground was entirely new and prepared for planting in a hurried manner.

Fourteen and one-half acres were sown to oats and alfalfa. The alfalfa did not yield anything. However, there is a very good stand that will, no doubt, grow well next year. The oats harvested on this plot were of a fine quality, but not a heavy yield. The yield of the different crops was as follows:

Oats (in combination with alfalfa), 14½ acres 23 bushels per acre
Oats (Big Four), at the rate of 35½ bushels per acre
Corn wheat, at the rate of 18 bushels per acre
Hullless barley, at the rate of 9½ bushels per acre
Wheat (Blue Stem), at the rate of 21½ bushels per acre
Wheat (Little Club), at the rate of 22½ bushels per acre
Early Fortune millet (Japanese), at the rate of 1,000 pounds per acre
Potatoes, at the rate of 330 bushels per acre
Corn (Cassia Flint), at the rate of 40½ bushels per acre
Navy beans, at the rate of 12 bushels per acre
Bush Lima beans, at the rate of 12 bushels per acre
Corn (Iowa Gold Mine), sold for fodder—did not mature.
Buckwheat, not satisfactory—turned under for fertilizer.
Clover, one cutting, at the rate of ¼ ton per acre.
Clover and timothy mixed, one cutting, at the rate of ¼ ton per acre.
Alfalfa and Orchard grass, at the rate of ½ ton per acre.

The yield and value of the products at the present price is as follows:

Oats, 323 bushels, at 55c per bushel	\$177.65
Oats (Big Four), 35½ bushels, at 55c per bushel	19.50
Corn wheat, 15 bushels, at \$2.26 per bushel	50.40
Hullless barley, 34 bushels, at \$1.68 per bushel	7.39
Wheat (Blue Stem), 15½ bushels per acre, at \$1.80 per bushel	33.75
Wheat (Little Club), 24½ bushels, at \$1.80 per bushel	36.90
Early Fortune Millet, 14½ bushels, at \$5.40 per bushel	78.39
Corn (Cassia Flint), 40½ bushels, at \$1.50 per bushel	60.75
Corn (Cassia Flint), fodder, 4.50	4.50
Corn (Iowa Gold Mine), fodder, 15.00	15.00
Potatoes, 329 bushels, at \$1.20 per bushel	394.00
Clover, 1,200 pounds, at 70c per 100	8.40
Clover and timothy, 1,200 pounds, at 70c per 100	8.40
Alfalfa and Orchard grass, 1,400 pounds, at 70c per 100	9.80
Navy beans, 14 bushels, at \$4.00 per bushel	4.60
Bush Lima beans, 14 bushels, at \$3.00 per bushel	4.20
Field peas, 12 bushels, at \$3.00 per bushel	3.60
Millet, 2,000 pounds, at \$10.00 per ton	10.00
The entire cost of the farm, including permanent improvements, amounted to	2,689.73
Permanent improvements, grubbing sagebrush, leveling, ditches, head gates, house barn, implement shed, fence, trees, etc.	1,004.62
Plant, consisting of team, harness, wagons, farm implements, tools, etc.	400.00
Crop production—This item includes all labor, seeds, planting, loss of one horse, and feed for farm animals necessary to produce the crop	1,273.33
Total	\$2,689.73

At times, when the team was not needed on the farm, it was employed to work outside of the farm, thereby earning \$31.50, this amount being credited to the cost of producing the

crop, leaving the amount actually expended on the production of the crop \$297.50. The value of the crop produced amounted to \$924.70. This would leave a net profit in favor of the farm of \$26.96. If I were to count the cost of seedling and caring for—14½ acres of alfalfa and orchard grass; two acres of clover and timothy, and two and one-half acres of clover, that ordinarily do not produce much the first year, to permanent improvements, and they really belong there, there would be a considerably larger balance in the earnings of the farm. Seeds to the value of \$289.90 were purchased. I used for planting on the farm \$135.55 worth, and sold to the amount of \$137.42, at a profit of \$8.73, leaving seeds on hand to the amount of \$23.70.

Primarily it was not the intention to make the experimental farm a paying proposition, yet a record was kept of all transactions, with the above result. The principal object of the farm, as I understand it, was to determine the adaptability of different farm crops on the Twin Falls tract; the best cultural methods to follow; the proper way to irrigate, and the amount of water required.

Some of the crops planted failed to give satisfactory results; yet that does not signify that they will not do exceedingly well here, if planted in due season. With regard to the sugar beets and stock beets—The land was entirely new, hurriedly prepared, and planted two months later than it should have been. The result was a poor stand. As soon as it became evident that it would not pay to give the plot the care that sugar beets demanded, I seeded the plot to millet, with the exception of two rows. Quite a number of the plants left in the rows grew to a good size and fine shape. The field peas were sown on a plot where practically all of the surface soil had been removed in leveling the field and I attribute their poor growth to that. The flax came up nicely, but the hot sunshine seemed to wither the plants, but where shaded in any way, a satisfactory growth was made. Had this crop been planted at the proper season, the result would have been very different. The Iowa Gold Mine corn was not acclimated, so the results were not disappointing. Enough matured for seed

crop, leaving the amount actually expended on the production of the crop \$297.50. The value of the crop produced amounted to \$924.70. This would leave a net profit in favor of the farm of \$26.96. If I were to count the cost of seedling and caring for—14½ acres of alfalfa and orchard grass; two acres of clover and timothy, and two and one-half acres of clover, that ordinarily do not produce much the first year, to permanent improvements, and they really belong there, there would be a considerably larger balance in the earnings of the farm. Seeds to the value of \$289.90 were purchased. I used for planting on the farm \$135.55 worth, and sold to the amount of \$137.42, at a profit of \$8.73, leaving seeds on hand to the amount of \$23.70.

Primarily it was not the intention to make the experimental farm a paying proposition, yet a record was kept of all transactions, with the above result. HANSEN FARMERS WILL ENTERTAIN

WILL HAVE GOOD PROGRAMS AT WEEKLY MEETINGS.

Work of Farm Improvement Continues—Large, Lateral Leading to Townsite Under Construction.

HANSEN, Nov. 23.—Miss Elva McCollum of Twin Falls was a visitor in Hansen last Monday.

J. F. Hansen was a passenger from here to Albion last Sunday.

H. A. Partridge departed Monday on a business trip to Boise.

The construction of a large lateral is in progress, 80 rods north of the townsite.

Miss Bessie Ashwell has returned to Hansen from a two weeks' visit in Twin Falls.

G. W. Hedrick and family have gone to Portland for an extended visit. George D. Alken and C. H. Mull were callers in Hansen on Wednesday last.

B. E. Rose, J. L. Barnes, Frank Mubler and J. C. Jones were Twin Falls visitors last Saturday.

Mrs. Robert Messer journeyed to Minidoka Sunday, accompanying her mother, Mrs. Lissa Lay, who returned to her home in Enid, Okla.

J. C. Jones has the foundation laid for the construction of a very comfortable home on his ranch north of here.

Miss Edith Kiehl went to Twin Falls Wednesday, where she will remain for a few days assisting the Booth Dry Goods company.

The program committee of the Hansen Farmers' association has arranged an entertainment for the farmers' meeting to be held Friday evening. The program is as follows: Opening address J. L. Redhead
Reading Erna Smith
Song Misses Towne
Reading Miss Mayo-Kiehl
Reading Evelyn Beck
Reading Mrs. J. H. Monker
Field solo Paul Smith
Reading Miss Gertrude Rauch
Reading Leon Redhead
Song Misses Towne and Divine
Reading Miss Edith Kiehl

KIMBERLY WANTS GOOD HIGHWAYS

Interesting Debate on the Sugar Beet Question Scheduled for Next Wednesday Evening's Meeting.

