NUMBER 2

## GEM STATE REMAINS IN REPUBLICAN RANKS

Governor Gooding Elected by a Plurality of About 8,000—Legislature Will Be Republican by a Large Majority, thus Insuring Election of W. E. Borah as United States Senator—Judge Frank J. Smith Defeated—Twin Falls Gives Democratic Majority.

Cabala county gave the candidates on the Republican state and county tickets majorities varying from 350 to 500. Governor Gooding carried the county by approximately 400. Unfortunately complete returns are lacking from every precinct in the county with the solitary exception of Kimberly. For some unaccountable reason the ballot boxes were sealed in all other precincts without a memorandum of the returns, consequently the majorities of the various candidates can only be conjectured. So soon as it was ascertained that a certain ticket had carried a precinct all interest lapsed and no attempt was made to ascertain the exact vote. This will not be known until the votes are canvassed by the county commissioners next month. It is probable that the results with respect to certain offices will be very close. C. M. Price, Democratic candidate for prosecuting attorney, appears to have crowded B. P. Howells, the Republican nominee, very closely, and E. A. Walters, Republican candidate for district attorney, has a narrow majority. George A. Day, Republican, defeated John Janney, Democrat, by an estimated majority of 400, and Mr. Day's colleagues on the county ticket were victorious by about the same majority. It was an extremely difficult matter to obtain returns, and while a number of supposedly accurate reports were secured they are not official and cannot be relied upon.

The east end of the county went solidly Republican, the majority for the ticket in that section, so far as returns have been received, being 633 for Governor Gooding. The Twin Falls districts gave Chief Justice Stockinger a majority of 305. Complete returns will probably swell Governor Gooding's majority to 400. The Twin Falls tract furnished 170 surplus. It had been confidently predicted that the Republican majority here would be possibly 500, but the miserable campaign conducted by the Republican leaders on the west end turned a certain victory into an ignominious defeat. The issue on the Twin Falls tract was county division and the blundering Republican managers rendered this consummation well nigh impossible by turning the tract over to the Democrats by a sweeping majority. Chief Justice Stockinger carried Twin Falls by 230, Flaker by 24, Rock Creek by 25, Murtagh by 9, Three Creeks by 50 and Butte by 25. His associates on the ticket, with the exception of Mr. West, polled almost as heavy a vote.

Vote for Governor.  
Following are the majorities for the gubernatorial candidates in all counties, based upon incomplete returns:

County.	Gooding.	Stock.
Ada.	950	
Bannock.	950	
Bear Lake.	1,700	
Blaine.	1,500	
Boise.		
Canyon.		
Custer.	400	500
Elmore.	250	250
Fremont.	2,800	
Idaho.	250	
Kootenai.	600	
Latah.	600	
Lemhi.	150	

Lincoln ..... 60  
Nez Perce ..... 1,100  
Owyhee ..... 2,500  
Shoshone ..... 250  
Washington ..... 1,000  
Total ..... 11,900  
Net plurality ..... 8,210  
Fremont.

Early reports from Fremont county indicated it had gone some 4,000 for Gooding, but the estimates were soon changed, and it now seems that 2,500 will be about the correct figure, though it may be higher. The entire Republican ticket went through with the governor, all the legislative candidates of the Republicans being elected. In the county seat contest St. Anthony has won easily, thus settling that vexed question for at least six years.

Bligham.  
Bligham county has cast a majority of about 1,400 for Governor Gooding and elected the entire Republican legislative and county ticket. Stockinger carried Idaho Falls by 50, while Gooding carried Blackfoot.

Bear Lake.  
For the first time in the history of Bear Lake county the Republicans have made a clean sweep, electing the ticket by majorities ranging from 150 to 500. Gooding's majority will be about 1,700.

Idaho.  
Thirty-one out of 46 precincts reported in Idaho county give Nugent, Republican, for senator, 15 majority, while the balance of the Republican legislative ticket is headed by a majority of the precincts have not reported. They are small ones in the mountainous country, some normally Republican and some Democratic. It will take the official count to decide, both sides claiming the legislature.

Latah.  
Latah has positively elected the entire Republican legislative ticket. The smallest majority is 180 on Tuit for state senator.

Boise.  
With two precincts to hear from the following figures are shown: Gooding 642, Stockinger 533, French 684, Hattabaugh 740, Landson 634, Galloway 722, Burrell 642, Chaplin 748; Walters, Democrat, for senator, 824; Tinker, Republican, 630; Barry, Democrat, for representative, 766; Logan, Republican 500; Fremont Wood for district judge, 677; Cahalan, 732. The Republicans elected the probate judge and assessor and probably one commissioner.

Owyhee.  
The entire Democratic ticket in this county is elected with the exception of coroner. There are 12 precincts to hear from. Pence, Democrat, for senator, has a majority of 13 on the count so far, and Kootenai, for the house, has a lead of 10. The remaining precincts will elect both Democratic candidates.

Washington.  
There are still seven precincts to hear from. The indications are that the majority will be about as reported last night, 1,000. Galloway will have a lead of 800 over Landson, while the rest of the state ticket will have about 600 majority. The entire Democratic ticket is elected by majorities ranging from 200 to 500, excepting

that C. T. Reavis for commissioner may not have more than 100. Bryan for judge has a lead of 222 in the county so far.

Elmore.  
The majority for Stockinger in this county appears to be about 250. Barnum, for district judge, carried the county by 140. French, for congress, ran ahead of his ticket in town. H. O. Mans, Republican, for state senator, ran far ahead. The ticket and is elected. The Republicans elect treasurer and one commissioner, H. F. Skelton of Atlanta.

Canyon.  
In this county the Republicans elect A. A. Richards senator and Sam Ballantyne representative, while the Democrats got two representatives, C. W. Whiffen and J. L. Seawell. The Republican ticket for state senator, county superintendent, attorney, coroner, surveyor and probably two commissioners, Dodd and Platt, while the Democrats have clerk, sheriff, treasurer and one commissioner, Chaney. Judge Frank J. Smith, the Republican candidate for the district bench, was defeated. A bitter fight was made against him by the friends of Moyer, Haywood and Pettibone.

Lincoln.  
Three precincts are as yet unheard from, but they will not make much, if any, change in the majorities, which are as follows: Governor, Stockinger, Democrat; 55; district judge, Walters, Republican, 108; senator, Republican, 337; representative, Abbott, Republican, 81; clerk, Anderson, Republican, 247; sheriff, Jones, Democrat, 124; assessor, Wheeler, Republican, 123; probate judge, Fuller, Republican, 402; superintendent, Burnside, Republican, 376; attorney, Diney, Republican, 355; coroner, Baugh, Republican, 200.

The Republican board of county commissioners were elected by a majority of over 200. Three of the precincts are as yet unheard from, but as they only poll about 60 votes and will break about even, no change is likely to be made in the above totals. The Republican state ticket, with the exception of governor, will have a majority in this county of 100 or more.

Blaine.  
It appears from returns received from small counties in the fourth district that E. A. Walters has been elected district judge over Guy E. Barnum by a majority of 127. Barnum carried this county, having 1010 to 389 for Walters.

Complete unofficial returns on the state ticket show 520 for Stockinger and 899 for Gooding. Of the legislative ticket R. F. Buller, Republican, is elected senator and T. C. Stanford, Republican, and George A. McLeod, Democrat, representatives.

On the county ticket the Republicans elect auditor, assessor, treasurer and probate judge, the Democrats taking all the rest.

Oneida.  
Oneida county went overwhelming

ly Republican, the majorities for all candidates on the winning ticket averaging 2500.

Bannock.  
The Republicans carried Bannock county all candidates by substantial majorities. Stockinger carried probate, greatly to the surprise of his opponents.

Kootenai.  
Kootenai county gave Governor Gooding a small majority. Two of the candidates on the Republican legislative ticket were elected. The remainder of the ticket is conceded to the Democrats.

Shoshone.  
Stockinger carried Shoshone county but the Republican legislative ticket was elected. Major Woods, Democratic candidate for district judge, defeated Robert Dunn, Republican, by a small majority in Shoshone and Kootenai counties.

Lemhi.  
One Republican was elected on the legislative ticket, the Democrats taking the rest. Stockinger carried the county by a comfortable majority.

Custer.  
The Democrats make a clean sweep in Custer, electing their entire ticket.

Nez Perce.  
The entire Republican legislative and county tickets were elected in Nez Perce. Governor Gooding carried the county by a reduced majority.

Latah.  
It was nip and tuck in Latah county and the Republicans won by a narrow margin.

Ada.  
Complete returns from Ada county give Stockinger a majority of 500 and Galloway for secretary of state 537. Otherwise the Republicans swept on the heart and gave the pupils

Arkansas.  
The Democrats carried the state. An unusually light vote was cast.

Arizona.  
Incomplete returns indicate a majority against statehood. Only a few precincts have been heard from.

California.  
The Republican state central committee claims the election of Gillett for governor by a majority of 10,000. The entire congressional delegation will be Republican and the legislature strongly Republican in both branches.

Colorado.  
Sufficient returns have been received to make certain the election of Ed Dwyer made a business trip to Rock Creek Wednesday. Ernest Stratton, who sprained his ankle severely while playing baseball at school, is to be on our crutches. J. E. Henley and Gus Johnson returned from their hunting trip the day before election. They were not successful in getting any deer but did kill a few house hons.

The frame for the roof of the addition to the warehouse was raised on Tuesday and a part of the corrugated iron covering is all ready to put on. The original part of the building, which was deemed sufficiently large when it was built, is almost full now and a great many of the farmers have not threshed yet.

John Munger is completing a claim for Ed Donnores.

A. L. Desario tested a new grubber which Blacksmith Lee has just made. The machine did its work very well.

RIGHT OF WAY CASE DECIDED  
Judge Beatty Rules in Favor of the Government.

In Judge Beatty's court at Boise a decision was rendered sustaining a demurrer of the defense in a case of Richard E. Green vs. Charles Whitte, contractor in a government irrigation project in Canyon county. In this case the plaintiff asked for an injunction restraining the defendant from excavating for a canal over certain lands owned by him. An interesting question is involved—whether or not the government has a right to appropriate a right of way for a government irrigation ditch through lands which have been secured from the government since the passage of the act which expressly reserves a

## GRAIN POURING INTO KIMBERLY

WAREHOUSE FULL ALREADY AND MORE TO COME.

Many Farmers Have Not Threshed—Basket Ball Team Gives Enjoyable Dance—John Munger Purchases M. Elgner's Livery Stable.

KIMBERLY, Nov. 8.—Merritt Elgner, who has been running the livery stable here for some time, has leased it to John Munger, who took charge on the first of the month. Mr. Elgner traded his ranch on Rock creek for the Ring theater in Twin Falls and has gone there to manage the property. Mr. Munger was one of the pioneers on the tract and is deserving of much patronage, which he is well equipped to handle.

