SHOULD SHIP SPUDS AT ONCE

POTATOES SHOULD BE MARKETED BEFORE FROST.

Cannot Be Transported Over the Mountains After the Cold Weather Sets in—Care is Needed in Selecting Potatoes for Shipment.

"How is the potato crop and where will we market it?" Superintendent McPherson was asked. "The crop is good and the quality of the potatoes excellent. The Twin Falls potatoes should sell in any market on their merits. I am now corresponding with wholesalers in Omaha, Kansas City, Wichita and elsewhere with regard to handling the Twin Falls crop. When will be largely in excess of local demand this year. The Boy's Commission Co. of Wichita is already in the market for our potatoes. The market line has granted a rate of 50 cents per hundred on potatoes from Twin Falls to Missouri river points, 63 cents to Chicago and 68 cents to St. Louis. This is a reduction of 17 cents per hundred. The Colorado rates will be revised and corresponding reductions will be made.

"When should the potato crop be moved?"

"All potatoes for shipment beyond the Rocky mountains should be marketed within 30 days. I would advise shipping matured potatoes as soon as possible for the reason that frost will soon stop shipments except in heated cars. At any rate, all potatoes should be ripened as quickly as possible. No more water should be used and cultivation should cease. Cultivation keeps the potatoes growing and it should be stopped immediately in order that the spuds may ripen. We should use great care in selecting our potatoes for shipment. This is our first year in the market and we should make a reputation and maintain it. If scrubby potatoes are shipped from the Twin Falls tract we will give a black flag."

"How should the potatoes be graded?"

"All potatoes smaller than turkey eggs should be rejected; likewise the extremely large spuds. The latter should either be shipped by themselves or kept at home. The medium sized ones are the best. The market demands an even size, smooth potato. If we ship the small ones among the larger we will be paid on the small basis and lose a portion of the fruits of our labor. If large potatoes are mixed with ordinary spuds the latter will look smaller than they really are. All potatoes should be graded and uniform sizes selected clear through the sack. Our reputation and the value of our potatoes demand that this should be done. We want to establish a reputation for our potatoes like the Hood river fruit growers have established for their apples. Their brand on a box of apples is worth 50 cents to begin with and the Twin Falls brand on potato sacks will be equally valuable if we make it so."

WINNINGS FROM THE FAIR

Incidents of a Highly Successful Fair Exhibition.

"The News has received" so many clippings from outside papers containing favorable comment on the Twin Falls fair that it is impossible to print them. They show that the fair attracted widespread attention and was a splendid advertisement. The results are showing already. Several of the Boise delegates have fled upon land and others have sent for literature.

In the premium list printed last week Joseph Nicks should have been awarded first prize for Chester White boar, sow and shote. The awards for cross bred and shote swine were as follows: Best boar, Cummings & Bryan, first. Best sow, G. T. Cummings, first.

and second, Best shote, H. B. Loran. Flier, first; Cummings & Bryan, second. The awards in the educational department were:

Apron—Edith Pederson, Twin Falls, first.

Patchwork—Olive Smith, Twin Falls, second.

Pin cushion—Pearl Abbott, Twin Falls, first.

Embroidery, 10 to 15 years—Mary Cheek, 15 years, first; Leslie Williams, 11 years, second.

Embroidery, under 10 years—Lenora Bybee, 9 years, first; Ina Hawk, 9 years, second.

Outlining—Leslie Williams, Twin Falls, second.

Draw work—Zora Waters, Twin Falls, first.

Darning—Mary Cheek, Twin Falls, first.

Best dressed doll—Nellie Howe, Twin Falls, first.

Map—Leslie Newton, Twin Falls, first.

Marguerite Coway, Twin Falls, second.

Drawing—Adelaide Cozen, Hansen, first; Ruth Tubbs, Twin Falls, second.

Penmanship, 10 to 15 years—Katie Laido Cozen, Hansen, first; Emilie Crandall, Twin Falls, second.

Penmanship, under 10 years—Rex Thomas, Twin Falls, first; Louise Berry, Twin Falls, second.

Composition, 10 to 12 years—Walter Boyd, Twin Falls, first; Mamie Moore, Twin Falls, second.

Composition, 12 to 15 years—Mary Milner, Twin Falls, first; Mary Maxon, Twin Falls, second.

Composition, under 10 years—Stella Ferring, Twin Falls, first.

It was interesting to watch the exhibitors become acquainted. Usually they got together in something like this fashion:

"Are those your squash?"

"Where did you get the seeds?"

"Brought it with me from Washington."

"Well, say, I brought my seed from South Dakota and this is what I got."

"Not acclimated, I should judge, or may be you didn't water them just right."

"How did you handle yours?"

"Well, I'll tell you. (Then would follow a detailed description of how it was done.)"

Once the ice was broken the acquaintance ripened rapidly. It most instances it terminated in promises to exchange seeds.

"I think you have me skinned on onions, all right."

"Looks that way, and you have me beated, block on potatoes. Tell you what I'll do. If you'll give me some of those spuds I'll save you some, option seed."

"I'll go you."

Thus the Twin Falls farmers compared notes, each profiting by the success or failure of his neighbor and each acquiring knowledge which will put money in his pocket in future. The results of their exchanges of experience will be apparent at fair time next year and in other years to come.

An exhibit which did not attract the attention it should on account of its size but which was none the less of great significance, was a plate of pears grown in the farm of Hugh E. Reed of Twin Falls. The fruit was taken from a tree planted last spring.

DEMOCRATIC RALLY.

The Twin Falls Democratic club has arranged for the appearance at the Ring theater on Tuesday evening, September 18, at 8:30 o'clock, of Miss Mary Ogden White of New York, corresponding secretary of the International Council of Women, and Major G. A. Williams of Halloway. Miss White is a specialist of national reputation and her address should be particularly interesting to women, to whom a special invitation is extended. Major Williams is well known as an orator and has many friends in Twin Falls. The Democrats are paying close attention to the Twin Falls tract, which they will thoroughly campaign.

Several of Mr. Reed's pear trees bore blossoms but he plucked them all except a few. The pears were large, shiny and most mature. Mr. Reed expects to harvest a good crop of pears next year.

REPUBLICAN RALLY.

Hon. W. E. Borah, Republican candidate for United States senator and admittedly the foremost platform orator in Idaho, will deliver an address upon campaign issues in the Ring theater tomorrow, Saturday, evening at 8:30. The Twin Falls band will perform and a rousing reception will be given the distinguished visitor. This will be Mr. Borah's first appearance in Twin Falls and he is assured of a cordial welcome. Senator Heyburn, a loyal friend of the Twin Falls tract, will be heard here on October 1, and Congressman French, who has always taken a lively interest in the tract and worked for its welfare, will speak in Twin Falls on Sept. 20. In planning their campaign the Republicans arranged to send all their leading speakers to Twin Falls, this section being particularly favored in that respect.

CRUEL HOOPS COST A LIFE

GUY GALLIHER TRAMPLED TO DEATH BY HORSES.

Popular Young Student Was Endeavoring to Check a Runaway Team When He Lost His Footing and Fell Under the Feet of the Animals.

In making an heroic effort to stop a runaway team at the depot on Sunday afternoon Guy Galliher, the son of Mr. and Mrs. James A. Galliher, lost his life. He was trampled by the horses and sustained injuries which resulted in his death an hour later. The tragedy was unusually pathetic, both on account of the personal popularity of the young man and the circumstances under which he met his death. The train had pulled in a few minutes before and Guy was engaged in loading trunks on a wagon when the team started. He jumped to the heads of the horses and seized the bridles, in doing so he was struck in the chest and fell. The horses trampled him, inflicting fatal internal injuries. He was taken into the depot and laid upon a stretcher. Doctors Clouchek and Patterson arrived quickly but they could do nothing but make him as comfortable as possible. He spoke for a few moments after he was brought in, but internal hemorrhages killed his lungs and suffocated him. His parents and brother were with him when he passed away.