KIMBERLY, Nov. 23.—Good roads was the subject under discussion at the Kimberly Farmers' association meeting on Wednesday evening. Mr. McPherson advocated a curved road bed, 32 feet wide, with gutters along either side, down which waste water could be turned and, subbing toward the center, make a good road. The sagebrush should all be grubbed off the road first, for 60' long as it remains standing checks and ruts were sure to follow. Cuckers and straw were both recommended to keep down the dust and fill the holes.

Mr. T. West advocated a level road that could be flooded as occasion demanded.

Good roads would increase the value of property and it was to the interest of every farmer to have his place bordered by them.

Next Wednesday a debate will be given, the subject being: Resolved, That sugar-beet raising will be more profitable than the dairy business on the Twin Falls tract.

Messrs. Starr, West and Barber will uphold the affirmative, while Messrs. McMillan, McPherson and VonderMaar will speak on the negative.

A lively discussion is assured.

Mr. and Mrs. Fred Gooding of Shoshone spent Sunday and Monday in Kimberly.

An important meeting of the townsite board was held during Mr. Gooding's stay.

Mrs. Eagle and family joined Mr. Eagle here Saturday and will make Kimberly their permanent home.

Mr. and Mrs. Osborne and daughter left Sunday to spend the week in Rock Creek, where Mr. Osborne is en-

CONTEST CASES BEFORE THE STATE LAND BOARD

Evidence Submitted in Five Cases—Two Contests Dismissed for Stated Reasons—Nineteen Final Proofs Approved—Protests Must Be Filed When Proof Is Made.

The following additional proofs were approved by the state land board at its meeting this week:

Lena F. Perrine.
Richard S. Cookinham.
Fred Fisher.
Gus Sjoborg.
George B. Hardy.
Harvey W. Hurlabaus.
W. S. Ainsworth.
Thomas Mocklar.
Ledyard Perrine.
Caryl E. Coley.
Harry J. Wilson.
George W. Helms.
Paul Hof.
Geoffrey H. Taylor.
Walter Hedrick.
Robert A. Crawford.
Anthony La Fountain.
Charles C. Bidstrup.
William A. Childers.

Evidence was submitted in five contest cases, those of W. D. Garlock vs. George L. Doughty; M. B. Osgrade vs. A. Vandegriff; D. B. Pettiford vs. John F. Klemm; J. C. Fichary vs. Robert Olson, and George Willits vs. George S. Trachbold.

The contest filed by L. M. Lacy against the estate of P. M. Kimberly, deceased, was dismissed for the reason

gaged in building a house for C. Rombach.

Notwithstanding the disagreeable weather of last Sunday afternoon, the first meeting of the Sunday school was well attended and the leaders feel much encouraged. An active, thrifty school is looked for in the near future.

Preaching services next Sunday at 3:00 by Rev. Osterhout of Twin Falls. Sunday school at 2:00.

H. D. Scott left for Pocatello Monday on business.

Mr. and Mrs. C. L. Parsons returned from a trip to Wenatchee, Wash., Sunday and will make their permanent home on their ranch near Kimberly.

Kimberly. We predict that his ranch will be one of the show places of the Twin Falls tract within a few years.

G. B. Hardy has returned to Los Angeles after making final proof on his quarter section of land southeast of Kimberly.

There are 10 cars of Kimberly freight on the sliding here. Main street was lined with wagons on Saturday hauling coal from the car set out here by the Filer Coal company.

George Holyak is hauling four to Rock Creek.

Frank Prothro is hauling lumber preparatory to building a new house on his farm east of Kimberly.

G. H. Johnson made a business trip to Salt Lake this week.

T. O. Fraser of Nampa was in Kimberly Wednesday looking over the field with the expectation of putting in a blacksmith shop.

J. McMillan took advantage of the snow Monday and moved his frame house to its final resting place adjoining his new residence.

The first snow of the season fell at Filer on Sunday night and Monday when the ground was covered to a depth of two inches. The sun shone bright on Tuesday, when the thermometer hovered around freezing point. This is taken to bespeak mild and ideal winter weather for the Twin Falls tract.

William Scheffel of Minidoka came to Filer on Tuesday preparatory to erecting a frame building, 28x40 feet, in which he will carry a complete stock of general hardware and furniture.

Mr. Abbott, the expert stenographer of Twin Falls, will come to Filer on Thursday and do some painting in the local postoffice, the business of which is increasing daily.

G. A. Drake of Blue Springs, Neb., will shortly commence the erection of a comfortable residence on his farm one mile south of town.

Doc C. Allen, the Filer blacksmith, has built a neat house and barn on his place near town and has ordered a complete set of tools, which will be used in his blacksmith shop here.

The office and wheels of the Wooster Lumber Co. are nearing completion that agriculture be taught as a branch study. The boundaries of the tract, offered by Mr. Rettig, are as follows: Beginning at the quarter

stone between sections 8 and 17, section Charles R. Lowe of Albion thence running west 40 rods; thence

son, that under the law heirs cannot be contested for failure to reside upon land.

The board also dismissed the contest case of Frank L. Osborne vs. John Hoone on the ground that the major portion of the land had not been notified that water was ready for delivery.

While a final proof, or even a patent, may be contested at any time for fraud, a protest against a final proof should be filed upon the day and at the time such proof is made before the local representative of the state land board in Twin Falls. The object of publishing a final proof notice for five weeks is to advise the public that the entryman intends to make final proof on the date announced. Those who wish to protest the proof must be on hand at that time and submit their evidence, otherwise there is little hope of the protest being entertained, for the reason that the entryman has given legal notice of his intention and as a matter of justice he should not be put to any additional expense through a protest. He must, of course, defend a contest which may be instituted at any time, even after his patent is issued, if sufficient ground exists.

north 20 rods; thence east 40 rods; thence south 20 rods to the point of beginning. The land has already been cleared and the north half of it has been seeded to clover and blue grass. It would make a magnificent site. B. Lorain also offered a splendid acre tract in the northwest quarter of the northwest quarter of section 8, the exact boundaries of which will be announced later. W. P. Shinn, A. C. Matterson and Mr. Villet were appointed a committee of three to investigate the two propositions and report at the next meeting of the association to be held next Thursday evening in a tent to be erected by Mr. Lorain for a meeting place.

The board of school trustees has been appointed and has organized by electing H. P. Lorain chairman and E. H. Rettig as clerk. This board will serve until the annual election next June.

A special school meeting and election was called for 2 o'clock Saturday afternoon, November 25, at Filer. The object of the meeting is to select grounds for a central school and to provide ways and means for starting the school and to transact any and all other business necessary and desirable.

The first snow of the season fell at Filer on Sunday night and Monday when the ground was covered to a depth of two inches. The sun shone bright on Tuesday, when the thermometer hovered around freezing point. This is taken to bespeak mild and ideal winter weather for the Twin Falls tract.

William Scheffel of Minidoka came to Filer on Tuesday preparatory to erecting a frame building, 28x40 feet, in which he will carry a complete stock of general hardware and furniture.