Griffith Roberts, who has been employed on Morgan Heap's ranch all summer, left on Thursday for Nampa. Willie C. Butler left on Tuesday for Spokane, Washington.

The Kidd-Daly threshers are still at work in the country southeast of here. W. P. Huxon is hauling his grain to the warehouse.

The O. S. L. engineers have accepted the grade to the warehouse and the track will be laid as soon as the material arrives.

Wilbert McCrea, who has been very ill with pneumonia and who was so low at one time that he was not expected to live, is much improved at present and is now practically out of danger.

The dance given by the girls' basket ball team last Friday evening was a grand success. It netted the team about \$20, with which they will buy equipment.

Henry Slevens, who has been working in the mines at Rock Springs, Wyo., returned home on Wednesday. The death of Oscar Olson, who had his place rented, necessitated his visit. He expects to make only a short stay.

Kimberly precinct came to the front with a nice Republican majority. Ed Dwyer made a business trip to Rock Creek Wednesday.

Ernest Stratton, who sprained his ankle severely while playing baseball at school, is to be on our crutches. J. E. Henley and Gus Johnson returned from their hunting trip the day before election. They were not successful in getting any deer but did kill a few house hons.

The frame for the roof of the addition to the warehouse was raised on Tuesday and a part of the corrugated iron covering is all ready to put on. The original part of the building, which was deemed sufficiently large when it was built, is almost full now and a great many of the farmers have not threshed yet.

John Munger is completing a claim for Ed Donnores.

A. L. Desario tested a new grubber which Blacksmith Lee has just made. The machine did its work very well.

## HANSEN TO HAVE A \$4000 SCHOOL

DISTRICT IS BONDED FOR ADDITIONAL THOUSAND.

Only One Vote Cast Against the Bonds Farmers Buy With Their Fall Plowing—Nick Smith Invests in Hoge-Towne Family Returns.

HANSEN, Nov. 8.—T. T. Rutledge spent Sunday last at Heyburn. Mrs. Gailley, mother of E. and H. Gailley, returned last Friday after spending the summer in Oklahoma. Miss Alice Koon returned home Monday last, having resigned her position as telegraph operator.

J. S. Babcock made a flying trip to Rock Creek on Tuesday.

A. L. Yates completed the burning of his brick kiln this week. He reports that the brick are excellent.

Jess-Ball and A. S. Luce started Tuesday last for a week's travel in the mountains, accompanied by C. H. Mull and F. Mitchell of Twin Falls.

Miss Nellie Haasard, who is attending school at Murtagh, spent Saturday at home.

J. B. Brower and W. R. Smith were in Twin Falls visitors on Saturday.

The farmers around here are doing much fall plowing.

Orn Rush and Frank Thompson went to the forest reserve last week, returning on Friday with wood for E. L. Ricks.

Professor J. R. Hinton has been looking after business interests in the vicinity of Flair this week.

John Hoene is excavating a cellar on his farm two miles north. Mr. Hoene moved on his farm about a month ago from northern Idaho and began at once to clear his land. He will build a house this fall.

Nick Smith purchased 36 fine pigs at Oakley last week.

F. M. Towne, wife and two daughters, who have been traveling all summer through Idaho, Montana and Washington, sold their outfit at Spokane and returned home by railroad, reaching here on Thursday last.

An election was held last Tuesday in the schoolhouse for the purpose of voting bonds for \$1,000 more for the completion of the schoolhouse. The ballot was cast by 20 bonds and 1 against. Hansen will have a \$4,000 schoolhouse. The shingling is nearing completion and the contract has been let for the plastering.

Right of way for such purposes through all lands patented after the passage of said act.

Judge Beatty recites the act of congress providing that in all patents for land hereafter taken up under any of the land laws of the United States or on entries or claims validly made under the act, west of the 100th meridian, it shall be expressed that there is reserved from the lands in said patents described a right of way thereon for ditches or canals constructed by the authority of the United States.

Reference is also made to the act of congress passed in October, 1888, which withdrew from market and from entry all lands which might thereafter be selected as suitable sites for reservoirs, ditches or canals for irrigation purposes, as well as all lands susceptible of irrigation by such reservoirs, ditches or canals. The later law amends this act so as to provide for reserving a right of way for reservoirs, ditches and canals constructed by the government.

In the case involved in this suit it is claimed by the plaintiff that as the lands involved had been entered previously to the passage of the act they were not covered by the provisions of the act, although title did not pass from the government until after the passage of the act in question.

## PLANT LIFE ON THE ARID TRACTS

### GREASEWOOD PRONOUNCED THE MOST WORTHLESS.

Sagebrush an indication of Fertile Soil—Fertile Plants Found on the Deserts—Alkali Lands and How They May Be Detected.

Three grades of desert soil have been recognized since the advent of pioneers into the arid west: (1) Land that is in itself highly fertile, awaiting only for the application of water by means of irrigation to spring into the most abundant productive use whether of grain or fruits or vegetables. (2) Land in which some greasewood is found, which is then barely capable of reclamation, and requires the careful and careful irrigation to wash out the alkali which it contains. (3) Land completely covered with greasewood or land completely barren from the presence of alkali. This land is generally considered irreclaimable.

For all but the worst of the alkaline soils, however, it appears that nature has not left us without a means of making them fertile and productive. Among our native weeds there are some peculiar growths chiefly of the pigweed and goosefoot family (Chenopodiaceae) that have the peculiarity not only of living in the alkaline soils but of extracting the alkali from them and of rendering them capable of supporting farm crops. Beets, spinach, etc., and later the grains and other vegetables will then grow, but not the peas, legumes, beans, vetches, etc., which require even small amounts of the alkaline salts. The sunflower family thrives well in alkali land, but the cultivated grasses do not.

**Sage Brush Land.**  
It has been said that the sagebrush is an indication of fertile soil and the question arose in the normal class at the university as to whether the sage itself confers a benefit upon the soil or whether it intends to impoverish a soil naturally rich. So far as present observation goes, the former proposition seems to be true; for no land has yet been reported as exhausted from its long period of sagebrush growing. This peculiar fact raises an important question: Are some plants a benefit to the soil? That is, do they enrich rather than impoverish the land on which they grow? They do—a fact made use of in the practice of intelligent rotation of crops. In the worst case, it was asked, "Why is it better to have land covered with sagebrush than entirely barren?" Different class members answered that unless the sage has been accidentally removed by fire, sagebrush land is likely to be superior to barren land for the following reasons: (1) "The land does not bake when covered by the sagebrush, and the moisture penetrates the soil and renders it loose and friable underneath, while the surface is shielded from the direct rays of the sun by the sagebrush. (2) The sagebrush increases the fertility of the soil by its annual deposit of leaves, which form a dark, rich mulch (humus) at the base of every bush, in which the sago itself often flourishes under the protection of the shaggy shrub that shelters it from the wind. (3) The ground is more moist under the sago than in land that bakes and cracks, but less moist than bare land that has a sandy or dusty surface, for the latter coverings act as shields to keep in the moisture, while the sagebrush vegetation absorbs moisture from the soil and transfers it into the atmosphere.

**Alkali Lands.**  
Land on which the greasewood flourishes represents the opposite extreme from the fertile soil found about the roots of the sages. Wherever the land has no drainage into lake or river it is likely to contain so much saline mineral matter that it constitutes what is known as an alkaline soil. Extreme samples of this kind of soil may be seen on the alkaline flats, which exist wherever land is not drained in dry countries like ours; where the annual rainfall is so slight that no great amount of water sinks into the earth through the subsoil, but practically all of the rainfall evaporates into the atmosphere, the salts in the soil are not carried off, as they are in lands drained by flowing streams. All soils contain the minerals of the rocks from which they were formed; but in humid climates the minerals of surface soil are dissolved by the falling water and carried into the brooks, thence into the rivers, and finally into the sea. Rains dissolve the salts of the soil in the dry lands also; but since the waters of the flat places do not flow off, but lie and evaporate there, the salts are merely brought to the surface and are left behind by evaporation. Alkali soils that contain soda salts beyond a certain percentage are liable to prevent the growth of vegetation, while the potash salts tend to unite with the clay soils and are less injurious to vegetation. But if the percentage of alkali can be reduced to a certain limit, all these soils will yield crops for a long period without fertilizers, for they are naturally rich in the various mineral ingredients required by plants. Of the two kinds of alkaline soils, the black alkali is more destructive to vegetation than the white. Both soils look alike. Gypsum is an aid in redeeming the black alkaline soils, and the presence of black alkali must be ascertained by experiment or analysis.

A later article will deal more fully with the subject of soils. At present the crops of the desert include only one worthless and four valuable native species, will be mentioned.

**The Native Greasewood.**  
Greasewood is the only form of vegetation that can live on some of these soils, and even this worthless shrub disappears from some of them. Our species is erect and scraggy, growing from two to eight feet high, with numerous small, fleshy, and sometimes thorny. A taproot goes down from 15 to 20 feet with lateral roots

of 8 to 12 feet. It is not worth while greasewood land.

**The Shadscale.**  
This is a valuable forage plant, and is often eaten close to the ground, by cattle. It produces an abundance of fattening seeds, has proved its adaptability to white alkali soils and will even stand a certain amount of black alkali. It is a small plant, growing from four to ten feet high, and is generally spoken of as an indicative of a good soil. It is recommended for desert planting.

**The Tumbling Saltbush.**  
One of our commonest weeds (atriplex sp.) related to the tumbling saltbush (atriplex volutans) will soon be breaking off from its stem close to the ground, and will go rolling over the land, scattering seeds like the Russian thistle, to which, in form, it bears a general resemblance. A volutans is recommended for alkali soils, but it may be rather a nuisance than a benefit, since the seeds have fallen and it rolls too far. The Utah saltbush is similar to a weedy-looking, succulent and prostrate growing plant, common in this locality. It forms a large and dense mat over clay soils, and is relished by cattle, which crop it very close to the ground. It can easily be grown on the clay and alkaline lands and affords good pasture and even fodder if cut when young. Winter fat, or sweet sage, is a half shrubby plant from two to three feet high, and will thrive on alkali and other soils. It has cottony seeds that are greedily eaten by all grazing animals, so that it is becoming scarce. It is recommended for planting.