Guy Galliher was 19 years old and a young man of great promise. Bright, quiet, energetic, kindly and unassuming he won the hearts of all who knew him. It was his intention to return to the Albion State Normal school where he had been a student for two years. He was assisting his father and brother in the livery business which Mr. Galliher recently purchased from J. M. Burnett. At Albion Guy was a great favorite. He took a prominent part in athletics, was a good student and loyal friend. His college students were devotedly attached to him and six of them acted as his pallbearers. They were Professor H. R. Shepherd, R. Mahkin, J. Hill, F. Hager, J. Burgess and E. Briggs. The funeral occurred on Tuesday from Hunt's undertaking parlors. The rooming was crowded and a large number of mourners went to the cemetery. There were several friends of the family from Albion, Black Creek and Shoshone at the funeral. The heartfelt sympathy of all is extended to the bereaved family.

ter Nihart of Buhl helped the boys out by playing third and did nice work. Merban showed his usual good strength at first and the reliable Johnny Hages caught all three games without a slip and did some hard hitting. The boys were very well pleased with their treatment and they invited the irrigators to play in Boise on Saturday and Sunday.

SEWER SYSTEM IS NOW ASSURED

TAXPAYERS VOTE IN FAVOR OF BOND ISSUE.

Bids for Bonds Will Be Opened October 6 and Construction Work Will Begin at Once—System Will Take in Entire City.

Twin Falls will have a sewer system which will cover the entire townsite with the exception of the strip between Fourteenth avenue and Rock creek which slopes toward the creek and cannot be included in the first sewer district. The bond election, which was held on Tuesday, resulted in a vote of 50 for the bonds and 44 against. Six ballots were thrown out on account of invalid votes, having marked them double. The vote was surprisingly light. Many taxpayers who were in favor of the bond issue did not take the trouble to vote, supposing it to be a foregone conclusion that the bonds would carry.

The city has advertised for bids for the sewer bonds, which will be opened on Saturday, October 6. The bonds are to bear interest at not to exceed 6 percent and one offer for them is already forthcoming. Immediately after the sale of the bonds the contract for the construction of the sewer system will be let and the work will be pushed to completion. The ordinance passed by the council on Monday evening conforms to the views of the taxpayers as voiced at the mass meeting. The sewer system will be adequate to carry the sewage and will be uniformly borne by all benefited. Building operations will receive a stimulus and the class of new building will be an improvement. Local labor will be employed on construction work.

PLENTY FRUIT AT CLEAR LAKE

Growers Marketing at Twin Falls and Wood River.

CLEAR LAKE, Sept. 11.—George Davis is busy hauling fruit to Twin Falls.

The Clear Lake ferry brought over a great many people from Buhl on Sunday.

Will Syster is engaged in working his place again. He has piped water across the river and has a good prospect.

A. G. Madellon, Charles Ingersoll and Charles Rose have gone to the Wood River country with fruit.

Olis E. Syster is away looking at some cattle which he is about to purchase.

Mr. and Mrs. George Lamb spent several days visiting in Twin Falls last week.

Mr. and Mrs. A. Wilson spent Sunday in Hagerman.

W. H. Duck has been ill for the last fortnight but is slowly improving.

This has been a good year for tomatoes. A ton of excellent tomatoes was shipped from the Clear Lake ranch and the vines are still loaded.

A large crowd from Buhl came down here to picnic on Sunday.

Mr. Burroughs of Mindoka spent Thursday at Clear Lake.

Frank Wilson, who has been at work in Twin Falls, returned home on Saturday.

Mrs. Charles English of Glenn's Ferry is visiting friends and relatives here.

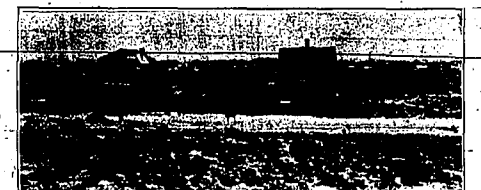

Mrs. G. W. Wilson and daughter of Clark's grade were Hagerman visitors this week.

R. Nickerson of Hagerman is looking after the fruit at the Briggs ranch for Mr. Clifford.

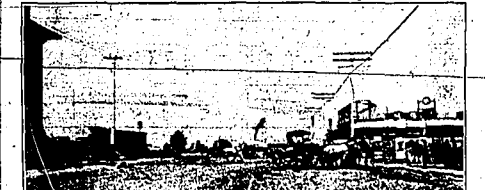

Mrs. William Clifford and children spent two days at the Briggs ranch this week.

Charles Stanley is hauling fruit to Twin Falls.

Miss Carrie Dalquist and Miss Mary Clifford visited Hagerman this week.

A Glimpse at One of the Residences Sections of Twin Falls. This was all Sagebrush 16 Months Ago.

NO MORE BASEBALL THIS YEAR

Home-Team-Goes Successful Season.

With Boise Series.

The baseball season closed in Twin Falls on Monday when the home team dropped the last game to Boise by a score of 7 to 4. The two games on the previous day were taken handsly by Twin Falls, the scores being 5 to 2 in the morning and 12 to 8 in the afternoon. The last game was somewhat tardy. The Twin Falls boys making it as easy as possible for their guests. All the home players performed creditably with the stick and in the field. For the first time this year the team was strong in all departments. Ed Kuhl, the new second baseman, who is proving up on his farm southwest of town, greatly strengthened the nine. Everett Sweeney plied two splendid games and batted like a fiend, besides playing short faultlessly. Guy Holo has batted an excellent game and made six hits in succession. Paul Robertson distinguished himself by acquiring several different flows in center and Herbert Osborn annexed a number of difficult chances in right. Lou Kiersted did some neat fielding and striking. Postmaster.

PLAIN TRUTHS ABOUT FARMING

NOTABLE ADDRESS BY JAMES J. HILL.

President of the Great Northern Makes Interesting Statement to the Minnesota Farmers at the State Fair in Minneapolis.

At the Minnesota state fair in Minneapolis last week President James J. Hill of the Great Northern railway spoke to the Minnesota farmers. Mr. Hill is one of the greatest financiers in the country and one of the most observing men. He has from the best vantage point watched the agricultural growth of the West and he is better qualified to discuss the development of American agriculture. There is a great deal of meat in Mr. Hill's address. It may be put briefly as follows: With some of Mr. Hill's contentions the Twin Falls farmers are already familiar, having heard the same views expressed by Superintendent McPherson. Mr. Hill's address is well worth reading. He said:

Notwithstanding the addition of more than a million people a year from abroad, nearly all of them men and women who must work for a living, labor outside of the cities was never so scarce or wages so low as at the present time. Immigration—immigrants in the great centers and adds to the difficulties attending employment. The farmers scratch out their hands in vain. Railroads in making extensions have to get help at the highest market price, and find a large percentage of those whom they employ more hohoes who desert as soon as they have succeeded in getting transportation from one part of the country to another.

Farmers beseege the employment agencies in vain, and offer the highest tramp a sum for a day's work in the field unheard of in any other country in the world. The situation grows more embarrassing yearly. Hours of labor are being reduced. In some of the states for farm as well as shop hands. Men are scarcer as the movement of population to the cities grows more pronounced. A considerable portion of this year's magnificent crop will be either reduced in quality or altogether lost by reason of the impossibility of getting labor to handle it properly. Discouraged small farmers now are selling their land to larger proprietors who can profitably substitute machinery for men. The country needs more workers on the soil. Not to turn the stranger away, but to direct him to the farm instead of the city; not to watch with fear a possible increase in the birth rate, but to use every means to keep the boys on the farms and to send youths from the city to swell the depleted ranks of agricultural industry. It is the necessary task of our national political economy and intelligent patriotism.

Rapid Increase. Within 20 years we must house and employ in some fashion 50,000,000 of additional people, and by the middle of this century there will be approximately two and a half times as many people in the United States as there are today. No nation in history was ever confronted with a scarcer question than this certain prospect sets before us. What are we to do with our brother, whose keepers we are? How are we to provide our children with shelter and their daily bread?—Of available public lands have almost disappeared.

Our one resource, looking at humanity as something more than the creature of a day, is the productivity of the soil. The reckless distribution of the public land; its division among all the greedy who choose to ask for it; the appropriation of large areas for grazing purposes, have absorbed much of the national heritage. Only one-half of the land in private ownership is now tilled.

That tillage does not produce one-half of what the land might be made to yield without losing an atom of its fertility. Yet the waste of our treasure has proceeded so far that the actual value of the soil for productive purposes has already deteriorated more than it should have done in five centuries of use.