HALF YEAR'S WORK ON EXPERIMENTAL FARM

(Continued from Page One.)

conditions are such that it will not be a satisfactory crop in this section. As before stated, it was very late in the season when I began operations on the farm, and I only hoped to show the proper methods of culture and irrigation as an object lesson for the benefit of the farmers, yet as a whole the results were very gratifying.

A short statement of my work on the tract, apart from the experimental farm, in my judgment should be appended to the foregoing report.

Immediately upon my arrival, we began grading the park, of about 12 acres; laying out and planting trees thereon. Trees were planted on nearly all the avenues, excepting in the business portion of the townsite. The kinds of trees planted were ash, elm, several varieties of maple, including hard or sugar maple, sycamore, birch, chestnut and a number of other choice kinds of shade trees and shrubbery in the park. The major portion of these trees made a very satisfactory growth.

I began my work among the farmers, as superintendent of agriculture, by calling a meeting of the farmers in every locality where any sort of a place could be had to meet in, organizing them into farmers' associations. In this way I was enabled to get acquainted with the farmers, find out their needs, etc., and was thereby able to do more efficient work. These meetings have been well attended and interesting. I have been able to meet and address the farmers 92 times since April 15. We now have six active organizations on the tract. In addition to this, we have organized a federation of these associations, the meetings being held in my office, where we have on exhibition samples of farm products grown on this tract. The purposes of these local organizations are for mutual benefit with regard to farm production, while the object of the federation is for the purpose of looking after the interests of the farmers in every way, including holding annual fairs, building and maintaining good roads.

The exhibit on railroad day was an eye-opener to our people and did much to add to their confidence. We were awarded second premium on sweepstakes at the state fair, and received two gold medals at the Lewis and Clark exposition, held in Portland, on oats and wheat.

Through the farmers' associations on the Twin Falls tract we have been instrumental in laying out boundaries and establishing schools in five school districts. A number of these already have schools with private subscriptions awaiting the time when they will get their appropriation from the state. The centralized school idea seems to prevail in this section. That is, instead of having small school houses scattered over the country, a township, or its equivalent, is formed into a district and a graded school has been or will be established, sending out carry-alls to bring the children to the school. This is the first time in Idaho that the centralized schools have been established, thereby giving the farmers' children the same advantages as the city child.

Five road districts and voting precincts have been established, covering the same territory as the school districts, and justices of the peace, road overseers and constables have been appointed.

We have also secured some concessions from the county commissioners with regard to bridges, they furnishing some lumber and the farmers doing the work.

If it is proposed during the coming winter that the farmers grub off all of the sandbrush on the roads and, as far as they are able, to grade and fix the roads in as good condition as possible for the coming year. The best of harmony seems to prevail among the farmers and they are working to better in a very creditable manner.

Hoping the above report will meet with your approbation, I remain, sir, very truly yours,

ALEXANDER MITCHELLSON,
Supt. of Agriculture, Twin Falls Land and Water Co.

Experimental Farm Record from April 15 to October 15, 1905—Farm consisting of a Forty-Acre Tract.

We began clearing sagebrush on the farm May 10, although a narrow strip had been cleared before this by other parties. A sagebrush grubber known as the "Johnson grubber" was used, drawn by a large traction engine. The work, however, was not satisfactory, being the first trial with steam power, as steps of brush were left uncut on account of the management of the engine. (However, better work was

done on other farms later on.) The price paid per acre for this work was \$5.00. In addition to this it cost \$3.00 per acre to clear up the brush and grub out the strips by hand that were left by the machine. We finished clearing the brush May 20. We began plowing the land May 10, following up the grubbing as closely as possible.

Preparation of the Soil and Management of the Different Crops:

Sugar Beets.

After clearing, the ground was plowed medium depth, harrowed, leveled, a light coating of refuse from the livey barn was spread upon the ground (it could hardly be called manure), consisting of refuse hay, etc. Animals had not been kept long enough in the vicinity to produce good manure. Plowed a second time, irrigated and disked.

May 20—Planted.

May 27—Plants appear above ground.

June 12—Blocked out and furrowed.

June 14—Irrigated, 14 hours.

June 17—Hoeed.

June 25—Irrigated; second time after plants came up.

June 28—Hoeed; second time; some of the plants withering.

July 8—Irrigated; many plants withering.

July 10—Cultivated; a poor stand evident.

July 15—Irrigated.

July 18—Plot disked up and planted to millet, with the exception of two rows.

August 1—Two rows irrigated.

August 3—Cultivated.

August 16—Cultivated again.

October 6—Harvested.

Corn.

(White Flint corn, called Casah County.)

Soil was prepared for the corn by deep plowing, harrowed, irrigated, disked and planted May 19, with a Planet, Jr. seeder; 32 inches between rows, two feet apart in the row, and from three to five kernels in the hill.

May 27—Plants began to appear.

May 27—Accidentally our waste ditch broke and a portion of the field was flooded. The result was baked soil; weak, yellow, stunted plants, which never recovered or did as well as the balance of the plot, showing conclusively that corn should never be flooded.

June 5—A few hills having missed, were replanted and the plot cultivated.

June 6—Cultivated.

June 8—Hoeed, close to the hills.

June 24—Furrowed.

June 28—Irrigated, 12 hours.

June 31—Cultivated.

July 7—Cultivated.

July 10—Furrowed out.

July 12—Irrigated, nine hours.

July 13—Cultivated.

July 15 to 20—Suckered.

July 20—Placed 18 white cloth strings on ears showing silks.

July 23—Placed 10 black cloth strings on ears showing silks.

August 1—Irrigated, 10 hours.

August 10—Cultivated and laid by for the season.

August 22—The corn was hard and past any danger from frost.

September 10—Cut and shocked.

October 10—Finished husking the corn. Production, 40½ bushels per acre.

It will readily be seen that corn does not require a great amount of water, only being irrigated three times, aggregating in the season 31 hours in which the water was applied.

Wheat.

(Little Club.)

Plowed eight inches, irrigated, disked.

May 20—Planted with a drill, at the rate of 1½ bushels per acre.

May 26—Plants began to appear.

May 29—Cultivated.

June 19—Irrigated, 16 hours.

June 20—Irrigated, 10 hours.

June 20—Irrigated, 10 hours.

July 10—Irrigated, five hours.

August 3—Irrigated, five hours.

August 24—Harvested with a self-binder.

August 28—Stacked.

September 7—Threshed; production, 1,235 pounds, or 22.8 bushels per acre. Number of irrigations, five. Total number of hours irrigated, 16.

The last two irrigations were applied for the reason that in leveling the field the surface soil had been scraped off and more frequent irrigations were needed on these spots than elsewhere on the plot.

(Blue Stem.)

Ground prepared the same as for Little Club.

May 20—Planted with a drill, at the rate of two bushels per acre.

May 26—Plants began to appear.

May 29—Cultivated.

June 18—Irrigated, 16 hours.

June 20—Irrigated, 10 hours.

July 8—Irrigated, eight hours.

July 29—Irrigated, five hours.

August 10—Irrigated, five hours.

August 24—Harvested with self-binder.

August 28—Stacked.

September 7—Threshed; production, 1,123 pounds, or 21.3 bushels per acre. Five irrigations. Total number of hours irrigated, 44.

The last two irrigations were applied for the reason that in leveling the field the surface soil had been scraped off and more frequent irrigations were needed on these spots than elsewhere on the plot. It was noticed that the Blue Stem wheat shelled out to greater degree than the Little Club. Had it not been for this, the yield would have been larger. No doubt this could have been mitigated to some extent, at least, had it been harvested a few days sooner.

