HOW TO GROW POTATOES

MANNER OF CULTIVATION TO SECURE BEST RESULTS.

Superintendent McPherson Gives Valuable Information Concerning the Proper Method of Cultivating and Irrigating Potatoes.

"How should potatoes be cared for in order to get the best crops?" Superintendent McPherson was asked.

"In answering that question I would assume that the ground had been properly prepared and irrigated before planting, unless there happened to be a great deal of moisture in the ground at the time of planting. Potatoes should always be planted in moist soil in order that they may have a good start and be kept growing in a healthy condition until about blossoming time. In order to understand how to cultivate and irrigate a potato we must understand something of its habits and growth. This fact should always be borne in mind: It does not make any difference how big or how high a root or plant may be, the roots are bigger and deeper in the soil than the top is above ground. Another thing, a potato is not a seed in the true sense of the word. True seeds grow above ground. The tuber, or potato, is simply an enlarged portion of a stem. When the potato starts to grow its roots begin to shoot downward and outward, similar to the shape of the top. In fact you can almost always tell the manner of root growth of any plant by the appearance of its top.

"As soon as the potatoes are planted they should be harrowed lightly and this operation should be repeated every two or three days until the plants appear above ground. These operations conserve the moisture, warm up the soil, break up the crust which may have been formed and destroy weeds. As soon as the rows are well formed cultivation should begin in such a manner that the dirt is constantly drawn toward the rows. By the time it is necessary to irrigate the potatoes the ditches between the rows should have been formed by cultivation."

"What is the object in cultivating toward the rows?"

"The roots of potatoes, if left alone, will naturally run in a lateral direction one or two inches below the surface of the ground. By the hilling process they are driven downward and away from the light, thus giving them a bigger feeding ground and allowing them to spread. If the forming of the ditches between the rows is deferred until it is absolutely necessary to irrigate, the roots will have attained such a lateral growth near the surface that the cultivator will tear them all to pieces. On the other hand, if the hills are formed gradually while the root system is being developed, the roots will be thrust downward out of the reach of the cultivator and the making of ditches or corrugations for irrigation will not be necessary. Of all plants, potatoes demand the ascending or capillary moisture. This can be easily gotten by means of deep depressions between the rows and high hills. Potatoes properly planted in moist soil do not need irrigation until they are in bloom. At that time they should have attained a large and deep root system, providing proper cultivation has been practiced, and they are ready to develop the tubers. When irrigation begins the ground should never be allowed to dry out again, for if the growth of the potato is checked the plant is practically ruined. If the growth is allowed to stop, by reason of insufficient moisture, the tubers will not resume their growth when the water is supplied, but will form additional small tubers on each eye and worthless clusters will

result. Always bear in mind that moisture and not soaking is what is needed and one cultivation is equal to an irrigation. Potato rows should be from 30 to 40 inches apart, and in irrigating them the moisture should never be allowed to stop on top in the middle of the row. To muck water, or water applied in a haphazard manner is often a great detriment to the growth of the potato, affecting both yield and quality."

"When should the irrigation of the potato cease?"

"As soon as the hills, or true seeds, begin to ripen irrigation should be suspended and followed by one or two light cultivations which should be sufficient for the season. Last year the experimental farm, with two irrigations of 12 hours each, 330 bushels of potatoes to the acre were produced on raw land. If the potato crop once withers badly, after the tubers have begun to form, the yield is practically destroyed."

COMMERCIAL CLUB HOLDS IMPORTANT MEETING

Steps Taken to Secure Bridge Across Rock Creek Northwest of Town—Committee on Freight Rates Appointed.

There was a special called meeting of the Commercial Club Wednesday evening that was one of the largest ever held, to take up the question of railroad rates and bridges. President Kimball called the meeting to order and in the absence of Secretary Hill Mr. Eastman acted as secretary.

The president called upon G. F. Sprague to speak on bridges and grades. Mr. Sprague told of the work which Mr. Gibson and the farmers living northwest of town had done for the improvement of the grade north of town at their own expense and asked that the club should reimburse Mr. Gibson for the money he had expended, saying that the grade had been put into splendid shape and that it was not right that one man should bear all the cost. He then went on to tell of the petition that had been signed by practically every merchant in town asking the county commissioners to appropriate \$3000 as part of the cost for a viaduct across Rock creek on the township line northwest of town, and after speaking of the great territory to be benefited by this bridge offered the following motion, which was carried after discussion: "That the chair appoint a committee to entertain the county commissioners when they shall visit the tract to inspect conditions."

Mr. Allen spoke on the necessity for the bridge, and also said that all non-resident owners of lands to be benefited should be written and asked to pay their proportion of the cost of said bridge.

Mr. Lacey was then asked to speak on freight matters, and he told of his investigation of the matter and that we needed rates that would allow shipment of vegetables at once. "He said that several cars of new potatoes were now ready for shipment."

Mr. Booth spoke and closed by moving that the chair appoint a committee, of which the president shall be one, to take up the matter of rates.

Mr. Stubbs, district manager of the Oregon Short Line, said that he had no doubt that the matter would have immediate attention, but he would advise that particular products should be rated—and that a general revision should not be asked for at this time.

Vice President Hays of the Land & Water Co. spoke of the necessity for a rate on brick and cement to encourage the right kind of building.

Mr. Richardson presented the report of the hospital committee, stating that he had turned the subscription list to Dr. Pike and that the subscriptions amounted to \$4000, that now that the hospital association was organized the committee's work was done.

It was moved and carried that the report should be accepted, the thanks of the club tendered and the committee discharged.

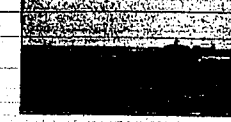

The meeting then adjourned.

BALL GAME FOR SUNDAY

Pocastello vs. Twin Falls at Baseball Park—Special Train Will Arrive in the Forenoon from Pocastello—Will Bring Eagle Band and About 300 Rooters.

Sunday at 1:30 p. m. will be called the return ball game between Pocastello and Twin Falls. Great preparations have been made and are being made for the game. A fine substantial grand stand well screened has been erected and the grounds put in first class shape for the game. A special train bearing about 300 baseball enthusiasts and others will arrive in Twin Falls during the forenoon. The Indians are coming here determined to carry off the laurels and the Twin Falls boys are equally sanguine of victory. Expense has not been spared to have everything in the best possible condition and all should turn out to the game. The following is clipped from the Pocastello Tribune:

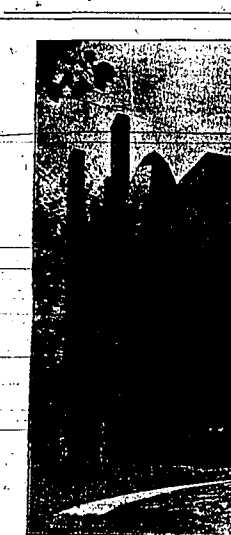

"A special excursion train carrying a cheering gang of baseball rooters will be run from Pocastello to Twin Falls next Sunday morning to accommodate the fans who may desire to witness a return game between the Indians of this city and the Sagarubushers of the tract. The Gate City bunch expects to grab Twin Falls by the neck and shake it. There certainly will be something exciting. The Eagle band will go along and great will be the general joyousness of the day."