Decreased Wheat Yield. On the new lands of the west, where once the wheat yield was from 20 to 25 bushels per acre, it is now from 12 to 18. Frankly, and without shame, this is attributed to the "wearing out" of the soil, as if the earth were a garment that must be destroyed by the machine. If the earth, the mother of humanity, is to "wear out," what is to become of the race? The fact is that soils, properly treated, maintain their productivity indefinitely under cultivation. The further fact is that, with the disappearance of pestilence and the discontinuance of war that belies the future all contributing to the growth of population, the productive capacity of the soil must be maintained at its highest point of the world suffer.

Reclamation Law.

The single intelligent advance on practical lines made by public authority within the last quarter of a century is the reclamation law. Initiated and inspired and paid for by a few western railway companies, it provides for a real addition to the source of food supply and the opportunity for employment. But it is only a light breeze blowing in the face of a cyclone. If every project contemplated as feasible were executed, and if all were completed instantly, the rule of a magic lamp, some 60,000 acres would be added to the arable national domain. And it only in acres of this were assigned to each family, it would supply the needs of the actual addition to population, by natural increase and by immigration, for less than three years.

Certain it is that the time has come for setting our household in order and creating a serious study of national activity and economy according to a rule of insight and a more rational mood. The first step is to realize our dependence upon the cultivation of the soil. The next step will be to concentrate popular interest, to investigate and hope upon that neglected occupation. We are still clinging to the

skirts of a civilization born of great cities. We at this very moment have a slave which calls the stupid man the "farmer." Genius has shunned the farm and expended itself upon mechanical appliances and commerce and the manifold activities whose favorable results follow back slowly to the plot of ground upon which stand solidly the real master of himself and of his destiny.

If we comprehend our problem aright all this will change and a larger comprehension of agriculture as our main resource and our most dignified and independent occupation will lead us to the future direct to their just aim in the improvement of methods and the increase of yield the wisdom and the science and the willing labor of the millions who thus may transmit to posterity an unimpaird inheritance.

Agriculture Unknown.

Agriculture is the most intelligent meaning of the term is something almost unknown in the United States. We have a light scratching of the soil and the gathering of all that it can be made to yield by the most rapidly exhaustive methods. In manufactures we have come to consider small economies so carefully that the difference of a fraction of a cent, the utilization of a by-product of something formerly consigned to the scrap heap, makes the difference between a profit and bankruptcy. In farming we are satisfied with a small yield at the expense of the most rapid soil deterioration.

When we have added to the national export trade half a billion dollars per annum, the country rings with self-congratulation and we demand the plaudits of the world. If a percent for extracting metallic wealth from bricks were to be discovered tomorrow, such as to assure the country an added volume of a billion dollars in wealth every year, the nation would talk of nothing else. Yet these things would be but a trifle when compared with the possibilities of agricultural development in the United States.

The official estimated value of all farm products of the country last year was \$5,415,000,000. Planting high priced cereals, generally favorable conditions by 20 per cent, and over \$5,000,000,000 remains. It is also officially recorded that of the appropriate farm area of the United States is little less than one-half is under cultivation. Utilize the other half and, without any change whatever in method, the output would be practically doubled.

Change methods only a little, not to high intensive farming, but to an agriculture as far advanced as that of those other countries which have made the most progress, and without any addition whatever to the existing cultivated farm area, the product per acre would be doubled. We should be able, by directing surplus population to the land, and by the adoption of a system of culture in full operation elsewhere, greatly to increase this minimum present yield of \$5,000,000,000 per annum of farm products. That is, we may add \$10,000,000,000 or \$15,000,000,000 every year to the national wealth if we so choose. And this is but a beginning.

Three Essentials.

There are three essentials to any agriculture worthy of the name. The first is the retention of the law average yield is due to the antiquated system all too prevalent of raising the same crop indefinitely on the same land until it has been worn out and reduced that the owner is in danger of poverty. Even without fertilizing, the yield of a given area may be immensely increased and its productive power preserved from exhaustion merely by the restorative variety of change, which seems to be a law of all living things.

The second method of increasing yield and preserving soil productivity is the more liberal use of fertilizing material, such as is possible, where farms are of small size and cattle are kept—gives abundant evidence of the extraordinary results that may be obtained.

The third factor in improvement, better tillage, is most interesting of all, because it opens up unmeasured possibilities. We no more know what is the maximum food bearing capacity of the earth or of any of the small portions of its surface than we do the rate at which people may be able to travel a century from now. But what has been done is sufficiently startling. A population of 45,000,000 people in Japan is supported on 19,000 cultivated square miles, aided by the food produced on the waste lands. This is because cultivation in Japan is truly intensive; that is, it is no longer even highly developed farming, but market gardening.

As we approach that science the actual cultivation of soils for growing purposes, the shelter of plants from frost and unfavorable elements, and the treatment of grains and vegetables by separate planting and individual nurture, all limitations upon earth's bounty appear to recede afar. From two and seven-tenths acres in the suburbs of Paris there have been grown in a single season 250,000 pounds of vegetables. A market gardener of Paris does not need a minimum and vegetable, required for 2,500,000 people of two great departments could be grown, by methods already in use, on the 225 square miles of gardens surrounding the city.

Two People per Acre.

It can be shown that an average of two persons or more may be supported on every acre of tillable land, by the highest forms of intensive farming. But dissuading this as unnecessary, it has been shown that a people like those of Belgium today, not an original race accustomed to a standard of living and of labor impossible to us, not living in virtual serfdom like that of Russia, but an industrious, fairly intelligent and exceedingly comfortable agricultural race, raised from the soil food enough for the needs of 120 persons to the square mile.

Adopting provisionally that ratio as a basis of comparison, though the actual ratio of area to population gives a figure considerably higher even than this, the 414,498,487 acres of improved farm land in the United States on the date of the last official report, an area materially enlarged by the present time, would support in comfort 317,250,405 people, enabling them at the same time to raise considerable food

would not be if the gardener before

you had understood his business. He

was an ignoramus, and planted the

potatoes upside down so that they

grew down instead of up. Had he

planted them right side up you would

have been spared all this trouble."

"I see him alright regarding potatoes

and he is right."

"One must live and learn," he ob-

served. "But how many of us live and

don't learn."

Chapter X.

The master was a man of fairly even
temper. I think that in some cir-
cumstances, where there was no more
irritation to be inflicted than man suf-
fers in ordinary city life, he would
have been a good man. Things had
been running along so smoothly that
I expected an outburst hourly, and it
came. Such a paroxysm of anger he
never had had before when I was with
him. And he was justified in being
angry.He was kind to all animals, but he
loved horses, and he kept his own,
all of them well bred, though spavined.
He delighted in riding horseback. He
often rode bareback at a gallop over
the farm, and considering his size and
age he was a good rider. He also drove
a good deal using two spirited an-
imals hitched to a light wagon.One Sunday afternoon he started out
for a drive, and he came round
and an hour later he returned to the
house on foot. He limped badly, his
clothes were torn and as white from
dust as a miller's. His face was
covered with dirt that had been turned
to mud in places from perspiration.
Through the dirt we could see blood
when we rushed up to him, and he
was in great pain, believing he had
been seriously injured."I am not hurt much," he said. "If
I had had a gun I could have had
just one shot at the pup who is re-
sponsible for this. I wouldn't worry
about being hurt."

"How did it happen?" asked Mr.

Skidde.

"I was driving along the road at a
moderate speed and when near the
bridge over Paint creek, where the
road is very narrow, some dirty hound
came up behind me in an automobile.
He blew his horn and I tried to
drive to one side of the road to let
him pass, but he was going so fast
I didn't have time to get out of
his way. Just as I looked around to
see how close he was, his machine
struck the buggy. Away went the bug-
gy into the ditch. I saw like a bird
over a fence into a cornfield, while
the horses galloped down the road
after the car."

"Did he stop?"

"Stop nothing!" roared the master.

"He went twice as fast after he hit

me."

"What kind of a looking man was

he?"

"He was going so fast I couldn't

make out his features. I saw there

was a girl beside him on the front

seat, and he had one arm around her

steering the machine with one hand.
That's what caused the accident. For-tunately I saw the number of the car.
It's a state license, but I saw that

number when I was flying over the fence."

"What was the number?" asked Mr.

Skidde.

"It was 512."

"Eight-thirteen? Are you sure?"