Hulless Barley.

Ground prepared the same as for wheat.

May 20—Planted with a drill.

May 26—Plants began to appear.

May 29—Cultivated.

June 18—Irrigated, 20 hours.

June 30—Irrigated, eight hours.

July 18—Irrigated by flooding, six hours.

July 31—Irrigated by flooding, six hours.

August 26—Stacked.

August 28—Stacked.

September 7—Threshed; production, 181 pounds, at the rate of 9½ bushels per acre. Number of irrigations, four. Total number of hours irrigated, 40.

The barley was planted on a plot where a large part of the surface soil had been scraped off in leveling. It came up stronger and more vigorous than any of the other grains, but when the weather grew very warm it seemed to languish, to some extent. No doubt had the barley been planted in the proper season, in proper soil, it would have been a satisfactory crop.

Corn Wheat.

(Or Siberian Rye.)

Ground prepared the same as for wheat.

May 20—Planted with a drill, at the rate of one bushel of seed to the acre.

May 25—Plants began to appear.

May 27—Cultivated.

June 20—Irrigated, 10 hours.

July 5—Irrigated, eight hours.

July 20—Irrigated, eight hours.

August 18—Harvested.

August 21—Stacked.

September 7—Threshed; production, 831 pounds, or at the rate of 18 bushels per acre. Number of irrigations, 4. Total number of hours irrigated, 40.

Oats.

(Big Four.)

Ground prepared the same as for wheat.

May 20—Planted with drill, at the rate of six pecks to the acre.

May 25—Plants began to appear.

May 29—Cultivated.

June 21—Irrigated, 24 hours.

July 9—Irrigated, 12 hours.

July 30—Irrigated, 16 hours.

August 18—Harvested.

August 20—Stacked.

September 7—Threshed; production, 1,136 pounds, at the rate of 26½ bushels per acre. Number of times irrigated, three. Total number of hours irrigated, 52.

Cow Peas.

(Whip-poor-will.)

May 20—Planted with a drill, at the rate of 1½ bushels per acre.

May 29—Cultivated.

June 4—A few black aphids began to appear on plants.

June 22—Irrigated, 18 hours.

July 10—Harrowed.

July 20—Irrigated by flooding.

Number of irrigations, two. The peas were planted on a plot of ground where a large proportion of the surface soil had been removed in leveling. A poor stand was obtained, excepting where no soil had been removed. September 26 they were plowed under for fertilizer.

Potatoes.

Ground was prepared for planting by deep plowing, harrowed, irrigated and harrowed again. In planting we used a large single shovel plow, furrowing out the ground 32 inches apart. The seeds were dropped into this furrow, and then covered with a horse

July 19—Laid by for the season.

Number of irrigations, two. Total number of hours irrigated, 24. Production, 19,290 pounds, or 330 bushels per acre. Copious notes were taken with regard to the color of the foliage, blossoms and general condition before and after irrigation, and it was discovered later on that a number of varieties planted were not true to name, apparently these notes will not be given here.

Millet.

(Early Fortune.)

Ground prepared the same as for wheat and oats.

May 22—Sown broadcast at the rate of 20 pounds per acre.

May 25—Harrowed.

May 31—Plants began to appear.

June 4—Irrigated, 12 hours.

June 27—Irrigated, 12 hours.

June 29—Flooded, two hours.

August 4—Irrigated, 14 hours.

August 18—Harvested.

September 7—Threshed; production 867 pounds, or at the rate of 1,000 pounds per acre. Number of irrigations, four. Total number of hours irrigated, 40, although the irrigation of July 5, of two hours, was accidental and did more harm than good. Only 10 pounds of seed was sown on this plot, and in thrashing it the machine was not prepared to do the work, consequently a large portion of the seeds were lost.

Navy Beans.

Ground prepared the same as for wheat and oats.

May 22—Planted in rows three feet 10 inches apart and 16 inches in row.

May 29—Plants all up.

June 7—Cultivated.

June 9—Hoeed.

June 24—Furrowed.

June 30—Irrigated, 10 hours.

July 3—Cultivated.

July 10—Irrigated, 15 hours.

July 15—Cultivated, hoeed and laid by for the season.

Production, 1½ bushels, at the rate of 12 bushels per acre. This crop was only irrigated twice. Total number of hours irrigated, 25. One more irrigation would probably have been beneficial.

Henderson's Bush Lima.

The record for these beans was essentially the same as for the Navy beans, as well as the production, although an additional irrigation would not have been beneficial.

Bayle Beans.

The same record as above, as far as planting, cultivation and irrigation is concerned, but the crop was not satisfactory, as a large proportion of it was attacked with bean rust and the remainder grew very large vines with few pods.

Corn.

(Iowa Gold Mine.)

Soil prepared the same as for other grains.

May 22—Planted in rows three feet two inches apart, two feet apart in the row, three to five kernels in the hill.

May 31—Plants coming up.

June 7—Cultivated.

June 28—Furrowed.

June 30—Irrigated, 12 hours.

July 5—Cultivated.

August 1—Irrigated, 12 hours.

August 10—Cultivated.

August 24—White cloth strings tied on 15 first ears to silk.

September 4—Cut and shocked.

It became evident by this time that it would not mature, consequently it was cut and sold for fodder. The stalks that had the marked ears on them were left standing until September 24, and were sufficiently matured for seed.

Number of irrigations, two. Total number of hours irrigated, 24.

Buckwheat.

The first sowing of buckwheat was made June 6. Two kinds were sown, the Japanese and the Silver Hull.

June 20—Irrigated, 12 hours.

July 10—Irrigated, 10 hours.

Did not head well and seemed to wither in the hot sun. Plowed under for fertilizer.

Second sowing of buckwheat, July 17.

July 20—Irrigated, 12 hours.

August 5—Irrigated, eight hours.

September 4—Irrigated, eight hours.

A poor crop; plowed under for fertilizer.

Alfalfa and Oats.

This 1½ acres was not plowed. After clearing it of sagebrush it was simply run over with a disc harrow. The oats were drilled in, while the alfalfa was sown broadcast by the same machine.

May 26—Planted.

May 29—Finished corrugating.

May 29—Began irrigating and finished the 29th; alfalfa coming up; a good stand in four days and the oats in five.

June 7 to 12—Irrigated.

June 27 to 29—Irrigated.

July 2 to 4—Irrigated.

August 7 to 9—Irrigated.

In each irrigation water was allowed to run 12 hours, being changed morning and night.

August 24—Harvested the oats with self-binder.

August 30—Stacked.

September 7—Threshed oats; production 285 bushels, or 24 bushels to the acre.

Number of irrigations, five, aggregating 60 hours continuous flow.

While we got a very good stand of alfalfa in connection with the other crop, yet it made a very poor growth, but will doubtless come along all right next year. Unless as a makeshift, would not advise planting alfalfa with any other crop. This plot of ground required more frequent irrigation than any other. Loss irrigation would have been required and a better crop grown had the ground been plowed before planting.

Clover.

Land plowed medium depth, harrowed, irrigated.

May 26—14 pounds of seed was sown to the acre broadcast and harrowed in.

June 1—Plants appeared, coming up in five days.

June 2 to 3—Irrigated, 12 hours.

June 20 to 22—Irrigated, eight hours.

July 10 to 12—Irrigated, 10 hours.

August 10—Irrigated, 12 hours.

September 2—Harvested ¼ ton per acre.