STACKING ALFALFA AT TWIN FALLS.

(Photo by Ernest Tacha.)

The photograph from which this cut was made was taken in the alfalfa field of John Erickson, half a mile north of the city. From the six acres shown in the picture Mr. Erickson obtained 40 loads of alfalfa. Allowing 25 per cent for shrinkage, he will save four tons to the acre on the first cutting. The alfalfa was sown one year ago on raw land and was not fertilized but given extra care.

THE HOME OF FRANK H. BUHL, SHARON, PA.

Frank H. Buhl was the first eastern capitalist to invest in a Carey cut on (prairie) in Idaho. With his associates, Peter L. Kimberly, Colonel S. B. Milner and I. B. Perrine, he furnished the capital for the Twin Falls enterprise, giving the project his unwavering support during the long construction period when it was a case of "everything going out, nothing coming in." Mr. Buhl did not build his magnificent home with the money he made out of the Twin Falls enterprise. He was a wealthy man long before the project was thought of. The wonderful progress of the tract has been a great source of pleasure to Mr.

Buhl. It must be a pleasant sensation to look over vast stretches of green fields, reamed with irrigation ditches, and see thriving towns spring up and be able to say, "My money did all that." Mr. Buhl has been interested in many large enterprises, several greater than the Twin Falls project, but none so spectacular as this. Had he refused to give ear to Colonel Milner and I. B. Perrine when they laid the Twin Falls project before him there would be no Twin Falls today. His lead was followed by many other capitalists who had previously been coy and the west was a calmer. Mr. Buhl is a big-hearted man and while he was president of the Water com-

HOSPITAL ASSOCIATION FORMED

Ground Selected and Work Will Commence Soth.

A meeting of stockholders in the Hospital association was held Wednesday afternoon and evening. Mr. F. L. Harris was elected president, S. T. Hamilton vice president and Dr. W. F. Pike secretary and treasurer.

After organizing they inspected the possible sites for the building and finally decided on lots 17 to 24 in block 116. These lots were donated by the Townsite company. It is the intention of the association to commence on the building as soon as plans can be perfected and it is confidently believed by those in charge that the hospital will be in operation early this fall. Negotiations are now in progress with competent nurses from Chicago. When completed it will no longer be necessary for residents from this section to go to Boise or Salt Lake for hospital treatment and Twin Falls will have taken one more step towards a metropolitan stage.

Work on the water works line to the canal is being pushed by a large gang of men, and all the pipe is strung out along the line of the excavation.

Boxes for Rural Routes.

Postmaster General Cortelyou has issued an order, to go into effect August 1, under which patrons of rural mail routes will be permitted to construct their own boxes provided that in doing so they conform to the requirements of the department as to size, durability, safety and protection from the inclemencies of the weather.

SUCCESSFUL FAIR NOW ASSURED

THE TWIN FALLS LAND & WATER CO. OFFER LIBERAL PREMIUMS.

The Fair Association is Sparing No Effort to Make This the Most Successful Fair Ever Held in Idaho—1000 Irrigationists Will Be Here.

The Twin Falls fair, which will be held here on September 5, 6 and 7, will, without a doubt, be the most successful fair ever held in the state. The verdict which comes from all parts of the tract, showing the deep and active interest all are taking in making it a success. The Fair association held an enthusiastic meeting in Twin Falls on Saturday last at which many important matters were discussed. The meeting was presided over by President Starr. In the absence of Mr. Harlan, Mr. George F. Sprague was chosen secretary pro tem. Necessary steps were taken to secure sample grounds and buildings for the exhibit, which will be large.

On Saturday, July 14, there will be a meeting of the Fair association to pass upon the premium list before being finally given out for publication. Immediately after the arrangement of the list it will be printed and published so that all may be correctly informed of its contents.

Aside from the regular premiums to be given by the Fair association, the Twin Falls Land & Water Co. offer the following premiums:

\$50 for the best irrigated field, not less than 10 acres, contour of land, method of irrigation, crops, etc., considered.

\$25 for the best crop of sugar beets, not less than 1/2 acre, stand, tonnage and sugar contents considered.

\$25 for the best acre of wheat, perfectness of berry, yield and milling qualities considered.

\$25 for the best acre of corn, quality and yield considered.

\$15 for the best acre of oats, yield and quality considered.

\$10 for best new or old oats, yield and quality considered.

\$10 for best yield of alfalfa or clover per acre, one or more acres considered.

\$10 for best acre of forage plants, feeding value and yield considered.

Premiums will be awarded as soon as may be by a committee appointed by the Farmers' federation, and will be announced if possible at the annual fair held in Twin Falls. Those desiring to compete in the contest for any or all of the above prizes must notify the superintendent or secretary in person or by letter on or before August 1, next.

The above premiums are liberal and should be an incentive to all ranchmen on the tract to make an extra effort to secure one or all of them, and by doing so may not only win the premiums but will enhance the value of their property holdings many fold. The large subscription already made to the Fair association is an assurance that a very generous premium list will be offered, and it is the desire of everyone, and especially the Fair association, that an excellent exhibit in all lines should be had, and particularly in agricultural products. There will be in attendance at the fair a large body of distinguished and representative men from all parts of the United States, coming here on a special train from Boise at the close of the irrigation congress. The train will leave Boise on the evening of September 5 and arrive in Twin Falls on the morning of the 6th. It is expected that fully 1000 of the delegates to the irrigation congress, which will be held at Boise on September 2, 4 and 5, will visit Twin Falls, and all should be anxious to prove to our eastern (as many of them will be from the east)

RE-ELECTED THE OLD FACULTY

Capable, Instructors Re-Engaged for
the Albion Normal.

The trustees of the Albion State Normal school held a meeting at Albion last Friday and Saturday, all the members of the board being present except the state superintendent. It was unanimously voted to retain the present faculty for another year at the same salaries, except where noted below: G. A. Axline, president, salary \$1200; E. B. Jones, treasurer, salary \$1200; L. W. Pike, supervisor of the training school and instructor in methods, salary \$1200; R. C. Thompson, Latin and history, salary \$1100; H. H. Shepherd, manual training and German, salary \$1000; Viola E. Stewart, kindergarten, music and drawing, salary \$700; Charles Carter, mathematics, salary raised from \$1100 to \$1200; Edna E. Mark, English, salary raised from \$650 to \$750. The resignation of Mrs. Bradford, matron was received and considered and laid on the table. It is hoped to make some arrangements that she may be retained during the coming year.