"As sure as I ever was of anything

in my life. Why?"

"Because 512 is his."

"It is the number of your daughter's

car."

"Hang me for a fool if I let U. And

that chauffeur was the viper I have

been paying my good money to. Where

is Hortense?"

"She left here with Carr half an

hour ago or more."

"And it was my daughter beside

him, the woman around whom he had

his arm!"

The master's language would have

done credit to a sailor or to Uncle

Joe Cannon. He rushed into the house

for his rifle, vowing to kill Carr on

sight. After a bath he allowed Mr.

Skidde to change his clothes, and then

he sat on the porch with his rifle

across his knee, waiting for Carr to

return.

But Carr came not. In the morning

we found the master sleeping

peacefully in a hammock. But there

was no peace after he awakened.

OREGON SHORT LINE.

Homecekers' Rates.

From September 15 to October 21,

only second class settlers' rates to

the Twin Falls tract will be in effect

as follows: From Chicago \$30.00,

St. Louis \$27.50, Kansas City \$25.00,

Portland, Astoria, Seattle, Joseph, Council

Bluffs, Omaha, Sioux City, St. Paul and

Minneapolis \$22.50. Transportation rates

from other stations \$2.50. For further

information apply to D. E. SULLIVAN,

Agent, Twin Falls.

PLAIN TRUTHS ABOUT FARMING

(Continued from Page 2.)

for export and to engage in necessary

manufacturing employments.

Applying the same ratio to the en-

tire acreage of farm lands within the

United States, both improved and un-

improved which was at the same date

\$38,621,714, the population indicated

as able to live with comfort and pros-

perity on the actual existing agricul-

tural area of this country, under an in-

telligent system and a fairly compe-

tent but by no means highly scientific

method of culture, rises to 642,046,823.

The conclusion is that if not another

acre were to be reclaimed from the

wilderness if the soil were treated

kindly and intelligently and if indus-

tries were concentrated upon the

best possible utilization of the one un-

failing national resource, there would

be produced all necessary food for the

wants of, in round numbers, 650,000,

000.

Needs of the Hour.

Failing to understand the needs of
the hour or to appreciate the moral to
which they point, what fortune must
await us? Within 20 years 125,000,000
people and before the middle of the
century over 200,000,000 must find
room and food and employment within
the United States. Where are they to
live? What are they to do? By that
time our mineral resources will have
been nearly exhausted that the in-
dustries related to them must fall into
a minor place. By that time it is ap-
parent that our dream of conquest of
foreign markets will be a bursted bubble.Harold Dole has demonstrated that
the peoples of the Orient—the hun-
dreds of millions of Japan and China—
are not nearly so stupid as we have
imagined. They are capable of im-
proved ability to operate modern ma-
chinery and to create it in their own
workshops after once using it, their
earnings saved and employment found.
They are capable of doing the work of
their limitless cheap labor and their pa-
tience like that of fate, are prepared
to control the markets of the future.
They are capable of doing the work of
the United States against the policy
which has established domestic con-
ditions in manufacturing business,
on lines which make production so ex-
pensive an affair that we could not
hope to meet the competition of the
Far East on even terms, and must retire
before the despised Chinaman.It is a mathematical fact that within
20 years, under present conditions, our
wheat crop will not be sufficient for
home consumption and seed, without
leaving a surplus for export. Will these
conditions go into the factor?
That where can they expect to sell their
products in a world of competition,
and who will furnish the pay rolls?
All industry stops when these are in-
fathomable. That is the dead wall
against which England stands dis-
mayed.If we are warned in time. On every
side there is menace if our national
activity be not recognized on the
basis of the old-fashioned common
sense. The safety valve for older peo-
ples has been found in emigration.
Their very belief has contributed to
our danger. The United States cannot
follow their example. It is against the
wishes of our people, and besides, the
circle of the "northern hemisphere" is
closed. At home the problem must be
worked out, and its terms have been
clearly stated.

National Duty.

The conclusion reached points out
and emphasizes a national duty so im-
mense and so imperative that it
should take precedence of all else. It
is the duty of the nation to provide
employment for all its people, and to
make as proud, as prosperous and far
more strongly fortified than our own.
Nothing can stop the onward march
of nature's laws, close the iron jaws
of her necessities when they open to
crush their victims. Either we shall
understand our situation and make
such provision as her benignity af-
fords to meet it, or we shall find our-
selves in the midst of overcrowding and artificial
standards and food and employment in-
adequate to the national needs and so
in danger of destroying the strictly
simple once reared with the highest
hopes—that ever animated humanity.Which is it to be? If we are to walk safely in the way
of wisdom there is much to be done.
It is time to begin. There must be,
first, a return to conservative and eco-
nomic methods, a readjustment of na-
tional ideas such as to place agricul-
ture and its claims to best intelligence
and the highest skill that the country
affords at the very front. The nation
must be a national revolt against the
worship of manufacture and trade as
the only form of progressive activity
and the false notion that wealth is built
upon these at the sacrifice of the fun-
damental form of wealth production
can endure.A clear recognition on the part of
the whole people, from the highest
down to the lowest, that the tillage of
the soil is the natural and most de-
sirable occupation for man, to which
every other is subsidiary and to which
all else must in the end yield, is the
first requisite. Then there will be a
check administered to the city move-
ment that has lowered the percentage of
agricultural labor to the whole body
of persons engaged in gainful occupa-
tions in the United States from 14.5
per cent. in 1870 to 7.5 per cent. in
1900. With public interest firmly fixed
on the future of the country, in more
than preservation, most give serious at-
tention to the proper cultivation of
restoring agriculture to its due posi-
tion in the nation.

Record of the Republican Party Under the administration of McKinley and Roosevelt.

"We have ample record of deeds done, of beneficent things accomplished in the public interest. The vast business of the country has been conducted fairly and impartially. The laws have been enforced faithfully and impartially. The country has been adequately supplied with revenue and the national credit has been maintained on a never better basis. Our foreign trade balance continues to increase, our national policy has been adopted, an irrigation policy which will build homes in the arid regions of the west. The Panama canal, the hope of the century, is in course of construction, under the able protection of the American flag."

To Republicans:

We are anxious to have every Republican in close touch and working harmony with the Republican National congressional committee in favor of the election of a Republican congress.

The congressional campaign must be based on the administrative and legislative record of the party, and that being so, Theodore Roosevelt's personality must be the central figure and his achievements a central thought in the campaign.

We desire to maintain the work of this campaign with popular subscription of one dollar each from Republicans. To each subscriber we will send the Republican National campaign text book and all documents issued by the committee.

Help us achieve a great victory.

Major Fred R. Reed has severed his connection with the Harley Bulletin and Twin Falls thereby loses a loyal and helpful friend. The major has been a Twin Falls booster from the beginning and has done his full share toward attracting attention to the tract. He has taken a personal interest in the welfare of the city and has many friends here. The major is developing a mine which gives promise of big returns and the hope of his Twin Falls friends is that it may prove a bonanza. Professor Edward T. Barber, until recently editor of the Bulletin, will devote his attention to the office of United States commissioner in Burley. Mr. Barber has also been true to Twin Falls and enjoys the good will of a host of friends here who wish him the success he deserves.

Final results are bound to follow the decision of the property owners of Twin Falls to provide the city with a first class sewer system. The rapid growth of the city and the compact character of the soil made the sewerage problem one of great gravity. Cess pools were found unsatisfactory because they filled up quickly and could not be drained. People hesitated to build modern houses for the reason that they could not obtain sewerage. A number of citizens who had been holding back are now asking for bids on their residences and building operations will be revived on a greater scale than ever. It is seldom that a city two years of age can boast of waterworks, electric lights and a sewer system in keeping with its growth. Twin Falls will enjoy all these advantages and its advancement will be unchecked. The people are to be congratulated upon their progressive spirit.

TRAIN STOPPED BY A THISTLE

Engineer Thought an Animal Was Lying Across the Rails.

HANSEN, Sept. 13.—Miss Amy Keith went to Twin Falls Tuesday to spend a couple of weeks visiting with friends.

Mr. and Mrs. George Davenport of Yakima valley were here visiting W. A. Hily and family, and are very much pleased with this country.

Mrs. Hammond of Boise arrived here a few days ago on a visit to her daughter, Mrs. W. A. Hily.