### EVOLUTION OF THE RANGE Wild Animals Replaced by Millions of Domestic Cattle.

The total area once inhabited by the buffalo is estimated at 3,000,000 square miles. It stretched from the Llano Estacado in Texas to the headwaters of the Missouri, a distance approaching 2,000 miles. The buffalo was a migrant, being forced to abandon denuded pastures for fresh grazing, which in turn was abandoned when consumed. Thus, by an inexorable law of nature, these noble animals were kept constantly on the move, driven by an irresistible impulse. In search of subsistence. Their migrations were one of the most marvellous spectacles of the plains. Nothing stopped them, no obstacle deterred, no danger caused them to hesitate. They ranged fearlessly over the mightiest of rivers, swam with bold stroke the Red, Arkansas, the Cimarron and the Kaw, and did not hesitate when confronted by the majestic Missouri's high tide. They passed in countless herds through the ravines of the Ozarks, along the narrow ledges of intervening rivers and eventually reached the grassy valleys enclosed among the peaks of the Rockies. These vast migrations were accompanied by many losses and innumerable tragedies. Flocks of ferocious wolves followed to leap upon the cripples, to devour those too weak to follow. Woe to the calf that could not keep up with the mother. The weakling fighter or those that broke a leg in the perilous passage of streams and mountains. Only the fittest survived; only the strongest went on. Following, blowing, fighting and snorting, they swept forward with a force that made the earth tremble and a noise that awaked the mountains.

The picture above sketched was a familiar one all through the '30s and '40s and, in somewhat modified degree, far into the '50s and '60s. No one who left a written record seemed to think that the scenes of the middle nineteenth century would ever undergo material change. It did not occur to them that the same grass and supported 40,000,000 buffalo might sustain an equal number of domestic cattle. Washington Irving rode through what is now Oklahoma in the fall of 1824, under the escort of a band of United States rangers, and went as far as the Texas line through what was then known as the "buffalo hunting grounds." Experienced traveler as he was and close observer, he thought this romantic country was given over for all time to the nomads of the prairie, for the wild scene they pursued. The sanguinary Comanche and still more blood thirsty Apaches made regular raids over the Mexican border to the plains of Texas, to hunt the buffalo and lay waste such isolated white settlements as had found lodgment at that distant day. Zebulon Pike, who crossed the plains to the mountains of Colorado some years later, saw the buffalo and their Indian pursuers, saw the grass that sustained the herds but failed to see in this any outcome for what he denominated "The Great American Desert." Four years in what is now Wyoming, Idaho and Oregon, and hunted buffalo in the Horse Prairie, in the valleys of Salmon and Bear rivers, and along the borders of the Snakehead-dee, seems not to have taken the hint as to the possibilities for the future. He stock ranges which were eventually to so change the whole face of this extensive grazing ground.

Now look! The ranges of the Dakotas, Montana, Wyoming, Nebraska, Kansas, Colorado, Texas and Oklahoma, a total of about 750,000 square miles, for a long period without raising 21,000,000 head of cattle and about 6,000,000 head of sheep. They are now eating the grass that once sustained the buffalo, but when we look back to the latter herds we divide their heritage with numerous herds of mustangs, antelope and elk. It is easy to see that they needed a far wider range than they have now devoted to domestic animals. The chief point of interest, however, is the marvellous transformation that has taken place in the lifetime of many men still living. We also observe the tragedy that invariably accompanies progress, by what ruthless steps civilization is wrought out, and how evolution, though rapid and remorseless in method and cruel in results, eventuates to advantage by substituting the better for the worse, as in this instance of transferring the dominance of the plains from the buffalo to the bull—American Farmer.

## THE STUDEBAKER WAGON

Is built from first-class material down to the minutest detail. The slow-growing, fine-grained, red-fibered, white-barked lumber of New England is used in the hubs, select white oak is made into spokes and felloes and choice second growth, but cut hickory is used for the axles. Every other part is carefully selected. The skains, tough and hard, are forced into place on the axles under 300 tons pressure. Studebaker's shoulder spokes are driven into the hub under the same tremendous pressure. Best and toughest iron and steel strongly reinforces every part where needed. The Studebaker is

## The Unapproachable Wagon

and we sell it because the name is the best guarantee we can give of its excellence. We keep them in stock, and if we haven't the kind you want, in size or style, we can get one for you in the shortest possible time. We shall be glad to talk wagon to you and if you will come to we will give you some interesting reading matter about wagons.

### CURRENT WORLD.

Missionaries report that 10,000,000  
people are facing starvation in the  
northern part of Kiangsu province,  
central China. Serious disorders are  
feared.Rosa L. Fritz of New York won the  
world's championship typewriter con-  
test, writing 2487 words from dicta-  
tion in 30 minutes and making only  
five errors.In a battle between game warden  
and hunters who were slaughtering  
elk for their teeth in the mountains  
west of Pinedale, Wyo., one of the  
game wardens was killed.As a result of the separation of the  
Duke and Duchess of Marlborough  
the duke will be obliged to close Blenheim  
castle which he has maintained in  
regal fashion on the Vanderbilt mil-  
lions.Judge William H. Upton, one of the  
best known attorneys of the Pacific  
northwest and one of the first judges  
of the state of Washington, died at  
the Walla Walla hospital on Sunday  
last of heart failure.The rampant Uto Indians have  
split up into small bands and are  
eluding the military forces. They  
captured a trainload of supplies in-  
tended for the Sixth and Tenth cav-  
alry.The break in the Colorado river  
leading to the Imperial valley and  
Salton sea was effectively closed by  
the engineers at noon on Monday  
when the river was diverted to its old  
channel. It is estimated that 10 years  
will elapse before the Salton sea will  
evaporate.The United States supreme court  
has decided that Indian tribal lands  
are not community property but that  
whites who acquired citizenship by  
marriage prior to 1875 have equal in-  
terest as Indians. This decision pre-  
vents white men who have recently  
married Indian women from partici-  
pating in the lands and funds of the  
Cherokee Indians.The largest lodging house in the  
world was thrown open to working-  
men in Boston last week. It is known  
as the People's Palace and was erected  
by the Salvation Army. It is lo-  
cated in the South end at a cost of  
\$250,000. It is five stories high, has  
287 rooms, reading and social rooms,  
swimming pool and baggage room.Charles Whitney Norton, said by  
the postal and police authorities to  
have swindled the public out of \$3,-  
000,000 through spurious stock brok-  
ing, was arrested by the Chicago po-  
lice and turned over to the federal  
authorities there. Bonds, stocks,  
mortgages and other negotiable se-  
curities to the amount of \$2,000,000  
were found in his possession.Marshall Mike Glover of Kennecott,  
Wash., was instantly killed; Joe Hal-  
ley, his deputy, fatally wounded, and  
Sheriff McNeil was shot twice but not  
dangerously wounded in a battle be-  
tween the officers and burglars near  
Kennecott. Sheriff McNeil killed one  
robber and captured another; two  
were taken at Pasco and two escaped.  
The bandits were wanted for the rob-  
bery of the C. & N. P. train at  
the night of October 31.Judge John A. Marshall of the  
United States court in Salt Lake City  
has decided against the American  
Smelting & Refining Co. in the case  
brought by 400 Salt Lake valley farm-  
ers who have suffered heavy losses  
of crops and livestock from the ar-  
senic and sulphur fumes from the  
smelting plants. The court enjoined  
the smelting companies from the fur-  
ther raising or smelting of sulphide  
ores carrying more than 10 per cent  
sulphur in their plants as at present  
located. The injunction becomes ef-  
fective in 90 days.A statement issued by the recla-  
mation service shows that the nation-  
al reclamation fund on June 30, 1906,  
amounted to \$32,958,192, of which \$4,  
882,084 was contributed last year.  
North Dakota lands, having contrib-  
uted in all \$5,274,335, showed last year  
contributed \$508,865; Utah, \$70,211;  
Wyoming, \$234,744; New Mexico,  
\$202,016; Montana, \$500,746; and Ida-  
ho, \$201,474. The total amounts con-  
tributed by these states are as fol-  
lows: Colorado, \$2,478,600; Idaho,  
\$432,287; Wyoming, \$1,459,645; Idaho,  
\$2,335,934; Montana, \$2,847,433; New  
Mexico, \$731,955.

### HUGGING MATCH WITH A BEAR

Citizen of Hope, Idaho, Has a Thrill-  
ing Experience.William Nash, a cook in the employ  
of the Laclede Lumber company, at a  
camp near Hope, Idaho, is one of the  
few men who have wrestled with a  
big, black bear, been lovingly hugged  
by bruin and yet live uninjured to  
tell the tale.

"I was at work at the camp," said Nash, "and early in the afternoon I went out to cut some wood. I went but a short distance from camp, but while I was engaged in my labor a large black bear walked slowly upon me from behind and gripped me in its strong embrace. I managed to struggle about until I was facing the bear. I made several attempts to release myself from the bear's grip, but all were futile. I then tried the same tactics as the bear. I threw my arms as far around the brute's body as they would reach and heartily reciprocated bruin's affectionate hugs. Finding that I could not free myself in this manner, and as the bear was fast pressing the breath from my body, I bethought myself to cry for help. AId came at once and the bear was shot while still holding me in its embrace.

"Although I escaped unharmed, I do not care to participate in any more hugging affairs with bears."—Spokane Spokesman.

If you want to file on 160 acres of Carey land, which will cost you \$250.00 per acre, under the Marysville canal system, write Clinton-Hurt & Co., Ltd., Boise, Idaho, for information.

### STATE NEWS.

The coal situation in Boise is grow-  
ing worse and presents a grave neces-  
sity for immediate relief.The Oregon-Short-Line has raised  
the wages of its telegraph operators  
\$2.50 to \$5 per month.While endeavoring to retrieve a  
duck which he had killed, Francis Ko-  
vone of Montpelier was drowned in  
Bear river.Tom Johnson, who was charged  
with forgery, and Billy McGinniss,  
who was accused of robbing the rail-  
way section office at Cliff, escaped  
from jail at Mountainhome last Sun-  
day night.The case of Charles M. Brown and  
others against the Federal Mining  
Co. in which the plaintiffs sought to  
restrain the company from further  
damaging lands along the Goeur  
d'Aigne river, has been dismissed by  
Judge Berry in the district court at  
Boise. Lands near Kellogg were  
involved. The court held that the  
action had not been instituted  
until "three years after the damage  
had been wrought and was therefore  
invalid.

### WORD FROM COMMANDER PEARY

Is Received by President Jesup of  
the Peary Arctic Club.

"That Commander Robert E. Peary encountered unusual difficulties in his search for the north pole was indicated in a telegram received November 3 by Morris K. Jesup of Lenox, Mass., president of the Peary Arctic club. Buffeted about in a field of ice, his ship without coal, his dogs poisoned by impure food and a portion of the interior of the vessel torn apart to provide fuel for the explorers, were some of the trials Commander Peary was forced to face. The most significant portion of the telegram, however, was that containing an intimation that Commander Peary would again try to find the north pole. The telegram follows:

"Hopedale, Labrador, by way of Tullagait, Newfoundland—Steamer Roosevelt now here. Repairing rudder and stern, taking ballast and awaiting arrival mail steamer to secure coal. Expect to communicate again from Chapeau bay. All pro for our safety and give no credence to exaggerated reports. Roosevelt is carrying this year for additional supplies and for repairs. Several tons of whale meat and dog food thrown away last fall after poisoning a number of dogs. Other supplies lost by melting of ice in April.