Two bids for furnishing coal for the Normal were received, one from J. H. Danielson, who would lay coal down at the Normal for \$10.50 per ton or at Burley for \$7.25, and the other from J. J. Saunders, his bid being \$9.75 at the Normal or \$7.00 at Burley. The last bid was accepted and contract for 200 tons was authorized, the contractor to furnish a bond for \$1000.

The clerk of the board was instructed to call for bids for a cord of wood to be delivered at the Normal.

The president and secretary were instructed to purchase supplies and make repairs and improvements about the Normal as follows: Cases for physical library, shelves for library, lockers for certain doors, ceiling in model schoolroom, for the other fixtures for the boys' dormitory, walk from the main building to the girls' dormitory, grading about the girls' dormitory, a rough road on west side of the girls' dormitory, 100 chairs for the auditorium and supplies for the model school and kindergarten.

The board authorized the purchase from Lawrence Hansen of the lots lying east of the Normal upon which the log cabins stand, the price to be the amount that they have cost Mr. Hansen after the buildings have been removed from the lots. Mr. Hansen bought these lots several months ago with the intention of turning them over to the state as soon as the board decided to purchase them.

H. Ed Smith was engaged as janitor for one year and has already commenced discharging his duties. He will have supervision of the improvements to be made about the Normal during the summer vacation. His salary will be \$60 per month.

Proper credentials having been presented by Nimrod Good and May Von Harten showing that they had each taught 12 months since their graduation from the Normal, life diplomas were issued to them.

A number of bills were acted upon, and the board then adjourned in the forenoon for the members to reach Burley and catch the afternoon train—Albion Times.

COMPOSITION OF THE SOIL What It Looks Like Under a Magnifying Glass.

In order to understand the methods necessary for restoring worn-out soils, let us consider what occurs in a fertile soil that is growing a large crop. Imagine a cubic inch of ordinary field soil magnified into a cubic mile. It would then present very much the appearance of a mass of rocks varying from the size of a pea to masses several feet in diameter. Scattered among these rock masses would be many pieces of decaying plant roots and other organic matter, resembling rotting logs in a mass of stones and gravel. The masses of organic matter would be found in certain large quantities of water, and to somewhat resemble wet sponges, while every mass of rock would have a layer of water covering its surface. The open spaces between the solid masses would be filled with air.

If a crop were growing on this soil its roots would be found threading their way among the masses of rock and decaying roots, and pushing these aside by the pressure exerted by the growing root. From the surface of the growing root, near its tip, small hollow threads (the root hairs) extend into the open spaces and suck up the water covering the rock particles. The root hairs are not open at the end; they absorb the water through their walls. The plant food is dissolved in this water, but is usually present in exceedingly small quantities. While the plant is growing a constant stream of water flows up through it and evaporates at its leaves. For every pound of growth in dry matter made by the plant, from 200 to 300 pounds of water flow up through it.—W. J. Spillman.

The Great Western Sugar company, through President Havemeyer and General Manager Morey, has offered a magnificent solid silver loving cup valued at \$500, for the best state exhibit of sugar beets at the exposition of irrigated products to be held at Boise during the Fourteenth National Irrigation congress, September 3 to 8 inclusive. For this valuable trophy the sugar beet raisers of Colorado, Utah, Idaho, Washington and California will enter into competition, and the largest and most varied display of this profitable crop ever exhibited will be a leading feature of the exposition. The subject of sugar beet culture will be one of the most important agricultural topics discussed at the congress.

HORSE STILL KING OF ROAD

Locomotive, Bicycle and Automobile
Cannot Dethrone Him.

Let no one imagine that the horse is soon to become an object of curiosity. He is still king of the road and gone and the automobile has been making considerable noise the past few years and cutting up coppers and people while the horse has been quietly sawing wood, or rather eating oats, until now the farmer with a pasture full of the right kind of horses can put them and buy a bank horse have been steadily going up which is better than blowing up, as the automobile has been doing.

Automobiles may come and go, may puff in and speed out, but his majesty, the horse remains monarch of the road against all competition. No machine ever built, and no invention will ever be devised that will successfully dispute his reign. He has withstood the locomotive, merely permitting it to do the heavy work, and give him a easier life. Inventions will crop up from time to time, but none will dispute his place in people's hearts, for always, excepting the human race, the horse is the most beautiful thing made of flesh and blood; and perhaps the human animal scarcely deserves to be excepted; when we consider how men and women deform their beauty by foolish habits. Horses we may have as nature made them, only improved and refined by scientific breeding. You may depend on it good horses, especially road carriages, draft and saddle horses, will always be in demand. Buyers are to-day searching the country for good horses of all kinds and offering 30 per cent better prices than were offered six months ago. Very recently the opinion prevailed that the horse was being neglected, but this has been abated by the revival of common sense, which proves to us that while human beings inhabit this globe the love of God's noblest animal, the horse, will continue to demonstrate itself for his improvement.

Fashionable horse shows are frequent all over the country, and many inducements being offered for fine animals, and I see in this and other facts signs of increasing interest in the horse beautiful, with an attendant interest in breeding.

Another important factor to be considered in the horse demand, for American horses, which is increasing at a phenomenal rate, ship loads of horses being exported weekly. England, Germany, France, Scotland and in fact all Europe, concede that America and Canada can raise better horses for less money than any other country in the world, and Europe may be depended upon to take all the surplus stock in the country at fair prices. Unhappily breeding has been the order of the day among breeders; they have been careless and bred without a purpose. Those days have now passed; the numerous stock and horse shows have enlightened the breeders of the country to take more interest in the control by proper breeding the quality of the stock required by the horse markets of the world.

I will say that I am not afraid that the horrid days are upon us, the automobile flying through the country notwithstanding, and not while the automobile remains blind, and to actions of kindness and dumb to the sound of your voice, nor while the horse is the delightful companion he is, whether in the stables, under the saddle or in the harness, certain it is that as far back into the ages as we can trace his associations with human beings, the horse has been a friend and intimate companion of man.

He steps down the ages decked with the flowers and wreaths of love, poetry, romance, and chivalry, no less than with the stern trappings of heroism and war. "Man's inhumanity to man" and beast is justly imputed, but so associated with sentiment and necessities of man is the horse, that motor cycles and automobiles will be powerless to displace him. So you may depend upon it, good horses, especially road draft and saddle horses, will always be in demand.—Journal of Agriculture.

The New Crusade.

The evils of child labor in this country undoubtedly present a national problem of the first magnitude. One in every 40 inhabitants is a child under 16 years of age, bound body and soul to the loom, the cotton gin, or to some other cruel mechanism of corporate greed. Two million children in free America are employed in gainful occupation, and half of that population are deprived of the rightful heritage of every American child—health and education.

The industry, education and good citizenship of the republic are menaced by the inhuman conditions existing in the great majority of those communities which permit of child labor in its worst phase. A crying need for reform is found in almost every state and territory of the Union. In Pennsylvania there are not less than 24,000 children under 16 working in breakers or in the mines; the cotton mills of the south employ more than 50,000 children, boys and girls, all under the age limit recognized by humanity and the law; children in our great cities, hidden away in dark tenements and cellars, out of sight and beyond the protection of any law.