Mrs. Ellen Klein has returned from Albion, where she has gone to accompany her daughter Catherine, who will spend the winter there attending the State Normal school. She found the regular daily train running from Hansen to Rock Creek a great convenience in reaching her home.

Mrs. W. A. Walker has returned from Pomeroy, where she has been recently called to visit her old home and friends.

Mr. and Mrs. John Nichols are being congratulated upon the arrival of their brand new daughter, on Tuesday, the 6th inst.

Mrs. C. O. Morrell and nephew, Maurice Windus, visited Rock Creek last Tuesday.

Mrs. F. M. Keith went to Rock Creek this week to purchase a supply of fruit for family use.

Thomas J. French was the first man to put to use brick from the large brick kiln that is located on the Hansen townsite. He is having a fine building in his new home, which will soon be completed ready for occupancy. There appears to be several applicants after the building but it is undecided yet who will be the lucky party.

E. G. Cowles shipped 250 pounds of fine ripe tomatoes to Hoyburn this morning by freight. He will make another shipment in a few days. The farmers are finding it very convenient to ship away their surplus produce since Hansen has been made a regular shipping station. The freight train, both coming and going, have to stop at Hansen almost every trip to either take on or put off freight for our people.

Some of our farmers are becoming indignant because the railroad company is so slow in removing the Russian district growing along the right of way. That seems to be the only place where there are any thistles growing at present, as the seed was brought here the first year and where and hauled here and fed out by the campers while building the grade for the railroad. A short time ago at a point between here and Kimberly the freight train stopped and went to a stop. The engineer thought he saw a dead beef lying upon the track. Upon investigating he found it to be a large Russian thistle over six feet in diameter that had been placed upon the rails by some thoughtless man or bad boy to remind the company to take care of the crop of thistles.

It will certainly do any man a world of good to have the privilege of visiting the valuable 160-acre farm owned by the late P. L. Hicks. He worked a wonderful success this year. The showing he has made would pull out of the race any contestant from Twin Falls.

the business and knows what he is going into. Hansen will soon be able to support a number of business houses of various kinds.

ORDINANCE NO. 31.

An Ordinance to Provide for the Construction of a Sewer System within the Village of Twin Falls and creating a Local Improvement District to be called "Local Sewerage and Improvement District Number One."

Be it ordained by the Chairman and Board of Trustees of the Village of Twin Falls that it is the intention of the Board of Trustees of the Village of Twin Falls to create a local improvement district for the purpose of constructing therein a sewer system, and such district is hereby created and designated as "Local Sewerage and Improvement District Number One."

Section 2. The boundaries of such local sewerage and improvement district No. 1 shall be and are hereby defined as follows:

Beginning at the southeast corner of Twin Falls townsite; thence running northwesterly along the southwest boundaries of blocks 110, 109 and 123 to a point where said last lot or lots, if projected, would intersect with the center of Thirtieth avenue; thence northwesterly along the center of Thirtieth avenue to the point of intersection with Tenth street; thence southwesterly along the center of Tenth street to the point of intersection with the center of Fourteenth avenue; thence northwesterly along the center of Fourteenth avenue to the point of intersection with the west boundary of said townsite; thence north along the west boundary of the townsite to the northwest corner thereof; thence east along the north boundary of said townsite to the northeast corner thereof; thence south along the east boundary of said townsite to the point of beginning. And each and every lot and block within the aforesaid district are hereby included in said district and each and every lot and block therein shall be subject to any tax or taxes, in proportion to the benefits that shall or may be derived from the district for assessment or taxation purposes which is occupied by streets, cross streets and alleys.

Section 3. The said sewer system shall consist of mains and lateral sewers which shall be so constructed as to furnish an outlet for each lot in each block included in said district. All main sewers shall be so constructed as to provide a sufficient gravity fall to permit free and uninterrupted flow of the sewerage from each main line into the trunk sewer which shall for may be hereafter constructed by the village of Twin Falls.

Section 4. Protests against the creation of such sewer district and the laying out of the sewer system may be filed with the Village Clerk of the village of Twin Falls not later than the 25th day of September, 1906, and the owner of any property situated within said sewer district may protest by filing the same with the Village Clerk in accordance with law.

Section 5. This ordinance shall be in full force and effect from and after its passage and publication.

Passed this 10th day of September, 1906.

S. T. HAMILTON,
Chairman.
IRVING R. DARROW,
Clerk.

BREVITIES

Mrs. Mollie Robinson of Albion was a Twin Falls visitor on Monday.

Louis Jeannot, a prominent merchant of Chicago, Idaho, is looking over the tract, which impresses him very favorably.

C. M. Smith has been appointed a member of the board of village trustees in place of Paul S. A. Bickel, resigned.

Rev. E. Rufin Jones of the Episcopal church of Pocatello will hold service in the Masonic hall on Sunday at 11 o'clock in the morning and 8:15 in the evening.

A. L. Bradley of the Pioneer Harness shop has moved his stock into the Ed Barrett building on Shoshone avenue. Bradley found it necessary to secure larger quarters and he has obtained a splendid location.

W. H. Hutton, who is usually engaged in operating a steam thrasher in the vicinity of Twin Falls, states that the crop yield is exceeding expectations all around. Mr. Hutton has grain in Twin Falls and in order to show some of his eastern friends what was being done here he paid for several subscriptions to the News which he ordered sent to them.

The second week of school found 392 pupils in attendance. The increase necessitated the employment of another teacher and Miss Baker was engaged to take the fourth grade. The high school is about to organize a literary society which will be joined by the seventh and eighth grades. Military drills are taking place and the pupils are settling down to hard work.

English Lutheran church services will be held at the Christian church in Twin Falls Sunday, September 16, at 2 o'clock p. m., and at 8 o'clock p. m., at which time Rev. William H. Schnake will be regularly installed to take charge of the work on the Twin Falls tract. Rev. H. Koppelman of Pocatello, Idaho, will deliver the installation sermon. Everybody is cordially invited to attend.

The Boise baseball team arrived here from Twin Falls this morning, and they talk like they were paid advertisers for the new town. "We were never so well treated in our lives," said the boys. "The food was good, the country, and the people. The hotel there is as good as the Indiana or the Dewey Palace. While we lost the two games, we were not beaten. We won a score of 7 to 4."—Boise apital News.

The Twin Falls Land & Water Co. and the Twin Falls Irrigation Co. will run a daily stage to Buhl hereafter, the line being placed in—charge of James A. Ryboe. The stage will leave the investment office in Twin Falls every afternoon at 2 p. m. Returning it will leave Buhl about 8 o'clock in the morning. Mails will be carried daily to Buhl and arrangements are being made to supply Buhl with a daily mail.

Rev. L. F. Stephens will conduct services in the Christian church on Sunday morning and evening at the usual hours. Mr. Stephens is the gentleman who built the Christian church in Twin Falls, with the aid of local money, and also having been here, has built two additional churches. He is engaged in praying up on his Twin Falls farm.

Professor Shepherd of the Albion State Normal school who came to Twin Falls to attend the funeral of Guy Gallinger, stated that 103 pupils were enrolled at the school, a number of whom were from Twin Falls. This is an increase of 20 pupils over the enrollment at the opening of the fall term one year ago. The school was never so well equipped and is now in every respect an ideal institution. It merits and will receive the loyal support of the people in this section of the state.

Miss Myrtle L. McManis arrived in Twin Falls yesterday and is organizing a club in piano instruction. Miss McManis is a graduate of the Western Conservatory of Music at Chicago and a pupil of W. S. B. Matthews and Mrs. Blanche Dingley-Matthews in kindergarten methods. Her course of study is of the latest approved methods employed in the leading schools. Miss McManis taught two years in the Academy of Idaho and comes here highly recommended.

O. B. Olson, who will receive first prize for the best bull held on the fair, is wondering if the loss of his pet watermelon had anything to do with the decision of the judges. Mr. Olson was away from home on his return he missed the melon which he was saving up for the fair. If the judges were compelled to decide the melon in order to save upon the merits of the products of the field, well and good. If they took it because they couldn't resist the temptation, Mr. Olson will accept their action as a compliment.