"Mr. Jesup declined to comment on the telegram, stating that it speaks for itself.

### BEAR HUNTERS TOOK TO TREES

Big Cinnamon Loped in Their Camp  
and Put Them to Flight.Frank H. Cooney, C. P. Drannah of Butte and C. M. Melvin of New York City have just returned from a hunt-  
ing and prospecting trip through the  
Salmon river section of Idaho, visit-  
ing the Lemhi valley, Junction and  
other points of interest, says the An-  
conda Standard.The entire party had the scare of  
their lives a week ago when they were  
camped at the head of Junction creek,  
where they had been directed with the  
assertion that a big cinnamon bear  
that had never shown anything but  
contempt for hunters made his home.  
All three of the visitors were deter-  
mined they should have his hide for a  
robe before they returned to civiliza-  
tion.

Arriving at the place where they  
said old cinnamon made his headquar-  
ters, the party camped in the timber  
at the edge of a swamp which plain-  
ly showed it had been used regularly  
during the summer and fall as a bear  
wallow. The members of the hunting  
party sat about their campfire until  
late at night, swapping hunting tales  
and planning their mode of attack  
upon old cinnamon the following day.  
The air was cool and bracing and the  
camp kettle stood steadily, remind-  
ing them often how good hot toddy  
tasted, and when finally they retired  
to their couch beneath the stars,  
which peeped around the shade of a  
big fir tree, they were happy and free  
from all care and were soon in dream-  
land.

Evidently old cinnamon had been  
watching from a safe distance for  
just such an occurrence, for it is re-  
corded that the hunters had scarcely  
reached dreamland before he was  
prowling around in the glare of the  
campfire and sorting out everything  
that was edible in the camp. He  
boiled all of the grease which he found,  
halved the frying pan clean and bit  
holes in the coffee pot in his effort to  
secure all of the nutriment possible.  
Then he turned his attention to the  
three hunters, not at all deterred and  
after they had fled panic stricken to  
nearby trees, he took advantage of  
their warm place and camped for the  
night, while the hunters shivered and  
sweat in terror and in light attire at  
the top of the nearest tree. When  
daylight came old cinnamon snuffed  
sneeringly at the foot of each tree  
which held a man for a while and then  
troited off to the timber, confident  
that he would no longer be hunted  
by this bunch of hunters at any rate.

Having rented my farm, I wish  
to sell at private sale all my  
thoroughbred Berkshire hogs,  
consisting of brood sows and  
young pigs—also a full line of  
farm implements and household  
goods.

ing Company, Twin Falls, Idaho.Entered as second-class matter, December 12,  
1894, at the postoffice at Twin Falls, Idaho, under  
the Act of Congress of March 3, 1879.

## COUNTY DIVISION.

The Twin Falls tract is placed in an embarrassing plight on the county division question. It will be obliged to go before a Republican legislature and a Republican governor with a request to create a county which would seem to be Democratic if Tuesday's returns are taken as a criterion. It would be unfair, however, to judge the tract by this vote. Practically no effort to carry the tract was made by the Republicans. They did not wake up until a few days before the election, when it was too late to offset the earnest work performed by the Democrats. If the county is not divided the people can thank Boyd, Sweeley, Chamberlain, et al. They were uneasy from the beginning and never raised a finger in support of the ticket. Self was all they cared for and in order to gain their ends they knifed the party they were supposed to support. Fortunately for Twin Falls and the tract their treachery was known long prior to the election and Governor Gooding will not, it is to be hoped, make this end of the county suffer for the misdeeds of a few knuckers. Senator Day has announced that he will carry out his pledge and work to the best of his ability for county division, regardless of the slap administered to him in Twin Falls. To be consistent Mr. Sweeley should get out an injunction or seek a restraining order preventing the legislature from dividing the county and locating the county seat in Twin Falls.

Lost—542 Republican votes bearing the brand of M. J. Sweeley.

The popular hymn at Locust: "There were ninety and nine that safely lay."

Among recent inventions is a pie making machine. It will never become popular in the household because few men would have the temerity to bring one home.

The voters of Filer and Maroa apparently heeded Mr. Sweeley's advice to vote their convictions, especially after he had told them he did not agree with the Republican party on the Mormon question.

Cable dispatches from England state the Duke of Marlborough, who is deprived of the use of the Vanderbilt millions by reason of his separation from the duchess (formerly Consuelo Vanderbilt), will be obliged to close Blenheim castle. These millions, which were earned by honest American workmen, have been squandered recklessly by the British peer. Disclosure in the Castellane divorce case show how the millions which Jay Gould wrested from Western Union, Missouri Pacific and other employees in the corporations which he controlled, and in some instances wrecked, have been dissipated by the profligate French nobleman. Some public spirited citizen should start a correspondence school for American heiresses in order that they may be taught the principles of patriotism.

It is such inexcusable conditions as the present coal situation that breed socialism and anarchy. That people who are able and willing to pay for fuel should be compelled to suffer for the lack of it because of an infamous combination is a disgrace to civilization. The only tangible result of the recent coal investigation in Utah is that the railway companies no longer collect for the value of the coal in addition to the freight charges. The coal companies now condescend to do on sufficient individuality to do their own collecting. The investigation showed where the evil lay but it did not provide a remedy. Meanwhile the people of Idaho will beat their breasts and stamp their feet until the powers see fit to permit them to have a little of the wealth which the Almighty placed in the bowels of the earth for the benefit of all mankind.

There are living residents of Chicago who can remember when a bag

of two or three chickens could be brought in without traveling more than a mile from the village limits. A half-century ago the prairies of Illinois were alive with game of all kinds. Settlers and the lack of adequate protection, have made most of the feathered tribes almost extinct.

The state game commission, headed by Dr. Wheeler, a sportsman as well as a politician, has undertaken to re-populate the prairies with game birds. Branch preserves are being started and the land is being promoted for propagation. The commission has just distributed, for free supply, 20,000 handsome golden pheasants, the only game birds which will multiply and to see that they do not lack food in cold weather.

Our progressive game commission is already receiving an annual revenue exceeding \$100,000 from hunters licensed under the new game law. This revenue is being applied to propagate quail, prairie chickens, pheasants, geese, turkeys and other game birds. The deputy game wardens are now placing thousands of young birds with responsible farmers who will guarantee ample protection. The supply of game birds within the next few years, will measurably restore Illinois' former prestige as a paradise for hunters. Under strict regulations the mistakes of the past will be avoided.

Game culture and forestry are twin sciences, and the state that wisely nurses both is repairing the waste caused by rapid settlement. The stocking of lakes and streams with game fish, gives tardy evidence that the people of Illinois are alive to the duty of restoring in some measure nature's wealth.—Chicago Journal.

What has happened in Illinois will happen in Idaho if steps are not taken to preserve the game. The creation of game refuges or havens is the only feasible remedy. There are several localities in Idaho which could be set aside as havens without impeding the growth or settlement of the state in any way. One of the most feasible is the breeding ground of the sage hens and ducks in the southwestern part of Cassia county. The legislature will be asked to establish a haven there, which could be maintained without expense to the state and would give the sage hens much needed protection.

According to reports brought by Representative E. J. Hill of Connecticut, who has been in Europe during the summer investigating the free alcohol industry in continental countries, it does not sound probable that the alcohol in wash boilers from the refuse of the farms and such decayed fruits and vegetables as cannot be marketed. Mr. Hill says there are 70,000 farm distilleries in Germany, many of them being very small.

Governor Folk of Missouri says: "I do not believe in the mail order citizen. If a place is good enough for a man to live in and make money in, it is good enough for him to spend his money in. No merchant can succeed without advertising one way or another. Patronize your home papers, both job work and advertising, build them up and they will build your town up in increased trade and greater opportunities."

## ELECTION NEWS.

(Continued from Page 1.)  
Cummins will carry the state by 20,000 plurality. The Democrats' opponent, Porter, Trancik and Hamilton.

Indiana went Republican by over 100,000. The Democrats gained two congressmen in Chicago and two down state. James T. McDermott, A. J. Sabo, R. P. Jones, M. B. Forney, being the successful candidates. Speaker Joe Cannon was re-elected by a tremendous majority. The legislature will be asked to take action on the re-election of Senator Cullom.

Both sides claim to have a majority for governor. E. W. Hoch, the Republican candidate, has a slight lead but the Democrats claim the election of William Harris by a majority of 2500. The entire Republican state ticket was elected. Big Democratic gains were made on the legislative ticket but the legislature will still be overwhelmingly Republican.

Governor Beckham appears to have won his fight against Senator McGroarty for the senatorship by about 4,000.

Massachusetts.  
Gould, Republican, was elected governor. The Democrats won 62. The political complexion of the legislature is unchanged.

New Mexico.  
Incomplete returns from 25 counties give statehood a majority of 5,900.

Revised returns, some of them based on estimates, indicate a plurality of about 135,000 for Hughes above the Bronx. This would make his plurality in the state about 50,000. Corrected figures from Westchester county for Hughes make up most of the difference from the former estimate of Hughes' plurality. Republican plurality in Albany, Columbia, Cortland, Erie, Madison, Montgomery and Oneida show Bruce, Republican, for lieutenant governor, about 700 ahead of Hughes. On the basis of 15,000 state plurality for Hughes, this would seem to show Bruce's election by a narrow margin, but as the Democratic candidates for the other state offices ran ahead of their tickets, they appear now to be elected. All the Dem-

ocratic state candidates ran far ahead of William R. Hearst in Greater New York and their pluralities of approximately 140,000 over their Republican opponents, may have the effect of coming the Republican lead in up-state counties.

North Carolina.  
The latest returns indicate that the Democrats have made large gains in North Carolina. At least 1,000 over Parker's vote two years ago. North Carolina will send a solid Democratic delegation to congress.

North Dakota.  
The defeat of Governor Searles, Republican, by the Democrats, is expected by the Republican state central committee, also the defeat of John Kanuf for supreme judge. The remainder of the Republican ticket was elected.

Oklahoma.  
The Democrats will have a large majority in the legislature. The Republicans are only assured of 10 delegates from Oklahoma and 10 from Indian Territory, while the Democrats have 103. Republican leaders attribute their defeat to prohibition, to which they were pledged.

Pennsylvania.  
Edwin S. Stuart, Republican, is elected governor by a plurality of over 50,000.

Porto Rico.  
The Unionist party scored an overwhelming victory, carrying all seven districts.

Rhode Island.  
James H. Higgins, Democrat, has been elected over George H. Utter, Republican, by a small majority. The legislature will be Republican.

Utah.  
The Republicans carried the state, electing all but two members of the legislature. The American party carried Salt Lake City, but lost the county. The entire Republican county ticket was elected, the Democrats polling an exceedingly light vote.