What the press and the "indolents" have done in the insurance cases and the beef-packing exposure must be done with child labor. The searchlight of publicity is needed to eradicate this crowding evil, and it is only through unity of action and the combining of forces that anti-child labor laws can be enacted and enforced throughout the country.

The Woman's Home Campaign is pledged to the cause. It is giving its columns to the good of publicity. It is enrolling its army of readers in a vast Anti-Child Labor force, and every member of which promises to do his or her utmost to fight for the freedom of the child slaves of the country. It believes that every child has a right to health and education, and because of that right must be permitted to labor in factory, workshop, tenement house or in any way prejudicial to health and education. In this battle for the children the Woman's Home Campaign asks the assistance of every man and woman of the nation.

SENATOR HEYBURN.

The work accomplished by Senator Heyburn during the session of congress just closed entitles him to a place in the front rank of Republican statesmen. Though handicapped by illness and lack of united support at home he did a prodigious amount of effective work and his record compels the admiration and respect of his party. The pure food bill, which he fought through successfully in face of overwhelming odds, is one of the best measures enacted in recent years. It had begun in the hands of many able senators before Mr. Heyburn took charge of it, but none of them had been able to break through the opposition ranks. With characteristic determination Mr. Heyburn took up the measure and secured its enactment. For this alone he deserves the thanks of the American people. The news is not in accord with the senator's views regarding forest reserves, but it admires the fight he made on the question. There are two sides to the forest reserve problem, and right or wrong Senator Heyburn has given a display of mettle which shows him to be the most formidable debater the west has sent to the senate in many years. He is earnest, tenacious, talented and fearless. Senator Heyburn's record is admirable and he should be given full credit for what he has done.

In a thickly settled country a careless man with a high power rifle in his possession is about as dangerous as the bubonic plague. He is a public menace and a public pest. Unable to comprehend anything beyond the range of his vision, he blows away regardless of consequences. A bullet from a high power rifle, like the 30-30 for instance, will kill a man at a range of a mile and a quarter. It is a dangerous thing to turn loose. A man who will hunt jackrabbits with a 30-30 should be put in a padded cell. Human life is not safe when he is at large. Several head of valuable stock have been killed by the 30-30 hunters. A bullet that will kill a horse will kill a man, woman or child.

In another column will be found instructions as to the proper manner in which exhibits of grasses, grain, etc., should be prepared by the farmers for exhibition at the fair this fall. Those who desire to make such exhibits should observe the instructions closely and prepare them accordingly.

STATE NEWS.

Fire at Cambridge on the afternoon of July 7 resulted in property loss of \$30,000.

Two young sons of Deputy Game Warden B. T. Livingston of Boise were drowned in the Boise river near Boise on Friday last.

Crickets in alarming numbers are mauling across Fremont county. They are devouring everything green. In their path and the department of agriculture has been asked to assist in their extermination.

The Republicans of Bannock county met in convention in Pocatello on Friday, adopted resolutions endorsing Mr. National and state administrator. He instructed the delegates to the state convention to vote for the renomination of Governor Gooding. Attorney General Guheen and Judge Alfred Budge and to oppose without reserve the convention plan of nominating a United States senator.

CURRENT WORLD.

Eight Yosemite valley glaciers have been held up by a lone hand. No details of the holdups have been received.

Conditions in Russia are still unsettled. The bill for the abolition of the death penalty was defeated in the lower house of parliament. Disorders in Warsaw continue.

The socialists of Colorado have nominated Senator D. H. Hoar as their candidate for the Western Federation of Miners for governor. Haywood is in jail at Caldwell, awaiting trial for the murder of ex-Governor Steunenberg.

Hon. H. C. Adams, a member of congress from Madison, Wisconsin, died at the Auditorium hotel in Chicago on Monday last. He had been suffering some time past and death was not unexpected.

William J. Bryan has formally announced that he will accept the Democratic nomination for the presidency.

Gifford Pinchot, chief of the forest service, has announced that on request of Governor Gooding he will postpone recommending the creation of any new forest in Idaho until such time as he has made an inspection of the state after the irrigation congress.

Secretary of Agriculture Wilson is making a personal inspection of the Chicago stock yards and packing houses. He says the packers are working under a tight rein and that he expects to make improvements and fix things as the government wants them.

Governor Folk has issued instructions to the police commissioners of St. Joseph, Mo., to arrest all saloon keepers who keep open next Sunday, and if at the arrest they refuse to close up to take them to the city stock and hold it as evidence against them. The governor declares that the state law shall be enforced, and if the police cannot do it they may be given place to those who can. There is an intimation that he will send the militia. The saloon keepers refuse to close up to the city ordinance permits them to keep open.

FILER A BUSY TOWN.

All Awaiting Patiently the Arrival of the Railroad.

FILER, July 12.—Charles E. Lay has just completed a nice residence, the second to be built in town.

Mr. Spodgrass was up from Clear Lake shortly Tuesday.

J. M. Stott, the Twin Falls shoe man-in-company with others, visited Filer Tuesday.

Mr. Mrs. Charles Reynolds went for a visit at Blue Lakes Sunday.

George Villet and family visited with J. B. Lorenz Sunday.

H. B. Pierce has purchased a fancy pool-table and will entertain the boys at a game of pool.

W. P. Shinn is out taking the school census. His first day's work put the census over the hundred mark.

John Angel of Maroa was a Filer visitor Sunday.

Fred E. Drake and Frank Brown of Maroa did some shopping in Filer Tuesday.

W. M. Schofield and family moved to their ranch two miles west of town on Tuesday.

E. G. Walther and Felix Vennerstrom were Twin Falls visitors Monday.

Pastor John Grout departed for Bellingham, Wash., Monday. While here Rev. Grout made many warm friends who are likely to miss him very much. However, they wish him success in his new field.

The Filer merchants did a stunt in business Saturday. Teams of the busy farmers who came in to do their trading could be seen from early morning until late in the evening. Tuesday was another busy day for them. As the time approaches when the construction of the extension of the railroad to Filer is to commence things are beginning to get lively, and their anticipation of a good business at this point is beginning to be realized. The writer was awakened from his slumbers Saturday night by an unusual sound, and when he arose to see what was the matter he discovered one of the merchants out in the street in his night shirt singing. "There'll come a time some day when the old owl will be cooing our way." The Filer brothers have just completed a job of grubbing 70 acres of sagebrush for Carl Hahn on his farm two miles north of Filer.

If anyone thinks the Twin Falls tract is not all right let him take a drive in the vicinity of Filer and view some of our fields. Ten days more and you will hear the click of the reaper gathering the golden grain in the sheaf.

There was quite a gathering at the cellar door Sunday afternoon to witness the baptizing of three candidates. Rev. John Grout officiated.

Mr. and Mrs. C. E. Lay made a flying trip to Twin Falls Tuesday.

THROWN FROM HORSE.