Number of times irrigated, four. Number of hours irrigated, 42. The clover made a very satisfactory growth, having a fine color and tubercles on the roots.

Timothy and Clover.

Ground prepared by plowing deeply, irrigated, harrowed, and on.

May 26—Sown broadcast, six pounds of timothy and eight pounds of clover per acre.

INTERESTING DATA IN REGARD TO OILED ROADS

Gathered by Committee Appointed by the San Diego, California, Council to Investigate This Method of Roadbuilding Which That City is Preparing to Adopt.

Now that the Salt Lake Real Estate association has taken up the matter of paving the residence streets here with oil and is planning to bring the matter to the attention of the city council, information from southern California will be of value. In a number of cities in southern California street oiling is done extensively. It is said to be an undoubted success, while the cost is but one-fifth the cost of asphalt paving.

San Diego is making a thorough investigation of the subject, and Salt Lake City should profit by the experience of those investigations. E. E. Shaffer and Daniel Cleveland, two prominent men of San Diego, were sent to Riverside and Los Angeles as a special committee to look into the merits of oil street paving. These men were met by Thad K. Seburn and Mayor McFarland of Riverside and every avenue of information thrown wide open to them. They spent days in probing into the subject in Riverside and Los Angeles. On their return to San Diego they submitted a report to the committee they represented. The gist of that report is given herewith, and will be found to be profitable reading by those interested in the use of oil on the streets of Salt Lake City.

How Oil Is Used on Streets.

The method of paving adopted and insisted upon at Riverside is:

1. The careful preparation and shaping of the roadbed; then the thorough packing down of the surface with water, and finally rolling hard and smooth.

2. When disintegrated granite or gravel is used, the spreading of the required thickness of this material upon the prepared surface.

(Note.—The granite or gravel should not be mixed with oil before or at the time it is laid, but should be thoroughly watered.)

3. After the granite has been laid down it should be thoroughly rolled; then,

4. The oil—about one gallon to the square yard—should be sprinkled over the granite in two applications, some well approved sprinkler being used.

5. After rolling, disintegrated granite should be spread over the oil, and the surface should then, again be rolled. A 10-ton roller is used at Riverside.

The 25 miles of paved streets at Riverside, and the paved roads of other California towns where oil is used, may be divided into four classes, beginning with the simplest and least expensive and thence passing on to the more expensive and more durable and permanent roads:

Four Classes of Oil Paving.

1. The natural surface rolled and then oiled.

2. A base of two inches of decomposed granite, well oiled.

3. A base of five inches of decomposed granite, well oiled.

4. Asphaltum—as represented by Seventh street in Riverside.

Taving of the first class is much the cheapest, and is better than the natural surface. It is, however, at the best only a temporary expedient, and is adapted only to narrow country roads. The oiled surface soon breaks, and is worn into holes, and needs frequent repairs, re-rolling and re-oiling.

The paving of the second class seems to have given good satisfaction at Riverside, and is a great improvement upon the roads that are simply oiled.

The paving of the third class, however, is the one adopted at Riverside as being the most satisfactory. Mr. Seburn emphatically recommended it as being substantially the best system of paving for general use where there is much travel or heavy teaming, in which it has proved itself to be quite adequate. This kind of road is not likely to need any repairs for some years. In this respect it is very economical.

Asphaltum paving, and is practically as good.

Asphaltum paving makes a fine city street, but for hard and constant wear it is not much better than the roads of the third class. Asphaltum is too expensive for most of our California streets and roads.

Beware of Worthless Oil.

After leaving Riverside we spent half a day in driving over the paved streets of Los Angeles, accompanied by two experts in road paving. Our

observations and conclusions in Los Angeles were much the same as at Riverside. The Los Angeles experts were in emphatic accord with the street superintendent of Riverside as to the value of a layer of five inches of disintegrated granite upon a surface prepared as it is done at Riverside. Two things were strongly impressed upon us at both Riverside and Los Angeles.

1. The necessity for giving the road or street a sufficient crown to insure perfect drainage.

2. The great difference in practical value and wearing qualities between the several grades and brands of oil used in paving. Some kinds of oil are almost worthless; other kinds are more satisfactory.

In conclusion, your committee respectfully recommends:

1. That the methods of street and road paving adopted and used at Riverside, as heretofore set forth, be adopted and substantially followed in paving the streets of San Diego.

2. That a base of five inches of disintegrated granite be used in our street paving.

3. That only the best quality of oil be purchased and used upon our streets—the best is the cheapest.

4. That contractors for this work be required to pave one side of the block at a time, and that the side being paved be closed to travel and traffic until the work is completed.

Take Better Care of Streets.

We further recommend an preliminary to the work of paving that connections be first made by the gas company and by the city water department with every lot on the street to be paved before the contract for paving is entered into, so that after the paving is completed the street shall not be torn up and the paving and the street marred by the work of making these connections.

We also submit the following additional recommendations:

Cement gutters should extend about three feet out from the curb line, and should have a sharp angle.

All trimming and cutting down of trees along the streets should be done only by or under the direction of the street superintendent. This is the law at Riverside. If it had been the law in San Diego for the past five years many beautiful trees that have been preserved in still beauty our streets, and much ugly trimming would have been avoided.

The usage in Riverside that should be adopted here as to water, gas and sewer connections is this: When a street is cut for such purpose the work must be done under the direction of the street superintendent, and must be accepted by him as satisfactory before any further permit for this kind of work will be issued to the same contractor.

Notice to Entrymen.

Entrymen who have not made final proof on their lands are hereby notified that the law requires them to make annual proof of work done within one year of the date on which they received notice that water was ready for delivery. By order of the State Land Board.

C. D. THOMAS, Representative, Twin Falls.

"I Thank the Lord!" cried Hannah Plant of Little Rock, Ark., for the relief I got from Buckle's Arnica Salve. It cured my fearful running sores, which nothing else would heal; and from which I had suffered for five years. It is a marvelous healer for cuts, burns and wounds. Guaranteed at Sprague & Butler's drug store; 25c.

Run No Risks.

Get your lateral right in the beginning and save endless trouble. C. H. Hull will survey them for you and guarantee satisfaction. Office, Jones building, Twin Falls.

Son, Lost Mother.

"Consolation runs in our family," writes E. B. Bell of Harmony, Mo. "For the past five years, however, on the slightest sign of a cough or cold, I have taken Dr. King's New Discovery for Consumption, which has saved me from serious lung trouble." His mother's death was a great loss for Bell, but he learned that lung trouble must not be neglected, and how to cure it. Quickest relief and cure for coughs and colds. Price 50c and \$1.00; guaranteed at Sprague & Butler's drug store. Trial bottle free.

For tender cuts try the City Meat Market, next to the new Scott building.

Cassia County Abstract Co.

Only complete record of Titles and Water Rights in Cassia County. Absolutely reliable and up to date. All work guaranteed.

BRIDGE THE CANALS.

The county commissioners have awarded M. L. Fritz the contract for repairing the county bridge which crosses the Salmon river at the south-western end of Cassia county. The contract price was \$600 and Mr. Fritz has announced that the work will be begun immediately and that the bridge will be in first-class condition by the end of the year.

This bridge is used by the Three Creek settlers in their journeys to Twin Falls. It had been in a dangerous condition for some time and the settlers, who wish to do their trading in Twin Falls, asked to have it repaired. In order that those settlers may be enabled to travel to Twin Falls in comfort and safety it is necessary that both the high and low line canals should be bridged on a section line which would connect the Three Creek road with the city of Twin Falls. The question of bridging the canals was agitated by the Commercial club some time ago but nothing has been done. Until the bridges are built the Twin Falls merchants will be deprived of all but a small portion of the Three Creek trade as the settlers from that district will be obliged to go to Rock Creek and then double back, adding about 30 miles to their journey.