Nebraska.  
The Republicans will control both houses of the legislature, insuring the election of Norris Brown to succeed Senator Millard.

Hawaii.  
J. K. Kalamann, Republican, has been elected to congress. The territorial legislature will be Republican.

South Dakota.  
Crawford, Republican, will have a majority of about 25,000 for governor. The Republicans elected 112 members of the legislature and the Democrats 17.

Tennessee.  
Incomplete returns indicate the election of Patterson, Democrat, for governor by 15,000 over Evans, Republican.

Texas.  
The Democratic state ticket was elected by 200,000 majority. The Democrats elected all of their congressmen.

West Virginia.  
Incomplete returns assure the election of a Republican legislature.

Washington.  
Complete returns from all of the 210 precincts in King county, which includes Seattle, give the following results on congressmen: Humphrey, Republican, 12,833; Jones, Republican, 12,501; Cushman, Republican, 12,568; Blackman, Democrat, 4,709; Burns, Democrat, 4,403; Estelman, Democrat, 3,903.

A governor was not elected this year, but the vote for supreme court justice was as follows: Mount, Republican, 22,112; Dunbar, Republican, 12,238; Crow, Republican, 11,738; Root, Republican, 12,137; Hodgdon, Democrat, 4,552; Millon, Democrat, 4,150; Tolman, Democrat, 4,379; Sweeley, Democrat, 4,738.

Returns from outside counties are coming in slowly, but all reports confirm last night's announcement that the Republican victory was general throughout the state.

Every Republican candidate on the ticket in King county was elected, excepting one senator and one representative. Pierce county, the next largest in Washington, went solid Republican.

Wyoming.  
Republican majorities for congressman Mondell and all state candidates are from 5,000 to 6,000. Governor Brooks is running ahead of the ticket and has carried every county but Tremont, the home of the Democratic candidate, Keister. The Democrats will not have more than five members in the legislature and the re-election of Senator Warren is assured.

Wisconsin.  
Incomplete returns indicate the election of Governor Davidson, Republican, by at least 60,000 plurality. The Democrats operate a tight ship in the defeat of Jos. W. Babcock. The legislature is overwhelmingly Republican.

The election of McGovern, Independent Republican, for attorney general is conceded.

Minnesota.  
Governor Johnson, Democrat, has been re-elected by a plurality of 60,000. The remainder of the state ticket is Republican. The Democrats made some gains in the legislature but a Republican successor to Senator Nelson is assured.

Mississippi.  
The Democrats swept the entire state by a large majority.

Missouri.  
The Democrats have carried the state by approximately 10,000, electing all candidates on the state ticket and 12 out of 16 congressmen.

New Hampshire.  
Returns indicate conclusively that the contest for the governorship will have to be fought in the legislature. The Republican candidate, Charles M. Boyd, having made it secure a majority over the other two candidates. The Republicans lost over 5,000 votes.

New Jersey.  
The Democrats will control the house of representatives by two majorities. The Democrats will have a majority of seven on joint ballot. The Democrats gained three congressmen.

Carey lands at Marysville, Idaho. For full particulars write Clinton Hurlt & Co. Ltd., Boise, Idaho.

Government Lands.

Every American citizen should avail himself to use his rights under the Carey act.  
The best values in the west for the money are under the Marysville Canal & Improvement system in Fremont county, Idaho, where land and water costs a total of \$20.50 per acre, with the payment privilege extending over a period of ten years.  
The quality of the soil is unexcelled. It is, however, particularly adapted to the growing of grains, grasses and sugar beets. The canal system is now complete and a large acreage has been opened for entry.  
Avail yourself of the opportunity to secure a good piece of land. For further information address  
CLINTON-HURTT & CO., Ltd., Boise, Idaho.

To avoid moving our heavy hardware to our new store, we are offering 10 per cent discount on all heating stores and ranges.

## Merchants Life Association

Question—What is the object of the Merchants Life Association?  
Answer—To furnish life insurance to its members at actual cost.  
Question—What is the plan?  
Answer—Strictly mutual, a conservative method between order and assessment and the old line insurance. Cheaper than fraternal. No local lodge dues to pay.  
Question—When do you insure?  
Answer—Men and women between the ages of 18 and 50 who can pass a first-class medical examination.

W. M. KUNKLEY,

State Manager, Pike Bldg., Phone 29, Twin Falls, Idaho.

## BREVITIES.

The mother, sister and nephew of Building Inspector Zell arrived from Iowa this week to make their home with Mr. Zell.

The Ladies Aid society of the Presbyterian church will meet for sewing with Mrs. E. W. Davis, Wednesday, November 14, at 2 p. m.

John Janney left last evening for the east, where he will make an extended visit. He expects to return to Twin Falls about February 1.

E. Ruffin Jones will conduct Episcopal services at the Commercial club room, Sunday, November 11, at 11 a. m. and 7:30 p. m. All are cordially invited to attend.

Mrs. Poland will conduct the W. C. T. U. silver medal contest at Filer on Friday evening, November 16, at 8 o'clock. Six candidates are entered in the contest and spirited competition is expected.

C. St. George has moved to the Gulick ranch on Sucker flat, which he has rented for a year. This is one of the finest ranches on the tract and Mr. St. George will make it a big producer.

W. C. Williamson, who brought a carload of high-cow to Twin Falls this week, reports the sale of 11 cows at prices varying from \$35 to \$80. As a rule the farmers have plenty of pasture and turning it to good account.

O. B. Olson, who was stabbed by W. R. Taylor at Kimberly on October 25, died on the morning of November 7. The funeral took place on Tuesday, interment being in the Twin Falls cemetery. The aged parents of Mr. Olson journeyed a long distance to attend the obsequies.

The Knights of Pythias hall was opened Tuesday night for a social dance and about 50 couples were present. The election returns were carried up from the Commercial club and read between dances. It was the prettiest parties of the season and continued until an early hour Wednesday morning.

On Tuesday afternoon Mrs. Barrett entertained at 500. The guests were Mesdames Alkon, Tush, Perrine, Williams, Hayes, Booth, Mitchell, Ball, Baker, Glover, Pike, McCollum, Kunkley, Boyd, Misses Chamberlain, McCollum and Christman. The prizes were beautiful hand painted pieces of china.

C. M. Lewis of Butte, Mont., was in Twin Falls yesterday investigating the potato market. Mr. Lewis purchased a carload of onions and a mixed car of vegetables. He is in the market for potatoes. He is in the market for potatoes. He is in the market for potatoes.

Mrs. Dunn entertained at "500" Tuesday evening for a jolly party. The ladies who were trying to find out how the election resulted. The ladies had the satisfaction of seeing the prizes distributed. Mrs. Dunn was the hostess. The ladies had the satisfaction of seeing the prizes distributed.

The many friends of Major Fred R. Reed will regret to learn that his father, Frederick Reed, died at the old home in New York on Sunday last at the advanced age of 82 years. Mr. Reed was a man of great character and a devoted father. He was a man of great character and a devoted father.

The closing of the gates at the Mindoko and Miller dams drained the Snake river to such an extent that thousands of fish were left stranded in pools and ponds. The fish were left stranded in pools and ponds. The fish were left stranded in pools and ponds.

Robert-Rogerson, Louis Camp and Warren Hutchinson came in from Three Creek on Thursday. They report the road west of Warm creek in good condition. They also called attention to the need of a cut-off from the high line canal to the Salmon river. They also called attention to the need of a cut-off from the high line canal to the Salmon river.

Last Friday evening Miss McCollum gave the first of a series of entertainment at her home on Shoshone avenue. "500" was played. Stuart Taylor winning the first prize and Miss Robinson the consolation. Beautiful refreshments of all colors (Twin Falls products) added to the beauty of the entertainment. Those present were Mr. and Mrs. Stuart Taylor, Mr. and Mrs. Messers, Bedford, Stalker, Nixon and Fuller. The next of the series will be given this evening.

John M. Maxwell, cashier of the First National bank, leaves Saturday for Canton, Ohio, where he will be married to Miss Fox on November 10. They will have a honeymoon in Ohio and then return to Twin Falls, where they will reside in the home built this season by Mr. Maxwell. Maxwell is most popularly remembered by many of our citizens who met her last summer, and Mr. Maxwell is one of our most popular business men. A cordial welcome will be extended to the young people on their return.

Mrs. D. Brown Levers arrived today from Boise, where she had been visiting.

Mr. Farley is completing a comfortable and attractive home on block 14, Fourth avenue.

Mrs. Helen C. Shank left on Wednesday for Lodi, N. J., where she will spend the winter.

P. J. Lynch of Buhl left yesterday for the Nevada mining district, where he will spend the winter.

W. A. Babcock is building a handsome residence on the corner of Seventh street and Second avenue.

The walls of the Twin Falls hospital building are up above the second story and very satisfactory progress is being made.

The Stober-West Co. will soon be able to move into their own building on the south side of Main street. Record time was made on the construction work.

Berry & Swank have completed the plumbing of Alex McPherson's residence on Blue Lakes boulevard. McPherson has a modern residence, equipped with all up to date conveniences.

The Shober & Hyer building on the eastern corner of Ninth and Main streets is a fine building. It is one of the best constructed buildings in the city and a conspicuous ornament to the town.

At a meeting of the board of village trustees on Thursday evening it was decided to reduce the saloon license to \$1000 a year, payable semi-annually in advance. An ordinance making the reduction is now being prepared and will be passed at the next meeting.

John Kerr has purchased the Fox building on Main street, the ground floor of which is occupied by the Bedford Drug Co. Mr. Kerr also has a valuable farm. He has great faith in the future of Twin Falls and does not hesitate to back up his judgment with his pocketbook.

In response to the call for a meeting of those interested in the survey made for the new water works, Mr. Alexander H. Hoes, a well known farmer of Twin Falls, was found dead in his bed on Thursday morning. He was in his usual good health when he died on Wednesday night and his death was a terrible shock to his relatives and friends. Mr. Hoes was 74 years of age and was born in Lansing, Mich. He is survived by his daughter, Mrs. George H. Darrow. The funeral occurred this afternoon. Rev. W. H. Parker officiating.

In last week's issue mention was made of a party given by Mrs. Steele which was said to have been in honor of the young ladies who were to be married. This was incorrect and the result of confusing Mrs. Steele's party with that given by another lady. The party at Mrs. Steele's was in honor of her husband's birthday and was one of the most delightful surprises imaginable. Mrs. Steele was delightfully kept at home until morning and when he returned to find his house magnificently decorated and his friends waiting to join him in a birthday dinner. It was a happy conception and was carried out with grand success.