Mr. Workman Recieves Serious Injuries at Murtaugh.

MURTAUGH, July 12.—Mr. Chester Stephenson is visiting his mother at this place.

Rev. Samuel J. Heckman and family have left for Mitchell, Valley, Kansas. They will stop at Colorado Springs and Quinter, Kansas, for a short time.

Mr. Vane Workman was thrown from horse and received a severe collar bone with other injuries. We hope for his recovery.

A party of young people spent the Fourth at Twin Falls. The party was composed of Misses Lida and Nellie Emmert, Rose Jacks, Leanne and Nora Edon, Mrs. Stephenson, Miss Jones, Nessera, Emmitt, Hanson, Bacon and Stephenson.

Mrs. M. A. Bacon is expecting her daughter, Mrs. Florence Morrisey of Wichita, Kansas, to visit her.

Mr. and Mrs. Samuel Land have a new arrival in the person of a young daughter, on July 4.

A mixed Bible class was organized at Murtaugh with 22 members. Mrs. J. E. Steinhorn was chosen as teacher. Crops here are exceedingly good.

The ladies of Murtaugh entertained in honor of Mrs. E. J. Steinhorn at Mrs. J. E. Steinhorn's. A very pleasant time was spent.

Mrs. Frank Wernheimer entertained the ladies at an informal party, given in honor of Mrs. A. E. Wernheimer, her mother-in-law, of Ottawa, Kansas, and Mrs. Mary A. Boyd, her mother, of Caldwell, Idaho. Mrs. Wernheimer entertained with the graphophone. A nice lunch was served.

Mrs. A. E. Wernheimer left for Otta on Tuesday.

Mr. Bert Wernheimer of the northern part of the state was visiting his mother and brother for the past week. He has now gone to his old home.

A number of the surrounding people visited Blue Lakes, Twin Falls city and Shoshone Falls over the Fourth of July.

The only genuine Pennsylvania blacksmiths call for sale in southern Idaho is carried by the Pioneer Store at Caldwell. They have their large warehouse on Fifteenth avenue, near Shoshone avenue.

HANSEN TO HAVE BRICK DEPOT

Arrangements Completed to Put in System of Waterworks.

HANSEN, July 12.—The falls for Hansen siding were unloaded last Tuesday evening and work was begun Wednesday in getting all in readiness for laying the ties.

Civil Engineers E. P. Bigelow and C. H. Maltby assisted by Gilbert Leo, H. W. Taylor, Frank Mitchell, Frank Sanders and Charles Upton are engaged in surveying 80 acres late town lots, thus creating the townsite now covering 100 acres.

The building of a brick kiln was begun last Monday on the northeast corner of the townsite. Mr. P. Swan, manager of the townsite, said that the kiln here will be constructed of brick, and among those soon to be erected is a brick depot. Hansen will be the possessor of the second brick depot in Idaho. A brick schoolhouse will also be built this summer and will contain two rooms and will be so constructed that two or three more rooms will be added. Grades to and including the eighth will be taught. The school will be ready to enter by September first.

Six-inch water pipes have been ordered for conveying the water from the canal to the townsite and work will be begun next week laying the pipes. This will assure Hansen a supply of clear water and will also afford a fire protection at the beginning of the growth of the town.

A very successful two months' term of school closed last Friday. Miss Murphy, the teacher, has accepted a position as teacher in the Twin Falls school for the coming school year.

Miss Beth Hamilton was a caller in Hansen last Monday evening.

H. A. Smith, who had been employed in one of the ditch construction company's camps near Twin Falls, has returned to his home northwest of here.

Twin Falls visitors of the past week were Miss Murphy, E. L. Rieker, Harry Kallgren, M. P. Swan, W. N. Rose and Nick Smith.

C. A. McEasters was a caller in this vicinity last Tuesday.

John Babcock spent from Tuesday to Friday of last week in Shoshone.

The grubbing outfit belonging to Mr. Thompson and Mr. Noble is situated on Haines ranch engaged in clearing the sagebrush. Mr. Hinton is aware that this land is too valuable and productive to lay idle and he will have entire place cleared and be in readiness for putting all under cultivation next spring.

SUCCESSFUL FAIR NOW ASSURED

(Continued From Page 1.)

friends that the Twin Falls tract is unsurpassed by any other country in America; that its soil can produce, if tilled, not only the water and food with the hoe, a finer quality and greater quantity of any of the various crops raised in any of the middle eastern or western states. A splendid exhibit of this fair will be of untold benefit to the entire tract, and more particularly to those who bring them. A better advertisement for your individual property could not possibly be had. It may seem to be a little early for some, but it is thought generally that a better time could not have been ascertained during which to hold the fair, and to those whose crops were sowed or planted late in the season, a little extra effort with the aid of nature will mature them in time to put them on exhibition.

How to Prepare Exhibits.

All grasses should be gathered when in full bloom. They should be cut off, put under a good weight to get the full length and also to show manner of root development. Arrange in bundles at once; trap in paper to exclude all possible light and hang up to dry.

All grain should be gathered when kernel begins to harden, but unlike cereals, they should be exposed to the air to cure. This will give the beautiful golden color necessary for exhibits. All bundles should be arranged neatly, with heads as near alike as possible; great care being taken that no variety desired should be in the bundle.

Notice for Publication—Final Proof.

I, Frank Bower of Rock Creek, Idaho, who made entry No. 1154, under the provisions of an act of the legislature of the state of Idaho, commonly known as the "Carey act," approved March 2, 1895, which embraced the SW¹/₄ of section 28, township 11 N., range 18 E., do hereby give notice of my intention to establish my claim to establish my claim to the land above described, and that I expect to prove that I have resided on, reclaimed and cultivated said land as required by law, before C. D. Thomas, representative of the State Land Board at Twin Falls, Idaho, on August 11, 1906, by two of the following witnesses: Lawrence Hanson, M. W. Johnson, T. M. Atkin, J. E. Burke, all of Rock Creek, FRANK BOWER, Entryman.

Notice for Publication—Final Proof.

I, J. H. Schooler of Buhl, Idaho, who made entry No. 1158, under the provisions of an act of the legislature of the state of Idaho, commonly known as the "Carey act," approved March 2, 1895, which embraced the SW¹/₄ of NE¹/₄ and NW¹/₄ of NE¹/₄ of section 19, township 9 S., range 15 E., do hereby give notice of my intention to establish my claim to the land above described, and that I expect to prove that I have resided on, reclaimed and cultivated said land as required by law, before C. D. Thomas, representative of the State Land Board at Twin Falls, Idaho, on August 11, 1906, by two of the following witnesses: F. S. Marshall, Earl M. Knight, Geo. E. Crockett, F. W. Eckhoff, all of Buhl.

Notice for Publication—Final Proof.

TO DEVELOP NEW INDUSTRY

Denaturated Alcohol to Be Made in Idaho Sugar Factories.