Ellis Nelson of the department of irrigation investigation spent several days in Caldwell, Idaho, in connection with Professor French, director of the State Agricultural Experiment station, making a survey of a tract of land recently set aside for an auxiliary state experiment station for investigations of irrigation and dry land farming. The farm is owned by the state but the work there will be in co-operation with the office of irrigation investigations of the federal government. Several such stations have already been established in other states, either independent of or in co-operation with the state stations. A part of the Caldwell farm lies under a canal of the Boise-Caldwell project, but as water will not be available for use next season the immediate installation of a pumping plant to raise water from the Boise ditch is under consideration. Some winter irrigation is contemplated and operations will begin as soon as the land has been cleared of brush. Contract for which has already been let.

Leo Jacobs of Delta, Colo., is visiting his brother, Commissioner H. H. Jacobs.

Frank Bower has purchased the city residence of C. Harder and will bring his family to Twin Falls.

William Fishinger of Wallace, the partner of Hugh Toole, who has a ranch on Coeur d'Alene ridge, is here on a visit.

The Pioneer Storage & Commission Co. has received two carloads of thoroughbred hogs which were purchased by Don C. Bryan in Nebraska.

The Shoshone avenue bridge has been formally turned over to the city. The Land & Water company will put in a water ditch on one side of the bridge and the city will install another on the opposite side.

Alexander Unna, president of the First National bank of Blackfoot, was in the city this week, visiting his old friends, Scott Hazen and H. H. Jacobs. Mr. Unna was very much taken with the appearance of Twin Falls.

Bank Commissioner C. S. Loveland spent four days in Twin Falls this week. In order to get a good view of the country he walked from Kimberly to Twin Falls on Tuesday. He was well pleased with the appearance of the country.

Mrs. D. Brown-Lewers has arrived and the doctor is correspondingly happy. Mrs. Brown-Lewers is a trained nurse of experience and capability, having handled a great many difficult cases. She will remain in Twin Falls.

G. F. Gasser has arrived from Lacrosse, Wis., and is located on his farm at Buhl. His son will arrive today. Mr. Gasser has a fine piece of land and is well pleased with conditions.

Among the visitors from the Irrigation commission who arrived here were J. A. Albert, cashier of the Capital National bank of Salem, Oregon, and Judge Scott of Harlan county.

Nels Lind brought into the city a corn stalk 10 feet 8 inches in height, with an ear 15 inches long and 10 inches in circumference. It was taken from the Kille and Mott ranch on the township road to Buhl, and is as pretty a specimen as could be imagined.

Just to show what kind of peaches they raised at Riverside, Newt Uhrhuth sent in a box of Crawford's to the News office. The peaches were tempting enough to provoke a riot at a church fair and had Newt sent a few to the Twin Falls fair he would have created a stir.

The infant daughter of Mr. and Mrs. George D. Wibley died on Wednesday evening of cholera infantum. Mr. Wibley is on his way home to the east and the funeral arrangements have been deferred pending his arrival. The bereaved mother has the heartfelt sympathy of her many friends.

Henry Howes of Wallace has established residence on his farm southwest of town for the purpose of making a proof. Mr. Howes stated that he expected his neighbor, Senator Page, to arrive in Twin Falls shortly. He added that the people of Wallace who owned land on the Twin Falls tract were greatly pleased with their farms.

W. O. Taylor of Boise has been appointed to succeed C. D. Thomas as representative of the state land board in Twin Falls. The office was formally turned over to him by Register M. I. Church yesterday. Mr. Taylor is an experienced man and thoroughly familiar with the work. He is well known to the old timers, having lived in Wallace for a number of years. Mrs. Taylor is absent on a visit at present and will join her husband here later.

C. B. Evans killed a turkey vulture in his chicken yard in town this week. The animal was old, bold and mangy. It had developed a habit of attacking chickens and was about to make a meal of the ninth when stopped by a charge of bird shot. Mr. Evans stated that he had received a fine hen and cock and was about to make a meal of the ninth when stopped by a charge of bird shot. The cat have their fair in the Rock creek canyon near the railway bridge and have a well developed appetite for chickens.

TWIN FALLS DELIGHTS THIS MAN

Former Athens Man Tells of Idaho's Garden Spot.

Charles Marsh, for years a prominent farmer near here, who sold his large ranch and moved to Twin Falls, Ida., about a year ago, shortly, with his family yesterday and will visit friends here for a few days, writes an Athens, Ore., correspondent to the Spokane Review. Mr. Marsh is elated over the outlook for a prosperous city and country. Twin Falls, what a few years ago was practically a barren waste of desert lands covering many square miles is today a beautiful country and many of the best crops are now in good circumstances. Twin Falls has a population of 3000 and is only a little over two years old. Real estate is rapidly increasing in value and irrigation is the life of the country. One five acre tract recently improved and sown to alfalfa sold for \$300 an acre. The owner had just sown two crops of hay which had netted him \$50 an acre. Two crops of hay on one parcel yielded seven and one-half tons to the acre and a third crop will be cut this year, wheat, barley and oats will do well in the irrigated district, and fruits, garden products and other vegetables thrive. Hundreds of new settlers from the eastern states are here and everything is very favorable for a lasting and progressive settlement.

For Sale.

Fruit and alfalfa ranch only 2 miles from Hagerman, quarter mile from school; free spring water in unlimited supply; 100 acres improved, balance 160 acres in alfalfa. 2 room house, corral, etc. Only \$5,000, reasonable time. Also other valuable tracts for sale. Address W. VAN JORN, Hagerman, Idaho.

Notice.

Notice is hereby given that I have this 2nd day of September, 1906, seized and impounded the following described animals which were by me found running at large, within the Village of Twin Falls, to-wit: One white horse, branded h and o on right thigh; one black horse, branded O on right thigh, small white spot in face. That the said animals have been impounded by me in the corral at Gallier's livery barn, in the village of Twin Falls, and will be at said corral offered for sale on September 20, 1906, unless sooner claimed and fees paid, as provided by the ordinances of the village of Twin Falls.

C. W. DYER, City Marshal.

Girl Wanted.

Girl wanted for light housekeeping. Inquire at Osborne & Ferney's store, Twin Falls.

Conference Rates.

For this autumn conference in Salt Lake City on Shoshone avenue, will sell tickets from Twin Falls to Salt Lake and return on October 3, 4, 5 and 6, return limit October 16, rate \$9.30 for the round trip.

Card of Thanks.

We desire to thank our friends and neighbors of Twin Falls for their kindness through the sickness and death of our little son Donald. MR. and MRS. E. J. HOLDEN.

For Sale Cheap.

One pair work horses, weight 2600 pounds; one now open buggy; one old heavy top buggy; one light double harness; one light farm wagon; also two lots on Fourteenth street near Shoshone avenue. Inquire of W. W. HUMPHREY, At Farmers Corral, 14th St.

INVESTIGATING NATIVE GRASSES

Government Experts Make Many Interesting Discoveries.

A considerable amount of investigation has been carried on by some of the agricultural explorers in the employ of the leading governments in the hope of finding hitherto unimproved grasses that may be susceptible of development into cereal grains of value. Of course, although some persons may not know it, wheat belongs to the grass family as do also oats, barley, rye, speltz and even Indian corn or maize. To be useful for human food, a grass must bear large seed heads containing good sized seeds and this is a matter depending to great extent upon cultivation. It has been claimed that if all the cereal grains now existing were to vanish from the earth in the present year others could be brought into being in a surprisingly short time by the scientific propagation and improvement of species of grasses which at present are neglected. Several of our native grasses might be made to serve in this way—notably three or four of the panic-grasses which are related not distantly to the broomcorn millet, and are really far better adapted for use. It is wonderful what can be accomplished in the development of a grass for the production of a cereal grain simply by the application of well understood methods of selection and propagation. Maize originally, it is supposed, looked much like an ordinary grass. Where it had its origin is not known, but certainly, although probably in the highlands of Central America and in a restricted area. The aboriginal people took it up and cultivated it, selecting from year to year the plants that bore the largest ears, and hundreds of years before Columbus landed on the shores of America Indian corn became much like what it is today, and was grown for food all over the eastern part of the United States—Denver Field and Farm.

TILLMAN WINS MASTER'S FAVOR

BANKER FARMER IS BEGINNING
TO GET RETURNS.

Harvested Five Bushels of Wheat and
Secured Some Ripe Tomatoes and
Fresh Milk—James, the Coachman,
Becomes Arranged.