Miss S. Belle Chamberlain of Twin Falls, who was elected state superintendent of public instruction on the 10th ballot, is the guest of Mrs. Tush, who will entertain in her honor tomorrow afternoon. Miss Chamberlain came to Twin Falls to cast her ballot and she was the recipient of many hearty and well deserved congratulations on her victory. Miss Chamberlain has always shown great pride in her Twin Falls school and it is safe to predict that she will watch them closely during her administration. Her election was a high compliment to the school and a just reward for capable public service.

John F. Wilson, managing editor of the Pacific Monthly, is visiting the tract this week. Mr. Wilson said that he had heard so much of the Twin Falls country that he got the sage-brush fever and decided he must come and see the place. He was here for a few days and he was very much pleased with the country. He was very much pleased with the country. He was very much pleased with the country.

D. W. Ross, engineer in charge of the government reclamation work in Idaho, accompanied by P. C. Horn, who is directing the work on the Boise-Payette project, and Arch M. Gilbert of the geological survey, arrived in Twin Falls on Wednesday afternoon. They visited the Twin falls and Shoshone falls, taking a number of photographs and measuring the flow of water which is now the lowest on record, because of the complete closing of the gates at Mindoko and Miller, and the absence of rain in the Twin Falls area. It would take at least 10 days more to raise the water high enough at Mindoko to turn it into the main canal. While the gates will be kept tight down at Miller.

Chief Justice Stocklager, Judge K. I. Perky and Miss Permyel French of Boise, arrived in Twin Falls last Saturday and participated in a round robin Democratic meeting at the theater on Saturday evening. The chief justice was met at the depot by a large delegation of local Democrats, headed by Mr. Horn, who is directing the work on the Boise-Payette project, and Arch M. Gilbert of the geological survey, arrived in Twin Falls on Wednesday afternoon. They visited the Twin falls and Shoshone falls, taking a number of photographs and measuring the flow of water which is now the lowest on record, because of the complete closing of the gates at Mindoko and Miller, and the absence of rain in the Twin Falls area. It would take at least 10 days more to raise the water high enough at Mindoko to turn it into the main canal. While the gates will be kept tight down at Miller.

Mr. and Mrs. Louis Booth are here from Twin Falls for a visit with relatives and friends. They intend to remain during the winter. Paris, Idaho, Post.

Miss Lillian Stakel was married Wednesday evening to Daniel F. Faine by the Rev. J. H. Schenck at the home of her father. It was a family wedding with only the immediate friends present.

James Whitcomb, a recent arrival from Canada, died at the home of his daughter in Twin Falls on Tuesday morning. He was 95 years of age. The funeral occurred on Thursday. Rev. C. B. Evans officiating.

W. R. McMillan of Butte came in on Monday with a bunch of 52 cattle owned by himself and MacRae and Reardon. The cattle were turned into pasture here and will be shipped east as soon as cars can be obtained. They are in fine condition.

Joe Stewart and Will Powderly came on Sunday from the Shoshone ranch at Rock Creek, where they are located. They were accompanied by a brief visit with friends they "liked" back to the ranch on Monday.

By the accidental discharge of a 22-caliber rifle Clarence Falchid sustained a wound in the leg on Tuesday evening. Prompt surgical attention removed all danger of complication and he is none the worse for his experience.

C. E. Baird, proprietor of the second hand store in Twin Falls, died on Friday morning aged 56 years. The funeral will take place from Hunt's undertaking parlors on Sunday afternoon at 2 o'clock. Rev. J. H. Schenck will officiate. Mr. Baird was married by a large family to whom public sympathy is sincerely extended.

The State Land board has made application to the United States land office at Hall's for the patents for some 20,000 acres of land on the Twin Falls tract. This is the fourth application. It is expected that the next will cover all the balance of the lands under the segregation on this side of the river. After the application has been duly advertised it goes to the general land office for action, which is merely a matter of form.

Alexander H. Hoes, a well known farmer of Twin Falls, was found dead in his bed on Thursday morning. He was in his usual good health when he died on Wednesday night and his death was a terrible shock to his relatives and friends. Mr. Hoes was 74 years of age and was born in Lansing, Mich. He is survived by his daughter, Mrs. George H. Darrow. The funeral occurred this afternoon. Rev. W. H. Parker officiating.

Purished room with breakfast if desired; bath and home comforts. Inquire at office, Idaho Department store.

## FOR INFORMATION OF FARMERS

State Board of Horticulture Will Issue Valuable Report.

Superintendent McPherson returned on Tuesday from Moscow, where he attended a meeting of the state board of horticultural inspection. The meeting was especially interesting for the reason that the board decided to issue a general report for distribution throughout the state and which can be used as a reference book wherever agriculture is being taught in the public schools. This report will be of vital interest to the farmers, for it was intended to be primarily intended. It will contain chapters on soils, geological conditions in different portions of the state, air and water drainage, the general lines, or lines of heat and cold, kinds of trees to plant and how to plant them, cultivation and care of orchards and gardens, insect pests and fungus diseases, spraying for fruit diseases, harvesting and marketing of fruits, commercial importance of the orchard industry, irrigation and several chapters on agriculture in general, including stock and wool growing. The state will be divided into sections and each section will be treated separately by a different expert being made of the progress in agriculture and horticulture. Superintendent McPherson has been assigned the Twin Falls tract, which will be covered minutely. The report will be carefully edited by Professor J. M. Aldrich, professor of biology in the state university, and will be issued under the edited authority of "International" to put upon all such subjects. This report will be supplementary to the biennial report which will be submitted to Governor Gooding by the board at the end of the present year.

The treasurer's report showed a balance on hand to date of \$2,953.68.

## AMUSEMENTS.

On Wednesday, Thursday and Friday of next week the Kempton Comedy Co. will be seen in repertorial at the Ring theater, Twin Falls. The Kemptons are now in southeastern Idaho playing to packed and winning high-prize for their splendid entertainments. One of their best pieces this season is "The World," a stirring melodrama which has been exceedingly well received wherever played. The Kemptons will have the local stage especially prepared for their productions and will give Twin Falls the best staged and finest acted drama this city has ever enjoyed.

BY W. C. T. U.

AT THE HOME OF MRS. LORAIN IN FILE.

Christian Citizenship Meeting Proves Very Enjoyable and Instructive—Location of Railway Depot at West Filer Asked For.

FILER, Nov. 6.—Mr. Houk, father of our blacksmith, is here making a visit and is accompanied by his son and family from Colorado. They expect to make this their future home.

The Menonites have erected a small parsonage and Miss Myers, their pastor, has moved into it.

The Water company is enlarging its mains in this locality and several of our people are employed in assisting.

Mr. Beck, from Utah, is here. He is interested in some of our real estate.

Miss Florence Carnahan has gone to Boise and expects to be absent some time.

The right of way for the railroad is being cleared.

A very large petition has been secured to be forwarded to the railroad company praying for the location of the depot in West Filer.

A very pleasant gathering occurred on Tuesday evening, October 30, at the home of Mr. and Mrs. Lorain, the occasion being a Christian Citizenship meeting conducted by our local W. C. T. U. The Scripture reading, and songs were in accord with the chosen text of the evening. Mrs. Lisk gave a select reading, which was followed by a song, "When All Christians Shall Voice as They Pray." A paper on Christian citizenship was read and followed by a question box and general discussion in which nearly all took part. The questions were answered ably by the president of the union and Lafayette Davis. After the program refreshments were served, and all went home refreshed.

This should be the last W. C. T. U. meeting to which gentlemen are invited.

The Grain-Bags-Grain-Bags. The Pioneer Storage & Commission Co. has just received a carload of wheat and oats sacks.

To avoid moving our heavy hardware to our new store, we are offering 10 per cent discount on all heating stoves and ranges.

SPOT-HARD-WEST HWY. CO., Opp. McCormick's Bank, Main Street.

## MONDAY EVENING'S RECITAL

Promises to Be a Most Delightful Entertainment.

Live-interest is being manifested in the recital to be given in R. P. hall on Monday evening by Mrs. W. O. Taylor, Miss Myrtle McManis, Miss Ella Robinson and Boyd Fuller. It will be the first opportunity the public will have of hearing Mrs. Taylor and Miss McManis at their best and the active demand for seats proves that the people of Twin Falls appreciate good talent. Mrs. Taylor is considered to be the peer of any soprano in the state and Miss McManis is rapidly forcing public recognition as a superior pianist. Mrs. Taylor is considered to be the peer of any soprano in the state and Miss McManis is rapidly forcing public recognition as a superior pianist.

Marysville Canal Complete.

Public announcement has been made that the Marysville canal system is now complete and the lands are now open for entry.

These lands are located in Fremont county, south of the city of St. Anthony, and in a territory famous for the production of enormous crops of oats, rye, barley, alfalfa, clover, timothy, and many varieties of hardy fruits.

The total cost of land and water is \$20.00 per acre, a price that is remarkably reasonable and perhaps the last really cheap water right that will be offered in the state. Payment privileges are granted extending over a period of ten years, so that any American citizen 21 years of age can avail himself of the opportunity to secure a good piece of land.

Particular lands under this canal system which were improved this year are refusing \$75 per acre. Where can you equal it? Write us for particulars. CLINTON-HURT & CO., Ltd., Boise, Idaho.

# TREATMENT OF SEED CORN

Results of Experiments Made by the Experiment Stations.

The proper care and handling of seed corn after its selection is a very important part of its preparation for use. The low vitality of seed corn is frequently shown in the spring when the germination tests are made. In many cases, to improper handling and storing during the fall and winter months. The stand, the thriftiness of the plants, and, in consequence, the yield of the next year's crop depend so largely upon proper storage, and so much time and labor have been spent in the selection and gathering of seed corn, that it is not surprising to find that the seed corn is the most important and most valuable part of the season's production is equivalent to inviting a financial loss. The care given to seed corn is the most remunerative work on the farm.

In connection with experiment station work for a better stand of corn and a higher average yield the subject of storing seed corn has received the attention commensurate with its importance. During the past two seasons the low station examined a large number of samples of seed corn secured from different parts of the state and found that, on the average, the samples fell far below the standards of vitality. The corn had apparently dried out well in the fall, and that a large percentage of it should have been killed by spring was not at all surprising. However, it was found that often one ear was good and the very next one poor; one side of an ear alive and the other dead; and frequently one kernel on an ear would grow while the next one to it would not. This condition is considered as probably due to slow, imperfect ripening and insufficient drying in the fall to proper storage during fall and winter, and to unusually cold weather late in November and early in December, which killed or weakened the germs by freezing the kernels while they still contained considerable moisture. The seed corn that has been stored in dry and well ventilated places before October 20 was found to be in good condition. When first gathered seed corn frequently contains about 25 per cent of moisture, but shrinkage or drying in the fall to proper storage during fall and winter, and to unusually cold weather late in November and early in December, which killed or weakened the germs by freezing the kernels while they still contained considerable moisture; and where the greatest care was not taken to store the corn under most favorable conditions the vitality was largely reduced.