Within the next six months distilleries are to be installed at the sugar factories in Utah and Idaho for the manufacture of denaturated alcohol. General Manager Thomas B. Cutler of the Utah Sugar company and the Idaho Sugar company is authority for the statement that investigations were being carried on along this line to obtain the alcohol from molasses, the uncrystallized syrup produced in the manufacture of beet sugar. From this product, which is of a large percentage of sugar, quantities of alcohol can be produced at low cost. The removal of the government tax on denaturated alcohol will open up large possibilities in the manufacture of alcohol for the arts and as a substitute for gasoline for motive power.

Mr. Cutler is unable to say just what process would be used in the manufacture of alcohol or how much money would be spent in establishing distilleries. It is possible, however, that a company will be incorporated, consisting of the same officers as of the sugar companies, for the manufacture of the denaturated product.

"No possibility along this line are great," Mr. Cutler said last night. "The denaturated product can be used for fuel in stoves and as a substitute for gasoline for motive power. This will undoubtedly cut down the coal bills for it can also be used in stationary engines and locomotives and will answer the same purpose as gasoline. For instance, at the sugar factories there are quantities of molasses that cannot be used, but from which alcohol can be obtained. Now this is waste, but it can be used up for the new law for making alcohol, which promises to be a growing industry in connection with the manufacture of sugar."

"Before the tax was removed from the denaturated product it was impossible to manufacture it with any profit. The alcohol obtained from molasses was the highest priced alcohol, although it could be used as a beverage."

"As I understand the process of manufacturing alcohol from molasses, it is to make it and then to allow it to ferment. Afterward the solution is distilled to extract the alcohol."

"The new law provides that domestic alcohol of such degree of proof and under such regulations as the commissioner of internal revenue, with the approval of the secretary of the treasury, may prescribe, may be withdrawn without the payment of internal revenue tax for use in the arts and industries, and for fuel, light and power. It also provides that the same shall be denaturated so as to destroy its character as a beverage and render it unfit for liquid medicinal purposes."

"No process is provided in the act. The German system of denaturing alcohol is to add to every 25 gallons of spirits two and one-half liters of four parts of wood alcohol, one part of pyridine, with the addition of 50 grams to each liter of oil of lavender; one and one-fourth liters of the above 'standard' and two liters of benzol to every 100 liters of alcohol. There are several other processes of denaturation sufficient to prevent alcohol from being drunk, but which would not classify it as wholly denaturated spirits."

Alcohol may also be obtained from various vegetable juices by allowing them to ferment. It is possible that potatoes will be used to produce alcohol in tests that are to be made by persons interested in the manufacture of the denaturated product. The potatoes will be crushed, sterilized and malted. The product is allowed to ferment and, after standing some time, is distilled to separate the alcohol from the water. It is believed that alcohol can be used as cheaply as molasses.

Hon. John W. Gaines, a member of the house committee on public lands, has written some valuable suggestions concerning the work of the National Irrigation congress at the session to be held at Boise, beginning September 3. Mr. Gaines expects to be present as a delegate from West Virginia, and believes that a strong law committee should be appointed to suggest needed reforms in the way of national legislation in the further aid of irrigation and reclamation. In a tour around the world Mr. Gaines spent some time in Egypt and witnessed what irrigation had accomplished in the desert of Sahara. On his trip to Idaho Mr. Gaines will be given an opportunity of comparing conditions in this country with those found in Egypt, and give much information that will be of value to the congress.

An Ideal Stock Ranch.

400 acres, all fenced and cross fenced with good fence, three-quarters mile from town, well located on daily mail route, 220 acres in hay, profitable, no waste land, plenty of free water at all times; large creek running through portion of land; a deep black loam soil, very fertile. This ranch is tributary to the best stock range in Idaho; good 7-room house, modern, painted; large barn well built 60x60, and other outbuildings, etc.; etc.; a full equipment of machinery goes with this ranch; adjacent to a rich mining region which affords a splendid market for all products; near good schools and church; the best bargain in Idaho; owner must sell: \$1750 per acre, on easy terms. Write Northwestern Investment Co., Ltd., Boise, Idaho.

Of course you don't want your roof to leak again and do damage. Call on T. J. Woods & Co. for the best material and work.

Correct Surveys. Having secured a copy of the original field notes and plats for the entire tract, C. W. Lewis, licensed surveyor, will make a new survey of the tract, obliterated corners correctly and place same on record if desired.

Protect yourself against judgments transferred to Cassia county from some other county or state by demanding an abstract of your property. The Cassia County Abstract Company can do the work for you. See either Attorney C. M. Price or C. D. Thomas.

T. J. Woods & Co. can find the "other fellow" that wants to buy your real estate.

FAREWELL TO THE MILKMAID

Pink Checked Lanes Supplanted by the Milking Machine.

"Where are you going, my pretty maid?"
"I am quittin' my job, kind sir," she said.
"And why do you quit it, my pretty maid?"
"Cause they got a milkin' machine," she said.
(Revised version of old song.)

It has come at last. The mechanical milking machine, long anticipated, long struggled for, and long desired by, prosaic dairymen, has arrived. It took a good while to perfect it. There were many laborious efforts, but persistence and pluck, united with inventive genius, at last reached the goal. Soon they will be plentiful, and no longer a novelty. Every dairy will be equipped with them. Improvements will be gradually introduced, and eventually milking machines will be as much a matter of course as typewriters, electric motors, sewing machines and thousands of other contrivances which have ruthlessly displaced old institutions by substituting the machine for the man or the woman. What the farmer has to get over about the machine, all farmers who milked the cow with the crumpled "milk" will be sent to join other dairymen connected with the old-time method. The old poetry will be obsolete, and the old songs will have to be rewritten. The dimpled darlings with milk pails on their heads, and the milkmaid, dressed in a pair of Brindley and Red and Rown, disappears in the dim distance, and the spring-colic school of poets will be disconsolate.

Of course, it had to come sooner or later. The inventor is no respecter of persons, and this age of utility is as destitute of reverence for the old as the destitute of reason. The milkmaid herself is a good deal to blame. If she had not persisted in being so average, her job would have been difficult to secure in sufficient numbers, and had been more reliable when found. The milking machine might have been postponed for another century. Despite the romance associated with it by the voluble poets, milking is really hard work. Few women like to do it, and practically no men. It is the aversion of the average hired man, and most of them rather than milk cows, went on in search of another job. Thus, the man with a score or more of cows upon his place, is constantly in the midst of the problem of securing good milkers. It is out of the question to get enough women, and the men being even more difficult to obtain, the large dairymen have made gray and baldheaded over the eternal labor problem. It may be imagined, therefore, how anxiously they looked for the milk machine, and how eagerly he welcomed its arrival. Just what the cow thinks about it is as yet unknown, but the wise ones declare that she, too, would express her judgment. If she could talk, and if she will be an improvement in every way over the maid.