Chapter VI.

One August morning Johnson, the farmer, notified Mr. Skidds that the milk supply was growing smaller daily and suggested that it would be wise to arrange with Jasper Hinson, a natural born farmer a mile away, for two gallons a day.

"Two of the cows are dry," said Johnson, and another will be dry next week." Mr. Skidds communicated the fact to the master.

"Two of them dry!" the master howled. "Then, confound it, give them a drink! Don't let them water enough around this place to keep two cows from being dry? What did I do with my money when I had four wells drilled? Did I burn it up? What are my three windmills for? Why did I buy a gasoline engine? To pump water! And now you come around telling me about dry cows. Pump it by hand!"

James, the coachman, was cleaning the buggy at the time, and he heard the outburst. Of course, he laughed and that angered the master.

"Discharge that man at once!" roared the master to Mr. Skidds.

"If you wish him discharged, do it yourself," said Mr. Skidds.

"I won't," said the master. "When I hired you I told you that you alone had power to discharge an employe. It's up to you."

Mr. Skidds declined firmly but politely and explained why James had laughed. When the master learned the truth about the two dry cows, he laughed and ordered the coachman to discharge the man at once. The master prided himself on being a shrewd trader, and he went to Mr. Hinson's to bargain for the milk.

"We shall need at least three gallons a day," he said.

"Reckon I kin spare that much," said Mr. Hinson. "Will you send for it or must I deliver it?"

"I suppose the price will be lower if we send for it," said the master.

"Yes, I'll give it to you a cent a gallon cheaper."

"Then one of my men will call for it every day. How much will it cost?"

"Well," said Mr. Hinson, slowly, "though he were doing some figuring, 'you can't expect me to sell it cheaper'n it's sold in town."

"Certainly not, certainly not."

"I guess 9 cents a quart is enough," said the master.

As he remarked before, the master does business according to modern methods, and he insisted upon contracts being signed. When he returned, "Nine cents a quart for milk! The man must be crazy. Why, our milk costs on the farm cost us 35 cents a gallon. My book shows it."

"He might have sold it to you as cheap as the city dealers do," said Mr. Skidds.

"What do they charge?" asked the master.

"Only 7 cents a quart—it was 6 cents before the milkmen's trust was formed."

"Oh, the language the master used! To think," he said, as he walked away, "that I insisted upon contracts being signed! Done by a farmer! Done by a farmer!"

Chapter VII.

I was growing rapidly in favor with both Mr. Skidds and the master, and I had reason, good reason, to believe my name was not unknown to the master's wife and daughters. I met Hor- tense, the oldest daughter, one morning, and bowed to her according to the instructions given to me by Mr. Skidds. She smiled pleasantly and said:

"You are Tillman, I believe?"

"Yes, ma'am," I replied.

"You will observe that I said 'Yes, ma'am.' I had not, at that time, been a reader of the Ladies' Home Journal, nor had I ever read the annual reports of the Chautauque assembly or its branches. I had never read the proceedings of the meetings of the various organizations, religious, and did not know how the 'ma'am' and 'sir' question had agitated educational circles."

"We are greatly indebted to you, Tillman," she said. "You are the man who has produced the eggs."

I am a modest man. I never had desired to take any credit and she said it was far from my purpose to rob the conscientious hens of any honor, but I was so embarrassed I bowed and stammered, "Yes, ma'am, thank you."

A few days later I had opportunity to place the master under obligation to me. Just as Hor- tense was leaving the farm for a ride in her phaeton, she became frightened and, clutching the single rein to pieces, I was near and grabbed the animal by the bit and calmed it. Miss Hor- tense was much frightened when I helped her from her phaeton. She declared she would never again attempt to drive a horse.

"It is much too dangerous," she said, "to shall ride in an automobile hereafter."

The master remarked something next day about my act, thanking me warmly for saving Miss Marguerite's life.

"Pardon me," I said, "I was not Miss Marguerite, but Miss Hor- tense. Upon my soul, I thought Hor- tense had gone down to the seashore," he said.

"No, sir, it's Mrs. Allrox who's gone to the seashore."

"You don't say so. When did she go?"

"Last Thursday."

"Come to think of it," said the master, "I haven't seen my wife around for several days. I guess you're right."

The result of Miss Hor- tense's experience was that the master had to employ a chauffeur, one Rastus. Call, James, the coachman, refusing to run an auto mobile.

"He was 'ired to look after the

orses, sir," said he. "I'm no stoker. And if you wish it cleaned, sir, you'll have to fire somebody else to do it. It's a horse, not a boiler."

Possibly this is the place to explain that the other part of James' name was O'Brien and that he was born in Dublin, where he had been a steady little actor. He received 20 a month extra for using an English dialect. Instead of a brogue. And it was the custom of the master and other members of the family to cause him to break into conversation when strangers were around.

Antoinette threatened to quit if James was discharged, and the cook threatened to leave if Antoinette did so. It all ended by the master employ- ing a man to clean the automobile. His title was "oller." The master had a machine for his own use, but it had always been cleaned in the city garage. He decided it should be cleaned at home, but the chauffeur objected.

"My 'oller' has all he can do to keep after one car," the chauffeur declared, and the 'oller' said he'd quit before he would clean two cars a day.

The master jumped into his car and secured the aid of a man from town. We did not see him again for a week.

Chapter VIII.

Carr, the chauffeur, was a pompous fellow. He refused to take orders from anybody, and one day he said as to tell Mr. Skidds to do something.

"What!" howled Mr. Skidds. "You order me around? You ever speak to me again, you pig-head, and I'll make his place look like a section of the Chicago stock yards."

James, the coachman, hated him royally because of the rags he put on. He wore a pair of gloves he called gloves and automobile glasses. The farmer boys used to stone him when he passed. I noticed that he took Miss Hor- tense riding a great deal, and one day I overheard him call her Hor- tense, a familiarity that he assumed. I had a suspicion that the master had feared, but I said nothing, applying myself to my work in the garden.

I gained more praise from the master and an increase in salary about the middle of August by hanging to him a quart of fine blackberries. I picked the berries myself, taking only the ripe and perfect ones.

"Ah, this is something like it!" he exclaimed, jamming the berries into his mouth. "This is the real thing! This is what makes a farm worth all the trouble and expense!"

I do not know what I did so, but I asked him if he had ever been on a farm in his youth, and he talked freely of his early life.

"I was on a farm when a boy," he said. "My grandfather was a farmer, and my father worked on the farm until he was 21. Then he went to the city and became a bookkeeper. Until my grandfather died, I spent two or three weeks on his farm—every summer. Often, after grandfather's death—when I was boy of 14 or 15—I would like to be a farmer. Father said I was a fool. When only 17 I went to work in a bank, and once I said I would like to be a farmer, he told me to go to the city and work on a farm. Father gave me a terrible beating. But, Tillman, when a man has made up his mind on something, if he is a man of will and determination, all the beatings in the world won't drive it out. As you see, my father's protests did no good. I am a farmer in spite of him."

"I am a farmer from sentiment. I love it. I love the fields. I love the green trees. I find a great delight in knowing I am raising something. I would rather spend a day figuring out whether to plant wheat or oats than to float a loan of \$100,000 at 10 per cent, with gold bars as security."

"I have been so interested in grandfather's work that years ago I collected some of his tools. His sickle hangs on the library wall and his rake in the hall. I will show you."

He led me into the library, where he showed me the sickle. "Yes, in the barn at our house," I ventured.

"Because your soul lacks poetry," he said.

Our conversation was interrupted by the entrance of the chauffeur.

Chapter IX.

"What do you want?" the master asked.

"Here is a bill," the chauffeur replied, handing this statement to the master.

Repairs to buggy, damaged in runaway caused by automobile accident..... \$ 42.00

Doxies' bill, water failed..... 115.00

Damages for injury to woman..... 500.00

Repairs to automobile..... 150.00

Produce month of August..... 230.00

Ball forfeited..... 200.00

Attorney's fees..... 200.00

Total..... \$1,297.00

"I have paid those bills myself," said the chauffeur. "Kindly give me a check for the amount."

The master wrote a check and handed it to the chauffeur. He left the room. Turning to me, the master said: "Tillman, the insane asylums and poorhouses are full of smarter people than I am."