During the last season more than 3,300 samples of seed corn from different parts of Iowa, such samples being made up of 100 ears of seed corn, were given careful germination tests at the station with the result that about 60 per cent of the corn showed sufficient vitality for field planting, while approximately 20 per cent gave a weak germination and the rest did not germinate at all. It is obvious that if the imperfect stand and an inferior crop must result from the use of seed corn of which only about 60 of each 100 kernels are capable of producing normal plants. Attention is called to the fact that weakened kernels, although giving a fair germination, often fail to grow if the weather conditions are unfavorable and are very favorable, and that in any case a weakened seed kernel is likely to produce a weak plant. T. L. Lyon of the Nebraska station found that seed corn put in an ordinary crib and stored there over winter showed in a field test the following spring only 70 per cent germination, while some of the same crop stored in a dry seed room showed 90 per cent.

With this experience and these results in view, P. H. Holden of the station recommends that seed ears be selected and harvested not later than October 15 to 20, and immediately hung up in an open shed where the sun can not reach on them, but where they are otherwise kept the best possible conditions for drying out quickly and thoroughly. The plan suggested is to tie eight or ten ears to a string with binding twine or to tie them together in pairs, and to hang them on wires or strips put up for the purpose. Seed corn hung up in this way is largely out of danger from mice and rats and usually dries sufficiently in about two weeks to be taken down and stored for the winter. It is desirable to take the corn down as soon as it is dry enough and before any hard freezes occur and store it in some dry place having good circulation of air, as in the attic or the furnace room, where it will be subject neither to injurious moisture conditions nor the severe freezing weather of late fall and early winter. It is pointed out that if the corn has become perfectly dry it may be left in the open shed all winter without danger or injury from freezing, but that in no case should it be hung up to dry before October 20 the only safe method of handling it is to take it down and store it as described. When the corn is harvested in late November, which is too often the case, it should be taken directly to some place where it can be dried. The danger of artificial heat and where there is good circulation of air.

On this point Professor Lyon says: "Every farmer should hang his corn early in the fall, but after it has completely ripened, and see that it is thoroughly dry before freezing weather. A fairly good drying rack can be made by fastening a string running above the floor in an ordinary crib. Lay narrow boards on these with wide crevices between them. The seed corn should be placed in about one foot or two feet deep. Make several racks, one above the other."

There are several cautions which should be observed in the storing of seed corn. Do not put immature or freshly gathered seed corn in a warm room on the floor or in piles. It will either rot or mold. Both the seed should be hung up and the windows left open for the circulation of air. Seed corn should not be left in barrels or boxes on the floor or porch in piles. It should be properly taken care of as soon as harvested. Do not store corn in the laundry room nor over the stable, as it will gather moisture and be injured by freezing.

The most critical time for corn is during the first month after it is harvested, while it is in the green stage. There is danger that it will rot or grow if the room is warm and the circulation of air is not good or if the corn is put in piles. On the other hand there is danger of its freezing unless protected.

The above statements show quite plainly that if special pains have not been taken during the preceding fall and winter to protect the seed corn from the numerous agencies which may reduce or destroy its vitality, it should not be a matter of surprise if low germination to 45 inches of rainfall is not that planned and built by the engineer, but the deep permeable soils of the west and other arid countries. It is scarcely possible for a man who has not studied the question to realize the large amounts of water that our soils can hold and the tenacity with which, under favorable conditions, soil moisture may be retained. An average western soil if fully saturated will hold over an acre and to a depth of one foot nearly one million pounds of water. Most of our western soils are of great depth, ranging from ten to 100 feet. To a depth of ten feet an average soil could contain nearly ten million pounds of water. To the soil of the west one foot of soil can hold as much water as would be represented by 4.5 inches of rainfall and ten feet of soil can hold what is nearly equivalent to 45 inches of rainfall. This is the rainfall of four of our average years. Talk about storing water—a deep soil is the ideal water reservoir. It is not a matter of holding much water, but they also retain water well.

# IRRIGATING FOR THE WINTER

Is Profitable in Localities Where Soil is Deep.

The irrigating season is over and most of the available water is running to waste. Water in the irrigated west is too precious to be wasted at any time, and it is now a matter of fact that it should be used. Instead of letting it go, it should be brought into the fields that are to be used next year. The best water control for the soil is not that planned and built by the engineer, but the deep permeable soils of the west and other arid countries. It is scarcely possible for a man who has not studied the question to realize the large amounts of water that our soils can hold and the tenacity with which, under favorable conditions, soil moisture may be retained.

An average western soil if fully saturated will hold over an acre and to a depth of one foot nearly one million pounds of water. Most of our western soils are of great depth, ranging from ten to 100 feet. To a depth of ten feet an average soil could contain nearly ten million pounds of water. To the soil of the west one foot of soil can hold as much water as would be represented by 4.5 inches of rainfall and ten feet of soil can hold what is nearly equivalent to 45 inches of rainfall. This is the rainfall of four of our average years. Talk about storing water—a deep soil is the ideal water reservoir. It is not a matter of holding much water, but they also retain water well.

The evaporation from a free water surface such as is found in an ordinary water reservoir is much greater than the evaporation from a bare soil nearly saturated with water. Since, however, there appears to be no danger of the loss of the millenium of western farmers securing 45 inches of water for the fall irrigation, of their farms the soil is far from saturated. The water in the soil is much more consequently much diminished. The water now running to waste in our ditches, canals and rivers should be brought into the land as soon as possible. The water will distribute itself uniformly to considerable depths in the soil and be held there by capillary forces. Small quantities will naturally evaporate from the surface and if the weather is warm a very large quantity of the applied water may escape into the atmosphere. The top surface should be carefully stirred with a harrow or disc as soon as the soil appears dry enough to be worked without danger of puddling. The loose surface thus formed will effectively check any serious loss of water from the soil. In this connection it should be remembered that deep stirring of the soil is much more effective than the shallow cultivation commonly given. It need perhaps not be said that on a shallow soil underlain by gravel or sand irrigation is of little or no value. In fact, on such soils heavy irrigation should not be applied, since in all probability much of the water will soak through to the gravel stratum to be lost. The ideal soil for all irrigation purposes is the deep uniform soil, sandy or clay, through which water will soak and be held uniformly in the form of a thin film around the soil grains. Professor John A. Wilsont, Agricultural College of Utah.

# Union of Child Labor Reform Forces.

The child labor evil is fast reaching a degree of importance when national legislation, or at least national recognition, will become imperative. Laws designed to regulate or restrict the evil have been passed by almost every state legislature, but the indifference or ignorance of officials supposed to enforce the laws renders such legislation practically inoperative. The trouble has come from a lack of public interest. The people at a mass have not understood or appreciated the real danger to the nation, and to the individual bound to result from the working of the child labor system. The subject has more in it than sentiment; it almost reaches the dignity of a grave national peril.

The principal function of the league was to give widespread publicity to the reform movement, and this particular function will continue to be carried on by the league. The league is a department of notes, brief articles, and other material, and it is a reform work in general. This information will be officially furnished by the National Child Labor committee.

# Link's Modern Business College

THE REPRESENTATIVE BUSINESS SCHOOL OF IDAHO.

Stands for the highest, broadest and best in business education. Ideal location at the Twin Falls Transfer Co. office. Courses strictly practical. Faculty composed of specialists. Patronage consists of young men and women who are characterized by intelligence, ambition and earnestness of purpose. Its graduates are sought by business men, bookkeepers, stenographers, cashiers, secretaries, managers and practical office assistants, and by high schools and commercial schools as teachers. A high standard of scholarship is maintained throughout the school. Every department is thoroughly organized. Students receive individual instruction. We teach the celebrated Gregg system of shorthand. It is the easiest to learn, the easiest to write, most rapid, most legible. We specialize in the "DUCY" TYPEWRITER, the only method of operating the typewriter by which great skill is attainable. We perform our whole duty towards our students and the public, in an honest, earnest and conscientious manner. WE TRAIN YOUNG MEN AND WOMEN FOR SUCCESSFUL BUSINESS CAREERS. If you desire a good position we can prepare you in the SHORTEST TIME possible and at the LEAST EXPENSE consistent with thoroughness. Your success is assured if you complete a course in LINK'S MODERN BUSINESS COLLEGE.

# Fall Term Opens Sept. 4, 1906

If you cannot enter on the opening day, enter any time. The sooner you enroll the sooner you will enjoy the benefits. For further information, call, telephone or write. Address

LOUIS PETERSON

Entireman:  
 Notice for Publication—Final Proof.  
 I, Granville E. Paul of Buhl, Idaho, do hereby make entry No. 1563, under the provisions of an act of the legislature of the state of Idaho, commonly known as the Carey act, approved March 2, 1899, which provides that 80% of SW<sup>1</sup>/<sub>4</sub> of section 13, township 38 S., range 14 E., do hereby give notice of my intention to make final proof to establish my claim to the above described land. I expect to prove that I have resided on and cultivated said land as required by law, before W. O. Taylor, representative of the State Land Board, at Buhl, on December 10, 1906, and I hereby certify that I am not the owner of any other land in Idaho. M. Knight, J. A. Howard, E. Deane, F. W. Wise, all of Buhl.

GRANVILLE E. PAUL,  
Entryman.

---

Notice of Publication.

Notice is hereby given that at 2 p. m. on the 10th day of November, 1906, Rodck creek, county of Cassia, state of Idaho, before John F. Hansen, proof taker, there will be a public sale of the water rights for the diversion of 45 cubic feet per second of the waters of Rodck creek, Cassia county, in accordance with the terms and conditions of a permit heretofore issued by the state engineer to the applicant, the name of the person or corporation holding said permit is Dan Albee.

The postoffice address of such person or the place of business of such person is at Rodck creek, county of Cassia, state of Idaho.

The number of such permit is 4, and the date set for the completion of such work is November 11.

Said water to be used for irrigation and domestic purposes.

Said works of diversion will be completed on the date set for completion, and the amount of water which said works are capable of conducting to the place of intended use, in accordance with the plans accompanying the application, for such permit, is 4-5 cubic feet per second. The amount of lands for which water is available is 40 acres, particularly described as follows: 1/4 of NE 1/4 of section 25, township 5 S., range 13 E. B. M.

**JAMES STENPHENSON, Jr.,**  
State Engineer.

# A FARM FOR YOU

## One Crop May Pay for It

**T**HE ESTATE TENANT (AND YOU WHO READ) may be on rented farms, and while getting up early and working late, succeed at the end of the year in having made a fair living, with the bulk of the farm products belonging to the landlord. He can keep this up year after year, and, at the end of any term of years, he is about where he started, with this difference—both he and the farm have perceptibly run down.

The longer he keeps at it the poorer he is. There is a better way. There is nothing new or strange about it. Thousands have tried, and won out. Why not you? Let me tell you how.