The merits of the machine are many, not the least among them being the certainty of operation and the reliability. They do not get hairy, like milkmaids, and quit in high dudgeon because the manager "broke into her." They do not demand higher wages and go on strike, as men and women are sure to do now and then; neither do they have to attend the circus, like milkmaids, like other women, have a facility for falling in love and a natural instinct to get married. This, while commendable and romantic, often upsets the dairymen, who, if they know when a favorite milkmaid and skilful worker is going to walk off to church with "her feller," now it is easy to see that the mechanical machine never suffers from any of these weaknesses, and hence is greatly to be preferred by the sensible dairyman who is after milk and butter and not sentiment. Thus it is that we see the milkmaid's more or less dimpled arm giving place to vacuum, and the dairymen's engine and the machinations of the mechanical milker.

The milking machine itself is a small affair. Its main feature is a plunger, actuated by vacuum suction, resembling pistons, similar to the movements of the human hand engaged in milking. To the machine are attached two rubber tubes, each having four suction nipples at its "business end." Two cows can be milked by each machine. The tubes are fastened to the cow's udder by their own suction, and the machine is started. That is the whole operation of milking with the machine. The machine does the rest. A glass pipe, through which the milk from each cow must pass, shows the operator when either or both cows are milked dry, and the power is shut off by raising a cock, much as one shuts off the steam in a radiator. One man can watch three or four machines, and each machine can milk ten cows or more per hour. Thus a man can easily milk from 30 to 40 cows per hour. And where was the hired man milker who could hope to approach such a record? The power by which the machine is operated comes from a vacuum pump, driven by a gasoline engine, electrical motor, turbine wheel, tripmill, windmill, or any other source of small motive power. A pipe running from the pump connects the vacuum apparatus with the milkers. The machines themselves are of the kind of patent milk buckets, and may be carried about at the sweet will of the operator. It is not only in the speed of operation that the machine milker beats the milkmaid. It is cleaner, it is easier to the animal, and it offers a minimum of opportunity for the germs inevitable in the cow stable to enter the milk during the process of milking. After the initial expenditure for the installation of the apparatus the machines are operated at a low cost. The cost of the milkers varies from \$75 to \$100 for the milkers alone is \$75. The pump to operate five milkers costs \$75, and the fittings, vacuum tank, valves, pipes, etc., bring the total cost up to over \$500. This is exclusive of the power needed for such plant, which, if it be purchased outright, would require an additional outlay of approximately \$100—American Farmer.

Montana seed oats, clean, acclimated, quick to mature and of excellent quality. For sale by Ferris & Burton.

TELEPHONE NO. 13.

BARTLETT'S TRANSFER

A. E. Bartlett, Prop.

BUHL'S FIRST CELEBRATION WAS A GRAND SUCCESS

Farmer's Meeting Well Attended and
Matters of Interest Discussed.

BUHL, Idaho, July 10.—A. McConie of Boise was in town Wednesday. J. H. Stott of Twin Falls made a flying visit to Buhl on Tuesday.

J. C. Ream came up from Twin Falls Saturday, packed his grip and returned Monday.

W. A. Peaslow and Ed Vero of Thurber were guests at Hotel Buhl Thursday. Mrs. R. V. Amy of Chicago spent several days here last week.

E. A. Milner went to Twin Falls Saturday on business, returning home Monday.

E. S. Merritt of the News staff came up from the Power City Monday on business.

John R. Newton and family came in from Twin Falls Monday and spent a few days visiting friends.

R. Hill of Twin Falls made us a business visit Saturday and returned to Twin Falls Monday.

George A. Horthog, Ogden, H. F. Phillips, Boise, and J. L. Hartley registered at Hotel Buhl Sunday.

Elas Nelson, hydrographer, was in this vicinity several days last week measuring water in canal.

H. H. McNeal came in from Twin Falls Saturday and returned Sunday.

John Korael of Rathliff, Wash., took a look over the country last week and was well pleased with it.

The ditch for the water works pipe line is dug as far as the McCollum ranch and pipe-laying will soon begin.

Hardly S. Franco of Marshallow, Iowa, has been in the neighborhood for several days looking over the country and says so far as he has seen it, it is the best he ever saw.

A. D. Strout, who has been on his ranch for a month, going to Twin Falls Saturday to prove to his wife that he will then go to Washington on business.

R. H. Record of Chicago took a ride in Ed Braun's auto Thursday and expressed a good opinion of what he saw on the trip.

Gus Ferguson gave what he left of the sagobush on the 1600 acres he is grubbing a day's grace on the Fourth and came into town to help celebrate. He says that he is getting away with the native health in fine style.

Postmaster Elckhoff has put in a fine line of first class stationery and printing materials of all kinds in the postoffice building and is now ready to supply his customers with the best of everything in such articles.

J. O. Wynn started in last week to clear off 320 acres of sagobush three miles south of town. He intends to have some of it in cultivation before fall.

E. H. Hartland of Twin Falls has built a one and a half story house on his ranch and is making preparations to move up soon.

Archibald Miller of Salt Lake was a visitor to this end of the tract Monday. He came in to see how we were getting along and was well pleased with the forward strides made by Buhl and the country generally since he was here last.

H. R. Bap has purchased 650 fruit trees and a large variety of small fruit plants which he will have set out at once. He intends putting in about 20 acres of orchard.

Mark Kuhn, the genial traveling salesman for the Fred J. Kistler Co. of Ogden, Utah, made the town Wednesday and was welcomed by his many friends. Mr. Kuhn is an old timer.

Professor Chas. F. Romig of Springfield, Utah, while enjoying the scenery of Thousand Springs on the Fourth and found in such articles.

The 11 year old son of Mr. Mott, who lives two miles southeast of town, died last week of consumption and was buried Thursday. The boy took cold shortly after moving to the ranch, which turned into consumption.

Osgood & Baldwin have moved their stock of general merchandise into the Baldwin building on Broadway, the old place being too small for their increasing business. They have more than doubled their stock since making

the move.

J. L. Wolf of Sheldandish, Iowa, traveling salesman for the Union Transfer and Implement company of Council Bluffs, Iowa, a father of Earl Wolf, one of our bright and energetic young ranchmen, who lives three miles southeast of town, is visiting his

son, Lillian, in the country and the golden disk in the west and George E. Wolf, chief of the fireworks band, called his clans together and started at the same time. He is simply do-

ing the illuminations and noise in earnest lighted with the Twin Falls tract and partying to the west end of it. He says that he is proud of the good sense shown by his boy in settling down in this future great country, and well he

may be, for he is indeed a wise young man, or old man either, who has the foresight to take a piece of land in such a promising country as this before it is all gone.

News comes from Thousand Springs that a power plant is in course of construction there—which is to be used to furnish power to raise water onto a canal for irrigation purposes and light for all kinds of use in this part of the country. So Buhl may be the first town on the tract to have the real thing in electric light and power.