One acre of the master's beautiful farm was in wheat, which was harvested in July. The yield was light, said the master, because of the drought. He threshed the wheat in August and turned over five bushels of grain to Mr. Allrox. He was much delighted.

"He should be better off," he said, however. "I don't think I was so bad and weeded properly. If necessary, I'll hire a man to help."

I was having five men in the garden, pulling up only enough vegetables for the house, but also giving an occasional bush of peas, beans, corn and other things to the master to take to his friends in the city. I learned after that the man who received a gift of this kind paid dearly for it, the master forcing him to listen to much conversation on gardening, a few hours of having things fresh from the soil, and all that.

I have been told, too, that the master never smiled during his life in conversation, but for that I care not, since he paid me well for my work. Now and then, so some say, he would put on a smile, but I never saw him do a bit more than a frown.

The master and I had many conversations on gardening, but one of our stand-out apart from all the others. I was digging potatoes, when he came

BUSY ALL THE TIME AT BUHL

Farming and Building Operations Are on the Increase.

BUHL, Sept. 12.—An organ has been ordered for the Buhl Union Sunday school.

George Richmond, Allen, supporting, spent a few hours in town Monday night, and was present at the Farmers' association meeting.

George Wilson, who came up from Twin Falls to relieve Jim Patten and Andy Wilson to enable them to see the fair, left for home Monday. He was so well pleased with Buhl that he wished he could stay here forever.

Jim Patten walked into town yesterday about noon with a phonograph, under one arm and the records under the other. He looked weary and footsore. He came in from the southwest. We did not know that Twin Falls was in that direction, but Jim says it's all right and it's no newspaper man's business anyhow. His partner, Andy Wilson, returned home Monday as fresh as a daisy. His wife was with him. He says that he has not been anywhere in which you might get lost or wander off after strange things, take your wife with you. She will bring you home safe and from the right direction.

Ed. Braun and B. Boyd saw the fair, the bull games and the sights of the Power city. Mr. Boyd said that Ed. was trying to show him two moons where there ought to be but one. Ed. denies it and says "ain't no. I was with my girl all the time and we drank nothing but strong lemonade. It was Boyd that was trying to show me the moons and he said there was three of 'em."

All of our people who had an opportunity to see the exhibits at the fair are enthusiastic over the showing made by the tract. They say we will see there next year and have a most seat, but the fair will be in Buhl.

Mr. and Mrs. G. A. Parker went to Twin Falls last week on a visit.

H. S. Hobson, living about a mile east of town, brought a cabbage into town last week that weighed eleven pounds.

Jerome W. Holkins has almost completed a \$2000 two-story residence on his ranch four miles south of town. He is also making several other expensive and permanent improvements on his place.

Mrs. J. H. Schooler and daughter, Cora, visited last week in Hagerman with Mr. Ed. Purdy's family during the absence of Mr. Schooler in Hagerman.

Several business transactions on his business block last week long enough to take in the fair at Twin Falls. He came back well satisfied with what he saw there. E. A. Milner is going to join Mr. Dolg in putting up his building with another building 25 feet front, so that it will be a joint building with a 75-foot front instead of 50.

John Grant sold his black stallion to Jack Frith of Thousand Springs, the consideration being \$500.

C. S. Peck and wife returned from Twin Falls Friday with two wagon loads of household furniture. They are now living in their rooms upstairs in the Taylor hotel.

Mr. Peck is on the sick list this week. The Milner-Perrine Lumber Co. is putting in a Fairbanks platform scales. It will be 22 feet long. The company bought 90 acres of wheat hay from George Dunn and 50 tons of the same kind of hay from N. H. Anderson, all of which is stacked close to the lumber yard.

John-Gurley of Twin Falls, Coleman Burroughs of Milledale and Alex. Campbell of Salt Lake registered at

ONE AND ONE-HALF BLOCKS EAST OF HOTEL BUHL
BUHL, IDAHO

Hotel Buhl the past week.

C. S. Loveland, bank examiner, of Boise was in town Monday and found everything shipshape in this burg. James A. Moten, a newspaper man of Salt Lake, is in town. He intends to start a newspaper here in the near future. He presented this matter to the Commercial club at its meeting last night and suggested a stock company, submitting several propositions for consideration, but no definite steps were taken. Mr. Moten owns 100 acres a mile and a half from town.

Horb Anderson, who has been at work on the laterals west of Buhl, moved his camp Tuesday to the low line canal at Cedar draw, where he will put in some time strengthening the banks of the canal at that point. The laterals are finished.

E. W. Peck has gone out to live on his ranch south of Sucker flat, and will remain there during the proving up period.

F. Moore has a fine patch of tobacco on half mile south of Buhl. The plants have made an excellent growth and will produce a good crop. Mr. Moore believes that it would have done a great deal better if it had been planted in proper time. It should have been planted in February or March, but it was not set out until July.

C. J. Swanson, whose ranch lies about a mile northeast of town, returned yesterday from a two weeks' trip through the northwest. He saw nothing in his travels to compare with the Twin Falls tract.

A. Arthur Hanson of Lewiston, Idaho, spent several days here last week looking over the country. He was a delegate to the irrigation congress at Boise, and said that he had no intention of coming here when he left home to attend the congress, but after seeing our exhibits and knowing that we entered several of the prizes, he decided to pay a visit. He said that the half had not been told him. He said that this country was a wonder. "It is representing the Commercial Cream company, which is starting a creamery in Boise, and is endeavoring to induce the ranchmen of the state to engage in the dairy business and send their cream to his company's creamery in Boise. He is also interested in bees. Your correspondent accompanied him to the experimental farm Sunday afternoon. We were shown around by Mr. Bark, the foreman, who had just returned home from Boise, where he had been as a delegate to the irrigation congress. It took us some time to get Don away from the subject of the showing made at the congress by the Twin Falls tract and the prizes it won. It was Mr. Bark, who was in the company, to bring him to his senses and remind him that we were there to see and learn something about the Buhl experimental farm, and then he showed us and gave the information we were in search of. Mr. Hanson seemed skeptical at times, so that it was thought best to show him the records, which the foreman's duties require him to keep. This convinced the visitor. When we were in the house examining the records Mrs. Bark brought in several melons of various kinds from the garden and we did much good work about the house. Mr. Hanson left on home Monday but said he would return shortly and bring others with him.

The subject of Superintendent McPherson's lecture at the Farmers' association meeting Monday night was, "Dairying and Dairy Cattle." The lecture was very interesting and highly instructive. He said that while there are many different kinds of cattle there are but two principal types, namely, the milk and butter producing type and the beef producing type, and he showed by the correct pictures as well as words the difference between the two kinds so plainly that any one present, although he might never have seen a cow before, could pick a milkier out of a herd of beef cattle with his eyes shut. He said there was money in both types, but that none but the best would ever pay any one to keep.

Mr. and Mrs. Copeland, E. A. Milner and daughters, Professor E. A. Wyatt, Earl Knight, E. J. Louis, Mrs. Ward, Irving Ward, Miss Mary L. Hildrey, Mrs. Leslie and Mr. and Mrs. Marshall spent Sunday at Clear Lake.

For Sale. New four-room bath and plaster house, good cellar, porch in front and rear, well screened, good collar, modern built house with water works, bath, etc. Inquire of BRUNK & EVANS.

SOIL IS THE FARMER'S BANK

And it Must Be Replenished to Stand the Drain.

The farmer who with his family works a place from one season to another and produces only enough for a bare living cannot pay the taxes, with a falling condition of the soil from year to year, is either doing a poor job of ranching or something is radically wrong about his conditions. On the other hand, the farmer who while realizing no more in actual cash return each year sees his place gradually increasing in value by the addition of improvements or the growth of trees, and who is taking care to put back into the soil in one way and another more than is taken out may well calculate that he is making a success and that his profits are as sure as if a certain amount of cash were placed in the bank each month. The farmer's soil has been aptly compared to the merchant's bank account. If more is put into it from time to time than is drawn out, success is certain, but if more is taken out regularly than is put in "bankruptcy" is only a question of time. With our natural heritage of rich soil here in the west we are apt to lose sight of the importance of the question of soil, economy and to let the other fellows grow the alfalfa which we need for our stock feed and to fertilize the land from which heavy crops of beets, potatoes, wheat are being taken.—Denver Field and Farm.