Another cogent reason why the canals should be bridged immediately is the urgent need of giving the Twin Falls settlers access to the forest reserve. Settlers living west of the city of Twin Falls should have an outlet by way of Goat springs. The Goat springs road is one of the best in the country and heavy loads can be hauled over it with ease, while the Rock Creek road is the reverse. West of Rock Creek the high line canal is almost as formidable a barrier to travel as the Chinese wall. There are occasional gaps where the canal has not been completed but the farmers cannot be expected to drive through the sagebrush hunting for these gaps, the location of which is known only to the contractors and engineers. The low line canal is also a serious obstruction. The most westerly bridge on this canal is five miles from Twin Falls.

At present a number of settlers in the vicinity of Filer are engaged in building fence posts and firewood from the reserve. In order to get into the reserve they have to travel almost double the necessary distance by way of Rock Creek over an abominable road. If the canals were bridged they could go in comfortably by way of Goat springs and follow an excellent road which is located close to the place from which the timber is being taken in range 17, almost directly south of Twin Falls. The Goat springs road skirts the west line of range 17. Men who have taken a considerable quantity of timber from the reserve say they can haul twice as much to Goat springs as they can to Rock Creek, and do it in less than half the time.

The citizens of Kimberly and Filer deserve commendation for their decision in favor of centralized schools. The plan is working successfully in Twin Falls and can no longer be regarded as an experiment.

Every farmer should study the report of "Superintendent" McPherson upon the results obtained at the experimental farm. It should be remembered that this farm is conducted for experimental and not for profit and is maintained for the purpose of saving the farmers the expense of making the experiments themselves. The report contains much valuable information.

The movement to organize a Young Men's Christian association in Twin Falls is most laudable and should receive the strongest support. A gymnasium and reading room are urgently needed in this city and it is to be hoped that those who have launched the movement will receive the encouragement and material aid they deserve.

HOW PLAISTED KEPT CHICKENS.

By Diplomacy He Managed to Save His Fruit.

"Did you ever keep chickens, Plaisted?" was a question put to the assistant general freight agent of the Oregon Short Line this morning during an impromptu debate upon the plausibility of poultry generally, which had its origin in the story of the dispute with chicken-thieves in the Deseret News last night.

As Frank H. Plaisted has gone in for most things that run the gamut from a Boise baseball nine to the annexing of several hundred carloads of machinery from under a rival's nose, his answer occasioned no great surprise.

"Yes, I kept chickens once," he ventured in an offhand manner. Then as an afterthought he added, "they were my neighbors."

"Now, boys," he interjected with his characteristic earnestness, "I will tell you the story of my life. Listen carefully and take a hint out of my book and if you are bothered with the neighbor's fowls, take a tip from me."

"There was a time when I prided myself on my garden and my thoughts ran riotously in the direction of primo berries and the succulent raspberry. At great expense and by the aid of an express frank I imported some fine plants from a prize eastern nursery. As those berries flourished they became the apple of my eye. They were the pride of the family."

"Just when things were coming along nicely, my neighbor's chickens broke loose and came along nicely, too. After feasting on my prime fruit they would saunter on to my porch, wipe their feet on the heretofore immaculate boards, and if, perchance, the screen door were left open, they would inspect the house, unless headed off with a broom."

"I have the reputation of being long-suffering and peaceable. Of course, there is a law governing the trespass of chickens, but who wants to go to law with his neighbors? In my anguish I went to the lady next door and with tears in my eyes asked her to put a ball and chain on her rooster and his family. She was indignant. She said she would understand that her chickens were well brought up and would not think of leaving their native lot to feast on prime berries belonging to a stranger. The trespassers were somebody else's chickens."

"Of course, you cannot bandy words with a lady. I went home and thought long and hard. What I said is neither here nor there; what is more to the point is what I did. I went up town and invested in 13 worth of steel traps and 25 cents a throw. Then I returned home with them and gave the neighbors a last chance."

"Again I called on the lady and expostulated regarding the industry of her poultry. Again she asserted indignantly that her fowls were like Caesar's wife."

"Then I breathed a sigh of relief and said I was so glad because I had bought 12 steel traps and was going to set them in the raspberry patch that night and expected to supply the neighborhood with dead pullets next day."

"As I made this statement I noticed

that she changed color. At last she broke in with a rambling statement to the effect that while her chickens always stayed in the lot there might be some danger of her rooster, calling on any stray fowls on my premises, and she would be pained to have that noble bird meet with an accident.

"At this I left her, and when the chickens had gone to roost for the night I adjourned to the lot, and making a lot of unnecessary noise, I proceeded to drive some stakes and set my traps."

"I give you my word as a humble railroad man that I had no sooner settled down in the house when I heard strange sounds. On looking out of the window there stood the lady next door holding a lamp while her husband and a youngster were nailing on strips to beat the band. I went to bed and they were still driving nails. Once I awoke and the hammering was yet going on. I believe they rebuilt that chicken coop that night. Anyhow no chickens strayed around my lot after that, and all I caught in my traps was a poor old toad who had been keeping late hours and was on his way home."

"Yes," he said as he turned to his stenographer to dictate an appealing letter to a shipper with a big grouse, "a little diplomacy is better than going to law and having a row with your neighbors, any day of the week."—Deseret News.

Notice.

A meeting will be held at the Christian church Sunday afternoon, November 26, at 3 o'clock, for the purpose of taking preliminary action looking to the organizing of a Young Men's Christian association.

All men who are interested in providing a public reading room and place of wholesome amusement for Twin Falls are requested to be present.

JACK W. WHITE,
REV. L. F. STEPHENS,
CLYDE C. ANDERSON,
Committee.

Nothing is too heavy or too light for Elckhoff & Hazen to handle in their big transfer wagons. Give them a trial and satisfy yourself.

Ditch Surveying a Specialty.
Charles H. Mullen makes a specialty of ditch surveying. He knows the ground and guarantees satisfaction. Office in Jones building, Twin Falls.

BREVITIES

P. D. Kimball went to Salt Lake yesterday for a brief stay.

Mrs. Booth is slowly recovering from an attack of the grippe.

Carl Towner, who had been ill for some time, is now convalescent.

S. T. Hamilton attended the meeting of the state land board in Boise on Wednesday.

Emile Braun is recovering from an attack of fever which has kept him at home for some time.

Mr. and Mrs. M. M. Murtough enjoyed pleasant visits in Boise and Salt Lake City during the week.

Peter Erlison left on Saturday last for his home in Colfax, Wash., where he will resume his business duties.

The Cassia County Social club announced a dance this evening in I. O. O. F. hall to which the general public will be made welcome.

Chief Engineer P. S. A. Bickel of the Twin Falls Land & Water company was in Boise for a short visit this week.

There will be a meeting of importance on Sunday morning at 11 o'clock in the Catholic church. All are earnestly requested to be present.

C. M. Price, the well known attorney of Twin Falls, is reported to be in Boise, where he went to attend a meeting of the state land board.

J. V. Baker disposed of a carload of Blue Lakes apples along the line between Twin Falls and Minidoka. He reports an active demand for fruit and predicts higher prices.