What might have been a very serious accident is reported to have occurred across the river from Thousand Springs Sunday. Several persons were seen bathing and hunting on the north side of the river took to shooting at birds and a spent ball from one of their rifles lodged in the leg of a horse bathing and hunting on the north side of the river. A man was standing by the horse at the time and had a narrow escape from injury.

Buhl celebrated. Although many of the people took to the woods and shady groves of Thousand Springs, on the banks of the silvery Snake, on the Fourth and the streets were crowded with patriots and merry-makers, who indulged in all kinds of sports and games except the national game. Our soldiers and sailors were

seen any of the lines on the tract to accept a challenge to play here, so we had to cut that out of the program, but there was plenty without it. The business houses were in fine style, as was also the offices and many dwelling houses. John R. Lehman with bare, bowed head, opened the ball with prayer and the curtain was up. This too beautiful young ladies sang "My Country," "The Star Spangled Banner" and "Beautiful Buhl," the Gm of the

door to J. H. Shattuck, the center of the day, who made the eagle scream for about an hour. Jack Garland made the anvil and the welkin ring. F. W. Elckhoff, head of the band, which

Have you Noticed Our

Grocery Department

These days? If not, it will pay you to investigate our FRUIT and VEGETABLE section, where we are carrying just what you need for these warm days.

**Delicious Cherries, Fresh Peaches,
Raspberries, Gooseberries, Tomatoes**

Besides an endless variety of home grown Vegetables.

If our solicitor does not call, just call up No. 1 on the phone and we will take your order and deliver it immediately.

Then, again, we have an endless assortment of

Canned Meats for Luncheon or Picnics

all put up in key opening cans, ready for instant use.

Try our "GOLDEN GATE CEFON" for your iced tea. It is delicious—nothing can equal it in flavor.

"BARRINGTON HALL" is the Coffee we are staking our reputation on, packed in air-tight cans so as to preserve the aroma. It is strong and especially blended to suit the taste of the most exacting coffee drinkers.

Give us a trial and we will appreciate your patronage.

Yours for Business,

Idaho Department Store Co.

NEW BANK OPENED AT KIMBERLY

Preparing for a Big Celebration on
the 50-yard dash and Chio Sulweas

KIMBERLY, July 12.—The Kimberly bank is open and started out with even brighter prospects than were anticipated. The safe arrived a few days ago and has been put into position.

The interior of the bank is neatly and attractively finished. The furnishings are up-to-date in every respect and altogether the effect is very pleasing.

Kimberly is just proud of its fine depot, which is making rapid strides under the supervision of Mr. H. H. Shattuck. The depot is the largest on the Minkola & Southwestern R. R., being 110 x 24 feet. Evidently the railroad magnates appreciate the wonderful advantages and bright future of Kimberly.

Mrs. Samuel Holt has opened a lodging house on West Madison street. Kimberly has long stood in need of just such accommodations as Mrs. Holt now offers and translates may consider themselves fortunate to obtain such comfortable quarters.

E. W. Tilley and T. W. Scott left Monday on an overland trip to the Shoshone Indian reservation in Wyoming, to attend the opening of the tract to settlement. They were last heard from at Cokeville, Wyoming, where they would leave the railroad and follow the old Dempsey trail to Lander, where they will register. They were well equipped for their trip, having purchased the outfit used by J. A. Creed while prospecting in southern Nevada. They expect to be away several weeks.

J. McMillan has received his commission as postmaster of Kimberly to succeed E. Tucker, who held that position since the establishment of the office.

Kimberly is planning a big celebration for the 25th of July. We have then to return in a measure the generous hospitality bestowed upon us at Rock Creek on the Fourth. The exact nature of the celebration has not been fully decided upon, but a strong committee is in charge of the arrangements and a good time is assured.

The committee consists of the following: E. Frothingham, H. T. West, M. Fisher, J. McMillan, J. Gaskill, J. Sudweeks, Morran E. C. Johnson, E. U. McIntyre, Mesdames West, Osborn, McNeuchan and Misses Walton, Strong, McMillan. Among the other amusements there will be a baseball game between the Rock Creek and Kimberly teams and a race in the evening. This is the first celebration given in Kimberly and everyone is determined that it shall be a jolly good one. A cordial invitation is given to everyone on the tract to join us on that day. Further announcements later.

At the regular meeting of the Farmers' association held on Wednesday evening it was decided to hold the meetings every alternate Wednesday instead of weekly as heretofore. The weekly meetings will be resumed on the fall, but at present the farmers are too busy to attend regularly. The next meeting will be held on July 25, when H. T. West will be the speaker.

On the subject of cutting, curling and stacking alfalfa—

J. E. Newbury was thrown from his horse last Thursday and injured his collar bone. Though rather a painful accident, he suffered no permanent injury and will soon be about his work again.

Ed F. Tucker spent Saturday here renewing his acquaintance with the Kimberly people. Since leaving here in May Mr. Tucker has accepted a position with the American Tobacco company. His territory will be between Glenn's Ferry and La Grande, Oregon. Kimberlyites join in wishing him well.

Kimberlyites turned out 150 strong to the Rock Creek Fourth of July celebration and spent a very enjoyable and long to be remembered day there. The baseball game between the two teams created a good deal of excitement. It was a long, hard fought game and attracted a four hour crowd.

Kimberly victory. Kimberly also carried off its share of the honors in other sports. George C. Oakes won

the 50-yard dash and Chio Sulweas held first place in the little girls' foot race.

Mr. and Mrs. F. E. Chamberlain of Twin Falls were Kimberly visitors Sunday.

Miss Esther Twain of Rock Creek left here Wednesday for America Falls.

H. T. West has been hauling his last year's grain crop into Twin Falls. His outfit makes quite a procession as the drivers sit horses hitched to three wagons.

A. L. Bessire has been appointed road overseer to succeed L. E. Prothman, who has moved to his district faithfully and well for the past year.

A. W. Forgan has been hauling poles for the last week to Filer for Mr. La Moore.

A voting precinct has been established at Kimberly.

Kimberly is assured of a grain warehouse in the near future. Parties with house in the near future. Parties with house in the near future.

Mr. and Mrs. E. H. Munger are at work in the Rock Creek hay fields.

E. C. Johnson and Albert McGovern spent the early part of the week in the hay fields.

Mrs. A. L. Gale and son left Wednesday morning for a two weeks' tour on their ranch near Harburt.

They were accompanied by Miss Hazel Moore.

J. McMillan spent the early part of the week in Albion.

Mr. and Mrs. C. J. Budd are at work in the Rock Creek hay fields.

Budd, who has been so seriously ill for the last three weeks, is now out of danger and is slowly but steadily improving.

Anton Hendricks has purchased a fine new buggy that has a tendency to make his neighbors turn green with jealousy.

Kimberly was well represented at Ellers' "Rip Van Winkle" presented in Twin Falls. A party consisting of Messrs. Gaskill, Mabbutt, McMillan, McIntyre, Clippinger and Osborn took in the show.

Miss Alice Norton of Rock Creek is spending this week in Kimberly.

Collier Pups for Sale.