There are ways and ways. One of them is to sell out, gather up all the money you can and go west and homestead. One can find any amount of raw land remote from schools, churches and railroads, out of the world and away back where, in the course of time, civilization may penetrate, but there is a better way than that. It is to file upon 160 acres of land at Marysville, Idaho, and start in with all the advantages you left behind and more. You can file upon your land and the perpetual water right will cost you—but \$20 per acre, that will irrigate land that will make better farms than you have left in the East, so far as fertility of the soil and productiveness are concerned. It will make you a better farmer than you can buy for \$75 to \$100 per acre in the East or middle states.

Here is a Further Fact—it may seem remarkable, but it is a fact that the first crop will often pay for the land. It has occurred in hundreds of instances and will occur again.

Where is all this to be done? At Marysville, Idaho, in Fremont county, where the Marysville Canal Improvement company has just completed their canal system, which has been approved by the State Engineer of the State of Idaho. This canal was constructed and the lands were segregated under and according to the Carey law, which gives the settlers the best possible protection, by bringing everything under state supervision, and unless the canal is properly constructed the system will not be accepted by the state.

Any American citizen 21 years of age is entitled to file on 160 acres, even though he may have used all other similar rights.

The reasons why the lands under the Marysville canal are a good investment:

1. The soil is a volcanic loam, exceedingly rich and productive.
2. The water supply is from Fall river and is ample for all time to come.
3. Tracts of land that were cleared this spring and farmed for the first time produced as high as 70 bushels of grain per acre.
4. The total cost of land and water is \$20.50 per acre—the most reasonable price on any irrigated lands in the west. The payments are as follows:
  - \$2.75 cash, the remainder, \$2 per acre each year until paid.
5. The price is so reasonable and the terms so easy that any one who desires a piece of land can arrange to avail himself of this opportunity to secure a good farm.

If you will write either of the firms mentioned below you will receive full information.

## E. A. MILNER HAS NARROW ESCAPE

FALLS INTO DEEP CHANNEL FORMED BY CANAL.

Was Carried Down 200 Feet Before He Could Catch Himself—Young Ladies Give Delightful "Hallowe'en Party"—Newspaper Started.

BUHL, Nov. 7.—Bert Schultman of Twin Falls put the finishing touches on the fancy work on the Buhley residence and departed for home on Friday.

G. D. Ferguson drove to Twin Falls Saturday on business.

E. B. Helzer left for Twin Falls Saturday. He is going out-of-town for the winter.

Dr. James Monroe of Hagerman was a visitor to town Friday. He expressed an intention to purchase property here and make Buhl his future home.

Mrs. Thomas Clinton and two children arrived from St. Louis Saturday and Tom is happy once more. The family is living in the dwelling house back of the Postoffice. Mrs. Clinton is delighted with the country. She is a welcome addition to our society.

There was a dance in the store room on Friday night.

It was well attended and the crowd enjoyed themselves until daylight in the morning.

A railroad grading camp is established about four miles east of town and grading is going on in both directions from that point.

A newspaper project established in the building adjoining the drug store, which will commence operations in about three weeks. The name of the paper will be the Buhl Pioneer. Jack Whitely of Twin Falls is the editor and proprietor.

George R. Dunn and P. J. Lynch have a contract for roofing the big lumber shed of the Milner-Perrine Lumber Co. The young men are experts at the business.

When the changes are complete on the Hinkley residence it will be a handsome bungalow and Hinkley heights will have another nobby home. Sleepy Hollow should wake up.

Burt indulged in his first Hallowe'en party Wednesday night. A. Milner, his daughter Edith and Miss Mary J. Hinkley entertained a large crowd at the residence of Mr. Milner on Hinkley heights. There was music, singing, dancing, refreshments and games were served. It would seem as if the fairies actually had something to do with this entertainment, for old, gray and white-headed men were not danced for so long that they could not remember tried to trip the light fantastic. But the old-folks are not to be blamed too much. How could they resist temptation when it was ladies' choice, and the bewitching fairies actually present in the flesh made them their choice? Among the guests present were Mr. and Mrs. A. J. Barstow, Mr. and Mrs. C. E. Peck, Mrs. F. S. Marshall, Mrs. E. Ward, Mr. and Mrs. E. Enright, Professor and Mrs. E. A. Wyatt, Misses Irene Ford, Helen Ward, Lulu Barstow, Messrs. A. J. Milner, J. B. Hinkley, T. H. Cost, T. R. Allen, P. J. Lynch, Geo. R. Dunn, W. S. Harris, Irving Ward, C. Ward, Harold Ford, Harry Hinkley and P. W. Monahan.

Rapid progress is being made in the construction of the Eastern-McCormick building which that firm is erecting adjoining their hardware store on Main street.

H. T. West of Kimberly, Republican candidate for representative, James W. Shields and E. Cost of Twin Falls addressed the people of Buhl Wednesday night on the issues of the campaign. A good crowd turned out to hear them and frequently applauded the speakers.

C. P. McCarthy of Boise was a Buhl visitor on Wednesday.

A. Toy of Twin Falls drove up to see us Thursday.

W. S. Harris T. R. Allen Harris-Allen Real Estate Co. Real Estate and Insurance Choice lands for sale, deeded. Call on us for bargains.

BUHL, IDAHO

H. O. Ellis, C. H. Keyes and H. H. Flah, all of Chicago, arrived in town Thursday and immediately went out to live on their ranches. Each of them has a quarter section about three miles out of town.

C. Durant of Salt Lake registered at Hotel Buhl Friday.

O. H. Jones, proved up on his ranch Saturday and went on to Seattle to wait for the winter.

Birdie Sanders of Twin Falls left for that town Saturday to make final proof on her ranch.

E. J. Callahan, a Chicago travelling man, made the town Friday.

C. C. Dennis, H. Dennis and C. A. Cunningham, all of Salt Lake City, were here painting the Buhley residence.

H. D. Lockett of Pocatello was a guest of Hotel Buhl for several days last week.

Brook, uncle of the Ward boys, arrived from the Klondike on Sunday and is visiting with his nephews.

E. J. Schuman of Twin Falls spent a few hours in town Saturday.

Joseph Pingree and J. H. Munger of Kimberly were Buhl visitors on Saturday.

R. P. Swank of Twin Falls is doing the painting on the Buhley residence.

Mrs. Herbert Pomeroy and her two children arrived from Gilmanston, Wis., Monday and is with her husband a guest of Hotel Buhl.

Geo. R. Dunn bought John Garfield's lot and blacksmith shop, tools and stock, on Broadway, and the premises are now for rent.

Was made through P. W. Monahan, to whom application can be made by any one desiring to rent the shop.

C. W. Arthur of Abbey-came up on Tuesday to visit.

E. A. Milner had a narrow escape last Tuesday night. He and Frank Thomas were out south of the low line canal about 8 o'clock in the evening as they were returning.

Mr. Milner fell into a deep canyon or channel, which had been cut in the soil by the water running out of the canal.

The canyon is about 15 or 20 feet deep and the water runs swiftly through it. It carried Mr. Milner down about 200 feet before he managed to brace himself against the side of the canyon.

When Mr. Thomas jumped down on a bench about seven or eight feet below the surface of the ground and caught him by the hand and with the assistance of the swift-running current managed to swing him up on the bench, after which Mr. Thomas got up on Mr. Milner's shoulders and pulled him a couple of feet up.

Mr. Milner got out of the canyon. The water was very cold and was only by a miracle that Mr. Milner got out of it alive. He said that he never touched the bottom. Fortunately he has suffered no ill effects from his immersion.

V. L. Hubbard went to Twin Falls Friday to make final proof on his ranch here. He is coming back in the evening to take up his residence.

Hubbard is the inventor of the universal syphon irrigator that was the subject of an article in last week's News. He claims that one man can irrigate 400 acres with it and not waste a drop of the water. According to his description of it, it is a very simple device and very easily made.

The Buhl Lumber company is raising its big lumber shed and clearing off the sage brush around the yards.

The election passed off quietly. There were 116 names registered but only 87 votes were cast.

SCHOOL NOTES.

Enrollment is 482. Quite a number of pupils are suffering from colds.

Miss Ella Robinson teaches the general history class in the high school department.

A fine new regulator has been purchased by the board of directors for the school. An electric siren is being installed and connected with the clock so that each room will have an electric bell that will ring the hours.

Milner - Perrine Lumber Co. Complete Stock of Lumber and other Building Material at Buhl - - Idaho

and half hours. Two of the students of the eighth grade—Donald McPherson and Herbert Seebeck—are very ably performing the work.

The pupils in the eighth grade are struggling with "Partial Payments" this week.

The first and fourth grades had mothers' day on Thursday, when the mothers of the pupils in those grades visited the school to observe the regular work and note the progress being made by their children.

The management of the school would be very glad if more of the parents would visit the school, thus displaying genuine interest in their children's education and advancement.

The teacher and parent should become well acquainted for the best interests of the child.

Dr. Boyd entertained the higher grades of the school in his auditorium, when he delivered a very interesting lecture on the "Anatomy of the Heart," illustrating it by dissecting a beef heart, showing the various valves, arteries, ventricles, etc.

The teachers and pupils were greatly helped by the plain and thorough manner in which the subject was explained. This doctor explained the effects of inhaling and tobacco on the heart and gave the pupils some excellent advice for the betterment of their health.

The High School Literary society entertained the whole school in the auditorium last Friday evening, rendering a very interesting program, which was followed by a social.

Chorus—"Miller of the Don." School Reading. Miss Elea Hubbard Instrumental duet. Miss Vinton and Miss Mankor.

Instrumental solo. Miss Mankor Essay—"Music." Miss M. Shields Instrumental solo. Willie Coburn Recitation—"The Preacher's Son."

Instrumental duet. Miss Mankor and Miss Mankor.

Every number was well received and was greatly enjoyed by both pupils and teachers. The program was well rehearsed, reflecting much credit on both pupils and teachers.

The second grade entertainment for the school will be given by the pupils of the seventh and eighth grades on the afternoon preceding Thanksgiving day, to which all the parents and patrons of the school are cordially invited.

The board of directors as well as the teachers desire to kindly suggest that the parents and friends of the school would have their parties and socials for the young people on Friday and Saturday evenings, and not during the middle of the week.

If parents desire their children to keep up with their grades and perform the work required, we feel assured they will have no suggestion.

Roll of Honor.

The pupils in the city schools who received an average of 90 per cent and over last month at J. O. Jackson are as follows: High school department—James Shields, Kenyon Green, Ida Cryder, Willie Coburn, Blanche Parker.

ALBION, Idaho, Nov. 4.—Editor of The Twin Falls News: During the past week I spent a day and a half in the Twin Falls school and saw how

## Dressing

Turkey dressing is always a live subject at Thanksgiving time. We do not dress turkeys but we do dress men and we dress them right.