A postoffice has been established at Murtough station, east of Hansen, with Benjamin F. Jahn as postmaster. Murtough is coming to the front like all other points on the Twin Falls tract.

Rev. J. H. Barton will preach in the school house next Sunday at 2 p. m. Subject, "The Bread of Life." At 7:30 p. m., subject, "For or Against Christ." All are invited to these services.

The county commissioners have appointed Police Judge W. J. Smith of Twin Falls a justice of the peace for this precinct. Mr. Smith served as a justice for years and is thoroughly familiar with the duties of the office.

Charles R. Lowe, county superintendent of public instruction, visited the Twin Falls schools this week. Mr. Lowe had not been here since last winter and he was astonished at the progress that had been made. He found the Twin Falls schools in splendid condition.

C. D. Thomas is having a broad concrete sidewalk laid around his residence. This is the first walk-of-the-kind to be built in Twin Falls. Mr. Thomas attended this week's meeting of the state land board in Boise, returning yesterday.

Woody T. Seal has almost finished clearing 50 acres on the farm of Mark Benitt, on mile west of Twin Falls. Mr. Benitt is thinking seriously of placing his entire quarter section under cultivation next year.

The meetings continue at the Christian church with increasing interest and a growing attendance. Services will continue every night until December 3, when the new church will be dedicated. All are cordially invited to attend these meetings. Sunday school at 10 a. m. and Y. P. S. C. E. at 6:30 p. m. each Lord's day.

Measles and Meadames Allen, Mitchell, Sprague and Peterson, Misses Ash, Perrine and Higbee, and Messrs. Carle, Henn, Frankell, Price, Anstrem, Mott, Vaughan and Cost spent Monday evening of last week at the home of Miss Alice Crismon and Miss Zella Cole. Candy making was indulged in by some while others found more pleasure in the mystery of concealing a "Welch rarebit," much to the satisfaction of the hungry ones present.

There will be a Union Thanksgiving service at the Christian church Thursday, November 24, at 11:30 a. m. Sermon by Rev. Gustafson. It is hoped that the first Thanksgiving service in this growing town will be well attended by all patriotic citizens.

E. L. Suttle, formerly of Twin Falls, who was recently arrested in Boise on complaint of Ruth Hudson, a 17-year-old girl whom he is alleged to have wronged, has been bound over to the district court, for trial. His bond was fixed at \$10,000, which he was unable to furnish.

The members of the Q. N. O. club were entertained by Mrs. Fitch L. Ball on Friday evening last. Dainty luncheon was served and high five afforded amusement. The guests were Mesdames Tibbals, Osborne, Williams, Dunn, Boyd and Baker, and the members of the club, Mesdames Murtough, Mitchell, Peterson, Nibley and Allen, and Misses Crismon and Cole.

Mr. and Mrs. Carl Hahn are busy transforming their snug cottage on Ninth avenue and Thirteenth street into a comfortable home. Mr. Hahn is reported to have put up a long line of stove pipe and put down a heavy load of carpet without a scratch. He looks a trifle thinner than usual but is quite as cheerful.

The muddy condition of the roads makes it hard for the school children on the rural routes to make connections with the carry-all. Some of the children have to walk a long distance through the mud, and it will soon be necessary to extend the scope of the routes in order that the little ones may not be unnecessarily exposed to the mud. Covered wagons will shortly be placed in commission and if need be another wagon will be procured.

The Idaho Implement company of Boise has purchased three lots on Main street near Ninth and will shortly begin the erection of a three story brick building, covering a ground space 60x120 feet. The work of excavating the basement for the structure will commence at once and construction will immediately follow. Full details regarding this excellent building will be announced later.

A jolly crowd of Twin Falls folk spent Wednesday evening of last week at the beautiful home of Mr. and Mrs. I. B. Perrine at Blue Lakes. After being entertained by vocal selections by Miss Ann and instrument numbers by Mrs. Dunn and Mrs. Perrine, part of the guests remained for cards while others strolled up to "Low's Orchard" at the Albion creek spring and made merry around a bonfire. On their return they found delicious refreshments awaiting them which were served by the hostess, assisted by Miss Ann, who presided at the coffee. The waning moon was high when the guests boarded the ferry for home. They unanimously proclaimed the evening one of the evenings of the season.

The Southern Idaho Refill Lumber Dealers' association was organized in Twin Falls on Wednesday with the following officers: President, H. O. Miller of the Twin Falls Lumber Co.; vice president, Mr. Dwyer of the Dwyer Lumber Co.; secretary, Mr. J. E. Burnett of the Nibley-Channel Lumber Co.; treasurer, C. B. Channel of the Nibley-Channel Lumber Co.; Twin Falls. The organization takes in all dealers between American Falls and Bliss. On Wednesday evening the members of the association banqueted at Mrs. Wolf's, covers being laid for 18. Mr. Elliott of Salt Lake made a capital toastmaster and the feast was greatly enjoyed.

The Old Fellows will give a luncheon to their wives and guests at the I. O. O. F. hall on Thanksgiving evening, Thursday, November 24, at 12 o'clock. The members of the order will bring their own "pots in hot water" and will wait on the ladies in chivalrous fashion. It is understood that the men are to prepare the lunch and there must be no fudging. A banquet report was circulated to the effect that a committee had been appointed to taste the viands before they were served but this is denied by the three link gentlemen. The rumor that the members of the order had purchased all the dyspepsia tablets carried by the Bedford Drug Co. and Sprague's Pharmacy is also denied. The Old Fellows always keep their promises. Visiting brethren are cordially invited to the spread.

The Snowstorm

Was a trifle inconvenient but it did not annoy those who were supplied with

"Peacock" Rock Springs Coal

Just received, a consignment of superior Nut-Coal, just the thing for cook stoves. Place a trial order with

The Filer Coal Company

SOLE DISTRIBUTORS. Plenty of coal on hand. Now is the time to lay in a supply. Orders received at the office of EICKHOFF & HAZEN will receive prompt attention.

The first wedding anniversary of Mr. and Mrs. James Nibley was celebrated last evening when Mrs. Nibley entertained the members of the Q. N. O. club and Messrs. Baker, Boyd, Dunn, Osborne and Tibbals. As gentlemen were strictly forbidden, Mr. Nibley entertained Harry Allen, who is talking with an attack of the grippe. What the ladies did is not reported but Mr. Allen and Mr. Nibley, both declare "a delightful time was had." Mrs. Allen stated that every cigar had in the house was filled to overflowing. "Whatever's right."

A meeting was held in the Christian church on Wednesday evening for the purpose of taking preliminary steps to organize a branch of the Y. M. C. A. in Twin Falls. There are a number of workers in the city and the movement should receive hearty public support. The plan is to open a reading room and gymnasium where young men can spend their evenings healthfully and profitably. The meeting was presided over by Rev. R. D. Osterhout and J. Warren White acted as secretary. Another meeting will be held on Sunday afternoon in the Christian church at which the attendance of all those interested is earnestly requested.

Attorney General J. J. Guheen and E. B. Critchlow, attorney for the Twin Falls Land & Water Co. met with the governing board of the Twin Falls Canal association on Saturday last and discussed several features of the company's contract with the state. No definite action was taken upon any question, the object of the meeting being to discuss the various features of the construction and over which misunderstandings or disagreements might arise. The company, it is understood, would willingly relinquish control of the canal at any time to a responsible organization as the maintenance charges are much higher than in the now, the company will not have interest to those who did not receive water in time to raise a crop this year, unless the water was used for the purpose of making flax proof. The question of the company giving deeds and taking mortgages from settlers was also discussed.

Look to Your Eyes.

Your eyes are surely worth more to you than the price of a pair of glasses. If you value your eyes have them properly fitted at once; delay and the eyes may become so bad that there will be no help for them. "Do you think because I am here all the time that I am not competent to do your work? I have been employed in some of the best optical parlors on the Pacific coast and have had 20 years' experience. I have all the modern appliances for testing the eyes. Come in and I will test your eyes free. The best reference you could ask for is the success I have had in fitting many bad cases of errors of refraction of people you know well. It is impossible for traveling opticians to give good service to properly fit you. Special rates for young people for the month of November.

J. E. GRANGER, Graduate Optician, TWIN FALLS.

The cheapest and most comfortable way to get to Buhl or Filer is to take the stage on Monday, Wednesday and Friday afternoons at 1 o'clock from J. V. Baker's office, Main street, Twin Falls.

WANTED.

The address of A. M. CARR, formerly of Bear City, Utah, is VICTORIA A. BROWN, Rupert, Idaho.

Attention, Odd Fellows.

On Thanksgiving evening, Thursday, November 24, all members of the order are cordially invited to meet in I. O. O. F. hall for the purpose of participating in an informal luncheon to be given by them as a compliment to their wives and lady friends. Each member is requested to bring a basket of lunch with him and to assist in its service. The members of Twin Falls lodge No. 23, extend a hearty invitation to all visiting brethren to be present. Come and assist in showing appreciation of the many blessings we enjoy. By order of the committee.

The Booth Dry Goods Co. is making some stable reductions in various departments it will surely pay to investigate.

If you want to go to the rising towns of Buhl and Filer, take the stage from J. V. Baker's office, Main street, Twin Falls. Leaves each Monday, Wednesday and Friday afternoon at 1 o'clock.

Children's and ladies' overgaiters and leggings at Booth's.

Pajamas for ladies or children at Booth's.

Fancy ribbons at a reduction at Booth's.

The Booth Dry Goods Co. is receiving a large and beautiful assortment of holiday goods which will make Twin Falls people a fine assortment for holiday shopping.

Thanksgiving Excursion Rates.

A special rate of one fare for the round trip will be in effect on the Oregon Short Line on Wednesday, and Thursday, November 23 and 30, final limit December 1. Tickets at this rate will be sold to all points within a radius of 250 miles from Twin Falls.

Go west, young man. Take the stage to Buhl and Filer. Leaves J. V. Baker's office, Main street, Twin Falls, on Mondays, Wednesdays and Fridays at 1 p. m.

You can't afford to miss a chance to win the \$2.50 hat which will be given to the man answering nearest to the amount of goods used in the Thanksgiving sale now being conducted by the Wade Tailoring & Clothing company. The rush is on and it will only last a few days.

For Rent.

Two downstairs rooms of plastered house. Address Box 42, Twin Falls.

Alfalfa and Timothy Hay.

I propose to ship hay by the carload into Twin Falls for my own use and for sale to farmers at a reasonable price. By buying right I will be able to sell right.

J. E. BURNETT, Twin Falls Livery and Saddle Stable.

No need of fretting over getting your freight up from the depot when Eickhoff & Hazen will attend to it and do it properly.

Good Roads

are necessary, but

Good Drugs

are more important. You might study the good road movement for some time, but when you need Good Drugs no time is lost by thinking out where to go. Take your Prescriptions where everything is new and of the good kind, properly compounded by a competent Pharmaceutical Chemist.

Then if you are thinking of buying some extensively advertised Patent remedy, let us show you our own line, all guaranteed. We have confidence in our line. Why let the patent medicine manufacturers have not?

FARMERS' INSTITUTE MEETINGS

To Be Held in Twin Falls on December 6 and 7.

Farmers' Institute meetings will be held in I. O. O. F. hall, Twin Falls, on Wednesday and Thursday, December 6 and 7, under the auspices of the Idaho Experiment Station. There will be morning, afternoon and evening sessions and many interesting papers and addresses will be included in the program. C. L. Smith, editor of the Inland Farmer, Spokane; A. E. Gipsen, editor of the Gem State Rural, Caldwell; Professors H. T. French, O. A. Crosthwait of the Experiment Station, Moscow, and several other authorities upon agriculture and horticulture will be heard. Every farmer should endeavor to attend the institute as time spent at meetings of this character is always returned one hundred fold in the field. Following is the program:

MONDAY, 1:30 P. M.

"Diversified Farming and Its Advantages," by C. L. Smith, editor of the Inland Farmer of Spokane. "Trees to Plant on the Twin Falls Tract," by J. A. Waters of Twin Falls. "The Soil and Its Problems," by Professor George A. Crosthwait. "Potato Growing," by Mr. Wolfe of Kimberly. "Business on the Farm," by A. McPherson, superintendent of agriculture.

Evening Session, 7:30 P. M.

"Twin Falls Home Song," by the choir. Address of welcome, by S. T. Hamilton of Twin Falls. Response by Professor H. T. French. Song, by Mrs. Bonham. "Beautiful Home Grounds," by Miss Wolfe of Twin Falls. Piano solo, by Loretta Tobin of Twin Falls. "Agriculture in the Public Schools," by Professor G. A. Crosthwait. Stereopticon lecture, by Professor H. T. French.

TUESDAY, 10:00 A. M.

"The Family Cow," by A. E. Gipsen, editor Gem State Rural, Caldwell. "Corn Growing," by W. A. Starr of Kimberly and Professor G. A. Crosthwait. "Melon Growing," by E. H. Rettig of Filer. "Dairying and Its Advantages," by C. L. Smith, editor of the Inland.

Farmer, Spokane.

1:30 P. M. "Sheep Raising on the Farm," by H. T. West of Kimberly. "Poultry Keeping," by A. E. Gipsen of Caldwell. "Good Roads," by F. E. Chamberlain of Twin Falls.

Evening Session, 7:30 P. M. Music, by Twin Falls Glee club. "The Farmers' Boy," by Mrs. Dora K. Steinhour of Dry Creek. Song, by Mrs. Bonham of Twin Falls. "Relation of the Public School to the Farm," by Professor, Father of Twin Falls. Song, "Idaho," by the audience. "Building the Home," by C. L. Smith, editor of the Inland Farmer, Spokane. Short stereopticon lecture, by Professor H. T. French. The program will not be rigidly held to, provided other pertinent subjects are brought up.

All day addresses or papers will be short and to the point, subject to discussion at the close of address. A question box will be provided. Anyone desiring questions answered, please hand them in.

The office of the superintendent of agriculture will be open constantly and everyone is invited to make that their headquarters.

Everybody is invited to attend these meetings. Ladies are especially invited. Farmers, bring your lunch with you and a basket lunch will be enjoyed at the office of the superintendent of agriculture.

The committee is seeking to make arrangements to entertain all who come from a distance.

ALEX. McPHERSON, Chairman of Committee. J. A. WATERS, Chairman of Arrangements.

Eickhoff & Hazen will haul your freight and express and haul it right.

Save your jaws by buying beef steaks at the City Meat Market and you will be better able to boost for Twin Falls.

Get your roasts at the City Meat Market and you won't get them at home.

Anything from a ton of coal to a feather duster carried by Braun Bros' express as it should be. Satisfaction guaranteed.

You will make no mistake by intrusting your goods to Braun Bros' transfer. They make no mistakes themselves.
